An agreement signed on Dec. 3 provided that the North Vietnamese Government would subsidize the scientific activities of the Pasteur Institute, which would be placed under the control of the Ministry of Health. Professor Huard (Dean of the Faculty of Medicine at Hanoi University), who had negotiated the evacuation of the French wounded from Dien Bien Phu (see 13566 A), was appointed Director of the Institute. M. Sainteny reported on Feb 4, 1955, that the French *lycée* in Hanoi had reopened with more than 800 Vietnamese pupils, and that the *Ecole Française d'Extrême-Orient* was continuing its activities and maintaining contact between scientific circles in North Vietnam and corresponding organizations in France and Asia.

On April 9 an agreement was concluded between the North Vietnamese Government and the *Société Française des Charbonnages du Tonkin*, which owns the important anthracite coalmines situated north-east of Haiphong. Under the agreement the Government agreed to pay the company, as compensation for the equipment and installations remaining *in situ*, an indemnity of 1,000,000 tons of coal over a period of 15 years, at the rate of 95,000 tons a year for the first five years and 52,500 tons a year for the remaining ten years.

An agreement between the Hanoi municipal authorities and the French company responsible for the city's transport services, announced on June 2, 1955, provided for the transfer of the company's equipment to the city authorities against compensation of 300,000,000 French francs, payable over 25 years The compensation was described as "reasonable" by French official spokesmen.

In an interview in November last with the Hanoi correspondent of the *Agence France-Presse*, President Ho Chi-minh expressed the view that economic relations between France and North Vietnam should be based on "the principle of equality and reciprocal interests," and gave an assurance that former French residents who desired to return to Hanoi would be "well received." In reply to a question on the possibility of the Democratic Republic of Vietnam (North Vietnam) remaining within the French Union, President Ho said that the matter could be discussed "between the Governments of the two countries if either desires it," and that the differences in their political systems need present no obstacle to the establishment of "organic links" between them.

B. JORDAN. — New Government.

As a result of differences within the Cabinet after the return of the Jordanian delegation from the Bandung Conference, leading on May 21 to the resignation of the Minister of Justice (Hazza el-Majali), the Prime Minister himself, Tewfik Abulhuda, submitted his resignation to King Hussein on May 29. The King commissioned Said el-Mufti, a former Premier, to form a Government, the composition of which was announced on May 30 as follows:

Said el-Mufti, Prime Minister and Foreign Minister, Hazza el-Majali, Interior; Dr. Djamil Toutunji, Health, Bisharah el-Ghaseeb, Finance; Ali Hasnah, Justice; Said Alaeddin, Education; Farhan Shbilat, Defence; Hamad el-Farhan, Economics, Ali el-Hindawi, Agriculture; Azmi Nashashibi, Posts, Telegraphs, and Airways; Naim Abdulhadi, Public Works, Samaan Daoud, Commerce and Reconstruction.

Said el-Mufti was Prime Minister in 1950, and had been Minister of the Interior in several subsequent Cabinets.

* Ireland is included in the monetary area of the U.K., which, in addition to the dependent overseas territories, also includes the non-participating sterling area

§ Settled half in gold and half in dollars, except for Greece and Turkey which have special settlement arrangements under Art 13(*a*).

† In addition, France repaid 80,000,000 units of account in gold to the Union, which in turn reduced certain creditor-countries' claims on the E.P U. to an equivalent amount (see 14086 A)

‡ Equal to double the amount of credit outstanding, except as follows. (*a*) Greece: 56,700,000 units of account settled fully in gold or dollars under Art. 13(*a*) outside her debtor quota, which is frozen at zero; (*b*) Turkey: 60,000,000 units of debtor quota used, and 188,700,000 units settled fully in gold or dollars under Art. 13(*a*) outside her debtor quota.

‖ Not including the 100 per cent gold payments by France for deficits beyond her quota up to June 30, 1954, which are outside the cumulative accounting position and which are recoverable by France if she has a net surplus for the period after June 30, 1954. Of the total of such payments (369,400,000 units), 68,000,000 were repaid up to March 1955, leaving 301,400,000 units still recoverable.

General Note. In addition to taking into account current operations and adjustments made in connexion with the bilateral repayments instalments, the cumulative accounting position allows for (*a*) the net use of existing resources, initial balances, and special resources; (*b*) interest payments or receipts on credit received from, or granted to, the E.P U; (*c*) the special settlements of the surpluses of Belgium-Luxemburg and Portugal as at July 1, 1952, (*d*) the immediate gold repayments made at the time of the renewal of the E.P.U. on July 1, 1954; (*e*) the initial repayments made by Iceland in the December, 1954, operations; (*f*) there payments in gold made to France in accordance with Art. 10 *bis* (see footnote ‖ above); (*g*) the first two repayments of the special credit granted by Belgium-Luxemburg

Further details of the position of various countries, and of financial and economic measures taken by them in the period under review, are given below:

Belgium. A relaxation of foreign exchange regulations was announced on March 24, giving importers and exporters greater freedom in the choice of currency for their transactions. It was also intended to extend the transferability and convertibility of Belgian and Luxemburg franc accounts opened by foreigners within the Belgo-Luxemburg Economic Union by dividing them into the following five categories:

(*a*) *Foreign "Financial" Accounts*: to be used for all operations involving stock investments and capital transactions They could be opened by any foreigner and would be transferable and convertible into foreign currencies on the free market.

(*b*) *"Convertible" Accounts*. to be used mainly for settlement of current transactions between Belgium-Luxemburg and the dollar area. They would be transferable into all other accounts and convertible on the official and free markets.

(*c*) *"E.P.U." Accounts*: for current transactions with member-countries of the E.P U. They would be transferable into other E.P.U. accounts and convertible into E.P.U. currencies on the capital market.

(*d*) *"Bilateral" Accounts*: for current transactions with countries whose international exchanges were on a bilateral basis.

(*e*) *"Without Agreement" Accounts*: for current transactions with countries not falling into any of the preceding categories. They would be transferable and convertible, on the official market, into all foreign currencies except U.S. and Canadian dollars.

France. It was announced on Feb 16 that the French tourist allowance had been raised from 30,000 francs to 35,000 francs (about £35), and that this amount could be drawn twice a year with a minimum period of two months between the first and second withdrawals

On March 30 the Minister of Finance, M. Pflimlin, announced a further list of goods which could be freely imported from O.E.E.C. member-countries as from April 1 This list (which, in accordance with French undertakings, brought the extent of trade liberalization up to 75 per cent) included horses chemicals, certain kinds of paper, gems, linen, machine tools, electric cookers, surgical instruments, and certain other categories of goods. A number of the items specified were subject to the special compensatory tax of 10 or 15 per cent.

Western Germany. Following a debate in the Bundestag on Jan 27, tariff reductions affecting over 1,000 items were introduced for a period of one year ending on March 31, 1956. The reductions—which, but for a procedural dispute, would have come into force on Sept 1, 1951 (see 14014 A)—applied to one-sixth of all German tariff rates and included to a varying extent all goods subject to tariffs of over 30 per cent Among the more important items affected were motor vehicles, certain kinds of steel, cutlery, jewellery, rayon staple fabrics, glass, chemicals, household appliances, musical instruments, and agricultural implements.

Greece. The Greek Minister of Economic Co-ordination announced on Feb 18 that certain imports would in future have to be partly paid for before their arrival in Greece Imports of luxury goods such as cars, radio sets, and jewellery, would be subjected to a prepayment in drachmas equal to 50 per cent of their value, while other goods would require prepayments ranging from 3 to 15 per cent

Netherlands. It was announced in Amsterdam on Feb 7 that, subject to a permit from the Netherlands Bank, Dutch residents could in future buy abroad, through a bank and against payment in guilders, foreign debentures in U.S or Canadian dollars officially listed on the New York or American Stock Exchanges, on condition that the debentures were immediately imported into the Netherlands. On the following day it was announced that a verbal declaration to a Dutch Customs official would be sufficient for non-residents who, on arriving in or departing from the Netherlands, wished to import or export securities or foreign currencies to a joint value not exceeding 4,000 guilders; previously the maximum had been 1,500 guilders.

During the three months under review the United Kingdom had net surpluses (in sterling) of £4,022,500, £2,295,357, and £9,201,071, each of which was settled half by the receipt of gold from the Union and half by the reduction of credit previously extended to the U.K. by the Union. As a result of these transactions and of the special repayments made each month in accordance with the bilateral repayments arrangements, the total U.K. debt to the Union, which amounted to £122,653,214 on Dec. 31, 1954, had been reduced to £112,308,214 by March 31, 1955.— (O.E.E.C. Information Division, Paris - Times - Financial Times - Le Monde, Paris - Neue Zürcher Zeitung - New York Times)

(Prev. rep. 14086 A; 14014 A.)

B. BAYEUX MEMORIAL. — Unveiling Ceremony.

A memorial built by the Imperial War Graves Commission at Bayeux (Normandy), commemorating 1,837 soldiers of the British Commonwealth and Empire who fell (in the words of the inscription) "in the assault on the Normandy beaches or in the sweep to the Seine, and to whom the fortunes of war denied a known and honoured grave," was unveiled by H.R.H. the Duke of Gloucester on June 5, the eve of the 11th anniversary of D-Day. The ceremony was attended by the British and French Ministers of Defence (Mr. Antony Head and General Koenig), Field-Marshal Lord Montgomery, General Jean Ganeval (representing President Coty), and British, Canadian, and French naval, military and air detachments.

The Bayeux Memorial, designed by Mr. P. D. Hepworth, is in the form of a cloister upheld by four columns, the names of those commemorated being engraved on panels of Portland stone. Built on ground given by the municipality of Bayeux (the first town in Europe to be liberated by the Allies), it faces a cemetery in which the bodies of more than 4,000 British and Commonwealth soldiers are interred. On a frieze above the memorial is carved the Latin inscription *Nos a Gulielmo victi victoris patriam liberavimus*—"We whom he conquered have set free the land of William the Conqueror."

(Prev. rep. 13959 B.)

A. UNITED KINGDOM. — Opening of New Parliament. - The Queen's Speech. - Legislative Programme for New Session.

In view of the state of emergency resulting from the rail strike (see 14240 A), the new Parliament was opened by her Majesty the Queen on June 9 and not, as previously arranged, on June 14. The Government's legislative programme was announced by her Majesty in the following Speech from the Throne :

" My Lords and Members of the House of Commons :—

The grave situation created by the interruption of the railway services has made it necessary to advance the date of the opening of Parliament. I have proclaimed a state of emergency under the Emergency Powers Act, 1920, to enable my Ministers to take the steps needed to maintain supplies and services which are essential to the life of the community.

In their relations with foreign Powers my Government will resolutely go forward with the policies to which they are pledged The United Nations, the Atlantic Alliance, and the new association of Western European Union will all receive their whole-hearted support. They will continue to work in close accord with the United States of America.

Fortified by the growing unity and strength of the free nations, my Government look forward, in a spirit of confidence and good will, to fruitful negotiations with the Government of the Soviet Union.

My Government welcome the progress which has recently been made in the U N. discussions on disarmament, and will zealously maintain their efforts to reach agreement on a comprehensive disarmament plan designed to bring peace and security to all countries.

My Government have warmly welcomed the signature of the State Treaty for the re-establishment of an independent and democratic Austria. The text of this treaty will be presented to you before ratification

In consultation with the other Governments concerned, my Government will continue earnestly to seek a peaceful settlement of the situation in the Formosa Straits.

My Government will continue their efforts to uphold the Indo-China settlement concluded at Geneva, and to promote the peace, security and prosperity of South-East Asia through the regional organizations set up for that purpose

My Government will maintain and strengthen consultation within the Commonwealth for the fulfilment of our common aims and purposes.

The economic development of the Commonwealth and Empire will be steadily encouraged, and my Government will continue to support the Colombo Plan.

My Government look forward to further progress in establishing the British Caribbean Federation.

My Forces will continue to play their full part in maintaining peace and stability in the world.

My Ministers are reviewing the problems of home defence and the measures required to meet new forms of warfare.

Members of the House of Commons :—

Estimates for the public services will be laid before you in due course.

My Lords and Members of the House of Commons :—

The full employment of my people will continue to be the first care of my Ministers. To this end they will actively seek the co-operation of employers and workers in ensuring that full employment and expanding output shall not be jeopardized. They are convinced that, with a steady expansion of production in industry, commerce and agriculture, an ever higher standard of living can be secured for the whole nation.

My Government will actively promote the development of nuclear energy for peaceful purposes.

Legislation, consistent with my Government's international obligations, will be introduced to permit the imposition of countervailing and anti-dumping duties on imported goods.

My Ministers will take such further action as may be required in the public interest to deal with abuses in the field of monopolies and restrictive practices

It will be the aim of my Government to strengthen the balance of payments and to extend overseas markets for our goods and services. Together with the other Governments of the Commonwealth and of Europe, and with the Government of the United States of America, they will work for a further advance towards a free flow of international trade and payments.

My Ministers will not relax their efforts to secure the utmost economy in public expenditure, and by sound handling of financial affairs to check the dangers of inflation.

My Ministers recognize the need for maximum economic production from our land. They will continue, through guaranteed prices and assured markets, to ensure a fair return to producers, and will encourage the efficient marketing of food.

Legislation will be introduced to safeguard the health and provide for the safety and welfare of those employed in agriculture and forestry.

My Ministers will continue to promote the well-being of the fishing industry, and to support the efforts of the White Fish Authority and the Herring Industry Board to improve the condition of the fishing fleets and enable them to operate on an efficient basis.

My Ministers will ensure that steady progress is made with the modernization and re-equipment of the railways, so that they may give better service to the public and provide improved working conditions for railway workers.

My Government will press forward their far-reaching programme of road construction and improvement, and their plans to ease the flow of traffic and reduce danger on the roads. A measure will be laid before you to amend the Road Traffic Acts.

In the light of proposals recently agreed among the local authority associations, my Government are examining the problems of local government in England and Wales with a view to introducing legislation on this subject.

While maintaining a high rate of house-building, my Ministers will encourage action to secure the more rapid clearance of slums in both town and country and to relieve urban congestion. They will introduce such legislation as may be found necessary to further these objects

In step with the continued expansion in the building and improvement of schools, my Government will give close attention to the number and needs of the teaching profession. They have very much in mind the special requirements of rural areas. Secondary schools will be encouraged to provide a choice of courses ; and facilities for technical education will be extended.

My Ministers will propose amendments to the scheme of superannuation for teachers, following the discussions now proceeding with representatives of teachers and local authorities

A Bill will be laid before you to extend the period during which family allowances are payable for children who remain at school.

Legislation will be introduced to amend the law of valuation and rating in Scotland in the light of the recommendations of a departmental committee ; and an inquiry into the working of the arrangements for ascertaining equalization grants in Scotland will be made in consultation with the associations of local authorities.

You will also be invited to pass a measure to amend the law relating to valuation and rating in England and Wales.

Legislation will be proposed to reform the law of copyright on the basis of recommendations in the report of the Copyright Committee.

My Government will proceed with a Bill to enable them to carry out their obligations under the Commonwealth Sugar Agreement, and to bring to an end the present system of State trading in sugar.

My Ministers will bring forward legislation to reduce the pollution of the air by smoke and other causes.

Steps will be taken to extend legal aid to proceedings in county courts in England and Wales, and the jurisdiction of these courts will be increased. A measure will also be introduced to set up new criminal courts at Liverpool and Manchester, and to amend the law relating to recorders and stipendiary magistrates.

An inquiry will be held to consider practice and procedure in relation to administrative tribunals and quasi-judicial inquires, including those concerning land.

Further consideration will be given to the question of the composition of the House of Lords.

Other measures will be laid before you in due course.

I pray that the blessing of Almighty God may rest upon your counsels."

It was pointed out in the Press that the heavy legislative programme envisaged in the Queen's Speech indicated that the first session of the new Parliament would continue for 15 months —i.e., until the autumn of 1956. The 14 Bills mentioned in the Queen's Speech included four which had been introduced in the former Parliament but were uncompleted at the time of the dissolution—the Road Traffic Bill, the Rating and Valuation (Miscellaneous Provisions) Bill, the Bill to extend the jurisdiction of county courts, and the Bill to set up new criminal courts in Liverpool and Manchester.—(Times - Daily Telegraph)

(Prev. rep. Queen's Speech, 1954, 13909 A.)

B. SOUTH-EAST ASIA. — Appointment of British and New Zealand Commissioners.

Sir Robert Scott, British Minister in Washington, was appointed on June 16 as U.K. Commissioner-General in South-East Asia in succession to Mr. Malcolm Macdonald, recently appointed High Commissioner in Delhi. Sir Robert will be responsible to the Prime Minister, although he will report through the Foreign Secretary and the Colonial Secretary respectively on matters concerning those Ministers. Mr. Malcolm MacDonald, as Commissioner-General, was responsible both to the Foreign Secretary and the Colonial Secretary.

Sir Robert served for many years in the Consular Service in China, and later in Singapore. He was chief representative of the Ministry of Information in Singapore at the outbreak of war, and was taken prisoner by the Japanese. After the war he returned to Singapore as counsellor on the staff of Lord Killearn, then Special Commissioner for South-East Asia. From 1948 to 1950 Sir Robert was head of the S.E. Asia Department of the Foreign Office, and from 1950-53 was Under-Secretary in charge of all Far Eastern departments of the Foreign Office.

The N.Z. Minister of External Affairs, Mr. MacDonald, announced on June 3 that New Zealand's first Commissioner in South-East Asia would be Mr. Foss Shanahan, Deputy Secretary of External Affairs, who would have the specific status of Commissioner for New Zealand in Singapore, the Federation of Malaya, and British Territories. In addition, Mr. Shanahan would be New Zealand member of the SEATO Council of Representatives in Bangkok.—(Times - Manchester Guardian - Directorate of Information Services, Wellington)

(Prev. rep. 14222 A ; 14211 A.)

A. MIDDLE EAST. — Soviet Denunciation of Middle Eastern Pacts. - Iraqi Repudiation of Soviet Allegations. - Former British Air Bases in Iraq transferred to Iraqi Command. - Anglo-Iraqi Debts Settlement.

The Soviet Foreign Ministry issued a lengthy statement on April 16 strongly condemning recent " military groupings " in the Near and Middle East, which, it alleged, had been initiated by " certain Western powers." It declared that " if the policy of pressure and threats with regard to the countries of the Near and Middle East is continued, the question should be examined by the U.N. Organization."

" The situation in the Near and Middle East has recently become considerably more tense," the statement declared " The reason for this is that certain Western Powers have been making new attempts to draw the countries of the Near and Middle East into the military groupings which are being set up as appendages to the aggressive North Atlantic bloc After the collapse in 1951 of the plan for the establishment of a so-called 'Middle East Command'—a collapse due to the resistance this plan met in the countries of the Near and Middle East—the U.S.A. and Britain took steps to involve the countries of the Near and Middle East in a roundabout way, singly or in pairs, in certain groupings being set up under their domination. In this way a Turkish-Pakistani pact was concluded in 1954, and a Turkish-Iraqi military alliance last February. By setting up the Turkish-Iraqi alliance, its organizers have succeeded in detaching Iraq from the other Arab countries and increasing tension in the relations between these countries—a situation which suits only the aggressive forces which are trying to sow discord among the countries of this area in their own military strategic interests.

" Matters have gone so far that peremptory demands have recently been made of Syria to join the Turkish-Iraqi alliance These demands are accompanied by threats calculated to intimidate the Government and people of Syria and to compel Syria to reconsider her refusal to take part in aggressive military blocs. Such actions, and the role which the Western Powers allocate to Turkey in the establishment of military blocs in the Near and Middle East, arouse legitimate fears in the Arab countries that Turkey is once again striving to dominate them, and that a direct threat to their national independence is being created "

The statement went on to allege that pressure was also being brought to bear on Egypt, Saudi Arabia, and Persia, and declared that the policy of setting up " military groupings " in the Near and Middle East was inspired by " the desire of certain Western Powers for the colonial enslavement of these countries." It added that the " military blocs " in the Near and Middle East were needed not by the countries of that area, but by " those aggressive American circles which are trying to establish domination there," and by " those British circles which, by means of these blocs, are trying to retain and restore their shaken positions." The Note asserted in this connexion that the new Anglo-Iraqi agreement " enslaves Iraq, ensures for Britain the preservation of her military bases in that country, and subordinates the Iraqi Army to British officers."

After strongly refuting the suggestion that the new agreements were necessary to meet the " Soviet menace " to the Near and Middle East area, and declaring that the Soviet Government regarded the national aspirations of the peoples of the area with " full understanding and sympathy," the statement continued : " The Soviet Union cannot remain indifferent to the situation arising in the Near and Middle East, since the formation of these blocs and the establishment of foreign military bases on the territory of the countries of the Near and Middle East have a direct bearing on the security of the U.S.S.R This attitude is all the more understandable since the U.S.S R. is situated very close to these countries—which cannot be said of other foreign Powers, for instance, of the United States, which is thousands of kilometres from the area. . . ."

In conclusion, the statement referred to the foreign policy declaration made by the Supreme Soviet on Feb. 9 (see p. 14060, second column), declaring in this connexion : " The Soviet Union believes that good relations among States, and real security, can be ensured on the basis of the practical application of the principles enumerated in that declaration—namely, equality ; non-interference in domestic affairs ; non-aggression and the renunciation of encroachment on the territorial integrity of other States ; and respect for sovereignty and national independence. The Soviet Government would support any steps by the countries of the Near and Middle East towards putting these principles into practice in the relations between them and the Soviet Union. . . ."

No official comment on the Soviet statement was made in any of the Western capitals, but the Iraqi Foreign Minister, Musa Shabander, denied the Soviet allegation that the Turkish-Iraqi treaty had been concluded under any sort of pressure from the Western Powers. He emphasized that the treaty had, on the contrary, been concluded " completely free of any foreign pressure and according to our free will."

The British air base at Habbaniya (Iraq) was formally transferred to Iraqi command on May 2 in accordance with the terms of the Anglo-Iraqi agreement. King Feisal II of Iraq attended the ceremony, together with members of the Iraqi Government and the British Ambassador in Baghdad, Sir Michael Wright. Similar ceremonies were held at Shaiba and Basra, the other British bases in Iraq evacuated under the agreement.

On May 1 Britain and Iraq signed an agreement finally settling outstanding debts between the two countries resulting from the use of each other's services and facilities during the war. It provided that Iraq would pay the sum of £150,000 into a trust fund (administered by two Iraqi and two British representatives) which would be used to promote good relations between the two countries through educational, scientific, cultural, humanitarian, and other channels.—(Soviet Weekly - Times - Manchester Guardian) **(Prev. rep. 14137 A.)**

B. FRANCE - GERMANY. — Establishment of Franco-German Chamber of Commerce. - Plans for Economic Co-operation in Europe, French Overseas Territories, and Under-developed Countries.

A Franco-German Chamber of Commerce was inaugurated in Paris on June 15 by Dr. Ludwig Erhard, the West German Minister for National Economy, and M. Pierre Abelin, French Secretary of State for Economic Affairs. The creation of this body had been decided upon by Dr. Adenauer and M. Mendès-France during their discussions at La Celle-Saint-Cloud in October, 1954.

The statutes of the joint Chamber of Commerce were drawn up by M. Jacques Fougerolle (president of the Paris Chamber of Commerce), M Paul Jacquel (president of the Strasbourg Chamber of Commerce), and M Georges Villiers (president of the French National Council of Employers, the *Conseil national du patronnat français*), on the French side , and Herr Hammerbacher (president of the *Deutscher Industrie- und Handelstag*), Herr Fritz Berg (president of the German Federation of Industries, the *Bundesverband der deutschen Industrie*), and Herr Doerpenbach (president of the Stuttgart Chamber of Commerce), on the German side. Both countries are equally represented in the joint Chamber, M. Fougerolle and M. Villiers representing French interests and Herr Hammerbacher and Herr Berg representing German interests

The Franco-German Chamber of Commerce, the seat of which will be in Paris, will study *inter alia* matters relating to exchange liberalization, Customs barriers, and currency convertibility. It will be open to membership by the following organizations in France and Western Germany : (1) companies and groups (whatever their juridical form) concerned with production, distribution, banking, insurance, and transport , (2) Chambers of Commerce, or associations of Chambers of Commerce , (3) central organizations in trade and industry.

It was disclosed in Paris early in March that French and German industrialists and businessmen had held discussions, both in the French capital and in Cologne, on Franco-German economic co-operation in Europe and the French overseas territories, and that a special committee had been set up to study such questions as French investment in Germany, German investment in France, and joint Franco-German investment in the French overseas territories and under-developed countries. It was stated in *Le Monde* that special consideration had been given to (1) French investment in the German chemical, electrical, and other industries ; (2) German investment in the French synthetic rubber and synthetic textile industries ; (3) Franco-German co-operation in the exploitation of mineral resources in the *territoires d'outre-mer* and under-developed countries, and also in the construction of hydro-electric and railway projects.—(Le Monde, Paris - Frankfurter Allgemeine Zeitung) **(Prev. rep. 13845 A.)**

C. CENTRAL AFRICAN FEDERATION.—Formation of Private Development Corporation.

Sir Ernest Oppenheimer, chairman of the Anglo-American Corporation of South Africa and of Rhodesian Anglo-American Ltd., announced in Salisbury on June 16 that these two companies had registered a new company in Rhodesia called the Anglo-American Rhodesian Development Corporation Ltd., with an authorized capital of £2,000,000, of which the two companies would subscribe initially £500,000. The objects of the new company would include provision for development of the natural and other resources of the Federation ; assistance where required for private undertakings and public works of value to the Federation ; and the raising of money in other parts of the world for these purposes. Sir Ernest said that companies in the group which had funds for investment would make this money available to the development corporation, which in turn would lend it at current rates of interest for carrying out projects of which it approved. (Financial Times)

D. SOUTH AFRICA. — Five-year Extension of Governor-General's Term of Office.

It was announced from Buckingham Palace on June 11 that, at the request of her Majesty's Ministers in South Africa, the Queen had approved a five-year extension of the term of office of Dr. Ernest George Jansen as Governor-General of South Africa from Jan. 1, 1956.—(Times) **(Prev. rep. 10976 B.)**

A. UNITED KINGDOM. — General Election Results.

The complete results of the general election held on May 26 are given below, the following abbreviations being used to indicate the political parties: C.—Conservative; Lab.—Labour; L.—Liberal; Nat. L.—National Liberal; U.U.—Ulster Unionist; Ind.—Independent; I.L.P.—Independent Labour Party; Comm.—Communist; N.I. Lab.—Northern Ireland Labour Party; Irish Lab.—Irish Labour Party; Scot. Nat.—Scottish Nationalist; Welsh Nat.—Welsh Nationalist.

In the 410 constituencies left unchanged by the Boundary Commissions, comparison is given with the result at the last (1951) general election—"gain" or "no change," as the case may be. Constituencies whose boundaries were extensively revised are indicated by "major revision," whilst those in which the boundary changes were small are indicated by "minor revision." The new constituencies are also indicated.

The state of the parties in the new House of Commons (excluding The Speaker) is : Conservatives and associates, 344, Labour, 277 ; Liberals, 6 ; Sinn Fein, 2.—(Times)

(Prev. rep. General Election, 14225 A.)

Corrigendum. It was inadvertently stated in 14225 A (first paragraph of second column) that Mr. E. G Gooch (Lab) had been returned for Norfolk South. Mr. Gooch's constituency is in fact Norfolk North, whilst the Member for Norfolk South is Mr. John Hill (Conservative).—(Ed. K.C.A.)

A. UNITED KINGDOM. — Liberal Party. - New Leader in House of Lords.

The Liberal peers, meeting on June 13, unanimously elected Lord Rea as leader of the Liberal Party in the House of Lords in succession to Lord Samuel (84), who had relinquished the post on June 8 after having held it for 14 years. Lord Rea (55), president of the Liberal Party for 1955, had been Liberal Chief Whip in the Lords since 1950. He was succeeded in that post by Lord Amulree.—(Manchester Guardian)

B. LITERATURE. — New Edition of Dr. Johnson's Works. - Yale University Project.

It was announced on June 4 that Yale University (U.S.A.) would sponsor the publication of a new edition of the works of Dr. Samuel Johnson, which would include writings identified as Dr. Johnson's during the past 25 years. A committee of 17 distinguished American and British scholars will supervise the new edition, which, when completed, is expected to comprise about 15 volumes. (Times - New York Times)

C. EASTERN GERMANY. — Demand for Cancellation of Paris Agreements as Pre-condition for German Unification. - Statement by Herr Grotewohl. - "Defensive Measures" in Eastern Germany.

The East German Government issued a declaration on March 25 announcing that it had begun to take "measures to protect the German Democratic Republic" as a result of the ratification of the Paris agreements by the West German Government. [Instruments of ratification of the Paris agreements had been signed in Bonn by President Heuss on the previous day, March 24—see 14169 A.]

The East German declaration stressed that the unification of Germany could only be attained by the cancellation of the Paris agreements It continued . "The [West German] Federal Parliament, by ratifying the Paris agreements, and President Heuss, by signing them, have ignored the demand of the German people for unity and peace. At the same time the Adenauer Government seeks to create the impression that ratification of the agreements is favourable to the reunification of Germany, and that negotiations will shortly be held on the solution of the German problem The Government of the German Democratic Republic cannot permit this misleading statement to go unanswered. .

"The German people must realize that the Western Powers, Dr Adenauer, and the Federal Parliament, by ratifying the agreements, are destroying the possibility of negotiations on the peaceful reunification of Germany. . . By pressing the Paris agreements through, the Western Powers and Dr. Adenauer have proved that they reject the reunification of Germany on a democratic and peaceful basis, and that they are ready to sacrifice reunification for the inclusion of Western Germany in an aggressive pact system.

"Exactly contrary action has been taken by the Soviet Union and the People's Democracies, with their declarations on the ending of the state of war with Germany . . and with their proposals for the creation of a system of collective security in Europe. The Governments of the U S S.R and of the German Democratic Republic have repeatedly declared their readiness to negotiate They have at the same time announced that the ratification and implementation of the Paris agreements would make negotiations on the reunification of Germany impossible. . . .

"In the new situation that has been created, the Government of the German Democratic Republic has begun to take measures to protect the Democratic Republic, in accordance with the Declaration of the Moscow Conference of Dec. 2, 1954 (13936 A). The Federal Parliament must bear full responsibility for everything arising out of its decision [to ratify the Paris agreements] . . ."

The Prime Minister of Eastern Germany (Herr Otto Grotewohl), speaking at a Berlin demonstration on May 8 to celebrate the 10th anniversary of the overthrow of Nazism, reiterated that the cancellation of the Paris agreements was "the necessary pre-condition for the reunification of Germany." He announced at the same time that the *Volkspolizei* [the para-military police force in Eastern Germany, estimated at 100,000 to 120,000 strong] would be "developed into an effective instrument of defence."

Herr Grotewohl outlined his Government's policy for the reunification of Germany as follows : (1) annulment of the Paris agreements ; (2) "an immediate understanding between the two parts of Germany on the removal of militarism, and on the preparation of free all-German elections to a National Assembly" ; (3) a joint request to the four Powers (Britain, France, the U.S.A. and the U.S.S.R.) by the East and West German Governments for "the speedy conclusion of a peace treaty and the withdrawal of all occupation troops" ; (4) continuous consultations between East and West Germany on "all questions of economic, social, and cultural co-operation."

After declaring that Eastern Germany would "take all necessary measures to defend herself against the West German militarists and neo-fascists," Herr Grotewohl referred to the Warsaw Conference which had been convened for May 11 (see 14249 A). "The pact to be concluded in Warsaw," he said, "will serve peace and bar the way to aggression in Europe. The history of the last few decades will not be repeated. This time the military expansion of the American and West German militarists will be brought to a decisive halt in its very first stages. . . ."

Herr Grotewohl said that the conclusion of the Austrian State Treaty had "shown the way to the solution of the German problem," adding in this connexion : "Austria will tolerate no foreign military bases on her territory and will enter into no unilateral military alliances. . . . The solution of the German problem on this basis is possible if the right conditions are created. This means for Western Germany the steering of an independent course and the removal of the Paris agreements."

The newspaper *Neues Deutschland*, official organ of the Socialist Unity (Communist) Party, announced on April 8 that East German youths between the ages of 18 and 22, and members of the Socialist Unity Party in particular, would be called up for two years' service in the garrisoned People's Police (*kasernierte Volkspolizei*). Whilst it was not stated whether this service would be compulsory or voluntary, the paper said that the two-year service programme "for the protection of the homeland" would be "a clear answer to the militarists in Western Germany."—(Der Tagesspiegel, Berlin - Manchester Guardian)

JUNE 18—25, 1955

A. YUGOSLAVIA - SOVIET UNION. — Soviet Ministerial Mission to Belgrade. - Agreement on Normalization of Soviet-Yugoslav Relations.

It was simultaneously announced in Belgrade and Moscow on May 14 that the Soviet and Yugoslav Governments, "in their mutual desire to improve relations between the two countries and to strengthen peace," had agreed on a meeting of their representatives "at the highest level" in the Yugoslav capital at the end of May.

The announcement added (*a*) that the Soviet delegation would be led by M. Nikita Khrushchov, First Secretary of the Central Committee of the Soviet Communist Party, the other members of the delegation being Marshal Bulganin (Prime Minister of the U.S.S.R.), M. Mikoyan (First Deputy Premier), M. Shepilov (chairman of the Foreign Affairs Commission of the Soviet of Nationalities, and editor of *Pravda*), M. Gromyko (First Deputy Minister of Foreign Affairs), and M. Kumykin (Deputy Minister of Foreign Trade); and (*b*) that the Yugoslav delegation would be led by President Tito, its other members being MM. Kardelj, Rankovich, and Vukmanovich (Vice-Presidents of the Federal Executive Council), M. Koca Popovich (State Secretary for Foreign Affairs), M. Todorovich (a member of the Federal Executive Council), and M. Micunovich (Under-Secretary for Foreign Affairs).

The U.S., British, French, Greek and Turkish Ambassadors in Belgrade were informed by M. Popovich of the impending Soviet-Yugoslav talks before the official announcements were issued in Belgrade and Moscow. It was authoritatively stated that M. Popovich had given "firm assurances" that the talks would involve no change in Yugoslavia's foreign policy, that her attitude towards the Western countries would remain unchanged, and that she would continue, as hitherto, to adhere to the Balkan Pact. An official spokesman of the Yugoslav Foreign Office said that the progressive normalization of Soviet-Yugoslav relations during the past two years had made it necessary to "discuss and clarify certain questions that are still outstanding," and that the solution of these questions would make possible "a general improvement in the relations between the two countries, thereby contributing to the lessening of world tension."

In a speech at Pula (Pola) on May 15, President Tito emphasized that Yugoslavia would conduct the talks with the U.S.S.R. "on an equal footing and as an independent country." In the course of his speech he intimated that the suggestion for high-level talks between the two countries had come from the Soviet side, and welcomed "this bold decision" on the part of the Soviet leaders.

President Tito began his speech by referring to a number of encouraging developments in the international situation—the ending of the Korean and Indo-China wars, the settlement of the Trieste question, the signing of the Austrian State Treaty, the proposals of the Western Powers for "Big Four" talks (see 14189 A), and the recent Soviet proposals on disarmament (see 14249 A). He continued:

"The normalization of relations between Yugoslavia and the Soviet Union . . . was the most acute problem of the past six years, during which Yugoslavia had to bear enormous pressure and to put up with every conceivable difficulty and affront. But we held out, and the leaders of the Soviet Union have boldly approached the question and offered us the normalization and improvement of relations between the two countries. I welcome such a bold decision on the part of the responsible Soviet leaders, and their resolve to come and conduct talks. In the course of the preparations for this meeting we have let them know . . . that we wish to talk on an equal footing and as an independent country. The Soviet leaders have been directly informed of all this, and have decided to come on this basis to discuss problems which still exist between our two countries, so that the normalization of relations may be accomplished firmly and realistically without any illusions being harboured on either side. These talks will be carried on before the world. The West and the rest of the world will know what we have talked about and on what we have reached agreement. We have no intention of manoeuvring behind the scenes or of doing anything at the expense of anyone else."

After emphasizing that Yugoslavia would not join any blocs, and that the peace of the world could not be maintained by ideological divisions, President Tito called for the ending of such groupings and for "active co-existence between States and people, irrespective of differences in their political systems." The Soviet-Yugoslav talks, he declared, would be conducted on the basis of "co-operation and co-existence" between Yugoslavia on the one hand, and the U.S.S.R. and the countries of the Soviet bloc on the other, and would aim at a lasting solution of outstanding questions.

The President went on to denounce the idea that any settlement of world problems could be achieved through an "arms race," which would inevitably lead to war. "For that reason," he declared, "we were against joining the Atlantic Pact. We consider that the time is ripe for talks and for an end of sabre-rattling. . . Today the moral factor has become one of the most powerful weapons in the world. It has acquired the character of universality. . . . That is why I went to India and Burma—not because those countries have huge forces, but because their peoples long for peace and are imbued with a high moral outlook. We wish to join with this force and jointly to fight for peace. We are not seeking to create a 'third force.' We are creating a force of moral strength which is made up of all those in the world who love peace and freedom."

In conclusion, President Tito expressed gratitude at the help which Yugoslavia had received from the Western countries, particularly from the United States. He added "No-one must think that Yugoslavia, after having received all she needs, is now turning her coat. She still stands by, and will always stand by, the same principles—not to depart from her independent course; to have her hands free in international affairs; and to use the moral influence she has acquired for the prevention of war and the preservation of peace. We shall never lift our hands against anyone who does not encroach upon our country. We shall never be the weapon of anyone who might eventually have aggressive intentions against someone else. We wish to maintain good relations with the West, just as we wish to improve relations with the Soviet Union and the other Eastern countries."

The Soviet delegation arrived in Belgrade by air on May 26, and was met at Zemun airport by President Tito and members of the Yugoslav Government. Before leaving the airport, M. Khrushchov read a declaration in which he expressed the Soviet Government's "sincere regret" for the Soviet-Yugoslav tension of recent years, and its determination to "sweep away all the bitterness of that period." M. Khrushchov accused the late Lavrenti Beria (see 13303 A), the late Viktor Abakumov (see 13978 D), and other "exposed enemies of the people" of having deliberately "provoked bitterness in the relations between Yugoslavia and the U.S.S.R.", and said that their responsibility had been established by a thorough investigation of "the materials upon which the grave accusations against, and insults to, the leaders of Yugoslavia were based at the time."

After extending "cordial greetings to the fraternal peoples of Yugoslavia," M. Khrushchov referred to the "age-old friendship" between the Soviet and Yugoslav peoples, to their joint struggle against the Germans during World War II, to the "courageous military exploits of the People's Liberation Army under the leadership of Marshal Tito," and to the fact that "it was here in Belgrade that Yugoslav and Soviet soldiers together struck at the enemy and liberated this ancient Slav city from the Hitlerite invaders."

M. Khrushchov went on to recall that the good relations which had existed between the U.S.S.R. and Yugoslavia in the immediate post-war years had been "disturbed in the years that followed." He continued: "We sincerely regret that, and we resolutely sweep aside all the bitterness of that period. On our side, we have no doubt about the part played by Beria, Abakumov, and other exposed enemies of the people in provoking the bitterness in the relations between Yugoslavia and the U.S.S.R. We have thoroughly investigated the materials upon which the grave accusations against, and insults to, the leaders of Yugoslavia were based at the time. The facts indicate that those materials were fabricated by the enemies of the people, the contemptible agents of imperialism who had fraudulently wormed their way into the ranks of our party. We are deeply convinced that the clouded period in our relations is past. We, on our part, are prepared to take the necessary steps to remove all obstacles to the complete normalization of relations between our countries . . . The Soviet delegation voices the conviction that the coming talks will lead to the development and strengthening of political, economic, and cultural co-operation between our peoples. All the conditions for that co-operation exist: the historic friendship of the peoples of our countries, the glorious traditions of the revolutionary movement, community of ideals in the struggle for the peaceful progress and happiness of the working people."

M. Khrushchov continued: "True to the teachings of Lenin, the founder of the Soviet State, the Soviet Union bases its relations with other countries, big and small, on the principles of the peaceful co-existence of States; of equality, non-interference, and respect for sovereignty and national independence, of non-aggression; and of the recognition that any encroachments by States upon the territorial integrity of other States are impermissible. We hope that the relations between our countries will develop on the basis of these principles for the good of our peoples. That will be another major contribution to the efforts to ease international tension and to strengthen general peace. We fully appreciate Yugoslavia's desire to promote relations with all States, in the West and in the East. We believe that greater friendship between our countries will help to improve relations between all countries, irrespective of their social systems, and to advance the cause of peace."

In conclusion, M. Khrushchov laid stress on the desirability of "mutual confidence and understanding" between the Communist parties of the Soviet Union and Yugoslavia.

After discussions between the Soviet and Yugoslav delegations in Belgrade on May 27-28, the talks were continued on May 29-30 at Marshal Tito's villa on the island of Brioni, off the Istrian coast. Before leaving the Yugoslav capital for Brioni, the Soviet delegation attended a reception given in their honour at the White Palace by President and Madame Tito, laid wreaths on the Tomb of the Yugoslav Unknown Warrior on Mount Avala, visited the Yugoslav Nuclear Research Institute, and attended a gala performance at the Yugoslav National Theatre. While on Brioni, President Tito and Marshal Bulganin went for a cruise on the former's yacht and paid visits to the ports of Pula and Rovinj (Rovigno).

President Tito and the other members of the Yugoslav delegation returned to Belgrade in the evening of May 30, whilst M. Khrushchov, Marshal Bulganin, and M. Mikoyan went on a two-day sight-seeing tour of Croatia and Slovenia, during which they visited the shipyards at Rijeka (Fiume), a turbine factory at Litostroj, and an electrical factory at Zagreb.

The Soviet delegation returned to Belgrade on June 2, on which date a joint declaration was issued by the Yugoslav and Soviet Governments. The declaration, signed by Marshal Bulganin and President Tito, said that the negotiations had taken place "in a spirit of friendship and mutual understanding"; that views had been exchanged "on international problems affecting the interests of the U.S.S.R. and the Federal People's Republic of Yugoslavia"; and that political, economic, and cultural relations between the two countries had been "examined from every aspect." It was divided into three parts: (1) a statement of general principles on which both Governments were in agreement; (2) a statement on the attitude of the two Governments to international problems, and (3) specific measures to normalize relations between the Soviet Union and Yugoslavia. The declaration is reproduced below under these three headings:

General Principles.

After stating that the negotiations had shown "the sincere desire of the two Governments for the development of all-round co-operation between the U S S.R. and the Federal People's Republic of Yugoslavia, which is fully in conformity with the interests of the two countries, and also with the interests of peace and socialism," the Declaration continued:

"In examining the questions which were the object of the negotiations . . . the Governments proceeded from the following principles.

(1) The indivisibility of peace, upon which collective security can alone be based.

(2) Respect for sovereignty, independence, and territorial integrity, and for equality between States in their mutual relations and in their relations with other States

(3) Recognition and development of peaceful co-existence between nations, irrespective of ideological differences and differences of social systems, which implies the co-operation of all States in international relations in general, and in economic and cultural relations in particular.

(4) Mutual respect and non-interference in internal affairs for whatever reason—whether of an economic, political, or ideological nature—since questions of internal organization, of differences of social systems, and of different forms of Socialist development, are exclusively a matter for the peoples of the different countries.

(5) Development of mutual and international economic co-operation, and the removal of all those factors in economic relations which hamper trade and retard the development of productive forces, both in the world and within the bounds of national economies.

(6) Assistance through the appropriate U N agencies, and also in other forms that are in conformity with the principles of the United Nations, both to the national economies and to economically underdeveloped areas, in the interests of the peoples of those areas and in the interests of developing the world economy.

(7) Discontinuation of all forms of propaganda and misinformation, as well as of other actions which spread mistrust or which in any way impede the creation of an atmosphere for constructive international co-operation and peaceful co-existence among the nations.

(8) Condemnation of all aggression and of all attempts to establish political and economic domination over other countries.

(9) Recognition of the fact that the policy of military blocs increases international tension, undermines confidence among the nations, and increases the danger of war."

Attitude to International Problems.

"Both Governments base their policy on the principles enunciated in the U.N. Charter They are in agreement that further efforts should be made to strengthen the role and authority of the United Nations, which would, in particular, be confirmed by giving the People's Republic of China the representation to which it is entitled in the U.N. Organization. The admission to [U.N.] membership of all other countries which meet the requirements of the U.N. Charter would also be of significance.

Both Governments are agreed that all nations should make fresh efforts to achieve positive results on such vital questions for the peace of the world as the reduction and limitation of armaments, the prohibition of atomic weapons, the establishment of a general system of collective security, including a system of collective security in Europe based on a treaty, and the use of nuclear energy for peaceful purposes.

Through such efforts an atmosphere would be created which would make possible a solution by peaceful means of such urgent problems as an agreed settlement of the German question on a democratic basis, in conformity with the wishes and interests of the German people and with the interests of general security, and recognition of the legitimate rights of the People's Republic of China with regard to Taiwan [Formosa].

Both Governments welcome the results of the Bandung Conference as a significant contribution to the idea of international co-operation, and as evidence of the efforts of the peoples of Asia and Africa towards the strengthening of their political and economic independence. They consider that all this contributes to the strengthening of world peace."

Normalization of Soviet-Yugoslav Relations.

"Full attention was given to an analysis of the relations between the two countries up to the present time, and to the prospects for their further development Taking into account the fact that in recent years their relations have been considerably disturbed, which has done harm both to the interested parties and to international co-operation, the Governments of the U.S S R and of the Federal People's Republic of Yugoslavia, expressing their determination to develop their future relations in the spirit of friendly co-operation, and proceeding from the principles outlined in this Declaration, have agreed on the following:

(1) To take all necessary measures to introduce a normal treaty situation, on the basis of which they will regulate and ensure the normal development of relations with the aim of expanding co-operation between the two countries in all spheres in which the two Governments are interested.

(2) To strengthen economic ties and expand economic co-operation between the two countries To this end, the two Governments have agreed to take the necessary measures to eliminate the effects of the disturbance of the normal treaty situation in the economic relations between the two countries. They have also agreed to conclude the necessary treaties to regulate and facilitate the development of economic relations in the direction indicated above.

(3) Both governments have expressed their readiness to conclude a convention on cultural co-operation.

(4) The two Governments have agreed to conclude a convention on information services in the spirit of the U.N decisions, and on the basis of reciprocity as regards the status and privileges of these services on the territory of each of the contracting parties.

(5) Supporting the U.N. recommendations on the development of co-operation among all countries in the peaceful uses of atomic energy, the two Governments have agreed to establish mutual co-operation in this field.

(6) The two Governments have agreed to conclude treaties with the aim of settling questions concerning the citizenship or repatriation of nationals of one of the contracting parties who are on the territory of the other. They have agreed that the treaties should be based on respect for the principles of humanity, and on the generally recognized principle of the voluntary decision of the persons concerned. They have also agreed to protect the rights of nationals of the other party on their respective territories, acknowledging that this also includes the right of nationals to retain the citizenship which they had prior to their arrival on the territory of the other contracting party.

(7) In the spirit of the peace-loving principles outlined in this Declaration, and also to make the peoples of their countries know and understand each other better, the two Governments will support and facilitate co-operation between public organizations of the two countries through contacts, exchange of Socialist experience, and free exchange of views.

(8) The two Governments will make every effort to carry out the decisions of this Declaration in the interests of developing relations between the two countries, of promoting international co-operation, and of strengthening peace."

The Soviet delegation left Belgrade on June 3, visiting Sofia and Bucharest before returning on June 5 to Moscow. In Sofia, M. Khrushchov and the other members of the delegation had a meeting with M. Chervenkov (the Bulgarian Prime Minister) and other Bulgarian political leaders, whilst in Bucharest discussions were held with M. Gheorgiu-Dej (the Rumanian Prime Minister), M. Gheorghe Apostol (First Secretary of the Rumanian Communist Party), M. Andras Hegedüs (Prime Minister of Hungary), M. Matyas Rakosi (First Secretary of the Hungarian Communist Party), and M. Antonin Novotny (First Secretary of the Czechoslovak Communist Party).

Addressing a mass meeting in Sofia on June 3, M. Khrushchov said *inter alia*: "All-round co-operation between Yugoslavia and the Soviet Union is entirely in the interests of the two countries, of other nations, and of the cause of peace and socialism. The Soviet-Yugoslav talks have ended the period in which relations between the two countries were disturbed. . . . Henceforth the road is open for the development of friendly relations between the Soviet Union and all the People's Democracies and Yugoslavia." A communiqué was issued stating that Bulgaria welcomed the normalization of Soviet-Yugoslav relations and would herself seek to improve her relations with that country, and also with Greece and Turkey.

After the meeting in Bucharest (on June 4) between the Soviet, Rumanian, Hungarian, and Czechoslovak leaders, a communiqué was issued expressing "satisfaction at the friendly co-operation achieved between the U.S.S.R. and Yugoslavia," and "the hope and conviction [of the Rumanian, Hungarian, and Czechoslovak leaders] that friendly relations would be established between their countries and Yugoslavia in the interests of peace and socialism."

It had been announced in Belgrade on May 26, shortly before the Soviet delegation's arrival, that a Yugoslav parliamentary delegation had been invited to visit the U.S.S.R. The president of the Yugoslav National Assembly (M. Pijade) had previously sent a letter to the Supreme Soviet welcoming its proposal for exchange visits by parliamentary delegations of different countries (see page 14060, second column), and expressing Yugoslavia's readiness for an exchange of Soviet and Yugoslav delegations.—(Tanjug Agency, Belgrade - Soviet Weekly)

(Prev. rep. Soviet-Yugoslav Relations, 14016 A.)

A. UNITED KINGDOM. — Army Estimates, 1955-56.

The Army Estimates for 1955-56, together with an accompanying memorandum by the Secretary for War (Mr. Antony Head), were published on Feb. 23, 1955. The net total of £470,000,000 shown in the Estimates included the following items (1954-55 figures in parentheses): Mechanical Transport £58,700,000 (£80,000,000), Ammunition, £25,700,000 (£32,600,000); Guns and Small Arms, £6,400,000 (£7,700,000); Signals and Wireless Equipment, £7,600,000 (£13,100,000); Food and Ration Allowances £44,000,000 (£47,500,000); Liquid Fuel, etc., £10,100,000 (£14,100,000); Clothing, £18,100,000 (£48,100,000); General Stores, £24,300,000 (£32,300,000).

The memorandum explained that although the Army's world-wide commitments had eased a little, Britain's limited resources still made it essential to develop the highest degree of versatility and flexibility. In order to increase mobility without loss of fighting power, it would be necessary to simplify weapon systems, to reduce the number and variety of vehicles, and to speed up supply, and experimental organizations would be tried out for these purposes during 1955. Some existing weapons would be withdrawn altogether and others changed, alterations would be made in the composition of formations, and severe cuts would be made in the number of vehicles, all with the aim of increasing mobility on and off the battlefield, whilst at the same time adding to effective fighting capacity.

Although at present the division appeared likely to remain the fighting formation of future armies (the memorandum continued) its detailed organization and equipment would probably undergo radical change as new weapons—especially tactical nuclear weapons—came into use. The most difficult problems would probably concern supply, since the development of transport suitable for nuclear warfare conditions had lagged behind that of nuclear weapons themselves. The best answer to the threat offered by these weapons to large terminals and established communication routes probably lay in the use of cheap cross-country lorries developed from lorries now being mass-produced for civilian purposes, aided by vertical-lift and short-take-off aircraft able to lift heavy loads and to operate independently of airfields. Progress would nevertheless be slow, since quantity production of helicopters and other vertical-lift aircraft was "still some way off".

The memorandum explained that the reduction in the amount to be spent in 1955-56 on new weapons and equipment, as compared with recent years, was due to the fact that the introduction of new vehicles had been virtually completed, whilst the full production stage of recently-developed weapons had not been reached. "The main weapons for which we shall have to make future provision," it continued, "are the *Conqueror* tank, the L.70 anti-tank gun, the F.N rifle, and the new sub-machine gun. We have also a very comprehensive programme of wireless equipment and a new range of bridging and ferrying equipment. Finally, we have . . a surface-to-surface guided weapon which will enable the commanders in the field to use guided missiles when and where required, irrespective of weather conditions."

After saying that close liaison was being maintained with scientists and industrialists and with other Commonwealth armies, and that ideas would be exchanged with other NATO land forces, the memorandum concluded: "The aims are clear: to organize, train, and equip the Army so that it can make full use of the vastly greater fire-power that nuclear weapons are putting into its hands, avoid destruction by the enemy's nuclear weapons, deal more effectively with 'cold war' tasks, and be better prepared to play a major part in the survival of the country under nuclear bombardment."

The House of Commons passed the Estimates without a division on March 8, when the Secretary for War gave a general review of recent Army developments.

Mr. Head first spoke of the necessity of maintaining the National Service period at two years, stressing that a reduction to 18 months—as had been demanded in some quarters—would cost 50,000 men and would be "folly". In this connexion he explained that although a saving of about 66,000 men had already been made by re-deployment and the disbanding of certain units, these would be absorbed by the creation of the Strategic Reserve and the run-down of 35,000 men which would have taken place between 1954 and 1956.

Turning to the recruiting problem, Mr. Head said that inquiry showed that between 1920 and 1954 the peacetime strength of the Regular Army had remained fairly constant at about 180,000, and that recruiting had been "astonishingly level," whatever the relationship between army and civilian pay or the extent of unemployment. Improvements in pay and conditions, he pointed out, could not be confined to the Army alone but must be applied to the other Services also, if they failed in their object of attracting recruits, large sums would have been spent and Britain would still not have enough Regulars to be able to do without National Service. Although recent pay increases had temporarily increased the recruitment rate from about 5,000 a month to 7,000, the rate had since reverted to 5,000, whilst the intake of the three Services on the three-year engagement had dropped from 49,000 in 1952 to 36,000 in 1954. The Army, however, was "netting" one in four of the National Service intake for the three-year engagement, and the number of prolongations of service to 12 years had increased during the past year from about 350 to 700 a month.

Dealing with the roles of the Territorial Army and the Army Emergency Reserve, the Minister emphasized that the decisive factor in any future war would be the ability of the home base to struggle through; it was therefore essential to have trained and mobile formations which could be sent anywhere in Britain to help restore order. Here the T.A., the A.E.R. and Home Guard would play a vital part, whilst it was possible that T.A. divisions might also be used in conventional warfare. Moreover, it would be necessary after any future war for nations able to do so to send troops abroad to "sort out the mess, stop sporadic fighting, and restore order." It would therefore be "great folly" to do away with any of these reserve divisions.

After referring to the plans for reconditioning and rebuilding barracks (in which connexion he pointed out that little had been spent for these purposes since 1900, and that there was a grave danger of the Army becoming "a race of slum-dwellers" unless something was done), Mr. Head spoke of the progress made in equipping the Army with both conventional and nuclear weapons. As regards conventional weapons, "immense progress" had been made and the Army was now "well equipped by any standards in the world." As regards nuclear weapons, Mr. Head referred to the decision, taken in 1953, that the Army should follow U.S. research in ground-to-ground missile development, and to the adoption by the War Office of the U.S. *Corporal* Mark II (see 13786 A), which was ahead of any similar missile in the world. Officer and n.c.o. instructors for the units which would use the *Corporal* Mark II would receive training in the U.S.A., and the units themselves would be formed in 1956.

After saying that 10,000 F.N. rifles (see 13357 A) would be delivered to the British Army in Germany by June, 1955, Mr. Head emphasized the ever-growing importance of aircraft in the Army's organization. He said that *Viscounts* would be used on certain routes for air-trooping, and that the strategic air-lift—now equivalent to about a brigade—would be improved by the introduction of the *Blackburn Beverley*, which was probably the best large freight aircraft in the world and of which 24 had been ordered. The Army was also starting an experimental service to study helicopter techniques for use in supply and in casualty evacuation.

Mr. Head concluded by saying that a new organization for nuclear formations had been worked out in order to eliminate the "clutter behind the lines" and the "long tube of administration" characteristic of the last war. Under this scheme, headquarters would be eliminated where possible and large dumps and depots would be got rid of by dispersal and the maximum use of local resources.

It was stated in the Estimates that the maximum strength of the Army (including National Servicemen) was expected to decline during the year from 549,000 to 523,000.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Defence Estimates, 14089 A; 1954-55 Army Estimates, 13515 A; Atomic Warfare, 13786 A.)**

Note. The new sub-machine gun referred to in the memorandum is the *Sterling* (previously known as the *Patchett*), which, it was stated on Feb. 25, will replace the *Sten* carbine. The *Sterling*, which has been given exhaustive trials on active service in Korea, Malaya, and Kenya, weighs six lb. and fires 9-mm. ammunition, either by single shots or automatically at a rate of 575 rounds a minute.

(Times - Daily Telegraph)

B. LUXEMBURG. — Birth of Prince Henri.

A son was born on April 16 to Prince Jean of Luxemburg (son of the reigning Grand Duchess Charlotte) and Princess Josephine-Charlotte, elder sister of King Baudouin of the Belgians. The infant prince, who was given the names Henri Albert Gabriel Félix Marie Guillaume, is the second child of Prince Jean and Princess Josephine-Charlotte, a daughter—Princess Marie-Astrid—having been born on Feb. 17, 1954. The succession to the throne will, however, go to Prince Henri under the Salic law, which operates in the Grand Duchy and under which male descendants have precedence.

(La Nation Belge, Brussels)

C. UNITED KINGDOM. — Sir David Kelly appointed Chairman of British Council.

It was announced on June 18 that Sir David Kelly (63), formerly H.M. Ambassador in Moscow, had been appointed chairman of the British Council in succession to General Sir Ronald Adam, who had held that post since 1946 and who had also been director-general of the British Council from 1947 to 1954, when he was succeeded by Sir Paul Sinker. Sir David Kelly had been Minister in Berne (1940-42) and Ambassador in Buenos Aires (1942-46) and Ankara (1946-49) before his appointment to the Moscow Embassy in 1949. (Times) **(Prev. rep. 13425 C; 7954 B.)**

D. FRANCE. — Election of New President of Paris Municipal Council.

M. Jacques Féron, a member of the Independent and Dissident Gaullist (A.R.S.) group on the Paris Municipal Council, was elected president of the Municipal Council (a position equivalent to mayor of Paris) on June 20, receiving 46 votes against 26 for M. Bossus (Communist), 9 for M. Salles (Socialist), and 7 for other candidates. M. Féron (43), who succeeded M. Bernard Lafay (Minister of Health and Population in M. Faure's Cabinet), is an engineer by profession.—(Le Monde, Paris) **(Prev. rep. 13638 C.)**

A. INDIA. — Constitutional Reform. - The Constitution (Fourth Amendment) Act. - New Regulations for Compulsory Acquisition of Private Property.

The Indian Prime Minister, Mr. Nehru, introduced into the House of the People on Dec. 20, 1954, the Constitution (Fourth Amendment) Bill, which defined more precisely than hitherto the State's power to acquire and requisition private property and to fix the amount of compensation to be paid.

The question of compulsory acquisition of property was dealt with as follows in Article 31 of the Indian Constitution, as originally adopted in 1949 ·

" (1) No person shall be deprived of his property save by authority of law (2) No property, movable or immovable, including any interest in, or in any company owning, any commercial or industrial undertaking, shall be taken possession of or acquired for public purposes under any law authorizing the taking of such possession or such acquisition, unless the law provides for compensation for the property taken possession of or acquired, and either fixes the amount of the compensation, or specifies the principles on which, and the manner in which, the compensation is to be determined and given (3) No such law as is referred to in clause (2) made by the Legislature of a State shall have effect unless such law, having been reserved for the consideration of the President, has received his assent."

Certain agrarian reform measures passed by a number of State Legislatures had been challenged in the courts as inconsistent with this Article In order to clarify the situation, the Constitution (First Amendment) Act was passed in 1951.

Under this Act, a new Article (31A) was added to the Constitution It stated that " notwithstanding anything in the foregoing provisions of this Part, no law providing for the acquisition by the State of any estate or of any rights therein, or for the extinguishment or modification of any such rights, shall be deemed to be void on the ground that it is inconsistent with, or takes away or abridges any of the rights conferred by, any provisions of this Part," provided the law had received the President's assent

Contrary to the intentions of the Constituent Assembly, however, a number of subsequent rulings of the Supreme Court had laid down (*a*) that the term " compensation " implied payment of the full market value of the property acquired, and (*b*) that where the State, acting under its inherent regulatory powers, " substantially deprived citizens of property," even though it did not acquire or requisition any property, it must pay full compensation. As was pointed out in the statement of objects and reasons appended to the new Bill, these decisions raised serious difficulties in the way of important social welfare legislation, e.g. the limitation of the extent of agricultural land that might be owned or occupied by any person; town and country planning; slum clearance; State control of the country's mineral and oil resources; extension of public utility facilities, temporary transference of commercial or industrial undertakings to the State in order to ensure their better management; and reforms in company law. Another judgment of the Supreme Court also raised the question whether an Act providing for a State monopoly in a particular trade or business conflicted with Article 301 of the Constitution (which states that " trade, commerce and intercourse throughout the territory of India shall be free "), and suggested that the establishment of such a monopoly might have to be justified before the courts as being " in the public interest " or amounting to a " reasonable restriction."

The main provisions of the Bill, which was intended to remove the ambiguities on these questions in the existing text of the Constitution, were as follows:

(I) For clause (2) of Article 31 the following clauses were substituted: " (2) No property shall be compulsorily acquired or requisitioned by the State save for a public purpose and save by authority of a law which provides for compensation for the property so acquired or requisitioned, and either fixes the amount of the compensation or specifies the principles on which, and the manner in which, the compensation is to be determined and given. (2A) Where a law does not provide for the transfer of the ownership or right to possession of any property to the State, it shall not be deemed to provide for the compulsory acquisition or requisitioning of property by the State, notwithstanding that it deprives any person of his property."

(II) Under an amendment to Article 31A, the Central and State Legislatures were empowered to pass laws providing for (*a*) the acquisition by the State of any estate or of any rights therein, (*b*) the extinguishment or modification of any rights in estates or in agricultural holdings; (*c*) the maximum extent of agricultural land that might be owned or occupied by any person, and the disposal of land held in excess of this maximum; (*d*) the acquisition or requisitioning of immovable property for the relief or rehabilitation of displaced persons; (*e*) the acquisition or requisitioning of slum property or of vacant land; (*f*) the temporary taking-over of the management of any property by the State in the public interest or to secure its proper management; (*g*) the transfer of any undertaking, wholly or in part, from one company to another, or the amalgamation of two or more companies in the public interest or to secure their proper management, (*h*) the extinguishment or modification of any rights of managing agents, managing directors, directors, managers, or shareholders of companies, (*i*) the extinguishment or modification of any rights accruing by virtue of any agreement, lease or licence for the purpose of searching for, or obtaining, minerals or oil, or for the purpose of supplying power, light or water to the public Such laws, if passed by State Legislatures, would, however, still require the President's assent to be valid.

(III) The final decision whether the establishment of a State monopoly in any sphere of trade or commerce was in the public interest, or constituted a reasonable restriction, would rest with the Legislature and not with the courts.

The House of the People referred the Bill to a Joint Select Committee on March 15, after a debate in which Mr. Nehru emphasized that the Government was opposed on principle to the expropriation of property without compensation, but that it would not always be possible to pay the full market value of the property as compensation.

Moving the Bill's reference to a Select Committee, Mr Nehru stated that the Government had no intention of challenging the authority of the judiciary, but that it was for Parliament alone, and not for the judiciary, to decide on political, social, and economic policy Whilst accepting the judiciary's interpretation of the Constitution, the Government nevertheless felt that this interpretation was not in accordance with the social or economic policy which the country should pursue, instead of by-passing the Supreme Court, they therefore proposed to change the Constitution. If the Supreme Court's interpretation of certain Articles was not in accordance with the intentions of the Constituent Assembly, the drafting of those Articles was at fault and must be corrected There was no question of expropriation without compensation, although in certain cases, such as slum property, no compensation might be necessary or desirable When a country was aiming at changes in the social structure, however, full compensation could not and should not be given, for if it were the " haves " would remain the " haves " and the " have-nots " the " have-nots " The Constitution, Mr Nehru pointed out, laid down certain directive principles of State policy e.g. that the ownership and control of the community's material resources should be " so distributed as best to subserve the common good," and that the operation of the economic system should not " result in the concentration of wealth and means of production to the common detriment." These principles, he concluded, could not be put into effect if the Supreme Court's interpretation of the Constitution was adhered to, and therefore the Constitution should be amended to make it subserve these principles.

During the ensuing debate a number of Congress members criticized the Bill on the ground that it made an unfair distinction between industrial and agricultural property, as the payment of full compensation was still guaranteed for the former but not for the latter In reply, Mr. Nehru agreed that as the Bill stood it might still be necessary to pay the full market value for nationalized industrial and commercial undertakings, but expressed the hope that the Supreme Court would take full cognizance of the " new atmosphere " in the House and the country about this question, and bear it in mind in interpreting all future cases related to it. He emphasized that millions of people could not wait indefinitely for changes in society that had become inevitable, and that if these changes were not made peacefully, and in time, there was a danger of " all kinds of storms bursting forth among the people." Mr. Nehru denounced as " degrading " a suggestion by Communist members that British capital should be expropriated without compensation, and pointed out that even the Soviet Union had paid compensation for all foreign property seized during the Russian revolution.

The motion was approved by the House of the People by 322 votes to nine (the Communists and Praja Socialists voting with the Government), and was adopted unanimously by the Council of States on March 19.

The Joint Committee, consisting of 30 members of the House of the People and 15 of the Council of States, submitted its report on March 31. This proposed a number of important amendments to the Bill, viz. (1) that the State should not be required to pay their full market value as compensation for nationalized industrial undertakings and banking and insurance companies; (2) that agricultural and other property rights, and certain types of deprivation of industrial or commercial property by a process of acquisition and not regulation, should be removed from the purview of the proposed amendment to Article 31A; (3) that the amount of compensation paid could be challenged in the courts on the ground that it was " illusory " or amounted to fraud under the Constitution, but not on the ground of its inadequacy.

In its amended form, the Bill was given a third reading in the House of the People on April 12 (by 302 votes to 5) and was passed unanimously by the Council of States on April 20. (Eastern Economist, Delhi - Indian High Commissioner's Office, London - The Hindu, Madras - The Statesman, Calcutta)

(Prev. rep. Indian Constitution, 13636 A.)

A. UNITED KINGDOM. — Coal Industry. - National Coal Board Report for 1954. - Production Statistics. - Fall in Coal Stocks. - Importation of U.S. Coal under Mutual Security Act. - Increased Borrowing Powers for N.C.B. - New Wages Schedule for Miners. - The Mines and Quarries Act. - New Issue of Compensation Stock.

The ninth annual report and accounts of the National Coal Board, covering the year ended Dec. 31, 1954, were published on June 21. They showed that, after meeting taxation and interest (£17,500,000), the Board was left with a surplus of £1,200,000 on operations in Britain, but that this was converted into a deficit of £3,800,000 by a loss of £5,000,000 on imported coal. The deficit (which compared with a surplus of £353,647 earned in 1953) increased the accumulated deficit since nationalization to £17,399,698

Saleable output of coal was given as 224,300,000 tons, or only some 70,000 tons more than in 1953. The output of deep-mined coal (214,000,000 tons, or about 1,500,000 tons more than in 1953) was described as "particularly disappointing," since the National Union of Mineworkers had earlier agreed that an increase of 5,000,000 tons in 1954 was "a reasonable minimum aim." Opencast production, at 10,300,000 tons, was 1,400,000 tons less than in 1953, mainly because of delays—outside the Board's control—in obtaining permission to work sites. Total manpower in the industry again fell, having averaged 707,200 in 1954 compared with 712,900 in 1953; moreover, a greater proportion of the available manpower was employed on development work, not immediately productive. The report stressed that, but for this, the effect of better attendance and higher productivity would have given "a considerable increase" in deep-mined output.

Salient points from the report are summarized below.

Costs, Prices, and Profit. Costs of mined coal averaged £3 1s. 11d per ton, or 2s. 9d more than in 1953, the largest increase (1s 5d. per ton) having again been in wages Pithead prices of most grades of coal were increased in May by about 2 per cent, as a result proceeds rose by an average of 2s. 4d. per ton to 6s. 6d, but the increase in costs reduced the average net profit per ton (compared with 1953) by 5d per ton to 1s. 7d.

Opencast production costs averaged 50s. 9d per ton, and proceeds 57s. per ton.

Divisional Results. Of the nine divisions, only three made profits —the East Midlands (6s. 11d per ton), the North Eastern (5s. 1d.) and the West Midlands (3s 4d.). The following divisions incurred losses the Scottish (4s. 7d. per ton), North-Western (4s. 3d), South-Eastern (3s. 3d.), South-Western (2s), Northern (1s 9d), and Durham (1s 2d)

Productivity. Records were achieved in 1954 both in total productivity (24.61 cwt. per manshift) and in productivity at the coal face (65.14 cwt. per manshift) The number of shifts worked showed an increase over 1953

Labour Disputes. Although almost 50 per cent of pits were free from disputes during 1954, there was a "serious increase" in the number of unofficial stoppages, which totalled 2,614 (the highest figure since nationalization) compared with 2,324 in 1953 The loss of coal (1,500,000 tons) was 356,000 tons more than in 1953, but less than in 1952.

Coal Imports. These exceeded 3,000,000 tons, the loss to the Board on the sale of imported coal amounting to £5,029,258

Capital Expenditure and Borrowings. Capital expenditure in 1954 totalled £84,700,000, compared with £64,000,000 in 1953, about £2,000,000 of the increase being attributable to higher prices

To finance expenditure the Board had borrowed £54,650,000 from the Ministry of Fuel and Power; of this and former advances, £55,000,000 was funded as representing permanent advances.

Accidents. Fewer accidents were reported during 1954 than ever before, the number killed being 359, against 364 in 1953.

Long-Term Prospects. Assessing long-term prospects for fuel supplies, the Board stressed that if production of the order of 250,000,000 tons annually (the most that could at present be expected to be available by 1965) were to be achieved, "increased productive capacity must be obtained much more quickly" The report added that "some sacrifice of immediate output" might be necessary, and that "the maximum use of other fuels must be made to fill the gap."

Sir Hubert Houldsworth (chairman of the N.C.B.), commenting on the report on the same day, emphasized that the Board's "main and continuing difficulty" was shortage of labour. There were at present about 3,500 fewer men in the mines than in June 1954, and unless recruitment improved, the drop at the end of the year was likely to be 5,000. Forecasting that the demand for coal in 1955 might increase by about 5,000,000 tons, he added: "The task we have is to meet an increase in inland demand with a diminishing manpower of 5,000 every year. It is not really possible with the manpower available to meet the whole of that growth in inland demand. The industry requires 15,000 more men, but they would have to be in the right places—the high productivity areas."

The following table shows the average weekly rates of coal production and consumption, and of manpower, output, and absenteeism in the fourth quarter of 1954 and the first quarter of 1955:

1954	Saleable Mined Coal Produced Tons	Plus Opencast Tons	Total Production Tons	Inland Consumption Tons	Overseas Shipments & Bunkers Tons
October	4,395,980	203,060	4,599,040	4,063,600	338,600
November	3,534,380	138,480	3,672,860	3,512,400	250,000
December	4,004 060	130,780	4,134,840	4,452,000	286,800
1955					
January	4,265,500	142,900	4,408,400	4,797,500	284,500
February	4,358,675	159,000	4,517,675	4,822,000	267,500
March	4,420,860	192,860	4,613,720	4,754,000	274,000

1954	Wage-earners on colliery books Total	Wage-earners on colliery books at coal-face	No. of shifts worked per wage-earner	Output per manshift at coal-face Tons	Output per manshift at over-all Tons	Percentage of absenteeism
October	704,760	289,260	5 01	3.289	1 244	12 10
November	704,275	288,975	5 08	3.289	1.245	12 17
December	704,860	289,600	4.63	3 238	1.219	13.07
1955						
January	707,725	290,275	4 87	3 268	1 235	13.00
February	708,375	290,560	4 97	3.273	1 237	13 05
March	708,120	290,680	5 0	3 302	1.247	12 87

Other recent developments in connexion with the coal industry are summarized below.

Coal Stocks and Imports. Coal stocks on March 12, 1955, were estimated by the Ministry of Fuel and Power at 10,733,000 tons (the lowest figure recorded for mid-March since 1951), compared with 12,921,000 tons on March 13, 1954.

The Treasury announced on Dec. 28, 1954, that an agreement had been signed between the British and U S Governments authorizing the purchase of U S coal under the Mutual Security Act Payment would be made in sterling, which would be used to make purchases as provided for in the Act and as might be agreed by the two Governments It was stated in the British Press that probably about 250,000 tons would be imported under the agreement, which stipulated that 50 per cent of the coal (the first to be imported by Britain under the Mutual Security Act) should be carried in U S ships.

Sir Hubert Houldsworth stated on Jan 6, 1955, that the loss on imported coal (borne entirely by the N C B) since nationalization totalled about £15,000,000

It was estimated in an E C S C report published on June 23 that, at the present rate, by the end of 1955 Britain would have imported about 10,000,000 tons of coal during the year, compared with the 3,000,000 tons imported during 1954

Coal and Coke Prices. The Ministry of Fuel and Power announced on April 25 that, owing to higher distribution costs, retail coal prices would be increased in the Provinces by 3d - 1s. 11d a ton, according to area, and that prices of gas coke would be increased throughout Britain (except in the North-West region) by 8d - 2s 4d a ton On May 2, however, the Ministry announced summer price reductions for coal varying from 5s to 10s. a ton.

Increased Borrowing Powers for N.C.B. The House of Commons on Nov 7, 1954, approved a Borrowing Powers Order authorizing the N C B to borrow an additional £75,000,000. The Parliamentary Secretary to the Ministry of Fuel and Power (Mr Joynson-Hicks) explained that the Board required £110,000,000 during the current year for capital expenditure and working capital, but would find £35,000,000 of this from its own resources.

N.C B. Appointments. The N C B announced the following appointments on March 25, consequent on the appointments to the National Board made on Feb. 16 in implementation of the recommendations of the Fleck Committee (see 14115 A). Mr. R. W Parker to succeed Dr W Reid (now a member of the National Board) as deputy chairman of the Scottish division, Mr L Graham, deputy chairman of the Northern division, to succeed Mr J. Bowman (now deputy-chairman of the National Board) as divisional chairman; Mr H W M Henry, finance director, Northern division, to succeed Mr Graham as deputy-chairman of the division; Mr. A. W John, deputy director-general of finance at national headquarters, to succeed Mr J. Latham (now a member of the National Board) as director-general of finance

On April 14 the Board announced that Mr. E. H. Browne, director-general of production, would succeed Mr I. W Cumberbatch as chairman of the West Midlands division.

New Opencast Site. The N.C B announced on March 1 that a contract had been let to Richard Costain Ltd, London, for the working of 5,000,000 tons of opencast coal on the Acorn Bank estate, near Blyth, Northumberland It was the largest single contract for working opencast coal ever placed in Britain. The coal (mainly for the seaborne and export trades) will be produced at the rate of over 750,000 tons a year for six or seven years.

New Wages Schedule. Agreement was reached on March 15 between the N C B. and the N.U.M on a new wage structure providing for (1) the reclassification of all jobs performed by miners and in mine workshops into five underground, five surface, and three craftsmen's grades; (2) the introduction of new standard shift rates ranging from 27s. 9d. to 31s. 9d per shift for underground grades, from 24s. 5d to 31s. 1d. per shift for surface grades, and 27s. 1d. to 35s. 5d. for craftsmen's grades; (3) an increase of 11s 6d. weekly for underground and surface day-wage men, raising their minima to £8. 6s 6d. and £7. 6s. 6d respectively.

The new rates, which affected about 400,000 miners, were approved by a national delegate conference of the N U M on March 17 and by a ballot of union members on March 31.

Miners' Housing It was stated on March 9 that over 18,000 miners' houses had been built by the Coal Industry Housing Association in less than three years, including 12,019 houses built in 1954 alone. Except for 450 houses on sites not yet acquired, the Association had almost completed its £37,000,000 housing programme

Unofficial Strikes. An unofficial strike over fillers' piece-rates broke out at Markham Colliery, near Doncaster, on April 19 and spread on May 2 to 13 other pits in the Doncaster area. In spite of N U.M appeals to the men to return to work, and an N C.B. statement stressing that the strike "represented an attempt to use power instead of reason in settling disputes," the stoppage continued to spread, with the result that 58 pits and 87,000 men were idle by May 6 By May 9 the stoppage had caused a production loss of over 577,000 tons—the greatest loss since the Grimethorpe dispute of 1947 (see 8816 A), which cost 600,000 tons—but on that day the strike began to break, and on May 15 the 27,000 miners still on strike voted to return to work on the basis of an N C B offer to settle the fillers' grievances The stoppage was estimated to have caused the loss of about 1,030,860 tons of coal and £1,000,000 in wages

Mr. J Bowman, deputy chairman of the N C.B , stated on May 21 that 1,750,000 tons of coal had been lost through disputes between Jan 1 and May 14, 1955, compared with only 500,000 tons lost in the same period of 1954.

The Mines and Quarries Bill, which codified and revised the law relating to safety and health in mines and quarries embodied in various Acts passed between 1872 and 1911, was enacted on Nov. 24, 1954, after an unopposed passage in both Houses. The Bill:

(1) Placed on owners of mines and quarries the duty of seeing that safety regulations were properly observed, and required the duties of mine managers and officials to be defined in writing and communicated to the Mines Inspectorate

(2) Imposed a general duty on mine managers to take precautions against injurious dust, and introduced regulations to obviate danger from falls of ground and to safeguard miners' ways of escape in case of underground fire

(3) Defined the method of appointment and duties of mine managers, under-managers, and officials who, for certain classes of mines, were required to be qualified

(4) Provided for the setting-up of a Mining Qualifications Board, consisting of a chairman and seven other members with experience of mining administration, to grant certificates of competency in mine management, etc

(5) Raised to 16 (from a date to be fixed by the Minister of Fuel and Power) the minimum age at which boys might be employed below ground, and prohibited the employment of youths under 18 for more than 9 hours daily and 48 weekly, or at night [The application of this restriction was deferred in Northumberland, Durham, and Warwickshire, where special shift systems are in operation.]

(6) Stipulated that all major accidents must be notified and investigated, and gave miners and quarrymen the right to appoint persons to make safety inspections on their behalf.

Mr Geoffrey Lloyd (Minister of Fuel and Power), moving the second reading in the Commons (Jan 22, 1954), explained that it was the first major Bill dealing with safety in mines since the Coal Mines Act of 1911, which had been sponsored by Sir (then Mr.) Winston Churchill when Home Secretary in the Liberal Government of the day. Although the 1911 Act had resulted in a great decrease in mining accidents, its provisions were completely unsuited to the organization of the National Coal Board The Government hoped that the present Bill, introduced at a time when a vast scheme of mining reorganization was in progress, would be "a safety charter for the next 100 years," and that, by securing "a flexibility of organization combined with a definite personal responsibility," it would make impossible the dangerous uncertainties that had come to light after the Knockshinnoch disaster (see 11006 A.)

The Treasury announced on Dec. 15, 1954, that a further issue (the ninth) of about £14,000,000 of 3½ per cent Treasury Stock, 1977-80, was being made in whole or partial settlement of compensation due to various undertakings under the Coal Industry Nationalization Act, and that £100 of stock would be deemed equal to £98. 12s. 6d. of compensation.

It was stated in the Press that this issue would enable compensation to be fully cleared in three further districts—Scotland, Warwickshire, and Northumberland—bringing the number of districts cleared to 16, and leaving only five areas —Yorkshire, Lancashire, South Staffordshire, and North and South Wales—with compensation still uncompleted. Total compensation for collieries and ancillary assets had reached over £271,000,000.—(Ministry of Fuel and Power - Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. N.C.B., 1953 Report, 13613 A; Production Figures, 13978 A; 13848 A; Fleck Report, 14115 A.)**

A. INDONESIA - AFGHANISTAN.-Friendship Treaty.

A treaty of friendship between Indonesia and Afghanistan was signed in Bandung on April 24 by Sardar Mohammed Naim and Mr. Sunarjo, the Afghan and Indonesian Foreign Ministers. (Indonesian Embassy, London)

B. CHINA. — Release of American Airmen.

It was announced by Peking Radio on May 30 that four U.S. airmen, shot down during the Korean war in late 1952 or early 1953, and detained since then in China, had been tried by a Chinese people's court on May 24, found guilty of "acts of provocation" by intruding into the territorial air space of China, and ordered to be deported from China. The four men—Lieut.-Colonel Edwin L. Heller, Captain Harold E Fischer, First Lieut Roland W. Parks, and First Lieut. Lyle W. Cameron —were released on the Hong Kong border on the following day and flown from there to Honolulu *en route* for the United States. The impending release of the airmen had been foreshadowed some hours before Peking Radio's announcement by a statement in New Delhi by Mr Krishna Menon (chief Indian representative at the United Nations). Mr. Menon, who had only recently returned from a visit to Peking (see 14273 B), told a press conference that the airmen were being released in response to an Indian request; he expressed the opinion that it was a "fine gesture on the part of the Chinese," and hoped that it would produce "favourable reactions in other quarters."

The Chinese court's verdict, after detailing the various attacks which the four airmen were alleged to have made on Chinese territory, and stating when and where they had been shot down, continued "It is established that the defendants, in intruding into China's territorial air space in U S planes to conduct harassing and provocative activities, are guilty of imperilling the security of our country and undermining the peaceful life of our people. The evidence is conclusive and irrefutable and the defendants deserve the full punishment prescribed by law. But taking into consideration the fact that the defendants were only carrying out the orders of the U S military authorities, and that they have all admitted their crimes and expressed remorse since their capture, they are therefore being treated with leniency."

The State Department in Washington said on May 30 that "the U.S. Government is gratified that the prolonged and unwarranted separation which these airmen and their families have endured ... will soon be brought to an end," and expressed the "earnest hope" that the release of the airmen signified the intention of the Chinese Communist Government "to act swiftly to release other American citizens, civilian as well as military, whose continued imprisonment in Communist China has profoundly aroused the American people." A State Department spokesman announced on June 1 that the U.S.A., through the Chinese Consul-General in Geneva, had asked China to release 52 other Americans detained in China, and to supply information about a further 11 U.S. servicemen believed to be interned in that country.

The U N. Secretary-General, Dr. Hammarskjold (who had visited Peking in January to endeavour to obtain the release of 11 other U.S. airmen imprisoned in China), said that the release of the four airmen was "very encouraging news," but emphasized the need for restraint over the whole question. The British Foreign Office welcomed the releases as "a first step towards improvement of international relations."

The four released airmen, who were reported after a thorough medical examination at Honolulu to be in "fine physical condition," said in a press statement that their general treatment while in captivity had been good, and, by Chinese standards, excellent. Colonel Heller stated that he had been in hospital for two years with a broken leg, suffered when he had baled out of his plane, and that the Chinese medical facilities had been "pretty good" The other three men said that they had lived "Chinese style" in a house, most of the time in Mukden (Manchuria) but recently in Peking. The four men expressed the view that Dr Hammarskjöld's visit to Peking had had a great deal to do with their release They declined to answer questions as to whether they had been shot down over North Korea or Manchuria.

A U.S Air Force spokesman said on June 20 that all the four airmen had "confessed" to their captors under pressure that they had crossed the Yalu River boundary under orders from the U.S. Government, and that Captain Fischer had also "confessed" to having conducted "germ warfare" in North Korea. The spokesman emphasized that there was no truth whatever in any of these "confessions," and added that, although the Air Force was carefully examining the records of the men, he very much doubted whether any action would be taken against them.

The executive vice-president of the American Red Cross, Mr. J. T. Nicholson, announced in Geneva on May 6 that arrangements had been concluded between the U.S. and Chinese Red Cross Societies for the delivery of one parcel a fortnight to each of the 15 U.S. airmen and 20 U.S. civilians whom the Chinese authorities had listed as being held by them. The parcels, which would contain food, clothing, and medicaments, would be flown from California and Tokio to Hong Kong and handed over to the Chinese Red Cross on the Hong Kong boundary.—(New York Times - New York Herald Tribune - Times - Manchester Guardian) **(Prev. rep. 14143 A.)**

A. WESTERN POWERS - SOVIET UNION. — Soviet Acceptance of Western Proposals for "Summit" Talks at Geneva. - Soviet Approach to Western Germany for Normalization of Relations. - Dr. Adenauer invited to Moscow. - Dr. Adenauer's Visits to U.S.A. and Britain. - Meetings of Foreign Ministers.

The proposals of the three Western Powers for a "Big Four" conference of Heads of Government and Foreign Ministers, presented in Moscow on May 10 (see page 14191), were accepted by the Soviet Government on May 26. Further developments in the international situation during June were: Soviet acceptance of the Western Powers' proposal that the "summit" talks should open in Geneva on July 18; a Soviet invitation to Dr. Adenauer to visit Moscow, with the aim of normalizing relations between the U.S.S.R. and the German Federal Republic, a visit by Dr. Adenauer to the U.S.A. for discussions with President Eisenhower and Mr. Dulles, followed by a meeting with Sir Anthony Eden at Chequers on the return journey, consultations between the three Western Foreign Ministers in New York, in which Dr. Adenauer participated, and exchanges of views between the Western Foreign Ministers and M. Molotov in San Francisco. These developments are described below under cross-headings.

Soviet Acceptance of "Summit" Talks.

The British, French and U.S. invitation for a meeting in the near future of Heads of Government and Foreign Ministers was formally accepted by the Soviet Government on May 26, when Notes to that effect were handed to the Ambassadors of the Western Powers in Moscow. At the same time the Soviet Government accused the U.S. Government of adopting attitudes incompatible with the ultimate success of a four-Power conference, and denounced "certain statements by leading figures in the United States."

After expressing the Soviet Government's agreement to "an early meeting of the Heads of Government of the four Powers, with the participation of the Foreign Ministers," the Notes continued: "The Soviet Government, however, cannot but draw attention to certain statements by leading figures in the United States. It is pointed out in these statements that the U.S. Government approaches this conference 'from positions of strength'. These persons in the U.S.A. have even gone so far as to speak of the need to interfere in the internal affairs of other States, and have made attacks against the people's democracies. . . Such attempts to interfere in the internal affairs of other States are incompatible with the principles of the United Nations. They must be rejected as an expression of the aggressive aspirations of certain circles aiming at a further intensification of the arms drive, continuation of the 'cold war,' and still greater aggravation of international tension.

"Thus the U.S. Government, on the one hand, proposes that the Heads of Government of the four Powers should discuss outstanding international problems, and on the other hand, is coming out with plans which deliberately doom the four-Power conference to failure. The only explanation for this is that the U.S. Government, contrary to its statements, is obviously not striving for the settlement of urgent international problems. Under these circumstances the four-Power conference would not only fail to yield positive results but, on the contrary, would lead to a further aggravation of differences between States and a deterioration in the international situation.

"The Soviet Government considers that the task of the conference . . . is to ease international tension and strengthen confidence between States. This goal can only be attained if all the States concerned strive for it. As to the questions to be considered at the conference, the Heads of Government could themselves define them and also determine ways of settling them, giving corresponding instructions to the Foreign Ministers."

In conclusion, the Soviet Government proposed that the four-Power conference should be held in Vienna, and that the date of the conference should be settled by agreement between the four Powers.

Western Powers' Proposal for "Summit" Talks in Geneva. - Acceptance by Soviet Government.

Further Notes were presented in Moscow on June 6 by the British, French and U.S. Governments proposing that the "summit" talks should be held in Geneva "from July 18 to July 21 inclusive," and stating that the Swiss Government had agreed to such a conference on its territory.

After recalling that the Western Powers had originally proposed Lausanne as the venue for "summit" talks, whereas the Soviet Government had favoured Vienna, the Notes said: "In the light of these divergent views . . . the Governments of France, the United Kingdom, and the United States now propose that the four Heads of Government should meet in Geneva, where there are excellent facilities for a meeting of this importance."

The Soviet Government, in Notes to the Western Powers on June 13, agreed that the "summit" talks should take place in Geneva. At the same time it commented on the fact that the Western Powers had made no mention of "the important question concerning the tasks of this meeting raised in the Soviet Notes of May 26," and reiterated its conviction that "the efforts of all four States should be directed, above all, to ensuring the accomplishment of the main task of the meeting—the lessening of tension in international relations."

Simultaneously with the publication of the Soviet Notes, the Tass Agency issued a statement—described as coming from "authoritative Soviet circles"—in reply to remarks made by Mr. Dulles at a press conference on June 7.

The U.S. Secretary of State had said that "the opportunity for good coming out of this conference will depend primarily upon whether or not the Soviet rulers are willing to put a spirit of accomplishment into some of the things which we all profess to be interested in." Mr. Dulles spoke of the possibility of raising the question of the East European "satellites" at the four-Power conference, and said in this connexion that the new Soviet attitude towards Yugoslavia, together with the conclusion of the Austrian State Treaty, encouraged him to hope that the U.S.S.R. might be prepared to "loosen the rein a little bit" on the East European countries.

The Tass statement was worded, in part, as follows: "Mr. Dulles' statement is a continuation of the same line which was pursued earlier by leading U.S. personalities, the unfounded nature of which has already been exposed in the Soviet Government's Note of May 26. By . . . trying to present matters as if the success of the meeting will depend primarily upon the position of the Soviet Union, Mr. Dulles, and also some other official persons in the U.S.A., show that they are not trying to facilitate the work of the meeting but to complicate the situation prior to the meeting, and to make its work difficult.

Nor can arguments about 'the problem of the countries of Eastern Europe' have anything in common with the desire to achieve favourable results at the meeting. 'The problem of the countries of Eastern Europe' does not exist, because the peoples of those countries, having overthrown the rule of exploiters, have established people's democratic governments and will permit no interference in their internal affairs from any quarter whatsoever . .

"Recent steps taken by the Soviet Union for the lessening of international tension have greatly influenced the international situation. These steps are the conclusion of the Austrian State Treaty, the Soviet Government's proposals on the reduction of armaments and the prohibition of atomic weapons; the normalization of relations between the U.S.S.R. and Yugoslavia, the proposal to establish diplomatic and trade relations between the U.S.S.R. and the German Federal Republic, etc. All this is a great contribution to the strengthening of peace. . . . The Soviet Government has repeatedly declared that it considers the task of the meeting of the Heads of Governments to be the reduction of international tension. Favourable results can be achieved if all the interested States strive for this, not only in words, but also in deeds."

West German Attitude to Four-Power Talks.

The West German Ambassadors in Washington, London, and Paris (respectively Dr. Krekeler, Herr von Herwarth, and Herr von Maltzan) had a conference with Dr. Adenauer on May 25 at Buhler Hohe, near Baden-Baden. It was officially stated that the Ambassadors had previously had discussions with the Foreign Ministers of the countries to which they were accredited "on current problems, particularly the approaching four-Power talks," and that they had reported to Dr. Adenauer on these matters. During the Buhler Hohe discussions Dr. Krekeler conveyed to the Federal Chancellor an oral assurance from Mr. Dulles that there was no question of adopting a policy of neutrality for Germany. It was understood that similar assurances were conveyed by Herr von Herwarth and Herr von Maltzan from the British and French Governments.

Some concern had been caused in Bonn by a remark by President Eisenhower, made during a press conference on May 18, that "there seems to be developing the thought that there might be built up a series of neutralized States from north to south through Europe"—a remark interpreted in some German circles as implying that the President favoured a policy of "neutralizing" Germany. On May 24, however, Mr. Dulles announced that, after consultation with the President, he had advised Dr. Krekeler that the President's remark should not be interpreted as implying U.S. approval of a neutral policy for Germany. "It is the view of the United States," said Mr. Dulles, "that a policy of neutrality has no application to a country of the character of Germany. It is all very well to talk about neutrality for Austria, a small country with 7,000,000 people. But I do not think that anyone realistically believes that the German people, 70,000,000 of them, are designed to play the role of a neutral country." After recalling that the Austrian State Treaty placed no limit on the size of the Austrian Army, and suggesting that not even the Russians would regard this as an acceptable model for Germany, Mr. Dulles added: "I do not think that the German people, or the Soviet people, or the Western European people, want to see applied to Germany the concept of its being an independent State with an unlimited army."

In a foreign policy statement to the Bundestag on May 27, Dr. Adenauer called upon the United States to take the initiative at the four-Power talks in proposing general and controlled disarmament. Emphasizing the catastrophic nature of modern warfare, he declared that President Eisenhower's forthcoming meeting with Marshal Bulganin, and with the British and French Prime Ministers, offered an opportunity—which might never recur—to save the world from "complete destruction."

Dr Adenauer appealed directly to the U.S A , as the world's strongest Power, to make a " bold and resolute " proposal for general disarmament, saying that there had " never been a more promising time than the present " for such an initiative At the same time he issued a warning to the U S A against Soviet proposals " to create a belt of neutral but armed States in northern, eastern, and southern Europe," declaring in this connexion " The establishment of such a belt would mean the end of the Western European Union, of any kind of European integration, and of the NATO The balance of forces at present existing in the world would be destroyed in favour of the Soviet Union, while the increase in Russia's potential would place the U S A. in extreme jeopardy, from which it could only escape—if at all—by mobilizing its entire strength for this purpose " Dr Adenauer added that suggestions to include Western Germany, Denmark, Norway, the Benelux countries, Greece, and possibly some of the Soviet-controlled countries of Eastern Europe, in such a " belt " would " offer no protection whatever against a ' hot ' war, since none of these neutral States would be able to resist an attack launched by the Soviet Union with modern weapons "

Herr Ollenhauer, leader of the Social Democratic Opposition, fully endorsed the Chancellor's plea for general disarmament, but insisted that the reunification of Germany should have priority over all other considerations

Soviet Invitation to Dr. Adenauer to visit Moscow.

The Soviet Government presented a Note to the Federal German Government on June 7 (transmitted by the Soviet Embassy in Paris to the West German Embassy in that city) inviting Dr. Adenauer to visit Moscow, and proposing the normalization of relations between the U.S S.R. and the Federal Republic.

After declaring that the interests of peace and European security, as well as those of the Soviet and German peoples, called for the normalization of relations, the Note continued " The experience of history shows that the preservation and strengthening of peace in Europe depends to a decisive degree on the existence of good relations between the Soviet and German peoples . In the years when friendly relations and co-operation existed between our peoples, it was of great benefit to both countries. Conversely, hostile relations and wars between our peoples have brought them untold misery, privation, and suffering It was the Soviet and German peoples that suffered most of all in the two World Wars The peoples of the Soviet Union and Germany had millions of casualties in these wars—several times higher than the casualties of all the other belligerent nations combined Cities reduced to ruins, villages burned down, great riches of the two peoples destroyed—such were the results of the wars between our countries.

" The Soviet Government cannot fail to draw the attention of the Federal Republic to the fact that certain aggressive circles in some countries are harbouring plans to set the Soviet Union and Western Germany against each other, and to prevent an improvement in their relations. Another war would turn Germany into a field of battle and destruction. Such a war on German territory, involving modern means of mass destruction, would be even more cruel and devastating in its results than any past war. Developments must not be allowed to follow this course The impending danger can be averted if normal relations, based on mutual confidence and peaceful co-operation, are established between our countries. The Soviet Union, in spite of all the sufferings inflicted upon her during the recent war, has never let herself be guided by feelings of revenge against the German people . .

" The Soviet Government proceeds from the premise that the establishment of normal relations between the Soviet Union and the German Federal Republic will contribute to settling outstanding issues concerning the whole of Germany, and thereby help to solve the principal national problem of the German people—the re-establishment of the unity of a democratic German State. .

" The Soviet Government also attaches great importance to more stable relations between the Soviet Union and the Federal Republic in the field of trade It is appropriate to recall that the Soviet Union and Germany carried on extensive and mutually advantageous trade in the past, with the commodity turnover amounting at times to one-fifth of the total foreign trade of both countries. The Soviet Union has extensive trade relations with the German Democratic Republic [Eastern Germany]. Trade between the U S.S R and the Federal Republic of Germany is of a limited and unstable nature However, the prerequisites exist for the development of extensive trade and the establishment of mutually advantageous economic relations between the Soviet Union and the Federal Republic provided there are normal relations between them The Soviet Union, with its highly developed industry and expanding agriculture, considers it possible to enlarge substantially its volume of trade with Western Germany.

" Cultural interchange can also play an important part in normalizing relations between our countries. Scientific, cultural, and technical ties between the peoples of the U.S S.R and Germany are of long standing. They have enriched the intellectual life of both peoples and have had a favourable effect on European cultural development as a whole. These traditions can serve to promote scientific, cultural, and technical co-operation between the two countries.

" The Soviet Government believes that the abolition of the Occupation Statute in Western Germany, and the decree of the Supreme Soviet ending the state of war between the U.S.S.R. and Germany, provide the necessary conditions for establishing normal and direct relations between the Soviet Union and the German Federal Republic. In view of this, the Soviet Government proposes to the Government of the German Federal Republic that direct diplomatic, trade, and ultural relations should be established between the two countries.

" Considering it desirable for personal contact to be established between the statesmen of the two countries, the Soviet Government would welcome a visit to Moscow, in the near future, of Chancellor Adenauer and any other representatives whom the Federal Government might wish to send, in order to discuss the establishment of diplomatic and trade relations between the Soviet Union and the German Federal Republic, and to examine the relevant issues."

An official statement in Bonn said that the Federal Government welcomed the Soviet Union's proposal to establish diplomatic, trade, and cultural relations between the U.S.S.R. and the German Federal Republic. It added that the Note " raises various questions which require prior examination," and that it was hoped that an eventual meeting between Dr. Adenauer and the Soviet leaders would " appear appropriate." No statement was issued by Dr Adenauer himself.

Dr. Adenauer's Visits to the U.S.A. and Britain.

Dr. Adenauer arrived in the U.S.A. on June 12 to receive an honorary degree from Harvard University. Although his visit was ostensibly private, he had discussions at the White House on June 13-14 with President Eisenhower and Mr Dulles, and subsequently in New York with Mr. Dulles, Mr. Harold Macmillan and M. Pinay. The following communiqué was issued on June 14 after the White House conversations :

" The President, the Chancellor, the Secretary of State, and their advisers . reviewed political developments since the Chancellor's last visit, and noted with satisfaction that the bonds of friendship between their nations have become very close. They are of the opinion that the recent favourable developments in Europe are the result of the consistent, sound policies followed by the United States, the Federal Republic, and their allies

" A large part of the discussion was devoted to the relationship between the nations of the free world and the Soviet Union, and particularly to recent developments such as the willingness of the Soviet Union to participate in a ' Big Four ' conference, and the Soviet Government's invitation to the Chancellor. They agreed that one of the objectives of the forthcoming four-Power meeting will be to pave the way for early German reunification. It was confirmed that in their combined opinion the concept of neutrality is in no way applicable to Germany, and that only in collective security arrangements can Germany assure her independence "

The Federal Chancellor visited Harvard on June 16 to receive an honorary degree, and made a speech reiterating his appeal to the U.S.A to take the initiative in bringing about " controlled disarmament " through negotiations with the Soviet Union.

Dr. Adenauer broke his return journey on June 19 to pay a six-hour visit to Sir Anthony Eden at Chequers (the country residence of the British Prime Minister). A communiqué said that the Federal Chancellor had informed Sir Anthony of his conversations with members of the U.S. Administration, and added :

" At a time when the Western Powers are making sustained efforts to secure the unity of Germany, it is essential that they should be in continual contact with the German Federal Republic. Both the Prime Minister and the Chancellor intend, as circumstances develop, to follow today's conversations by further exchanges of view between the two Governments."

Foreign Ministers' Discussions in New York and San Francisco.

The British, French and U.S. Foreign Ministers (Mr. Macmillan, M. Pinay and Mr. Dulles) met in New York on June 16-17 for an exchange of views before proceeding to San Francisco for the tenth anniversary celebrations of the founding of the United Nations. They were joined on June 17 by Dr. Adenauer, the following communiqué being issued at the end of the talks :

" The Foreign Ministers took note of the formal acceptance by the Soviet Government of their invitation of May 10, and reaffirmed the view therein expressed that ' the time has now come for a new effort to resolve the great problems which confront us.' The meeting also provided an occasion for the three inviting Powers to consider arrangements for the forthcoming Geneva Conference, in preparation for their meeting with the Soviet Foreign Minister at San Francisco.

" They were pleased to have the opportunity of discussing with Chancellor Adenauer problems of particular concern to Germany. Plans were discussed for consultations in Paris with other members of NATO to be held before the Geneva Conference. . . ."

M. Molotov, who had arrived in San Francisco for the U.N. tenth anniversary session, had a meeting in that city on June 21 with Mr. Dulles, Mr. Macmillan and M. Pinay, at which procedural and other matters were discussed in preparation for the " summit " conference at Geneva.

Defeat of Senator McCarthy's Resolution on " Summit " Conference.

A resolution by Senator McCarthy (Republican), demanding that the United States should refuse to attend the " summit " conference unless the Soviet Union agreed in advance to discuss the " liberation " of the East European countries, was rejected by the U.S. Senate on June 22 by 77 votes to four, at the end

of a five-hour debate. The Foreign Relations Committee had previously recommended the Senate to reject the motion because it implied lack of confidence in President Eisenhower. Senator McCarthy's resolution was strongly criticized not only by the Democratic leaders in the Senate but also by Senator Knowland and other prominent Republicans. Only three Senators—Jenner (Indiana), Langer (North Dakota), and Malone (Nevada), all Republicans—voted with Senator McCarthy in support of the resolution.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Soviet Weekly) **(Prev. rep. 14189 A.)**

A. AUSTRALIA. — Victoria. - State Elections.

Elections to a new Legislative Assembly were held in Victoria on May 28 and resulted in a victory for the Liberal and Country Party, led by Mr. Henry Bolte, which won 34 of the 66 seats. The Labour Party, led by the Premier, Mr. Cain, won 20 seats; the Country Party (which is independent of the Liberal and Country Party), 10 seats; Progressive Labour, one seat; and the dissident Labour group led by Mr. Barry (whose vote against Mr. Cain's Government precipitated the election), one seat. The significant feature of the election was the defeat both of the "Barry" Labour Party, which lost 11 of the 12 seats it formerly held, and of the breakaway Liberal Party, led by the former Premier, Mr. Hollway, which lost all its four seats Both Mr. Barry and Mr Hollway were defeated. Ministers in Mr. Cain's Government who were defeated included the Deputy Premier and Chief Secretary (Mr. Galvin), the Minister for Housing (Mr. Sheehan), and the Minister for Lands (Mr. Smith).

A Liberal and Country Party Government was accordingly formed by Mr Bolte with the following membership Mr H Bolte, Premier, Treasurer, and Soil Conservation, Mr A. G Rylah, Deputy Premier, Chief Secretary, and Attorney-General; Mr G O. Chandler, Agriculture, Mr A G Warner, Transport, Sir Thomas Maltby, Public Works, Mr. E Cameron, Health; Mr K Turnbull, Lands and Soldier Settlement, Mr W J. Mibus, Water Supply and Mines, Mr H. Petty, Housing, Mr J. S Bloomfield, Labour and Electrical Undertakings, Mr R. K. Whately, Forests and State Development, Mr. W W. Leggatt, Education and Immigration, Mr G O. Reid, Assistant Chief Secretary and Assistant Attorney-General, Mr G S McArthur, Minister without portfolio.

Elections were held on June 18 for one-half of the 34 seats in the Victorian Legislative Council (the Upper House of the State Parliament) and again resulted in a victory for the Liberal and Country Party, all of whose nine candidates were returned. All 11 candidates of the dissident Labour group were defeated, including their leader, Mr. Coleman, the former Minister of Transport. The two members of the Hollway Liberal group also lost their seats, this group being no longer represented in the State Parliament. All members of the Cain Labour group standing for re-election retained their seats. The Liberal and Country Party, with Country Party support, will have a majority of three in the new Legislative Council.

On June 6 the Victorian State Executive of the Labour Party expelled for life all dissident Labour members of the Legislative Assembly who were responsible for the defeat of Mr. Cain's Government, and also all those party members who had declared their allegiance to the breakaway Barry - Coleman group, or who had assisted that group's candidates in the elections.—(Australian News and Information Bureau) **(Prev. rep. 14178 A; Victoria Elections, 12666 B.)**

B. CHINA. — Mr. Krishna Menon's Mission to Peking.

Mr. Nehru announced on April 30 that the Chinese Prime Minister, Mr. Chou En-lai, had invited Mr. Krishna Menon (principal Indian representative at the United Nations) to Peking to continue the efforts made at the Bandung Conference to find a solution to the Formosa question, and that he (Mr. Nehru) had "gladly agreed to this." Mr Menon accordingly visited Peking from May 11-21, had a number of talks with Mr. Chou En-lai and other members of the Chinese Government, and was received by Mr. Mao Tse-tung. He arrived back in New Delhi on May 26. Before leaving Peking Mr. Menon said that it was not possible to go into details regarding his talks with the Chinese leaders, but they had been "most useful."

Mr. Menon returned to New York on June 9, and on June 14 had a meeting with President Eisenhower and Mr. Dulles at which he reported on his discussions in Peking. Earlier, Mr. Menon had had discussions in London (which he visited from June 3-8) with Sir Anthony Eden, Mr. Macmillan, and other British Cabinet Ministers, and in Ottawa on June 9 with Mr. St. Laurent and Mr. Lester Pearson, the Canadian Prime Minister and Minister for External Affairs.—(The Statesman, Calcutta - The Hindu, Madras) **(Prev. rep. Bandung Conference 14181 A; Formosa, 14117 A.)**

C. PAKISTAN. — East Pakistan. - Restoration of Parliamentary Government. - Cabinet formed by Mr. Sarkar. - Mr. Shahabuddin resigns Governorship.

The Prime Minister of Pakistan, Mr Mohammed Ali, announced in Dacca on June 3, after a meeting with Mr. Fazlul Huq (the former Chief Minister of East Bengal) and other members of the United Front, that Governor's rule had been lifted and parliamentary government restored in the province, and that a nominee of Mr. Huq was being asked to form a Ministry immediately The Governor-General, Mr. Ghulam Mohammad (who was visiting London for medical treatment at the time) accordingly issued a proclamation on June 5 stating that he was satisfied that conditions now existed in which the government of East Pakistan could be carried on, and revoking his proclamation of May 30, 1954, under which Governor's rule had been imposed.

Mr Mohammed Ali stated on June 3 that ever since the promulgation of Section 92(A) in East Pakistan, the Central Government had been of the opinion that parliamentary government should be restored in the Province as soon as it was found possible to form a stable Ministry After assessing the situation, he had come to the conclusion that such a Ministry could now be formed Ordinarily Mr Huq, as leader of the United Front, which commanded a majority in the Legislative Assembly, would have been called upon to form a Ministry, in view, however, of the problems facing the country in connexion with the elections to the Constituent Assembly, Mr. Huq had decided to delegate his privilege to a nominee, "keeping himself free to devote all his time and energies to questions of momentous consequence to the country"

Mr. Abu Hussain Sarkar, Minister of Health in the Central Government, resigned from that post on June 5 and took office as Chief Minister of East Bengal on June 6. His Ministry was announced on the same day as follows: Mr. Sarkar, Chief Minister and Home Affairs, Mr. Ashrafuddin Choudhry, Finance and Education, Mr Hashimuddin Ahmed, Food, Agriculture, and Judiciary and Legislative Affairs, Mr Abdus Salam Khan, Communications, Irrigation, and Public Health; Mr. Sayed Aziz-ul Huq, Commerce, Labour, and Industry. With one exception (Mr. Choudhry, a member of the *Nizam-i-Islam* group) all Ministers had previously held office in Mr. Fazlul Huq's Cabinet and are members of Mr. Huq's *Krishak Sramik* party.

Mr Mohammed Ali assured the new Ministry on June 6 that the Central Government would co-operate with them in their efforts to raise the living standards of the people of East Pakistan At a press conference on the same day, Mr Sarkar said that he would shortly enlarge his Ministry, but that he could not say how or when; asked whether he would consider including members of the Awami League (a section of which had disputed Mr Huq's leadership of the United Front), he replied "Let them first come to our party, and then we will consider the position" He promised that his Ministry would attempt to implement the United Front's 21-point programme as far as possible within the time available before the next general election, and that he would give immediate attention to the question of the release of political detainees, including a number of United Front members of the Assembly

Although the Prime Minister's decision to restore parliamentary government in East Pakistan was welcomed by most West Pakistan political leaders, considerable comment was aroused by the circumstances in which it was taken. It was recalled by some papers that Mr. Mohammed Ali had previously denounced Mr. Huq as a "traitor," and it was also observed that the decision to restore parliamentary government had been made at a time when Mr. Suhrawardy (Law Minister in the Central Government, president of the All-Pakistan Awami League, and one of the most prominent political leaders in East Pakistan) was on his way to London to obtain expert legal opinion on constitutional issues raised by the Federal Court.

At a meeting of the United Front Parliamentary Party on Feb. 17, the Awami League had moved a vote of no-confidence in Mr Huq's leadership, which it claimed had been carried, although this claim was disputed by the *Krishak Sramik* Party A section of the Awami League, however, lead by Mr. Abdus Salam Khan and Mr. Hashimuddin Ahmed (who were subsequently suspended from membership), continued to support Mr Huq. The executive of the League, at a meeting on April 4 presided over by Mr Suhrawardy, had condemned Mr Mohammed Ali's failure to restore parliamentary government in East Pakistan "on the lame pretext of alleged differences within the United Front," and had demanded that the leader of the Awami League, "the largest single party in East Pakistan and the main constituent of the United Front," should be asked to form a Ministry

Mr. Shahabuddin, the Governor of East Pakistan, tendered his resignation on June 6. In a press statement he denied reports that he was opposed to the restoration of parliamentary government, and explained that he had resigned because of the way in which the Prime Minister had made the announcement without consulting him properly in the matter, which showed a "lack of confidence" in him.—(Pakistan High Commissioner's Office, London - Dawn, Karachi - Times - Manchester Guardian) **(Prev. rep. 14232 A; 13746 A; 13514 A.)**

A. PORTUGUESE SETTLEMENTS IN INDIA. — Nationalist Agitation for Union with India. - Tension between India and Portugal.

From the middle of 1954 onwards there was a marked intensification of nationalist agitation, both in the Portuguese Settlements and in India itself, in favour of the union of the Settlements with India. Developments during the past 12 months, and their repercussions on relations between India and Portugal, are described below under cross-headings.

Nationalist Activities in Portuguese Settlements, June - August, 1954.

Nationalist demonstrations in Goa on June 18, 1954, when the Indian flag was hoisted, led to the arrest of a number of demonstrators and suspected nationalist sympathizers. Dr. Gaitonde, the Goanese surgeon whose earlier arrest had led to a protest to Portugal by the Indian Government (see 13517 A), was sentenced by a Lisbon court on July 9 to three months' imprisonment, deprivation of political rights (including that of practising his profession) for 12 years, and police surveillance for five years.

An " Action Committee " formed by a number of nationalist groups in Bombay announced on July 15 that volunteers would carry out a " march on Goa " on Aug. 15 as the beginning of a *satyagraha* (non-violent civil disobedience) campaign in the Portuguese Settlements On July 22 about 30 volunteers occupied the village of Dadra (a small *enclave* inside Bombay State forming part of the Settlement of Daman), after a skirmish in which two policemen were killed, and hoisted the Indian flag. The nearby *enclave* of Nagar Haveli was occupied at the end of July by two groups of volunteers, one recruited from the left-wing Goan People's Party and the other from the " Free Goa " Movement, which was backed by the right-wing *Jan Sangh*. Guerrilla resistance was carried on by a small force of Portuguese police until Aug. 11, when they retreated to the Settlement of Goa. Some friction occurred between the two groups of volunteers owing to the radical agrarian policy pursued by the Goan People's Party; a settlement was eventually reached, however, whereby the Goan People's Party agreed to withdraw, leaving the Free Goa Movement in sole control in the two *enclaves*.

In view of the nationalist agitation, the Portuguese garrisons of the Settlements were strengthened during the spring and summer of 1954. In a Note presented on July 24, the Portuguese Government accused the Government of India of concentrating troops on the borders of the Settlements, and demanded that Portuguese troops and police should be allowed to cross Indian territory into the Dadra *enclave*. A second Note of July 26 repeated this demand, and requested permission for Portuguese representatives to visit both Dadra and Nagar Haveli to examine the situation. The Indian Government's reply (July 28) denied that there were any Indian Army personnel on the frontiers of the Settlements; stated that it could not permit movements of foreign troops and police on Indian soil, and could not be a party to the suppression of a genuine nationalist movement for freedom from foreign rule; and declared that the prevailing tension was bound to increase if Portuguese officials were permitted to cross Indian territory.

The Portuguese Government demanded on July 30 the withdrawal of Mr. Coelho, the Indian Consul-General in Goa, and of the Indian Vice-Consul in the port of Marmagão, whose activities were said to constitute " a serious threat to the internal security of Portuguese India " This allegation was repudiated as unfounded by the Indian Government, which demanded the recall of the Portuguese Consul-General in Bombay. Consular relations were not re-established until Jan. 18, 1955, when the Indian Government announced that Mr. P. R. S Mani had been appointed Consul-General in Goa, and that Dr. Albano Nogueira had been provisionally recognized as Portuguese Consul-General in Bombay.

International Reactions to Indo-Portuguese Tension.

The British Foreign Office announced on Aug. 6, 1954, that Mr. Selwyn Lloyd (Minister of State for Foreign Affairs) had informed the Portuguese Ambassador in London (Dr. Pereira) that H.M. Government greatly regretted " the state of tension existing between a member of the Commonwealth and an ally of such long standing as Portugal." Recent events (the statement continued) appeared likely to intensify this tension and to result in bloodshed, and the acting British High Commissioner in Delhi, Mr. Middleton, had therefore expressed to the Indian Government " the earnest hope that there will be no resort to violence or to methods bound to lead to the use of force."

The Indian reply to this statement, delivered on Aug. 9, repudiated the " unwarranted implications " contained in the Foreign Office's statement, which, it said, was based on " one-sided information." It declared that the present situation in the Settlements had not been created by India, which had " persistently sought a peaceful solution of this problem by negotiation," but had arisen from the Portuguese Government's resistance to " the desire of subject people for freedom from foreign rule." In conclusion, the Note said that the Government of India were " determined to pursue their peaceful and conciliatory approach without either use or support of violence in any form," and expressed the hope that the Portuguese Government would respond and that all " friends and allies of Portugal will counsel her in this direction."

The Brazilian Government had previously informed the Government of India on July 30 of its feelings of solidarity with Portugal, and of its hopes for a peaceful settlement During August the Governments of Italy, Belgium, Argentina, Chile, Venezuela, and other countries, as well as the Holy See, expressed their concern over the dispute, and their hopes for a peaceful solution, the U S Government expressed similar sentiments, whilst emphasizing its general opposition to colonial rule wherever it existed, and Cuba and the German Federal Republic expressed support for Portugal's proposals (see below) for neutral supervision of the frontiers of the Settlements

Proposals for Neutral Supervision of Frontiers. - Non-agreement on Indo-Portuguese Negotiations.

Portuguese proposals for supervision of the frontiers of the Settlements by an international team of neutral observers, put forward on Aug. 8, 1954, were accepted by India. Differences on questions of procedure, however, prevented their implementation, and Indian proposals for negotiations on the subject were subsequently rejected by Portugal on Sept. 6. The lengthy series of Note exchanges between the two countries is summarized below.

The Portuguese Note of Aug 8 observed that there were two contradictory versions of the situation In the Portuguese view, bands formed from " elements foreign to the Portuguese national community " were being used to " obtain the usurpation of Portuguese territories or to provoke incidents," with the protection and assistance of the Indian authorities and armed forces India, on the other hand, maintained that the nationalist agitation was peaceful and non-violent, and claimed that " neither aggression nor connivance in aggression can be laid at its doors " In order to " permit light to be thrown on the situation," the Portuguese Government proposed that neutral observers, chosen from countries with which both Portugal and India maintained diplomatic relations, should be allowed free access to the Settlements and to adjacent Indian territories, and should submit reports on (*a*) the nature, nationality, and activities of any groups entering or proposing to enter the other country's territory against the will of its authorities, (*b*) whether or not these groups were armed; (*c*) whether they received protection or help from the authorities and armed forces of the country in which they originated, and (*d*) any frontier incidents.

The Indian reply (Aug 10), whilst protesting against the " grotesque and totally uncalled-for allegations " in the Portuguese Note, accepted the proposal that there should be an impartial observation in the Settlements. The Indian Government, however, did not consider the Portuguese proposals entirely practical or suitable, and therefore suggested that representatives of the two Governments should meet immediately to consider what steps should be taken to implement the principle of impartial observation.

The Portuguese Government pointed out on Aug. 13 that the Indian Note had referred only to Portuguese territories, instead of those of both sides, and invited India to state the questions of detail on which she disagreed with the original proposals In reply, the Indian Government reaffirmed its acceptance in principle of the Portuguese proposals, and suggested that representatives of both countries should meet to discuss " terms of reference, the composition of observation teams, methods of operation of the principle of impartial observation, and all other relevant questions."

The Portuguese Government accepted this suggestion on Aug. 17, and nominated Dr. Garin and Dr. Laborinho (the Portuguese Minister and Counsellor in New Delhi) to lead the Portuguese delegation. India (on Aug. 19) nominated Mr. N. R. Pillai and Mr. R. K. Nehru (respectively secretary-general and head of the Political Department in the Ministry of External Affairs) as its principal representatives, and proposed that negotiations should begin on Aug. 24. This proposal, however, was rejected on Aug. 22 by the Portuguese Government, which insisted that India should either agree that the purpose of the observers was solely to report on the matters specified in its Note of Aug. 8, or indicate what other matters should be laid down as the object of international observation. Portugal (the Note added) was prepared to enter into separate negotiations on " certain problems arising from the co-existence and vicinity of the Portuguese State of India and the Indian Union," provided that India accepted certain conditions in advance, and that the negotiations took place in Lisbon or in the territory of a third State.

The Indian Government's reply (Aug. 24) pointed out that India was being asked to agree in advance to certain conditions which should themselves be the subject of discussion. It suggested that the proposed conference should discuss the implementation of the principle of impartial observation and any other subjects which it considered relevant, in accordance with the normal procedure whereby a conference agreed on its own agenda; and observed that

the proposal for a second conference was a different one, which should be considered separately. A Portuguese Note of Aug. 30 suggested that negotiations should begin on Sept. 7, that India should submit a draft agenda, and that separate negotiations should be held on problems arising out of the "co-existence" of India and the Settlements. A separate Note of the same date again requested that Portuguese officials should be allowed access to the Dadra and Nagar Haveli *enclaves*. This request was rejected on Sept 2 by the Indian Government, which, however, agreed that talks should open on Sept 7, although refusing to accept prior conditions about the agenda.

Dr. Garin informed the Indian Government on Sept 6 that, in the Portuguese Government's view, the Indian reply did not amount to acceptance of the proposal for the appointment of observers, and that the meeting fixed for the following day could therefore not take place Another Portuguese Note of the same date stated that, as Portuguese officials had been refused transit facilities, the Government of Portugal proposed to appoint observers from third countries to examine the situation in the *enclaves*

The Indian Government, in a Note on Sept. 11, expressed regret that negotiations had been delayed because Portugal had "continued to insist that matters which in accordance with normal practice should form the subject of negotiations should be agreed to in advance." Portugal's proposal to appoint foreign observers for the *enclaves* represented a departure from the principle of impartial observation, and the Indian Government could not accept the Portuguese Government's claim that it had "the right to demand transit or passport facilities for nationals of other countries" After emphasizing that India still accepted the principle of impartial observation, and inviting Portugal to send representatives to Delhi for negotiations, the Note concluded · "If the Portuguese Government are, however, disinclined for any reason to proceed with the proposed negotiations, it would be appropriate for them to make a clear statement to that effect to avoid further misunderstanding, instead of making new demands which deviate from the agreed principle while professing to keep the door open for genuine negotiations."

Nationalist Activities, August 1954 - April 1955. - The "March on Goa."

In anticipation of the projected nationalist "march on Goa" (see above), the Portuguese authorities proclaimed a state of siege in the Settlements on Aug. 7, imposed a curfew, closed part of the Indian border, banned the entry of Indian and foreign newspapers, and expelled from Goa some 4,000 Indians who did not possess residence permits. The Portuguese frigate *Bartolomeu Dias* arrived off Diu on Aug. 10 with orders to fire on any Indian flag seen on the coast of the Settlements.

Mr Nehru stated on Aug. 13 that he was opposed to non-Goans entering the Settlements, but that he would not stop Goans from doing so, at the same time he appealed to them to refrain from acts of violence. Rejecting as "fantastic nonsense" the allegation that India had organized the nationalist movement in the Settlements, Mr Nehru observed that the Indian Army could easily have occupied them, but "we have not done it and shall not do it" An Indian official spokesman had previously pointed out that the Goan National Congress, which had organized the "march on Goa," was affiliated to the [Opposition] Praja Socialist Party, and had consulted neither the Government of India nor the Congress Party on its action.

Despite the publicity which had been given to it, the "march on Goa" on Aug 15 met with negligible support, only 47 men taking part. The only violence occurred at Terekhol, on the northern frontier of Goa, where a nationalist was killed by Portuguese troops. Both the small number taking part and the peaceful nature of the "march" were largely attributable to the precautions taken by the Indian police, who prevented Indian nationals from crossing the frontier and searched the volunteers for arms beforehand.

Two parties of 19 and 13 volunteers, carrying Indian flags, crossed the border at different points, and were arrested after advancing a short distance into Portuguese territory. At Terekhol 15 unarmed volunteers occupied a fort without resistance from the Customs officers holding it; Portuguese troops reoccupied the fort on the following day, one volunteer being killed and 12 wounded. Elsewhere in the Goa Settlement the police dispersed groups of demonstrators who had hoisted the Indian flag, several arrests being made. A force of 1,200 Indian volunteers, organized by the Praja Socialist Party, were turned back by the Indian police when attempting to enter the Settlement of Daman. The Indian Government protested on Aug. 20 against the violent measures used by the Portuguese at Terekhol, and in subsequent Notes of Sept. 3 and Oct. 6 alleged that members of the two nationalist groups had been publicly beaten.

After a lull during the autumn, nationalist agitation was renewed at the end of December. Demonstrations occurred in Goa on Jan. 26, 1955, the anniversary of the inauguration of the Indian Republic, and on Feb 17, the anniversary of Dr Gaitonde's arrest. About 75 volunteers entered Daman during the night of April 29-30, but withdrew when Portuguese military police opened fire No casualties were caused.

Portuguese Action against Nationalists. - Release of Dr. Gaitonde.

A number of nationalists arrested in the period July - September, 1954, were tried by a Portuguese military court between March 10 and April 27, 1955. Mr. De Souza, leader of the "march on Goa," was condemned to 28 years' deportation or 20 years' rigorous imprisonment; a Customs officer who had surrendered to the nationalists at Terekhol was sentenced to four years' imprisonment; and 46 nationalists received terms of imprisonment ranging from one to eight years.

On Jan. 5, 1955, the Portuguese Government had informed the Indian Government that new legislation had been enacted under which (1) both Portuguese and foreign citizens who participated in "collective actions intended to stir up public opinion or engage in other activities (individual or collective) which coincide with the aims of foreigners seeking to separate part of the national territory from the mother country, or to hand all or part of it over to a foreign country," would be liable to long terms of imprisonment; (2) these terms of imprisonment might be served in "a different province from the one in which the transgression took place"; (3) in the case of foreigners the penalties would be slightly lower, except that foreigners who had illegally entered Portuguese territory would be liable to the same penalties as Portuguese citizens. The Note also stated that Indian nationals already under arrest for such activities would be returned to India, and requested the Indian Government to make known the serious nature of these penalties and to prevent any more groups of *satyagrahis* from crossing the frontier.

The Indian reply (Jan. 12) warned the Portuguese Government that any attempt to deport Indian (including Goan) *satyagrahis* to serve prison sentences in Portugal or Portuguese Africa would have "serious and far-reaching repercussions" in India The Note declared that the Government of India refused to accept the view that Indians, including Goans, who had the courage to resist "Portuguese colonialism" were criminals, and that the people of India had every right, with their compatriots in Goa, to seek by non-violent means the withdrawal of colonialism from India

The Portuguese Government rejected the Indian protest on Jan. 20, and expressed surprise that the Indian Government should claim the right to pass judgment on legislation enacted by another State concerning offences committed in its own territory, and even by its own nationals A further Indian Note of April 11 protested against the "mounting repression" in Goa and alleged mass arrests, detentions without trial, and ill-treatment of non-violent *satyagrahis*. It was returned by Portugal on the following day on the ground that it constituted interference in Portuguese internal affairs

Dr. Gaitonde and his wife were released by the Portuguese authorities on May 25, and arrived back in India from Lisbon on June 14 He stated that he had not been treated badly in Portugal and had only to report to the police every day.

Reactions in India.

The arrests in Goa, and reports of the ill-treatment of *satyagrahis*, led to increased tension during May, 1955, when Indian volunteers began crossing the border without interference from the Government. At the same time demands were put forward by all sections of Indian opinion for stronger action in support of the nationalist movement in the Settlements. On May 18 a first batch of 54 non-Goan *satyagrahis* entered Goa and were fired on by the police, four of the party being wounded; 28 of the volunteers were subsequently taken to the Indian border and released, the remainder being held as prisoners. Between April 30 and May 20 the Praja Socialist, Mazdoor Kisan, Hindu Mahasabha, and Communist parties all announced their intention of organizing parties of volunteers to enter Goa.

Groups of 50 to 100 volunteers accordingly entered Goan territory on May 18, May 27, June 4, June 12, and June 18. In all cases the Portuguese authorities arrested the *satyagrahis* but returned most of them across the frontier to India. Leaders of the groups included Mr. N. G. Goray (a member of the national executive of the Praja Socialist Party), Mr Atmaram Patil, a leader of the Peasants' and Workers' Party, Mr. Rajaram Patil, a Communist leader, and Mr. V. G. Deshpande, general secretary of the Hindu Mahasabha and a member of the Indian Parliament.

An All-Party Parliamentary Committee for Goa was formed on May 5 with the aim of mobilizing Indian opinion on the question, and held its first meeting in Bombay on May 21 with Congress, Praja Socialist, Communist, and Independent support. The meeting, which was presided over by Mr. Frank Anthony (leader of the Anglo-Indian community), adopted a resolution urging the Government of India to make "one last attempt" to secure a settlement of the question by negotiation, and, if this failed, to "enforce suitable sanctions to eliminate once for all the remnants of colonialism in India." Dr. Khare, vice-president of the Hindu Mahasabha, appealed to Mr Nehru on May 21 to decide on "political action" against Goa, or at least to direct the Congress Party to launch a *satyagraha* campaign, whilst the Praja Socialist Party's executive condemned the Government's "appeasement" policy and demanded immediate "police action" to merge the Settlements with India

In reply to Dr. Khare's appeal, Mr. Nehru stated on May 24 that "we shall take such action as we consider proper in this matter," adding that "a great country should not allow itself to be coerced into thoughtless action"

Mr. Nehru declared in a press statement on May 31 that the Government of India would adhere to their policy of dealing with the Goa question peacefully, "in spite of recent developments which have pained our people very much." He added that the Government would also continue their present policy with regard to the participation of Indian nationals in the

satyagraha movements—" that is to say, we do not approve of large numbers of Indian nationals going there, but individual Indians have gone and can continue to go."

Mr. Nehru emphasized that the Government of India were " afraid of only one thing—that is, of following a policy which is not in keeping with our larger policies, objectives, and methods " He added : " We have gained some credit in the world for following those basic principles, and we do not wish to be hustled or harried into by-passing them. Naturally one has to adapt that basic policy from time to time to a changing situation, but the basic policy must remain. It will be a policy under which the door is always open for peaceful negotiation and settlement, even though the Portuguese do not behave correctly "

Continuing, Mr. Nehru said that not only the non-Christian (Hindu) population of Goa, constituting 60 per cent of the total population, but also a considerable majority of Goan Christians, wanted Goa to enter the Indian Union. There was sufficient evidence for this, including the arrest of a considerable number of Catholic priests for expressing themselves in favour of union with India With regard to the future of Goa after its eventual merger with India, Mr. Nehru reaffirmed that the Government would treat Goa—as it had done Pondicherry—as a separate unit and entity, and would not attach it to any Indian State. They recognized that Goa had " an individuality and a history," and that it would maintain that individuality until the people of Goa themselves wished to change it. In religious matters, similarly, the Goanese would have " the fullest freedom."

After declaring that " normal democratic freedom prevails neither in Goa nor in Portugal," Mr Nehru went on · " What Portugal has or does not have is none of my business—that is a matter for the Portuguese people But what is happening in Goa is my business, and it is only our policy of peaceful approach and restraint which prevents us from taking other steps. It is open to us to take such steps in the economic domain as we consider proper. We have taken some. We may take others."

Portuguese Charges against India.

The Portuguese Foreign Ministry issued a statement on the situation in Portuguese India on June 8.

This statement said that the Portuguese Government had long been following " with growing anxiety " the development in India, " with the encouragement of the highest Indian authorities, of a whole series of events intended to provoke fresh agitation in that country with the object of increasing tension along the frontiers of Portuguese India." After press campaigns and statements by political leaders of the Hindu Mahasabha, the Socialists, and Communists, groups proposing to " liberate " Portuguese India had lately been constituted " under the benevolent eyes of the Indian authorities." This " intentional and systematic mobilization of public opinion against Portugal " could only have tragic results. Many armed incursions into Portuguese territory had taken place—some by bands under a single command but without any apparent military organization ; others [it was alleged] by members of the Indian armed forces.

The Portuguese Government (the statement continued) had taken steps to counter the economic blockade and to ensure the peace and well-being of the people of Portuguese India. The Indian Government had been formally notified that attacks against Portuguese territories would be met with force, that all illegal entries would be severely checked as " criminal violations of sovereignty," and that India would bear the exclusive responsibility for any consequences that might ensue. " It has been thought necessary," the statement added, " to give public opinion ample warning of the seriousness of the present situation and the risks arising out of it for peace in Asia, through the sole fault of the Indian Government."

Portuguese Claim to NATO Support.

The Portuguese Prime Minister, Dr. Salazar, maintained in a broadcast on April 13, 1954, that Portugal's claim to sovereignty over the Settlements was guaranteed by the Anglo-Portuguese treaty of 1642, under which Britain was bound to protect all Portugal's " conquests and colonies," and also by Article IV of the North Atlantic Treaty, which guaranteed the " territorial integrity " of the signatories. Mr. Nehru, however, emphasized in the House of the People on the following day that India was not a party to either of the treaties mentioned by Dr. Salazar, and that " as a sovereign State India cannot be bound by any international or regional agreement to which she is not a party."

Mr. Nehru told the Council of States on May 14, 1954, that the Government had informed the NATO Powers that, in India's view, " neither the North Atlantic Treaty nor the Anglo-Portuguese alliance concerns any foreign settlements in the country."

Article IV of the North Atlantic Treaty (see 9869 A), cited by Dr. Salazar, provides that the signatories shall consult together whenever the territorial integrity of any of them is threatened. Articles V and VI provide for joint military action in the event of " an armed attack on the territory of any of the parties in Europe or North America, on the Algerian departments of France, on the occupation forces of any party in Europe, on the islands under the jurisdiction of any party in the North Atlantic area north of the Tropic of Cancer, or on the vessels or aircraft in this area of any of the parties." As was pointed out in the Indian Press, Dr. Salazar himself had stated in the Portuguese National Assembly in 1949 that " the Pact does not affect directly the defence of colonial territories, or, to be precise, our overseas territories."

The Anglo-Portuguese treaty of alliance provides for mutual military assistance in the event of aggression against the territory of either country. The oldest existing treaty in the world, it was originally signed in 1373 during the reign of Edward III, and was confirmed in 1386, 1642, 1654, 1661, 1815, 1899, 1904, and 1914 Under this treaty Portugal took part in the First World War on the side of the Allies. During the Second World War, whilst remaining neutral, she leased bases in the Azores to Britain, and in return was given an assurance by Britain, Australia, and South Africa that her sovereignty over her colonies would be maintained.

The Portuguese Foreign Minister, Dr. Paulo da Cunha, speaking in Lisbon on Sept. 20, 1954, said that the fact that Portugal had not yet invoked Article IV of the North Atlantic Treaty did not mean that she would not do so in future. Dr da Cunha subsequently announced on May 15, 1955, that he had informed his colleagues on the North Atlantic Council about developments in Goa —(Indian High Commissioner's Office, London - The Hindu, Madras - The Statesman, Calcutta - Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 13517 A ; Mr. Nehru on Goa, 14187 A.)

Note. The three Portuguese Settlements in India—Goa, Daman, and Diu—are described in the footnote to 12997 A (K.C.A., Vol. IX) The population, numbering about 600,000, consists of a small Portuguese-speaking and Catholic upper class , an English-speaking and Catholic middle class ; and a working class of peasants and fishermen who speak Konkani (an Indian language), about half of whom are Catholics and half Hindus In addition, about 15,000 Indians are employed in opencast mining, most of whom return to India during the monsoon season when the mines cannot be economically worked A large number of Goans (variously estimated at 120,000 to 250,000) work in India, particularly in Bombay, and it is among these emigrants that nationalist feeling is believed to be strongest.

Over 40 per cent of Goa's exports go to India and only 0 5 per cent to Portugal, whilst 20 per cent of her imports come from India and less than 10 per cent from Portugal. Total imports amount to about £6,900,000 a year and exports to about £4,400,000, the deficit being covered by receipts from shipping and tourist traffic, and also by remittances from emigrants, most of whom live in India. Agricultural production is insufficient to cover the needs of the population and rice is imported from India. The iron and manganese mines, which provide most of Goa's exports, are largely run by Indian industrialists and worked by Indian labour.

A. ANTARCTICA. — British Application to International Court on Rival Claims in Antarctica. - Arbitration refused by Argentina and Chile.

The British Foreign Secretary (Mr. Harold Macmillan), disclosed on May 6, in a parliamentary written answer, that H.M. Government had submitted for arbitration by the International Court of Justice the disputes with Argentina and Chile over the sovereignty of British territory in the Antarctic.

After pointing out that Argentina and Chile had persistently committed acts of trespass in the Falkland Islands Dependencies, to which Britain's title went back for more than a century, Mr. Macmillan announced that identical Notes had been sent to the Argentine and Chilean Governments on Dec. 21, 1954, repeating the British offer to submit the disputes to the International Court, or to some other form of international arbitration if Argentina and Chile preferred. No reply to these Notes had been received by the end of April, and H.M. Government had accordingly decided to make direct application to the International Court and to lay its case before it. The necessary documents had been submitted to the International Court on May 4, but since then replies had been received from both Argentina and Chile rejecting the British offer of arbitration. H.M. Ambassadors in Buenos Aires and Santiago had been instructed to express H.M. Government's disappointment at the replies, and the hope that the Argentine and Chilean Governments might reconsider their attitudes and accept the jurisdiction of the International Court.

The documents presented to the International Court by the British Government, running to 12,000 words, explained that the British title to the Falkland Islands Dependencies was based on historical discoveries dating from 1675 to 1843, and on a long record of effective occupation. It was pointed out that British claims to these territories were formally confirmed and defined in Letters Patent issued in 1908 and 1917.

It was announced in London on May 6 that Britain had established two new bases in the Antarctic, making 16 in all. Eight Argentine and four Chilean bases have been established in British Antarctic territory in recent years.

JUNE 25—JULY 2, 1955

A. ARGENTINA. — Proposed Disestablishment of Roman Catholic Church. - Deportation of Roman Catholic Prelates. - Argentine Leaders excommunicated by Vatican. - Abortive Naval Revolt in Buenos Aires.

The Perón Government's campaign against the Roman Catholic Church, which began in November last (see 13983 A, 14066 D), culminated on May 18-19 in legislation aimed at disestablishing the Church for the first time in the 145-year history of the Argentine Republic. [The Roman Catholic religion had been recognized as the official religion of the State since Argentina won her independence from Spain in 1810.] Widespread arrests of Catholics during April and May were followed on June 14 by the dismissal and deportation of two leading Roman Catholic dignitaries, and by the subsequent excommunication by the Holy See of all those responsible for violating the rights of the Church in Argentina. On June 16 a section of the Argentine Navy, notably the naval air arm, launched a revolt against President Perón which was quelled after several bombing attacks by insurgent aircraft on Government buildings in Buenos Aires. These developments are described below under cross-headings.

Action against Roman Catholic Church.

The Bill proposing to disestablish the Roman Catholic Church was passed by the Chamber of Deputies on May 18 (by 121 votes to 12) and by the all-*Peronista* Senate on May 19 (without a dissentient vote). It provided (*a*) that elections should be held during the next six months for a National Convention which would amend those provisions in the Constitution relating to religion; and (*b*) that the Convention should complete its work within 30 days of its installation. Among specific constitutional provisions which the National Convention would be asked to amend were Article 2, which states that "the Federal Government upholds the Roman Catholic Apostolic Church," and Article 77, which requires the President and Vice-President of Argentina to belong to the Roman Catholic faith.

The 12 Radical deputies opposed the Bill on the ground that political conditions justifying the reform of the Constitution did not exist at present. The principle of disestablishment itself was not opposed by the Radical Party, many of whose members favour the separation of Church and State.

The Argentine Congress also passed a Bill on May 19-20 making churches, convents, monasteries, and all other Church property liable to taxation, and rescinding all former legislation under which religious institutions and their property had been exempted from paying real estate and other taxes. The voting was 112 to 9 in the Chamber of Deputies and unanimous in the Senate.

During the seven months November, 1954, to May, 1955, therefore, the following action had been taken against the Roman Catholic Church, either by legislation or by presidential decree: the abolition of obligatory religious instruction in State schools; the withdrawal of State grants to Roman Catholic schools; the legalization of divorce and of prostitution; a ban on religious processions and open-air meetings without specific permission from the police; the lifting of the Church's exemption from taxation; and, finally, the proposed disestablishment of the Roman Catholic Church.

During April and May the police arrested a number of Roman Catholic priests and laymen in various centres—including Buenos Aires, Mendoza, Salta, Santa Fé, and Tucuman—on such charges as issuing pamphlets attacking the regime, holding religious processions without official permission, "plotting against the State," "seditious activities," etc. Among those arrested were the leading members of the Catholic Action organization in Buenos Aires, whose homes were raided on May 6. Many of those arrested were subsequently released, but some 125 persons were reported to be still under detention at the beginning of June.

On March 31 a Presidential decree had been issued removing religious festivals—including Epiphany, Corpus Christi, All Saints' Day, the Feast of the Assumption, and the Feast of the Immaculate Conception—from the list of Argentine public holidays. The decree laid down that there would in future be two categories of holidays: (1) national holidays, which would include Labour Day (May 1), the anniversary of the Argentine revolution of 1810, the anniversary of the Argentine declaration of independence, the anniversary of the death of Señora Eva Perón, and the anniversary of General Perón's release from prison in 1945, and (2) lesser holidays or "non-working days," which would include Christmas Day, New Year's Day, Good Friday, and the anniversary of the death of General San Martin, the Argentine liberator.

In defiance of the Government's ban on the open-air celebration of the Feast of Corpus Christi, some 100,000 Roman Catholics assembled on June 11 in the Plaza de Mayo, in the centre of Buenos Aires, while the Corpus Christi procession was being held inside the Cathedral. A large section of the crowd subsequently marched up the Avenida de Mayo to the Congress building, where they hoisted the Papal flag. Clashes occurred between the police and demonstrators—some of whom smashed the windows of *La Prensa*, now the organ of the General Confederation of Labour—and a number of arrests were made.

The Minister of the Interior (Señor Angel Borlenghi) issued a statement on June 12 accusing the demonstrators of having committed "a serious offence against Argentine sovereignty" by raising the flag of a "foreign Power" [i.e. the Papal State] over the Congress building, and alleging that they had hauled down and burned the national flag [Despite this allegation, press correspondents in Buenos Aires stated that the Papal flag had been flown alongside the national flag, and that the latter had not been hauled down.] The Minister also accused the demonstrators of having torn down plaques dedicated to the memory of Eva Perón, of having stoned the offices of pro-Government newspapers, and of having wrecked the Peruvian Ambassador's car and injured the chauffeur.

The police authorities issued a statement alleging that members of Catholic Action had assembled before the Cathedral with the premeditated intention of provoking a disturbance; that Roman Catholics had intended to damage or burn the Cathedral and to attribute responsibility to "people's organizations", and that many arrested members of Catholic Action had been found in possession of revolvers and ammunition. It was also stated that the police, on the Government's instructions, had entered the Archbishop's palace (adjacent to the Cathedral) and arrested 428 demonstrators—mostly young men—who had taken refuge there.

A statement on behalf of the Archbishop of Buenos Aires categorically denied the allegation that members of the congregation assembled in the Plaza de Mayo for the Corpus Christi procession had burned the national flag, or had committed the other offences alleged against them. The statement said that these offences had been perpetrated by enemies of Catholicism in an effort to discredit the Church, and that the testimony of independent eye-witnesses could be adduced to support this claim.

President Perón made a broadcast on June 13 in which he accused the Roman Catholic Church of opposing the Government and of allying itself with "the former oligarchy."

After declaring that the "oligarchy" [i.e. the form of government before the *Peronista* regime] had been overthrown, and that he had invited all Argentinians "to create a new atmosphere of co-existence, mutual understanding, and solidarity," President Perón continued: "For 12 years the Government have tried by all possible means to obtain complete harmony in its relations with the ecclesiastical Hierarchy. I believed that harmony was possible. I have never tried to win the Hierarchy's political support. I believe that politics is not the specific mission of the Church, and that the Church has lost prestige whenever it has mixed politics with religion . . .

"I believed it was my duty as leader of the people to liberate the clergy from its former obligations to the oligarchy; to give the clergy liberty of action so that they could serve the people and not the oligarchy. . . Unfortunately a certain section of the clergy, now supported by virtually all the Hierarchy, could not be persuaded. I realize that I have failed, but I do not regret my attempt. Now that the clergy has decided to show itself as a wolf in sheep's clothing, once more allied with the oligarchy, I am not going to evade my responsibility to put things in order, using my constitutional prerogatives and attributes. I believe that the clergy should serve the people and not be served by them.

"Since 1943 the open participation of some prelates in politics has been notorious. . . I recall the systematic fight against the person and social work of Señora Eva Perón, the campaign of calumny and defamation against women members of the *Peronista* party, a campaign utterly unjust and lacking in all Christian spirit; contempt for the General Confederation of Labour; campaigns organized against the *Peronista* movement's ideological position in favour of peace and international reconciliation, the spreading of rumours designed to damage the prestige of men in the Government, the campaign tending to discredit the Government abroad; the unjustified attacks against youth organizations and the infamous calumnies against their activities.

"If, as some say, the people are opposed to the separation of Church and State, they will vote negatively in the election [for a National Convention to revise the Constitution]. If, as others say, the people want this separation, they will vote affirmatively. Why, then, this agitation and disorder? The Government assures free and unfettered elections in which the present controversy will be settled. It guarantees all rights within the law. Those who sow the wind will reap the whirlwind . . ."

Dismissal and Deportation of Roman Catholic Prelates. - Vatican Excommunication Decree.

A decree, signed by President Perón and all members of the Cabinet, was issued on June 14 dismissing from their posts Mgr. Manuel Tato, Auxiliary Bishop of Buenos Aires and Vicar-General of the diocese, and Mgr. Ramón Novoa, the Assistant Vicar-General. The decree alleged that Monsignori Tato and Novoa bore responsibility for the disturbances during

the Corpus Christi procession; that they had incited crowds to damage public and private property and to defame the national flag; that they were also responsible for disturbances on May 6, when some 140 Catholics had been arrested in different parts of the country, and that, abandoning their spiritual duties, they had engaged in acts of a temporal nature which were "exclusively reserved to the State."

Owing to the ill-health of the 75-year-old Cardinal Copello, Archbishop of Buenos Aires and Primate of Argentina, Mgr Tato had for some weeks previously conducted negotiations with the Government on behalf of the Roman Catholic Church.

Monsignori Tato and Novoa were placed on board an Argentine airliner on June 15, and arrived in Rome two days later after stops in Rio de Janeiro and Lisbon. In a press statement in Rio to the Brazilian paper *O Globo*, they said that they had been kept *incommunicado* by the police, had been refused permission to communicate with their ecclesiastical superiors, and had been taken to the airfield under armed guard and placed on board the plane "without documents and with only the clothes we have on our backs." They denied *in toto* the allegations made against them, and declared that the disturbances had been fomented by supporters of President Perón in an effort to discredit the Church. Monsignori Tato and Novoa were received in audience by the Pope after their arrival in Rome.

The Holy See issued a decree on June 16 excommunicating all those, whether principals or accomplices, who had "trampled upon the rights of the Church" in Argentina and "used violence against Church leaders" Special mention was made of the fact that Mgr. Tato had been forcibly prevented from exercising his ecclesiastical jurisdiction and had been expelled from Argentine territory.

The decree made no mention of President Perón or other Argentine leaders by name, but by implication affected the President and all members of the Argentine Government

Abortive Revolt by Argentine Navy.

A revolt against the Government broke out in Buenos Aires on June 16, but was quelled within a few hours. At noon, and again during the afternoon, light bombers and jet fighters from the naval air base at Punta del Indio (at the mouth of the River Plate, about 100 miles from the capital) appeared over the city and made bombing and strafing attacks on the Government headquarters in the Plazo de Mayo, and also on the nearby offices of the General Confederation of Labour. Some damage was done to the *Casa Rosada* (Government House), and heavy civilian casualties were caused when a number of bombs fell among the dense crowds in the Plaza de Mayo. After the first air attack, fighting broke out between insurgent naval forces in the Ministry of Marine and loyalist troops called out to protect the *Casa Rosada* and other Government buildings; after about two hours, however, the insurgents in the Ministry of Marine surrendered, while insurgent naval elements in the port area were also overpowered.

The Argentine Government immediately proclaimed a state of siege, imposed a censorship, and cut telegraphic and telephonic communications with foreign countries. A Government communiqué issued in the evening said that the situation was under control throughout the country; that "repressive measures" had been taken in the area of the *Casa Rosada* to put down a revolt by about 200 marines; that the Punta del Indio base, from which insurgent planes had bombed the capital, was being occupied by loyal troops; that the bombing attacks had caused "numerous victims" among the civilian population; and that the Army and the military air forces had remained completely loyal.

A radio station calling itself "Free Argentina" went on the air shortly after the outbreak of the revolt, declaring that "the tyrant is dead" and that the revolt was aimed at "restoring the freedom of the Press and the democratic movement, which has been smothered by the present government." Nothing further, however, was heard from this station, nor was there any substantiation of reports from Montevideo and Rio de Janeiro that the insurgents were in control of Rosario, the second largest city in Argentina. The Government radio, on the other hand, remained in operation throughout, and it subsequently became apparent that the revolt had been confined entirely to the capital and had been quelled within a few hours

In a broadcast on June 17, President Perón declared that calm prevailed throughout the country, that the Army and the military air forces had remained completely loyal, and that the sole responsibility for the revolt rested upon units of the Navy and the Fleet Air Arm, which must "bear the stigma for all time" of having "betrayed the country." The President disclosed in his broadcast that a number of churches in the capital had been set on fire during the disturbances.

After emphasizing that he and the members of his Government were themselves Catholics, and that they had no intention of attacking religion, the President appealed to the people "not to try to decide things by violence but by popular vote," and to await the result of the forthcoming referendum on the separation of Church and State. "If the Government does not carry out the popular decision of the electors," he declared, "the people will have the right to challenge it—but not before" President Perón added that Communists had taken advantage of the disturbances to set fire to a number of churches, and gave an assurance that the Government would take strong action to prevent a repetition of such incidents [Reports reaching New York from Montevideo stated that six or seven churches had been set on fire by demonstrators during the disturbances, and that an attempt had also been made to set fire to the Archbishop's palace] In addition, the President declared that justice "under the law" would be meted out to all who had taken part in the revolt

The Argentine radio announced on June 19 that the revolt had been led by Rear-Admiral Anibal Olivieri, Minister of Marine up to the time of the uprising, Rear-Admiral Toranzo Calderón, of the Marine Corps, and Vice-Admiral Benjamin Gargiulo, who had committed suicide after the failure of the revolt. [Admirals Olivieri and Toranzo Calderón were at first reported to have disappeared, but were subsequently stated to be under arrest]. It was also officially announced that Rear-Admiral Luis Cornés had been appointed Minister of Marine in succession to Rear-Admiral Olivieri; that the Government had taken severe measures against "Communists who took advantage of the fighting to perpetrate unlawful acts in many parts of the capital", and that the General Confederation of Labour had ordered a 24-hour cessation of work in token of support for President Perón and in mourning for the civilian victims of the uprising. The first official reports said that 156 people had been killed in the bombing and street fighting and 846 wounded, but later reports gave the figures as over 300 killed and about 1,000 injured.

A combined forces communiqué, issued on June 20, stated that the bulk of the Atlantic Fleet and the personnel of the naval bases, including those at Puerto Belgrano and Mar del Plata, had been completely loyal, and that the revolt had been confined to the following units: 295 Marine officers and men at the Ministry of Marine, 101 officers and men at the Punta del Indio naval air base, which had meanwhile been occupied by the Army; a company of Marines, consisting of 155 officers and men, who had left Martin Garcia Island (in the Plate estuary) to take part in the rising, but who had returned without having done so; 558 officers and men of the Marine Command who were "presumed to have taken part"; the Fleet Air Arm School at Punta del Rio, and a Fleet Air Arm squadron at Punto del Indio. It was announced that the former separate Marine and Fleet Air Arm Commands had been suppressed and merged with the Naval Operations Command.

Following the failure of the uprising, 39 Argentine naval aircraft landed at military and air bases in Uruguay and surrendered to the Uruguayan authorities. The refugees—about 90 officers and pilots of the Argentine Navy and Fleet Air Arm, together with a few civilians—were interned by the Uruguayan Government, which announced that the machines would eventually be returned to Argentina.

Montevideo Radio quoted statements by refugee officers giving the following reasons, *inter alia*, for the failure of the revolt: the "betrayal" of the Navy by Army units which (it was alleged) had promised to join the uprising, but had not done so; low clouds and bad visibility over Buenos Aires, which had made precision bombing of the Government's headquarters impossible; and the capture of the Punto del Indio base by the Army, which had deprived the insurgents of bombs and fuel supplies.

General Franklin Lucero, the Army Minister, issued a proclamation on June 19 announcing that he had been appointed "Commander-in-Chief of the forces of repression" by President Perón. He appealed for calm and public order, gave a warning that the security forces would take stringent measures to suppress all attempts to disturb the peace, and placed upon the San Martin Grenadiers (a crack regiment which guards the Presidential palace and the Ministries) full responsibility for the personal security of President Perón and for guarding Government House.

All members of the Argentine Government resigned on June 23 to enable President Perón to reorganize his Cabinet. In a broadcast on the same day, the President gave an outline of the revolt which, he said, he had been unable to give before because of the censorship imposed under the state of siege.

The President alleged that members of the political Opposition (the Democratic Union), subsequently joined by some "clericals," had conspired since November last to launch a military revolt with the aim of murdering the President of the Republic through air bombing or land action, and of intimidating civilians by bombing and machine-gunning the streets. He denounced the rebels for the indiscriminate slaughter of men, women and children; declared that they had "had their bags packed" so that they could "take the road to Uruguay as usual" when the revolt failed; and stressed that the provinces had remained completely calm.

The censorship was lifted on June 26 and the state of siege on June 29, on which date the post of "Commander-in-Chief of the forces of repression" was abolished. It had been officially announced on June 26 that the Argentine Government released 19 leaders of the Radical Party who, it was disclosed, had been under arrest since the rising on June 16. The Roman Catholic Hierarchy had earlier announced that all priests under detention had been released, and that Cardinal Copello had appointed successors to Monsignori Tato and Novoa.

A. CHINA. — Release of British Radio Operator.

Mr. R. W. Ford, a British radio operator formerly employed by the Tibetan Government, who had been captured in 1950 at Chamdo (Eastern Tibet) by the Chinese forces, was released by the Chinese authorities on the Hong Kong border on May 29. He had been detained in captivity in China on charges of espionage, and was finally released (according to a Peking Radio announcement) "in view of his expressed regret, during his imprisonment, for his crimes."

At a press conference on May 31 Mr Ford said that after his capture in December, 1950, he had been imprisoned in Chungking for four years, including six months' solitary confinement A military tribunal had then sentenced him to 10 years' imprisonment at a summary trial at which no appeal had been allowed. The next day he had been told that he would be deported, and had been transferred to Canton, where he had been kept for a further six months He said that he had never been subjected to physical violence but had had to undergo innumerable prolonged interrogations, and had been told that he would not be released unless he "confessed", he admitted that he had eventually "confessed" to various charges, including espionage, and added that all prisoners of the Chinese eventually made such "confessions."

Mr. Ford arrived back in London on June 22.—(Times)
(Prev. rep. U.S. Airmen, Release, 14270 A.)

B. UNITED KINGDOM.—Government Appointments.

The following appointments to junior offices in the Government were announced on June 14: Mr. Niall Macpherson, Parliamentary Under-Secretary of State, Scottish Office; Mr. T. G. D. Galbraith, Treasurer of H.M. Household; Mr. H. D. Oakshott, Comptroller of H.M. Household.

Mr. Macpherson, National Liberal and Conservative M.P. for Dumfries-shire, and Scottish Whip for the Liberal Unionist parliamentary group, succeeded Mr. W McNair Snadden (formerly Conservative member for Kinross and West Perth), who did not seek re-election, and who received a baronetcy in the recent Birthday Honours. Mr. Galbraith (Conservative M.P. for Hillhead, Glasgow) succeeded Sir Cedric Drewe (formerly Conservative member for Honiton, who did not seek re-election), whilst Mr. Oakshott (Conservative M P for Bebington) succeeded Mr. Galbraith as Comptroller of the Household.

Mr. Peter Legh, Conservative M.P. for Petersfield, was appointed a Lord Commissioner of the Treasury.

Mr. Macpherson will be one of the three Under-Secretaries of State at the Scottish Office.—(Times) **(Prev. rep. 14129 A.)**

C. RHODESIA AND NYASALAND FEDERATION. — Cabinet Appointments.

It was announced in Salisbury on June 7 (*a*) that the Federal portfolio for Home Affairs had been divided into two separate portfolios; (*b*) Mr. J. M. Greenfield (hitherto Minister of Home Affairs) had been appointed Minister of Law, retaining the legal matters in the former Home portfolio whilst at the same time remaining Minister of Education, and (*c*) that Mr. Frank Stephen Owen had been sworn-in as Minister of Home Affairs and would be in charge of information services (including broadcasting), immigration, electoral laws, citizenship, naturalization, aliens, deportation, tourist development, national parks, prisons, etc. Mr. Owen (37), who was born in Surrey and settled in Northern Rhodesia in 1947, is Member of Parliament for Ndola and will be the youngest Minister in the Federal Cabinet.
(Federal Information Department, Salisbury) **(14151 C.)**

D. UNITED STATES. — Administration. - Mr. Brucker appointed Secretary of the Army.

Mr. Wilber M. Brucker, general counsel of the Defence Department and a former Governor of Michigan, was nominated by President Eisenhower on June 23 as Secretary of the Army in succession to Mr. Robert T. Stevens, who had tendered his resignation for personal reasons.—(New York Times)

E. EASTERN GERMANY. — Soviet High Commission Newspaper ceases Publication.

The *Tägliche Rundschau*, organ of the Soviet High Commission in Eastern Germany since 1945, ceased publication on June 30.—(Der Tagesspiegel, Berlin) **(Prev. rep. 13954 B.)**

F. INDIA. — Nationalization of Imperial Bank of India. - Creation of State Bank.

The Indian Finance Minister, Sir Chintaman Deshmukh, announced on Dec. 20, 1954, that the Government had decided to take over the Imperial Bank of India, following a recommendation to that effect made by a committee on rural credit appointed by the Reserve Bank of India.

Sir Chintaman Deshmukh explained that the committee, in proposing the taking-over of the Imperial Bank as a first step towards a State Bank, had suggested that the State Bank should form a sector of commercial banking for the benefit of smallholders and handicraftsmen in rural areas, hitherto dependent on private moneylenders; it estimated in this connexion that some 7,500,000,000 rupees (about £560,000,000) was needed as loans by farmers He emphasized that the essential feature of the scheme was that there should be no interference by the State in the day-to-day operation of the State Bank and "no lowering of the standards of sound banking"

The State Bank of India Bill, providing for the nationalization of the Imperial Bank of India and its subsequent amalgamation with ten other banks associated with State Governments into a Government-controlled State Bank, was accordingly introduced by Sir Chintaman Deshmukh on April 16. The ten banks concerned were the State Banks of Hyderabad, Saurashtra, Patiala, Bikaner, Jaipur, Rajasthan, Indore, Baroda, and Mysore, and the Travancore Bank. (It was explained that some of these banks would be able to merge voluntarily with the State Bank under a special clause in the Bill, whilst special legislation would be required in the case of other banks.) The principal provisions of the Bill were as follows:

(1) The Imperial Bank of India would be taken over as a going concern, and all its assets, liabilities, and staff would be transferred to the new State Bank of India

(2) All shares in the Imperial Bank would be transferred on the "appointed day" to the Reserve Bank of India, which would pay compensation on their average market value over the 12-month period preceding Dec 20, 1954 Up to the first 10,000 rupees of compensation to each shareholder would be paid in cash, and the remainder in redeemable Government securities.

(3) The whole issued capital of the new State Bank of India would be allotted initially to the Reserve Bank, which would be authorized to sell up to 45 per cent to private parties, preference being accorded to former shareholders of the Imperial Bank A minimum of 55 per cent of the shares in the State Bank of India would thus always be held by the Reserve Bank.

(4) The management of the State Bank of India would be vested in a board of directors appointed by the Government, and consisting of a chairman, a vice-chairman, two managing directors, one director representing the Government of India, one director representing the Reserve Bank of India, and 14 other directors—of whom six would be from Bombay, five from Bengal, and three from Madras.

Further details of the purposes of the Bill were given by the Minister for Revenue and Defence, Mr. Guha, during the debate in the House of the People on April 23. The Minister for Commerce and Industry, Mr. Krishnamachari, stated on the same day that the bulk of the paid-up share capital of the Imperial Bank was owned by Indian nationals, and that compensation to be paid under the Bill would amount to a little over 200,000,000 rupees.

Mr. Guha affirmed that the object of the Bill was not merely to take over the Imperial Bank but to recreate and rejuvenate rural life by providing agricultural credit It would also help to implement agrarian reforms undertaken by the States, in which connexion it was hoped to take over State-sponsored banks as well in consultation with State Governments The present Bill, he explained, provided for the voluntary merger of State-sponsored banks with the State Bank, and for the taking-over of some of the non-scheduled banks by the State Bank. Mr. Guha gave an assurance that the Government had no intention at present of encroaching on private commercial banks, and said that there should be no apprehension that the Bill might be the first stage in the process of nationalizing banking institutions Although the proposed State Bank would function under effective Government control, it would continue to make credit facilities available to trade and commerce.

The Bill was passed by the House of the People on April 30 and by the Council of States on May 4, its provisions coming into force on July 1.

On March 31 an extraordinary meeting of shareholders of the Imperial Bank had passed a resolution demanding that if nationalization were decided upon, compensation should be based "on the average market value of the shares over a fair period prior to February 1948." The resolution stated that the first announcement of the Government's intention to nationalize the bank had been made in February 1948, and claimed that since then the price of the shares had artificially fallen.

Dr. John Matthai, the former Minister of Finance, was nominated on June 7 as chairman of the State Bank of India, whilst Mr. Vaikunthlal Mehta, a former Finance Minister in Bombay State, was appointed vice-chairman. The central office of the State Bank will be in Bombay.—(The Statesman, Calcutta - The Hindu, Madras) **(Prev. rep. Imperial Bank, 9793 E ; Reserve Bank, 9513 F.)**

A. UNITED KINGDOM. — Ending of Rail Strike. - Agreement on Higher Pay for Special Skill and Responsibility. - Referee's Award to Locomotive Drivers and Motormen. - Ending of State of Emergency.

Sir Walter Monckton, the Minister of Labour, announced in the House of Commons on June 14 that the railway strike was being called off forthwith, agreement having been reached between the parties "as a basis for the subsequent settlement of matters in dispute." He said that the agreement provided for the appointment of a referee "for a limited purpose," and that he had accordingly appointed Lord Justice Morris.

A Ministry of Labour statement on the same day explained that the agreement, arrived at after discussions at the Ministry between the British Transport Commission, ASLEF, and the N.U.R., stipulated that within seven days of the resumption of work the Commission should negotiate with the two unions on the following basis:

(1) The Commission accepted the principle that there should be higher rewards for special skill and responsibility where these were not already being given, and agreed that there was a case for such higher rewards for certain sections of the footplate staff.

(2) In view of ASLEF's objections, the Commission agreed not to press, as part of the projected settlement, its previous proposal (see 14240 A) that special allowances should be paid to drivers and motormen for driving certain types of trains, although it still maintained that this would be of benefit to the industry. Instead, it agreed to re-examine basic wages in the driver grade, particularly in respect of the highest-paid drivers and motormen.

(3) On the other hand, ASLEF agreed to accept, as part of the proposed higher rewards for special skill and responsibility, an extension of the principle of mileage payments, either on the basis proposed by the Commission or in a modified form.

(4) As ASLEF had requested a more definite statement of the Commission's intentions with regard to increases in basic wages in the driver grade than the Commission was prepared to give, it was agreed to ask the Minister of Labour to appoint a referee of "impartiality, integrity, and acknowledged judgment" to name the figures which he considered proper, after hearing the views of the parties privately and separately. It was also agreed that the N.U.R. should be entitled to be heard by the referee, and that ASLEF should put before him its views (already presented to the Commission) about the appropriate rate for third-year firemen, the Commission reserving the right to put forward its own views. The referee's decision would be accepted immediately and without question by all parties.

(5) The Commission agreed not to delay acceptance of a settlement for footplate men pending any corresponding application to other railway staffs of the principle of "higher rewards for special skill and responsibility" which it might negotiate separately with the union or unions concerned. The ASLEF, for its part, agreed that no application of this principle to non-footplate staff should be held to justify a further upward revision of the settlement for footplate staff.

[It was explained, in a subsequently-issued statement agreed upon between the Commission and the N.U.R., that the Commission would be "prepared to consider proposals from the N.U.R. provided that these are restricted to grades broadly of the same status and pay as those affected by the settlement for the footplate staff."]

(6) In view of the foregoing, ASLEF agreed to cancel the strike immediately, on the understanding that there should be no victimization of any kind.

The negotiations leading up to the agreement, and the effects of the strike on industry, are summarized below under cross-headings.

The Negotiations for a Settlement. Renewed attempts to find a basis for settling the dispute were made by the T.U.C. at a meeting on June 1 between its general purposes committee and the ASLEF executive, but proved unsuccessful. Thereupon the B.T.C issued a statement reiterating its preparedness to examine proposals for additional rewards for special skill or responsibility, as well as its readiness to accept the Minister of Labour's proposals for a board of conciliation. This offer was followed on June 6 by a personal letter from Sir Brian Robertson (the Commission's chairman) to Mr. Baty (general secretary of ASLEF) urging that the strike should be ended in view of its harmful results to industry and to the railways themselves. The ASLEF executive, however, refused to call off the strike until wage negotiations had begun, and charged the Commission with having failed to honour undertakings given on April 30, when the original strike notices had been suspended.

In a further attempt to end the dispute, the T.U.C. General Council, on June 6, put forward a five-point plan providing for (1) the differentials question to be left to future joint discussions between the three railway unions, (2) the N.U.R. to agree to the Commission starting discussions with ASLEF, on the understanding that it would be consulted before any settlement regarding footplatemen's pay was reached; (3) ASLEF to meet the Commision "with a view to establishing absolute minimum increases to settle the dispute, bearing in mind the proposed discussions on differentials," and to agree to consider a return to work as soon as a settlement emerged; (4) the T.U.C. to press the Prime Minister to agree that negotiations should begin while the strike was still on; (5) the T.U.C. General Council to keep the matter under review in order to hasten a settlement.

Although this plan was accepted by ASLEF and the Transport Salaried Staffs' Association, the N U R, whilst not rejecting it outright, made several important reservations. Nevertheless the General Council of the T U.C, after considering the unions' replies, advised the Minister of Labour on June 8 that it considered the time opportune for negotiations to be resumed.

Preliminary discussions between Sir Brian Robertson and Mr. Baty took place at the Ministry of Labour on the same day, this being the first meeting between them since the beginning of the strike. A subsequent joint statement explained that "the substance of the matters involved in the present dispute" had not been discussed; that the talks had been mainly concerned with the ASLEF statement of June 6 that the Commission had failed to honour its undertakings, and that, as a result of the discussions, "both sides are now agreed that there is nothing to prevent them from dealing with each other in a spirit of mutual confidence."

After a meeting between Commission representatives, the full ASLEF executive, and N U R leaders at the Ministry of Labour on June 10, the Commission put forward proposals on June 11 identical with those ultimately agreed to, with the important exception that no provision was made for the appointment of a referee to determine drivers' basic wages and that there was no mention of the position of third-year firemen, in respect of whom the Commission had declined ASLEF's demands for a similar increase. These proposals were rejected by both ASLEF and the N.U.R. on June 12, but negotiations were resumed between the Commission and ASLEF on the following day. After strenuous efforts, in which Sir Walter Monckton took part, the negotiations resulted on June 14 in the drafting of the proposals agreed upon.

Immediate Effects of the Strike on Industry. The immediate consequences of the dispute proved less serious than had been anticipated, thanks to the extended use made by industrial firms of road and water transport, as well as to the fact that over 11,000 N U.R. footplatemen remained at work, thereby enabling the Commission to run about one-sixth of the normal daily number of passenger and freight trains. As the organization of skeleton services grew more efficient, the position on the railways improved, and on June 13 the Commission stated that 10,944 trains (5,901 passenger, 5,043 freight) had been run during the week-end of June 11-12, or 1,015 more than during the week-end of June 4-5.

The effects of the stoppage were mostly felt in the steel and engineering industries. Although steelworks in the Swansea area, at Barrow-in-Furness, in Lincolnshire, and in Scotland had closed down wholly or partly on June 3, they were able to resume operations on June 5-6. Early in the strike many motor-vehicle manufacturers suspended overtime working, and several large engineering firms issued precautionary notices to their workers, but few dismissals in fact took place. The National Coal Board stated on June 9 that "not a single colliery" had stopped working because of the strike, and that output was "only a relatively few tons" below normal a situation which "far exceeded the most optimistic expectations of the result of road and rail reorganization."

Meanwhile, in a broadcast on June 5, Sir Anthony Eden had appealed for the speedy ending of the strike, and had given a warning of the "deadly seriousness" of its consequences to the economic life of the nation.

The Prime Minister first spoke of the success which had attended the Government's measures to maintain essential supplies and services, and of the "steady improvement" which had already taken place on the railways themselves. After paying tribute to the transport and distributive workers, the police, and the public, he continued: "So far, the emergency arrangements we have made have held the position. But I am not going to leave you in any doubt about the deadly seriousness of what is happening to our country. There is little unemployment as yet, but you cannot stop most trains in a land like ours without soon bringing some factories to a halt. As the output of one factory drops or stops, others are affected in turn. The longer the strike lasts, the more unemployment there must be in spite of all that we can do. . . .

And this will not be the end of the story. At this time of the year we ought to be building up coal stocks for the winter. We have had a cold winter, and we have already lost 1,000,000 tons of coal this year through an unofficial strike. The country cannot afford to lose one single ton more if we are to keep industry in full swing through next winter. But we are going to lose a lot more if the railway strike goes on. We shall suffer for this later, in January or February. We shall have to try to import more coal to take the place of production lost. These imports can only be paid for by exports. But we are endangering our export trade. When you lose export orders you lose future markets too. That is how the stoppages are weakening the nation—just when it was getting strong and prosperous again.

We can all understand that grievances must arise from time to time about rates of pay, and that there are rivalries between unions. But it is not right to give vent to them at such a cost to the country. Every hour that these strikes last, we are slipping behind in the race with our foreign competitors. If we go on like this we shall smash up our hard-earned prosperity. So far from raising our standard of living we shall lower it, and that applies to every one of us."

After recapitulating the causes of the strike, and acknowledging the efforts made by the T.U.C. to bring about an understanding between ASLEF and the N.U.R., Sir Anthony Eden went on: "There is no doubt whatever that the lack of common ground between the two unions is the heart of the problem. But of course it is true that the Transport Commission also have a responsibility in the matter. They acknowledge this. They have made it plain that they are ready to examine proposals to give reasonable additional

rewards for special responsibility or skill where these are not given already. They have said that their own proposals are not meant to be inflexible The Commission have appealed to ASLEF to call off the strike, and have asked both unions to sit down with the Commission. They have accepted the offer of the Minister of Labour to appoint a board of conciliation to assist in such discussions. Surely there ought to be a basis for talking here.

Where does the Government stand in all this? We are ready at any time to help in trying to find a way in which the talks can be reopened, and to see either or both unions to make this possible. We want to get talks going between the parties The Minister of Labour and I will help in any way we can. Once negotiations are resumed, the board of conciliation will have its part to play. That offer still stands. The board will be ready to help in discussions the moment work begins again. But work must begin again. We have had a week of this disastrous business, but what I said last Sunday (see 14240 A) is still true—it can only end when negotiations begin. And let me repeat, for the sake of every one in this land, all grades of railwaymen and every citizen . the quicker the better"

During the debate on the Address in the House of Commons, **Mr. Attlee** (Leader of the Opposition) suggested on June 9 that in his broadcast the Prime Minister, "perhaps inadvertently," had "put forward the new doctrine that nonegotiations could take place without a return to work" Whilst admitting that "this line has been frequently taken in unofficial strikes, where it is important that the authority of the union should be maintained," Mr. Attlee contended that it had "never been put forward in general" and that, if persisted in, the "new doctrine would lead to an exacerbation and lengthening of industrial disputes."

Sir Anthony Eden denied that there was "any question of laying down a new doctrine" He pointed out that the fact that the Minister of Labour was engaged at the time in discussions with ASLEF and the N U R should dispel any misunderstanding that the Government took the view that negotiations could not begin until work had been resumed. It was quite a different matter, however, whether it was right to keep going a strike of this kind, which affected the whole nation, until "the very last bit of negotiation has been completed"

After hearing representatives of ASLEF, the N.U.R., and the British Transport Commission, Lord Justice Morris announced his award on June 20 as follows: (*a*) the basic weekly rates of drivers and motormen to be increased by 1s. in the first year of service in the grade, 2s. in the second year, and 3s. in the third; (*b*) no increase to be made in the basic weekly rate of third-year firemen. The award, which affected about 40,000 drivers and motormen, therefore provided for their basic weekly rates to be raised to £8. 16s. (first year), £9. 7s. (second year) and £9. 16s. (third year). Similar increases —i.e ranging from 1s. to 3s. weekly—were agreed between the Commission and the N.U.R. on June 24 for over 10,000 signalmen, yard foremen, and linesmen, bringing the wages of the highest-paid signalmen outside London to £9. 13s. weekly.

Agreement on the extension of mileage payments to footplatemen—the last issue involved in the dispute between the Commission and ASLEF—was reached on June 30. The agreement provided for drivers and motormen to receive 3d., and for firemen and assistant motormen to receive 2½d., for every 10 miles (or part of 10 miles) worked between 70 and 140 miles during one turn of duty. Footplatemen working over 140 miles on one duty turn remained covered by existing agreements, which, however, were slightly modified in their favour.

The basic increases to drivers and firemen and the advances to signalmen, etc., were backdated to June 15, whilst the new mileage payments took effect from July 3. The total cost of the increases and mileage payments was estimated at £700,000 in a full year.

The Emergency Powers taken by the Government because of the strike were approved by the House of Commons without a division on June 13, but owing to the termination of the dispute and the resumption of normal traffic they were repealed from midnight on June 19.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14240 A.)**

A. GREECE. — Leonidas Memorial.

A white marble memorial was dedicated at Thermopylae on June 30 by King Paul of the Hellenes to Leonidas and the 300 Spartans who fell while defending the Pass of Thermopylae against the 300,000 warriors of the Persian emperor Xerxes in July 480 B.C. The monument, which bears reliefs of scenes from the battle, is 90 ft. long and 42 ft. high, topped by a 16-ft. bronze statue of King Leonidas. The work of M. Phalireas, a prominent Athenian sculptor, it was erected through the efforts of a society of Greek-born Americans. (Times)

B. UNITED KINGDOM. — May Trade Figures.

Imports into the United Kingdom in May totalled £290,300,000, exports £249,400,000 and re-exports £8,300,000, the adverse balance thus amounting to £32,600,000.
(Board of Trade Journal) **(Prev. rep. 14224 B.)**

C. EUROPE. — Coal and Steel Production in 1954.

Coal production in the principal European coal-producing countries during 1954 is shown in the following table.

	Production (metric tons)	Output per manshift* (metric tons)	Workers on books at Dec 31, 1954
Belgium	29,429.000	1.098	147,000
Czechoslovakia	21,500,000	n.a.	n.a.
France	54,405,000	1.504	216,000
Saar	16,818,000	1.744	57,300
W. Germany	128,035,000†	1 492	429,000‡
Italy	1,074,000	n.a.	8,500
Netherlands	12,071,000	1.497	47,900
Poland	91,300,000	n.a.	n.a.
Spain	12,429,000	n.a.	n a.
United Kingdom	227,875,000	1.614	705,000

* Underground production only. † Not including 87,811,000 metric tons of lignite ‡ Not including 39,400 workers employed in the production of lignite. n.a not available.

The major coal-importing countries during the year were France (11,683,000 metric tons), Italy (9,634,000), Western Germany (9,285,000), the Netherlands (7,148,000), Denmark (4,470,000), Austria (3,857,000), United Kingdom (3,053,000), and Sweden (3,024,000). The principal exporting countries were Western Germany (16,711,000 metric tons), United Kingdom (13,918,000, excluding bunkers), and the Saar (8,994,000). Figures for Poland were not available.

The United States exported 9,810,000 metric tons of coal to Western European countries in 1954, of which 3,505,000 metric tons went to Italy, 1,910,000 to the Netherlands, and 1,280,000 to Western Germany

Crude steel production in the principal European producing countries during 1954 was as follows (in metric tons): United Kingdom, 18,817,000; Western Germany, 17,434,000; France, 10,627,000; Belgium, 5,009,000; Czechoslovakia, 4,430,000; Italy, 4,207,000; Poland, 3,964,000; Luxemburg, 2,828,000; the Saar, 2,805,000, Eastern Germany, 2,255,000; Sweden, 1,861,000; Austria, 1,653,000; Hungary, 1,491,000; Spain, 1,097,000; the Netherlands, 928,000; Rumania, 629,000; and Yugoslavia, 616,000. The figures for Czechoslovakia and Eastern Germany are estimates made by the E.C.E. Secretariat. (Economic Commission for Europe, Geneva) **(13564 B.)**

D. RELIGIOUS LIFE. — Inauguration of Anglican Province of Central Africa. - Creation of Roman Catholic Hierarchy of Southern Rhodesia.

The new Anglican Province of Central Africa was inaugurated at Salisbury (Southern Rhodesia) on May 8 by the Archbishop of Canterbury (Dr. Geoffrey Fisher) and the Archbishop of Cape Town (Dr. Geoffrey Clayton). The new Province consists of the Dioceses of Mashonaland, Matabeleland, Northern Rhodesia, and Nyasaland, whose Bishops elected Dr. Edward Francis Paget, Bishop of Mashonaland, as the first Archbishop of Central Africa. Dr. Paget (68), a brother of General Sir Bernard Paget, had been Bishop of Southern Rhodesia from 1925 to 1952 and Bishop of Mashonaland since the latter year.

The constitution of the new Province had previously received the assent of the Archbishops of Canterbury and Cape Town and of the Bishops and Synods of the dioceses concerned. The Dioceses of Mashonaland and Matabeleland (created in 1952, and covering Southern Rhodesia) had hitherto been part of the Province of South Africa and thus under the jurisdiction of the Archbishop of Cape Town, whilst the Dioceses of Northern Rhodesia and Nyasaland had previously been under the jurisdiction of the Archbishop of Canterbury. The two Archbishops agreed to relinquish their respective jurisdictions to enable the new Province of Central Africa to be formed.

The inaugual ceremony, at which Dr. Paget was enthroned as Archbishop of Central Africa, was attended by the Governor-General of the Federation of Rhodesia and Nyasaland (Lord Llewellin), the Governor of Southern Rhodesia (Vice-Admiral Sir Peveril William-Powlett), and representatives of the Governors of Northern Rhodesia and Nyasaland.

The setting-up by Pope Pius XII of an Ecclesiastical Hierarchy in Southern Rhodesia, announced on Jan. 8, 1955, was followed on April 12 by the enthronement of Bishop Aston Chichester, S.J., as the first Roman Catholic Archbishop of the See of Salisbury and Metropolitan of the Province. The ceremony was performed by Archbishop Damiano, Papal delegate in South Africa.—(Church Times - Catholic Herald) **(Prev. rep. West African Province, 11486 C.)**

E. INDIA. — Ban on Import of Horror Comics.

The Indian Ministry of Finance issued an Order on June 10 banning the import of "horror comics." The action was taken under the Sea Customs Act, which empowers the Government to prohibit the entry of undesirable literature.
(The Statesman, Calcutta)

A. KOREA. — British Ministry of Defence Booklet on Treatment of British Prisoners-of-War by Chinese.

In a booklet (*Treatment of British Prisoners of War in Korea*) published by the British Ministry of Defence on Feb. 27, it was stated that the Chinese had "used every device, from moral pressure to physical torture," to convert captured British prisoners-of-war to the Communist viewpoint and to use them to further Communist aims.

The booklet, which was based on the evidence of the 978 British prisoners who were repatriated after the Korean armistice, stated (*a*) that officers and senior n.c.o.s (who made up about 12 per cent of the total of British soldiers captured by the Chinese) had remained almost completely unaffected by Communist propaganda and had been segregated from the remainder; (*b*) that of the junior n.c.o.s. and other ranks, some two-thirds remained virtually unaffected; and (*c*) that of the remainder, most had absorbed sufficient indoctrination to be classed as Communist sympathizers, but in all probability had responded to the influence of normal home life after their repatriation, whilst a small minority—about 40 in all, some of whom had Communist leanings or affiliations before they went to Korea—had returned home convinced Communists.

The booklet explained that the Chinese policy had been to convert at least a minority of prisoners to Communism and then to use this minority to undermine the confidence of the others, thus rendering them in turn susceptible to Communist indoctrination. This aim was embodied in what the Chinese called their "Lenient Policy" towards prisoners-of-war, which was based on the lie that the Korean war was one of "American aggression" and part of the "conspiracy of the capitalist world" against peace. Accordingly, the Chinese claimed that all U.N. prisoners taking part in this "unjust war" were war criminals, and that if they were captured their captors had the right to kill them. Nevertheless, it was argued that the soldiers of the "aggressors" were, after all, ordinary working men who had been "duped and misled by their reactionary rulers," and therefore, instead of being summararily executed, they should be treated "leniently" and given the opportunity to reach "a state of remorse and repentance for their crimes and to learn the truth."

The theory of the "Lenient Policy" was based on a number of assumptions, namely: that the Communists had a monopoly of the truth, that the prisoners accepted that they had been "dupes of their capitalist rulers", that they were willing to "learn the truth"; and that they welcomed their "liberation" by the Chinese. If a prisoner would not accept these assumptions, the Chinese argued that he was not entitled to the benefits of the "Lenient Policy". If a prisoner refused to be "educated" and to "see the truth," he was voluntarily aligning himself with the forces of "reactionary capitalism and imperialism" and with the enemies of ordinary men and women throughout the world. He was therefore a "criminal," outside the protection of the "Lenient Policy," and the treatment he received in consequence was his own responsibility.

If a prisoner saw the "truth" and accepted Communist doctrines, then his life became easier. He received extra cigarettes, better food, medical attention, and other "privileges." In return he had to assist his captors and become a Communist propagandist by signing "peace" petitions and by trying, in his letters home, to induce his relatives to accept Communism. But if a prisoner did not see the "truth"—and the booklet made it clear that the vast majority did not—then the Chinese considered him to be a criminal and a reactionary deserving of any brutalities.

Every possible method, the booklet stated, was tried by the Chinese in pursuit of the desired result. During the early days of the war they held compulsory political lectures at which prisoners had to take notes, but these were later made optional and voluntary study groups were introduced. At the same time psychological pressure was applied; an informer system was set up among the prisoners in order to undermine morale and personal loyalties, incoming and outgoing mail was manipulated; food and medicine was withheld; and "unco-operative" prisoners were segregated. "When all these methods of inducement had failed—and in some cases before they had been tried," said the booklet, "the Chinese had recourse to physical coercion and torture, revolting to the humane mind and expressly forbidden by the Prisoners-of-War Convention. . . . Torture and ill-treatment were carried out quite cold-bloodedly for the purpose of breaking a man's resistance."

Among the punishments mentioned in the booklet were solitary confinement in small cages for months at a time, with liquids withheld for days on end, to help the prisoner with his "reflections"; and beatings with clubs, one of which had lasted for six hours. A favourite method was to bind a prisoner hand and foot with a rope passed over a beam and fixed as a hangman's noose round his neck; he was then told that if he slipped or bent his knees he would be committing suicide. Alternatively, his wrists and ankles would be bound behind his back and the rope taken from his wrists over a beam; he would then be hoisted and left in that position for several hours with his toes just touching the ground. Yet another form of punishment during solitary confinement was to make a prisoner stand to attention for long periods, either in the snow of the severe Korean winter or in the heat of the Korean summer. Some prisoners were known to have been marched barefooted on to the frozen Yalu river, where water was poured over their feet; this would freeze immediately and they would be left thus for hours with their feet frozen into the ice to "reflect on their crimes."

If a prisoner gave way under such treatment—and the booklet emphasized that there were many who did not—he had to write a "confession" of crimes which he, and the Chinese, knew he had never committed. On the basis of this he could be tried and sentenced, though usually he was merely told that the trial had been held and that the sentence had been this or that punishment.

The booklet also dealt with the role of visitors to the prisoner-of-war camps, pointing out that although independent visitors and organizations such as the International Red Cross had been barred until the last few weeks of the war, facilities were readily arranged for visits by Communists and Communist sympathisers. The Chinese had allowed five British Commonwealth visitors to visit the camps —Mr. Alan Winnington, of the London *Daily Worker*, Mr. Wilfred Burchett, an Australian by birth, who went to Korea as a correspondent of the French Communist papers *Ce Soir* and *Humanité*, Mr. Michael Shapiro, a correspondent of the London *Daily Worker* living in Peking; Mr. Jack Gaster, a member of the British Communist Party and a London solicitor, and Mrs. Monica Felton, chairman of the British National Assembly of Women, which is affiliated to the Women's International Democratic Federation, a Communist-front organization.

Mr. Winnington's main role in the North Korean camps, it was stated, was that of "visiting propagandist". Mr. Shapiro had interviewed a number of prisoners after their capture early in 1951, and his attitude and activities had disgusted even a prisoner who was a member of the British Communist Party. Mr. Gaster had visited China and North Korea in March, 1952, as a member of a delegation of the International Association of Democratic Lawyers (a Communist-front organization) which had been invited by the Chinese and North Korean Governments to investigate charges of bacteriological warfare and atrocities by U.N. troops, during his visit he had visited two of the camps and on his return to Britain had contributed to the *Daily Worker* a glowing account of camp conditions. Mrs. Felton had first visited Korea as a member of a delegation from the Women's International Democratic Federation in May 1951. On her return she had written a book in which she had made allegations of murder, torture and rape by the U.N. forces.

In addition to the efforts of the Chinese to break down the morale of the prisoners in Korea (the booklet pointed out), there had been a simultaneous campaign by Communists and Communist sympathisers in Britain directed at drawing the relatives of prisoners into the "peace" campaign through "front" organizations, Communist-inspired demonstrations, and "peace petitions." "The effect of these activities on prisoners' families is impossible to assess," the booklet said. "Whatever the result, it is the campaign itself which is significant."

Following the publication of the booklet, a large number of questions were asked in the House of Commons on March 7 by Members of both parties about the activities of the four British "visitors" to the P.O.W. camps. In particular, it was questioned whether or not those concerned could be tried for treason, and if not, whether the law should be altered.

Mr. James Hutchison (C.) asked the Attorney-General (Sir Reginald Manningham-Buller) whether his attention had been called to "the treasonable activities of certain British nationals" as revealed in the Ministry of Defence booklet, and what proceedings he proposed to institute. **Mr. Godfrey Nicholson** (C.) asked the Attorney-General whether he would give instructions for proceedings to be taken against Winnington, Shapiro, Gaster, and Mrs. Felton for treason. **Sir Reginald Manningham-Buller** stated in reply that so far as he knew neither Winnington nor Shapiro were now resident within British jurisdiction. "If either of them returns to this country," he said, "I shall carefully consider the question whether criminal proceedings should be instituted, but no such question arises at present." With regard to Gaster and Mrs. Felton, the Attorney-General said that he did not think the facts disclosed in the statement were sufficient to justify a prosecution. In reply to **Mr. Percy Daines** (Lab.), who asked Sir Reginald whether he was satisfied that he had legal powers to take proceedings against Winnington and Shapiro, the Attorney-General reiterated that if they returned to this country he would carefully consider the question whether criminal proceedings could be instituted.

Mr. Paget (Lab.) asked whether it was not clear that no treason had been committed by giving aid and comfort to the enemies of the United Nations, and whether the Attorney-General would give an assurance that legislation would be introduced to fill the gap. **Sir Reginald Manningham-Buller** stated in reply that Sir Hartley Shawcross, when Attorney-General in the Labour Government, had on three occasions expressed the opinion that the Treason Act would apply to the Korean War.

Lord John Hope (Under-Secretary, Foreign Office), in a written reply to a further question, stated that H.M. Government had not made any direct protest to the Chinese Government, but pointed out that they were co-sponsors of a resolution approved by the U.N. General Assembly in December, 1953, which expressed grave concern at reports of atrocities committed by the North Korean and Chinese Communist forces against U.N. prisoners-of-war in Korea (see 13369 A). In view of the U.N. resolution, the Government did not consider that further remonstrances or protests at the present time were required.

Mr. George Ward (Under-Secretary for Air), replying on April 7 to a question by **Mr. William Hamilton** (Lab.), said that the lessons to be learned from the Communists' treatment of British prisoners in Korea were being carefully studied with a view to modifying, if necessary, the instructions to servicemen about their conduct after capture. The Government were also in touch with the U.S. authorities, who were conducting an inquiry of their own.

The Minister of Defence (then Mr. Macmillan) stated in a written reply on March 11 that, according to Service reports, 71 British prisoners were known to have died in captivity in Korea from various causes and 13 prisoners were missing, presumed to have died in captivity. He added that there were grounds for believing that in about 60 of these cases, general ill treatment—malnutrition, unattended wounds, or untreated diseases—had been an important factor in the deaths of the men, whilst in two cases deaths could be attributed to brutal treatment. As far as was known, no British prisoners had died since release as a result of ill-treatment endured during captivity.—("Treatment of British Prisoners of War in Korea," H.M. Stationery Office - Times - Daily Telegraph)

A. EGYPT. — Reopening of Alexandria Cotton Futures Market.

The Egyptian Government announced on June 9 that the Alexandria cotton futures market, which had been closed since November, 1952 (when the Government assumed direct responsibility for the disposal of the cotton crop), would be reopened in September, 1955.

The Finance Minister (Dr Abdul Moneim el-Kassouny) explained that Egypt had never permanently abandoned the system of marketing cotton on the basis of free dealings, and that Egyptian dealers were unanimous on the need for reinstating the "futures" market to "ensure the necessary cover and elasticity in the cotton trade" The Government hoped, however, that in future the system would be used for its proper purpose—i e as a means of cover It would prepare legislation to prevent the market being again "involved in undesirable situations," ensure its smooth running, and establish "balanced relations" between the Alexandria and Liverpool cotton markets Dr el-Kassouny added that the Alexandria futures market would adopt the same safeguards as the Liverpool Cotton Exchange, including exchange control, a clearing system, and new regulations to govern transactions, ensure security in contracts, and guard against "cornering" or undesirable speculation

The Egyptian Government's decision was warmly welcomed in Lancashire, where the reopening of the Alexandria "futures" market was regarded as an important step towards the resumption of a contract for Eygptian long-staple cotton. [The Liverpool futures market, since its reopening in 1954—see 13658 A—had been confined to dealings in U.S. cotton.] Talks between the Egyptian authorities and a delegation from the Liverpool Cotton Exchange on the reopening of the Alexandria market ended on June 23. Mr. Henry Coney, president of the Liverpool Cotton Association and leader of the delegation, stated that it had been agreed that Liverpool interests using the Alexandria "futures" market should be free of Egyptian income-tax requirements, and that there should be speedy remittances of balances, except for buying "futures" at minimum support levels for the current crop, the Egyptian Government would not participate in "futures" in any way.

B. CENTRAL AMERICA.—Five-Nation Co-operation in Technological Research.

Details were made public during May of a project for setting up a Central American centre for technological research in Guatemala with assistance from U.N. technical experts. The participating countries will be Guatemala, Honduras, El Salvador, Nicaragua, and Costa Rica, and the research centre is expected to be functioning by the end of the present year.

The first Director of the research centre (Dr. Albert Miriles, a U.N. technical assistance expert) said that it would have three functions · (1) scientific research into available raw materials in the area, so as to discover what types of useful products could be obtained; (2) dissemination of technical knowledge and the setting of quality standards for produced material, (3) the provision of consultative services to private industries within the area, and to interests planning to establish new industries there. He explained that the initial staff would consist of 12 U N. experts and 15 scientists from the participating countries, but that eventually the U.N. would withdraw its staff and turn over complete control to Central American experts.

Dr. Miriles stressed that the research centre was in the nature of a new economic concept, since it was not an attempt to transplant technological processes from outside but to develop such processes to fit the special needs of an under-developed area.

The project was agreed upon at a Central American economic conference held in San Salvador early in May. The U.N. will contribute $75,000 towards the construction and maintenance of the centre in the first year, Guatemala will contribute $250,000, and the other four countries $125,000 between them. The U.N. contribution will decrease progressively for five years, by which time the maintenance of the centre will be the sole responsibility of the participating countries.—(New York Times)

C. RUBBER. — Statistics, 1954. - Sale of U.S. Government Synthetic Rubber Plants. - Malayan Government Assistance for Replanting.

World production of natural rubber in 1954 totalled 1,802,500 tons and consumption 1,767,500 tons, compared with 1,725,000 tons and 1,627,500 tons respectively in 1953. World stocks rose from 830,000 tons at the end of 1953 to 840,000 tons at the end of 1954. Production, export, and consumption figures in the principal countries concerned are shown below (in long tons), with revised 1953 figures given for comparison.

	Production		Exports	
	1954	1953	1954	1953
Indonesia	738,670	692,164	728,670	673,983
Malaya*	584,435	574,390	570,956	569,679
Siam	†	†	116,701	95,574
Ceylon	93,935	98,610	90,209	96,679
Vietnam and Cambodia	78,024	74,545	77,975‡	70,639
Sarawak	23,369	24,037	22,966	23,913
Brazil	21,909	26,318	†	†
India	21,493	21,136	†	†

* Includes Singapore and the Federation of Malaya † Figures not available. ‡ Of which 54,212 tons from Vietnam and 23,763 tons from Cambodia.

Consumption. United States, 596,285 tons (553,473 tons in 1953); United Kingdom, 238,919 (219,591), Germany, 129,993 (106,194), France, 127,818 (114,305), Japan, 88,942 (88,912), Australia, 43,185 (32,956), Canada, 41,576 (37,480); Brazil, 37,788 (31,772); India, 25,487 (22,373) Net imports into the Soviet Union were estimated at only 425 tons, compared with 41,850 tons in 1953 and 123,000 tons in 1952

Prices. The average spot price on the London market was 1s 8 $\frac{5}{8}$d. a lb, compared with 1s 7$\frac{1}{2}$d in 1953. The steady fall in the price of rubber, which had started in March 1951, was arrested early in 1954, and after remaining almost stable in the first quarter the price rose slowly throughout the rest of the year. The monthly averages were as follows January, 1s 4$\frac{3}{4}$d, February, 1s 4$\frac{3}{4}$d, March, 1s. 4$\frac{5}{8}$d, April. 1s. 6$\frac{3}{8}$d, May, 1s 6$\frac{1}{4}$d, June, 1s 7$\frac{3}{4}$d; July, 1s 8$\frac{3}{4}$d; August, 1s 8$\frac{5}{8}$d; September, 1s. 8$\frac{1}{2}$d; October, 1s 11$\frac{3}{4}$d., November, 2s 1$\frac{3}{4}$d, December, 2s 1$\frac{7}{8}$d The price continued to rise in the first six months of 1955 and by the end of June had reached 3s a lb, the highest level for more than three years.

World production of synthetic rubber in 1954 totalled 716,388 tons and consumption 740,000 tons, compared with 935,622 tons and 872,500 tons (revised figure) respectively in 1953. World stocks fell from 200,000 tons on Dec. 31, 1953, to 175,000 tons on Dec. 31, 1954. Production and consumption figures for synthetic rubber in the principal countries are given below (in long tons) ·

	Production		Consumption	
	1954	1953	1954	1953
United States	622,852	848,441	636,727	784,836
Canada	86,581	80,922	30,080	35,914
Western Germany	6,955	6,259	16,999	11,499
France	—	—	14,437	12,924
United Kingdom	—	—	8,693	4,862

Prices. The U.S. price for GR-S synthetic rubber in 1954 was again unchanged at 23 cents a lb. The price for Neoprene, 41 cents a lb, was also unchanged, but the price of Butyl was raised in July from 22 to 23 cents a lb.

Sale of U.S. Government Synthetic Plants. A commission appointed by President Eisenhower to dispose of the 27 synthetic rubber plants built during the World War II, and operated by the Government, reported on June 13, 1955, that it had sold 25 of the plants for $270,796,000. In addition, the Government was receiving from the buyers about $145,000,000 for stocks, spare parts, etc, giving total receipts of about $415,000,000 The Government still owned two plants, a laboratory, and some miscellaneous equipment with an estimated net value of $13,435,000.

On March 25, 1955, the Malayan Government announced details of a scheme to help the Malayan rubber industry—which, it said, faced "a crisis unprecedented in its chequered history"—to compete with synthetic rubber. It was proposed that the Government should provide £33,000,000 over the next 11 years to be used for replanting with newly developed strains of rubber trees which would give high latex yields; with these trees, it was thought, the estates could sell natural rubber as cheaply as synthetic rubber at present prices, or even more cheaply. In addition, the Government proposed that the export duty on rubber should be reduced from 5 to 4 per cent whenever the sale price of natural rubber fell to 60 Malayan cents (about 1s. 5d. per lb.) or below, in order to assist the planter in lean times. The Government's proposals—which largely followed the recommendations made in October, 1954, by a mission of inquiry under Sir Francis Mudie—were approved by the Malayan Federal Council on May 5. (Rubber Statistical Bulletin - Times - Financial Times - New York Times) **(Prev. rep. Rubber Statistics, 13648 A; U.S. Synthetic Rubber Plants, 13075 A.)**

A. SOUTH AFRICA. — Revision of Passport Regulations. - The Departure from the Union Regulation Act.

The South African Government published on Feb. 21 the Departure from the Union Regulation Bill, under which it became an offence punishable by imprisonment to leave the Union without a passport or travel permit. Its main provisions were as follows :

(1) Anyone over 16 leaving the Union without a passport or travel permit became liable to imprisonment for a term of three months to two years, without the option of a fine.

(2) Anyone conveying a person over 16 without a passport or permit from the Union, or helping such a person to leave the Union, became liable to a fine not exceeding £2,000, imprisonment for not more than a year, or both

(3) A person whose application for a passport was refused might appeal in writing to the Minister of the Interior within one month.

(4) A passport or permit would be valid for one year, but the Minister might recall it at any time Failure to return it on demand would render the holder liable to a fine of not more than £200 or six months' imprisonment

(5) There would be no restrictions on the issue of permits to persons who satisfied the Department of the Interior that they wished to leave the Union permanently.

(6) A passport or permit issued to such a person would be endorsed accordingly, and the holder would not be allowed to return to South Africa If he did return he would be deemed to have left the Union without a permit, and if he was not born in the Union he would be deemed a prohibited immigrant.

The second reading of the Bill was moved in the House of Assembly on March 23 by Dr. Donges, the Minister of the Interior, and was opposed by the United and Labour parties.

Dr. Donges said that the purpose of the Bill was to control the departure of certain people from the Union to Communist countries, from which they returned to make propaganda in South Africa There were loopholes in the passport control regulations, resulting mainly from the United Kingdom's policy of regarding all persons considered to be British subjects as having the right to enter the U K. without passports. Persons who could not get South African passports, but who had obtained a notarial certificate of identity stating that they were British subjects, were freely admitted to Britain, where they could obtain travel documents from the Embassy of one of the " Iron Curtain " countries admitting them to that country; after indoctrination in Communist teachings, they could then return to South Africa to spread propaganda, because they had only to show that they were South African citizens. Dr Dönges cited examples of how this loophole in the regulations had been used in the past, and stressed that the great majority of people leaving South Africa would not be affected by the Bill. In this connexion he pointed out that only 57 out of 23,117 applications for passports had been refused in 1954.

Sir De Villiers Graaf, for the United Party, asserted that the Minister was asking for greater powers than those granted in any other country in the Western world, and criticized Dr. Dönges' conduct in refusing passports in the past, for example, a Coloured man had been allowed to go to Britain but not to India, and a non-European who had won a scholarship in Britain had been refused a passport. Dr. Donges, he said, was asking for a vast increase in his discretionary powers, which could not be reviewed or debated in Parliament; moreover, no principle was specified as to the circumstances in which a passport or permit should be refused. He suggested that the Minister should preferably have prevented any professed Communist or person convicted under the Suppression of Communism Act from applying for a passport. **Mr. Hepple** (Labour) maintained that the Bill would enable the Minister to refuse passports to anyone whose views he disliked, and could be used as " an instrument of political punishment."

Dr. Dönges denied that the Bill conferred any new powers on the Minister or altered the existing law in regard to passports He reiterated that passport control by itself was not sufficient to prevent people from leaving the country because of the position under British law, and maintained that South African conditions differed from those in all other countries. A large section of South Africa's population were particularly liable to be infected by Communism, and it would not be unfair to argue that South Africa was in a state of emergency which justified action being taken to meet it The Bill, he pointed out, was not nearly so drastic as the U.S. Internal Security Act, under which a member of a Communist organization who applied for a passport or for its renewal, or who used or attempted to use a passport, became liable to a fine of $10,000 or five years' imprisonment, or both

The Bill was given a second reading by 61 votes to 40, the National Conservatives voting with the Government. During the Committee stage Dr. Dönges introduced an amendment (which was accepted) providing that South African passports or travel permits should be regarded as the only valid documents for South African citizens leaving the country, and that persons leaving the Union without such documents should be liable to the penalties prescribed under the Bill.

The House rejected Opposition amendments aimed at providing that any South African citizen who was not a professed Communist, or had not been engaged in subversive activities, should be entitled to receive a travel permit on application; that any applicant refused a permit should have the right of appeal to the Supreme Court; and that anyone prosecuted for leaving the country without a permit could defend himself by proving that he had not advanced the objects of Communism or engaged in subversive activities against the Union overseas

When the Opposition's amendments were criticized by **Dr. du Plessis** (Nat.) on the ground that they would limit the Minister's powers to refuse permits to non-Communists who harmed the country overseas, such as the Rev. Michael Scott, **Mr. Lawrence** (U P.) observed that Dr du Plessis had " let the cat out of the bag," and had made it clear that the Minister could refuse permits to anyone whom the Government did not like, such as the Bishop of Johannesburg, or who had expressed opposition to its racial policy. In reply, **Dr. Donges** agreed that although Communism was the main reason for introducing the Bill,it " would have a much wider effect than that," as the safety of the State was not endangered only by Communism.

The Bill was given a third reading in the House of Assembly on May 6 by 79 votes to 41, and in the Senate on June 2 by 24 votes to 13.—(Cape Times - Die Burger, Cape Town)

B. CHILE. — New Cabinet. - Reported Army Plot.

A new Cabinet was formed by President Ibañez on May 30 following the withdrawal from the Government of all six members of the Agrarian Labour Party after the President had refused to accept the resignation of the Under-Secretary of the Interior, Señor Carlos Ferrer. The latter had submitted his resignation following a 48-hour strike by Chilean students in protest against the Chilean Government's failure to give prompt asylum to 13 Peruvian students who had been deported from Argentina, and who had asked for permission to stay in Chile because they feared political persecution if they returned to Peru. In addition, the Minister of Finance (Señor Sergio Recabarren) had submitted his resignation as a result of a strike for higher wages by staffs of hospitals, nursing homes, and cemeteries, which had resulted in a small number of deaths through lack of medical attention.

The Minister of Defence, General Tobias Barros, had resigned on May 13 after a number of senior Army officers had been arrested in connexion with an alleged secret society which was said to be plotting to set up a military dictatorship. Two months previously, on March 17, it had been announced that four generals, including the Commander-in-Chief, General Enrique Franco, had been placed on the retired list " at their own request," and that General Araya Stiglich had been appointed Commander-in-Chief.

The new Cabinet, most of whose members had not hitherto taken any active part in politics, was as follows : Señor Oswaldo Koch, Interior; Rear-Admiral Kaare Olsen Nielsen, Foreign Affairs; Señor Abraham Pérez Lizana, Finance; Señor Arturo Zúñiga Latorre, Economy; Colonel Benjamin Videla Vargara, Defence; Señor Mariano Fontecilla Vargas, Justice; Air Brigadier-General Alejandro Schwerter Gallardo, Public Works; Señor Hugo K. Sievers Wicke, Agriculture; Señor Raúl Barrios Ortiz, Health; Señor Oscar Herrera Palacios, Education; General Eduardo Yáñez Zavala, Labour; Señor Osvaldo Sainte-Marie Soruco, Mines. Señor Herrera had held the same portfolio in the previous Cabinet, whilst Señor Koch had been Minister of Justice and Colonel Videla Minister of Public Works. (New York Times - New York Herald Tribune - Times - Bank of London and South America, Fortnightly Review) **(13697 D.)**

C. UNITED NATIONS. — Nansen Medal Awards.

The first two awards of the Nansen Medal, a U.N. award for humanitarian services to refugees, were announced during May by the U.N. High Commissioner for Refugees, Dr. van Heuven Goedhart. The award for 1954 was made to Mrs. Eleanor Roosevelt, widow of the late President Franklin D. Roosevelt, whilst that for 1955 was made to Queen Juliana of the Netherlands.

Mrs. Eleanor Roosevelt was awarded the Nansen Medal for 1954 in consideration of her " outstanding services to the humanitarian cause of refugees " and " the continuous and unsparing efforts she has made on behalf of refugees, particularly through her active participation in the U.N. Human Rights Commission."

Queen Juliana received the Nansen Medal for 1955 in consideration of " her personal action in communicating with former U.S. President Harry S. Truman and President Dwight D. Eisenhower suggesting a fresh approach to the refugee problem; her inspiring deeds and words to make the people of the Netherlands aware of their responsibility to refugees; and the results of the Netherlands campaign for the U N. Refugee Emergency Fund, which without her inspiring leadership could not have succeeded."

The Nansen Medal is named after the late Dr. Fridtjof Nansen, the famous Norwegian explorer, who was the first League of Nations High Commissioner for Refugees (1921-30) and who gave his name to the " Nansen passport," the first travel document for stateless refugees. The awards were made by a special committee of the U.N. Refugee Fund.

(United Nations Review, New York)

A. UNITED KINGDOM. — House of Commons Debate on Report of Royal Commission on Capital Punishment. - Rejection of Proposal for Five-year Suspension of Death Penalty.

The report of the Royal Commission on Capital Punishment (see 13329 A) was approved on Feb 10, 1955, by the House of Commons, which adopted a formal motion " taking note " of the report. An amendment urging the suspension of the death penalty for an experimental period of five years, sponsored by a number of Labour and Conservative back-benchers, was rejected by 245 votes to 214 on a free vote.

The motion that the House should " take note " of the Royal Commission's report was moved by Major Gwilym Lloyd-George, the Home Secretary.

Major Lloyd-George said that after careful consideration the Government had formed provisional views on the Royal Commission's major proposals, which they would re-examine in the light of the debate, giving full weight to the views expressed by Members He recalled that the Commission's main recommendations were as follows (1) That the statutory age-limit below which sentence of death might not be passed should be raised from 18 to 21 (2) That in all other cases the jury should be given discretion to decide whether there were such extenuating circumstances as to justify substituting a sentence of life imprisonment for the death sentence (3) That the test of criminal responsibility laid down in England by the M'Naghten Rules should be wholly abrogated, and that the jury should be left to determine, unfettered by formula, whether at the time of the act the accused was suffering from a disease of the mind or was mentally deficient to such a degree that he ought not to be held responsible The first recommendation had had a majority of only one member of the Commission, whilst the second was in qualified terms and was not a positive recommendation

On the raising of the age-limit, the Government shared the natural desire to spare a young life whenever possible They were, however, disposed to agree with the minority of the Commission that there were strong objections to raising the age-limit at the present time, particularly when crimes of violence by persons between the ages of 17 and 21 were so prevalent Although there had recently been a decline in indictable crime generally, the number of persons between 17 and 21 found guilty of offences of violence against the person had increased from 163 in 1938 to 405 in 1948, to 492 in 1951, and to 603 in 1953 The Government, therefore, could not think that the present time was an appropriate one to remove a sanction which might deter young men from committing murder

Continuing, Major Lloyd-George said that the Government considered the Commission's arguments against the introduction of two degrees of murder to be closely reasoned and convincing. The Commission's alternative proposal, however—that the jury should be given discretion to substitute a life sentence—had been criticized by distinguished speakers, including the Lord Chief Justice and three former Home Secretaries, during a debate in the House of Lords. Moreover, the Royal Commission itself had recognized that its disadvantages might be held to outweigh its merits, and had put forward formidable objections in its report In the Government's view this proposal was unworkable and ought to be rejected.

On the third proposal, the Government supported the view of the minority of the Commission that in England some formula was essential. Although the M'Naghten Rules were open to criticism, their theoretical defects had led to little hardship or injustice in practice, in view of the difficulty of framing a satisfactory amendment to them, the Government considered it better to leave matters as they were.

The Home Secretary said that the Government would be glad to take note of the opinions expressed in the debate about the Royal Commission's recommendations that constructive malice in English law should be abolished, that the law relating to provocation should be amended, and that the survivor of a " suicide pact " should not be held guilty of murder Of these recommendations, all of which would require legislation, some were not free from controversy, whilst others would be useful amendments to the law A number of others which required only administrative action had already been given effect; for example, where there was any question of the mental state of a person charged with murder, an outside psychiatrist was now called in, as recommended by the Commission.

Turning to the question of the abolition of capital punishment, Major Lloyd-George said that he wished first to deal briefly with the Home Secretary's personal position. If a satisfactory alternative could be found he would welcome the abolition of capital punishment, but the alternative would have to be satisfactory as a deterrent and also satisfactory to the public conscience. Until it was clearly established that such an alternative existed, the death penalty must remain and must be carried out in appropriate cases. In the debate on the Criminal Justice Bill in 1948 (see 9496 A) he had voted for a five-year suspension of the death penalty because he had been influenced, like many other people, by a statement made by Mr. Paget (Lab.) that Sir Alexander Paterson (formerly H. M Commissioner for Prisons) had changed his views on this subject towards the end of his life. This statement, however, had been refuted two days later by the then Home Secretary, Mr Chuter Ede. There could be no doubt that when Sir Alexander had told a Select Committee in 1930 that life in prison would not be a tolerable alternative to the death penalty, he was giving his personal opinion, and that this had remained his opinion to the end of his life.

Major Lloyd-George said that the Government opposed the abolition of capital punishment for three reasons Firstly, they were not disposed to reject the evidence of many experienced persons that it was a uniquely effective deterrent to professional criminals. In 1948 Mr Chuter Ede had told the House that the Government could not advise it to dispense with that sanction, in view of the grave increase in crimes of violence Although there had been a fall in the total volume of crime since 1948, this was largely due to a decrease in offences against property, and there had been a continued increase in sexual offences and in crimes of violence. In these circumstances the Government could not think that it would be right at the present time to abandon the death penalty

Secondly, the Government were not convinced that the detention of some murderers for very long periods, possibly for life, would not give rise to much more serious difficulty than the Commission had expected Mentally abnormal murderers could possibly be maintained in special institutions for long periods, but it was unlikely that those who were mentally normal would be suitable for detention in an open prison, and their detention for more than 20 years in the conditions of a closed prison would be likely to lead to serious deterioration, as well as causing grave problems of security

Thirdly, the Government had no doubt that it would be entirely wrong to abolish capital punishment unless there was a clearly overwhelming public sentiment in favour of the change The Government had no reason to think that public opinion was in favour of abolishing or suspending the death penalty. Indeed, it believed the contrary to be true.

In the Government's view (Major Lloyd-George concluded), the amendment to suspend the death penalty for five years [see below] was entirely misconceived. Such a period would be much too short to enable Parliament to form a reliable judgment on the effects of the change, and if the experiment proved unsatisfactory a difficult and confused situation might arise Suspension would shift the onus of changing the law from those who proposed abolition to those who proposed restoration of the penalty, and even if it were necessary and justified it might be difficult to ensure the passage of legislation to that end Such a trial period, moreover, would be likely to prejudice future consideration of the question, and would imply permanent abolition under the guise of an experiment. The Government had no doubt that if a change were to be made, the right course would be to " face the issue squarely and abolish the penalty outright " Therefore they could not advise Members to vote for the amendment.

Mr. Chuter Ede (Lab.), Home Secretary from 1945-51, opened the debate from the Opposition benches.

Mr. Chuter Ede pointed out that those categories of crimes of violence previously punished by flogging had decreased, and that prophecies made in the House of Lords that the abolition of flogging would lead to a big increase in such crimes had been completely disproved The age-group between 17 and 21, of which the Home Secretary had spoken, had largely suffered from the " uncivilized conditions " of the war and immediate post-war years, and there was no proof that their successors at those ages were as prone to juvenile delinquency; indeed, juvenile delinquency had fallen to such an extent that one of the Home Secretary's problems was how to deal with redundant approved schools

Criticizing the Royal Commission's recommendations on jury discretion, Mr. Chuter Ede said that he was unconvinced that it could be made workable; he felt that 12 ordinary citizens, called together to discharge the heavy responsibility of declaring a man guilty or innocent, should not have this further responsibility placed upon them It would be an advantage to juries, however, if they had something to help them in their decisions more in accordance with modern modes of thought than the M'Naghten Rules, which had been adopted at a time when knowledge of the workings of the human mind was far less complete than it was today

On the question of the deterrent effect or otherwise of the death penalty, Mr. Chuter Ede did not think the case was proved either way. " Having been Home Secretary longer than anyone else since 1832," he declared, " I have come to the conclusion that, apart from two or three men like Heath and Haigh, who were cool, calculating, gamblers and got away with it a surprising number of times, if you had said to all the other men on the morning of the day they committed the crime, ' Before night you will be in danger of the gallows.' they would have laughed at you A little too much to drink—and the amount which puts a man off balance varies from individual to individual—a little sexual excitement introduced, and something is done. A blow is struck that places the man in jeopardy. . . Few of the people who stand in jeopardy are people for whom any colloquial rendering of the words ' malice aforethought ' would have any real application."

Mr. Chuter Ede doubted whether public opinion was at the moment in favour of abolishing or suspending the death penalty, but he also doubted whether any of the great penal reforms carried out over the past 100 years would have been approved in a plebiscite There were occasions, he suggested, when the House had to say that a certain thing was right, even if public opinion might not at the moment be of the same opinion

" If ever there was a clear case when the papers came on to my table that a man was guilty," Mr. Ede went on, " it was the case of Evans." In 1950, he recalled, a certain Timothy Evans had been found guilty on apparently overwhelming evidence of murdering his infant daughter, a second charge of murdering his wife not being presented. Evans, however, protested that his wife was murdered by John Christie, who lived in the same house, and who in 1953 admitted having murdered six women whose bodies were found in

the house. "If those facts had been known to the jury at the time," Mr. Ede concluded, "they might perhaps have found Evans guilty of murder in conjunction with Christie I doubt if they could have found Evans guilty of murder in any other circumstances I was the Home Secretary who wrote on Evans's papers, 'The law must take its course' I never said in 1948 that a mistake was impossible. I think Evans's case shows, in spite of all that has been done since, that a mistake was possible I hope that no future Home Secretary, in office or after he has left office, will ever have to feel that, although he did his best and no-one would wish to accuse him of being either careless or inefficient, in fact he sent a man who was not guilty as charged to the gallows"

Mr. Sydney Silverman (Lab.), seconded by Mr. Christopher Hollis (C.), moved an amendment that "for a period of five years, persons convicted of murder in the United Kingdom should be sentenced to imprisonment for life in place of the death penalty."

Mr. Silverman recalled that this proposal had been accepted by the House of Commons in 1948, and would now be law had not the clause been rejected by the House of Lords He observed that "had the House of Commons had its way in 1948, the hope which Mr. Ede has just expressed with regard to present or future Home Secretaries would have been fulfilled in his own case" The amendment, he claimed, provided the most convenient method of dealing with each of the Government's main objections to abolishing the death penalty, and would give the Home Secretary a chance of educating the public and getting them accustomed to "the state of affairs which one gathers he would be in favour of if he were satisfied that public opinion would support it" Mentioning three recent cases, Mr Silverman said that he would defy "any rational human being" to find any common basis on which the decisions in these three cases could be reconciled. In the first case, a 19-year-old mental defective (Derek Bentley), who had committed no act of violence himself, had been hanged, although if he was guilty at all he was guilty of constructive murder and not of murder in fact In the second case, a woman whom the prison doctor had certified as insane had been hanged In the third case, a farmer who had been convicted on the clearest possible evidence of murdering his partner, but who had done it so effectively that no trace of the body had been discovered, had been reprieved

"If you don't abolish the death penalty," Mr Silverman concluded, "and if you want nevertheless to vary the penalty, and if nevertheless you reject the recommendation of the Royal Commission that the jury or the court shall decide, you are driven back on the present method of using the prerogative of mercy as though it were a judicial process. When you examine how that works, you find it does not satisfy the most elementary test of a judicial process—that normal, intelligent human beings shall understand it"

Mr. Hollis (C.), supporting Mr Silverman's arguments, said that the experience of countries where the death penalty had been abolished showed that there was no reason to fear that its abolition in the U.K. would be followed by an increase in murders. Gang warfare and the murder of policemen were, he maintained, phenomena which were found almost solely in countries which retained capital punishment. He felt that throughout the nation there was "a morbid fascination with the topic of murder"—largely due to the drama of a man's being on trial for his life—and that the abolition of the death penalty would help to remove this unhealthy state of things

Mr. Basil Nield (C.) opposed the amendment on the ground that capital punishment was "the most compelling deterrent of all," and in particular deterred many criminals from carrying and using arms **Sir Frank Soskice** (formerly Attorney-General in the Labour Government), on the other hand, doubted whether the death penalty had any deterrent effect, and thought that there should be a trial period in which society might resolve this uncertainty by its own experience. Like Mr. Hollis, he believed that the public interest in "macabre details" of murders, murder trials, and executions arose from the fact that a man's life was at stake, and had a brutalizing effect upon society as a whole.

Mr. Montgomery Hyde (U.U.), replying to the argument that without capital punishment there would be an increase in murders, pointed out that similar arguments had been put forward when the death penalty was abolished for such offences as "stealing five shillings, cutting your name on Westminster Bridge, or impersonating an outpatient from Guy's Hospital." **Mr. Turner-Samuels** (Lab.), however, maintained that the steady rise in crimes of violence, from 3,183 in 1948 to 4,285 in 1953, on the one hand, and a decline in murder cases from 40 to 26, on the other, showed that imprisonment had no deterrent effect on crimes of violence, but that capital punishment was apparently a deterrent to murder **Mr. S. S. Allen** (Lab) felt that there was sufficient chance of a grave miscarriage of justice for the death penalty to be abolished for, at least, five years. **Mr. John Paton** (Lab.), **Sir Beverley Baxter** (C.), and **Mr. R. G. Paget** (Lab.) were among other Members who spoke in support of Mr. Silverman's amendment. Mr. Paget maintained that the late Sir Alexander Paterson, towards the end of his life, had changed his earlier view that life or other long-term prison sentences were crueller than the death penalty.

Sir Reginald Manningham-Buller (the Attorney-General), replying to the debate, emphasized that the effect of the amendment could only be to abolish the death sentence. When the time came for review at the end of the proposed five-year period, its supporters would say that the period had been far too short for the experiment to be judged. It was the view of the police and of the prison service that the death penalty deterred criminals from carrying and using weapons This view, based on experience of the criminal classes, ought to be accepted If a reprieved murderer serving a life sentence killed a prison officer and there was no death penalty, the worst that could happen to him would be that he would go on serving his imprisonment, surely, therefore, the House should not weaken the protection which the law gave to those in the prison service Before any such drastic change was made, there should be clear evidence that this was a public desire, but there was no indication that public opinion on this issue had changed since 1948

The amendment was rejected by the above-mentioned majority, and the Government's motion approved without a division. Although a majority of Labour members voted for, and a majority of Conservatives voted against, the amendment, the division did not follow party lines as some Conservatives voted for the amendment and some Labour members against it. The Liberal group was also divided, three Liberals voting for and one against the amendment.

A number of Labour members who voted against the similar proposal in 1948 supported the amendment, including Mr. Chuter Ede, Mr. Whiteley (the Opposition Chief Whip), Mr. George Isaacs, Mrs Jean Mann, Mr Robens, Mr. Glenvil Hall, Mr. Arthur Henderson, and Mr. Hector Hughes. Several former Labour Ministers who abstained in 1948 also voted for the amendment, including Mr. Aneurin Bevan, Mr. Hugh Gaitskell, Mr. James Griffiths, Mr Marquand, Mr. Strachey, Mr. George Strauss, and Mr. Kenneth Younger. Conservative members supporting the amendment, in addition to those mentioned in the debate, included Viscount Hinchingbrooke, Mr. Nigel Nicolson, Mr. Julian Amery, Mr. J. J. Astor, Mr. Ormsby-Gore, and Mr. Angus Maude. Major Lloyd-George, who supported the 1948 resolution, voted against the amendment.

A large number of Labour members (including Mr Attlee, Mr. Herbert Morrison, and several other former Ministers who voted against the 1948 resolution), as well as several Conservatives, abstained from voting.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Royal Commission Report, 13329 A; 1948 Debate, 9496 A.)**

A. CAMBODIA.—Postponement of General Elections. "Popular Socialist Movement" formed by Prince Norodom Sihanouk. - Indo-Cambodian Discussions. - Military Aid Agreement with U.S.A.

The Cambodian Government announced on March 15 that the general elections fixed by the former King Norodom Sihanouk for April 17 had been postponed until Sept. 11, and that they would be held under the system of direct and universal suffrage laid down under the 1947 Constitution, and not under the system of indirect voting proposed by the ex-King on Feb. 19. The decision to hold elections on April 17, the statement declared, had provoked a "vast popular movement" of protest, which the ex-King had sought to appease by his proposals for constitutional reform; because of the importance of this movement, a certain delay was necessary "in order to explain to the populace the reasons for a return to the previous regime."

Prince Norodom Sihanouk announced on April 6 that he would form a "Popular Socialist Movement" which would take part in the elections on a programme of support for his constitutional proposals and for the "sovereignty of the ordinary people of Cambodia."

Prince Norodom Sihanouk and the Cambodian Prime Minister, M. Leng Ngeth, had previously visited India from March 16-24 at the head of a goodwill mission, and during their visit had had discussions in Delhi with Mr. Nehru.

A communiqué issued on March 18 stated that the Cambodian delegation had affirmed their Government's support for the "five principles of peaceful co-existence"; that the two Governments were agreed that the Geneva Agreements should be fully implemented, and that every effort should be made to preserve and strengthen the independence of Cambodia and to improve the condition of its people; that they had also agreed to exchange diplomatic missions at Legation level at an early date, and to co-operate in cultural matters; and that the Indian Government had assured the Cambodian delegation of their desire to give such assistance to Cambodia as lay in their power.

A military aid agreement between Cambodia and the U.S.A. was signed at Pnom-Penh on May 16. The State Department in Washington said that it had become necessary because U.S. aid to Cambodia was now supplied direct and no longer through the French Government, and that the agreement envisaged the setting-up of a U.S. military advisory group in Cambodia.

M. Pierre Gorse, Administrator-in-Chief for *France d'outre-mer*, was appointed French High Commissioner in Pnom-Penh on June 4.—(Le Monde, Paris - The Statesman, Calcutta - New York Times) **(Prev. rep. Elections, 14109 A; Indo-Cambodian Relations, 14028 C; U.S. Aid, 14161 A.)**

A. UNITED KINGDOM. — Labour Party. - Mr. Attlee re-elected Party Leader. - New "Shadow Cabinet."

The Parliamentary Labour Party, meeting on June 10, re-elected Mr. Clement R. Attlee as chairman and leader of the party for the new session of Parliament, whilst Mr. Herbert Morrison was re-elected vice-chairman and deputy leader. No other nominations were put forward, Mr. Attlee and Mr. Morrison being re-elected unanimously. Mr. Herbert Bowden, M.P. for Leicester South-West and Opposition Deputy Chief Whip, was unanimously elected Chief Whip of the Labour Party in succession to Mr. William Whiteley (72), who had held that post for 13 years and who did not seek re-election.

Prior to the State opening of the new Parliament (see 14255 A), it was understood that Mr. Attlee had informed the Labour "shadow Cabinet" that he proposed to continue as party leader only until October, 1955, when it was anticipated that the first session of Parliament would end. The heavy legislative programme outlined in the Queen's Speech, however, indicated that the first session would continue until October, 1956, and Mr. Attlee accordingly agreed to continue as chairman and leader of the party without a time-limit. After a meeting of the Parliamentary Labour Party on June 9, it was officially announced that Mr. Attlee was "ready and willing to accept nomination as chairman for a further period," and that it was "the unanimous wish of the party that he should continue in office." It was reported that Mr. Aneurin Bevan, among other members, had strongly urged Mr. Attlee not to set a term to his leadership of the party, and had declared that Mr. Attlee's continuance as party leader was "vital." [Mr. Attlee, who is 72, has been leader of the Labour Party for 20 years.]

The 12 members of the Parliamentary Committee of the Labour Party (the Opposition front bench or "shadow Cabinet") were elected on June 23. Before that date, however, four members of the former "shadow Cabinet"—Dr. Hugh Dalton (67), Mr. Chuter Ede (72), Mr. Emanuel Shinwell (70), and Mr. Glenvil Hall (68)—had informed Mr. Attlee that they did not propose to stand for re-election, in order to facilitate the entry of younger men.

Dr. Dalton's letter to Mr. Attlee, the text of which was published on June 4, said *inter alia*: "... It is essential, in my view, that, from the start of the new Parliament, there should be a much younger Shadow Cabinet. In the last Parliament this body was becoming more and more a shadow of the past and less and less a Cabinet of the future. Of its 15 members when Parliament was dissolved, no less than nine are over 65 and, of these nine, four are over 70. . . . We veterans have had a long innings. . . . But I am sure that, in the interests of the party, it is high time that a number of us should stand down to make room in the Shadow Cabinet for good younger men. There is no lack of these. . . I myself have decided not to be a candidate for our Shadow Cabinet in the new Parliament, and I hope that a number of my fellow veterans will decide likewise. But your own position is a very special one. It is my strong hope that, in the interests of party unity, you will continue as leader when the new Parliament meets. . . No one else among us, of whatever age, can do this difficult job as well as you can."

Fifty-four nominations were presented for the 12 places in the "shadow Cabinet" filled by election. The successful candidates (ages in parentheses) were as follows:

	Votes received	Votes received in 1954
Mr. James Griffiths (64)	186	170
Mr. Hugh Gaitskell (49)	184	170
Mr. James Callaghan (43)	148	124
Mr. Alfred Robens (44)	148	140
Mr. Harold Wilson (39)	147	120
Dr. Edith Summerskill (54)	133	142
Mr. Aneurin Bevan (57)	118	—
Mr. George Brown (41)	101	—
Mr. Philip Noel-Baker (65)	100	125
Mr. Anthony Greenwood (43)	91	—
Mr. Richard Stokes (58)	77	—
Mr. G. R. Mitchison (65)	76	—

Mr. Griffiths, Mr. Gaitskell, Mr. Callaghan, Mr. Robens, Mr. Wilson, Dr. Summerskill, and Mr. Noel-Baker were re-elected, whilst Mr. Bevan, Mr. Brown, Mr. Greenwood, Mr. Stokes, and Mr. Mitchison were elected in the place of Dr. Dalton, Mr. Chuter Ede, Mr. Shinwell, Mr. Glenvil Hall, and Sir Frank Soskice, who was unable to find a constituency at the general election. Mr. Bevan had previously been a member of the "shadow Cabinet" before his resignation in 1954 (see 13552 A); Mr. Greenwood had been a member in 1951-52, whilst Mr. Stokes (a former Lord Privy Seal), Mr. Brown (chairman of the trade union group of Labour members), and Mr. Mitchison, Q.C. (a prominent Labour back-bencher) entered the "shadow Cabinet" for the first time. Of the 42 unsuccessful candidates, the runners-up were Mr. Tom Fraser and Mr. Kenneth Younger, each with 75 votes. The only "Bevanites" to secure election were Mr. Wilson and Mr. Bevan himself; among unsuccessful "Bevanites" were Mr. Richard Crossman (62 votes), Mr. Ian Mikardo (51 votes) and Mrs. Barbara Castle (48 votes).

The full "shadow Cabinet" consists of the above-mentioned 12 members (elected by the Parliamentary Labour Party) and the following six *ex-officio* members: Mr. Clement Attlee (72), the party leader; Mr. Herbert Morrison (67), the deputy leader; Mr. Herbert Bowden (50), the Chief Whip; Lord Jowitt (70), leader of the Labour peers; Lord Lucan (56), Chief Whip of the Labour peers; and Lord Henderson (63), elected representative of the Labour peers. The average age of the 18 members of the "shadow Cabinet" is 55½, compared with the previous average age of over 60.

After discussing the Labour Party's setback at the general election, the party's National Executive Committee set up on June 22 a special sub-committee to inquire into the general organization of the party and to report in September. Its members were: Mr. Harold Wilson, M.P. (representing the constituency party section of the executive), Miss Margaret Herbison, M.P. (representing the women's section), Mr. Arthur Skeffington, M.P. (representing the Co-operative movement), and Mr. Jack Cooper, president of the National Union of General and Municipal Workers (representing the trade union section).—(Daily Herald - Times - Manchester Guardian)

(Prev. rep. "Shadow Cabinet," 13896 C; "Bevanite" Controversy, 14174 A.)

B. CANADA - UNITED STATES. — Visits by Italian Prime Minister and Foreign Minister.

Signor Scelba and Professor Martino, the Italian Prime Minister and Foreign Minister, arrived in Ottawa on March 25 on an official visit to the Canadian Government, and had discussions during their stay with Mr. St. Laurent, the Canadian Prime Minister, Mr. Lester Pearson, the Secretary for Foreign Affairs, and other members of the Canadian Cabinet.

A communiqué issued on March 27 said that the Canadian and Italian Ministers had agreed "to follow a stricter political co-operation inside the Atlantic alliance," and had also agreed on "the need of continuing their efforts to diminish international tension [which] could be achieved through general limitation of armaments with a guarantee of efficient control accepted by all."

On March 27 the Italian Ministers arrived in Washington, where they had discussions on March 28-29 with President Eisenhower, Mr. Dulles (Secretary of State), Mr. Humphrey (Secretary of the Treasury), Mr. Charles E. Stassen (Secretary of Defence), and Mr. Harold Stassen (Director of Foreign Operations). Signor Scelba also saw Mr. Eugene Black, President of the International Bank; spoke at a luncheon of the National Press Club; and addressed both Houses of the U.S. Congress.

A statement issued at the White House on March 28 said that the President and Signor Scelba had discussed "the aspects of Western defence pertaining to the partnership of Italy with the U.S.A. in the NATO", that developments in the creation of the Western European Union had also been discussed, and that the President had expressed to Signor Scelba "the gratification of the American people at the important role which Italy has been playing in the implementation of all measures leading to Western European integration and the solidarity of the North Atlantic community."

A joint communiqué issued on March 30 stated that the U.S. and Italian Ministers had agreed to explore further the possibility of reaching "a genuine limitation of armaments, both conventional and non-conventional," with effective international controls, that Mr. Dulles and Professor Martino had expressed the hope that it would be possible "soon after the ratification of the Paris agreements by all the signatories to find the basis for a truly fruitful conference with the Soviet Government", and that they had agreed "to keep in constant touch" for these purposes.

It was also announced by the State Department on March 30 that the U.S. Government had agreed to make available to Italy ten tons of heavy water for an atomic reactor which Italy planned to construct; that this decision had been taken in advance of a formal agreement for U.S.-Italian co-operation in the peaceful uses of atomic energy; and that Italian nationals would be permitted to enrol in a newly-opened school for nuclear scientists in engineering at Chicago.

Mr. Dulles and Professor Martino also signed two double taxation conventions benefiting Italian nationals in the United States and American nationals in Italy.

From March 31 to April 3 the Italian Ministers stayed in New York, where Signor Scelba received honorary degrees from Fordham and St. John's Universities. Subsequently Signor Scelba visited Philadelphia, Chicago, and Detroit, whilst Professor Martino visited San Francisco and Los Angeles. They returned to Rome on April 8.—(New York Times - New York Herald Tribune - Montreal Star - Corriere della Sera, Milan)

C. PAKISTAN. — Double Taxation Agreement with the United Kingdom.

An agreement between Pakistan and the U.K. providing relief for the double taxation of income (with retrospective effect from April 1, 1955) was signed in Karachi on June 10. (Pakistan High Commissioner's Office, London) **(12877 A.)**

A. SAAR. — Decisions of Council of Western European Union on Referendum and Powers of Saar Commissioner. - International Commission for the Saar.

The Council of the Western European Union published on May 13 the decisions on the Saar which it had taken at its inaugural meeting in Paris a week earlier (see page 14238). They related to (1) the holding of the referendum on the Saar Statute (see 13845 A), and (2) the powers and functions of the Commissioner for the Saar.

The Saar Referendum.

The provisions on this subject consisted of the following 15 Articles :

(1) The International Commission for the Saar would consist of Belgian, British, Italian, Luxemburg, and Netherlands representatives [i e. of representatives of all the W.E.U. countries except France and Germany], and would take its decisions by simple majority vote. The Commission would appoint its own president, who would have a casting vote.

(2) Members of the Commission would enjoy diplomatic immunity.

(3) The Commission could make recommendations to the Saar Government and (in urgent cases, and by unanimous vote) to the local authorities. The Saar Government would have the obligation to present to the Commission all documentation and information relating to the referendum.

(4) Members of the Commission (or their representatives) would have free access to all polling stations, would be present during the counting of votes, and would verify the results of the referendum, both for the Saar as a whole and in urban and rural constituencies. The Commission could bring any facts to the attention of the French and Federal German Governments and, if it did not receive satisfactory replies to such representations, could bring the matter before the Council of W.E.U.

(5) The following categories of persons would have the right to vote in the referendum : (*a*) all men and women who were over 20 years of age on the date of the referendum, and who were recognized as Saarlanders under Saar legislation ; (*b*) persons who had been born in the Saar and were domiciled or permanently resident there on Oct 23, 1954 [i.e. the date on which the Saar agreement was concluded between Dr. Adenauer and M Mendès-France] ; (*c*) persons who, although not born in the Saar, had been domiciled or permanently resident there for at least five years before Oct. 23, 1954, (*d*) persons who had been expelled from the Saar for political reasons after May 8, 1945. If the Saar Government raised objections to the exercise of the vote by any persons in the last-mentioned category, the matter would be referred to the Commission for final decision.

The following categories of persons would, however, not be entitled to participate in the vote . (*a*) staffs of diplomatic and consular missions in the Saar, and their families ; (*b*) members of the armed forces and their families ; (*c*) members of the police, *gendarmerie*, and Customs services, and their families.

(6) Mentally defective persons or persons serving prison sentences would not have the right to vote.

(7) Persons having the vote would have to reply " yes " or " no " to the questions asked in the referendum.

(8) The referendum would be held by universal, free, and secret ballot, for which full guarantees of free political activity and of secrecy would be given. All electoral manifestos, posters, etc., would have to be printed in the Saar All political parties would be guaranteed equality of rights and full liberty of action, and any infringements, which the Commission recognized as such, would be reported to the Council of W.E.U. No-one [i.e. no individual or political party] could be penalized for any attitude that he might have adopted in the period of three months before the referendum, or during the referendum itself.

(9) This Article dealt with electoral constituencies, and stated that a Director-General for the referendum would be nominated by the Saar Government.

(10) This Article dealt with electoral lists.

(11) Any complaints of infractions [of the above-mentioned provisions] during the period before the referendum, or during the referendum itself, would have to be presented to the Commission not more than eight days after the referendum had taken place.

(12) Legislation for the organization and holding of the referendum would be drawn up on the basis of the principles laid down above It would be promulgated by the Saar Government after the Commission had satisfied itself that the legislation conformed to these principles.

(13) The beginning of the three-month period immediately prior to the referendum, referred to in Article 10 of the Franco-German agreement of Oct. 23, 1954 (see page 13846, first column), would be decided upon by the Council of W.E.U., on the basis of a report by the Commission. The Saar Government would then fix the date of the referendum.

(14) During this preparatory three-month period, and during the referendum itself, the Commission would keep watch to ensure that the principles on which the referendum was based were being fully applied.

(15) After the counting of the votes the Commission would verify the provisional results, which would then be announced by the Saar Government. Within two weeks of the holding of the referendum, the Commissioner would report to the W.E.U. Council on (*a*) the provisional results of the referendum, (*b*) the conditions in which the referendum had been held, and (*c*) whether there had been any infractions, either before or during the referendum The Council of W.E U. would then finally decide whether or not the people of the Saar had approved the Saar Statute

Powers and Duties of the Commissioner.

(1) The Commissioner, under the authority of the Council of W.E.U., would be charged with ensuring the application of the Saar Statute. He would carry out this task in conformity with the principles laid down in the Convention on Human Rights, and also with the following two principles (i) for the duration of the Statute [i.e. until the conclusion of a peace treaty with Germany], freedom of opinion would be " total and guaranteed " , (ii) nevertheless, all political activities which directly or indirectly infringed the basis of the Statute would be banned—i e. all activities detrimental to the proper functioning of the Statute or to the internal peace of the Saar

(2) International treaties concluded by the Commissioner on behalf of the Saar would have to be approved by the Saar *Landtag*

(3) The Commissioner would receive his instructions from the Council of W E.U.

(4) The Commissioner's annual reports to the Council of W E U would be transmitted to the Assembly of the W E.U. countries.

(5) If the Commissioner decided that there had been a violation of the Saar Statute, from whatever quarter the violation might come, he would refer the matter to the Council of W E.U If such violation came from any organization in the Saar, the Commissioner would first of all make a request to the Saar Government. If this request were not complied with, he would refer the matter to the Council of W.E.U , which would take the necessary decision after a discussion in which the Saar Government would have the opportunity of presenting its point of view verbally.

In grave and urgent cases the Saar Government would have to suspend any contested measures without delay at the Commissioner's request The Commissioner would simultaneously refer the matter to the Council of W E U (either at Ministerial level or at the level of Permanent Representatives), to which the Saar Government could appeal, and the Council would decide within five days whether or not the suspension of the measures under consideration should be maintained

Should the Commissioner hold that the Saar Government had not taken sufficiently " positive " measures to ensure the application of the Saar Statute, he would make urgent representations. If these were not successful, he would call for an immediate meeting of the Council of W.E.U.

(6) Individuals, groups, and organizations in the Saar who felt that their fundamental rights and democratic liberties had been infringed by any of the Commissioner's decisions could bring the matter before the jurisdictional organs envisaged in the W.E.U treaty

The Franco-German Agreement on the Saar.

The W E U Council " took note " of the agreement on the Saar Statute concluded between France and the Federal German Republic on Oct. 24, 1954. It approved those provisions of the agreement which required its assent, and assumed all those powers, responsibilities and tasks conferred upon it by the agreement.

The Council of Western European Union, meeting in London on June 16, appointed the following members of the International Commission to supervise the Saar referendum . Sir George Rendel, formerly British Ambassador in Brussels ; M. Fernand Dehousse, a member of the Belgian Senate ; Signor Pietro de Paolis, a senior official in the Italian Foreign Ministry ; Baron Bentinck, Netherlands Minister in Berne ; and M. Kunnen, honorary Director of Customs in Luxemburg. Sir George Rendel, after retiring from the Foreign Service in 1950, had been chairman of the German Debts Commission, and subsequently presided over the commission on constitutional development in the Saar.

The International Commission for the Saar held its first meeting in London on June 24 and elected Senator Dehousse (Belgium) as its chairman. It decided to hold its next meeting in Saarbrucken on July 1, and to set up a small secretariat in the Saar under Mr. Peter Fraser (Britain), one of the two assistant secretaries-general of the W.E.U.—(Le Monde, Paris - Frankfurter Allgemeine Zeitung - Times) **(Prev. rep. Saar Statute, 13845 A ; Franco-German Agreement, 14223 A ; W.E.U. Council, 14237 A,)**

B. UNITED KINGDOM. — New Astronomer-Royal.

It was announced on June 22 from 10, Downing Street, that the Queen had appointed Dr. Richard van der Riet Woolley, F.R.S., Director of the Commonwealth Observatory at Canberra, Australia, as Astronomer-Royal in succession to Sir Harold Spencer Jones, F.R.S., retiring.

Dr. Woolley (49), who was born in England, was Chief Assistant at Greenwich Observatory from 1933 to 1939, when he was appointed Commonwealth Astronomer in Australia. He played a leading part in bringing the Commonwealth Observatory at Canberra to its present position as an important centre of international research.

Dr. Woolley will take up the post of Astronomer-Royal on Jan. 1, 1956. Sir Harold Spencer Jones had held the post since 1938. (Times - Australian News and Information Bureau)

JULY 2—9, 1955

A. TUNISIA. — Franco-Tunisian Agreement on Internal Autonomy. - Opposition by Section of French Community and Nationalist Extremists. - M. Bourguiba's Return to Tunis. - French Economic Aid to Tunisia.

After negotiations lasting nine months, the final agreement granting internal autonomy to Tunisia, but protecting French interests in that country and continuing close links between France and Tunisia, was formally signed in Paris on June 2 by M. Faure (the Prime Minister) and M. July (Minister for Tunisian and Moroccan Affairs) on behalf of the French Government, and by M. Tahar Ben Ammar (the Tunisian Premier) and M. Mongi Slim (Minister of State) on behalf of the Bey. An agreement in principle on all outstanding issues had been signed by both Governments on April 22.

The final agreement consisted of (*a*) a general political convention defining the relationship between France and Tunisia, with an annexed protocol on defence and security; (*b*) a protocol, with annexes, on public order; (*c*) conventions dealing with the rights and status of the French community, the judicial system, technical and administrative co-operation between the two countries, cultural questions, and economic and financial questions. The main provisions of the conventions and protocols are summarized below.

General Convention.

Preamble. This was worded as follows: "The President of the French Republic and H.H the Bey of Tunis, animated by the same ideals of peace, co-operation, and progress;

faithful to the long tradition uniting France and Tunisia, and resolved to develop in the future the close and permanent bonds of friendship and solidarity between the two countries;

assured that the development of Tunisia within the framework of internal autonomy will give a new scope and efficacy to the Franco-Tunisian association (*communauté*) and allow the two countries, while preserving their respective personalities, to ensure the harmonious evolution of their destinies;

convinced that the development of Tunisian institutions, as well as the liberal principles of the French Republic and of the organization of the free world, justify the desire of the two Governments to promote their co-operative relations under conditions freely negotiated, in mutual respect for their sovereignties and to the advantage of their common interests;

taking into account the existing conventions between France and the Bey, especially the Treaty of May 12, 1881, whose provisions remain binding;

taking into account the degree of evolution attained by the Tunisian people;

and desiring to guarantee the rights and interests of the French in Tunisia,

have decided . . ."

Provisions

(1) The Protectorate Treaty (the Treaty of Bardo), under which France assumed responsibility for the defence and foreign policy of Tunisia, and all subsequent treaties between the two countries, were confirmed

(2) Article 1 of the Treaty of La Marsa (1883), under which France assumed responsibility for the internal administration of Tunisia, was abrogated.

(3) The principle of internal autonomy was declared to be limited only by the present conventions.

(4) Discussions between the two Governments on the application of the conventions would take place from time to time.

(5) Frenchmen living in Tunisia and Tunisians living in France would enjoy a special status distinct from that of aliens, and the French community would therefore participate in certain Tunisian institutions (see below).

(6) France would be represented in Tunisia by a High Commissioner instead of a Resident-General. He would act as the Bey's Foreign Minister, would be the intermediary between the two Governments on all matters of common jurisdiction, and would protect the rights and interests of the French community in Tunisia.

(7) The High Commissioner would be represented locally by delegates, who would exercise consular functions in matters concerning the French community and would also ensure that the rights guaranteed to them were respected.

(8) The Tunisian Government would be represented in Paris by a delegation without diplomatic status.

(9) Tunisian officials would be attached to French diplomatic missions to assist in dealing with matters of specific Tunisian concern.

(10) The personal rights laid down in the U.N. Convention on Human Rights would be guaranteed to all.

Protocol on Defence and Security.

(1) The High Commissioner would retain sole responsibility for defence, police control of frontiers, ports, and aerodromes, and counter-espionage.

(2) A joint committee on defence, without power of decision, would be set up under the chairmanship of the Tunisian Prime Minister.

(3) The High Commissioner would exercise special powers over the naval and air base of Bizerta and in the Southern frontier zone.

(4) Towns in the frontier zones would be administered by Tunisian officials The frontier zones themselves would be defended by both French and Tunisian troops.

Protocol on Public Order.

(1) The Tunisian Government would assume responsibility for public order two years after the agreement entered into force.

(2) For 10 years after the agreement's entry into force (i.e. for eight years after the Tunisian Government's assumption of responsibility) the Director-General of Police, the heads of the five principal police services, and the six district chiefs of police would remain French.

(3) For a further period of 10 years, not less than one-third of the police forces in towns with a large European population would remain French, and in the European quarters of those towns would be commanded by French commissioners. In Tunis the commissioner-general and his two principal assistants would be French.

(4) At the end of this transitional period of 20 years, the two Governments would consider what proportion of French officials should be retained in the police forces.

Convention on the Status of the French Community and of Foreigners.

(1) The Tunisian Government would in future be free to legislate on questions of nationality

(2) All persons of French descent—no matter how long their families had been settled in Tunisia—might retain their French citizenship

(3) Any Frenchman or foreign national who had completed his military service might assume Tunisian nationality.

(4) After 15 years from the agreement's entry into force, all foreigners born in Tunisia, whose fathers had also been born in the country, would receive Tunisian nationality instead of French nationality as at present.

(5) In Tunis, Bizerta, Ferryville, Sfax, and Sousse, and in five smaller centres containing a large French population, three-sevenths of the members of the municipal councils would be French, in other towns where the French community formed at least one-tenth of the population, one-third of the municipal councillors would be French; and in localities where the French community exceeded 100 but formed less than one-tenth of the population, they would be represented by one French councillor.

(6) The French members of municipal councils would be appointed by the Bey, from a list presented by the High Commissioner. They would have the same rights and duties as other councillors, and would be eligible without discrimination for membership of the *bureaux* of the councils.

(7) Although Arabic would be the only official language, the French language would have a special status All laws, regulations, and official notices would be published in both Arabic and French; French would be used by the authorities in all dealings with Frenchmen and with foreigners whose native language was not Arabic, as well as in the Government's foreign relations; and French would be taught in all Tunisian schools.

(8) Frenchmen would enjoy full liberty to carry on their cultural, religious, economic, professional, and social activities, and would be guaranteed freedom of association, assembly, and trade union organization, as well as other recognized personal freedoms. Changes in the legal status of the Christian Churches in Tunisia would require the consent of the French Government.

(9) The French chambers of commerce and agriculture would be maintained, and the members of the French community would continue to be fully represented on the mixed economic chambers. No distinction between Frenchmen and Tunisians would be made by the Tunisian Government in the setting-up of any new consultative or administrative organs of professional organizations, economic or social institutions, or public services of an industrial or commercial character, and Frenchmen would be represented thereon in proportion to the importance of their interests.

(10) The Tunisian Government would ensure safety of person and property to foreign nationals, and the French Government would continue to watch over their protection in conformity with the treaties in force. The Tunisian Government would take all legal and administrative measures to guarantee to foreign nationals the free exercise of their cultural, religious, economic, professional, and social activities, within the framework of Tunisian internal legislation. In matters of jurisdiction foreign nationals would enjoy the same guarantees as Frenchmen, and their applications to the administrative tribunal would be heard by its special Franco-Tunisian section (see below).

Judicial Convention.

(1) Judicial powers would be transferred to Tunisian courts by stages over a period of 15 years. During the first five years after the agreement's entry into force, there would be few changes from the present position, but all litigation between Tunisians would be tried by Tunisian courts, whilst all litigation between Frenchmen or foreigners, between Tunisians and non-Tunisians, and between companies (no matter whether Tunisian or French) would come before French courts.

(2) After the first two years mixed courts, each consisting of equal numbers of French and Tunisian magistrates under a French or Tunisian president, would be set up to deal with litigation between Tunisians and non-Tunisians on questions of commercial law and social legislation. In courts of the first instance the decision whether the president should be French or Tunisian would be left to the choice of the defendant, but in all appeal cases the president would be French if one party demanded it.

(3) After 10 years the competence of these mixed courts would be gradually extended, by agreement between the two Governments. Cases relating to the personal status of Frenchmen and foreigners, and criminal cases in which Frenchmen and foreigners were involved, would, however, remain within the competence of the French courts.

(4) After 15 years a mixed commission would decide if all the necessary conditions for the transfer to the Tunisian courts of full judicial powers, including the preparation of a new legal code and the training of a body of magistrates, had been fulfilled.

(5) The existing Franco-Tunisian court for dealing with questions of land ownership would in future consist of an equal number of French and Tunisian magistrates, in addition to the president Other changes in its composition and working could be made by agreement between the two Governments

(6) A Court of Arbitration would be set up consisting of five French members, five Tunisian members, and an eleventh member who, for the first six years, would be chosen by agreement between the two Governments, and who thereafter would be a Frenchman or a Tunisian for alternate two-year periods. This Court would adjudicate in disputes between the two Governments on the interpretation or application of the conventions, and in this connexion would be empowered to pronounce on laws, administrative acts, judgments of other courts, alleged failures to act where required, etc

Any application to the Court would have a suspensory effect if requested by the complaining Government, and the measure complained of would cease to be effective for two months or (by decision of the Court) for a longer period.

(7) The Tunisian administrative tribunal to be set up would have a special section, consisting of an equal number of French and Tunisian judges, which would deal with all complaints lodged by French citizens.

Convention on Technical and Administrative Co-operation.

The Tunisian Government would assume control of the Civil Service, which would undergo a gradual process of "Tunisification." French officials, however, would be guaranteed continuity of employment, with the same salaries, prospects of promotion, and other conditions as before. Those employed under contractual arrangements would stay for the duration of their contracts, and would not be subjected to any discrimination.

In the recruiting of technical staffs, preference would be given to Frenchmen where no suitable Tunisians were available.

Cultural Convention.

(1) Two parallel educational systems would be set up: (*a*) a Tunisian system under a Tunisian Ministry of Education, and (*b*) a French system under a cultural mission attached to the High Commissioner's Office. Existing school buildings would be divided between the two systems, and admission to schools of both types would be free to all

(2) Arabic would be taught in French schools, and French in all Tunisian schools except those giving a purely religious education.

(3) In Tunisian schools a syllabus similar to that used in French schools would be introduced for pupils wishing to follow such a course, and *vice versa*.

(4) French citizens would be free to set up private schools

Economic and Financial Convention.

(1) Tunisia would continue to be attached to the franc zone; the French franc would remain her currency; and financial transfers from one country to the other would be completely unrestricted. To ensure currency stability, the issue of notes would be under the control of the Monetary Committee of the franc area, on which the Tunisian Government would henceforth be represented with full voting power. The *Banque de l'Algérie et de la Tunisie* would remain the bank of issue until 1960.

(2) Credit control would remain with the bank of issue, but a Tunisian Credit Council would be established, consisting of representatives of branches of the economy interested in the distribution of credit.

(3) French foreign exchange regulations would be applicable in Tunisia, which would have a representative in the *Office des Changes* for the franc area in Paris. This office would be responsible for foreign exchange control, permits, and penal proceedings in cases of infraction.

(4) French legislation on capital investment and French company law would apply to Tunisia, and foreign capital investments and transfers would be subject to the approval of the French authorities.

(5) All foreign exchange resources would be pooled, and in return France would guarantee Tunisia's external balance of payments.

(6) All trade agreements would be concluded by France for the whole franc area, and a joint Franco-Tunisian Foreign Trade Committee would be set up to deal with common problems relating to commercial exchanges with other countries.

(7) A Franco-Tunisian Customs Union would be established two months after the agreement's entry into force; however, in order to enable Tunisia to develop her industrialization, a committee would decide on any necessary modifications of the principle of a complete Customs union. Customs duties applicable throughout the Union could only be modified with Tunisia's consent, whenever they involved an issue of major importance to her. To ensure uniformity of procedure, the Tunisian Customs service would be placed under the supervision of a senior French official for at least seven years.

(8) Tunisian State loans would be issued in agreement with, and be guaranteed by, the French Treasury, which was authorized to make advances to the Tunisian Treasury on conditions providing for ultimate repayment.

(9) France would facilitate the economic development of Tunisia by loans to the Tunisian Treasury or to Tunisian autonomous bodies, local authorities, and private enterprises.

(10) Frenchmen in Tunisia and Tunisians in France would be free to engage in all forms of economic activity and to hold any salaried employment, including posts in public services of an industrial and commercial character.

(11) French enterprises would receive exactly the same treatment as Tunisian enterprises, notably with regard to juridical, financial, economic, and social benefits granted by the State. Equality of treatment was similarly guaranteed in matters relating to the granting of concessions, contracts for public works, and permits and licences of all kinds.

(12) There would be no restrictions on the choice of employees, though the Tunisian Government reserved the right to control foreign manpower brought into the country, except for higher technical grades or specialists.

(13) The property of French citizens and of French enterprises might not be expropriated, except in the public interest and after payment of fair compensation The same principles would apply to concessions for the exploration and exploitation of natural resources, etc

(14) Agricultural, industrial, and commercial enterprises established as Tunisian companies, although their capital and directors were French, would be guaranteed the same privileges as French enterprises Moreover, they would be allowed to retain their present status, notably as regards the free choice of partners and managers, their operations, and their liquidation

The negotiations on the agreement, which officially opened on Sept. 4, 1954, made slow progress during the earlier stages, owing partly to the activities of the *fellaghas* and partly to disagreements between the two Governments. Although the position was improved by the surrender of the *fellaghas* in December, and by the Tunisian Government's decision to abandon its demands for the establishment of a Tunisian Army and of Tunisian diplomatic missions in foreign countries (see 13933 A), the negotiations remained virtually deadlocked on the issue of control of the police, and especially of security arrangements in the Southern frontier zones. The fall of M. Mendès-France's Government in February was followed by a suspension of the talks, which were not resumed until March 15.

During this second stage, progress was delayed by differences on the following issues: (1) The boundaries of the Southern frontier zones, and the powers of the French military authorities in these zones. (2) The French Government's proposal that half the members of the municipal councils should be French, as opposed to the Tunisian delegation's insistence on a maximum of one-third. (3) The mode of appointment of the French councillors, the French Government favouring their election and the Tunisian Government favouring their appointment by the Bey. (4) The French demand for the establishment of an Economic and Social Council, with French representation, which was opposed by the Tunisian delegation as unnecessary in view of the maintenance of the French chambers of commerce. (5) The status of the French language. (6) The nationality of the president of the Court of Arbitration. (7) The French demand for a declaration that the association between France and Tunisia should be indissoluble. (8) The Tunisian Government's demand that M. Habib Bourguiba, president of the Néo-Destour (the leading nationalist party), should be allowed to return to Tunisia from his exile in France.

When agreement had been reached on all these points, except the Southern frontier zone and French representation on the municipal councils, M. Faure received M. Bourguiba on April 21 for private discussions. As a result, a compromise settlement was agreed upon, and in the early hours of April 22 the two delegations signed a protocol recording that, subject to the approval of the Bey and the French Government, they had reached agreement in principle on all the matters at issue. After an interval during the Moslem fast of Ramadan, negotiations on points of detail were resumed on May 16, and the agreement in its final form was initialled by M. Faure and M. Tahar Ben Ammar on May 29 and was formally signed on June 3.

After the initialling of the agreements on May 29, **M. Tahar Ben Ammar** said that although the conventions did not give "entire satisfaction to either side," they were "the result of reciprocal concessions which allow the Tunisians to free their sovereignty from the bonds which were paralysing it, and France to safeguard her higher interests and to guarantee the material and moral interests of the French in Tunisia." Once confidence had been restored, it would be possible to introduce a programme for the modernization of agriculture, the development of industry and commerce, and the solution of urgent social problems, which would make Tunisia a modern and prosperous State. He concluded by appealing to the French community to free themselves from prejudice, and to offer the hand of friendship to the Tunisians in order to "build with them the Tunisia of tomorrow."

M. Faure said that he expected the conventions to be criticized, but added: "Great tasks lie before us. Future results may disarm all criticisms. . . . This is an exceptional experiment, an example of honourable and trusting co-operation between two peoples which

has no parallel anywhere. . . I attach particular importance to that section of the conventions emphasizing the permanent links between the two countries."

After the signing of the final agreement **M. Tahar Ben Ammar** expressed the Tunisian Government's determination "to observe strictly the letter and spirit of the agreement, to carry out its provisions scrupulously and honourably, and to ensure its success in day-to-day practice." He also expressed the hope that the French Government would "speedily liquidate the last traces of past difficulties by granting an amnesty to all political prisoners."

Agitation against Negotiations by French Colonists.

Throughout the negotiations a violent agitation against the granting of any concessions to the nationalists was maintained by a section of the French community in Tunisia.

A delegation led by Dr Tremsal (vice-president of the municipality of Tunis) was received on April 18 by M. Faure and informed him that they could not recognize any agreements on the future of the French community in the negotiation of which they had not been represented. The delegation demanded that Frenchmen should be included in the Tunisian Government, the Tunisian Legislature, and the Tunisian Civil Service, that half the members of the municipal councils should be French, and that the administration of justice and the control of the police should remain in French hands. The General Union of French Civil Servants in Tunisia staged a one-day protest strike on April 19, during which tear-gas bombs were thrown into the central post office in Tunis, neither the police, postal officials, nor teachers, however, took part in the strike.

The signing of the protocol of April 22 was followed by protest demonstrations and by acts of violence against members of the Movement for Franco-Tunisian Co-operation, which had issued a statement welcoming the agreement. At a demonstration in Tunis on April 30, General Rime-Bruneau (a retired officer and president of the *Présence Française* organization) demanded the "punishment" of the members of the Movement, and accused the Resident-General, General Boyer de la Tour, of "covering with his prestige a policy of surrender and spoliation." On May 2 three young men assaulted Dr. Burnet, the 81-year-old president of the Movement and former director of the Pasteur Institute, who was seriously injured, whilst on the following day M. Cuny, head of the Department of Native Agriculture, was severely beaten by four men armed with knuckle-dusters. The Resident-General accordingly ordered the temporary deportation to France of General Rime-Bruneau (who, he stated in a broadcast, had made contact with extremist Moslem organizations and had refused to obey a summons from the Minister of Defence to explain his activities) and banned all public demonstrations. General Rime-Bruneau was, however, allowed to return to Tunisia on June 13.

A demonstration in Tunis on May 7, held to celebrate the tenth anniversary of the Allied victory in World War II, developed into a riot during which several thousand settlers acclaimed General Rime-Bruneau and tried to attack General Boyer de la Tour's official residence. The rioters were dispersed by the police without serious incident.

A French parliamentary delegation led by M. Barrachin, an A.R.S. (Dissident Gaullist) deputy, which had been touring Tunisia at the invitation of the settlers' organizations, announced its support for their campaign against the agreement, and on May 20 submitted to M. Faure proposals for guaranteeing the settlers' rights. The Foreign Affairs Committee of the National Assembly, however, had refused on May 18, by 28 votes to eight, to consider a motion by General Aumeran (Independent Republican deputy for Algiers) demanding that no Constitution limiting the Bey's absolute powers should be enacted, that all anti-French propaganda should be forbidden, that the French authorities should retain the right to intervene at any time for the preservation of law and order, and that the settlers should elect half the members of all representative bodies.

Nationalist Opposition to Negotiations.

Although the negotiations and the agreement received the support of the majority of the Néo-Destour, they were opposed by an extremist wing of that party led by M. Salah Ben Youssef (its secretary-general, who was living in exile in Geneva). Strong opposition was also expressed by the Old Destour and by the Tunisian Communist Party.

M. Salah Ben Youssef issued a statement on Jan. 3 accusing M. Mendès-France's Government of failing to honour its commitments, and demanding a strict time-limit on all restrictions of Tunisian sovereignty, the transfer of control of the police to the Tunisian Government, the formation of a national army, the establishment of a single administration of justice, Tunisian control of the educational system, and freedom to pursue an independent economic, monetary, and Customs policy. At the Bandung conference, which he attended, he denounced the Franco-Tunisian protocol of April 22 as ignoring the major questions under discussion, including that of internal security and the immediate transfer of police powers to the Tunisian Government.

On the other hand, M. Hamadi Badra (the former Minister of Commerce in M. Chenik's Government, who had gone into exile with M. Ben Youssef in 1952) stated on May 18 that he fully supported M Bourguiba, "our uncontested leader, who once again has shown us the way by giving us confidence in the future."

The Old Destour, in a statement issued on April 21, affirmed its opposition to "any agreement enshrining the principle of an illusory and gradual internal autonomy, contrary to the Tunisian people's aspirations for independence," whilst the Tunisian Communist Party described the protocol of April 22 as "a mere white-washing of the protectorate system."

The opposing attitudes of the Néo-Destour and the Old Destour led during May to a number of serious incidents, in which a young Néo-Destourian was killed and seven people injured during a clash between the two parties at Sousse on May 16 M Abdelkrim Ghamra, a member of the administrative committee of the Old Destour, was shot near Sousse on May 21; a bomb wrecked the Néo-Destour headquarters at Bardo, near Tunis, on May 22; and a member of the Old Destour's student committee was shot in Tunis on May 28.

M. Bourguiba's Return to Tunis.

M. Habib Bourguiba, who had been interned in France since May, 1954, following two years' imprisonment on the island of Galite, returned on June 1 to Tunis, where he was enthusiastically welcomed by crowds estimated at between 200,000 and 300,000.

After being greeted by Prince Chadly (the Bey's eldest son), M. Tahar Ben Ammar, and members of the Government, M. Bourguiba was carried shoulder-high to a public meeting, where he made a short speech. "We have advanced a step towards independence," he said "The Tunisian State is now a reality. If we have made concessions, it is because we wish to build a modern State with French collaboration." Later he was received in audience by the Bey, and on leaving the palace paid tribute to the Royal family's contribution to the struggle for independence, which had "created a profound solidarity between the Tunisian nation and the reigning house." The celebrations concluded on June 2 with a banquet organized by the political bureau of the Néo-Destour, at which the guests included members of the Government, Tunisian and French officials, Moslem and Jewish religious leaders, representatives of the Movement for Franco-Tunisian Co-operation and of the trade unions, and former *fellagha* leaders.

French Economic Aid to Tunisia.

Widespread unemployment and a food shortage caused by a prolonged drought led to local disorders during the early months of 1955, in which bakers' shops were plundered during February at Beja, Sfax, and Tebourba. In order to relieve the food situation, M. Faure's Government decided at its first meeting on Feb. 28 to send immediately stocks of cereals and butter to Tunisia. M. Tahar Ben Ammar announced on March 4 that the French Government had decided to make grants totalling 2,800,000,000 fr. (£2,800,000) for this purpose, and said that "Tunisia will never forget this gesture of solidarity."—(Le Monde, Paris - Le Figaro, Paris)

A. PAKISTAN - AFGHANISTAN. — Failure of Mediation Efforts in Afghan-Pakistani Dispute.

Prince Musaid bin-Abdur Rahman, the Saudi Arabian envoy who had been seeking a settlement of the dispute between Pakistan and Afghanistan, announced on June 28 that his final proposals had been rejected by the Afghan Government. During the later stages of his attempt to mediate between the two Governments, Prince Musaid had been assisted by the Egyptian Minister of State, Colonel Sadat.

It was reported on June 18 that the Afghan Government had agreed to take the following actions as an *amende honorable* for the attack on the Pakistani Embassy in Kabul on March 30: the Pakistani flag to be ceremonially rehoisted in Kabul in the presence of an Afghan Cabinet Minister, and to be saluted by a guard of honour from the Afghan Army; the Afghan Foreign Ministry to issue a communiqué announcing the settlement of the dispute and expressing the hope that such incidents would not recur in either country; a committee of representatives of Saudi Arabia, Egypt, Persia, Iraq, and Turkey to open an inquiry into the circumstances of the attack on the Afghan Consulate at Peshawar on April 1. After full agreement had been reached on these points, however, the Afghan Government demanded that the two countries' Consulates should be reopened within 20 days of the ceremony. The Pakistani Government, though regarding this question as being outside the mediators' terms of reference, eventually agreed to the reopening of the Consulates within 30 days, but insisted that Afghanistan should give assurances on the safeguarding of the lives and property of Pakistani nationals in Afghanistan, and should also take all necessary measures to suspend propaganda calculated to incite anti-Pakistan feeling and tension. As the Afghan Government refused to accept the latter condition, the mediators decided to end their efforts.

Prince Musaid and Colonel Sadat left Karachi on June 29.

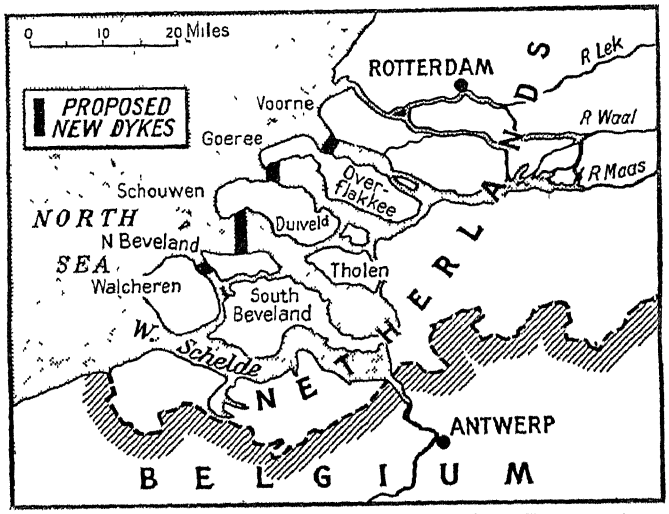
A. NETHERLANDS. — Project for closing Estuaries of Zeeland and South Holland. - Progress of Zuider Zee Reclamation. - Repair of Zeeland Dykes.

A project for "sealing off" the Rhine and Scheldt estuaries of Zeeland and South Holland was recommended on March 15, 1954, by a special commission—known as the Delta Commission—appointed by the Netherlands Government after the flood disaster of Jan. 31 - Feb. 1, 1953 (see 12765 A). The Commission's recommendations will be embodied in legislation which is expected to be presented to the States-General in the present year.

The Delta Commission consisted of ten hydraulic engineers and other experts under the chairmanship of Dr. A. G. Maris, Director-General of the Ministry of *Waterstaat* (Dykes and Waterways). It expressed the unanimous opinion that, to secure greater safety for the areas affected by the disaster of 1953, it was necessary to "seal off" the estuaries of South Holland and Zeeland by building four sea walls: (1) linking the islands of Voorne and Goeree-Overflakkee; (2) linking Goeree-Overflakkee and Schouwen-Duiveland; (3) linking Schouwen-Duiveland and North Beveland; and (4) linking North Beveland and Walcheren. [See accompanying map.] The plan did not affect the Western Scheldt channel, which gives access from the Belgian port of Antwerp to the North Sea through Dutch territorial waters, and on which freedom of navigation is guaranteed to Belgium under international treaty.



(*The Economist*)

The scheme—the biggest of its kind ever envisaged in any country—was expected to take 20-25 years for its completion, and to cost between 1,500 million and 2,000 million guilders (£150,000,000 to £200,000,000). The Delta Commission claimed that it was economically feasible, and that the people of the Netherlands would be able and willing to carry the financial burden "in view of the great resolution they have always shown when the maintenance of their soil and territory are involved." After enumerating both the advantages and disadvantages of the scheme, and considering an alternative plan for raising the existing dykes instead of building the proposed new sea walls, the Commission unanimously urged the Minister of *Waterstaat* (Dr. Algera) to adopt the "sea walls" project and to introduce the necessary legislation as soon as possible. The project is called in Dutch *Afdamming Zeearmen* (literally "damming of the sea arms"), popularly abbreviated as the "AZ Scheme."

The Delta Commission pointed out in its report (1) that during the flood disaster of 1953 the water-level was between 1 ft. 8 in. and 2 ft. 3 in. higher than ever before; (2) that the existing dykes therefore appeared to be too low; (3) that 6,200 square miles, or more than half the country's total area, lay below the high-tide level in the North Sea; and (4) that 6,000,000 people, or 60 per cent of the total population, were living in the low coastal belt protected by the south-western dykes—an area which included Holland's three largest cities, Amsterdam, Rotterdam, and The Hague. Whereas the central part of the country was already protected by the draining and closing-off of the Zuider Zee (see below), further measures were needed to protect the south-western areas, and it was claimed that such protection would be given by the proposed sea walls.

The Commission enumerated the following advantages which, in its opinion, would result from the adoption of the "AZ Scheme": (1) the new sea walls, together with the existing dykes, would give a double line of protection—"defence in depth"—against future inundations; (2) the closing of the sea arms would give a shorter, closed coastline formed by dunes and dams, which would simplify maintenance, (3) shipping on the waterways to be "sealed off" would be safer because of the absence of tides; (4) sailing routes could be shortened and deepened, and harbours improved; (5) improved communications would help the social and economic development of the Zeeland islands and end their present relative isolation, (6) salt infiltration would be lessened, the formation of fresh-water reservoirs would become possible, and considerable benefits would accrue to agriculture and horticulture

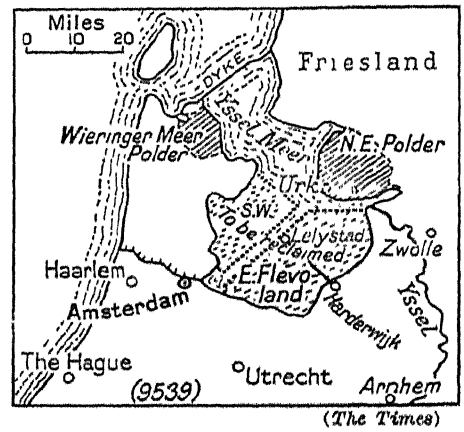
As an alternative, the Commission considered a plan to raise and strengthen the existing dykes, but decided against it for the following principal reasons. (1) it would give only a single line of defence against the sea, instead of the double protective line provided under the "AZ Scheme", (2) it would be "extremely difficult" to raise, strengthen, and broaden the existing dykes to the required extent, and in some places would be impossible on account of existing houses, industrial installations, and harbour establishments, (3) reinforcement of the existing dykes would mean a loss of over 700 acres of arable land, whereas the closing of the sea arms would bring a slight increase Moreover, the cost of raising all the dykes in the provinces of Zeeland and South Holland, by heights varying from four to seven feet, would be approximately the same as that of building the sea walls

On the other hand, the Commission pointed out that the adoption of the "AZ Scheme" would mean the destruction of the oyster and mussel beds of the Eastern Scheldt, which produced an annual revenue of 5,000,000 guilders from the export of the shellfish, and in which some 20,000,000 guilders were invested. It also emphasized that the closing of the sea arms would be an engineering project of the first magnitude, since engineers and workers would have to overcome exceptional difficulties presented by strong tidal currents, sea mist, and strong winds.

The land reclamation scheme in the Zuider Zee, on which work has been in progress for many years, reached a new stage on Oct. 28, 1954, with the completion of a 16-mile dyke linking Harderwijk, on the mainland, with Lelystad, a new town on reclaimed land in what was formerly the middle of the Zuider Zee. Lelystad (named after Dr. Lely, a former Minister of *Waterstaat* who in 1918 obtained the approval of the States-General for the reclamation of the Zuider Zee) will be the future centre of all five Zuider Zee polders when the reclamation plan is completed. Although the entire area was at the bottom of the sea 20 years ago, Lelystad is today a flourishing town with shops, schools, churches, etc., surrounded by rich agricultural land.

Two of the five Zuider Zee polders are already completed: the North-West Polder (the *Wieringermeerpolder*), which includes the former island of Wieringen, and the North-East Polder, which includes the former island of Urk. The three polders yet to be reclaimed are the South-West Polder (which will include the island of Marken and the picturesque fishing village and tourist centre of Volendam); and two polders in the South-East of the Zuider Zee, lying respectively east and west of the Harderwijk-Lelystad dyke. (The name of East Flevoland has been given to one of these polders—see map below.) The reclamation work reached its first important objective in 1932 with the completion of the enclosing dam (the *Afsluitdijk*) across the entrance to the Zuider Zee, linking the provinces of North Holland and Friesland by a motor-road across the top of the dyke. With the construction of the *Afsluitdijk*, and the subsequent polder reclamation work, the Zuider Zee changed its character from a large sea-bay to a freshwater lake, and is now officially known as the Ijssel Lake (*Ijsselmeer*). The Polder Commission proposed some years ago that the five polders, when completed, should form a twelfth province of the Netherlands under the name of Zuiderzeeland.

After more than nine months' intensive repair work, the last of the gaps in the dykes caused by the Zeeland flood disaster was closed on Nov. 6, 1953. The occasion was celebrated with nation-wide rejoicings, the final closing of the dykes being witnessed by Queen Juliana, Princess Beatrix, and the Prime Minister of the Netherlands, Dr. Drees. More than 300 miles of damaged dykes were repaired during the nine months' operation, involving the "plugging" of 67 major gaps and 450 smaller ones.



(*The Times*)

The last gap to be closed was a 200-yard breach in the dykes on the island of Schouwen-Duiveland, near the village of Ouwekerk. Initial attempts to close this breach—the largest caused by the

inundations—were unsuccessful, and experts finally devised a new system involving the use of large "Phoenix" caissons of British manufacture which were made available to the Dutch authorities by the British Admiralty. This system proved successful, and the gap was finally "plugged" by four of these caissons sunk into the dyke.

An agreement was concluded on Dec. 16, 1953, between the American Kellogg Foundation and the Netherlands Ministry of Agriculture, Fisheries, and Food whereby the Foundation agreed to support an International Institute for Land Reclamation, to be established in Holland, with funds of 1,000,000 guilders (£100,000) a year "for the first few years." The Institute will collect, survey and classify all information relating to land reclamation, and will make the services of Dutch experts available to other countries. The Kellogg Foundation funds for the Institute were derived from a grant which the Foundation made for the benefit of Dutch agriculture at the time of the flood disaster.

The final official death-roll of the flood disaster was 1,835—nearly 400 higher than the previous official figure.
(Netherlands News Agency - Algemeen Handelsblad, Amsterdam - Nieuwe Rotterdamse Courant - Haagse Courant)
(Prev. rep. Flood Disaster. 12765 A; Zuider Zee Reclamation, 10148 C; 9943 A.)

A. WESTERN GERMANY. — Acceptance of Discussions with Soviet Union on Normalization of Russo-German Relations.

The Federal Government's reply to the Soviet proposal for the normalization of relations between the U.S.S.R. and the German Federal Republic was presented on June 30 to the Soviet Ambassador in Paris (M. Vinogradov) by the Federal German Ambassador (Herr von Maltzan). After stating that the Federal Government was "in agreement" with the Soviet proposal for discussions on the establishment of diplomatic, commercial, and cultural relations between the two countries, it added "In present circumstances, it appears to the Federal Government advisable that the subjects which are to form the basis of this discussion should first be defined and their order clarified. It proposes, therefore, that informal discussions should take place between the Embassies of the two countries in Paris on these questions."

It was pointed out in Bonn that the Federal German Government did not propose to make any pre-conditions for a meeting with the Soviet Government (e.g., on the question of German prisoners-of-war still held in the Soviet Union); that, although the German Note had made no mention of the invitation extended to Dr. Adenauer to visit Moscow, this did not mean that the Federal Chancellor had declined the invitation; and that the text of the German Note had been made known beforehand to the British, American and French Ambassadors in Bonn.—(Frankfurter Allgemeine Zeitung) **(14271 A.)**

B. WALES. — Decline in Welsh-speaking Population.

The General Register Office published statistics on July 6 showing (*a*) that just over 715,000 people (aged three years and over) in Wales and Monmouthshire had said that they could speak Welsh at the time of the 1951 census, compared with over 909,000 at the 1931 census—a decline of 21 per cent in the 20 years; (*b*) that nearly all those who stated in the census that they could speak Welsh were also able to speak English; (*c*) that only 48,000 persons were recorded as speaking Welsh only, compared with 98,000 in 1931; (*d*) that the proportion of persons speaking Welsh had fallen from 49.9 to 28.9 per cent since 1901; (*e*) that the proportion of persons speaking Welsh only had fallen from 15.1 to 1.7 per cent over the same period. The population aged three and over in Wales and Monmouthshire was 2,472,420 in 1951 and 2,472,378 in 1931—an increase of only 51 in the 20 years. (Times)

C. SOVIET UNION. — Adherence to Inter-Parliamentary Union. - Supreme Soviet Decision.

The Supreme Soviet of the U.S.S.R. decided on June 30 to join the Inter-Parliamentary Union, and to form a "national parliamentary group" for this purpose headed by M. Dimitri Shepilov, chairman of the Foreign Affairs Commission of the Soviet of Nationalities and editor of *Pravda*. It was stated that the decision to join the Inter-Parliamentary Union (which has been in existence since 1889, and has its headquarters in Geneva) had been taken "in the spirit of the Supreme Soviet's declaration [of Feb. 9, 1955—see page 14060, second column] calling for direct contacts between the Supreme Soviet and the Parliaments of other countries."
(Soviet Weekly)

D. UNITED STATES. — Motor Car Industry. - New Wage Agreements. - Provision of Supplementary Unemployment Benefits by Companies.

A new three-year contract between the Ford Motor Company and the United Auto Workers (C.I.O.) was signed on June 6, thereby avoiding a complete stoppage of work by the union's 140,000 members in the company's plants which had been scheduled to start on the same day. The new contract was of major importance in the field of labour-management relations in that, for the first time in a leading American industry, the company agreed to provide supplementary unemployment benefits for all employees paid by the hour who had completed at least one year's service. In addition, the new contract covered higher pension payments by the company, increased disability payments, increased hospital benefits for employees' wives and dependent children, etc. The principal points relating to unemployment benefits were as follows:

(1) Employees laid off would be eligible for unemployment benefits paid by the company ranging up to $25 a week for a maximum of 26 weeks These benefits, when combined with other unemployment compensation to which the employee was entitled, would bring his income up to a maximum of 65 per cent of his net wages (after taxation) for the first four weeks in which he was entitled to benefits, and thereafter to 60 per cent.

(2) To finance the plan, two trust funds would be established by the company—a general fund for employees engaged in its regular production activities, and a defence fund for those on defence work. The company would contribute to the two funds on the same basis, at the rate of 5 cents per hour paid to each employee in both the defence and non-defence categories On the basis of current levels of employment, the two funds might ultimately amount to $55,000,000; to enable them to be built up, no benefit payments would be made during the first year of the scheme.

(3) Although the amount paid in weekly benefit would not normally be affected by the position of the trust funds, it would be reduced by 20 per cent if the relevant fund fell below 13 per cent of what its total should be on the basis of existing contributions. If the trust fund fell below four per cent of the aforementioned total, no further benefits would be paid until this percentage had been exceeded again.

(4) Both the general fund and the defence fund would be established with banks or trust companies selected by the company The company's contributions would be made directly to the funds and would be held and invested by the trustees.

Mr. Walter P. Reuther (president of the United Auto Workers), who negotiated the new contract on behalf of the union, estimated that the benefits accruing to union members were the largest the union had ever negotiated, and said that they were equivalent to more than 20 cents an hour. He referred to the new principle embodied in the agreement as a "guaranteed annual wage," and paid high tribute to the Ford Motor Company for its courage in pioneering a "new way whereby workers and their families would receive greater security against unemployment"

For the Ford Motor Company, **Mr. John S. Bugas** (vice-president for industrial relations) stated that the plan had been conceived and formulated by Ford staff executives, and was designed to accomplish three inter-related objectives: (1) to provide a means of supplementing benefits paid under State unemployment systems to Ford employees who had to be laid off; (2) to avoid placing unlimited and unpredictable liabilities on the company; (3) to minimize the danger that funds available would be exhausted by payments to low-seniority employees to the detriment of high-seniority employees who might subsequently be laid off, and who would receive less or no benefits. "The plan we have developed is sound," Mr Bugas declared "We have been successful, we believe, in combining in it two seemingly irreconcilable concepts—the concept of adequate lay-off benefits for our employees, and the concept of limited liability for the company."

Following the conclusion of the agreement with the Ford Motor Company, the United Auto Workers negotiated a similar agreement on June 13 with the General Motors Corporation (the largest U.S. car manufacturers), which will be backed by a trust fund of $150,000,000. Negotiations for a similar agreement with the Chrysler Corporation opened on June 2.
(New York Times - New York Herald Tribune)

E. UNITED KINGDOM. — Capital Issues.

New capital issues during the first half of 1955 totalled £100,591,000, compared with £194,084,000 for the first six months of 1954 and £471,130,000 for the whole of that year. Of the six-monthly total, £88,653,000 were issues for the United Kingdom, £11,207,000 for British overseas countries, and £731,000 for foreign countries.—(Midland Bank Ltd.)
(Prev. rep. 13989 B; 13681 B.)

F. BERMUDA. — New Governor.

It was announced on July 6 that the Queen had approved the appointment of Lieut.-General Sir John Woodall, G.O.C., Northern Ireland District, as Governor of Bermuda in succession to Lieut.-General Sir Alexander Hood, who was retiring. (Times)
(Prev. rep. 10021 D.)

A. SOUTH AFRICA - UNITED KINGDOM. — South African Control of Simonstown Naval Base. - Agreement with Britain. - Statement by Sir Anthony Eden. - South African Naval Expansion Programme.

The South African Defence Minister (Mr. F. C. Erasmus), accompanied by South African service chiefs, visited London in June for discussions with the British Minister of Defence (Mr. Selwyn Lloyd), the First Lord of the Admiralty (Mr. J. P. L. Thomas), and British service chiefs on the future of the Simonstown naval base, and on defence matters of common concern to the two Governments.

On July 4, after Mr. Erasmus had returned to South Africa, Sir Anthony Eden informed the House of Commons that the Royal Naval base at Simonstown would be transferred to South African control to serve as a base for an expanded South African fleet; that South Africa would place orders in Britain for new warships to the value of £18,000,000; and that a new naval command structure would be set up to strengthen the defence of the sea routes round the Cape. The Prime Minister's statement was as follows:

"The talks between the South African Minister of Defence and U.K. Ministers have covered all aspects of defence against external aggression, and show the desire of both Governments for continuing an intimate co-operation in defence matters of common concern. Close contact will continue to be maintained between the Services of the two countries. Exchanges of letters between the Minister of Defence and Mr. Erasmus, which embody agreements and understandings satisfactory to both Governments, are being published today in the U K and South Africa, together with an agreed statement.

Naval co-operation between the two countries has been fully discussed A new naval command structure is being set up to strengthen the defence of sea routes round the Cape. This is to be based on a maritime strategic zone approximating to the present South Atlantic station, and will contain an area under the command of a South African flag officer. In a war in which both countries are involved, the whole zone will be under the supreme command of a Royal Navy Commander-in-Chief.

A joint maritime war planning committee is to be set up to ensure satisfactory planning in peace. Representatives of both navies will work under the guidance of the Royal Navy C.-in-C., South Atlantic, who will continue to fly his flag at a headquarters provided by the Union Government in the Cape area, and will be the Supreme Commander-designate in war.

The Union Government have decided to expand their naval forces, and to place orders for ships to the value of £18,000,000 in this country. In order to provide an adequate base for this expanding navy, H.M. Government in the United Kingdom have agreed that it will be in the interests of both countries to transfer the control of the existing Royal Navy base at Simonstown to the South African Navy.

The Union Government have agreed to take certain specified measures necessary to expand the facilities at Simonstown. They have also recognized the need for the provision for use in war of naval facilities elsewhere in the Union. After the transfer the Royal Navy will continue to enjoy the facilities of the Simonstown base in peacetime, and is guaranteed their use in any war in which the United Kingdom is involved. They would be available in such a war both to the Royal Navy and to the navies of the allies of the United Kingdom.

The Union Government have given specific undertakings to maintain the efficiency of the base and to safeguard the rights and prospects of those employed there. They have also confirmed that there will be no bar to the recruitment and employment of non-Europeans when they administer the base. These and other aspects of the transfer are fully covered in the agreements.

These agreements will remain in force until such time as the two Governments decide otherwise by mutual agreement.

The discussions about regional defence are set out in the White Paper. The two Governments recognize that, while the internal security of the countries of Southern Africa must remain a matter for each individual country concerned, Southern Africa and the sea routes round Southern Africa must be secured against aggression from without. They are further agreed that the defence of Southern Africa against external aggression lies not only in Africa but also in the gateways to Africa, namely in the Middle East.

Finally, both Governments have agreed jointly to sponsor a conference to develop the planning already begun at the Nairobi conference in August, 1951 (see 11701 A) on the improvement and security of the lines of communication around Southern Africa and between South Africa and the Middle East."

Mr. Attlee, who said that the agreement seemed "a satisfactory settlement of a difficult question that has been under discussion for a good many years," asked the Prime Minister (1) whether the Simonstown base would be available to Britain in the event of a war in which the U.K. was involved but not South Africa, and (2) whether there would be any discrimination between Europeans and non-Europeans in employment at the base. In reply to (1), Sir Anthony said that the base would be available to Britain, and also to Britain's allies, in a war in which the U.K. was a belligerent and South Africa was neutral. As regards (2), the British Government had gone carefully into the question and were satisfied that there were "very adequate safeguards" for the workers now employed at Simonstown.

Replying to a question by Vice-Admiral Hughes-Hallett (C.), the Prime Minister said that the wireless naval station at Simonstown would remain under Admiralty control until South African technicians were qualified to operate it. In the event of war, even if South Africa was neutral, the station would revert to British control In reply to Mr. Bellenger (Lab.), Sir Anthony said that the transfer of the Simonstown base to South African control would save about £500,000 a year in naval expenditure.

The South African Prime Minister, Mr. Strydom, said in Pretoria on July 4 that the agreement for the transfer of the Simonstown base represented "a logical continuation of South Africa's development towards independence."

After describing the agreement as "of great importance," Mr Strydom added. "There was a time in the past when we could with justification adopt the attitude that South Africa had no interest in quarrels between European nations. Circumstances have altered to such an extent that, should war break out between the Communist countries and the Western Powers, South Africa, because of the closing of the Mediterranean and the Suez Canal, will immediately be in the thick of it. . . . We will consequently have no choice, but will simply be dragged into such a war whether we want to or not. Alone we will naturally not be in a position to protect either our long coastline or the points of entry which lead to our country For this reason we must seek co-operation and contact with other countries who share our interest in Africa and the coastline of Southern Africa."

The White Papers referred to by Sir Anthony Eden were published on July 4 in London (Cmd. 9520) and Pretoria.

The White Papers explained that the new maritime strategic zone (approximating to the present Royal Naval South Atlantic station) would include the Mozambique Channel but would exclude waters farther north which fell within the responsibility of the Royal Naval C.-in-C., East Indies. The title of the strategic zone (which the Union Government wished to call the "South Africa strategic zone," whilst the U.K Government wished to retain the title "South Atlantic") would be decided later

The strategic zone would include an area to be known as the "South Africa area" bounded by the coast of South Africa and by a line drawn from the northern boundary of South-West Africa through various points to Cap Sainte Marie (Madagascar) and thence to the boundary between the Union territory and Portuguese East Africa. The Union Government would appoint the Flag Officer commanding this area.

In peace-time the C.-in-C. of the strategic zone would be directly responsible only to the U K. Government and would have no executive authority over South African forces, establishments, or services He would, however, have as one of his primary functions the guiding of maritime war planning in the strategic zone, and would be free to confer on these matters with the South African Naval Chief of Staff and the Union Minister of Defence. One of the functions of the joint maritime war planning committee to be set up would be the co-ordination of all maritime facilities in British and South African territories in the strategic zone.

The agreement relating to the transfer of the Simonstown base stated that, in a war in which South Africa was a co-belligerent, priority in the allocation of space and facilities of Simonstown between the two navies would be settled by mutual consultation between the C.-in-C. of the strategic zone and the South African Naval Chief of Staff, as strategic and operational needs might require. It was agreed that the necessary detailed preparations for the transfer of the base would be put in hand immediately upon the signing of the agreement, and would be completed as soon as possible Transfer of administration and control would take place not later than March 31, 1957. The White Papers also gave details of the arrangements concerning the wireless installations at the base.

The White Papers explained that at present about 1,200 people were employed at the Simonstown base, of whom 200 were British, about 300 South African, and the remaining 700 non-European. As regards the employment of non-Europeans, it was stated: "The Union Government confirm: (*a*) that there will be no bar to the recruitment and employment of non-Europeans; (*b*) that there will be no discrimination based on colour in the rates of pay for comparable jobs; (*c*) that non-Europeans, once recruited, will have the same security of tenure as Europeans."

It was stated that the Union Government would pay to the U.K Government in three annual instalments—the first in the financial year 1955-56—the sum of £750,000 for the property transferred.

In a statement to the South African House of Assembly on May 11, Mr. Erasmus had announced that the South African Navy would be enlarged by about 20 ships, and that £18,500,000 had been allocated for this programme over the next eight years. [As subsequently announced in the White Papers, and by Sir Anthony Eden, the Union Government will place orders for these warships in Britain at a cost of £18,000,000.] After pointing out that South Africa, in the event of war, would be more exposed to submarine attacks than to any

other type of attack, Mr. Erasmus said that the eight-year programme provided for the acquisition of ten coastal minesweepers, four seaward defence vessels, and six frigates, and for the purchase of *Shackleton* aircraft for long-distance sea reconnaissance and *Venom* night-fighters equipped with radar.

The South African Navy consists at present of 23 warships, the principal units being two destroyers, three frigates, and 11 seaward defence vessels.—(Times - Daily Telegraph - Manchester Guardian - Cape Times) **(Prev. rep. Simonstown Base, Discussions, 13913 C; South African Naval Programme, 14144 C.)**

The Simonstown Base. A British naval depot was first established at Simonstown (25 miles from Cape Town) in 1795, when the Royal Navy established a Cape of Good Hope Station. In 1814 Simonstown became the principal British naval base in South Africa, and in 1898 it was ceded to the British Admiralty for exclusive use as a naval base. In 1930, however, an agreement was signed giving the freehold of the base to South Africa

Simonstown has been for many years the headquarters of the South Atlantic squadron of the Royal Navy (at present consisting of the cruiser *Birmingham*, two frigates, and a submarine) and of the C.-in-C., South Atlantic. The base is a small one, covering some 28 acres, but it contains a dry-dock large enough to accommodate a small cruiser or a light Fleet aircraft-carrier. The South African Navy has hitherto been based on Durban, but—under the agreement with Britain—will have Simonstown as its main base in future.
(Times - Manchester Guardian)

A. ATOMIC RESEARCH. — Agreement between European Organization for Nuclear Research and Switzerland on Status of Geneva Laboratory.

The foundation-stone of the laboratory to be erected by the European Organization for Nuclear Research at Meyrin, near Geneva, was laid on June 10 in the presence of M. Petitpierre, President of the Swiss Confederation. On the following day the agreement regulating the international status of the Organization and its members *vis-à-vis* Switzerland was signed at the Geneva Town Hall.

An important clause in the agreement provided that Switzerland would be entitled, in the event of an international crisis or of war, to take any measures deemed necessary to protect her neutrality.

On March 18 it had been announced that Professor Félix Bloch had tendered his resignation as Director-General of the Organization in order to resume research work, and that he would be succeeded as from Sept 1 by Professor C. J. Bakker, of Amsterdam University. It was also announced that Professor Amaldi (Italy), the deputy director-general, was resigning and would be succeeded by Professor Bakker until the latter's assumption of the post of Director-General.

Professor Wolfgang Gentner (Western Germany) was appointed Director of the Synchro-cyclotron Division on June 11, and M. Jean-Pierre Jules Richemond (France) was appointed Director of Administration.—(Neue Zurcher Zeitung) **(Prev. rep. Geneva Laboratory, 13889 A.)**

B. AUSTRIA. — American, British and Soviet Ratifications of State Treaty.

The U.S. Senate ratified the Austrian State Treaty on June 17 by 63 votes to three, the opposing votes being cast by Senators Jenner (Indiana), Malone (Nevada), and McCarthy (Wisconsin) —all Republicans. The bulk of the Republican Senators, under the leadership of Senator Knowland, voted with the Democrats in full support of the treaty, the ratification of which had been unanimously recommended by the Senate's Foreign Relations Committee. In Britain, a Bill for the ratification of the Austrian treaty was enacted on July 6 after having passed through all its stages in the House of Commons (June 29) and the House of Lords (July 5) without opposition. As the treaty had been ratified by the Presidium of the Supreme Soviet on June 11, and by the Austrian Parliament on June 7-8, the only ratification outstanding is that of the French Parliament.—(Times - Daily Telegraph - New York Times) **(Prev. rep. 14252 C.)**

C. UNITED STATES. — Horror Comics banned in New York State.

Stringent new restrictions on the publication and sale of obscene books and horror comics went into effect in New York State on July 1, under an amendment to the State's penal law which had been passed by the State Legislature in March. The amendment made it a misdemeanour to publish comic books devoted to crime, sex, horror, terror, or brutality, or to sell to anyone under 18 any books which were obscene or devoted to a portrayal of sexual immorality. Violations were made punishable by a year's imprisonment, a fine of $500, or both.—(New York Herald Tribune) **(Prev. rep. 13950 C.)**

D. YUGOSLAVIA. — Discussions with Western Ambassadors in Belgrade.

Discussions were held from June 24-27 between M. Prica, Under-Secretary for Foreign Affairs in the Yugoslav Government, and the Ambassadors in Belgrade of Great Britain, the United States, and France. An official communiqué said that the talks had dealt with "the general international situation and questions of direct mutual concern," and continued.

"This exchange of views, which took place in an atmosphere of cordiality and mutual confidence, confirmed the wide measure of agreement among the four Governments in their approach to the various international questions under review. The meeting had special significance in view of recent favourable developments in the international situation. The four Governments were agreed that solutions to outstanding problems should be sought by peaceful means and by negotiations based upon full respect for, and recognition of, the right of all nations to independence, equality, self-defence and collective security, in conformity with the United Nations Charter They will continue to do all in their power to promote such solutions.

The four Governments express their firm conviction that the existence of a strong and independent Yugoslavia, and continued co-operation between them under conditions of full equality, are a contribution to peace and stability. They consider that the fruitful co-operation being developed in all fields in the Balkan alliance is also an important contribution to peace and stability in this part of the world."

The Western Ambassadors taking part in the talks were Sir Frank Roberts (Britain), Mr. James Riddleberger (U.S.A.), and M. François Coulet (France).—(Tanjug Agency, Belgrade) **(Prev. rep. Yugoslav-Soviet Talks, 14265 A.)**

E. INDIA. — New Ministry of Iron and Steel.

A new Ministry—the Ministry of Iron and Steel—was set up in India by a Presidential Order of May 29, and came into being on June 15. It was announced that the new Ministry would be in charge of the Government's industrial undertakings for the production of iron and steel and of Government-owned foundries; that Mr. Krishnamachari, the Minister for Commerce and Industry, would be in charge of the new Ministry, whilst retaining his present portfolio; and that a Cabinet committee on heavy industry would be set up to ensure close co-ordination in heavy industry at all levels in the public sector.

Iron and steel projects in the public sector are at present the Rourkela steel project in Orissa and the Bhilai steel project in Madhya Pradesh; the Rourkela steelworks are being erected with German assistance, and the Bhilai works in co-operation with the Soviet Union The only Government-owned foundry is at Nahan, in Himachal Pradesh

The Presidential Order of May 29 also transferred the control of village industries and handicrafts from the Ministry of Commerce and Industry to the Ministry of Production.
(Indian High Commissioner's Office, London) **(Prev. rep. Cabinet, 13987 D; Steel Industry, 14103 A.)**

F. UNITED KINGDOM. — Gold and Dollar Reserves in June. - Fall of $6,000,000.

The sterling area had a gold and dollar deficit in June of $6,000,000 after taking account of (*a*) the receipt of $10,000,000 in U.S. defence aid, (*b*) the receipt of $12,000,000 in gold or dollars from the E.P.U., representing that part of the May settlement which was settled in gold or dollars, and (*c*) the payment of $2,000,000 under bilateral settlements with creditors of the E.P.U. As a result, the sterling area's gold and dollar reserves fell to $2,680,000,000 on June 30.

Provisional figures for the E.P.U. June settlement showed that the U.K. had a deficit of $19,600,000 (£7,000,000), which would be settled in July half in gold or dollars and half by an increase in the U.K. debt to the Union.
(Treasury Press Office) **(Prev. rep. 14245 A.)**

G. PERU. — Restoration of Death Penalty.

The death penalty, which had been abolished in Peru several years ago, was reintroduced on June 17 as the maximum penalty for kidnapping and murder. Public demands for the return of the death penalty had followed a number of kidnappings and murders involving children in recent years.
(New York Times)

H. RHODESIA AND NYASALAND FEDERATION. — Broadcasting Inquiry Commission.

A commission appointed to inquire into broadcasting in the Federation of Rhodesia and Nyasaland recommended on June 9 that a statutory corporation should be established to take charge of broadcasting throughout the Federation as from July 1, 1956.—(Federal Information Dept., Salisbury)

A. UNITED KINGDOM. — Committee on Crown Lands. - Report and Recommendations.

The report was published on June 30 of the committee set up in October, 1954, under Sir Trustram Eve to examine the organization for the administration of Crown Lands, and to report whether any changes should be made. The committee recommended that Crown Lands should be renamed the Crown Estate, and that the present Commissioners of Crown Lands should be replaced by a board of trustees, subject to public control but possessing a considerable measure of independence. A summary of the committee's report and recommendations is given below.

Board of Trustees. The committee pointed out that the Crown Estate was one of the largest, most varied and most valuable holdings of landed property in Great Britain, with gross annual revenue at present amounting to £2,500,000 and net revenue to £1,000,000. Total assets were probably worth at least £50,000,000, but no recent valuation had been made It included nearly 200,000 acres of land in England (outside London), 106,000 acres in Scotland, and about 78,000 acres in Wales and Monmouthshire. In London it included about 930 buildings let on building leases and about 1,730 buildings let at rack rents, the properties being mainly in Regent Street (the Estate's most valuable holding, with annual rents of over £500,000), New Oxford Street, Piccadilly, Pall Mall, Trafalgar Square, Whitehall, the Strand, Regent's Park, Kensington Square, Kensington Palace Gardens, Millbank, and Victoria Park The Estate also held gilt-edged securities with a market value (on March 31, 1955) of £2,264,531.

At the present time few individuals, however experienced and able, could adequately oversee such large and diverse holdings. For a task of this magnitude a team of experts had become a necessity, with a defined policy and the power to take decisions within the time—often only fleeting—that was available for successful investment. A board of management was therefore required which would meet regularly and take decisions as a board, and the committee accordingly recommended the setting-up of a new statutory board of trustees to be known as the "Crown Estate Trustees."

The relations of the board with the Sovereign as owner of the estate, and with the immediate advisers of the Sovereign, would naturally remain close and not on a formal basis, and the committee expected that one of the principal duties of the board's chairman would be to seek the Sovereign's consent on such matters as the more important capital transactions and the administration of the Windsor estate The board should be a public authority (though not a Government department in the sense of an organ of executive government), with powers to ensure the possibility of control at least over policy and major matters of management A specified Minister of the Crown should have power to give directions (whether general or specific) to the board, the Treasury should have a power of control over staffing and expenditure; the administrative head of the office should be accounting officer for the board's accounts and should appear before the Public Accounts Committee; the Comptroller and Auditor General should audit the accounts; and the board should be required to submit an annual report and accounts to Parliament. The committee recommended, however, that "the board should be more, not less, independent than the present commissioners and that they should be given defined powers and duties as trustees and allowed to work them out with the minimum of direction and control."

Composition of Board. The committee proposed that the board should consist of a chairman and 4 to 7 other members appointed by Royal Warrant, and that there should be power to pay the chairman and members Most of the members should be part-time and should be selected on a broad basis, paying attention both to variety of experience and to the geographical situation of the estates. There should be a power, but not an obligation, to appoint a deputy chairman and one or more full-time members A full-time administrator from within the Civil Service should be appointed initially as deputy chairman, administrative head, and accounting officer, whilst two of the part-time members of the first board should be professionally qualified, one on urban and the other on agricultural land management.

The Responsible Minister. The committee felt that the Minister (or Ministers) to be responsible for the board to Parliament ought not to be any Minister with a special interest, as Minister, in the use or control of land. If this were accepted it would exclude any Minister of Agriculture, Works, Housing, or Town and Country Planning, but would not necessarily exclude the Secretary of State for Scotland, as "Scotland's Minister." The choice would appear to lie between the Lord Chancellor, the Chancellor of the Exchequer, the Home Secretary, and a non-departmental Minister.

Revision of Crown Lands Acts. In order to give full effect to their recommendations the committee thought that there would have to be a considerable revision of the Crown Lands Acts, 1829-1943, and that the Acts should be consolidated.

Coming into Force of Recommendations. The proposed changes should be brought into effect in three stages: (1) a chairman-designate and deputy chairman-designate should be appointed as Commissioners of Crown Lands by reviving the post of Commissioner which had been vacant since 1912. These two appointments would be an immediate stop-gap to enable urgent work to be undertaken before the creation of the board. (2) A short Act should be passed to set up the board, which should then be left to operate temporarily within the present statutory framework. This Act should be passed "at a very early date" because there had already been a period of uncertainty, which was bad for the estate and for the office (3) The board should report on the Crown Lands Acts so that further legislation might be introduced at the earliest convenient date to revise and consolidate the Acts.

Sir Anthony Eden announced on June 30 that the Government had decided to accept the committee's recommendation that a board of trustees should be set up to manage the Crown Estate. This reorganization could not be carried fully into effect without legislation, but the Government hoped to take certain preliminary steps, and in the meantime would examine the other recommendations, some of which would also require legislation.

It was also announced on June 30 from 10, Downing Street, that the Queen had approved the appointment of Mr. R. M. J. Harris as Permanent Commissioner of Crown Lands in succession to Sir Osmund Cleverly. Mr. Harris (42), an Under-Secretary in the Cabinet Office for the past three years, formerly served in the India Office and at the Treasury.—(Cmd. 9483 - Times)

(Prev. rep. 13950 B.)

B. EASTERN EUROPE. — Price Reductions in Bulgaria, Czechoslovakia, Poland, and Rumania.

Four East European Communist countries announced consumer price reductions in March and April.

Bulgaria. Price reductions were ordered on April 22 for a number of foodstuffs and consumer goods, including reductions in the price of meat by 10-15 per cent; of fruit by 18-23 per cent, of cotton materials by 10-20 per cent; of woollen materials and leather footwear by 10-30 per cent; and of nylon stockings by 30 per cent.

Czechoslovakia. The fourth price reduction since the currency reform of June, 1953, was announced in Prague on March 30 It affected 1,600 items, largely consumer goods, including shoes (reduced by 3.7-20 per cent), soap (by 6 8-17 8 per cent), automatic kitchen utensils (25 per cent), etc. The announcement claimed that the reductions would result in an annual saving to the population of 1,300,000,000 Czechoslovak crowns

Poland. Price reductions were ordered on April 22 for many commodities and services, including oils and fats (by 2.5-10 per cent); rice (20 per cent); jams (15 per cent); fish (5 per cent); fruit wines (6 per cent); cigarettes (4.75-6.25 per cent); milk (8 per cent), butter (3 6-4 per cent); cream (7 per cent); coal and coke (10 per cent); woollen fabrics (6-25 per cent); cotton fabrics (5-15 per cent), silk fabrics (10-20 per cent); woollen garments (3-14 per cent), cotton clothing and underwear (3-10 per cent), silk garments and underwear (12-25 per cent), footwear (5-18 per cent); and fancy goods (10-25 per cent).

Rumania. Price reductions on a large range of foodstuffs, clothing, and other consumer goods were introduced on April 22. Varying from 5 to 30 per cent, they included woollen ready-made clothes (up to 30 per cent); footwear (up to 12 per cent); hats; leather goods; furniture; some household utensils (up to 10 per cent); domestic electrical appliances, watches; prams; school materials; toys (up to 15 per cent); and cosmetics. The chief foodstuffs affected were macaroni (up to 22 per cent) and tinned foods (up to 25 per cent). The price of kerosene was reduced by 7.7 per cent, and that of cinema and theatre tickets by 12 and 10 per cent respectively.

The announcement said that the price reductions—introduced four months after the abolition of rationing—had been made possible by the growth of industrial and agricultural production.

Although the Soviet Government had announced price reductions every year since 1947 (the announcement having usually been made on April 1 of each year), no such reductions have so far been announced in the U.S.S.R. for the present year. (Polish Embassy, London - Agerpres, Bucharest - Le Monde, Paris - Times - Manchester Guardian) **(Prev. rep. Poland, 12770 A; Czechoslovakia, 13156 A; 13040 A; Hungary, 13296 A; Rumania, 14002 C; U.S.S.R., 12857 C.)**

C. JORDAN. — Marriage of King Hussein.

King Hussein of Jordan (20) was married in Amman on April 19 to Princess Dina (22), the daughter of Prince Abd-el-Hamid Aoun of Saudi Arabia. The ceremony took place in the presence of King Faisal of Iraq, the Crown Prince Abdul Ilah of Iraq, and members of the Jordanian and Saudi Arabian royal families.

Queen Dina, who was born in Cairo, took an honours degree in Arts at Girton College, Cambridge, and subsequently became a lecturer in English literature in the University of Cairo. She met King Hussein in England in 1952, when he was at Harrow.

King Hussein and Queen Dina visited England from June 16-23 at the invitation of H.M. Government. Prior to his marriage the King had paid State visits to Egypt (Feb. 21-26) and Pakistan (March 5-13) (Times - Daily Telegraph)

D. HUNGARY. — Ratification of Warsaw Treaty.

The Hungarian National Assembly ratified on May 25 the eight-nation treaty concluded in Warsaw on May 13.
(Hungarian News and Information Service, Budapest)

(Prev. rep. 14276 B.)

A. FRANCE. — Senatorial and Departmental Elections.

Elections were held on June 19 in Metropolitan France, Algeria, and the overseas *départements* and territories for 153 of the 320 seats in the Council of the Republic, or almost one-half the membership of that body. Although the terms of 160 senators expired in June (senators are elected for six-year terms, one-half retiring every three years), only 153 seats were filled on June 19, leaving seven seats to be filled at subsequent elections. Of these 153 seats, 123 were in Metropolitan France, five in Algeria, four in the French Sudan, three each in the Ivory Coast and the French Cameroons, two each in Martinique, Réunion, Dahomey, French Guinea, Middle Congo, and Chad, and one each in Mauretania, New Caledonia, and the Comoro Islands.

The elections in Metropolitan France were confined to those *départements* beginning with the letters A to M inclusive—i.e., Ain, Aisne, Allier, Basses-Alpes, Hautes-Alpes, Alpes-Maritimes, Ardèche, Ardennes, Ariège, Aube, Aude, Aveyron, Belfort, Bouches-du-Rhône, Calvados, Charente, Charente-Maritime, Cantal, Cher, Corrèze, Corsica, Côte-d'Or, Côtes-du-Nord, Creuse, Dordogne, Doubs, Drôme, Eure, Eure-et-Loir, Finisterre, Gard, Haute-Garonne, Gers, Gironde, Hérault, Ille-et-Vilaine, Indre, Indre-et-Loire, Isère, Jura, Landes, Loire, Haute-Loire, Loire-Inférieure, Loiret, Loir-et-Cher, Lot, Lot-et-Garonne, Lozère, Maine-et-Loire, Manche, Marne, Haute-Marne, and Mayenne. They therefore excluded the Paris area and the industrial regions of northern and north-eastern France.

The elections were indirect, the senators being returned by electoral colleges both in Metropolitan France and in Algeria and the overseas territories. In Metropolitan France the electoral college in each *département* consisted of the deputies for that *département*, the *conseillers-généraux* (members of the departmental *Conseil-Général*, roughly equivalent to a county council), and delegates elected by members of the municipal councils in the *département*. A system of proportional representation was used in constituencies returning four or more members to the Council of the Republic, whilst in other constituencies the voting was for individual candidates, with two ballots (held on the same day) in cases where the first failed to produce a clear majority.

The 123 seats contested in Metropolitan France resulted in the election of 41 senators belonging to right-wing parties (Independent Republicans, etc.), 32 Radicals, 32 Socialists, nine Gaullists, seven M.R.P. senators, one Communist, and one *non-inscrit* (unaffiliated). Compared with the former political representation of these seats, gains were made by the Radicals (three seats), the Socialists (one seat), the M.R.P. (one seat), and *non-inscrits* (one seat), whilst losses were suffered by the Gaullists (four seats), the right-wing parties (one seat), and the Communists (one seat, in the Bouches-du-Rhône *département*). The principal result of the elections, therefore, was a slight improvement in the representation of the centre parties, notably the Radicals, and a setback for the Gaullists.

As a result of the elections, the political composition of the full Council of the Republic (i.e. the newly-elected senators and those whose terms have not expired) will be as follows: Right-wing parties (predominantly Independent Republicans), 83; *Rassemblement des Gauches Républicains* (predominantly Radicals), 74; Socialists, 56; Social Republicans (Gaullists), 36; M.R.P., 24; Overseas Independents, 14; Communists, 14; *Rassemblement d'outre-mer* (an overseas group affiliated to the Gaullists), 8; *non-inscrits*, 10.

Owing to the cession to India of the former French Settlements (Pondicherry, etc.), the present membership of the Council of the Republic is 319 and not, as formerly, 320. Prior to the cession, the *Etablissements français dans l'Inde* had been represented by one senator.

Fifty former senators were not re-elected, of whom 18 did not seek re-election, five withdrew after the first ballot (in cases where an absolute majority was not obtained on the first count), and 27 were defeated, among them two former Ministers—M. Paul Bastid (Radical) in Cantal, and M. Lamoureux (Radical) in Allier. Among prominent senators re-elected were M. Gaston Monnerville (Radical, Lot), the President of the Council of the Republic, and M. Roger Duchet (Ind. Republican, Côte-d'Or), the Minister of Reconstruction. Among newly-elected senators were three members of the Chamber of Deputies—M. Yvon Delbos, a former Minister (Radical, Dordogne), M. Béchard (Socialist, Gard), and M. Verneuil (Radical, Charente-Maritime); they may opt to sit either in the Council of the Republic or in the Chamber.

Departmental Elections.

Departmental elections were held on April 17 and 24 in Metropolitan France (except in part of the *département* of Hérault), Algeria, and the overseas *départements* to elect one-half of the membership of *Conseils-Généraux* (departmental councils), and also to fill vacancies caused by deaths or resignations. Owing to the collective resignation of 250 mayors of wine-growing communes in Hérault, and the subsequent closing of most of the *mairies* (see below), elections were possible in only five of the department's 18 cantons on April 17 and 24. The remaining 13 cantons in Hérault voted on May 15 and 22.

The following table (based on official figures by the Ministry of the Interior) covers all the 1,511 cantons in Metropolitan France in which polling took place, and includes the postponed elections in the Hérault department:

		*Net gains (+) or losses (−)
Independent Republicans and other right-wing parties	519	+22
Radicals and R.G.R.	396	+10
Socialists	287	+11
Popular Republicans (M.R.P.)	106	+12
Social Republicans (Gaullists)	72	−79
Communists	44	+ 7
Other left-wing groups	87	+19

* The discrepancy between the total net gains and net losses is accounted for by the fact that there were two additional seats at Nice.

As shown in the table, gains were made by all the parties except the Gaullists, who lost 79 seats. In a number of cantons local electoral alliances were concluded between the Socialists and the Communists, despite warnings by the national executive of the Socialist Party that such alliances would not be officially recognized.

The Prime Minister (M. Faure), six other members of the Government (M. Pinay, M. Bourgès-Maunoury, General Corniglion-Molinier, M. Crouzier, M. Médecin, and M. Laforest), and many parliamentarians were re-elected as *conseillers-généraux*. Voting was in general low throughout the country.

Prior to the elections, the mayors of 250 wine-growing communes in Hérault (one of the principal centres of viticulture in France) had tendered their collective resignation on April 10 as a protest against the Government's failure—as was alleged—to maintain the price of wine. As a further protest against the Government's policy, most of the *mairies* in Hérault were closed on April 17 and 24, and, as stated above, the elections in that *département* could not be completed until May. The Government's anti-alcoholism policy, initiated by M. Mendès-France (see 14063 A) and continued by M. Faure, had given rise to much concern in Hérault, notably because of the lower subsidies paid to local wine-growers. Other factors making for discontent among the Hérault wine-growers were the steadily increasing production of Algerian wines at the expense of French brands, and the growth of viticulture in other parts of France which were formerly negligible as wine-producing areas. Whereas Hérault formerly produced more than half the red wine consumed in France, it produces today only about one-third.—(Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. Senatorial Elections, 12249 A; Departmental Elections, 11797 A; Municipal Elections, 12923 A.)**

B. UNITED KINGDOM. — Dorneywood House to be used by Secretary for Commonwealth Relations.

A statement from 10, Downing Street, on June 29 announced that the Prime Minister had placed Dorneywood House (near Burnham Beeches, Bucks.) at the disposal of the Earl of Home, Secretary of State for Commonwealth Relations; that Lord Home (whose residence is in Scotland) would live there during parliamentary sessions and would use it to entertain visitors from the Commonwealth; and that he would make arrangements whereby the Foreign Secretary and other Ministers could entertain guests from overseas at Dorneywood from time to time.

Dorneywood, a 16th-century house, was presented to the nation by the late Lord Courtauld-Thomson in 1943 to be used by a senior Cabinet member as an official residence, and for the purpose of providing a suitable house for entertaining overseas visitors in typical English country surroundings near London. It had been used by Sir Anthony Eden on several occasions when he was Foreign Secretary, but the new Foreign Secretary, Mr. Harold Macmillan, already has his own country house in Sussex and seemed unlikely to be able to make full use of Dorneywood as an official residence.
(Times - Daily Telegraph) **(Prev. rep. Dorneywood, 5722 B.)**

C. PHILIPPINES. — Military Aid from U.S.A.

An agreement for U.S. aid in equipping and training a new Philippine Army division was signed in Manila on April 27. Based on the U.S.-Philippine mutual defence pact, it stipulated that the U.S.A. would make a grant-in-aid of $9,500,000, to be used for constructing a cantonment area for the training of the new division and for improving an air base in Bulacan province, north of Manila.—(New York Times) **(11715 C.)**

A. FRANCE.—Trials for Collaborationist Activities and War Crimes. - Death of Marcel Déat and General Bridoux.

A number of trials of Frenchmen accused of collaboration with the Germans during the war, and of Germans accused of war crimes, took place in France in recent months and are described below under cross-headings.

Trial of M. Bonnefoy. M. René Bonnefoy, State Secretary for Information in the Vichy Government, who had been sentenced to death *in absentia* in 1946 but had returned to France in 1954, was retried by the French High Court of Justice on March 14-15 and sentenced to five years' "national degradation" (loss of civic rights). Whilst the prosecution maintained that he had been a close collaborator of Laval, M. Bonnefoy—though not denying "friendly relations" with Laval—claimed that he had never been more than a subordinate and had fulfilled his duties in a "purely technical manner." The prosecution, however, produced a number of articles written by the defendant for the *Moniteur du Puy-de-Dôme* in which M. Bonnefoy had expressed fervent hopes for a German victory and in which he had bitterly attacked the French Resistance movement, the Free French forces and their leaders, Generals de Gaulle and Giraud.

Trial of M. Rochat. M. Charles Rochat, formerly Secretary-General for Foreign Affairs in the Vichy Government, who had been sentenced to death *in absentia* in 1946, but had returned to France some time ago, was tried a second time before the High Court in Paris on March 16-17. The prosecution maintained that M. Rochat had acted as Laval's spokesman and that, in particular, he had sent a telegram to Hitler proposing that France should enter the war as Germany's ally. M. Rochat stated in his defence that in 1940, as the highest official in the Foreign Ministry, he had considered it his duty to remain at his post in order to defend French interests. He claimed that he had protested when Laval proposed to declare publicly that he hoped for a German victory, and denied all knowledge of the telegram to Hitler. Evidence was, however, given by M. Lacoste, a Foreign Ministry official, that M Rochat had handed him the telegram for transmission General Weygand, on the other hand, testified that M. Rochat had drafted and broadcast the telegram of protest against the German occupation of southern France in November 1942, whilst M. Massigh (now Secretary-General of the Foreign Ministry), M Chauvel (now Ambassador in London), and M. Fouques-Duparc (now Ambassador in Rome) all paid tribute to his services to the Resistance movement. The Court, having found M. Rochat guilty, sentenced him on March 17 to five years' "national degradation," but ordered that the sentence should not be carried out in view of the extenuating circumstances revealed in the evidence.

Trial of Admiral Bléhaut. Admiral Henri Bléhaut, State Secretary for the Navy and the Colonies in the Vichy Government, who in 1948 had been sentenced *in absentia* to 10 years' imprisonment and "national degradation" for life, was acquitted by the High Court on March 18 of the charge of activities harmful to national defence. Admiral Bléhaut (whose three sons served with the Free French forces) said in his defence that he had exercised no influence on policy, that he had tried to save for France as much of the Navy as he could (a fact which was supported by the evidence), and that he had never handed over any warships to the Germans. He admitted that he had signed laws for the repression of the Resistance movement, but claimed that Laval himself had stated that there was no intention of carrying them out.

Other Collaborationist Trials. Adrien Solomon, a French citizen of Rumanian origin, was found guilty by the military tribunal at Metz on Jan 29 of acting as a spy on the Resistance movement, and sentenced to hard labour for life. His accomplice, Louis Riès, was sentenced to five years' imprisonment, the sentence being remitted.

M. Marius Besson, formerly headmaster of the *lycée* at Angers, who had been sentenced to death *in absentia* in 1946, and who had surrendered to the police in 1953, was acquitted by the Paris military tribunal on Feb. 11 of a charge of intelligence with the enemy. The prosecution alleged that in 1943 he had shown to the Germans a letter from the headmistress of a girls' school in Angers and that, in consequence, six members of the staff of the school had been deported to the Ravensbrück concentration camp, where three of them had died. M Besson, whilst admitting that he had been a supporter of Marshal Pétain, denied that he had shown the Germans the letter, and suggested that they had found a copy of it while searching the headmistress's house.

René Besson, a former inspector of police, was condemned to death for treason by the military tribunal at Rennes on March 17, and his wife, Suzanne Besson, was sentenced to five years' imprisonment. Besson had been sentenced in 1938 to 20 years' hard labour for spying for the Germans, and after being released in 1940 had acted as a spy on the Resistance movement. The prosecution alleged that he had been responsible for the arrest of 500 people, 50 of whom had subsequently been executed.

Raoul Fouchet, a former member of the "Gestapo of the Rue de la Pompe" (see 14042 A), was sentenced to 20 years' imprisonment by the military tribunal at Lyons on May 5. He had previously been condemned to death *in absentia* in 1952, the conviction having been quashed on technical grounds.

The Dijon Gestapo Trial. The trial of three former members of the Dijon Gestapo before the military tribunal at Lyons concluded on Feb. 23, when Ludwig Kramer and Xavier Pfeiffer were sentenced to 20 years' hard labour and Wolfgang Feller to five years' hard labour. Witnesses gave evidence that the prisoners had been guilty of executing hostages and of deportations to concentration camps.

The Marseilles Gestapo Trial. The second trial of seven members of the Marseilles Gestapo took place before the military tribunal at Lyons on March 14-31. The defendants had previously been tried in January, 1954, by the Marseilles military tribunal, which had sentenced Rudolf Mukler (head of the Marseilles Gestapo) and Theodor Schorer (his second-in-command) to death, and the others to hard labour for life, but the sentences were quashed on technical grounds in the following July (see 14042 A). The Lyons court sentenced Schorer to hard labour for life, Mukler to 20 years' imprisonment, and the other defendants to terms of imprisonment ranging from eight to 15 years.

The Struthof Trial. The second trial of five former S.S. guards at the Struthof concentration camp, who had been condemned to death by the Metz military tribunal in July, 1954, but whose sentences had subsequently been quashed on technical grounds (see 14042 A), opened before the military tribunal in Paris on April 28 Three of the prisoners (Albert Fuchs, Wolfgang Seuss, and Franz Ehrmanntraut) were again sentenced to death, and the others (Herbert Oehler and Robert Nitsch) to hard labour for life and 15 years' imprisonment respectively

Appeals by General Karl Oberg, the former commandant of the German police forces in France, and his principal assistant, Colonel Helmuth Knochen, against the death sentences passed on them in October, 1954, were dismissed on Feb 10 by the *Cour de Cassation* (the Supreme Appeal Court). The sentence on Wilhelm Korf, the Gestapo sergeant condemned to death in December, 1953, for war crimes, was commuted by President Coty on April 8 to hard labour for life.

In reply to inquiries by the French Government, the Italian police confirmed on March 30 that Marcel Déat, the notorious wartime collaborationist, had died in Turin on Jan. 5, 1955.

Marcel Déat (60) entered the Chamber of Deputies in 1926 as a Socialist, but left the Socialist Party in 1933 to form the "Socialist Party of France," and served as Air Minister in M. Sarraut's Cabinet from January to June, 1936. A strong supporter of "appeasement" before the war, he conducted active pro-Nazi propaganda in the Paris newspaper *l'Oeuvre* and on the radio from 1940 onwards, formed the collaborationist *Rassemblement National Populaire* in 1941, became one of the closest supporters of Laval, and in 1944 entered the Vichy Government as Minister of Labour, in which capacity he took an active part in the recruitment and deportation of Frenchmen for forced labour service in Germany. On the liberation of France he escaped to Germany, where he continued his propaganda activities, and at the end of the war fled to Italy. He was condemned to death *in absentia* by the Paris High Court on June 19, 1945, but all attempts to discover his whereabours proved unsuccessful. After leading a wandering life for two years he settled in Turin in 1947, supporting himself by teaching under an assumed name.

General Eugène Bridoux (67), formerly War Minister in the Vichy Government, died in Madrid on June 6. Arrested after the war as a collaborator, he escaped from a Paris military hospital in 1947 and took refuge in Spain, being sentenced to death *in absentia* in December, 1948.—(Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. Trials of Collaborationists, 12395 C; War Crimes Trials, 14042 A.)**

B. PAKISTAN. — Adherence to Turkish-Iraqi Pact.

The Prime Minister of Pakistan, Mr. Mohammed Ali, announced on July 1 that Pakistan had decided to accede to the Turkish-Iraqi defence pact. An invitation to Pakistan to adhere to the pact had been sent by the Turkish and Iraqi Governments on April 4, the date on which the United Kingdom joined the pact.

Mr. Mohammed Ali explained that the decision had been taken "in pursuance of Pakistan's policy of strengthening herself and of promoting international peace through co-operation with like-minded nations."

Sir Anthony Eden, in a message to Mr. Mohammed Ali, expressed the British Government's pleasure "that the United Kingdom and Pakistan will now be partners in this pact," and its confidence that Pakistan's accession would contribute to the stability and security of the Middle East. The Pakistan Government's decision was also warmly welcomed in Ankara and Baghdad.

Prior to Pakistan's adherence to the Turkish-Iraqi pact, discussions had been held in Ankara on June 28-29 between M. Menderes, the Turkish Prime Minister, General Nuri es-Said, the Iraqi Prime Minister, and General Mohammad Ayub Khan, the Pakistani Defence Minister. Pakistan was already allied with Turkey through the treaty of political, economic, defence, and cultural co-operation of April 2, 1954, which came into force on June 12, 1954.—(Pakistan High Commissioner's Office, London - Turkish Embassy, London) **(Prev. rep. Turkish-Iraqi Pact, 14137 A; Turkish-Pakistani Treaty, 13620 A.)**

C. AVIATION. — Ottawa-London Record Flight.

An R.A.F. Canberra jet bomber, *Aries IV*, flew from Ottawa to London—a distance of 3,330 miles—on June 28 in the record time of 6 hours 42 minutes, at a speed of 496.8 m.p.h. The machine was piloted by Squadron-Leader I. G. Broom, D.S.O., D.F.C.—(Times) **(Prev. rep. Record Flights, 13708 C.)**

A. UNITED STATES. — Three-year Extension of Reciprocal Trade Agreements Act. - Presidential Authority to reduce Tariffs. - U.S. Tariff Concessions to Switzerland.

A Bill extending the Reciprocal Trade Agreements Act for three years until June 30, 1958, and permitting the President to reduce tariffs by 5 per cent in each of the next three years, was signed by President Eisenhower on June 14. The Bill had been strongly opposed by protectionist elements in the Senate, who succeeded in inserting a number of restrictive amendments. These amendments protected the textile and chemical industries against heavy tariff cuts in trade with Japan; required the Tariff Commission to report directly to Congress each year on the operations of the trade agreement programme, instead of presenting its reports through the President as previously; authorized the President to limit foreign imports when he found they threatened national security; and widened the "escape clause" provisions of the Act.

The Bill was first passed by the House of Representatives on Feb 18 (by 295 votes to 110) after a motion by Representative Daniel A. Reed (Rep.) to send it back to committee with directions to limit sharply the President's tariff-cutting powers had been defeated by 206 votes to 199. On the previous day the House had approved (by 193 votes to 192) a rule excluding any restrictive amendments during its detailed examination of the Bill.

The Senate Finance Committee, after lengthy consideration, approved a Bill on April 26 extending the Reciprocal Trade Act for three years but incorporating the above-mentioned restrictive amendments. The committee's vote was taken following an appeal by President Eisenhower for the speedy passage of the Bill without any crippling amendments. The President (whose appeal had been made on the previous day) declared: "To abandon our programme for the gradual reduction of unjustifiable trade barriers, to vitiate the Administration's proposals by crippling amendments, would strike a severe blow at the co-operative efforts of the free nations to build up their economic and military defences. It could result in increasing discrimination against our exports. It could lead to widespread trade restrictions and a sharp contraction in world trade. It could mean a retreat to economic nationalism and isolationism." Evidence in favour of the Bill had earlier been given before the committee by Mr. Dulles, Mr. Humphreys and Mr. Wilson, the Secretaries of State, the Treasury, and Defence respectively.

The Bill was passed by the full Senate (by 75 votes to 13) on May 4, following a White House announcement that the Administration would accept the Bill as amended by the Senate Finance Committee. Before the final vote, the Senate rejected a number of amendments designed to limit the President's discretionary powers or to give protection to individual industries. These included the following:

(1) to transfer the power to fix tariffs from the President to the Tariff Commission, which would be directed to fix them so as to compensate for differences in cost between domestic and foreign articles (moved by Senator Malone, Rep.);

(2) to authorize the Government to help workers and industries adversely affected by imports admitted under reciprocal trade agreements (Senators Humphrey and Kennedy, Dem.);

(3) to eliminate the "peril point" provision from the Reciprocal Trade Agreements Act (Senator Douglas, Dem.),

(4) to limit imports of foreign oil to 10 per cent of domestic consumption (Senator Neely, Dem.),

(5) to require all trade agreements to be submitted to Congress for approval (Senator O'Mahoney, Dem.);

(6) to permit Congress to veto any trade agreements made by the President (Senator O'Mahoney),

(7) to limit the extension of the Reciprocal Trade Act to one year (Senator Malone);

(8) to make the President's treaty-making power applicable to the Western Hemisphere only (Senator Malone).

On June 27 a Senate-House conference committee agreed on the Bill as amended by the Senate, and it was finally passed by the House on June 14 (by 347 votes to 54) and by the Senate on June 15 (by voice vote).

It was officially announced in Washington and Berne on June 10 that U.S. - Swiss discussions held in Geneva had resulted in the signing on June 8 of an agreeemnt on U.S. tariff reductions on other Swiss imports in compensation for the increase in the U.S. tariff on imported Swiss watches.

The agreement provided for U.S. tariff cuts (ranging from 12.5 per cent to 50 per cent and averaging 44 per cent) affecting 18 items, notably coal-tar dyes, certain pharmaceutical products, straw plait for straw hats, embroidery, lace curtains, handkerchiefs, knit underwear, surveying instruments, electrical and clockwork measuring instruments (excluding timepieces), and ciné-cameras. The Swiss announcement stressed, however, that U.S. imports of these items from Switzerland in recent years had averaged 40 to 50 million Swiss francs, whereas U.S. imports of Swiss watches had amounted to an average of 255 million francs during the five years 1950 to 1954.

A clause laid down that in the event of the U.S. Government withdrawing its tariff increases for Swiss watches either in whole or in part, both Governments would discuss the further application of the new supplementary agreement, thus enabling Switzerland to retain the benefit of the above-mentioned U.S. concessions through other concessions on her part.

Total U.S. imports from Switzerland in 1954 were valued at $146,000,000, of which $126,000,000 was dutiable and $20,000,000 duty-free. U.S. imports of the items on which concessions have now been made amounted to $10,000,000 in 1954, of which Switzerland accounted for some $8,100,000. B. MOUNTAINEERING.—British Ascent of Kanchenjunga. - French Ascent of Makalu.

Kanchenjunga (28,146 ft.), the third highest peak in the world and the highest yet unclimbed, was successfully climbed in May by a British expedition led by Dr. Charles Evans, a member of the British Everest Expedition of 1953. The Kanchenjunga expedition was originally intended as a reconnaissance only, but was converted into an attempt on the summit in view of its success in finding a suitable route up the mountain and because of the favourable weather conditions. Two groups of climbers made the final assault—Mr. G. C. Band and Mr. Joe Brown on May 25, and Mr. N. Hardie and Captain R. A. Streather on May 26. In deference to the religious feelings of the Sikkimese, who believe that their gods live on the summit of Kanchenjunga, the climbers stopped some five feet short of the summit. The other members of the expedition were Dr. John Clegg, Mr. J. Jackson, Mr. T. D. MacKinnon, and Mr. J. N. Mather.

Sir John Hunt, leader of the 1953 Everest expedition, had stated in a message to *The Times* on March 4: "There is no doubt that those who first climb Kanchenjunga will achieve the greatest feat in mountaineering, for it is a mountain which combines in its defences not only the severe handicaps of wind, weather, and a very high altitude, but technical climbing problems and objective dangers of an order even higher than those encountered on Everest."

Makalu (27,824 ft.), the fifth highest peak in the world, was successfully climbed for the first time on May 15, 16, and 17 by three separate parties of a French expedition led by M. Jean Franco. All eight members of the expedition, together with a number of Sherpas, reached the summit. The other members of the expedition were MM. Jean Bouvier, Jean Couzy, Pierre Leroux, Guido Magnone, and Lionel Terray, the Abbé Pierre Bordet, and Dr. Jean Rivolier (medical adviser).

A number of other expeditions were made to the Himalayas during May and June, including a Swiss-German team which made an unsuccessful attempt on Dhaulagiri (26,795 ft.); a British expedition, led by Mr. Alfred Gregory, which climbed a number of peaks in the Melunste group near Everest; and a team from the Ladies' Scottish Climbing Club—the first all-women's expedition to the Himalayas—which climbed a number of peaks in the Jugul Himal.—(Times - Manchester Guardian - Le Monde, Paris - The Statesman, Calcutta)

C. UNITED KINGDOM. — Raw Cotton Commission. - Final Report and Accounts.

The final report and accounts of the Raw Cotton Commission, covering the year ended Aug. 31, 1954, and published on June 30, 1955, showed an operational profit of £3,777,918, compared with a loss of £22,416,433 in 1952-53. After adjustments (including the addition of various financial provisions previously made but no longer required), and the deduction of compensation to staff for loss of office, the Commission's aggregate deficit was reduced from £11,097,817 to £7,032,502.

The report stated that conditions during the year had been "reasonably good," and that the Commission's trading in raw cotton had resulted in a surplus of £4,330,542 (compared with one of £1,152,337 in 1952-53), notwithstanding the fact that spinners who had contracted out of trading with the Commission accounted for over half the total cotton consumption of the industry. The greater stability of cotton prices, as compared with 1952-53, had been reflected in the accounts of the Commission's cover department, which showed an operational surplus of £1,062,015, against a loss of £20,811,812 in 1952-53. Stocks of unsold cotton at Aug. 31, 1954, amounted to 185,774 bales, compared with 770,675 bales on Aug. 31, 1953. The report added that the Commission had bought only 23,620 bales in the seven-month period preceding the Commission's dissolution on Aug. 31, 1954.

Board of Trade advances to the Commission stood at £45,872,927 on Aug. 31, 1954, and the Commission's net assets at £38,840,425, compared with £73,965,641 and £62,867,824 respectively a year earlier.—(Manchester Guardian - Financial Times) **(Prev. rep. 1952-53 Report, 13622 D; Dissolution of Raw Cotton Commission, 13724 A.)**

A. SPAIN. — General Franco's Meeting with Don Juan. - Prince Juan Carlos to be educated in Spain. - General Franco on Restoration of the Monarchy.

Don Juan, the Pretender to the Spanish throne, had a nine-hour meeting with General Franco on Dec. 29, 1954, at an estate in Estremadura belonging to Count de Ruisenada, a prominent monarchist; two other leading monarchists, the Count de los Andes and the Count de Frontenar, were also present. Although the discussions were held in strict secrecy and no official statement was issued, it was understood that they dealt with the education of Prince Juan Carlos, the 16-year-old son of the Pretender, and with the whole question of the future of the Spanish monarchy.

Prince Juan Carlos, accompanied by the Duke de Torre, arrived in Madrid from Estoril (the Portuguese resort where the Pretender lives in exile) on Jan. 18, 1955, and was greeted at the station by several hundred royalists. It was stated that the prince would remain in the Spanish capital for six months, with the Duke de Torre as his tutor, preparatory to entering the Saragossa Military Academy.

General Franco gave two press interviews to the Falangist newspaper *Arriba*, on Jan. 23 and Feb. 27, in which he emphasized that the monarchy would eventually be restored under the Succession Law of 1947 (see 8551 A). At the same time, however, he stressed that the future Sovereign would be required to accept the present political structure of the Spanish State.

In the interview of Jan. 23 (given to the editor of *Arriba*), General Franco recalled that the Succession Law proclaimed Spain to be a kingdom; that it envisaged the restoration of the monarchy after his death, or in the event of his incapacity; and that it empowered him to nominate his successor. "Although I enjoy excellent health," he added, "the fact that I am 62 years of age suggests that everything possible should be done to ensure that the proposals in the Succession Law are implemented, and that there is no break in continuity." Asked whether "the principles of the national revolution" would be guaranteed in the event of the restoration of the monarchy, General Franco said that this would "definitely be the case." Whilst he declined to state whether the return of Prince Juan Carlos to Spain implied that the prince would be Spain's next Sovereign, General Franco said that it was "natural that we should be interested in seeing that the princes of the Spanish dynasty are prepared, although the time for formal recognition has not yet arrived."

In his second interview with *Arriba* (Feb. 27), General Franco defended the eventual restoration of the monarchy in Spain, but reiterated that it was an "indispensable premise" that his successor should be "completely identified with the national movement" (i.e. with the Falangist system) and should carry out the provisions of the Succession Law. Describing the Succession Law as "the keystone of our system," he emphasized that the Council of the Realm set up under that law would continue to wield executive power and would guarantee the continuation of the one-party system. [The Council of the Realm consists of representatives of the Roman Catholic Church, the armed forces, labour and professional organizations, the liberal professions, the Falangist Party, and the *Cortes*.] He added in this connexion: "We need to change the framework of the old monarchy for a new aristocracy of knowledge, military leadership, work, and service to the nation. We must do this to secure the social progress of the people, as the monarchy did in its best periods. We are all agreed that it is vital for us to preserve what we have forged for ourselves. The political and social essence of our national movement cannot be endangered."

Continuing, General Franco paid a tribute to the late King Alfonso XIII as a monarch gifted with "prudence and good sense," and said that one of the most important tasks for the future was to acquaint the youth of the nation with the merits of the monarchical system. [Leaders of the Falangist Party had on a number of occasions bitterly attacked the late King Alfonso XIII, whilst anti-monarchist demonstrations had been staged from time to time by members of the party, particularly its youthful members.] After recalling that King Alfonso had been called to the throne when only 16 years of age, General Franco said that the fall of the monarchy had not been due to any shortcomings in the Sovereign himself, but had been the result of "the crisis of a whole system"—the "inefficient liberal and parliamentary system" from which, he said, Spain had suffered for 150 years. "We must remember," he added, "that more than half the nation knows very little about the monarchical system, and that many people judge it by its last stages of decadence. This may justify the distrust felt for that institution by a great number of those who compose the younger generation. . . ."

In conclusion, General Franco made it clear that the restoration of the monarchy would imply the restoration of the Bourbon dynasty —i.e. of the former Royal house to which the late King Alfonso XIII belonged, and of which Don Juan is the present head—and not of the Carlist claimant. The latter is Prince Francis Xavier, brother of the ex-Empress Zita of Austria.

Don Juan—officially known in Spain as the Count of Barcelona—gave a press interview at Estoril on June 24 to the Madrid newspaper *A.B.C.* (the principal monarchist organ) in which he declared that the monarchy had always been in agreement with the ideals of the "nationalist movement." As regards his own position, he said that he considered himself the "repository of the rights inherited" from the late King Alfonso XIII, but at the same time referred to the "personal sacrifices" he had made—an apparent reference to his agreement that Prince Juan Carlos should be educated in Spain, and to the possibility that he himself might be passed over in the line of succession in favour of his son.

B. NORWAY. — State Visit by Queen Elizabeth II and the Duke of Edinburgh.

H.M. Queen Elizabeth II and the Duke of Edinburgh paid a three-day State visit to Oslo on June 24-26 at the invitation of King Haakon VII.

Her Majesty and the Duke, who sailed for Oslo in the royal yacht *Britannia*, were welcomed in the Norwegian capital by King Haakon, Crown Prince Olav and other members of the Norwegian Royal family, the Prime Minister of Norway (Hr. Gerhardsen), members of the Cabinet, and enthusiastic crowds numbering tens of thousands Shortly after their arrival the Queen and the Duke drove to Akershus Castle to lay wreaths on the memorial to 42 Norwegian patriots who were executed by the Germans during the occupation. From Akershus they drove to the new Oslo Town Hall (see 10745 B), where they were welcomed by the Mayor of Oslo, Hr. Bull, and later visited a cemetery to lay wreaths upon the graves of British and Canadian servicemen who fell in Norway during the war. In the evening her Majesty and the Duke attended a State banquet given in their honour by King Haakon at the Royal Palace.

On June 25 the Queen and the Duke visited the Folk Museum and the Ship Museum, which houses three Viking galleys discovered between 1867 and 1904, the *Fram* (the polar research vessel in which Dr. Nansen and Roald Amundsen visited the Arctic and Antarctic), and the Kon-Tiki raft, on which Thor Heyerdahl and five companions drifted 5,000 miles across the Pacific in 1948 from Peru to the South Sea Islands. Later in the day her Majesty and the Duke attended a garden party at the British Embassy given by the British Ambassador, the Canadian and Pakistani Ministers, and the Indian Chargé d'Affaires, while in the evening they visited the National Theatre to see a gala performance of *Peer Gynt*.

On June 26, a Sunday, the Queen and the Duke attended Divine Service at the British Church in Oslo (the Church of St. Edmund), and later drove to Skaugum, 20 miles from Oslo, to lunch with Crown Prince Olav at his country residence. Before leaving Oslo in the evening for Scotland, her Majesty and the Duke gave a dinner on board the *Britannia* for King Haakon and other members of the Norwegian Royal family.

Her Majesty and the Duke were accompanied during their visit by the Foreign Secretary, Mr. Harold Macmillan. While in Oslo, her Majesty conferred a knighthood on the British Ambassador, Mr. Peter Scarlett.—(Aftenposten, Oslo - Times) **(Prev. rep. King Haakon, U.K. Visit, 11615 A.)**

C. LITERATURE. — Book Selections for June.

Selected books published in Britain, the United States, and France are given below:

Great Britain. Broad, Lewis—"Sir Anthony Eden: The Chronicles of a Career." (Hutchinson, 15s.)

Cottrell, Leonard—"Life under the Pharaohs." (Evans, 16s.)

Craig, Sir John—"A History of Red Tape." (Macdonald and Evans, 18s.)

Debenham, Frank—"The Way to Ilala. David Livingstone's Pilgrimage." (Longmans, 25s.)

Fletcher, David Wilson—"The Children of Kanchenjunga." (Constable, 18s.)

Lee, Laurie—"A Rose for Winter: Travels in Andalusia." (Hogarth Press, 12s. 6d.)

MacCormick, J. M.—"Flag in the Wind." The Story of the National Movement in Scotland. (Victor Gollancz, 13s. 6d.)

"Man of Everest: The Autobiography of Tenzing." Told to James Ramsay Ullman. (Harrap, 18s.)

Mosley, Leonard—"Gideon goes to War." The Story of General Wingate. (Arthur Barker, 15s.)

Sheehy, Michael—"Divided We Stand: A Study of Partition." (Faber & Faber, 10s. 6d.)

Shinwell, Emanuel—"Conflict without Malice." An Autobiography. (Odhams, 21s.)

Wheare, K. C.—"Government by Committee: An Essay on the British Constitution." (Oxford University Press, 25s.)

Yourcenar, Marguerite—"Memoirs of Hadrian." Translated from the French (*Mémoires d'Hadrien*). (Secker & Warburg, 12s. 6d.)

United States. Dowey, Clifford—"The Land they Fought for." The Story of the South as the Confederacy, 1832-1865. (Doubleday, New York, $6.00.)

Hoffman, Calvin—"The Murder of the Man who was 'Shakespeare'." The Death of Christopher Marlowe. (Julian Messner, New York, $3.95.)

France. Massip, Renée—"La régente." (Gallimard, Paris, 540 francs.)

Salmon, André—"Souvenirs sans fin." (Gallimard, Paris, 950 francs.)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 14246 B.)**

JULY 9—16, 1955

A. UNITED NATIONS. — Tenth Anniversary Session.

The tenth anniversary of the founding of the United Nations was commemorated by a special U.N. session held on June 20-26 in San Francisco, where the Charter was signed in 1945. It was attended by representatives of all the 60 member-nations, nearly all of whom were represented by their Foreign Ministers; by the U.N. Secretary-General, Dr. Hammarskjold; by the President of the General Assembly (Dr. van Kleffens) and five former Assembly presidents (Mr. Lester Pearson, Dr. Luis Padilla Nervo, M. Nasrollah Entezam, General Carlos Romulo, and M. Paul-Henri Spaak); by President Eisenhower, who spoke at the opening session; and by Mr. Harry S. Truman, who was President of the United States when the U.N. first met in San Francisco in 1945, and who was specially invited to address the tenth anniversary session.

Speeches were made by President Eisenhower; by the Foreign Ministers or other representatives of the 60 member-nations; and by Dr. Hammarskjold, Dr. van Kleffens, and Mr. Truman. Extracts are given below from the speeches of President Eisenhower, the Foreign Ministers of Great Britain, the Soviet Union, France, and the United States (respectively Mr. Harold Macmillan, M. Molotov, M. Pinay, and Mr. Dulles), and Mr. Truman.

President Eisenhower, speaking at the opening session on June 20, stressed both the "victories" and "failures" of the U.N during its first ten years' existence, and added "But it is clear that without the United Nations, the failures would still have been written as failures into history And certainly, without this Organization, the victories could not have been achieved; instead, they might well have been recorded as human disasters. These, the world has been spared"

Turning to the situation at the present day, President Eisenhower said that the summer of 1954, like that of 1945 when the U.N was founded, was "another season of high hope for the world," and of determination to make every effort to secure a just and lasting peace "The heartfelt longings of countless millions for abundance, justice, and peace seem to be commanding everywhere a response from their governments These longings have strengthened the weak, encouraged the doubtful, heartened the tired, confirmed the believing Almost it seems that men, with souls restored, are with faith and courage resuming the march towards the greatest human goal."

Referring to the forthcoming Geneva conference of the Heads of Government of France, Britain, the Soviet Union, and the U.S A, the President said that he did not know whether the participants would "reach the initial decisions that will start dismantling the terrible apparatus of fear and mistrust erected since the end of World War II." He added, however. "The basis for success is simply put. it is that every individual at that meeting be loyal to the spirit of the United Nations and dedicated to the principles of its Charter." After a solemn pledge that the United States would strive to be "thus loyal, thus dedicated," he declared: "For us there is no alternative, because our devotion to the U.N. Charter is the outgrowth of a faith deeply rooted in our cultural, political, and spiritual traditions."

President Eisenhower presented a message from the U.S. Congress (unanimously adopted a week earlier) expressing the deep desire of the American people for peace, and the hope that all nations would join with the U.S A. in renewed efforts towards this goal. He made a plea for a peace which would not be "a mere stilling of the guns" but "a glorious way of life"; reiterated America's "unswerving loyalty" to the United Nations and her "tireless support" of the world Organization, and said that the Secretary of State, Mr Dulles, would speak later on "appropriate elements" of U S foreign policy.

Mr. Harold Macmillan said "the United Nations, as it stands today, probably represents the highest common factor of agreement that is possible among the nations." He added "The United Kingdom will continue to strive by all means in her power to perfect this unique instrument for international co-operation Whatever its defects may be, and however far it may have fallen short of the high hopes placed on it in 1945, it remains unique—the only place in the world where all the world's problems can be considered as a whole." After observing that the East-West tensions of the past decade had seemed "unending," Mr. Macmillan said that there had recently been "a lifting of the cloud," and asked whether it was not possible at the forthcoming Geneva conference "to recover the mental outlook of 1945."

The British Foreign Secretary paid tribute to many of the U.N.'s achievements of the past ten years, and, in particular, to the Assembly's unanimous recommendation at its ninth session (see page 13994) for the creation of an international agency to promote the peaceful uses of atomic energy. "This splendid idea," he said, "is already taking shape, and the Agency may eventually prove to be the blueprint of a revolutionized industrial and social life for the world of the future." Mr. Macmillan also believed that the international scientific conference on "atoms for peace," to be held at Geneva in the autumn, "may well prove to be the most important international conference which the U.N. has organized." The economic and social work of the U.N. specialized agencies, moreover, "though it may be unspectacular, is one of the most important contributions to the construction of a peaceful world."

Referring to the long-standing membership problem, Mr Macmillan said that although the U.N. could justly claim to be a world organization, "we must recognize that it falls short of the ideal, which is that it should reflect fully the whole world-community of peace-loving states Though it may not be possible to solve this problem in present circumstances, yet a solution must be found in due course if the U N is to fulfil its true destiny"

In sum, Mr Macmillan found that during its first decade "the United Nations has adapted itself with remarkable flexibility to the rapidly changing conditions in the world," and that its Charter had proved to be "a finely-adjusted and balanced instrument, sufficiently flexible to permit of adaptations and interpretations corresponding to the changes in the international scene." He concluded: "If we are to avoid a third and far more terrible world war, if we are to keep the peace and build up the strength of the free peoples, we shall need the United Nations. We must maintain our faith in it, whatever the future may bring."

M. Vyacheslav Molotov said that the U.S.S.R. was fully alive to the "significant place" it occupied in the U N., and would "do everything in its power to support and sustain the U N. in all its activities so as to ensure a lasting peace and international security." On the disarmament question he stressed that the Soviet Union had accepted the Western Powers' proposals on conventional armaments "in full," and that it was now "up to the United States and other Western Powers to make the next move." Moreover, the U.S S.R. had also "met the Western Powers halfway" by accepting their proposal that, prior to complete prohibition of atomic weapons, nations should have the right to resort to such weapons for defence against aggression with the consent of the Security Council

During his speech M Molotov referred to a number of recent developments which, he said, had contributed to the lessening of world tension, such as the conclusion of the Austrian State Treaty, the normalization of relations between Yugoslavia and the Soviet Union, and the Soviet invitation to Dr. Adenauer to visit Moscow. Of the problems which still called for settlement, he particularly stressed the question of Chinese representation in the U N and the situation regarding Formosa and the offshore islands. As regards the former, he declared that the Chinese People's Republic "must without delay have every opportunity to be represented in the General Assembly and Security Council." and described the present situation as "illegal." On the second question, he declared that Formosa and the offshore islands were "historic Chinese territory" and that the U N. should take "expeditious measures for the settlement of this important problem."

M Molotov said that the forthcoming "summit" conference at Geneva would have "great significance and importance" provided all the participants displayed a "genuine desire for the relaxation of international problems and the consolidation of peace" He cited the Bandung Conference of Asian and African nations as an example of the successful application of the principle of peaceful co-existence between countries with different social systems

In the course of his speech M. Molotov submitted to the U N seven objectives for the lessening of world tension: (1) implementation of the Assembly's resolution for the banning of war propaganda in all countries, (2) agreement among the great Powers to dismantle military bases in foreign territories; (3) development of the peaceful uses of atomic energy, and large-scale industrial, scientific and technical assistance to under-developed countries, (4) an agreement between the U.S A, Britain, France, and the U.S S R on the withdrawal of their forces from Germany, with the exception of local police forces; (5) the settlement of outstanding Far Eastern problems "in accordance with the principles of sovereignty and territorial integrity", (6) removal of all discriminations hampering widespread economic co-operation and international trade, (7) expansion of cultural relations "through a wide exchange of delegations and the development of tourism."

M. Antoine Pinay laid special emphasis on the need for security, and in this connexion stressed the uses of regional defensive associations After declaring that France was "not prepared to abandon the security ensured to her by NATO," he added. "It is not by such defensive treaties that international tension will be increased and divisions multiplied It is not by tightening bonds between allied peoples that *rapprochement* between disunited peoples will be thwarted. On the contrary, these accords concluded on the regional level open the way for agreements on the international level, with the same equality of duties and the same certainty of guarantees" Amplifying this point, M. Pinay spoke of the "great movement of association in Western Europe," and added. "This effort may itself be extended gradually to a wider geographic entity—to the whole of Europe, the present partitioning of which represents a dangerous anachronism. East and West are already co-operating within the U.N. specialized agencies. Why should not Eastern Europe some day participate in the great plans now being drawn up in Western Europe?"

M Pinay went on to express the belief that regional agreements might "offer a solution to one of the main problems that divide East and West at the present time—the problem of the division of Germany." Declaring that "German unity must be re-established with equal security for all," he maintained that Germany could not be neutralized, since "a great people cannot indefinitely be subjected to a trusteeship" "We must, in my opinion," he added, "give a free Germany the chance of being associated in a system of security, including reciprocal limitation and control of armaments"

Mr. John Foster Dulles gave an assurance that the U.S.A. would try to carry into the Geneva "summit" conference "the spirit which has been generated by the U.N. tenth anniversary observance."

He added: "There is one extremely simple method of bringing an end to what is called the 'cold war,' namely, to observe the Charter of the United Nations—to refrain from the threat or use of force in international relations and from subversion against the institutions of other countries. It is in that spirit that we go to Geneva, and we hope to find that spirit shared. If so, we can find there new procedures, or at least develop a new impetus, which will help to solve some of the vast and stubborn problems that still confront us."

Among "the problems that confront us as we face the future," Mr Dulles listed the following: (1) German unification; (2) the Eastern European nations, "many with a long and proud record of national existence, which are in servitude", (3) the "Chinese Communist regime which became an aggressor in Korea, for which it stands condemned by the United Nations", (4) the "existence of that apparatus known as international communism"; and (5) the "urgent problem of limiting the crushing burden of armaments." As regards the disarmament question, Mr. Dulles noted that the Soviet Union had "recently indicated that it might be prepared seriously to consider the initiative which had been taken months before by the other members of the U.N. Disarmament Sub-committee." He added. "Let us hope that these indications can be translated into concrete action, making possible limitations of armaments which are in fact dependable and not a fraud. The United States asks no nation to do what it is not prepared to do itself . ."

Mr. Dulles noted several "encouraging international developments" in recent months—the end of the fighting in Korea and Indo-China, the signing of the Austrian State Treaty; an improvement in relations between the Soviet Union and Yugoslavia, the Soviet Union's approach for diplomatic and trade relations with the German Federal Republic. "These are indeed significant developments," he added. "But in our rejoicing, let us not forget why they have occurred, or the sequence of events that have brought us where we are. . . What has happened is because certain nations backed steadfastly the principles of the United Nations, and backed them with a resolve that, if need be, carried with it blood and treasure. . . Some say that what has happened marks the beginning of an era. I believe that that can be. Certainly the United States, I pledge you, will do all that lies within its power to make it so. But we do not forget—we dare not forget—that some of those who now hail the recent developments are precisely those who sought for years to stop them .... Steadfastness to principle and sacrifice for principle are the proven price of the good that we have won. It would be reckless to expect further good at any lesser price."

Mr. Harry S. Truman spoke as follows at the final session: "It is almost exactly ten years since I spoke, as President of the United States, to the concluding session of the conference which framed the U.N. Charter. . . . It was my fate to take over the Presidency upon the tragic death of Franklin Delano Roosevelt. President Roosevelt was among the first to envision the U.N. as an instrument to keep the peace. My first official act when I took office was to instruct Secretary of State Stettinius to proceed with the U.N. conference as planned. . . . It was held in this city as scheduled, and the difficult task of drafting the Charter was completed . . On that occasion I pledged my support to the United Nations. I believe that I have kept that pledge, both as President and since I retired from the White House. Certainly I have never failed to work for the United Nations, and tonight as a private citizen I pledge my support of it once again . .

Since the Charter was signed many things have happened and many vital decisions have been made. The U.N. has faced many crises. . . . At one point in this period armed aggression in violation of the principles of the U.N. took place with the support and help of nations that had signed the Charter. That aggression was met as it had to be met—we had to fight to preserve the principles of the United Nations. And the Charter which we signed here at San Francisco in 1945 was given new life and vigour by the sacrifices of the many brave men of many nations who fought to uphold it in Korea. . . .

I have been, and still am, one of the most ardent advocates of disarmament. . . . This question of armaments has clouded the international horizon for many years. It grows more and more serious. Every year science places new and more terrible weapons in our hands. Every year the consequences of sudden attack and the perils of inadequate defence become more deadly. Today, the battles of World War II are almost as far behind us technologically as the battles of Napoleon or of Genghis Khan. The use of force in international affairs today raises the threat—the almost incomprehensible threat—of total destruction, not only of cities and nations, but of all human life. I earnestly hope that the time has come when we may break the deadlock on international disarmament. . . .

Second only to peace in the U.N. Charter is the emphasis it lays on improving the standards of living of mankind and of safeguarding the fundamental freedoms of man. This work must be carried on at the same time that we strive to eliminate war. . . . As I think back over the last ten years, I am encouraged by what has been done in the economic and social field. But all our accomplishments to date are only a good beginning. There is much that remains to be done. . . .

In this atomic age no nation can live unto itself alone. There is no hope for any nation either in isolation or in imperialism. The U.N. is the best hope of mankind for deliverance from mutual destruction, a beacon of hope to a world that has no choice but to live together or to die together. The Charter may not be perfect, but no charter can provide easy or automatic solutions for the complex and difficult problems of international life. The Charter does give us the means, the opportunity, of meeting and resolving these problems by peaceful processes. In our impatient zeal for perfection, let us not lose faith in the Charter and the means it provides for working together for our common salvation.

We have come a long way in the last ten years. During this fateful period two great forces have emerged to play an essential role in shaping the destiny of mankind. One of these is the United Nations—man's most ambitious attempt to keep the peace. The other is the development of nuclear science, which has unleashed physical power of a magnitude hitherto undreamed of—a magnitude great enough to make fundamental changes in man's way of life for better or for worse. We in our generation are confronted with the challenge of reconciling these two great forces. We must use the one and harness the other so that we may combine them for the everlasting benefit of all mankind."

The following declaration, drawn up by Dr. van Kleffens and officially described as a "summation" of the tenth anniversary session, was read to the final session by Dr. van Kleffens after prior approval by all the delegations:

"(1) All members participating in the commemorative meeting of the United Nations assembled in San Francisco on the tenth anniversary of the Organization have reaffirmed their common determination to save succeeding generations from the scourge of war. The ten years since June 26, 1945, have given new meaning and urgency to this universal aspiration of the peoples, for they know that another war fought with the weapons now at their disposal would bring untold calamities to mankind. Their aim is peace, based, in accordance with the explicit text of the Charter, on security, justice, and good neighbourliness.

(2) They proclaim again their common dedication to the purposes and principles formulated in the Charter. They recognize that the hope of enduring peace rests upon how well the nations carry out these purposes and uphold these principles in their relations with each other.

(3) They have reaffirmed their determination to make new efforts to settle international disputes, as the Charter calls upon them to do, by peaceful means in such a manner that international peace, security, and justice are not endangered, and to live together in peace and unity.

(4) They have pledged themselves equally to press forward in the search for agreement on a disarmament plan that can provide a greater measure of security to the nations and remove the threat of atomic destruction from the world. They declare their belief in the determination of the nations to direct the creative resources, thus freed from the burden of armaments, to the improvement of the lives of peoples everywhere."

The tenth anniversary session was held in the San Francisco Opera House. It began and ended with a minute of silent prayer or meditation.—(United Nations Review, New York - U.N. Information Centre, London - New York Times - New York Herald Tribune - Times - Manchester Guardian)

(Prev. rep. San Francisco Conference, 1945, 7413 A.)

A. ALBANIA.—Request for U.N. Aid in Normalization of Greco-Albanian Relations.

The Albanian News Agency announced on July 2 that Albania had asked the U.N. Secretary-General (Dr. Hammarskjöld) to convey to the Greek Government Albania's desire to establish "normal diplomatic and good-neighbourly relations" with Greece. The message rejected an earlier Greek statement that there was still a state of war between Greece and Albania resulting from Albanian participation in Fascist Italy's attack on Greece in 1940. It claimed that the Albanian people had fought "side by side with the Greek people against their common enemies, Fascist Italy and Nazi Germany," and that Albania's status as an Allied country had been internationally recognized.—(Times - Manchester Guardian)

B. UNITED KINGDOM. — Financial and Monetary Policy. - Further Treasury Sale of Dollar Securities.

The Treasury announced on July 15 that it was arranging to sell through the London Stock Exchange a further $15,000,000 worth of its holdings of dollar securities which had originally been taken over from U.K. holders as collateral for the wartime loan from the U.S. Reconstruction Finance Corporation. The list of the securities affected, comprising two series of bonds and 14 different common or capital stocks, was published on the same date; it compared with some 48 bonds or shares which had been disposed of by the Treasury in the previous sale of dollar securities.—(Financial Times) **(14050 G.)**

C. UNITED STATES. — National Debt. - Increase in Maximum Limit extended for Further Year.

The temporary increase in the maximum limit of the U.S. National Debt from $275,000,000,000 to $281,000,000,000, due to expire on June 30, was extended for a further 12 months under a Bill signed by the President on that date. The Bill had been passed by the House of Representatives on June 27 and by the Senate earlier on June 30.—(New York Times)

A. INDIA - PAKISTAN. — Discussions between Mr. Nehru and Mr. Mohammed Ali on Kashmir Question. - Agreements on Prevention of Border Incidents, Shrines and Holy Places, Division of India Office Library, Evacuee Property, Railway Stores, and Boundary Disputes. - Temporary Agreement on Canal Waters.

The Prime Minister of Pakistan, Mr. Mohammed Ali, accompanied by the Ministers of Home Affairs and Education (respectively Major-General Mirza and Colonel Hussain), visited New Delhi from May 14-18 for discussions with Mr. Nehru, Pandit Pant (the Indian Home Minister), and Dr. Azad (the Indian Minister of Education) on the Kashmir problem and other questions of common interest to the two countries. A joint communiqué stated that the talks had been "cordial and full," that they had "covered a wide variety of subjects of common concern," and that both sides had "approached these subjects in a friendly spirit and with a desire to explore every avenue to reach settlements of pending problems." The Kashmir problem had been "discussed fully in all its aspects," and it had been decided "to continue these talks at a later stage after full consideration had been given by both Governments to various points that had been discussed."

Before leaving India, Mr. Mohammed Ali told the Press on May 18 that "slight progress" had been made, that "new methods and new approaches" had been considered, and that he was "not going back disappointed."

Mr. Nehru told a press conference in New Delhi on May 31 that "new ground" had been covered in his talks with Mr Mohammed Ali, but that he could not say much about the discussions He added, however, that the approach on both sides had been not only friendly but constructive and "not the old dead wall approach"

Major-General Mirza and Pandit Pant had separate discussions during which they reached agreement on the prevention of border incidents and on the preservation of shrines and holy places. Dr. Azad and Colonel Hussain discussed the proposed division between the two countries of the India Office Library in London (see 14308B).

A communiqué on the talks between the two Home Ministers, issued on May 17, ran as follows :

"On the question of border incidents, the Ministers agreed that demarcation of the boundary should be finalized as early as possible. Pending final demarcation, certain arrangements were agreed upon with a view to avoiding possibilities of disputes and the danger of clashes between armed forces on the two sides The Ministers agreed that demarcation of the boundary between the two Punjabs should be given the highest priority, and should be completed within three months. Agreement was also reached on a reduction in the number of border forces on both sides and the arms to be carried by them. The Ministers further agreed to the appointment of senior officers by the Governments of India and Pakistan to co-ordinate the implementation of the agreement.

As regards shrines and holy places, the Ministers agreed to appoint a joint committee to work out details of implementing the 1953 agreement on the subject (see 13840 A). This committee would, in particular, work out arrangements for the preservation of holy places and examine the question of properties attached to them. They also agreed that free and liberal facilities should be granted to pilgrims from one country to visit shrines and holy places in the other country, either individually or in parties"

The following communiqué on the talks between the Ministers of Education was issued on May 18 :

"The Education Ministers of India and Pakistan have considered the question of the India Office Library in London and have agreed that as the Library belongs to the present Governments of India and Pakistan, as successors to the Government of undivided India, the question of the disposal of the Library is the concern of the two Governments, and will be settled by them. The Education Ministers considered various ways of dealing with the problem and decided to continue their discussions later."

Other recent developments relating to Indo-Pakistani relations are summarized below.

The Nekowal Incident. An exchange of fire lasting several hours, in which six Indian soldiers, six Indian civilians, and two members of the Pakistani border police were killed, occurred at Nekowal (a village on the border of Jammu and "Azad Kashmir") on May 7. A strong protest was lodged on May 9 by the Indian Government, which asked for an assurance that the incident would not be repeated, and reserved the right to demand compensation. The Pakistani Government, replying on May 11, stated that the Indian claim for compensation could not be entertained until investigations into the incident by U.N. observers were completed. During his visit to Delhi, Mr. Mohammed Ali expressed to President Prasad his profound regret at the incident, and stated that if any Pakistani were proved to be guilty, "the severest possible action" would be taken.

Evacuee Property. The Indian Minister of Rehabilitation (Mr. M. C. Khanna) visited Karachi from April 5-16 for discussions with members of the Pakistani Government, as a result of which an agreement was reached on the transfer of evacuees' bank accounts and the release of their lockers and safe deposits. This provided that all lockers and safe deposits should be released in bulk by an agreed date; that all amounts due to the banks from the Custodians or from Government departments in either country should be credited to the accounts of the bank concerned by that date; that both Governments should give every facility for the realization of the debts due to the banks; and that a committee of three representatives from each country should supervise the implementation of these decisions.

This agreement, and that on movable evacuee property reached at the secretariat-level conference in March (see 14141 A), were ratified by both Governments on May 19.

The movable property agreement provided that :

(1) the Custodians on each side would be instructed to restore evacuees' movable property to the rightful owners or to liaison officers appointed by the two Governments;

(2) Indian notes and coins restored by the Custodians, or forming part of seized movables, or recovered from buried treasures in Pakistan, would be permitted to be exported to India,

(3) the Indian Government would permit remittances to Pakistan of equivalent amounts at the official rate of exchange for coins and notes recovered from India;

(4) both countries would permit the export of bullion similarly restored or recovered, and of machinery and trade goods;

(5) the lists of sale proceeds of properties deposited with the Custodians would be exchanged *en bloc*, along with cheques for the amounts given in the lists;

(6) fresh lists of outstanding postal certificates, savings bank accounts, and postal parcels lying in the two countries would be exchanged,

(7) property (both movable and immovable) of joint-stock companies would be restored, compensation being paid where such property had been allotted or acquired by the Government,

(8) securities, shares, debentures, and insurance policies deposited in banks would be restored to the evacuee owners or their heirs, after meeting the claims of banks in which they had been deposited;

(9) in the case of shares, securities, debentures, and insurance policies not held in banks, restrictions imposed by the Custodians on payment of dividends and interest, and on transfer of shares, etc, would be removed;

(10) contractors' claims would be dealt with through the Central Claims Organization,

(11) target dates would be fixed for completing action on all important items, and every effort made to observe these dates

Railway Stores. The Indo-Pakistani Railways Standing Committee and Stores Sub-committee, meeting in New Delhi on Dec 21-27, 1954, reached an agreement on the division of rolling-stock and stores between the two countries, and on the transfer of service records and provident fund accounts of railway employees. The agreement was subsequently ratified by the Pakistani Government

Boundary Disputes. Mr S A Khan, Parliamentary Secretary to the Indian External Affairs Ministry, announced on March 12 that agreement had been reached on disputes relating to the boundary between the Murshidabad district of West Bengal and the Rajshahi district of East Pakistan

Important progress was made in settling one of the principal issues still outstanding between India and Pakistan when a temporary agreement on the use of the waters of the Indus basin for irrigation purposes was reached in Washington on June 21. Negotiations between the two countries on the canal waters issue had been resumed in Washington under the auspices of the International Bank on Dec. 6, 1954, after discussions by a representative of the Bank in Karachi and New Delhi during September. Subsequently a mission from the Bank visited Pakistan and India in March and April, 1955, and toured the areas concerned in both countries together with Pakistani and Indian engineers and officials. On the mission's return, discussions between the delegations of both Governments were resumed in Washington, ending in the above-mentioned agreement. The announcement, issued in Delhi, Karachi, and Washington on June 24, was worded as follows :

"The Governments of India and Pakistan, with the good offices of the International Bank, have entered into an agreement which was signed in Washington on June 21 by the leaders of the Indian and Pakistani delegations. The two delegations are engaged in the preparation of a comprehensive plan for the irrigation use of the waters of the Indus system of rivers.

The agreement makes provision for *ad hoc* transitional arrangements for the period April 1 to Sept. 30, 1955, and, after taking into account Pakistan's ability to transfer water in replacement from the western rivers, establishes agreed *ad hoc* amounts for additional canal withdrawals by India from the three eastern rivers (the Ravi, Beas and Sutlej) during the period covered by the agreement.

The conclusion of this agreement enables the Indian and Pakistani delegations to continue to work, with the participation of the International Bank, on the preparation of the comprehensive plan, in an atmosphere of co-operation and good will."

A newly-formed Indo-Pakistani Friendship Association (with branches in both countries) decided on Feb. 12 to set up Councils of Indo-Pakistani Affairs as an informal attempt to reconcile differences between the two countries, and to present their views to their respective Governments.—(Indian and Pakistan High Commissioners' Offices, London - The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. 14141 A; 14151 A; Canal Waters, 13925 A; Map, 13789 A.)**

A. UNITED STATES.—Withdrawal of Government's Charges against Professor Owen Lattimore.

The U.S. Attorney General (Mr. Brownell) announced on June 28 that the Government had decided to withdraw its charges of perjury against Professor Owen Lattimore, thereby bringing to an end one of the most protracted American legal actions in recent years. Professor Lattimore, director of the School of International Relations at Johns Hopkins University, is an authority on China, where he worked at various periods in the 1920's and 1930's. In 1941-42 he was political adviser to Generalissimo Chiang Kai-shek, and in 1942-46 served as deputy director of Pacific Operations with the Office of War Information in San Francisco.

The present case arose out of the charges made by Senator McCarthy in February, 1950, that the State Department, then under President Truman's Democratic Administration, was, or had been, employing a number of Communists on its staff. A special Senate sub-committee under Senator Tydings was set up to investigate these allegations, and it was in evidence to this committee that Senator McCarthy had first mentioned Professor Lattimore, referring to him as "the top Russian espionage agent in the United States" (see 10715 A). After an exhaustive inquiry, however, the Tydings committee rejected Senator McCarthy's allegations, describing them as "a fraud and a hoax perpetrated on the Senate of the United States and the American people."

Despite this decision, the late Senator McCarran, as chairman of the Senate Internal Security sub-committee, instituted an investigation of the Institute of Pacific Relations, whose journal, *Pacific Affairs*, had been edited by Professor Lattimore from 1934 to 1941. The committee examined the records and files of the Institute, going back for nearly 30 years, and between July, 1951 and February, 1952, heard public testimony from various witnesses on the Institute's affairs, Professor Lattimore himself being cross-examined for 12 days. In July, 1952, the McCarran sub-committee published its report, in the course of which it accused Professor Lattimore of having been "a conscious, articulate instrument of Soviet conspiracy," and recommended that the transcript of the hearings be turned over to the Justice Department for investigation into possible perjury. The Attorney General (then Mr. McGrancry) announced on Dec. 2, 1952, that he had directed a Federal grand jury in Washington to investigate the charges, and on Dec. 16 the grand jury indicted Professor Lattimore on seven counts of perjury.

These were that he had lied under oath .—

(1) by denying that he had ever been "a sympathizer or any other kind of promoter of Communism or Communist interests";

(2) by denying that he had been told before 1950 that Ch'ao-ting Chi, a Chinese, was a Communist;

(3) by denying that he knew that the pseudonym "Asiaticus," the name taken by one of the contributors to *Pacific Affairs*, was that of a Communist writer;

(4) by asserting that he had not published any articles written by Communists while he was editor of *Pacific Affairs*;

(5) by testifying that a meeting with Constantine Oumansky, former Soviet Ambassador to the United States, had not taken place during the period of the Hitler-Stalin pact [i.e. the Soviet-German non-aggression pact of 1939];

(6) by saying that he had not handled mail for Lauchlin Currie, an aide to President Roosevelt during the Second World War;

(7) by denying that a visit he had made in 1937 to the Chinese Communist headquarters in Yenan had been prearranged with the Communist Party.

After a brief hearing on Dec. 19, 1952, at which Professor Lattimore pleaded "not guilty" to all the charges, the trial was adjourned to enable the two sides to prepare their cases. On May 2, 1953, however, Federal Judge Luther W. Youngdahl, before whom the case was being tried, dismissed four counts of the indictment and expressed "serious doubt" about the remaining three counts.

On the first count, which he discussed at great length, Judge Youngdahl said that it violated both the First and Sixth Amendments to the Constitution and was "so nebulous and indefinite that a jury might have to indulge in speculation in order to arrive at a verdict." The arguments against the first count, he added, were "even stronger when applied to Counts 3 and 4," whilst Count 7 was "clearly defective in its plain inconsistency and indefiniteness."

On May 14, 1953, the Department of Justice announced that it would appeal against Judge Youngdahl's decision.

In a brief filed on Aug. 24, the Department asked the Federal Court of Appeals to reinstate the four counts which had been dismissed. It asserted that Judge Youngdahl had violated "settled principles of Anglo-American law" and had, in effect, given the defendant "a licence to testify falsely under oath."

On July 8, 1954, the Federal Court of Appeals, by eight votes to one, upheld the dismissal of the first count of the indictment on the grounds of its vagueness, saying that there was "no definition of the term 'sympathizer' or any concrete specification of its content either in the indictment or the statute," and that "without definition or specification the term has no certain meaning." The court also sustained the dismissal of Count 7, but (by a vote of five to four) allowed the Government's appeal on Counts 3 and 4 and ordered them to be reinstated.

As a result of the court's dismissal of the key count of the indictment, the Government brought further evidence before the Federal grand jury, and on Oct 7, 1954, Professor Lattimore was re-indicted on two charges of committing perjury. (1) by testifying that he had never followed the Communist party line, and (2) by saying that he had never been a promoter of Communist interests. The indictment listed 132 statements by Professor Lattimore "denoting that he knowingly and intentionally was 'a follower of the Communist line'."

After Professor Lattimore had again pleaded "not guilty" to all the charges, the Government submitted an affidavit on Oct. 13, 1954, asking Judge Youngdahl to disqualify himself from presiding at the trial on the ground that he had "a personal prejudice in favour of Mr. Lattimore." Asserting that the Government could not get a "fair and impartial" trial of the Lattimore case if Judge Youngdahl presided, the affidavit said that the latter had a "fixed opinion" that Professor Lattimore was not guilty, and that it would be "improper for him to have any further official connection with the case." This request was dismissed by Judge Youngdahl on Oct. 23.

In his ruling the Judge described the Government's submission as "scandalous," and said that the affidavit was "so patently and grossly insufficient that I cannot escape from the conclusion that the purpose of the affidavit is to discredit, in the public mind, the final action of the courts, or to intimidate the courts themselves"

The two new counts in the indictment were also dismissed by Judge Youngdahl on Jan. 18, 1955, on the ground that they failed to meet the constitutional requirements for clarity.

"To require a defendant to go to trial for perjury under charges so formless and obscure as those before the court," he declared, "would be unprecedented and would make a sham of the Sixth Amendment [to the U S. Constitution] and the Federal rule requiring specificity of charges" The dismissal of the two counts on the grounds of vagueness, he said, "renders unnecessary a determination of their constitutionality under the First Amendment."

On April 11 the Government again appealed against the judge's dismissal of the most important counts of the indictment, but on June 14 the Federal Appeals Court upheld Judge Youngdahl's decision by four votes to four; the tie vote meant that the appeal was rejected, as a majority decision is necessary to overrule the judgment of a lower court.

Following Mr. Brownell's announcement on June 28 that the Government had decided to drop all its charges against Professor Lattimore, the Federal Court in Washington was formally requested on June 30 to dismiss the five remaining counts of the indictment.—(New York Times - New York Herald Tribune) **(Prev. rep. Professor Lattimore, 10715 A.)**

B. UNITED KINGDOM. — Exchange Control. - Turkey readmitted to Transferable Account Area.

The Bank of England announced on June 28 that Turkey was being readmitted to the sterling "Transferable Account Area" as from July 1. Turkey, because of her strained payments relations with Britain and the insufficiency of her sterling resources to meet her commitments, had hitherto been the only non-sterling country—apart from those falling in the dollar area—which had been denied transferable account facilities. The extension of the transferable account system to Turkey followed the conclusion in January last of a new Anglo-Turkish trade and payments agreement (see 14180 A).
(Financial Times) **(Prev. rep. 13879 B; 13483 A.)**

C. EL SALVADOR. — Friendship Treaty with Nationalist China.

A treaty of friendship between El Salvador and the Chinese Nationalist Government, which had been signed on Dec. 9, 1954, came into force on May 26 when instruments of ratification were exchanged with the Chinese Nationalist Minister to the Central American republics. (New York Times)

D. CHINA - SOVIET UNION. — Agreement on Exchange of Scientific and Technical Information.

Peking Radio announced on July 5 that the Chinese People's Republic and the Soviet Union had signed an agreement for the exchange of scientific and technical information between the two countries.—(New York Times)
(Prev. rep. Atomic Co-operation, 14220 B.)

A. THE HYDROGEN BOMB. — Scientists' Warning of Possible Extermination of Human Race in Hydrogen-bomb Warfare. - Appeal to Governments for Renunciation of War. - U.N. Study suggested by Federation of American Scientists. - U.S. Atomic Energy Commission's Report on Bikini Hydrogen-Bomb Test.

A declaration, addressed to the governments and peoples of the world, was issued on July 9 by nine internationally known scientists appealing for the renunciation of war, and giving a warning that the use of hydrogen bombs in a future war " might quite possibly put an end to the human race " and result in " universal death—sudden for a minority, but for the majority a slow torture of disease and disintegration."

Prior to this appeal, the Federation of American Scientists had issued a declaration on March 6 proposing that a U.N. commission should be set up to assess the potential dangers from atomic and hydrogen bomb explosions throughout the world, whilst on Feb. 15 the U.S. Atomic Energy Commission had issued a report on the effects of the hydrogen bomb exploded at Bikini atoll (Marshall Islands) on March 1, 1954. These statements and declarations are reproduced below under cross-headings.

Scientists' Appeal for Renunciation of War. - Warning of Effects of Hydrogen Bomb.

The text of the first-mentioned declaration was issued in London on July 9 by Bertrand (Lord) Russell, under the signatures of the late Professor Albert Einstein (who had signed it a few days before his death), Professor P. W. Bridgman (of Harvard University, U.S.A.), Professor L. Infeld (of the University of Warsaw, Poland), Professor H. J. Muller (of the University of Indiana, U.S.A.), Professor C. F. Powell (of the University of Bristol), Professor J. Rotblat (of the University of London), Professor Hideki Yukawa (of the University of Kioto, Japan), and of Lord Russell himself. Professor Joliot-Curie (France) also subscribed to the declaration, though his signature came too late for inclusion. The text of the declaration was as follows .

" In the tragic situation which confronts humanity, we feel that scientists should assemble in conference to appraise the perils that have arisen as a result of the development of weapons of mass destruction, and to discuss a resolution in the spirit of the appended draft.

We are speaking not as members of this or that nation, continent, or creed, but as human beings, members of the species Man, whose continued existence is in doubt. The world is full of conflicts, and, overshadowing all minor conflicts, the titanic struggle between Communism and anti-Communism.

Almost everybody who is politically conscious has strong feelings about one or more of these issues , but we want you, if you can, to set aside such feelings and consider yourselves only as members of a biological species which has had a remarkable history and whose disappearance none of us can desire We shall try to say no single word which should appeal to one group rather than to another. All, equally, are in peril , and if the peril is understood, there is hope that they may collectively avert it.

We have to learn to think in a new way We have to learn to ask ourselves, not what steps can be taken to give military victory to whatever group we prefer, for there are no longer such steps ; the question we have to ask ourselves is ' What steps can be taken to prevent a military contest of which the issue must be disastrous to all parties ? '

The general public, and even many men in positions of authority, have not realized what would be involved in a war with nuclear bombs. The general public still thinks in terms of the obliteration of cities. It is understood that the new bombs are more powerful than the old and that, while one A-bomb could obliterate Hiroshima, one H-bomb could obliterate the largest cities such as London, New York, and Moscow.

No doubt in an H-bomb war great cities would be obliterated. But this is one of the minor disasters that would have to be faced. If everybody in London, New York and Moscow were exterminated, the world might in a few centuries recover from the blow But we now know, especially since the Bikini test, that nuclear bombs can gradually spread destruction over a very much wider area than had been supposed.

It is stated on very good authority that a bomb can now be manufactured which will be 2,500 times as powerful as that which destroyed Hiroshima. Such a bomb, if exploded near the ground or under water, sends radio-active particles into the upper air. They sink gradually and reach the surface of the earth in the form of a deadly dust or rain. It was this dust which infected the Japanese fishermen and their catch of fish.

No-one knows how widely such lethal radio-active particles might be diffused, but the best authorities are unanimous in saying that a war with H-bombs might quite possibly put an end to the human race. It is feared that if many H-bombs are used there will be universal death—sudden only for a minority, but for the majority a slow torture of disease and disintegration.

Many warnings have been uttered by eminent men of science and by authorities in military strategy. None of them will say that the worst results are certain. What they do say is that these results are possible, and no-one can be sure that they will not be realized. We have not found that the views of experts on this question depend on any degree upon their politics or prejudices They depend only, so far as our researches have revealed, upon the extent of the particular expert's knowledge We have found that the men who know most are the most gloomy.

Here, then, is the problem which we present to you, stark and dreadful and inescapable : Shall we put an end to the human race ; or shall mankind renounce war ?

People will not face this alternative because it is so difficult to abolish war. The abolition of war will demand distasteful limitations of national sovereignty But what perhaps impedes understanding of the situation more than anything else is that the term ' mankind ' feels vague and abstract People scarcely realize in imagination that the danger is to themselves and their children and their grandchildren, and not only to a dimly apprehended humanity. They can scarcely bring themselves to grasp that they, individually and those whom they love, are in imminent danger of perishing agonizingly. And so they hope that perhaps war may be allowed to continue provided modern weapons are prohibited

This hope is illusory. Whatever agreements not to use H-bombs had been reached in time of peace, they would no longer be considered binding in time of war, and both sides would set to work to manufacture H-bombs as soon as war broke out ; for, if one side manufactured the bombs and the other did not, the side that manufactured them would inevitably be victorious.

Although an agreement to renounce nuclear weapons as part of a general reduction of armaments would not afford an ultimate solution, it would serve certain important purposes First . any agreement between East and West is to the good in so far as it tends to diminish tension. Second the abolition of thermo-nuclear weapons, if each side believed that the other had carried it out sincerely, would lessen the fear of a sudden attack in the style of Pearl Harbour, which at present keeps both sides in a state of nervous apprehension. We should therefore welcome such an agreement, though only as a first step

Most of us are not neutral in feeling, but, as human beings, we have to remember that if the issues between East and West are to be decided in any manner that can give any possible satisfaction to anybody, whether Communist or anti-Communist, whether Asian or European or American, whether White or Black, then these issues must not be decided by war. We should wish this to be understood both in the East and in the West

There lies before us, if we choose, continual progress in happiness, knowledge, and wisdom Shall we, instead, choose death because we cannot forget our quarrels ? We appeal, as human beings, to human beings Remember your humanity, and forget the rest. If you can do so, the way lies open to a new Paradise ; if you cannot, there lies before you the risk of universal death.

We invite this congress [i.e the conference proposed in the first paragraph], and through it the scientists of the world and the general public, to subscribe to the following resolution

' In view of the fact that in any future World War nuclear weapons will certainly be employed, and that such weapons threaten the continued existence of mankind, we urge the Governments of the world to realize, and to acknowledge publicly, that their purposes cannot be furthered by a World War, and we urge them, consequently, to find peaceful means for the settlement of all matters of dispute between them ' "

At a press conference on the same day, Lord Russell said that copies of the declaration had been sent to the Governments of all countries possessing or likely to possess atomic or hydrogen weapons—i.e. to the United States, the Soviet Union, Great Britain, Canada, France, and China.

Lord Russell emphasized that the declaration had no connexion whatsoever with Communist-inspired " peace campaigns," and said that it had first been discussed between himself and the late Professor Einstein. He added that Professor D. V. Skobeltzyn, of the Soviet Academy of Sciences, and Professor Li Sze-kung, the Chinese physicist, had also been asked to sign the declaration but had not replied. Professor Joliot-Curie (whose signature was welcomed as that of a " noted Communist ") had signed with the reservations that Governments should renounce war " as a means of settling differences between States," and that limitations of national sovereignty should be " agreed by all and be in the interests of all." Professor Muller, also, had made one reservation—that " an agreement to renounce nuclear weapons as part of a general reduction of armaments " should be taken to mean " a concomitant balanced reduction of all armaments."

Statement by Federation of American Scientists.

The Federation of American Scientists submitted proposals on March 6 to the State Department, and also to the chief U.S. delegate at the United Nations (Mr. Cabot Lodge), calling for the setting-up of a U.N. commission to study and evaluate the potential dangers from atomic and hydrogen bomb tests throughout the world. [The F.A.S., comprising some 2,000 American scientists and engineers, was formed as a national organization shortly after the war—see 7724 B.]

The Federation declared that the U.S. Government should take the initiative in this matter because the peoples of Asia, rightly or wrongly, were hostile to the American A-bomb and H-bomb tests and believed that the United States had "a callous disregard for the health and safety of the people of other nations." After declaring that "we may be approaching a point where we cannot be sure that we will not make all the world a laboratory and all living things the experimental objects" [of such tests], the Federation referred to the statement of the U.S. Atomic Energy Commission (see below) that the H-bomb detonated at Bikini on March 1, 1954, had covered an area of 7,000 square miles with deadly radiation. It pointed out that the U S.A. could not afford to risk another incident similar to that in which 23 Japanese fishermen had been injured by radiation, and added :

"Reaction among the Japanese people caused a near-panic in the market for fish, an important staple in their diet A strongly antagonistic reaction has developed among the peoples and spokesmen of other nations Prime Minister Nehru of India proposed an H-bomb test ban, which has received wide acclaim from many Asian peoples as well as from many individuals in the West... The Asian countries have become very concerned about the continuation of such tests, and the United States is getting the major share of criticism We have suffered a significant propaganda setback, and it is a world issue whether or not an objective study shows further tests to be dangerous ..."

Another possibility that should be considered (the Federation said) was that of "long-term damage to the human race through a general, world-wide increase of the contamination of the atmosphere" Although Atomic Energy Commission spokesmen had declared that the amount of radiation exposure due to all atomic and thermo-nuclear tests to date was on the average "no more than what one chest X-ray would produce," the Federation felt that the increasing test programmes "will ultimately reach a level which can be shown to be a serious threat to the genetic safety of all people of the world." It suggested, therefore, that the U.S Government should offer the proposed U N. commission all available information on radiation and biological effects ; that it should supply instruments and technical facilities to obtain additional information ; and that other countries should be asked to follow suit

It was proposed that the suggested U.N commission should have the following principal responsibilities .

"(1) To study the problem of radio-active contamination resulting from bomb tests, and to obtain scientific data and expert opinion on the magnitude of the radiation intensities produced.

(2) To obtain and evaluate scientific opinion on the biological and genetic effects of radiation on human beings, and to establish an agreed 'danger threshold'

(3) To report the results of the above study to the U.N. General Assembly, with recommendations as to procedures required to avoid exceeding the danger threshold."

The Federation issued a separate statement saying that it presented these proposals "with some sense of desperation."

U.S. Atomic Energy Commission Report on H-Bomb Test.

A report on the Bikini hydrogen-bomb test of March 1, 1954 (see 13699 A, 13485 A) was issued by the U.S. Atomic Energy Commission on Feb. 15. After pointing out that a nuclear detonation produced four major characteristics—blast, heat, immediate nuclear radiation, and residual radioactivity, "of which the first three are essentially instantaneous, while the fourth has a more protracted effect"—the report discussed (1) the radioactive "fall-out" in the Bikini test, (2) protective measures against the "fall-out," (3) the "fall-out" from the atomic bomb tests in Nevada, (4) the effects of the "fall-out" of radio-strontium and radio-iodine, two isotopes which "constitute the principal internal hazards from the radioactivities produced by detonations of atomic weapons, both fission and thermo-nuclear," and (5) the genetic effects of radiation. A summary is given below under cross-headings.

The "Fall-out" in the Bikini H-Bomb Test. "The very large thermo-nuclear device fired at the Bikini atoll on March 1, 1954, was exploded on a coral island. Coral consists of calcium carbonate, thus the detonation's radioactivity was spread by particles consisting largely of unslaked lime which, during the hours of descent, was slaked by moisture in the atmosphere These particles ranged between 1/1000th and 1/50th of an inch in diameter... The prevailing winds were westerly, so the bomb cloud moved generally to the east and deposited the radioactive particles in varying amounts over an elliptical or cigar-shaped area. About 160 miles down-wind from the point of burst, the early fall-out was observed in the form of fine particles which looked like snow. Fall-out began there about eight hours after the detonation and continued for several hours.

The Roentgen is the commonly accepted unit of measurement of radiation dosage. A dose of about 25 Roentgens of radioactivity received by a person over a brief space of time will produce temporary changes in the blood. A dose of some 100 Roentgens received in a short interval may produce nausea and other symptoms of radiation sickness. About 450 Roentgens delivered over a day or so might be fatal to approximately half of the persons exposed. However, because of the body's repair processes, a total radiation dose which would be serious if incurred in a few minutes would produce much less effect if spread over a period of years. These statements may be helpful in understanding the data which follow.

The test explosion, at ground surface, contaminated a cigar-shaped area extending approximately 220 miles down-wind and varying in width up to 40 miles In addition, there was a contaminated area upwind and crosswind extending possibly 20 miles from the point of detonation. Data was collected from 25 points on five atolls located from 10 to 330 miles downwind from Bikini atoll .

Data from this test permits estimates of casualties which would have been suffered within this contaminated area if it had been populated These estimates assume (1) that the people in the area would ignore even the most elementary precautions , (2) that they would not take shelter but would remain out of doors completely exposed for about 36 hours , and (3) that in consequence they would receive the maximum exposure Therefore the estimates which follow are what might be termed extreme estimates, since they assume the worst possible conditions.

On the basis of data from this and other tests, it is estimated that, following the test explosion on March 1, 1954, there was sufficient radioactivity in a downwind belt about 140 miles in length, and of varying width up to 20 miles, to have seriously threatened the lives of nearly all persons in the area who did not take protective measures During the actual tests, of course, there were no people in this zone Inside Bikini atoll at a point 10 miles downwind from the explosion it is estimated that the radiation dosage was about 5,000 Roentgens for the first 36-hour period after the fall-out. The highest radiation measurement outside of Bikini atoll indicated a dosage of 2,300 Roentgens for the same period. This was in the Rongelap atoll, about 100 miles from the point of detonation. Additional measurements in Rongelap atoll indicated dosages, for the first 36-hour period, of 2,000 Roentgens at 110 miles, 1,000 Roentgens at 125 miles, and, farther south, only 150 Roentgens at 115 miles from Bikini.

Some distance farther from the point of detonation, at about 160 miles downwind and along the axis of the ellipse, the amount of radioactivity would have seriously threatened the lives of about one-half of the persons in the area who failed to take protective measures. It is estimated that the radiation dosage at that point was about 500 Roentgens for the first 36-hour period.

Near the outer edge of the cigar-shaped area, or approximately 190 miles downwind, it is estimated that the level of radioactivity would have been sufficient to have seriously threatened the lives of 5 to 10 per cent of any persons who might have remained exposed out of doors for the first 36 hours In this area the radiation dosage is estimated at about 300 Roentgens for the first 36-hour period

Thus, about 7,000 square miles of territory downwind from the point of burst was so contaminated that survival might have depended upon prompt evacuation of the area or upon taking shelter and other protective measures

At a distance of 220 miles or more downwind, it is unlikely that any deaths would have occurred from radioactivity even if persons there had remained exposed up to 48 hours and had taken no safety measures

The estimates cited above do not apply uniformly throughout the contaminated area, inasmuch as the intensity of radioactivity within a region of heavy fall-out will vary from point to point due to such factors as air currents, rain, snow, and other atmospheric conditions Because of this, and because most persons, if given sufficient warning, probably would evacuate the area or take shelter and other precautionary measures, the actual percentage of deaths could reasonably be presumed to be considerably smaller than these extreme estimates."

Protection against Radioactive Fall-out. "In an area of heavy fall-out, the greatest radiological hazard is that of exposure to external radiation. Simple precautionary measures can greatly reduce the hazard to life. Exposure can be reduced by taking shelter and by utilizing simple decontamination measures until such time as persons can leave the area. Test data indicate that the radiation level (i.e., the rate of exposure) indoors on the first floor of an ordinary frame [wooden] house in a fall-out area would be about one-half the level out-of-doors. Even greater protection would be afforded by a brick or stone house. Taking shelter in the basement of an average residence would reduce the radiation level to about one-tenth of that experienced out-of-doors. Shelter in an old-fashioned cellar, with a covering of earth three feet thick, would reduce the radiation level to about 1/5000, or down to a level completely safe in even the most heavily contaminated area."

The Fall-out from the Nevada Tests. "Only relatively small nuclear test explosions are conducted at the Nevada test site, in contrast to the tests of high-yield thermo-nuclear devices at the Pacific proving grounds. . . . High air-bursts at the Nevada test site have produced no significant fall-out ; heavy fall-out from near-surface explosions has extended only a few miles from the point of burst. The hazard has been successfully confined to the area of the test site. The highest actual dose of radiation at an off-site community has been estimated to be less than one-third of the greatest amount of radiation which atomic energy workers are permitted to receive each year under the Commission's safety standards."

Radiostrontium and Radio-iodine Fall-out. "One of the most biologically important radioactive substances found in fall-out is strontium-90. It has a long lifetime—nearly 30 years on the average. Radiostrontium has a chemical similarity to calcium and therefore, when taken into the body, it has a tendency to collect in the bones. Radiostrontium can enter the body in two ways—by inhaling or by swallowing. Normally, the amount inhaled would be small compared with the amount one might swallow. Fall-out material deposited directly on edible parts of plants may be eaten along with the plants, but washing the plants before they are eaten would remove

most of this radioactive material. However, rainfall carrying the radiostrontium down to earth may deposit it in the soil, where it can be taken up by plants and incorporated into plant tissues, later to be eaten by humans or by grazing animals which, in turn, provide food for humans.

Since the start of nuclear tests, careful measurements have been made of the distribution of radiostrontium over the earth's surface, in the soils, in plants and animal tissues, in the oceans, in rain, in the atmosphere and in all forms in which it might be expected to occur The results of this study are reassuring. The amount of radiostrontium now present in the soil as a result of all nuclear explosions to date would have to be increased many thousand times before any effect on humans would be noticeable.

Among the shorter-lived fission products involved in the study of internal radiation, the most biologically important is radio-iodine-131, with an average life of only 11½ days Even though this product may be widely spread after a nuclear explosion, the possibility of serious hazard is limited by its relatively short life Like the non-radioactive form of the element, it concentrates in the thyroid gland and, in excessive quantity, conceivably could damage the thyroid cells.

Scientists of the Atomic Energy Commission have estimated that the average exposure of people in the U S.A. from radio-iodine in the fall-out from the entire series of tests in the spring of 1954 was only a few per cent of the annual dose that can be received year after year and still have no noticeable effects.

These two isotopes—radiostrontium and radio-iodine—constitute the principal internal hazards from the radioactivities produced by the detonations of atomic weapons, both fission and thermo-nuclear Any accumulation of these materials can be detected with great sensitivity, so that ample warning of potential hazard could be given long before any actual danger occurred from test detonations. The amounts of radiostrontium and radio-iodine which have fallen outside the areas near the test sites as a result of all atomic tests up to now are insignificant compared to concentrations that would be considered hazardous to health "

Genetic Effects of Radiation. " One other effect of radiation must be considered in evaluating the long-range possibilities of hazard from nuclear detonations This is the possible genetic effect upon the germ cells which transmit inherited characteristics from one generation to another At our present stage of genetic knowledge, there is a rather wide range of admissible opinion on this subject.

In general, the total amount of radiation received by residents of the U S A. from all nuclear detonations to date, including the Russian and British tests and all our own tests in the United States and the Pacific, has been about one-tenth of one Roentgen This is only about 1/100th of the average radiation exposure inevitably received from natural causes by a person during his or her reproductive lifetime. It is about the same as the exposure received from one chest X-ray.

The medical and biological advisers of the Commission believe that the small amount of additional exposure of the population of the U.S.A. from our nuclear weapons-testing programme will not seriously affect the genetic constitution of human beings. Nevertheless, we are continuing our thorough study of the entire question and will continue to report our findings to the American people."

Summary. " The Commission hopes that the information contained in the report will never be reflected in human experience as the result of war. However, until the possibility of an atomic attack is eliminated by a workable international plan for general disarmament, the study and evaluation of weapons effects and civil defence protection measures must be a necessary duty of our Government.

Inevitably, a certain element of risk is involved in the testing of nuclear weapons, just as there is some risk in manufacturing conventional explosives or in transporting inflammable substances such as oil or gasoline on our streets and highways The degree of risk must be balanced against the great importance of the test programmes to the security of the nation and of the free world However, the degree of hazard can be evaluated with considerable accuracy, and test conditions can hold it to a minimum None of the extensive data collected from all tests shows that residual radioactivity is being concentrated in dangerous amounts anywhere in the world outside the testing areas "

In a statement on Feb. 22 to the Senate Armed Services Committee, Dr. John Bugher (head of the Atomic Energy Commission's biological and medical section) disclosed that, in addition to the 23 Japanese fishermen, 300 Marshall Islanders and members of the U.S. task force had been injured by radiation during the Bikini H-bomb test, 84 having been subjected to " severe exposure."—(New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Observer) **(Prev. rep. Bikini H-Bomb Test, 13699 A; 13485 A.)**

A. UNITED STATES. — Merger of Remington Rand and Sperry Companies.

Remington Rand Inc., one of the most important U.S. manufacturers of business machines and electronic computing equipment, and the Sperry Corporation, a leading manufacturer of electro-mechanical and hydraulic equipment, merged on July 1 into a new company known as the Sperry Rand Corporation. Total assets of Sperry Rand are about $484,000,000. (New York Times)

B. ITALY. — Trade Unions. - Communist Losses in Works Council Elections.

The annual Works Council elections which took place in recent months in the larger Italian industrial establishments resulted in the loss by the Communists and Left-wing (Nenni) Socialists of their previous majorities in a number of leading factories, which had for years been considered among their principal strongholds.

At the Fiat motor works in Turin, the elections held on March 29 gave the non-Communist Italian Confederation of Workers' Trade Unions (*Confederazione Italiana dei Sindacati dei Lavoratori*, C.I.S L.) 19,350 votes (39 per cent of the total); the F I.O M , affiliated to the Communist-led Italian General Confederation of Labour (*Confederazione Generale Italiana del Lavoro*, C.G.I.L) 18,844 votes (38 per cent); and the Social Democrats' Union of Italian Workers (U I L) 11,317 votes (23 per cent) Together with the results of Works Council elections in the aviation departments of Fiat, which had taken place on Dec. 23, 1954, the distribution of seats on the Fiat Works Council was as follows C I S.L , 93 , F I O.M., 50 ; U.I.L , 40 In 1954 the F I O M had held 130 seats, the C I.S.L 45, and the U I.L. 13.

In the elections on April 21 at the Falck steel works, in the Milan suburb of Sesto-San Giovanni, the F I O.M. (Communist and Left-wing Socialist) polled only 48 per cent of the total vote against 72 per cent in 1954, and the C I S L 52 per cent, against 38 per cent in 1954.

At the naval dockyards at Taranto, the elections (held on May 25) gave the C I S L unions 5,458 votes and 18 seats on the Works Council, and the C G I L. unions 4,490 votes and 11 seats, against the 1954 figures of 2,411 votes and 11 seats for the C.I.S.L. and 6,334 votes and 18 seats for the C G I.L.

At the Olivetti typewriter works (Ivrea), where elections were held on June 23, the non-Communist unions received 2,851 votes and seven seats on the Works Council, and the C G I L. 2,016 votes and six seats.

Signor Pastore, secretary-general of the C.I.S.L., stated on June 15 that in 1,010 cases where elections had been held for new factory committees between Jan. 1 - June 10, the percentage of votes cast for C.I S.L. delegates had increased by 9.4 per cent and that of C.G.I.L. delegates had fallen by 10.9 per cent. Similarly, the number of C.I.S.L. delegates elected had risen by 359 and that of C.G.I.L. delegates had dropped by 487. (Corriere della Sera, Milan - Le Monde, Paris)

C. UNITED KINGDOM. — The " Sidon " Disaster.

Three naval officers and ten ratings lost their lives when H.M. submarine *Sidon* sank in Portland harbour on June 16 after an explosion in a forward torpedo compartment. The *Sidon* (which was lying in 36 feet of water) was raised to the surface on June 24 after intensive salvage operations, and was subsequently beached. The bodies of all 13 victims of the disaster were recovered.

At the time of the disaster the *Sidon* was lying near H.M.S. *Maidstone* (depot ship of the Second Submarine Squadron) and was about to leave Portland for a training exercise in the Channel after practice torpedoes had been embarked. Twelve of those who lost their lives were members of the submarine's crew, whilst the thirteenth was a naval surgeon (Surgeon-Lieut. C. E Rhodes, R N.V.R) who, after leading a rescue party from the *Maidstone* and helping several men to safety, returned to the *Sidon* to help other injured men and was not seen again.

The *Sidon*, an S-class submarine of 1,000 tons' displacement and having a normal complement of 44, was laid down in 1943 and completed in 1944. She saw service in Far Eastern waters during the war against Japan. (Times - Daily Telegraph) **(Prev. rep. " Affray " Disaster, 11885 B.)**

D. SOVIET UNION. — Assistance to Bulgaria and Hungary in Peaceful Development of Atomic Energy.

An agreement was signed between the U.S.S.R. and Bulgaria early in June providing for Soviet assistance in establishing atomic energy installations in Bulgaria for peaceful purposes, and for the training of Bulgarian scientists and engineers in nuclear physics, radio-chemistry, and the use of isotopes in science and industry.

On May 4 it had been announced in Budapest that the Soviet Government had offered assistance to Hungary in developing atomic research for peaceful purposes, and that the offer had been accepted by the Hungarian Government. (Bulgarian Legation, London - Hungarian Review, Budapest) **(Prev. rep. 14220 B.)**

E. FRANCE. — Socialist Party. - " Rebel " Deputies readmitted to Party Membership.

The congress of the French Socialist Party, which opened at Asnières on June 30, decided with only one dissenting vote to readmit to the party the 17 Socialist members in the National Assembly who had been expelled in February last for voting against the Paris agreements.—(Le Monde, Paris) **(14052 D.)**

A. ISRAEL. — The Kastner Case. - Resignation of General Zionist Ministers. - New "Caretaker" Cabinet.

After a trial lasting for 18 months, the president of the Jerusalem District Court (Dr. Benjamin Halevi) delivered judgment on June 22 in a case in which Dr. Israel Kastner, a high civil servant and a member of the Israeli Labour Party (*Mapai*), and formerly a leader of the Jewish community in Hungary, was alleged to have collaborated with the Nazis during the war. The repercussions of the Kastner case led to the withdrawal of the General Zionists from Mr. Sharett's Cabinet, and to the formation of a "caretaker" administration to hold office until the forthcoming general elections on July 25.

The case had originated when a 70-year-old Hungarian Jew, Mr. Malchiel Gruenwald, issued a privately-circulated broadsheet containing serious allegations against Dr. Kastner, who in 1944 had been head of the Jewish Agency-sponsored rescue committee in Budapest at the time when the Germans entered Hungary Mr. Gruenwald, who lost 52 members of his family in the Nazi gas-chambers and concentration camps, had for several years been seeking to find reasons why the tragedy which had overwhelmed his family, and Hungarian Jewry in general, had not been prevented or mitigated, and had found such reasons in what, he alleged had been the treachery of Dr. Kastner Specifically, it was alleged by Mr Gruenwald that Dr Kastner had collaborated with the Nazis; that he had consciously taken part, even if indirectly, in the sending of hundreds of thousands of Hungarian Jews to their deaths at Auschwitz, that he had shared Jewish loot with a Nazi official, *Standartenfuhrer* Kurt Becker, whose life he had later saved by giving testimony on his behalf at the Nuremberg war crimes tribunal; and that he had caused the discovery and death of Jewish parachutists who had been dropped in Hungary by the R.A F. to organize resistance against the Germans The case was the subject of a libel action brought by the State against Mr Gruenwald.

Dr. Halevi (whose judgment took seven months to prepare and 14 hours to deliver) found that all Mr. Gruenwald's allegations against Dr. Kastner had been substantiated except the allegation that he had shared loot with Kurt Becker; on this charge only Mr. Gruenwald was found guilty of having uttered a libel and was fined the nominal sum of £I.1.

In giving judgment, Dr Halevi said that a bargain had been struck between Dr. Kastner and Eichmann (a Nazi official who bore major responsibility for the deportation of Jews from many countries to the gas-chambers and concentration camps) whereby the former agreed to connive in misleading hundreds of thousands of Hungarian Jews into believing that they were being deported to labour camps, whereas in fact he [Kastner] had known very well that they were being sent to the Auschwitz extermination camp. In return (it was alleged) Eichmann had allowed Kastner to put his own family, and some 600 leading members of the Hungarian Jewish community, into a special train that carried them to safety in Switzerland. Dr Halevi said that it had been Dr. Kastner's duty to warn Hungarian Jewry of the fate which awaited them, and expressed the opinion that the Jewish community could in that case have put up a forcible resistance with more success than that of the Warsaw ghetto—especially as at the time there was both a spirit of resistance among the Hungarian Jews and a tendency among the Hungarian people to help them.

Continuing, Dr Halevi said that the Jewish parachutists dropped into Hungary by the R.A.F. had been instructed to report first to Dr. Kastner, in whom—at the time—the Jewish Agency in Palestine had had full confidence. Dr. Kastner, however, had received the parachutists "most discouragingly," and had realized that the only way he could safeguard his association with the Nazis and assure them of his loyalty was to reveal the parachutists' presence in Hungary. He had informed the Gestapo of their arrival and had later persuaded two of the parachutists to give themselves up, having first convinced them that the Hungarian Jewish community was about to be saved by agreement with the Germans—a statement that he [Kastner] knew to be untrue. At the time (Dr Halevi said) the appearance of the parachutists to organize resistance would have acted "like dynamite"; instead, owing to the actions of Dr. Kastner, upwards of 500,000 Hungarian Jews, unaware of the fate that awaited them, had peacefully filled train after train in the belief that they were going only to perform labour service, and unaware that they were in fact going to their death at Auschwitz.

Summing up, the president of the court said that Dr. Kastner had "sold his soul to the devil" by collaborating with the Nazis in a wicked plan by which the leading members of the Hungarian Jewish community—themselves deliberately misled, or corrupted by the offer of their own survival—were induced to play a part in misleading the rest of the Jews in Hungary by keeping them in ignorance of the fate that awaited them.

A vast amount of evidence was given during the trial, some of it by persons who had been active in underground Jewish rescue work during the war, and some by highly placed public servants who in 1944 had handled such matters as the conveyance of Himmler's secret offer of 1,000,000 Jews for 10,000 motor trucks to the Jewish leaders in Palestine—in this instance to Mr. Sharett, then a leading official of the Jewish Agency, and now Prime Minister of Israel.

After the judgment had been delivered, the Attorney-General announced that an appeal would be made to the Supreme Court, which would be asked to review the conclusions drawn by Dr. Halevi from the facts brought before him. An official Government announcement said that "in the view of the Attorney-General, these conclusions are not supported by the facts brought before the president of the Court and which should have been legally accepted by him."

The Kastner case, which had aroused bitter controversy in Israel, gave rise to two motions of no-confidence in the Government, presented in the *Knesset* on June 28 by the Nationalist (*Heruth*) and Communist parties. Although both motions were defeated by large majorities—the Nationalist motion by 50 votes to nine, with 29 abstentions, and the Communist motion by 60 votes to five, with 17 abstentions—a political crisis was caused by the fact that the General Zionists, the second largest party in the Government coalition, abstained from voting.

During a brief debate on the Kastner case, the Government were criticized, firstly, for having brought the proceedings through the Attorney-General in the first instance, and secondly, for having decided with "unnecessary haste" to appeal to the Supreme Court Mr. Sharett expressed his approval of the Attorney-General's decision to appeal, and his regret that the matter should have come before Parliament while the case was still *sub judice*.

Mr. Sharett tendered his Cabinet's resignation to President Ben-Zvi on June 29 on the ground that the General Zionists, by abstaining from voting on the no-confidence motions, had violated the principle of collective Cabinet responsibility. At the President's request, he agreed to form a "caretaker" administration which would hold office until the forthcoming general elections on July 25. The vacancies caused by the resignation of the four General Zionist Ministers (Mr. Rokach, Mr. Bernstein, Mr. Serlin, and Mr. Saphir) were filled *ad interim* by giving the portfolio of the Interior to Mr. Moshe Shapiro (*Hapoel Hamizrachi*), the Minister for Social Welfare and Religious Affairs; of Commerce and Industry to Dr. Naphtali (*Mapai*), the Minister of Agriculture; of Communications to Mr. Aranne (*Mapai*), the Minister without portfolio, and of Health to Dr. Joseph (*Mapai*), the Minister for Development.—(Times - Manchester Guardian)

(Prev. rep. Cabinet, 13383 B.)

B. UNITED KINGDOM. — Retention of India Office Library. - Statements by Lord Home and Dr. Azad.

The Secretary for Commonwealth Relations (the Earl of Home) announced in the House of Lords on June 13 that it was the U.K. Government's view that the India Office Library should remain intact and in Britain. It was the opinion of legal advisers that the Library was the property of the U.K. Government, and no decision to disperse or export it could be taken without the Government's full concurrence.

Lord Home explained that the India Office Library was "one of the greatest Oriental libraries in the world," containing some 280,000 printed books and a wealth of other material, including a great collection of manuscripts in English and Oriental languages Its scope was not confined to India and Pakistan but extended also to the literatures, histories, and cultures of many other eastern countries, including Burma, Siam, Malaya, Ceylon, Tibet, Nepal, Persia, and Arabia. It had always been accessible to scholars and research workers from all parts of the world, and the Government would "readily consider any suggestions that the Governments of India and Pakistan might wish to make regarding the detailed administration of or access to the Library."

The Minister was asked about the archives of the East India Company and the India Office now in the custody of the Commonwealth Relations Office. In reply, he said that the Government adhered to the statement made in 1947 by Lord Listowel (then Secretary for India) to the effect that they would be retained in Britain.

Discussions on the matter took place with the Indian Minister of Education, Dr. Azad, who arrived in London on June 14, and who had discussed the future of the Indian Office Library with the Pakistani Minister of Education, Dr. Hussain (see 14303 A). In a press statement on July 7 he reiterated the Indian contention that the Library belonged to "the two successor Governments of Pakistan and India," but stated that the Government of India had agreed to a tripartite discussion as the United Kingdom had a "natural interest" in the matter. Dr. Azad maintained that the transfer of the management of the Library to the Crown in 1935 had been made for technical reasons, and that it had been nullified with the achievement of India's and Pakistan's independence.

The India Office Library was vested in the British Crown by the Government of India Act, 1935, but was not mentioned in the Indian Independence Act of 1947.—(Times - Daily Telegraph - Indian High Commissioner's Office, London) **(14303 A.)**

C. BULGARIA. — Ratification of Warsaw Treaty.

The Bulgarian National Assembly ratified on May 28 the eight-nation treaty concluded in Warsaw on May 18.
(Bulgarian Legation, London) **(Prev. rep. 14296 D.)**

A. MALAYA. — The Anti-Terrorist Campaign. - Malayan Government rejects Communist "Peace Offer."

The progress of the anti-terrorist campaign in Malaya during the past seven months, and other related developments, are described below under cross-headings.

Diminution in Terrorist Activities. In a broadcast on Jan 2, 1955, from Kuala Lumpur, Lieut.-General Sir Geoffrey Bourne (Director of Operations in Malaya) said that the terrorist campaign had caused less hindrance to the life of the country during 1954 than in any year since the start of the emergency in 1948 A total of 713 terrorists had been killed or captured during 1954, compared with 981 in 1953, whilst surrenders had totalled 210, compared with 372 in the previous year. General Bourne pointed out, however, that the cost of the emergency had not dropped in proportion, and was still consuming one-third of the country's revenue, involving an expenditure of 170,000,000 Malayan dollars (nearly £20,000,000).

The Federation Government announced on June 3 that the number of terrorists in the Malayan jungles had dropped by more than half since 1951—from about 8,000 to only 3,500 It was pointed out that eliminations of terrorists by killing, capture, or surrender now appreciably outnumbered recruitment to the Communists, and that it was apparent that a new factor was operating against the terrorists —death in the jungle from malnutrition or wounds, or the sheer hardship of more than seven years of hunted existence in the jungles Although the Communists were less aggressive in many areas (notably in Pahang), the situation in Johore still remained disquieting, two-thirds of all incidents in the past year having taken place in that State.

Anti-Terrorist Operations. - Malayan-Siamese Co-operation. The Under-Secretary at the British Colonial Office, Lord Lloyd, announced on Feb 2 that the Malayan police forces were now in a position to undertake operations against terrorist bases in southern Siam, in co-operation with the Siamese authorities, if the need arose. He explained that for some years there had been an agreement with Siam that both the Malayan and Siamese police might operate across the frontier for a distance of 10 to 20 miles; that the Malayan police had carried out a number of small operations in southern Siam during 1954; that a joint Malayan-Siamese intelligence centre had been set up at Songkla, in southern Siam, and a frontier planning staff established; and that the head of the Siamese police, General Phao, had agreed that British helicopters, as well as supply-dropping and reconnaissance aircraft, might operate across the frontier in support of joint police operations. General Phao had paid a three-day visit to Kuala Lumpur in January to discuss these arrangements with General Bourne.

During April, Siamese police forces operating on the Malayan side of the border seized one of the biggest terrorist arms dumps discovered since the start of the emergency. The Siamese forces, who were led to the spot by a terrorist who had surrendered, seized some 2,000 rounds of ammunition, 200 hand-grenades of Japanese manufacture, 200 detonators, and 317 sticks of dynamite; contact was made with a small group of terrorists, one of whom was killed.

Relatively few contacts with terrorists were made by the security forces in Malaya during the first six months of 1955, although the R.A.F. continued to bomb suspected jungle hide-outs from time to time. Six terrorists were killed by a Gurkha patrol in the Seremban area of Negri Sembilan on March 9, whilst individual terrorists were eliminated in different parts of the Federation during the period under review.

Three British estate managers were killed in terrorist ambushes during this period: Mr. R. D. Williamson (27), manager of a pine-apple estate, who was shot dead at Simpang Rengam (Johore) on Dec 22, 1954; Mr. K D. Paul, manager of the Penggarang rubber estate near Kota Tinggi (Johore), who was killed on March 13: and Mr. B. L. Sheppard, manager of the Oh Sing estate (Malacca), who lost his life in an ambush on June 4. Several Malayan constables were wounded in these attacks.

A New Zealand officer of the Fijian Battalion, Major R Genge, was killed in an ambush in southern Johore on Feb. 21 The attackers spared the lives of a Fijian officer and a Fijian private, both of whom were wounded.

Australian Battalion for Malaya. The Australian Prime Minister, Mr. Menzies, announced on June 15 that the 2nd Battn., Royal Australian Regiment, would leave for Malaya on a date to be announced; that it would be stationed "in the first instance" in Pahang, and would be available for use against the terrorists if necessary; but that it would not be used "in relation to any civil disturbance or in the internal affairs of the Federation of Malaya or Singapore." It was subsequently announced that the Battalion (which fought in Korea) would not leave for Malaya until the end of September.

Communist Proposal for "Peace Talks." - Rejection by Federation Government. It was officially announced in Kuala Lumpur on June 24 that the Federation Government had rejected a Communist proposal to end the eight-year-old jungle war by negotiation It was disclosed that a letter, posted in southern Siam on June 7, had been received by the United Planters' Association of Malaya, for transmission to the Malayan political and communal organizations, proposing that "representatives of the various political parties, guilds, associations, and communities should hold a round-table conference at an early date to discuss the problems of ending the war and achieving peace and independence in Malaya." The letter, written in Chinese, was signed by a certain Ng Heng, who described himself as "representative of the Supreme Command Headquarters of the Malayan Liberation Army." No-one of that name was known to the Malayan police, and it was believed that it was an *alias* for Chen Ping, the secretary-general of the Malayan Communist Party.

The Communist "peace offer" was rejected not only by the Federation Government but also by the All-Races Committee (which assists General Bourne) and by the leading Malayan political parties —the United Malay National Organization (UMNO), the Malayan Chinese Association, and the *Negara* (National) Party. The Malayan Government, whilst reaffirming its desire for peace and the ending of the emergency, stressed that it was not prepared to accept "a Communist type of peace," and said that there was no doubt that the letter was prompted by the Communists' realization that it was impossible for them to gain their objectives by terrorist methods

The Government statement added: "We have seen these sudden shifts in Communist policy before, and we shall not be misled by this one. Knowing the true purpose of the Communist offer and the motives which underlie it, the Government rejects it absolutely and has no intention of negotiating with the Communist terrorists. If the Communists genuinely wish to end the emergency, they can do this today. Liberal terms of surrender are already offered to them and are known to all, as is being demonstrated by many who are taking advantage of them . . . Defections from their ranks are occurring almost daily throughout the Federation. They realize full well that, weakened in numbers and spirit, they cannot gain their object by the continuation of terrorist methods and of their so-called armed struggle."

The R.A.F. in Malaya began on June 24 a seven-day operation, the biggest of its kind to date, in which 20,000,000 leaflets telling the terrorists of the Malayan Communist Party's attempt to negotiate were dropped over the jungle. The leaflets outlined the reasons for the rejection of the Communist "peace offer," and urged the terrorists to surrender under the liberal terms already offered to them.

Two large areas in Pahang and Trengganu, covering 7,300 square miles with a population of about 150,000, were officially declared "white" (i.e. free of terrorists) by the Malayan Government on April 29. (Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau)
(Prev. rep. 13935 A; Australian and N.Z. Forces, 14211 A.)

B. AUSTRIA. — Responsibility for Defence Matters vested in Federal Chancellor. - Allied Lifting of Ban on Military Activities.

The constitutional committee of the Nationalrat (the Lower House of the Austrian Parliament) adopted on June 16 a Government Bill placing defence matters under the responsibility of the Federal Chancellor, and making the new National Defence Office a special department of the Federal Chancellery. The Bill (known as the *Wehrkompetenzgesetz*, and constituting the preliminary framework for the organization of Austria's new armed forces pending future detailed defence legislation) implied the renunciation of the principle of an independent Defence Ministry under a Minister of its own. It was passed by the full Nationalrat on June 22 and by the Federal Council (the Upper House) on the following day. In the Nationalrat the two government parties, the People's Party and the Socialists, voted for the Bill and the Communists and the Independents against; the vote in the Federal Council was unanimous.

The Allied regulation of 1945 prohibiting all military activity in Austria was cancelled by the Allied Council in Vienna on July 8. No restrictions on the future level of the Austrian armed forces were imposed under the recently-signed State Treaty.—(Wiener Zeitung) **(Prev. rep. State Treaty, 14193 A.)**

C. SOVIET UNION. — Expulsion of U.S. Military Attachés from Moscow.

It was announced in Washington on June 17 that the U.S. Government had withdrawn three Assistant Military Attachés from the U.S. Embassy in Moscow at the request of the Soviet Government, which had alleged that the officers concerned had engaged in "improper activities" and had declared them *personae non gratae*. The three officers—Lieut.-Colonel John S. Benson, Captain William Stroud, and Captain Walter Mule—had left Moscow in May and June. Lieut.-Colonel Benson had arrived in Moscow in October last to take the place of Lieut.-Colonel Felchin, who had been expelled in July, 1954, for alleged "espionage activities."—(New York Herald Tribune)
(Prev. rep. 13772 A.)

D. FRANCE. — New Chief of Air Staff.

Air General Paul Bailly, Chief of Staff to the Commander of Allied Forces, Central Europe, was appointed Chief of Staff of the French Air Force on March 16 in succession to Air General Fay.—(Le Monde, Paris) **(Prev. rep. 11513 A.)**

A. UNITED KINGDOM. — R.A.F. Estimates, 1955-56. - White Paper on Supply of Military Aircraft. - New Command Structure in Middle East.

The Royal Air Force Estimates for 1955-56, published on Feb. 24, showed a net expenditure of £513,900,000 after allowing for £26,500,000 of U.S. aid—£16,500,000 for special aircraft purchase, and £10,000,000 for aircraft and equipment which will be bought from the British Government by the U.S.A. and subsequently made available for the expansion and modernization of the R.A.F. The total amount included the following principal items (1954-55 figures in parentheses): Airframes, £80,000,000 (£69,500,000); Aero-engines, £80,000,000 (£62,000,000); Spares, Components, etc., £26,000,000 (£24,500,000); Liquid Fuel, £63,200,000 (£74,700,000); Armament, Ammunition, and Explosives, £37,400,000 (£38,700,000); Radio, Radar, etc., £31,600,000 (£29,700,000); Instruments, £9,000,000 (£9,500,000).

An accompanying memorandum by the Secretary for Air explained that "the primary task which now confronts the R.A.F is to build up the 'V' bomber force [i e. *Valiants, Victors*, and *Vulcans*], with its nuclear potential, to a state of high efficiency and preparedness Thus the R.A F, together with the U S Air Force, will provide the main deterrent to aggression, since it is primarily by the threat of overwhelming nuclear striking power that an aggressor will be deterred . . " As this V-bomber force must be "capable of completing its mission even though a surprise attack might first have been launched upon this country," its bases and personnel would have to be chosen with this consideration in mind, and its operational methods perfected "to ensure success, however difficult the conditions." These bombers would be coming into service within the next 12 months, the first squadron of *Valiants* being now in course of formation. When the squadrons were ready they would make frequent visits to the Middle and Far East, and airfields were being adapted to accommodate them, not only in the U K., but also in Cyprus, Jordan, and Malaya.

Dealing with home defence, the memorandum stated that although the expansion of Fighter Command had been completed, the proportion of all-weather fighters would continue to grow. All-weather squadrons would probably receive their first *Javelin* fighters during 1955-56, and other squadrons were being re-equipped with *Venom* night-fighters Meanwhile the first *Hunter* squadrons had been formed, and although the delivery rate had been disappointing, re-equipment was proceeding steadily, once certain development difficulties had been overcome (see below), the *Hunter* was likely to prove a formidable aircraft Advances had also been made in the development of both air-launched and ground-launched guided missiles, and production orders had been placed for air-to-air weapons. Finally, hundreds of new radar installations had been built as part of the control and reporting system which now covered the country; a new and advanced type of radar had been developed, and arrangements had been made to link the system with radar installations on the Continent, in order to give mutual protection.

The memorandum stated that orders had been placed for the *Vickers-1000* long-range jet transport, which would provide increased mobility for the strategic reserve of land and air forces; in order to give Transport Command experience of operating high-speed jets before these machines were delivered, *Comet* Mark II's were being ordered and would be used regularly on the service to the rocket range at Woomera, South Australia Although the development of a new flying-boat for military purposes would not be justifiable, limited numbers of *Sunderlands* would continue to serve for some time.

Despite expansion and re-equipment, it had been possible to reduce manpower from the 1953 peak of 277,100 to an estimated 259,300 in 1955 and 254,000 in 1956, but the most difficult immediate problem was to find sufficient radio-engineers and trainees. Moreover, the number of men signing on for short-term engagements in the R.A.F. had declined, and the proportion of National Servicemen would increase during 1955-56 to nearly 30 per cent.

The Estimates were passed by the House of Commons on March 10 without a division.

Mr. G. R. Ward (Under-Secretary for Air), in moving their adoption, stressed the need in nuclear warfare for bombers able to operate at great height and speed in all weather conditions. He claimed that Britain possessed in the *Valiant* an aircraft capable of better performances in those respects than even the U.S. *B-47*, at present the backbone of the U S. Strategic Air Command. The *Vulcan* and *Victor* "promised considerable improvements" on the *Valiant*, both being "a good deal better than comparable projects in the same stage of development elsewhere"; both had already flown in test flights at over 50,000 feet and at nearly the speed of sound. The first *Vulcans* were expected to come into squadron service during 1956, with the *Victors* not far behind; meanwhile the *Canberra* force, at present the principal component of Bomber Command, was an effective all-weather striking force and "a most useful lead-in" to the 'V' bomber.

"We are doing all we can," Mr. Ward explained, "to ensure that a surprise attack will not cripple the effectiveness of the 'V' bomber force and its ability to retaliate at once. The [Bomber] Command will have its main bases and a widely dispersed network of operating sites at home and abroad. It is being organized to maintain a high state of readiness and flexibility. These steps are an important contribution to the deterrent. An aggressor could not safely attempt a surprise assault unless he could be sure of attacking all the American and British strategic airfields simultaneously."

Turning to Fighter Command, Mr. Ward said that the Government fully shared public anxiety about the setbacks which had affected the day-fighter re-equipment programme, and which had culminated in the abandonment of some marks of the *Swift* (see below) The extent of these setbacks should not be exaggerated, however, and the planned number of front-line fighters would be available only a few months later than intended

Dealing with criticisms of the new *Hunter* fighter, the Minister explained that full operational clearance had been held up by the need to incorporate certain modifications, such as dive-brakes, and that there were still restrictions on gunfiring at great heights and in certain temperatures; nevertheless, these were "well on the way to being overcome" The *Hunter* was, however, a day-fighter capable of dealing effectively with any bomber types likely to be available for attacks on Britain for some years, it was popular with pilots and extremely easy to fly, and, taking all essentials into account, was "much better than the Russian MIG-15 and better than the MIG-17" He added that the U S A. had shown confidence in the *Hunter* by placing a large offshore contract for it, and that it would also be supplied to the Netherlands, Belgian, Danish, and Swedish Air Forces

After speaking of the "considerable promise" shown by the early flights of the *Javelin* (the new supersonic day-fighter equipped with "Aden" guns and able to carry air-to-air guided weapons), Mr. Ward announced that a development batch of 18 fighters based on the *Javelin*, but with still more advanced electronic and guided-weapon systems, had been put in hand.

With regard to the "natural anxiety" felt about the progress being made in surface-to-air guided weapons, he stressed that it was wrong to regard these weapons as "the logical successors of the anti-aircraft gun," since the immense destructive power of the hydrogen bomb made "the area of defence known in gun-defended zones quite useless" Guided weapons, he stressed, must be able to engage bombers well away from vital targets, and by a combination of guided weapons and manned fighters the defence must try to bring down the bombers well out at sea Although surface-to-air guided weapons had been developed to a point where reasonably effective performance could be expected, they were very expensive and complicated to instal, and large-scale production could only be justified if they would "really meet the threat" and if they could be developed to "meet increased performance by the attacker." The Government intended to go into production with a weapon which would meet these requirements.

Before long, Mr. Ward concluded, the main threat to Britain would be from high-flying bombers armed with nuclear weapons; since no warning period could be counted on, instant readiness would be essential Instant air defence against the nuclear threat was therefore likely to make increasing demands on aircrews, and to become a full-time job for the regular squadrons of Fighter Command. *Meteors* and *Vampires* of the Royal Auxiliary Air Force would also be highly effective against airborne attack or diversionary raids by paratroopers, and would remain front-line fighting units. Although nuclear war must necessarily be "devastating and appalling," he was confident that Fighter Command was capable of dealing with any type of bomber which the Soviet Air Force now had in service, and that, when fully re-armed, it would have day and night fighters able to destroy any jet bombers which Russia might then possess.

Similarly, when Bomber Command was fully re-equipped it would have aircraft able to reach their objectives against any opposition they were likely to encounter Meanwhile the R.A.F. had a *Canberra* force trained to a high standard of efficiency and a Coastal Command equipped with good maritime aircraft and anti-submarine weapons, whilst on the Continent the Second Tactical Air Force provided a valuable contribution to the defence of the central theatre. In short, the R.A.F.'s standards of efficiency had never been higher, and its weapons were superior to any which Russia had today or had in prospect

A White Paper on the Supply of Military Aircraft had been published on Feb. 16.

Declaring that "public interest in the supply of aircraft is natural," and that, within the limits imposed by security, the country had a right to be assured that "the best possible use is being made of national resources and money," the White Paper stressed that Britain had "an effective air defence against anything that any potential enemy is at present able to bring against her." Britain's night-fighter defence, in particular, was second to none in the world. After describing as "totally incorrect" the view that "the Services are equipped with obsolete aircraft from the last war," the White Paper explained, however, that research on advanced types had been restricted after the outbreak of the Korean War in 1950, and that the decision had then been taken not to attempt supersonic flight in manned aircraft. "It is now clear," the White Paper said, "that this decision seriously delayed the progress of aeronautical research in the United Kingdom."

With the outbreak of war in the Far East, production orders for the *Hunter* and the *Swift*, both swept-wing fighters, had been placed much earlier in the development phase than would normally have been the case. Production orders had also been placed for *Valiant* bombers and *Sea Venom* all-weather fighters before the first prototypes had been flown. Clearly the decision to place these orders meant taking exceptional risks, as well as the overloading of particular aircraft firms, but it also offered the hope that some of the latest aircraft would be available earlier and could be used in war, even if their operational performance did not completely fill the original requirement. In the event, serious development troubles had been

encountered with the *Hunter*, and Marks I to III of the *Swift* " could not be brought to acceptable operation standard " Certain modifications, however, had been introduced into the *Swift* Mark IV, and further tests were being carried out to see whether the improvement warranted putting this Mark into service. Meanwhile *Hunters* could replace the Mark IV *Swifts* if necessary, and development was continuing on other marks designed for special functions. The White Paper added that the latest fighter types were armed with four 30 mm. " Aden " cannons, " the most destructive gun armament in service anywhere in the world," capable of delivering ten times as much high-explosive a second as the cannons of the Russian MIG

Finally, the White Paper suggested that a policy of " short steps," involving more frequent but shorter advances in the development of new types of operational aircraft. would not only have the advantage of easing technical problems, but would also mean that up-to-date aircraft would at all times be well advanced in development, and in the event of an emergency could be put into production relatively quickly. While the full consequences of such a policy were still being examined, it seemed likely—in spite of the possibility of greater expenditure on development—that the ultimate result would be to economize resources and to increase the nation's preparedness.

The Secretary for Air (Lord De L'Isle and Dudley, V.C.) announced on Feb. 24 that a committee had been set up to review methods of maintaining and servicing R.A.F. equipment " with the object of obtaining economy with efficiency." The committee consists of Air Chief-Marshal Sir Leslie Hollinghurst (chairman) ; Mr. F. C. Hooper, managing director of Schweppes Ltd. (vice-chairman) ; Mr. James Crawford, president, National Union of Boot and Shoe Operatives ; Air Marshal Sir Owen Jones, Controller of Engineering and Equipment, Air Ministry ; Air Vice-Marshal L. J. V. Bates, Director-General of Equipment, Air Ministry ; Mr. S. C. Robbins, of the Ministry of Supply ; and Air Commodore F. Pearce, Director of Manning, Air Ministry.

Changes in the command structure of the Middle East Air Force, necessitated by the redeployment of R.A.F. forces in the Middle East in accordance with Britain's agreements with Egypt and Iraq, were announced on July 9. In future, the command will be sub-divided into two regional groups, (1) Air Headquarters, Levant, which will be responsible for the northern areas of the command and will have its H.Q. at Nicosia, Cyprus, and (2) H.Q., British Forces, Aden, which will continue to control R.A.F. units in the Aden Protectorate, the south Arabian coast, Kenya, and the Sudan, and which will also have responsibility for the Persian Gulf staging posts of Bahrain and Sharjah, hitherto under the control of the A.O.C., Iraq. Both groups will be subordinate to the H.Q. in Cyprus of Air Marshal Sir Claude Pelly, C.-in-C., Middle East Air Force.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14093 A ; Defence Estimates, 14089 A ; 1954-55 Air Estimates, 13543 A.)**

A. UNITED STATES - SOVIET UNION. — Shooting-down of U.S. Plane in Bering Straits Area. - Soviet Apology and Offer of Compensation.

A U.S. naval plane was fired on by Soviet aircraft in the Bering Straits area on June 23 and made a crash landing on St. Lawrence Island, in U.S. territory. Three of the crew of 11 were injured by bullets from the Soviet aircraft.

In reply to a U.S. protest, conveyed by Mr. Dulles to M Molotov at San Francisco (where the Secretary of State and the Soviet Foreign Minister were attending the U N tenth anniversary session, the Soviet Government expressed regret for the incident but maintained that it had occurred over Soviet territorial waters, as the result of a violation of the Soviet frontier by the American plane. Nevertheless, in view of the fact that the incident had taken place " under conditions which do not exclude the possibility of a mistake by one side or the other," the Soviet Government expressed " its willingness to compensate for 50 per cent of the damage suffered by the American side."

It was announced in Washington on July 7 that the U.S. Government would accept the Soviet offer to pay half the damage sustained by the U.S. aircraft. Although the U.S. Government insisted that the American plane had at no time violated Soviet air space, it was prepared to regard the Soviet offer as an acceptable basis for disposing of the incident, in view of Russia's expression of regret.—(New York Times) **(Prev. rep. Air Incidents, 13899 A.)**

B. TURKEY. — Creation of Banking Council. - Increase in Bank Rate.

It was announced on July 5 that the Turkish Government was setting up a Banking Council—comprising representatives of the Treasury, the State Bank, and private banks—which would supervise credits by private banks to individuals with the aim of preventing speculative investment.

The Turkish State Bank increased its bank rate from 3 per cent to 4½ per cent on June 29. (Financial Times)

C. NYASALAND. — Constitutional Changes.

Proposals for the revision of the Nyasaland Constitution were announced in Blantyre on Feb. 9 by the Governor, Sir Geoffrey Colby, to a conference of five delegates from each of the European, Asian, and African communities.

It was proposed that membership of the Legislative Council should be increased from 21 to 23, of whom 12 would be official members (including the Governor) and 11 unofficial. Of the unofficial members, five would be Africans (compared with three at present) and the remaining six would be shared by the non-Africans (Europeans and Asians), instead of the present arrangement of five Europeans and one Asian. There would no longer be a European member of the Legislative Council to represent African interests, but this would be offset by increasing the number of official members from 11 to 12.

The present system of nominating European and Asian members would be abolished, and an electoral system based on the present Federal system introduced. The method of selecting African members through the Protectorate and provincial African councils would remain unchanged, though the Governor stated that he was prepared to discuss with the Africans a more satisfactory method.

The proposed changes were strongly criticized by all racial groups in the Protectorate, and further discussions were held in the ensuing months to try to reach agreement. The European community declared that the proposals " go too far and represent too fast a constitutional change, and are not warranted by the present stage of development of African Nyasaland " ; the Africans reaffirmed their demand for equal representation with non-Africans on the Legislative Council, representation on the Executive Council, and universal adult African suffrage ; whilst the Asians objected to the suggested maintenance of the *status quo* on the Executive Council and to the method of electon of non-Africans, which, they claimed, would lead to all six non-African seats being occupied by Europeans. As no agreement could be reached, the British Colonial Secretary, Mr. Lennox-Boyd, announced in the House of Commons on June 15 that the original proposals would be put into effect.

Dealing with some of the criticisms of the proposals, Mr Lennox-Boyd said that he did not consider that the time had yet come for the inclusion of an African on the Executive Council He had considered " very carefully " the suggestions for parity for the Africans on the Legislative Council, but thought that the immediate practical effect of having a sixth African member would be slight, as there was in any case to be a majority of officials over unofficials He continued : " In Central Africa, parity—and in this context we mean parity between Africans and non-Africans, and not the parity between three races which we have in Tanganyika—has become a sort of magic word, conjuring up all the emotions on which racialism thrives. I believe that if we introduced now something which could be called parity we should stir up these emotions, and all our hopes of real progress along the lines I have outlined would rapidly fade away."

Mr. Lennox-Boyd also stated that, with the introduction of elections, it would be necessary to set a term to the life of the Legislative Council and that it was proposed that this should be four years " I sincerely hope," he added, " that this period will be used by all concerned in Nyasaland to join together in trying to work out a new approach . . [to the constitutional question] so that, if agreement is reached on new arrangements as a result of such consultation, they can be introduced at the beginning of the following four-year programme "

All three racial groups in the Protectorate again protested at the changes following the Colonial Secretary's statement. The Nyasaland Association (European) declared that the changes would lead to the continuation of a purely racial approach to politics and would retard the economic development of Nyasaland. The African leader and Federal M.P., Mr. W. M. Chirwa, sent a cable to the Colonial Secretary in which he asserted that the decision to go ahead with the changes was " arbitrary, oppressive, and undemocratic," and had been influenced by interference from the Federal Government. The Asian leader, Mr. Sattar Sacranie, particularly criticized the decision to give the Legislative Council a life of four years ; he described it as " most unrealistic," and said that more time was needed to show whether the changes would work.

Lord Malvern, Prime Minister of the Rhodesia and Nyasaland Federation, stated on June 17 that the Federal Government had been consulted about the proposed changes. He added, however, that he did not think it would be in the public interest to say what its attitude was, as this would only lead to recriminations from members of one race or another.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 13058 A.)**

D. NORWAY - YUGOSLAVIA. — Agreement on Cultural Co-operation.

A convention on cultural co-operation between Norway and Yugoslavia, the first of its kind concluded between Yugoslavia and a foreign country, was signed in Belgrade on June 24.

(Tanjug Agency, Belgrade)

A. UNITED KINGDOM. — Press Council. - New Chairman. - First Annual Report.

The General Council of the Press, meeting in London on July 12, unanimously elected Sir Linton Andrews, editor of the *Yorkshire Post*, as its chairman in succession to Colonel J. J. Astor, who had resigned because of ill-health. It was announced that Mr. Cyril Hamnett, of *Reynolds News*, had been nominated to fill the Newspaper Proprietors' Association managerial vacancy on the council caused by Colonel Astor's resignation.

The first annual report of the General Council of the Press had been published on Oct. 14, 1954, under the title *The Press and the People*, and is summarized below.

The report said that the main ethical questions that had come before the Council during its first year had related to the alleged invasion of private life by reporters and photographers, the disclosure of information which officials and others wished to remain secret, the reporting of crime, and the treatment of sex

Although very few specific cases of alleged invasion of private life had come before it, the Council expressed the opinion that " the newspaper world ought to consider whether it would be better not to carry the hunt for exclusive particulars to such an extreme, but to agree on methods to cut down the number of reporters putting questions to a harassed victim." Pointing out that much ill-feeling against the Press had been caused by resentment against intrusions into private life, the Council said that it had given much thought to this matter and sought the co-operation of proprietors and editors " in minimizing this nuisance and form of persecution "

On the alleged disclosure of secrets, the Council said " Some critics, when they refer to alleged press intrusions, cherish the simple belief that they can suppress a piece of business or a document of which the public ought to be apprised, merely by labelling it ' Private and Confidential.' . . Many a fussy little jack-in-office would like to set up his own Official Secrets Act in this way. Every experienced editor will refuse to be fenced off. If hushing-up a matter is against the public interest, the duty of the Press is clear : It must tell the public what is happening." As an example, the Council said that it was wrong for members of a local authority to treat the public affairs entrusted to them as if they were their own private concern, and to make arrangements for spending large amounts of public money without giving the ratepayers ample opportunity to have their own say in the matter.

Complaints about the reporting of crime had usually taken the form of saying that some papers often gave the criminal a kind of glamour and tempted moral weaklings to follow bad examples. On this point the Council said · " Most of these complaints appear to be grossly exaggerated. The Press reports both crime and punishment, and we believe it to be good for the nation to realize, by frequent illustration, how unlikely it is that crime will pay, and how hard is the way of the transgressor. . . . The Council agrees, however, that criminals should not be painted as reckless heroes who have gambled for great gain and lost "

As regards the treatment of sex in the Press, the Council said : " The editor who knows his business will draw a clear distinction between those reports with a sex element that may excite imitation of wrong conduct and those in which the interest is scientific or at least arises from a healthy curiosity about the mysteries of human existence. . . . Those who attack the Press, or parts of it, often complain of pornography They put the word to so wild a use that it is doubted whether all who rely on it for controversial emphasis know what it means. . . . The Council must agree, however, that there is unwholesome exploitation of sex by certain journals, a tendency which it has condemned in a public statement."

A persistent allegation against the Press (the report continued) had been that it was under the influence of advertisers to the detriment of the public interest. The Council said in this connexion : " During the year under review a striking example of the fallacy of this argument has been seen. The tobacco industry is one of the most lucrative sources of advertising revenue. Yet the widest publicity has been given in British newspapers to reports associating smoking with cancer of the lung and to the consequent effect of these reports upon tobacco shares and sales."

On the question of good or bad taste in the Press, the Council commented that newspaper readership in Britain varied from the most highly educated to the least literate. It observed . " To maintain the circulations on which their existence depends, newspapers have to flavour themselves according to their public's requirements and to compete hourly with others catering for a similar public. . . . With millions of the less-cultivated in the land now buying a paper, there is a proper and important place for what, without priggishness, can be termed a ' vulgar ' Press. It should be remembered that what we here style ' vulgar ' papers often disclose public abuses which would not come the way of the others. . . . These considerations have their bearing upon questions of good taste. It has often been suggested to the Press Council that this or that report is in bad taste and for that reason should be condemned This is difficult and disputable ground."

Discussing the drop in circulations caused by the increase in newspaper prices in May, 1951, the Council said that there had been a steady overall recovery of lost ground, and that by May, 1954, the total sales of national dailies were once more in excess of 16,000,000. Not all newspapers, however, had benefited proportionately from these gains. Over the past year the only papers to have made appreciable progress were the *Daily Mirror*, the *Daily Sketch*, and the *Daily Telegraph*, whereas since May, 1953, the *Daily Express*, the *Daily Mail*, the *Daily Herald*, and the *News Chronicle* had either made no progress or had suffered losses in sales of up to four per cent The report said " At present the mass public appears to favour daily newspapers with an emphasis on pictures, strip cartoons, and short features of human interest at the expense of political and foreign news and articles involving solid blocks of letterpress. On the other hand, a smaller section of the public is being increasingly drawn to a type of journal where pictures are kept to a minimum and strip cartoons are absent, but where a detailed coverage of home, foreign and imperial news is given full scope." It was stated that circulations of Sunday newspapers catering for " serious readership " had increased, but that the papers aimed at this type of reader represented only about 3 per cent of the total Sunday sales, which were in excess of 28,000,000 copies

It was stated that a special sub-committee representing newspaper and journalists' organizations was drafting a Bill—in the form of an amendment to the Local Authorities (Admission of the Press to Meetings) Act, 1908—aimed at securing the right to report more freely the proceedings of authorities spending public money. Stressing that many radical changes had taken place since the Act of 1908, the Council pointed out that many new authorities (some popularly elected, others not) were now spending public money , that, by almost common agreement, their activities should be reported, with proper safeguards , and that while many authorities gave the Press all facilities that could reasonably be asked, others were hostile to admitting reporters to their meetings, and in the worst instances tried to work in secrecy It was stated that a deputation to the Attorney-General on these matters had had a " most encouraging " reception, and that it was hoped that the amending Bill, when framed, would be sponsored by a Member of Parliament as a private member's Bill.

It was commented in the report that the majority of the cases coming before the Press Council in its first year were not of a serious nature but were such as arose " through misjudgment or other human error."—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Press Council, 13094 A.)**

B. SWITZERLAND. — Government Decision to lift Ban on Jesuit Order. - Forthcoming Legislation.

The head of the Swiss Department of Justice and Police, Dr. Markus Feldmann, announced in the Council of States on June 23 that the Federal Government, " after examination of the problem," would prepare legislation for the abrogation of Articles 51 and 52 of the Federal Constitution of 1848, which banned the Society of Jesus (the Jesuit Order) and forbade the setting-up of new monasteries or convents or the re-establishment of those which had previously been suppressed. Dr. Feldmann was speaking on a motion, introduced by the Catholic Conservative Party, asking the Federal Council to submit legislation for the repeal of these Articles, which were held to be of a discriminatory character and " contrary to the principles of Swiss democracy."

In accepting the motion, Dr. Feldmann recalled that the repression of Jesuit activities had been incorporated into the Constitution of 1848 after a religious war between Protestant and Roman Catholic Cantons in the previous year, whilst the other clauses of Articles 51 and 52 had been added in 1874 at the time of the *Kulturkampf* which followed the Papal proclamation of the dogma of the Immaculate Conception in 1870. Since then, he pointed out, conditions had greatly changed and the Roman Catholic section of the population were now fully participating in the development of the country's free and liberal institutions. Moreover, the decisive principles of Switzerland's democratic order, such as freedom of religion and conscience, freedom of religious expression, and the denominationally neutral character of public education, were so firmly rooted in the Constitution that any attempt to alter them was certain to fail. Other factors influencing the Government's decision were the fact that discriminatory legislation against the activities of members of certain denominations was no longer required for the solution of disputes on cultural and political matters ; that peace between the various denominations was sufficiently protected by the ordinary law ; and that both Roman Catholics and Reformists were in agreement that freedom of religion and conscience was no longer a question of theological dogma, but a State political principle. Finally, Dr. Feldmann pointed out that, whilst Article 51 of the Constitution prohibited Jesuit religious and educational activities, Jesuits were free under existing law to influence public opinion through literature, the Press, at public meetings, or over the radio.

The Council of States agreed to refer the motion to the Federal Council for further action.—(Neue Zürcher Zeitung)

Note. The two relevant articles of the Swiss Constitution are worded as follows :

Article 51. " The Order of Jesuits and the societies affiliated to it cannot be admitted in any part of Switzerland, and all activity in church or in the schools is forbidden to their members.

This ban may be extended also, by Federal decision, to other religious Orders whose activity is dangerous for the State, or which disturbs the peace among the various denominations."

Article 52. " It is forbidden to found new monasteries or religious Orders, or to re-establish those which have been suppressed."

About 57 per cent of the Swiss population are Protestants and 41 per cent Roman Catholics. (Neue Zürcher Zeitung)

AUG 1 0 1955

JULY 16—23, 1955

A. GENEVA CONFERENCE.—Opening of "Summit" Conference of Heads of Governments.

The conference of the Heads of Government of France, the Soviet Union, the United Kingdom, and the United States—M. Edgar Faure, Marshal Nikolai Bulganin, Sir Anthony Eden, and President Dwight D. Eisenhower—opened on July 18 at the *Palais des Nations* in Geneva, the former seat of the League of Nations and now the European headquarters of the United Nations. The delegations were as follows:

France. M Edgar Faure, Prime Minister; M Antoine Pinay, Foreign Minister, and a number of advisers and experts, including M. de Margerie and M de Crouy-Chanel (respectively Director and Assistant Director of Political Affairs at the Quai d'Orsay) and M Louis Joxe, Ambassador in Moscow

Soviet Union. Marshal Bulganin, Prime Minister; M. Khrushchov, First Secretary of the Communist Party of the U S S R, M Molotov, Foreign Minister, Marshal Zhukov, Minister of Defence; M Gromyko, First Deputy Foreign Minister, M Semeonov, head of the Central European section of the Soviet Foreign Ministry, and formerly Soviet High Commissioner in Eastern Germany, M. Malik, M Vinogradov, and M Zarubin, the respective Ambassadors in London, Paris and Washington; and M Pushkin, Ambassador to the German Democratic Republic (Eastern Germany).

United Kingdom. Sir Anthony Eden, Prime Minister, Mr Harold Macmillan, Foreign Secretary, Sir Norman Brook, Secretary to the Cabinet; General Sir Nevil Brownjohn, Deputy Secretary to the Cabinet, Sir William Hayter, Ambassador in Moscow, Sir Ivone Kirkpatrick, Permanent Under-Secretary of State, Foreign Office; and Sir Harold Caccia, Sir Geoffrey Harrison, Sir George Young, and Lord Hood, of the Foreign Office

United States. President Eisenhower, Mr John Foster Dulles, Secretary of State, Mr Charles E Bohlen, Ambassador in Moscow, Mr. Llewellyn E Thompson, Ambassador in Vienna, Mr. Dillon Anderson, special assistant to the President on national security; and a number of State Department officials.

Prior to the opening of the conference, Sir Anthony Eden, M. Faure, Marshal Bulganin and President Eisenhower had made important statements outlining the attitude of their Governments to the problems to be discussed at Geneva. These are given below under cross-headings, together with other related developments.

Statement by Sir Anthony Eden.

Speaking in London on July 7 at a dinner given in his honour by the English-Speaking Union, the Prime Minister stressed that there were three principles from which Britain would not depart. "(1) We are not prepared to break up the NATO. (2) We will not be parted from the United States. (3) We will work for the unification of Germany." Subject to these principles, he added, "our position is negotiable."

The Prime Minister emphasized that the German problem was at the heart of the whole problem of European security, and that there could be no solution as long as Germany was divided He continued: "There are risks for everybody in any attempt to solve this problem, but we have to solve it because there will be neither security nor lasting peace in Europe unless we do . I quite understand that the Russians fear that a free Germany would probably unite with the West. I think that she would The Russians may even consider this dangerous to their security. But the answer is that it need not be so We are ready—and I believe that the Western nations, including Germany, are also ready—to agree to any reasonable arrangements which will give Russia reassurance on this point.

"We have placed certain definite restrictions upon ourselves. The West German Government have undertaken these engagements with us. There has never been anything like it in the world before: a voluntary limitation of armaments, a voluntary system of control and inspection, and plans still being worked out for a pool of armaments and other arrangements of that kind These ideas are worthy of study by everybody, whichever side of the Iron Curtain they find themselves. There is no reason why they should not be extended in some form from the West to the East Maybe other plans could be worked out, too, to give confidence and security. But perhaps I had better keep these for Geneva . . ."

Statement by M. Faure.

In a brief statement in Paris on July 13, M. Faure proposed that the four Powers should cut their arms budgets and should put the resultant savings into a common fund which would be used to assist under-developed countries and raise the standards of living of the world's under-developed areas.

The French Prime Minister (who was speaking at a press conference) stressed that a European settlement involved a solution of the German problem, the organization of security, and all-round disarmament. The restoration of German unity, he said, could only be achieved "in conformity with the universally admitted principles of the rights of man," and it would have to be accompanied by a reinforcement of security, "in which everyone, and naturally the Soviet Union, is interested" As regards disarmament, he urged that the great Powers should give an immediate example by agreeing to all-round cuts in their defence budgets and earmarking the proceeds for the above-mentioned purposes

M Faure prefaced his statement by pointing out that France, for the first time since the war, would be represented at "summit" level at a four-Power conference He added that "although France will not be the most powerful nation represented at Geneva, she will try to avoid being the least constructive."

Statement by Marshal Bulganin.

Marshal Bulganin told a press conference in Moscow on July 15, shortly before leaving for Geneva, that the Soviet delegation would exert all its efforts to find a "common language" with the Western Powers. His statement was as follows:

". The First and Second World Wars imposed countless sacrifices on humanity Today the policy of the 'cold war', inflated military budgets, and the arms race impose huge burdens on the peoples and give rise to alarm and fear for the future People can breathe freely only when they are sure of the morrow and know firmly that the monstrous calamities of war do not threaten them or their children, and that they can live and work in peace.

There is much talk in the West of the danger which allegedly arises from the Soviet Union With this excuse military blocs are being formed and military bases set up around our country. We have never intended and do not intend to attack anyone . . . But, seeing the war preparations of other States, we naturally cannot but take measures to safeguard the security of our country . .

We did not want and do not want war, and we consider it our sacred duty to exert all efforts to substitute an atmosphere of confidence, mutual understanding, and business-like co-operation for the present tension in international relations . . A great victory for the cause of peace would be the establishment of a collective security system in Europe, with the participation of other States also We are convinced that this is feasible . .

It is sometimes said that a peaceful settlement of international issues is prevented by differences in the social and political structures of different countries. But the social and political structure is a domestic affair of the people of each country Some foreign leaders dislike much of our way of life, just as we may dislike much of theirs But why should differences in their social and political structures prevent the peoples from living in peace and developing mutually advantageous trade and cultural relations? Some people think that capitalism is better than socialism. We are convinced that the opposite is the case This argument cannot be settled by force, through war Let everyone prove in peaceful economic competition that he is right

There are many unsettled disputed questions in the world, and this will be the case in the future too Such is life But we can and must discuss these questions patiently and loyally at the round-table conference, and find a peaceful solution to them. It is said that even a bad peace is better than a good quarrel If we exert all our efforts and achieve not a bad but a good, real peace, millions of men and women in all countries will draw a sigh of relief. They will be rid of the fear of another war They will be able to live and work calmly and confidently, and this tranquillity and confidence will surely be the destiny of our own and succeeding generations It is for this purpose that we are going to Geneva.

It would be naïve to think that we shall be able to solve all the complex international problems at this conference. But if all participants in the conference display good will and sincerely seek to reach agreement, we will undoubtedly be able to find common ground and chart feasible ways for an effective settlement of important questions on which the peace and well-being of the peoples depend. There is no doubt that great efforts will be required to attain the lofty aims of the conference The Soviet delegation will exert such efforts We hope that this will also be done by the other participants in the conference."

Prior to Marshal Bulganin's declaration, the official Tass Agency had issued a statement on July 12 re-defining the Soviet Government's attitude to Germany and to the principle of European collective security.

After refuting suggestions by "some American and British leaders" that the Soviet Union had lost interest in the reunification of Germany, the Tass statement said that the U.S.S.R had always given priority to this question, but that its settlement had been made more difficult by "the creation of a West German Army and the incorporation of Western Germany in the military bloc of the Western Powers." Moreover, there was no foundation for the argument that the Soviet Union was opposed to German unification because she feared the potential strength of a united Germany. In the Second World War the U.S S R. had defeated a Germany that had had at her disposal the resources of the whole of Europe, and today, when the U.S.S R was much more powerful, there was still less reason to fear the military and economic potential of a united Germany. The statement continued.

"The Soviet Union opposes the revival of German militarism, and the incorporation of Western Germany or a united Germany in military groupings, not because it fears a militaristic united Germany, but because such a policy leads to an increased threat of a new war . . . Not a single country taking part [in such a war] would escape enormous destruction and human sacrifices. But the greatest danger of a new war would be for Germany. Germany would be in the centre of military operations, with ensuing disasters for the German people

"The solution of the German question is indissolubly linked with ensuring the security of Europe as a whole . . The German people are no less interested than others in the establishment of a collective security system in Europe This system could be joined by both the German Democratic Republic and the German Federal Republic, whose *rapprochement* is essential to hasten the restoration of German unity. As soon as a single, democratic, peace-loving Germany is restored, she will occupy her worthy place in the family of peace-loving European peoples united by a system of collective security . . ."

Statement by President Eisenhower.

President Eisenhower delivered the following radio and television broadcast on July 15, just before he left Washington by air for Geneva.

"Within a matter of minutes I shall leave the U.S.A. on a trip that in some respects is unprecedented for a President of the United States. Other Presidents have left the continental limits of our country for the purpose of discharging their duties as Commander-in-Chief in time of war, or to participate in conferences at the end of the war. Now, for the first time, a President goes to engage in a conference with Heads of other Governments in order to prevent war; in order to see whether in this time of stress and strain we cannot devise measures that will keep from us this terrible scourge that afflicts mankind. . . I go for a very serious purpose—to attempt with my colleagues to change the spirit that has characterized inter-governmental relationships in the world during the past ten years.

Let us enumerate a few of the problems that plague the world—the problem of armaments and the burdens the people are forced to carry because of the necessity for these armaments; the problems of the captive States, once proud peoples that are not allowed their own form of government freely chosen by themselves; the problem of divided countries—people related to each other by blood and kinship, and divided by force of arms into two camps that are expected to be hostile to each other. Then we have the problem of international interference in the internal affairs of free governments, bringing about a situation that leads to subversion, difficulties and recriminations within a country, sometimes even to revolutions.

But governments are divided also by differing ambitions, by differing ideologies, and by mutual distrust and the alarms that these create. Because of these alarms they build up armaments and place their trust for peace and protection in those armaments. These armaments create greater alarms, and so we have a spiral of growing uneasiness, suspicion, and distrust. That is the kind of thing that the world faces today.

For these things there is no easy settlement. In the brief time that this conference can exist, it is impossible to pursue all the long and tedious negotiations that must take place before the details of these problems can be settled. Our many post-war conferences have been characterized too much by attention to details, by an effort apparently to work on specific problems rather than to establish the spirit and attitude in which we shall approach them. Success, therefore, has been meagre. Too often, indeed, these conferences have been a mere opportunity for exploitation of nationalistic ambitions, or sounding-boards for the propaganda that the participants want to spread to the world.

If we look at this record, we might say 'Why another conference? What hope is there for success?' Now, the first question I ask you is. 'Do we want to do nothing? Do we want to drift along to the inevitable end in such a contest of war or increased tensions?'

We cannot look at this whole situation without realizing, first, that pessimism never won any battle—whether in peace or in war. Next, we must understand that one ingredient has been missing from all these conferences—an honest intent to conciliate, to understand, to be tolerant, to try to see the other fellow's viewpoint as well as we see our own. If we can change the spirit in which these conferences are conducted, we will have taken the greatest step towards peace, future prosperity, and tranquillity that has ever been taken in all the history of mankind.

I want to give you a few reasons for hope in this project. First, the people of all the world desire peace. . . Not a peace of the mere stilling of the guns, but a peace in which they can live happily, tranquilly, and in confidence; in which they can raise their children in a world of which they will be proud. That common desire for peace is a terrific force in this world, and one to which I believe all the political leaders in the world are beginning to respond. They must recognize it.

Another item. Did you note this morning the speech made by Premier Bulganin in Moscow? [see above]. Every word he said was along the line that I am now speaking. He talked of conciliation, tolerance, understanding. I say to you—I say to all the world: If the words that he expressed are as truly reflective of the hearts and minds of the men in the Kremlin as we are sure they are reflective of the hearts and minds of all the people of Russia, as of the hearts and minds of all the people in the world everywhere, then there will be no trouble between the Russian delegation and our own at this coming conference.

I want to mention another item that is important in this problem. The free world is divided from the Communist world by an Iron Curtain. The free world has one great factor in common. We are not held together by force, but by this great factor—it believes, under one religion or another, in a Divine power. It believes in a Supreme Being. Each one of those religions has as one of its basic commandments the words—terminology that is similar to our golden rule—'Do unto others as you would have them do unto you.' This means that the thinking of those people is based upon ideas of right and justice, of mutual self-respect, of consideration for the other man. And this means peace, because only in peace can such conceptions as these prevail. This means that the free people of the world hate war and want peace, and are fully dedicated to it.

This country, as other free countries, maintains arms. We maintain formations of war and all the modern weapons. Why? Because we must. As long as the spirit that has prevailed up to now is going to prevail in the world, we cannot expose our rights, our privileges, our homes, our wives, our children, to the risk that would come to an unarmed country. But we want to make it perfectly clear that these armaments do not reflect the way we want to live. They reflect the way, under present conditions, we have to live.

It is natural for a people steeped in a religious civilization, when they come to moments of great importance—maybe even of crisis such as now we face—to turn to the Divine power for guidance, for wisdom, for help in doing the thing that is honourable and right. I have no doubt that tonight, throughout this country and indeed throughout the free world such prayers are ascending. And this is a mighty force.

Suppose on the next Sabbath Day observed by each of our religions, Americans—165,000,000 of us—went to our accustomed places of worship and asked for help, and by so doing demonstrated to all the world the sincerity and depth of our aspirations for peace. This would be a mighty force. None could then say that we preserve armaments because we want them. We preserve them because we must.

Secretary Dulles and I go to this conference in the earnest hope that we may accurately represent your convictions, your beliefs, your aspirations. We shall be conciliatory, because our country seeks no conquests, no property of others. We shall be tolerant, because this nation does not seek to impose our way of life upon others. We shall be firm in the consciousness of your spiritual and material strength and your defence of the right. But we shall extend the hand of friendship to all who will grasp it honestly and concede to us the same rights, the same understanding the same freedom, that we accord to them. We shall do our best, with others there, to start the world on the beginning of a new road—a road that may be long and difficult but which, if faithfully followed, will lead us all into a better and fuller life."

On July 12 President Eisenhower had met Congressional leaders of both the Republican and Democratic parties (including the chairmen of the principal Senate and House committees) and had promised to keep them fully informed of developments at the Geneva conference, pending a full appraisal of its results which he would give on his return.

Paris Meetings of Western Foreign Ministers and North Atlantic Council.

Mr. Dulles, Mr. Macmillan and M. Pinay had a three-hour discussion in Paris on July 15 at which they reached full agreement on the recommendations which they would make to the heads of their Governments, and at which they heard a report from a committee of U.S., French, and British experts which had been engaged in preparatory work for the conference.

On the following day the North Atlantic Council met at the *Palais de Chaillot* and unanimously endorsed the general lines of policy to be adopted by the Western delegations at Geneva. An official spokesman said that the North Atlantic Council had ruled out any comprise either on the solidarity of the NATO alliance or on the choice of a united Germany to enter the Atlantic alliance if it so desired.

Reactions in Western Germany.

The statement of Soviet policy on the German question, published on July 12 by the Tass Agency (see above), had a critical reception in Bonn, where an official spokesman emphasized that a European collective security pact based on the continued division of Germany was unacceptable to the Federal Government. Short statements were made in the Bundestag on July 16 by Dr. Adenauer, the Federal Chancellor, and Herr Ollenhauer, leader of the Opposition.

Dr. Adenauer said that he had no wish to say anything that might disturb the negotiations at Geneva or endanger their success. He added, however: "In view of utterances that have been heard lately, I consider it necessary to make it clear to the Bundestag that a European security system which envisages the continuation of the division of Germany is unacceptable to us. Such a system would establish the partition of Germany for a period of time impossible to estimate. It would give Europe no security. A security system can never be erected upon the disregard of a demand so deeply rooted in the German people." The Chancellor's statement was warmly welcomed by all political parties.

Herr Ollenhauer declared that the four Powers could contribute to the peaceful reunification of Germany by abandoning all attempts "to incorporate the German partition States, or all-Germany, in the military system of the West or of the East." He added that Western Germany's association with the NATO, and Eastern Germany's association with the Warsaw Pact, should both be open to revision; that it would then be possible to create a security system in the framework of the United Nations which would satisfy the justified need for the security of Germany and other European countries; and that it was the Federal Government's duty to seize every chance to achieve the unification of Germany in peace and freedom.

A two minutes' silence was observed throughout Western Germany at noon on July 18 as a demonstration of the desire of the German people for reunification.

It had previously been announced in Bonn that Herr Blankenhorn (West German delegate on the North Atlantic Council) would be present in Geneva in the capacity of an observer, and would keep in touch with the Western delegations. Dr. Adenauer arrived on July 18 at Mürren, near Interlaken, on holiday; it was stated that he would keep in close touch with Herr Blankenhorn and the West German observers at Geneva.

Opening of Geneva Conference.

President Eisenhower, Marshal Bulganin, Sir Anthony Eden, and M. Faure arrived separately at Geneva by air on July 17, and were welcomed at Cointrin airport by the President of the Swiss Confederation, M. Petitpierre. The City of Geneva was gaily decorated for the conference, and the Heads of Government and their staffs were accommodated in villas and mansions placed at their disposal by the municipal authorities. Elaborate security precautions were taken by the Swiss Government, the routes between the *Palais des Nations* and the villas occupied by the Heads of Government being guarded by strong contingents of the Swiss Army. The grounds of the villas themselves were patrolled by American, British, French, and Russian security forces.

By agreement between the four Powers, a joint secretariat for the conference was set up under Mr. Peter Wilkinson (First Secretary of the British Embassy in Washington), who was assisted by American, French, and Russian officials. It was also agreed that President Eisenhower should preside over the first session of the conference on July 18, and that the chairmanship should thereafter rotate from day to day between the four Heads of Government.

Prayers for the success of the conference were offered in churches of all denominations in the U.S.A., Britain, and many other countries on Sunday, July 17, a special call to prayer having been issued by the World Council of Churches.

The Geneva Conference began ten years and one day after the opening of the Potsdam Conference (July 17, 1945). The only statesmen who took part in both conferences were Sir Anthony Eden and Mr. Molotov.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Le Figaro, Paris - Soviet Weekly - Frankfurter Allgemeine Zeitung - Neue Zurcher Zeitung)

A. SCOTLAND. — Economic Position. - Review of Industry and Employment in 1954.

A review of Scotland's economic position was given to the House of Commons on July 14 by the Minister of Labour (Sir Walter Monckton), on a motion asking the House to take note of the White Paper on Industry and Employment in Scotland, 1954.

Sir Walter said that there had been a marked increase in activity in the engineering industry and also a " welcome increase " in orders placed with Scottish shipyards, a total of 130,000 gross tons and more having been recorded in the order books. Although steel output was a little below the 1953 level, it was seven per cent higher in the first four months of the present year than in the corresponding period of 1954

In the coal-mining industry, however, the position was not so satisfactory; output had fallen by 300,000 tons in 1954, and in the first 24 weeks of the present year there were 500,000 tons less of deep-mined coal than in the same period of 1954. In part this was due to unofficial strikes, but also to worsening physical conditions in many of the pits. Nevertheless, the National Coal Board's programme of new sinkings was going forward steadily; a boring tower to prove coal reserves under the Firth of Forth was now in position off Kirkcaldy; and drilling was taking place many hundreds of feet below the sea-bed.

Employment in Scotland during 1954 was at a higher level than ever before, the number of people in insured employment having risen by 26,000 to 2,089,000, and unemployment having declined considerably compared with 1954. These trends were still being maintained in 1955. Nevertheless, Scotland had double the amount of unemployment compared with the country as a whole; e.g., in June, 1955, the percentage of unemployed was 2.6, compared with 1.6 in Wales and 1 per cent for the whole of Great Britain. Sir Walter believed that this was partly attributable to the geographical distribution of the industrial population in Scotland, and partly to the special problem of the Highlands. The unemployment figures were highest in the Glasgow and Dundee areas, where most of the industry was concentrated and heavy industries predominated Although new industries—especially light industries—had been attracted to these areas, many of them had not yet reached full maturity. When in full production, however, it was anticipated that they would provide employment for some thousands of workers.

The Secretary of State for Scotland (Mr. Stuart) said that the Atomic Energy Commission's plant at Dounreay, Caithness (see 13467 A) was nearing the stage when it would provide work for substantial numbers, rising to an estimated maximum of 1,700 towards the end of 1956. In addition, it was intended to add further experimental reactors (four of which would be built at Chapelcross, near Annan) which were likely to give employment to a sizeable construction staff for several years. Scottish firms had already received a number of contracts in connexion with the Dounreay plant and other atomic developments. (Times - The Scotsman, Edinburgh)

B. SYRIA. — Assassination of Deputy Chief of Staff.

Colonel Adnan Malki, Deputy Chief of Staff of the Syrian Army, was assassinated on April 22 while attending a football match in Damascus. The assassin, a Syrian Army sergeant (Yussef Ibrahim), committed suicide after killing Colonel Malki. The assassination was carried out in full view of 10,000 spectators, among whom were the Chief of Staff of the Syrian Army (Brigadier Shawkat Shukeir) and the Egyptian Ambassador in Damascus.

Colonel Malki had been dismissed from the post of Deputy Chief of Staff during the military regime of Brigadier Shishakly, but was reinstated when the latter was ousted by the Army revolt of February, 1954. His brother, Riad Malki, is a leader of the Arab Socialist *Baath* Party, which favours close co-operation with Egypt and is opposed to the Turkish-Iraqi defence pact, whilst the assailant was a member of the right-wing *Parti Populaire Syrienne*, a Fascist group which advocates the union of Syria and Iraq. Before the assassination of Colonel Malki (who was strongly opposed to such a union) there had been several clashes between members of the two parties.

The Syrian Prime Minister, Sabri el-Assali, stated in the Chamber on April 26 that Colonel Malki's assassination had been part of a plan to stage a *coup d'état* with the aid of " a foreign Power," and that 75 civilians and 30 Army officers and other ranks had been detained for interrogation. At the Government's request, the Chamber waived the immunity of Hanna Kiswany, the only parliamentary representative of the *Parti Populaire Syrienne* (P.P.S.), whose leaders were alleged to have been implicated in the conspiracy. The party's headquarters were searched and documents seized, and on May 4 M. Assali announced that the Government had decided to dissolve the party.

The military investigator's office published the charges against those arrested on June 29. It was announced that the investigator had demanded the death sentence on 26 executive members of the P.P.S. and four junior Army officers, and life imprisonment with hard labour for nine other defendants. The accused were charged with having instigated the premeditated murder of Colonel Malki, establishing contact with a foreign Power, exposing Syria to " aggressive actions," and disturbing Syria's relations with a foreign Power. It was alleged that the P.P.S. had planned to stage a *coup d'état*, had approached the U.S. Government for this purpose, and had hoped that the *coup* would enable Syria to join the Turkish-Iraqi pact.—(Le Monde, Paris - Manchester Guardian)

(Prev. rep. Political Assassinations, 11094 B.)

C. SOVIET UNION. — Commissions for Long-term Planning, Current Planning, and Labour and Wages.

It was announced in Moscow on May 25 that the Presidium of the Supreme Soviet had decided to divide economic planning into two different sectors and to set up (*a*) a State Commission for Long-term Economic Planning, which would retain the name of *Gosplan* (hitherto given to the existing State Planning Commission), and (*b*) a State Commission for Current Economic Planning, to be known as *Gosekonkommissia*. M. Nikolai Baibakov, hitherto Minister for the Oil Industry, was appointed chairman of the Long-term Planning Commission, and M. Maxim Saburov, head of the existing State Planning Commission and a Deputy-Premier, became chairman of the Current Planning Commission.

On May 24 the Presidium of the Supreme Soviet had decreed the setting-up of a new Commission to advise the Council of Ministers on questions concerning labour and wages. The Commission's task was defined as " to strengthen State control over the work of Ministries and Directorates and to improve their work in all questions of labour and wages." M. Lazar Kaganovich, a First Deputy-Premier and one of the senior Soviet leaders, was appointed chairman of the new Commission. (Le Monde, Paris - Times - Manchester Guardian)

(Prev. rep. Council of Ministers, 14108 D.)

D. HUNGARY. — Release of Cardinal Mindszenty.

It was officially announced in Budapest on July 16 that the Hungarian Government had agreed to " interrupt " the life sentence on Cardinal Joszef Mindszenty, Primate of Hungary, in deference to a request by the Hungarian bench of bishops. It was stated that the request had been made on the grounds of the Cardinal's age (63) and ill-health, and that he would be permitted to reside in a building designated by the ecclesiastical authorities. Cardinal Mindszenty had been sentenced by a " people's court " in 1949 to life imprisonment and loss of civil rights on charges of treason, conspiracy against the State, and " black market " currency dealings.—(Times - Le Monde, Paris)

A. UNITED KINGDOM. — British Transport Commission Report for 1954. - Deficit of £11,900,000. - First Instalment of Railway Modernization Plan. - New Freight Charges Scheme. - Increases in Fares and Charges. - Road Haulage Disposals. - Retention of Trunk Service Network. - Canal Survey. - New Stock Issue.

The report and accounts of the British Transport Commission for the year 1954 were published on June 29. They showed that the Commission had earned a working surplus of £45,500,000 (compared with £59,400,000 in 1953), but that this had been offset by central charges—mainly interest on Transport Stock—of £53,800,000, and by the provision of £3,600,000 for capital redemption and other special charges. The resulting net deficit of £11,900,000 compared with a net surplus of £4,200,000 in 1953, and increased the Commission's accumulated deficit since nationalization to £39,200,000.

The report stressed that the decline on the working surplus, as compared with 1953, was "not the result of deterioration in efficiency or economy in operation," but was due principally to the fact that fares and freight charges "had never been able to catch up quickly enough with rising costs in the shape of higher wages and price levels." At the same time, however, the volume of most classes of traffic had declined, and, in particular, the tonnage of railway freight handled "had decreased by more than could be offset by reductions in services and other savings in expenses." As a result, the net receipts of British Railways had fallen from £32,989,188 in 1953 to £14,747,931 in 1954, the latter figure comparing with "the minimum of some £40,000,000 to be expected from an activity of this size and consequence." After pointing out that the financial difficulties of the railways had been increased by "the uncertain outcome of almost continuous wage negotiations," the report added: "The Commission's deficit of £11,900,000 does not fully reflect the continuing upward trend of wages and prices, the effect of road haulage disposals, or the declining level of most classes of traffic on public transport systems. In particular, the cost of the further increases in wages granted early in 1955 . . must be a cause of acute financial anxiety in the period ahead."

The Commission's gross receipts from its principal carrying activities amounted to £656,263,239 (compared with £645,820,689 in 1953), and its working expenses to £624,477,460 (against £597,613,277), leaving net traffic receipts of £31,785,779 compared with £46,207,412 in 1953. Details were as follows:

	Gross Receipts	Working Expenses	Surplus (+) or Deficit (−) 1954	1953
		(£ million)		
British Railways: Passenger 116 6; Freight, Parcels and Mails .. 313 6; Miscellaneous 5.3	435.5	418 9	+16.6	+35 1
Railway Collection and Delivery Service .	12.2	14 0	− 1.8	− 2.1
British Road Services (Road Haulage) ..	72.7	64 0	+ 8.7	+ 8.9
Road Passenger Services (Provincial and Scottish Groups)	51.3	46.3	+ 5.0	+ 4.8
London Transport .				
Road Services .	50.9	49 6	+ 1.3	− 0.05
Railways	20.0	19.0	+ 1.0	+ 0.7
Ships: Passenger and Cargo . ..	13.1	12.0	+ 1.1	+ 0.9
Inland Waterways .	0.95	1 03	− 0.08	− 0.03

The percentage of working expenses to gross receipts was as follows: Railway passenger and freight services, 96; Railway collection and delivery services, 115, Road haulage services, 88; Road passenger services (Provincial and Scottish), 90; London Transport road services, 97, London Transport railways, 95; Ships, 92; Inland waterways, 108.

The position with regard to the Commission's principal other activities was as follows:

Docks, Harbours, and Wharves: The net surplus rose by about £100,000 to £2,600,000.

Hotels, Refreshment Rooms, and Restaurant Cars: Results were on the whole the best since nationalization, a loss of about £600,000 on refreshment cars having been reduced by profits on the other undertakings to only about £100,000, compared with nearly £500,000 in 1953.

Commercial Advertising and Letting of Sites on B.T.C. Properties. Surpluses of £2,000,000 and £1,400,000 respectively were earned under these heads, in each case about £100,000 more than in 1953.

Miscellaneous Activities: The 1954 surplus totalled about £5,300,000, compared with about £3,300,000 in 1954.

Important points from the Commission's report are summarized below.

Passenger Traffic and Fares. Notwithstanding inducements such as cheap excursion fares, there had been "a tendency for the amount of short-distance traffic in the London area to decline, and for short journeys to become shorter"; in contrast, the average of journeys outside the London area had been slightly longer. The total number of passengers on the Commission's road and rail services was 7,661,000,000, a decrease of 1 3 per cent, but the steadiness of passenger traffic in general was "not unsatisfactory."

The report emphasized that, in spite of increases in the amounts of most passenger fares, their relative cost in terms of purchasing power was less than before nationalization.

British Railways. (*a*) *Traffic.* The total number of passengers carried had increased in 1954, principally on the longer journeys, whilst the number of passengers carried to and from the Continent was the highest ever recorded. The average amount received per passenger-mile was 1 35d., compared with 1 38d in 1948.

Total freight traffic declined by 676,700,000 ton-miles (3 per cent), decreases being shown by each of the three main categories of traffic—general merchandise, minerals, and coal and coke—as well as by livestock traffic.

(*b*) *Rolling Stock.* Although replacement of railway coaches and wagons was "going on at a much faster pace," it had still been necessary in 1954 to retain in service over 4,000 "life-expired" carriages.

(*c*) *Operational Efficiency.* During the year savings totalling about £5,000,000 were made on British Railways, partly as the result of the smaller volume of freight traffic, but mainly owing to more efficient operating methods and organization.

(*d*) *Railway Modernization and Unremunerative Services.* The report pointed out that in any modernization scheme there must be "a period in which the new capital would not improve the railways' financial position," and that meanwhile the cost of carrying passenger and freight traffic must be recovered as far as competitive conditions allowed. "A condition precedent to undertaking a far-reaching plan of this nature," it stressed, "is that the enterprise must not be allowed to get into a position of irredeemable unbalance in the meantime. An essential corollary of the Commission's case for modernizing equipment is that they should be relieved of any obligation to provide facilities that are no longer used, or used only to an extent far short of the capacity for which they were designed." The report therefore foreshadowed "an increasing tempo in the drive to eliminate unremunerative services," and stated that a survey of train services had shown that for many of the uneconomic slow or stopping trains "no remedy exists except withdrawal and the substitution of road services." It added, however, that in many cases local opposition would be "very great."

British Road Services. Although the carrying capacity of the road haulage fleet had decreased during 1954 by 24 per cent (owing to sales to private hauliers), the net surplus on working (£8,700,000) was only £200,000 less than in 1953.

London Transport. The number of passengers carried fell during 1954 by 3 per cent, but net traffic receipts (£2,300,000) were the best since 1919. The report pointed out, however, that this amount was "still nearly £2,000,000 short of the minimum annual contribution which London Transport should be making to the Commission."

Capital Expenditure. During 1954 the Commission spent about £66,000,000 on new rolling-stock, road vehicles, ships, and plant and equipment, and about £10,000,000 on additions and improvements to land, civil engineering works, and buildings.

Capital expenditure authorized at Dec 31, 1954, amounted to £168,000,000. Contracts placed since that date in connexion with the railway development plan aggregated over £35,000,000.

Staff and Wages. The Commission's total staff on Dec. 31, 1954, numbered 831,223, a decrease of 34,220 during the year. Wage increases granted during 1954 aggregated £23,300,000, the report estimating that the further increases which came into force in January, 1955, would cost an additional £20,000,000. In this connexion the Commission expressed the conviction that there was "still wide scope for increasing efficiency," and that the wholehearted co-operation of unions and staff to this end was "indispensable."

Sir Brian Robertson (the Commission's chairman) stressed that a trading deficit for 1955 was "inescapable," but that the Commission would make "a determined effort to return to a state of balance in 1956," although this "would not be easy." In this connexion he pointed out that one of the more lasting results of the rail strike (see 14240 A) would be "the continued loss of revenue on classes of traffic which had found alternative forms of transport and which it would be hard to recapture."

Sir Brian explained the reasons for the railways' "struggle" as: (*a*) recent rises in wages and costs, which had outstripped the Commission's ability to make the necessary adjustments to absorb them; (*b*) the loss of traffic (particularly freight traffic) to the roads, which meant that the railways would have "a hard struggle" until the equipment necessary for a modern freight service was available; (*c*) uneconomic services and inherited obligations from the days when the railways had a virtual monopoly of transport, (*d*) the losses on many suburban services feeding large cities. To alleviate the last-mentioned losses, multiple-unit diesel trains would be introduced in the Manchester and Birmingham areas, and plans were being made for electrification in the Glasgow area.

As regards the future, Sir Brian enumerated four reasons justifying "positive optimism" as soon as the measures already taken by the Commission had had "a chance to bear fruit." These were: (1) the establishment of a British Railways Productivity Council and other measures to increase the morale and efficiency of manpower; (2) the drawing-up of the railway freight charges scheme now before the Transport Tribunal (see below); (3) the adoption of the railway modernization plan, already well launched and steadily gathering momentum (see below); (4) railway decentralization and the establishment of Area Boards.

Other developments in connexion with rail, road, and water transport during recent months are outlined below:

First Instalment of Railway Modernization Plan. The B.T.C. announced on May 5 that upwards of £50,000,000 would be spent in 1955-56 on the first stage of the railway modernization plan (see 14024 A). The tentative programme included (1) the placing of orders for at least 170 main-line locomotives, 1,000 multiple-unit diesel vehicles, and a large number of diesel shunting engines, (2) track and signalling improvements in anticipation of higher train speeds, (3) the electrification of certain suburban services and preparation of main-line works; (4) major improvements to at least 15 passenger stations, 8 goods marshalling yards, and 8 goods stations, (5) new passenger rolling-stock and carriage-cleaning facilities Details were as follows

Track and Signalling. Renewal of 1,800 track miles, and quadrupling of the track between New Barnet and Potters' Bar (Eastern Region) at a cost of £2,750,000, thus removing a bottle-neck on the London-Edinburgh run Signalling equipment, etc., costing £1,100,000, and improved telecommunications costing £350,000.

Diesel Traction Replacement of steam trains by multiple-unit diesels in the following areas. Edinburgh-Glasgow, Birmingham-Swansea, London-Hastings, East Anglia, Lincolnshire, Newcastle-Carlisle, Newcastle-Sunderland-Middlesbrough, Manchester-North Wales, Birmingham-Lichfield, Birmingham suburban, Hampshire.

Electrification The extension of the Liverpool Street-Shenfield electrification to Chelmsford (due to be completed in 1956 at a cost of £2,500,000) would form the basis of further electrification of the Eastern Region main line to Ipswich and Clacton. Preliminary work would begin on the Fenchurch Street-Tilbury, Liverpool Street-Bishop's Stortford, and Kentish steam traction lines, and first steps would be taken towards main-line electrification schemes from Euston to Birmingham, Manchester, and Liverpool

Freight Traffic Work should begin in 1956 on marshalling yards near Barking (costing £1,800,000), a new yard at Stratford, East London (costing £2,500,000) should be nearly completed, and new yards would be begun at Colwick (£1,750,000), Alloa (£500,000), Millerhill, near Edinburgh (£3,000,000), and Port Talbot, South Wales (£1,500,000)

Passenger Stations Improvements would be made at Peterborough (to be given high priority), Manchester (Victoria), Plymouth (North Road), Colchester, Edinburgh (Waverley), Euston, Coventry, Banbury, Harrow, Glasgow (Central), Chichester, Weymouth, and Gatwick Airport.

Rolling-stock. About 4,700 new passenger vehicles and 136,000 freight vehicles would be brought into service in 1955-56 About £1,000,000 would be spent on building wagons of the 24½-ton type for minerals traffic, and over £3,000,000 on fitting continuous brakes on new wagons

Finally, the Commission announced that contracts had already been placed with British manufacturers for £35,000,000 worth of rolling-stock, including 844 vehicles for use in multiple-unit diesel trains, 576 passenger coaches and brake vans, and 46,500 all-steel mineral wagons of 16 tons' capacity In addition, orders were in hand at the railways' own works for 340 new freight locomotives (144 diesel and 196 steam) and 21,300 carriages and wagons.

Results of Completed Railway Modernization Schemes. In a statement on the results obtained from modernization schemes already introduced, British Railways announced on April 24 that passenger traffic on the Liverpool Street-Shenfield line had doubled since electrification in 1949; that both passenger and freight traffic on the Manchester-Wath-Sheffield line had increased greatly since electrification (237 passengers having been carried on the Manchester-Glossop section for each 100 previously carried by steam trains), and that the reinstatement of electric services between Lancaster, Morecambe, and Heysham had also proved highly successful The introduction of diesel trains between Leeds and Bradford had brought an increase within six months of 203,000 passengers and £14,740 in receipts, whilst in West Cumberland takings had increased by 40 per cent since diesel services were introduced in November 1954

Draft Scheme of Maximum Railway Freight Charges. The B T C announced on Dec. 15, 1954, that it had completed a draft scheme of maximum railway freight charges which had been in preparation since the passing of the Transport Act in 1953 With the object of restoring competition between the various forms of inland transport, the Act had released the Commission from the obligation to publish its standard charges, and had required it instead to publish maximum rates, leaving actual rates to competitive quotation within these maximum limits. The new scheme was intended, not to bring about a general increase in freight charges, but to attract to the railways more of the traffic which they could handle cheaply, and to discourage traffic which it was costly to move by train; many individual rates would thus be reduced and others increased.

It was explained that under the existing system (in use since 1921) commodities were grouped for the purpose of assessing rail charges into a number of broad classifications according to value, and the scale of charges was fixed according to distance on a national pattern. In practice, however, a large number of "exceptional rates" had been fixed below the standard charges to meet the growth of competition in particular fields. Nevertheless, the main principle on which the system operated had been to average the railways' costs over the whole range of goods carried, and then to charge rates according to the customers' ability to pay. As a consequence, the rate for conveyance depended mainly on the value of the consignment and not on the cost of carrying it, and freight-rates bore little relationship to actual transport costs The result of this system had inevitably been that the railways' profits on some classes of goods had been subsidizing losses on others, that profits on low-cost routes had been subsidizing losses on routes where costs were high; and that regular customers had been subsidizing casual users

Under the new scheme (the statement pointed out) goods would not be classified by value but by weight, bulk, and ease of handling, and charges would be more steeply tapered for distance: short-distance hauls paying considerably more, and long-distance hauls relatively less, than the normal. At the same time the release of the railways from their existing obligation to quote identical rates to all customers for carrying similar classes of goods would end the subsidizing of casual customers by regular ones, since the Commission would be free to give regular customers the full benefit of the lower costs resulting from steady and balanced demands.

After discussions with traders' associations, the draft scheme was submitted on March 21 to the Transport Tribunal, which will hold a public inquiry into it.

Increases in Fares and Charges. The Commission announced on April 30 that British Railways' passenger fares and freight charges, London Transport fares, canal and dock charges, and rail collection and delivery charges, would be increased from June 5 as follows:

Rail Freights A general rise of 7½ per cent, with an increase of 15 per cent for consignments under one ton (except for perishables and certain other traffic, where the 7½ per cent increase would apply for all consignments). Similar increases in railway collection and delivery charges.

Main Line Passenger Fares Ordinary fares increased from 1.75d. to 1.88d per mile (third class) and from 2 62d to 2 82d (first class).

London Area All single fares above 7d on London Transport railways and buses and on London, Tilbury, and Southend trains would be raised by 1d, and day return fares above 7d. on the London lines of British Railways by 2d. Similar increases for early morning fares and monthly season tickets

Canal and Dock Charges. A general increase of 7½ per cent

Although these increases were expected to yield about £25,000,000 in a full year, the Commission stressed that this "would not cover the higher wages and salaries already in operation The intention was that these should be met, partly from increases in the efficiency of the transport industry itself, and partly from the improved results to be expected from the new Freight Charges Scheme (see above) The statement added. "The proposals now made are one of the inescapable measures required in fulfilment of the Commission's duty to meet as far as possible increases in costs already borne, and so minimize its deficit."

Road Haulage Disposals. The Minister of Transport and Civil Aviation (Mr. Boyd-Carpenter), stated in the House of Commons on July 11 that the British Transport Commission had sold a total of 15,688 road haulage vehicles under the Transport Act to private haulage firms, that tenders had been closed within the past few days affecting probably another 1,000, that a further 4,000 vehicles employed in the parcels service would be sold on a company basis in October; and that 2,000 vehicles were in the contract-hire category (i.e. had been provided under contract for traders' private use). There remained about 8,000 vehicles, a substantial proportion of which were operating the main trunk services of British Road Services, these services had developed in recent years and now rendered efficient service to industry, and the Government were considering the question of their retention.

The Minister claimed that the main objects of the Transport Act of 1953 had been achieved; that the "small man" had come back into the industry; that competition in long-distance road haulage had been introduced, and that it was "beyond doubt" that the road haulage enterprises, both public and private, were giving a better service today than two years ago

Mr. Boyd-Carpenter's statement was made during a debate on the B.T.C.'s annual report. An Opposition amendment "regretting the policy of H M Government in breaking up the public transport system," and deploring "the estimated capital loss of £20,000,000 that will result from the forced sale of British Road Services' lorries," was defeated by 303 votes to 249.

The Opposition reference to an estimated capital loss of £20,000,000 on the disposal of the Commission's road haulage undertaking was based on a statement made by the Minister on Oct 20, 1954. During the debate of July 11, however, Mr. Boyd-Carpenter deprecated the use of this figure as indicating the Commission's final loss, and pointed out that the Commission would eventually be reimbursed for any losses by the yield of the transport levy charged under the Act of 1953. The total of that levy paid up to March 31, 1955, had been given by the Minister on April 27 as £7,677,000.

In a further statement in the House of Commons on July 21, Mr. Boyd-Carpenter announced that the Government had now decided not to dispose of the goods vehicles used by the British Transport Commission to operate the trunk service network, and that it was proposed to introduce a Bill to amend the 1953 Act in that respect. The Government had asked the chairman of the Disposal Board to advise them as to the number of vehicles required to be retained for this purpose, over and above the total of 3,500 vehicles for all purposes already authorized for retention under the 1953 Act; according to present information, it was assumed that the number of vehicles to be retained would be increased by some 4,500 to 8,000. The Minister added that the Government had asked the Board to offer for sale as quickly as possible the balance of the vehicles still held, and that all other arrangements previously announced would be carried out.

The Minister had prefaced his announcement by saying that the Government were satisfied that the main objects of the 1953 Act as regards road haulage had been achieved The 25-mile limit on private hauliers had been abolished, vehicles operated by the British Transport Commission had been placed under the licensing system of the Road and Rail Traffic Act, 1933, and considerable progress had been made with the disposal of vehicles owned by the Commission, 16,748 having been sold to date out of the 32,500 vehicles originally thought to be available for disposal In reply to questions by Labour members, Mr. Boyd-Carpenter attributed the increased efficiency of the trunk services principally to "the general stimulus of increased competition." The Government's decision to retain the trunk services was welcomed by the Opposition.

The fourth report of the Road Haulage Disposal Board, published on June 30, had shown that of the 15,008 vehicles sold by May 28 (out of 24,569 vehicles offered) 8,586 had been in units of four vehicles or fewer and 2,742 in units of 20 or more; 10,462 vehicles had been sold in "vehicle only" units and 4,144 in units including premises, nearly three-quarters of these being in units of 15 or more vehicles. It also stated that the parcels organization, with some 4,000 vehicles and 115 depots, had been made into a separate company named B R S. (Parcels) Limited, which was to be offered for sale in October, and that an offer for the 498 vehicles in the "meat fleet" was still under consideration.

Canals and Inland Waterways. The report was published on April 12 of a Board of Survey of Canals and Inland Waterways, appointed by Mr. Boyd-Carpenter to ascertain "whether all possible steps are being taken to ensure that the maximum economic advantage is being derived from the Canal system under the Commission's control," and to advise on the steps to be taken with regard to uneconomic waterways The members of the Board of Survey were Lord Rusholme (chairman), representing the B.T.C., Sir Rex Hodges, formerly general manager of the Mersey Docks and Harbour Board, and Mr R. D. Brown, a Manchester civil engineer.

The Board recommended that 336 miles of inland waterways should be developed; that a further 994 miles should be retained for the present; and that 771 miles, which at present incurred a loss of about £200,000 annually, had not "sufficient commercial prospects to justify their retention for navigation." The waterways in each category are listed below:

Waterways carrying substantial traffic and recommended for development: Aire and Calder Navigation Canal, Gloucester and Berkeley Canal and River Severn; Grand Union Canal (Regent's Canal Dock and Brentford-Berkhamsted); Sheffield and South Yorkshire Navigation Canal, River Lee, River Trent; River Weaver.

Waterways to be retained for the present: Ashby Canal (lower part), Birmingham Navigation Canal, Calder and Hebble Navigation, Coventry Canal; Fossdyke Canal; Grand Union Canal (above Berkhamsted); the River Avon section of the Kennet and Avon Canal; Kensington Canal, Leeds and Liverpool Canal; Oxford Canal (northern section); River Lee (above Enfield lock); River Stort, St. Helens Canal, Shropshire Union Canal (main line); Stourbridge Canal; Stratford-on-Avon Canal (northern section); Trent and Mersey Canal; Ure Navigation Canal.

Waterways not justifying retention: Ashby Canal (upper part), Ashton, Peak Forest, Macclesfield, and Barnsley Canals; Bridgwater and Taunton Canal and River Tone Navigation, Chesterfield Canal, Cromford Canal; Dearne and Dove Canal, Erewash Canal, Grand Western Canal, Grantham Canal, Huddersfield Canal; Kennet and Avon Canal (between Reading and Bath), Lancaster Canal; Manchester, Bolton, and Bury Canal; Monmouthshire and Brecon Canal; Nottingham Canal; Oxford Canal (southern section); Pocklington Canal; Ripon Canal; Shropshire Union Canal (Welsh and Montgomery and Shrewsbury sections); Stratford-on-Avon Canal (southern section); Swansea Canal; Witham Navigation Canal

The Board of Survey also recommended the transfer of the Caledonian and Crinan canals to the Secretary of State for Scotland, together with the Forth and Clyde, Monkland, and Union canals, which it considered to be "of no real use for navigation."

The British Transport Commission stated that it agreed with the Board's conclusions and would announce its proposals in due course

Part-Time Appointments to British Transport Commission. It was announced on May 4 that Mr. Boyd-Carpenter had appointed the following as part-time members of the Commission: Mr. T. H. Summerson (chairman, North-Eastern Area Board, B.T.C.); Sir Cecil McAlpine Weir (who would shortly relinquish his appointment as head of the U.K. delegation to the High Authority of the European Coal and Steel Community); and Mr. F. A. Pope (who had just retired from full-time membership of the Commission).

The Bank of England announced on June 21 the issue of £42,000,000 British Transport 4 per cent Guaranteed Stock, 1972-77, bringing the total amount of stock issued up to £242,000,000. The stock was offered at 96½ per cent for conversion to holders of London Electric Transport Finance Corporation 2½ per cent Guaranteed Debenture Stock, 1950-55, finally redeemable on Aug. 1; stock not required for conversion was offered for cash.—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 1953 Report, 13903 A; Modernization Plan, 14024 A; Reorganization, 13968 A; Transport Act, 12594 A; Fares, Charges, Increases, 13443 A, 13745 A; Wage Increases, 14240 A, 14280 A; B.T.C. Membership, 13903 A; British Transport Stock, 13426 B.)**

A. CZECHOSLOVAKIA. — Release of Mrs. Sispera.

Mrs. Phyllis Sispera, the British-born wife of a Czechoslovak airman, was allowed to leave Czechoslovakia with her three children on July 9, after a number of representations had been made on her behalf by the British Government. She arrived at London Airport with her children on July 15 after flying by air from Prague *via* Amsterdam.

Mrs Sispera (*née* Clarke) married her husband in 1941, when he was serving in Britain with the Czechoslovak Air Force They returned to Czechoslovakia after the war with their three British-born children, but in 1950, after the Communists had come to power, unsuccessfully attempted to escape from the country, being caught before they could cross the frontier Mr Sispera was sentenced to 11 years' imprisonment for anti-State activities, and Mrs Sispera to 12 months' imprisonment In 1954 Mrs. Sispera divorced her husband and applied for herself and her children to be released from Czech nationality, but the request remained unanswered In February last she had applied for an emigration permit, which was refused

Unsuccessful attempts to persuade Mrs Sispera to remain in Czechoslovakia had been made by the Czech police before she was allowed to leave the country On July 5 she was taken from her home under police escort and brought to a place in the countryside near Prague, where she was allowed to see her children and to have a "picnic" in the woods with them under police surveillance [The three children had been in a home after Mrs Sispera had suffered an accident while at work] On the following day she was taken to a villa and questioned by the police, who tried to persuade her to remarry her former husband and to remain with him and their children in Czechoslovakia After promising Mrs Sispera that she would be allowed to visit her relatives in England, and that her former husband would be released and found a job, the police then produced Mr. Sispera and repeated their offer to release him and to allow the couple to remarry Mrs. Sispera, however, continued to insist that the marriage had been dissolved and that she wished to return to England with her children and live there permanently Mr Sispera was then taken away and Mrs. Sispera was returned to her home.

The Czechoslovak Ambassador in London (Mr. Jiri Hajek) was called to the Foreign Office on July 7 and warned that the detention of Mrs Sispera and her children would materially worsen diplomatic relations between Britain and Czechoslovakia. A Foreign Office statement said that Mr Nutting (Minister of State) had spoken "very strongly" on the subject of British wives in Czechoslovakia, and of Mrs. Sispera in particular, and had stressed that Anglo-Czechoslovak relations would "continue to be poisoned" as long as the Czechoslovak Government refused to allow British-born wives and their children to return to the country of their birth. On July 9 the Czechoslovak Government informed H.M. Embassy in Prague that Mrs. Sispera and her children were free to leave Czechoslovakia "as an act of grace."

In a statement to the House of Commons on July 6, Mr. Nutting gave the following information about British-born wives in the Eastern European countries: (*a*) in Czechoslovakia, 98 British-born wives were registered at British Consulates, of whom 12 (including Mrs. Sispera) had applied to leave the country; (*b*) in Poland, 246 were registered, of whom 73 had applied to leave; (*c*) in Hungary, 33 were registered, of whom six had applied to leave; (*d*) in Rumania, 12 were registered, of whom four had applied to leave; (*e*) in Bulgaria, only one was registered, who had not applied to leave. Mr. Nutting added that the position had recently improved in Poland, where permission to leave had been granted to 14 applicants. (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 13512 E.)

B. INDIA. — Decision to adopt Decimal Coinage and Metric System.

The Indian Minister of Commerce and Industry, Mr. Krishnamachari, announced on April 22 that the Planning Commission had decided in favour of a change-over to the decimal system of coinage and the metric system of weights and measures, and that the Government intended to introduce legislation for a decimal coinage system at an early date. At the same time a standing committee was being set up to examine the questions involved in "phasing" the standardization of weights and measures and the change-over to the metric system, and to prepare the necessary legislation.

(Indian High Commissioner's Office, London)

C. UNITED STATES. — Senate Resolution on Self-determination for "Satellite" Nations of Eastern Europe.

The U.S. Senate unanimously approved on July 14 a resolution, sponsored by Senator William F. Knowland (Republican minority leader in the Senate), expressing the hope that the Communist "satellite" nations of Eastern Europe might soon regain the right of self-determination. The Knowland resolution left it to the discretion of President Eisenhower whether to raise the matter at the Geneva "summit" conference or to leave it to a more opportune moment. (New York Times)

A. AUSTRALIA.—The "Bankstown Observer" Case.—Newspaper Proprietor and Editor imprisoned by Federal Parliament for Breach of Parliamentary Privilege.

The Federal House of Representatives, in the first case of its kind in the history of the Australian Parliament, committed two men to prison for three months on June 10 for breaches of Parliamentary privilege. The two men concerned with Mr. R. E. Fitzpatrick and Mr. F. C. Browne, respectively proprietor and editor of the *Bankstown Observer*, a paper published in one of the suburbs of Sydney. They were summoned to appear at the Bar of the House after a parliamentary committee had found them guilty of a serious breach of parliamentary privilege by the publication of an article concerning Mr. Charles Morgan, a Labour member of the House.

Mr. Morgan, whose constituency (Reid) includes the Bankstown area, had for some years been campaigning against alleged graft and corruption on the Bankstown Council. In March 1954 the New South Wales Government had removed the Council, on the ground that it was incompetent to fulfil its responsibilities. Mr. Morgan had subsequently called upon the State Government to appoint a commission of inquiry to investigate the matter, and when the State Government refused to do this, Mr. Morgan had called upon the Federal Government to appoint a Royal Commission. It was following this demand that Mr. Morgan had been attacked by the *Bankstown Observer*. The parliamentary committee declared that the article in the paper was intended to intimidate Mr. Morgan in the performance of his parliamentary duties, and that the paper had made a deliberate attempt to impute corrupt conduct to Mr. Morgan as an M.P., with the express purpose of discrediting and silencing him.

When the two men were called to the Bar of the House **Mr. Fitzpatrick** apologized for what he had done, saying that he had no idea when he published the article that it was a breach of Parliamentary privilege. **Mr. Browne,** on the other hand, asserted that he had been denied justice and the rights which were always observed in Court; that the case against him had not been properly proved, and that he had been refused legal representation, had not been allowed to cross-examine his accuser, and had no right of appeal. After personally attacking the Prime Minister, Mr. Menzies, whom he called "one of the most vindictive men in the country," Mr. Browne asked that the matter should be delegated to the local court.

The House then adjourned while the Cabinet met, and when it reassembled Mr. Menzies submitted two resolutions, one covering each of the men, proposing that they be kept in custody until Sept. 10. After some debate the resolutions were agreed to, by 55 votes to 12 in the case of Mr. Fitzpatrick and by 55 votes to 11 in that of Mr. Browne. The two men were then recalled to the Bar of the House, informed of their sentences, and conveyed to prison under a warrant signed by the Speaker.

Mr. Menzies, in moving the resolutions, said that Section 49 of the Commonwealth [i.e. Australian Federal] Constitution provided that the powers, privileges, and immunities of the Senate and House of Representatives should be such as declared by Parliament, and until declared by Parliament should be those of the British House of Commons. The Commons had for centuries exercised its powers to protect itself and its members on the very sound principle that, unless Parliament remained an institution in which members remained free to speak, it would cease to perform one of its greatest functions. Parliament was a judge in its own cause because nobody else could protect Parliament—one had only to silence the individual members to reduce Parliament to impotence.

Mr. Browne's arrogance at the Bar (Mr. Menzies went on) had confirmed his complete contempt for Parliament. Criticism of Parliament, even violent criticism, was of course justified by experience and warranted by right. The present case, however, was completely outside the realm of criticism; it was one of conspiracy to blackmail a member into silence. If Mr. Morgan had not invoked the consideration of the House and had remained silent, then his capacity to represent his electors would have been destroyed. In the circumstances, the Prime Minister concluded, a reprimand would be ridiculous, and a fine was not within their power. "The historic remedy," he declared, "adopted rigidly in the history of the House of Commons, is . . . to commit to prison."

Dr. Evatt, Leader of the Opposition, moved an amendment (rejected by the House) that a substantial fine should be imposed, and that the amount of the fine and the procedure for imposing it should be determined by the House. He said that he did not agree with Mr. Menzies that Parliament had no power to impose a fine, and contended that there was nothing to stop Parliament from declaring that it possessed such power. He also thought that although the House had constitutional authority to protect itself, it must remember that there was no right of appeal, because of this he would oppose the suggested prison sentence as contrary to the best traditions of Australian justice.

Mr. Morgan stated that he did not wish to vote for any penalties, as he had only brought the matter before the House in order to vindicate himself. The real culprits would not be the ones to be punished; they were, he asserted, the people behind Mr. Browne and Mr. Fitzpatrick who had been "bolstering them up" for their own purposes.

Immediately after Mr. Fitzpatrick and Mr. Browne had been sentenced, their counsel applied for a writ of *habeas corpus* asking the Commissioner of Police in Canberra to show cause why they should not be released. Hearings on this application opened on June 22 before the High Court in Sydney, to which the case had been transferred from the Canberra Court by Mr. Justice Thompson on the grounds that it raised important questions of personal liberty and that it would consequently be advisable if it were heard before a greater number of judges.

Counsel for Mr. Fitzpatrick (Mr. P. D. Phillips, Q.C.) contended that Parliament had "completely misconceived" the nature of its privilege, as there was nothing in Section 49 of the Commonwealth Constitution which authorized the House of Representatives to determine that someone who was not a member of the House had committed a breach of privilege, or to direct the Speaker to have such a person punished. However, even if the Constitution gave the House such authority, it was still for the courts to determine whether Parliament had exceeded its power.

Furthermore, Mr. Phillips claimed that there was nothing which Parliament could hold to be in the nature of a breach of privilege. Section 49 only made a temporary grant of unlimited legislative power, which ceased to operate once legislative power had been exercised, and by passing the Parliamentary Papers Act, 1908-46, Parliament had wiped away the powers, privileges and immunities granted under the transitional provisions of Section 49.

Mr. Phillips further argued that Section 50 of the Commonwealth Constitution precluded Parliament from exercising its powers in any manner for which it had not previously legislated. It gave each House of Parliament power to make rules and orders with respect to the manner in which its powers, privileges and immunities might be exercised, but there were no rules or orders in existence which made any provision for the issuing of the Speaker's warrant whereby Mr. Fitzpatrick was being held in gaol. Mr. Phillips also submitted that persons alleged to have committed a breach of privilege should be dealt with by judges in a court of law, and not by Parliament.

After hearing counsel for Mr. Browne, and informing counsel for the acting Commissioner of Police that he would not be called upon, the High Court on June 24 unanimously refused the application for writs of *habeas corpus*.

The Court's judgment was delivered by the Chief Justice, Sir Owen Dixon. He said, after considering the law of England on the matter, that if similar warrants were produced to a court sitting in London as warrants of the House of Commons, they would be regarded by the court as conclusive of what they stated—namely, that a breach of privilege had been committed and that the House, acting on that view, had directed that the two persons should be committed. It would not be possible to go behind the warrants. The question in the present case was whether the same state of law applied under Section 49 of the Commonwealth Constitution. The language of that Section (said the Chief Justice) was such as was apt to transfer to the House of Representatives the full powers, privileges and immunities of the House of Commons. "In unequivocal terms, the powers of the House of Commons have been bestowed upon the House of Representatives," he declared.

Rejecting the argument that Section 49 should be given a restrictive meaning, the Chief Justice said that this could be done only if a restrictive meaning were imperatively demanded by a more general consideration which the Constitution supplied. However, it was incredible that the framers of Section 49 had not been completely aware of the state of the law in Britain, and, when they adopted the language of Section 49, had not been conscious of its consequences. Moreover, the general structure of the Constitution did not provide sufficient ground for placing an artificial limitation upon Section 49.

It was correct, as counsel had argued, that the Australian Constitution was based on the separation of powers and that the judicial power reposed exclusively in the courts. But throughout English history there had been a tendency "to regard the powers of the House of Commons as not strictly judicial, but as belonging to the Legislature rather, as something essential, or at any rate proper, for its protection."

The Chief Justice also dismissed the argument that as the Legislature had defined its powers under Section 49, those derived from the House of Commons no longer applied. He pointed out in this connexion that there was no legislation on the Statute Book which purported to declare comprehensively what Parliament desired its powers, privileges and immunities to be. Counsel had relied on two statutes, the Parliamentary Papers Act, 1908-46, and the Parliamentary Proceedings Broadcasting Act, 1946. But these Acts only represented, more or less accidentally, a declaration of one or two minor privileges, whereas Section 49 contemplated not a single enactment dealing with some minor, subsidiary matter, but was concerned with the totality of what the Legislature thought fit to provide for both Houses as powers, privileges and immunities.

With regard to the argument that Section 50 subtracted something from Section 49, Sir Owen Dixon said that this contention was ill-founded, as Section 49 clearly had an operation which was independent of the exercise of the power of Section 50.

An application by Mr. Fitzpatrick and Mr. Browne to the Privy Council in London, seeking leave to appeal against the Australian High Court's decision, was rejected by the Judicial Committee of the Privy Council on July 14 on the ground that the judgment of the High Court was "unimpeachable."

A. ITALY. — Resignation of Scelba Government. - New Cabinet formed by Signor Segni.

Signor Scelba resigned on June 22 following an unsuccessful effort to reconstruct his Cabinet, which had been hampered in its work for several months by acute differences between the coalition parties. The two most important issues over which the difficulties arose were (1) the extent to which the holders of farm leasehold tenancies should be protected against eviction by their landlords, and (2) whether the further exploitation of Italy's natural oil and gas resources should be reserved solely to the State or be open to the participation of private enterprise.

As regards the position of farm leasehold tenancies, the Liberal Ministers had opposed a demand by the Democratic Socialists that wartime regulations which curtailed the right of land-owners to evict their leasehold tenants should be made permanent The Cabinet thereupon agreed on Feb 24 on a compromise Bill which, on the one hand, would safeguard landowners' rights, but on the other hand would give tenants protection by allowing them to plead "fair grounds" (*giusta causa*) against eviction This compromise was opposed by the Liberal Party's right-wing led by Signor Malagodi (the party secretary), who resigned in protest, however, he later withdrew his resignation after the party's National Council had agreed to accept the compromise Bill, though reserving the right to continue to press its point of view in the formulation of details On the other hand, the Republican Party (which, though not represented in the Government, supported it in Parliament) unanimously adopted a resolution on March 8 rejecting the compromise Bill as giving insufficient protection to tenants, and accusing the Government of going back on their political and social programme

The differences between the coalition parties were temporarily shelved after discussions which Signor Scelba held with the other party leaders on March 21, prior to his and Professor Martino's journey to Canada and the U.S.A. (see 14287 B). On his return, the Prime Minister succeeded on April 17 in obtaining the support of the other coalition parties for a further short period until the election of the new President of the Republic. After the election of President Gronchi—which was marked by rivalry between the Christian Democratic left-wing (the *Iniziativa Democratica*) led by Signor Fanfani, and the party's right-wing (the *Concentrazione*) led by Signor Pella—the projected "clarification" talks were further postponed, and the Democratic Socialists and Liberals agreed to remain in the coalition (see 14213 A). However, the introduction of a joint no-confidence motion by the Monarchists and the neo-Fascist M.S.I. in June finally forced the Prime Minister to negotiate a new coalition agreement in order to secure the support of the two wings of his own party, as well as that of the smaller coalition parties, for the rejection of the motion.

Within the Christian Democratic Parliamentary Party, the *Concentrazione* group (which comprises about 150 members) had for some time demanded that the "quadripartite" coalition should be abandoned and that a Government should be formed by the Christian Democrats alone—a demand opposed both by the *Iniziativa Democratica* group and by Signor Scelba On June 13, however, a compromise was reached by the two groups. This reaffirmed "the value of the understanding with the democratic parties" (i e , the smaller coalition parties), but stressed the urgent necessity for a "clarification of the relationships and policies of the coalition" as demanded by the party's Directorate, and called for a "structural adaptation necessary to ensure an efficient Government," which, it said, must take account of "the pre-eminent responsibility of the Christian Democrats"

Signor Scelba accordingly began discussions with representatives of the other coalition parties on June 15, but in the face of sudden difficulties within his own party decided on June 22 to resign.

The difficulties arose because the deputies belonging to the *Concentrazione* disavowed the agreement which Signor Scelba had reached with the other three parties, on the ground that the Republicans had at the last minute formally refused to enter the coalition. In the circumstances the "Concentrationists" reiterated their demand that Signor Scelba's "quadripartite formula" should be abandoned and a purely Christian Democratic Government formed. This Signor Scelba declined to do.

In a statement after his resignation Signor Scelba pointed to the important constitutional fact that his Government had not resigned because of a defeat in Parliament, which would be the normal constitutional occasion for resignation, but because of party difficulties quite extraneous to events in either House.

After consultations with Signor De Nicola (the first President of the Republic), with the presidents and former presidents of the two Houses of Parliament, and with all the party leaders, and after receiving the views of ex-President Einaudi (who was then visiting Britain), President Gronchi asked Signor Segni (Christian Democrat) on June 26 to investigate the possibility of forming a new Government. Signor Segni accepted this task and, after reporting to President Gronchi, was formally invited on July 2 to proceed with the formation of a new Cabinet. He succeeded in doing so, although the Republicans again withdrew their promised participation at the last moment on the ground that their leader, Signor Pacciardi, could not be given either the Ministry of National Defence or the Foreign Ministry.

The membership of the new Government—a coalition between the Christian Democrats, the Democratic Socialists, and the Liberals, which will also have the Republicans' support in Parliament—was announced on July 6 as follows :

Signor Antonio Segni (Chr. Dem.)	Prime Minister.
*Signor Giuseppe Saragat (Dem. Soc.) .	Vice-Premier.
*Signor Raffaele De Caro (Lib.) ..	Ministers without portfolio.
*Signor Pietro Campilli (Chr. Dem.) .	
Signor Guido Gonella (Chr Dem.) .	
*Professor Gaetano Martino (Lib.)	Foreign Affairs.
Signor Emilio Colombo (Chr. Dem.)	Agriculture.
*Senator Ezio Vanoni (Chr. Dem.)	Budget.
†Signor Bernardo Mattarella (Chr. Dem.)	Foreign Trade.
*Signor Paolo Emilio Taviani (Chr. Dem.)	Defence.
Signor Giulio Andreotti (Chr. Dem.) .	Finance.
Signor Aldo Moro (Chr. Dem.)	Justice.
Signor Guido Cortese (Lib.)	Industry and Commerce.
†Signor Ferdinando Tambroni (Chr. Dem.)	Interior.
*Signor Giuseppe Romita (Dem. Soc.)	Public Works.
*Signor Ezio Vigorelli (Dem. Soc.)	Labour and Social Security.
†Signor Gennaro Cassiani (Chr. Dem.)	Merchant Marine.
Signor G. Braschi (Chr. Dem.) ..	Posts and Telecommunications.
Signor Paolo Rossi (Dem. Soc.)	Education.
*Senator Silvio Gava (Chr. Dem.)	Treasury.
Signor Armando Angelini (Chr. Dem.)	Transport.

* No change † Held different portfolio in Scelba Cabinet

Signor De Caro will be in charge of the Government's relations with Parliament; Signor Campilli will be responsible for the *Cassa del Mezzogiorno*, the State institution dealing with the economic development of Southern Italy; and Signor Gonella will deal with administrative reform measures.

The new Government thus comprised 14 Christian Democrats, four Democratic Socialists, and three Liberals—the same proportion as in the Scelba Government. As regards the Christian Democrats, two prominent members of the right-wing *Concentrazione*—Signori Andreotti and Gonella—entered the Government, though they did so in their "personal capacity" because Signor Pella had refused to sanction the group's official participation in view of the continued absence of the Republicans; the left-wing *Iniziativa Democratica* were represented by Signori Moro and Colombo. The Christian Democrats relinquished the Ministry of Education in favour of the Democratic Socialists—generally regarded as an important concession made to that party; in turn, the Democratic Socialists gave up the Ministry of Finance in favour of the Christian Democrats. The Liberals retained the important portfolios of Foreign Affairs and Industry.

Nine Ministers who held office in the Scelba Cabinet retained their portfolios in the new Government: Signori Saragat, De Caro, Campilli, Martino, Vanoni, Taviani, Romita, Vigorelli, and Gava Three members of the Scelba Cabinet changed their portfolios: Signor Tambroni, formerly Minister of Merchant Marine, who took over the Ministry of the Interior, Signor Mattarella, who relinquished the Ministry of Transport for the portfolio of Foreign Trade; and Signor Cassiani, who relinquished the portfolio of Posts and Telecommunications for that of the Merchant Marine.

Two members of the new Government, Signori Gonella and Andreotti, had held ministerial office in previous Governments but not under Signor Scelba Ministers taking office for the first time were Signori Cortese, Colombo, Moro, Rossi, Braschi, and Angelini.

The following members of the Scelba Administration left the Government. Signor Tupini (who had been Minister without portfolio in charge of Administrative Reform), Signor Medici (who had been Minister of Agriculture), Signor Martinelli (who had held the Foreign Trade portfolio), Signor Tremelloni (formerly Minister of Finance), Signor De Pietro (the former Minister of Justice), Signor Villabruna (formerly Minister of Industry and Commerce), and Signor Ermini (the former Minister of Education). All were Christian Democrats except Signor Tremelloni, a Democratic Socialist.

Signor Segni (64), the new Prime Minister, became Professor of Law at the University of Perugia at the age of 29, and was subsequently appointed Rector of the University of Sassari (Sardinia), his birthplace. Before the Mussolini regime he took a prominent part in Roman Catholic organizations and the Italian Popular Party, but after the advent of Fascism he retired from political life and devoted himself to legal studies and agricultural problems, particularly those of his native island of Sardinia In 1942 he organized the clandestine Christian Democratic movement in the island, and

later headed the local partisan organization. After the liberation of Rome he became Under-Secretary for Agriculture under Signor Bonomi and Signor De Gasperi in 1945-46, and from 1946 until 1951 was Minister of Agriculture in Signor De Gasperi's various administrations In this capacity Signor Segni took a prominent part in the drafting and parliamentary passage of the land reform legislation which bears his name, and which is aimed at the redistribution of large estates, especially those of absentee landlords in Southern Italy, among landless peasants and land workers, in these reforms he himself relinquished lands which had belonged to his family for 200 years In 1951 Signor Segni became Minister of Education, and continued to hold this post in the Pella Cabinet until early in 1954. Since then he had been Professor of Procedural Law at the University of Rome, and chairman of the Chamber's commission for education and the fine arts

Of the other new Ministers, **Signor Andreotti** (36) was a close collaborator of the late Signor De Gasperi, and as Under-Secretary for the Presidency of the Council served under both Signor De Gasperi and Signor Pella from 1947 until early in 1954 He was Minister of the Interior in the short-lived Fanfani Government of January, 1954

Signor Angelini (63), a lawyer, has been a member of the Constituent Assembly and the Chamber of Deputies since 1946, and is chairman of the Chamber's transport, communications, and merchant marine commission

Signor Braschi (64), an active organizer of farm workers' unions and agricultural co-operatives before the Mussolini regime, was persecuted by the Fascists, and played a prominent part in the clandestine organization of the Christian Democratic Party during the war. He was elected to the Constituent Assembly in 1946 and became a Senator in 1948, in which year he also became Under-Secretary at the Treasury.

Signor Colombo (35), the youngest member of the Cabinet, was Under-Secretary for Agriculture in the fifth and sixth De Gasperi Cabinets, and collaborated closely with Signor Segni in the drafting of the legislation for land reform and the economic development of Southern Italy Under Signor Pella he became Under-Secretary for Public Works, a post which he continued to hold in the Fanfani and Scelba Governments

Signor Cortese (46), deputy secretary-general of the Liberal Party, has been a member of the Constituent Assembly and of the Chamber of Deputies since 1946. He was Under-Secretary for Finance in the Scelba Cabinet

Signor Gonella (49), a former secretary-general of the Christian Democratic Party, was Minister of Education from 1946 to 1951, and Minister of Justice in the eighth De Gasperi Cabinet He had not been a member of the Government since 1951

Signor Moro (38) is chairman of the parliamentary group of the Christian Democratic Party He is Professor of Criminal Law at the University of Bari, and has written important legal works.

Signor Rossi (54) is Professor of Criminal Law at the University of Genoa, and chairman of the parliamentary group of the Democratic Socialists He was banned from academic work during the Fascist regime.

Immediately after his installation as Prime Minister, Signor Segni announced that the new Government would introduce as quickly as possible a Bill to regulate the functions of the Prime Minister's office and the organization of the various Ministerial departments, so that the organic structure of the Executive could be definitely laid down in implementation of Article 95 of the Constitution. Signor Segni added that the new Government would seek the early approval of a Bill now before the Senate for the creation of a Ministry for Entertainment and Tourism, and would also submit to Parliament draft legislation for the setting-up of a Ministry of State Investments.

The appointment of 37 Under-Secretaries of State—two less than in the Scelba Government—was approved by the new Government on July 8. Of the new Under-Secretaries, 30 were Christian Democrats, four Democratic Socialists, and three Liberals.—(Giornale d'Italia, Rome - Corriere della Sera, Milan) **(Prev. rep. 14213 A.)**

A. PORTUGAL. — Cabinet Changes.

The following changes in the Portuguese Cabinet were announced on July 8: Dr. Marcelo Caetano, president of the Corporative Chamber, as Deputy Prime Minister in succession to Dr. João da Costa Leite; Dr. Pinto Barbosa as Minister of Finance *vice* Dr. Aguedo de Oliveira, Dr. Raul Ventura as Minister for Overseas Territories *vice* Commander Sarmiento Rodrigues; Senhor Francisco Leite Pinto as Minister of Education *vice* Dr. Pires de Lima; Dr. Veiga de Macedo as Minister of Corporations *vice* Dr. Soares da Fonseca.

B. ITALY - TURKEY. — Wheat Agreement.

An agreement was signed in Ankara on July 4 providing for the supply by Turkey to Italy of 100,000 tons of wheat annually during the next five years.—(Neue Zurcher Zeitung) **(14050 F.)**

C. INDIA. — Promotion of Hindi as Official Language.

On July 10 the Union Ministry of Education published its programme for the progressive replacement of English by Hindi as the official language of the Central Government within 15 years. The Indian Constitution had laid down that Hindi should become the official language within 15 years of the entry into force of the Constitution.

The Ministry stated that the most important measures necessary to achieve this objective were (1) to develop Hindi terms in science, technology, and administration as rapidly as possible in order to meet national requirements, and (2) to foster the spread of Hindi in areas where it was not the mother-tongue This programme would be carried out in three stages of five years each

The first five-year stage would include the preparation of Hindi technical terms, the compulsory teaching of Hindi in all secondary schools in non-Hindi speaking areas, and the propagation of Hindi among the people of these areas. The Ministry stated that over 26,000 technical terms were under consideration, that final lists were ready in several sciences, and that many States—including Assam, Bombay, Coorg, Hyderabad, Saurashtra, and Travancore-Cochin—had already made Hindi compulsory in secondary schools

During the second stage the compilation of Hindi technical and scientific terms would be completed, all students in non-Hindi speaking areas would be made familiar with the Hindi language, and a programme of adult literacy in Hindi would be carried out in those areas In the third five-year stage, Hindi would be introduced side by side with English for administrative purposes of the Central Government, and as the medium of communication between the Centre and the States

It was added that the Government had already taken steps to prepare standard grammars and dictionaries in Hindi, and to compile suitable scientific, technical, and administrative terms, that a scheme for a Hindi Encyclopaedia was in preparation, that consideration was being given to the most satisfactory method of evolving a Hindi shorthand; and that the question of typewriters and teleprinters with Hindi keyboards was also being considered

On June 8 the Union Ministry of Education had set up four regional committees to examine and survey the work down for the propagation of Hindi in non-Hindi speaking States They were (1) Eastern zone, comprising Assam, West Bengal, Orissa, Manipur, and Tripura, (2) Southern zone, comprising Madras, Travancore-Cochin, Mysore, Hyderabad, Coorg, and Andhra, (3) Western zone, comprising Bombay, Madhya Pradesh, Saurashtra, and Kutch, and (4) Northern zone, comprising the Punjab (East), the Patiala and East Punjab States Union (PEPSU), and Jammu and Kashmir.

An Official Language Commission of 21 members, presided over by Mr. B. G. Kher (formerly Indian High Commissioner in London), was set up by President Prasad on June 7 to submit recommendations on the progressive use of Hindi as the official language of India. The Commission, which includes many eminent scholars, will submit its recommendations to the President and Parliament not later than April 30, 1956.

D. POLAND - EASTERN GERMANY. — Joint Declaration on Oder-Neisse Frontier.

A joint statement was issued on July 6 by the Polish and East German Governments declaring that the frontier between Poland and Germany had been "definitely and irrevocably" fixed on the rivers Oder (Odra) and Neisse (Nysa). The statement added that there was "complete unanimity" between the two Governments on this matter, and that both Governments had "recorded their unflinching determination to combat, in accordance with the provisions of the Warsaw Treaty, all attempts to disturb the friendly relations between them." The declaration was issued on the fifth anniversary of the agreement signed at Zgorzelec (Gorlitz) in 1950 (see 10876 A), under which the Polish and East German Governments had recognized the Oder-Neisse line as the definitive frontier between the two countries.—(Polish Embassy, London) **(Prev. rep. Oder-Neisse Frontier, 10876 A; 10804 A; Warsaw Treaty, 14249 A.)**

E. FRANCE. — Ratification of Austrian Treaty.

The French National Assembly unanimously approved the ratification of the Austrian State Treaty on July 12, following a recommendation to that effect by M. Pinay, the Foreign Minister, and by M. Gouin (Socialist), *rapporteur* of the Assembly's foreign affairs commission.—(Le Monde, Paris) **(Prev. rep. 14295 B.)**

F. ISRAEL. — Purchase of British Destroyers.

It was announced on July 11 that Israel had purchased two 1,700-ton destroyers from Britain, H.M.S. *Zealous* and H.M.S. *Zodiac*, thereby making the Israeli Navy the strongest in the Middle East after that of Turkey. The Israeli Navy already possesses three Canadian-built frigates, two corvettes, and a number of torpedo-boats.—(Daily Telegraph)

A. FAR EAST. — Loss of Indian Airliner carrying Chinese Communist Officials to Bandung. - Indonesian Findings of Sabotage. - Investigations in Hong Kong.

An airliner of Air India International (the *Kashmir Princess*) with 18 people on board crashed on April 11 near the Great Natuna Islands, off Borneo, while *en route* from Hong Kong to Jakarta. In addition to the Indian crew of seven, the plane was carrying eight Chinese Communist journalists, two Polish journalists, and a North Vietnamese delegate, all of whom were on their way to take part in the Afro-Asian conference at Bandung. The only survivors were three members of the crew who were picked up by a Royal Navy survey ship, H.M.S. *Dampier*, and landed at Singapore.

The Chinese Government presented a Note to Britain on April 13 alleging that the plane had been sabotaged at Hong Kong by U.S. and Chinese Nationalist agents with the aim of "assassinating the Chinese delegation led by Premier Chou En-lai." The Note declared that the British Government and the Hong Kong authorities bore "a grave responsibility for this unfortunate incident."

After stating that the aircraft had been chartered by the Chinese delegation to the Bandung Conference, the Note alleged that the disaster was "a case of inhuman, premeditated murder, solely engineered by the Special Service Organization of the United States and the traitor Chiang Kai-shek." Long before the departure of the passengers (it continued) the Chinese Government had learned that "the U.S. Special Service Organization and Chiang Kai-shek were actively making arrangements to sabotage the aircraft in order to carry out their plot to assassinate the Chinese delegation led by Premier Chou En-lai." On April 10 the British Embassy in Peking had been informed of this matter, and had been requested to bring it to the attention of the Hong Kong authorities in order that they might take measures to safeguard the members of the delegation and press correspondents aboard the aircraft. Although the British Embassy had promised to notify the Hong Kong authorities by telegram, "the plot of the Special Service agents nevertheless succeeded."

After declaring that the British Government and the British authorities in Hong Kong could not evade "grave responsibility for this unfortunate incident," the Chinese Note demanded that the British Government "should immediately inform the authorities in Hong Kong in order that they may take urgent measures to place under strict supervision the staff of the airport concerned in the incident, and all other persons concerned, conduct a thorough investigation and arrest and punish, according to the evidence, the Special Service agents taking part in this case of conspiracy and murder; and instruct the appropriate authorities to ascertain the whereabouts of the aircraft which met with the accident, and the persons on board."

The British Government's reply was presented in Peking on April 17 by Sir (then Mr.) Humphrey Trevelyan, Chargé d'Affaires at H.M. Embassy.

The British Note stated that while H.M. Government deplored the incident and the loss of life, they were bound, in view of the serious allegations made by the Chinese Government, to make it clear that they accepted no responsibility for the accident or for its consequences. The Note protested strongly against the Chinese Government's accusations against the British authorities, which had been made before time had been allowed for any investigation.

Continuing, the British Note said that the Chinese Note of April 13 seemed to suggest that the Chinese Foreign Ministry had informed H.M. Embassy in Peking in advance that arrangements were being made to sabotage the aircraft. This, however, had not been the case. The facts were that the Chinese Government had informed the Embassy on April 10 that it had received information that Nationalists might make trouble for the party of Chinese journalists when they left Hong Kong the following day for the Bandung Conference, and had requested that appropriate precautions might be taken.

This information had not been amplified in any way, and there had been no suggestion of sabotage. The Counsellor [of H.M. Embassy] had undertaken to inform the Governor of Hong Kong at once, and had asked for the following supplementary information to assist the Hong Kong police: the number of the party, where they were staying, the name of the airline concerned, and the route to be taken. The Chinese Foreign Ministry had been unable to answer any of these questions at the time.

It had been agreed (the British Note continued) that a telegram would be sent at once to Hong Kong, and that any supplementary information which the Ministry could supply would be telegraphed later. Shortly afterwards the Ministry had telephoned to say that the aircraft was Indian and that the New China News Agency representative in Hong Kong would know where the party were staying. This information had been immediately telegraphed to the Governor of Hong Kong with a request that appropriate precautions should be taken.

On April 11 the representative of the New China News Agency had telephoned to the Director of the Special Branch of the Hong Kong police during the morning to inform him that 11 journalists and a Vietminh delegate would be travelling by an Air India aircraft which was due to leave Hong Kong later the same day. No mention had been made by the representative, either then or later, of any suspicion of trouble, and the communication had been made in a routine manner.

Additional police precautions had been taken to ensure that the party were not molested, and during the time that the aircraft was in Hong Kong it had been under police guard, and no unauthorized person had been allowed, or had attempted, to approach or board the aircraft. The local manager and other officials of Air India and members of the crew of the aircraft had been present, and had supervised every aspect of refuelling and servicing. The actual handling of the luggage and the passengers had been done under the supervision of the China Travel Service and senior officials of Air India. The only articles placed on board the aircraft had been baggage belonging to the party and normal refreshments for passengers. The latter had been supplied by a local firm but had been checked on loading by the steward of the aircraft.

The passengers had been brought to the airport by airline motor-bus and, though this was an exception to normal practice, had been taken straight to the airport without having to go through Customs or immigration formalities. Similarly, without passing through the Customs, the baggage had been loaded straight into the aircraft under the supervision of Air India. The aircraft had taken off without incident. Police watch at the time and subsequent detailed inquiries had revealed nothing suspicious.

As soon as news of the crash had been received (the Note went on) the British authorities in the area had taken energetic steps to assist in the search and rescue operations. Two R.A.F. Sunderland flying-boats and a high-speed launch had immediately been despatched to the scene of the disaster, and these had been closely followed by H.M.S. *Dampier*, which had picked up three survivors. Further searches had been carried out by the R.A.F. and the Indonesian Air Force until the wreckage was located, whilst H.M.S. *Dampier* had remained in the area in search of further survivors and had assisted in salvage operations.

The Note pointed out that it was clear that the British authorities in Hong Kong had taken all steps to ensure the safety of the passengers and of the aircraft while it was in Hong Kong. H.M. Government could not, therefore, accept any suggestion by the Chinese Government that the British authorities in Hong Kong, or elsewhere, had failed in their duties. Pending a full investigation, it was premature to assign a cause for the crash.

It was also pointed out that since the aircraft belonged to an Indian airline, and the crash did not occur within British territory or territorial waters, it was not for H.M. Government to conduct a formal investigation into the causes of the incident. H.M. Government would, however, offer their full co-operation in any investigation carried out by the competent authorities concerned, and investigations would be carried out in Hong Kong by the Hong Kong police.

By agreement between the Indian, Indonesian, and British Governments, a salvage vessel of the Royal Navy, H.M.S. *Barford*, left Singapore for the scene of the disaster in an attempt to salve the wreckage of the airliner from the sea-bed. Salvage operations began on April 25 and lasted for ten days, during which period nearly 90 per cent of the wreckage was brought to the surface. It was subsequently shipped to Jakarta for examination by Indonesian and Indian technical experts.

In view of the fact that the disaster occurred in Indonesian territorial waters, the Indonesian Government instituted an official inquiry. The report of this inquiry, published on May 26 in Jakarta and New Delhi, stated that examination of the wreckage had produced "irrefutable evidence" that the airliner had been destroyed by the explosion of a time-bomb. The findings of the inquiry were as follows:

(1) The aircraft was airworthy and properly certified.

(2) The crew were experienced and held valid licences.

(3) The aircraft was properly loaded and had sufficient fuel for the flight.

(4) The take-off from Hong Kong was normal and the flight uneventful for the first five hours.

(5) An explosion occurred on board the aircraft at 18,000 feet. A fire broke out on the starboard wing and spread rapidly, causing failure of the hydraulic and electrical services.

(6) A rapid descent for "ditching" was immediately begun, and the emergency procedures were carried out efficiently and calmly by the crew under extremely difficult conditions.

(7) The aircraft hit the water with the starboard wing-tip while under partial loss of control, and broke up on impact.

(8) Examination of the wreckage had revealed "positive evidence of an explosion in the starboard wheel-well of a timed infernal machine, parts of which were still in the wreckage." This explosion had punctured a fuel tank and caused a fire which spread rapidly and could not be controlled.

Air India International had previously issued a statement on April 17 saying that the three survivors of the *Kashmir Princess* (the co-pilot, navigator, and engineer) were of the opinion that the explosion and fire that wrecked the airliner "emanated from an extraneous source unconnected with the aircraft," and were not the result of any failure in the airframe, engines, or fuel.

The Hong Kong Government issued a statement on May 27 which said that it seemed probable, from the findings of the Indonesian court of inquiry, that "the explosive device employed was placed in the aircraft in Hong Kong." The statement added that everything possible would be done to bring those guilty of the crime to justice, that inquiries had already begun, and that about 100 persons had been seen by the police. The Hong Kong Police Commissioner (Mr. A. C. Maxwell) said on June 12 that the police were treating the case as one of "carefully planned mass murder," and added:

"It has been established beyond doubt that the *Kashmir Princess* met its end through an explosion caused by some form of time-bomb. It is regrettably almost equally certain that this time-bomb was placed aboard the aircraft in Hong Kong No effort is being spared to bring to justice the perpetrators of this ghastly crime"

A reward of 100,000 Hong Kong dollars (£6,250) was offered by the police on the same day for information leading to the arrest and conviction of those who were responsible for sabotaging the airliner.—(Times - Daily Telegraph - Manchester Guardian - The Statesman, Calcutta - The Hindu, Madras - Indonesian Embassy, London)

A. UNITED KINGDOM. — Labour Party. - Allocation of Specialist Responsibilities among "Shadow Cabinet" and other Front Bench Members.

It was announced on July 14, after a meeting of the Parliamentary Labour Party presided over by Mr. Attlee, that the members of the Labour "shadow Cabinet," and other members of the Opposition Front Bench, would in future specialize in various subjects, would ordinarily take the lead in debates on these matters on behalf of the Opposition, and would maintain close contact with the specialist group responsible for their particular subject. Responsibilities were allocated as follows:

Atomic Energy, Mr Philip Noel-Baker; *Agriculture, Fisheries, and Food*, Mr Tom Williams, Mr George Brown, Mr F. T Willey, *Colonial Office*, Mr James Griffiths, Mr Creech Jones, *Commonwealth Relations*, Mr Patrick Gordon-Walker, *Defence*, Mr Richard Stokes; *Admiralty*, Mr James Callaghan; *War Office*, Mr. Michael Stewart, *Air Ministry*, Mr. John Strachey, *Education*, Mr J. Edwards, Mr Michael Stewart, *Foreign Office*, Mr Alfred Robens, Mr Kenneth Younger, *Fuel and Power*, Mr James Callaghan, *Health*, Dr Edith Summerskill, Mr. Arthur Blenkinsop, *Home Office*, Mr Kenneth Younger, Mr. Geoffrey de Freitas; *Housing and Local Government*, Mr. G. R. Mitchison, Mr. G. S. Lindgren, *Labour and National Service*, Mr Aneurin Bevan, Mr Frederick Lee, *Law Officers*, Sir Lynn Ungoed-Thomas; *Pensions and National Insurance*, Mr. H. A. Marquand, Mr. Tom Steele, *Post Office*, Mr. Ness Edwards, Mr C R. Hobson; *Scottish Affairs*, Mr Arthur Woodburn, Mr. Tom Fraser, and Miss Margaret Herbison, *Supply*, Mr George Brown; *Board of Trade*, Mr. Harold Wilson, Mr Arthur Bottomley, *Transport and Civil Aviation*, Mr George Russell Strauss; *Treasury*, Mr. Hugh Gaitskell, Mr. Douglas Jay; *Works*, Mr. Arthur Greenwood.

Many of those mentioned above held portfolios in the post-war Labour Governments, either as full Ministers or junior Ministers, in the various spheres to which they were allotted specialist responsibility. Notable exceptions, however, were the selection of Mr. Robens (formerly Minister of Labour) as a specialist in foreign affairs and of Mr. Stokes as a specialist in defence matters. Nevertheless, any suggestion that the allocation of specialist responsibilities implied a "shadow Government" was officially disclaimed.—(Daily Herald)

B. BOLIVIA. — Oil Pipeline to Argentina.

The first international oil pipeline from Bolivia, carrying petroleum from the Camiri area to Argentina at a rate of more than 660,000 gallons a day, was opened on July 1. Under an agreement between the two countries, part of the oil will serve to reduce Bolivia's debt to Argentina for the construction of a railway between Yacuiba (on the Argentine frontier) and Santa Cruz (Bolivia) and a road from Oran (Argentina) to Tarija (Bolivia). Argentina will pay for the remainder of the oil by exports to Bolivia of meat and manufactured goods. (New York Times) **(Prev. rep. 13827 D.)**

C. BURMA. — Defence Services Academy.

The Burmese Prime Minister, U Nu, inaugurated on Feb. 14 a Burmese Defence Services Academy and a Burmese Army Combat Forces School. The Academy and School are situated at Ba-Htoo-Myo, in the southern Shan States.

(Burmese Government Information Dept., Rangoon)

D. NEW ZEALAND. — Increase in Bank Rate.

The Reserve Bank of New Zealand increased its discount rate on July 1 from 4 per cent to 5 per cent.—(Directorate of Information Services, Wellington) **(Prev. rep. 13907 C.)**

E. UNITED STATES. — Opening of American Shakespeare Festival Theatre and Academy.

The American Shakespeare Festival Theatre, built within six months at a cost of $700,000, was opened on July 12 at Stratford, Connecticut, a town which was settled by immigrants from Stratford-on-Avon, England, in 1639—25 years after Shakespeare's death.

The theatre is situated in a 12-acre park on the banks of the Housatonic River, and is 60 miles from New York. Built by Mr. Edwin Howard, a Westport (Conn.) architect, it is octagonal in shape, like the 16th-century Globe Theatre in London, and can seat 1,500 people Associated with the theatre is an Academy of Acting (housed in a nearby 18th-century mansion) which will train American actors in Shakespearean roles The first Director of the Academy is Mr. John Burrell, formerly Director of the London Old Vic

The project for an American Shakespeare Festival Theatre and Academy originated with a group of sponsors headed by Mr. Lawrence Langner, a well-known New York theatrical producer who was born in Wales. Assistance was forthcoming from the Rockefeller Foundation and the Mellon Foundation, both of which contributed $200,000 The project is on a non-profit-making basis

Although no foreign actors (other than Canadians) will be employed, it was stated that an exception might be made at some future time should the American Festival Theatre wish to employ the services of such eminent British actors as Sir Lawrence Olivier or Sir John Gielgud. A British director of plays was, however, appointed in the person of Mr Denis Carey, formerly Director of the Bristol Old Vic.

The theatre opened with a performance of *Julius Caesar*, which was attended by the Governor of Connecticut (Mr Abraham Ribicoff), the British Ambassador (Sir Roger Makins), and the Mayor of Stratford-on-Avon (Mr Dudley Woodman), who was present at the opening ceremony at the invitation of Governor Ribicoff. Messages were received from President Eisenhower, Sir Anthony Eden, and Sir Winston Churchill, who described the theatre as "an outward evidence of the links that bind together in harmony the English-speaking world"

The theatre will be the home of an annual Shakespearean Festival which aspires in time to rival those already held at Stratford-on-Avon and Stratford, Ontario.

(New York Times - New York Herald Tribune)

F. INTERNATIONAL COURT OF JUSTICE.—Ruling on U.N. Voting Procedure on South-West Africa.

The International Court of Justice, in an advisory opinion delivered on June 7, unanimously upheld the procedure adopted by the U.N. General Assembly at its last (ninth) session for voting on reports, petitions, and other matters relating to South Africa's administration of the former mandated territory of South-West Africa.

On Oct. 11, 1954, the General Assembly had decided that its vote on questions concerning South-West Africa should be taken by a two-thirds majority—the procedure reserved under Article 18 of the U.N. Charter for "important questions." Because several countries expressed doubts as to the legality of this procedure and raised the question whether unanimous decisions were required, the Assembly subsequently decided to ask the International Court for an advisory opinion on (1) whether the two-thirds voting procedure conformed with the Court's earlier opinion in respect of South-West Africa, (2) the alternative method that should be adopted if the two-thirds procedure was not correct The Court unanimously replied in the affirmative to the first question, thus making it unnecessary to consider the second.

The original advisory opinion handed down by the Court in 1950 stated, in part, (*a*) that "the degree of supervision to be exercised by the General Assembly should not . . . exceed that which applied under the mandate system, and should conform as far as possible to the procedure followed by the Council of the League of Nations," and (*b*) that "these observations are particularly applicable to reports and petitions." Decisions in the League of Nations were by unanimous vote, and South Africa had contended that the two-thirds majority rule would give the U.N. greater powers of supervision than those of the League.—(U.N. Information Centre, London)

G. UNITED KINGDOM. — The Crichel Down Case. - Resale of Land to Lieut.-Commander Marten.

Lieutenant-Commander Marten, whose complaints about the disposal of land at Crichel Down (Dorset) had led to a public inquiry and to the resignation of Sir Thomas Dugdale as Minister of Agriculture (see 13705 A), stated on Feb. 18 that he had accepted "under protest" an offer by the Commissioners of Crown Lands to sell to him the 725 disputed acres at Crichel Down for £15,000, the district valuer's valuation. He stated that he was asking for the price to be settled by arbitration because he was not satisfied that the amount asked for by Crown Lands represented a fair market value.—(Times)

A. SINGAPORE. — The Chinese Student Riots. - Communist Infiltration in Chinese Schools. - Government Criticisms of People's Action Party. - Strike Wave.

A serious situation developed in Singapore during May and June, firstly as a result of widespread rioting by Chinese students, and secondly as a result of a wave of strikes called by Communist-dominated unions. Developments during this period are described below.

Several thousand students from Chinese middle (secondary) schools, ostensibly supporting a strike of bus workers, fought pitched battles with the police on May 11-12. The students—many of whom were in their late 'teens or early twenties—erected barricades, scattered broken glass and barbed wire on the roads, overturned cars and lorries, and stoned and assaulted the police, who used batons, hoses and tear-gas to restore order. British, Malay, and Gurkha troops were called out to protect important buildings and installations, whilst the police were forced to open fire after a Chinese special constable had been hacked to death by the mob. Four people were killed in the disturbances (the above-mentioned Chinese constable, a Chinese detective, a student, and a U.S press correspondent, Mr Gene Symonds) and a number injured Mr. Symonds (29), South-East Asia manager of United Press, was attacked and murdered by persons unknown.

The situation in the Chinese middle schools had for some time past caused much concern to the Government of the Colony, since large numbers of students—particularly the older ones—had fallen strongly under the influence of Communist indoctrination. Similar student riots of a pronounced left-wing character—not, however, so violent or widespread—had occurred in May, 1954, and from time to time in succeeding months. The Chief Minister of Singapore (Mr. David Marshall), broadcasting on May 12, said that the "pattern of developments, recently and today, closely conforms to the Communist technique of seeking to foment industrial unrest on any excuse and to obstruct peaceful solutions" Mr Marshall added the the latest riots were apparently an organized attempt to foment trouble on the anniversary of the student riots of 1954, and gave a warning that the Government would not tolerate disorder or violence

As the student demonstrators were recruited principally from three schools, the Singapore Government announced after the riots (*a*) that the ringleaders would be expelled, and (*b*) that the management committees of these three schools would be asked to show cause why the schools should not be closed down Some 3,000 Chinese students thereupon began a "sit-down" strike in the grounds of the schools in an attempt to force the Government to withdraw its threat to expel the ringleaders and to close down the schools. On May 23, however, in response to an appeal by the all-party committee of the Legislative Assembly, the Government agreed to take no action against the schools or against individual students.

The bus strike which had been the ostensible cause of the riots ended on May 14, after a personal intervention by Mr. Marshall Apart from the workers of the company directly affected (the Hock Lee Bus Company), several thousand transport and industrial workers had struck in sympathy, with the result that Singapore's transport system had come to a virtual standstill for several days.

The newly-elected Singapore Legislative Council voted on May 16 (by 27 votes to nil, with the three People's Action Party members abstaining) to reintroduce an emergency regulation empowering the police to place Singapore under curfew if circumstances justified such action. [The regulation had been repealed at the first session of the Assembly three weeks earlier.] During the debate the People's Action Party (P.A.P.) and its leader, Mr. Lee Kuan Yeu, were strongly attacked both by Mr. Marshall and by Mr. W. A. Goode, Colonial Secretary in the Singapore Government.

Mr. Goode accused the P.A.P , their Communist supporters, and Chinese students, of responsibility for the riots and of "deliberately provoking widespread industrial unrest." After quoting from manifestos which, he alleged, had been approved by the People's Action Party, he said that Chinese students had been regimented, organized, and sent to the strike areas to inflame and support the strikers. Mr. Goode added that the Chinese schools had been corrupted and regimented into a dangerous weapon for the Malayan Communist Party; that the principals of the schools, apparently frightened of the Malayan Communist Party, had done nothing to prevent students from taking part in illegal activities, and that the problem of the Chinese schools was the most serious one facing the Government of Singapore.

Mr. Lee Kuan Yeu, in reply, declared that the P.A.P., and he personally, were opposed to Communism and violence, and that he could not be held responsible for the actions of individual party members. He added: "We [the P.A.P.] stand for a free, democratic, independent, non-Communist Malaya. We seek to destroy the colonial system by methods of non-violence. We want immediate independence. Give it to us now and we will fight Communism or any other ideology to preserve an independent Malaya. We oppose violence from any quarter. We deny that the P.A.P. engineered the strike or the mob violence."

Mr. Marshall said: "I accept without reservation Mr. Lee's assurance that he is not a Communist. But in his lust for power and his desire to destroy Colonialism he is allowing himself to be used as a catspaw by forces that he knows to be evil. . . . Mr. Lee has already said that he prefers Communism to Colonialism. Many countries that were satellites of England have gained their independence, but not one Communist satellite has ever done so. I am working for a Malaya that will not be a satellite of England or of any other Power" After calling upon the P A.P. to rid itself of Communists and "fellow-travellers" in its ranks Mr Marshall added that the Government would take measures to end the "thuggery and intimidation" in Chinese middle schools in order that the schools could return to their primary object of education

A wave of strikes, fomented by Communist-dominated unions, affected large numbers of workers in Singapore during the second week of June and led to the arrest of six of the strike leaders under the Emergency Regulations.

The leader of the Shop and Factory Workers' Union, Mr Lim Chin Siong (a member of the People's Action Party, and one of its representatives in the Legislative Assembly), called for a general strike on June 13 in support of some 1,300 clerical workers who had been on strike for six weeks in a pay dispute with the Singapore Harbour Board About 15,000 workers (mostly in small factories in which Mr. Lim's union was influential) responded to the strike call, whilst the bus workers also came out in support, thereby disorganizing public transport. Six strike and student leaders were arrested as suspected Communists on June 11-12 under the Emergency Regulations, among them Mr Fong Swee Suan, a leading figure in the P A P., Mr. Loh Wah Lim, of the Malayan Textile Spinning Workers' Union, and Mr. Cheng Yong Cheng, an active pro-Communist teacher at one of the Chinese schools During the next two or three days several thousand more workers came out on strike, but on the other hand many of the original strikers returned to work and there was no response to the call for a general strike Although the strike leaders threatened to continue the strike until the release of the six arrested persons, they agreed on June 17 to call the strike off

Mr. Marshall declared on June 12 that the Government considered the threat of a general strike to be "a direct form of political coercion endangering the welfare and security of the people," and that it had accordingly ordered the arrest of "a number of persons who are apparently responsible for organizing the threatened strike for political purposes." In a statement to the Legislative Assembly on June 17, he described the instigators of the strike as "a People's Action Party clique of pseudo-trade unionists who have prostituted the trade union movement in an attempt to bring about mob rule."

(Prev. rep. Singapore Government, 14152 A.)

B. YUGOSLAVIA. — Higher Grain Prices. - Increases in Retail Prices and Wages.

M. Vukmanovich, a Vice-President of the Federal Executive Council, announced on July 10 that the Yugoslav Government had decided (*a*) to increase the price of grain as an incentive to the peasants to grow and sell more wheat and maize to the State; (*b*) to end the subsidies for lard and oil; (*c*) to introduce higher retail prices for bread, fats, and tobacco, and to increase passenger transport fares; and (*d*) to increase, to a smaller extent, wages, pensions, invalid benefits, and children's allowances.

It was explained that the new measures would raise the State purchase price for wheat by five dinars per kilogramme, and for maize to six dinars. The retail prices of bread and flour would go up by an average of over 30 per cent to 48 dinars (nearly 1s. 2d.) per kilogramme, and the price of tobacco by 27 per cent. The increase in wages, pensions, and invalid benefits would be 500 dinars (about 12s.) a month, and of children's allowances 240 dinars

M. Vukmanovich also explained that while industrial production had made "an enormous advance," Yugoslavia's grain production was lower today than pre-war The essential aim of the price increases was to stimulate home food production and reduce food imports from abroad so as to ease the balance of payments, it was also hoped that the reduced consumption of grain resulting from the price increases would gradually lead to a change in the people's rather "one-sided" diet (of which bread comprises nearly 70 per cent). In this connexion he referred to the conclusion of a rice agreement with Burma under which Yugoslavia would buy about 50,000 tons of rice annually from that country.

The official newspaper *Borba* stated on July 11 that the Government was aware that its measures would be unpopular in the towns, but that the disturbance of family budgets would be insignificant compared with the "positive results" which were anticipated in solving Yugoslavia's economic problems.
(Tanjug Agency, Belgrade - Times) **(14162 A ; 12402 C.)**

C. UNITED STATES. — Cabinet. - Mr. Folsom appointed Secretary of Health, Education, and Welfare.

Mr. Marion B. Folsom, Under-Secretary of the Treasury, was nominated by President Eisenhower on July 13 as Secretary of Health, Education, and Welfare in succession to Mrs. Oveta Culp Hobby, the only woman in the Cabinet, who had resigned for personal reasons. Mr. Folsom (61) was treasurer of the Eastman-Kodak Company before joining the Treasury.
(New York Times) **(Prev. rep. 14279 D ; 12858 A.)**

JULY 23—30, 1955

A. GENEVA CONFERENCE. — The "Summit" Conference of Heads of Government. - Discussions on German Unification, European Security, Disarmament, and East-West Contacts. - Foreign Ministers to meet at Geneva in October.

The "summit" conference of the Heads of Government of France, the Soviet Union, the United Kingdom, and the United States ended on July 23 after having lasted for six days. A joint directive was issued at the end of the conference by President Eisenhower, Marshal Bulganin, Sir Anthony Eden, and M. Faure instructing the Foreign Ministers of the four Powers to meet in Geneva in October to "propose effective means" for the solution of the following questions: (1) European security and German reunification; (2) disarmament; and (3) contacts between East and West.

The proceedings of the conference are described below on a day-to-day basis

July 18.

The opening day of the conference (July 18) was devoted to statements by the four Heads of Government in which they put forward their respective views on the questions under consideration.

President Eisenhower (who presided at the opening session) said that they could not expect "to solve all the problems of all the world" during the few days in which the conference would last, but that, nevertheless, "we can perhaps create a new spirit that will make possible future solutions of problems which are within our responsibilities." He continued

"It is necessary that we talk frankly about the concrete problems which create tension between us, and about the way to begin solving them . . First is the problem of unifying Germany and forming an all-German Government based on free elections. Ten years have passed since the German armistice, and Germany is still divided. That division does a grievous wrong to a people which is entitled, like any other, to pursue together a common destiny While that division continues, it creates a basic source of instability in Europe. . . Our solution should take account of the legitimate security interests of all concerned. That is why we insist that a united Germany is entitled at its choice to exercise its inherent right of collective self-defence. By the same token, we are ready to take account of the legitimate security interests of the Soviet Union The Paris Agreements contain many provisions which serve this purpose. But we are ready to consider further reciprocal safeguards which are reasonable, practical, and compatible with the security of all concerned

"On a broader plane, there is the problem of respecting the right of peoples to choose the form of government under which they will live, and of restoring sovereign rights and self-government to those who have been deprived of them The American people feel strongly that certain peoples of Eastern Europe, many with a long and proud record of national existence, have not yet been given the benefit of this pledge of our U N wartime declaration, reinforced by other wartime agreements.

"There is the problem of communication and human contacts among our peoples. . . . The American people want to be friends with the Soviet peoples. There are no natural differences between our peoples, no territorial conflicts or commercial rivalries Historically, our two countries have always been at peace. But friendly understanding between peoples does not readily develop when there are artificial barriers such as now interfere with communication It is time that all 'curtains,' whether of guns or laws or regulations, should begin to come down But this can only be done in an atmosphere of mutual respect and confidence

"There is the problem of international Communism For 38 years its activities have disturbed relations between other nations and the Soviet Union Its activities are not confined to efforts to persuade. It seeks throughout the world to subvert lawful Governments and to subject nations to an alien domination. We cannot ignore the distrust created by the support of such activities In my nation and elsewhere it adds to distrust and therefore to international tension

"Finally, there is the overriding problem of armaments. This is at once a result and a cause of existing tension and distrust Contrary to a basic purpose of the U N Charter, armaments now divert much of men's efforts from creative to non-productive uses We should all like to end that But apparently none dares to do so because of fear of attack. Surprise attack has a capacity for destruction far beyond anything which man has yet known. So each of us deems it vital that there should be means to deter such attack Perhaps, therefore, we should consider whether the problem of limitation of armaments may not best be approached by seeking—as a first step—dependable ways to supervise and inspect military establishments, so that there can be no frightful surprises, whether by sudden attack or by secret violation of agreed restrictions . . ."

M. Edgar Faure said that the two main objectives in the present international situation were (1) to end the "cold war," and (2) to create peace and friendly relations among nations These two objectives were complementary and could not be separated. On the German question, he said: "Frankly, I think that as long as this problem is not solved . . . there will be no real harmony in international life. If the four of us really have the will to reunite Germany, the question of how to do it will not be an obstacle."

The French Prime Minister strongly opposed any neutralization of Germany for the following six reasons (1) In international law there could be no discrimination against a sovereign country. (2) Neutralization of Germany because of her responsibility for the last war would mean putting such responsibility on the German people and not on the Nazi State (3) No similar neutralization measures had been applied to other belligerents (4) Neutralization would risk provoking in Germany a desire for revenge (5) Technical measures for controlling neutralization would be impossible to implement "materially and morally" (6) Neutralization, while suitable perhaps for a small nation, was impossible for a nation with a population and geographical position like that of Germany "For my part," he added, "I believe that a reunified Germany should live in the Western European and Atlantic Pact system. This seems to me best both in law and in fact."

As the Western Powers could see no objection to a unified Germany allied with the West (M Faure continued), and as Germany's general potential as a country would undoubtedly increase, the question of security should be examined from the point of view of the Soviet Union To meet the legitimate Soviet demand for security, he put forward the following proposals:

(1) The military forces of a united Germany should not exceed those which the German Federal Republic would possess as a member of the Western European Union

(2) The Western Powers should extend to the Soviet Union the guarantees embodied in the Paris Agreements—viz., that they would not support the use of force to obtain the reunification of Germany or to modify Germany's present frontiers, and that any Government guilty of resorting to force would be deprived of the assistance and military aid provided in the North Atlantic Treaty The German Federal Republic should also extend to the Soviet Union its undertaking (under the Paris Agreements) that it would not use force to obtain reunification or the modification of Germany's present frontiers

(3) A unified Germany should be included in a general security system, which could be extended to all European States wishing to join

M Faure also reiterated his proposal, made before the opening of the conference (see page 14313, first column), that the U S.A., the Soviet Union, the United Kingdom, and France should agree to reduce their arms budgets by agreed amounts and to put the resultant savings into an international fund which would be used to promote the economic development of the world's under-developed areas.

Sir Anthony Eden spoke as follows "This conference is unique in history because the conditions in which we meet are unmatched in human experience. We all know what unparalleled resources the scientific and technical discoveries of our age have placed within our reach We have only to stretch out our hands and the human race can enter an age of prosperity such as has never been known. It is equally clear how utterly destructive must be the conditions of any conflict in which the great Powers are engaged

"There was a time when the aggressor in war might hope to win an advantage and to realize political gain for his country by military action The more overwhelming the military power, the more tempting was the prize and the less might the aggressor expect to have to pay. Nothing of the kind is possible now. No war can bring the victor spoils, it can only bring him and his victim utter annihilation. . . These are stern facts out of which we can perhaps win enduring peace at last.

"At this conference we have to deal [with problems] mainly in the context of Europe. What is the chief among them? There can surely be no doubt of the answer—the unity of Germany. So long as Germany is divided, Europe will be divided. Until the unity of Germany is restored, there can be neither confidence nor security in this Continent . ."

Turning to "the wider issues of German unification," Sir Anthony continued "Why did the Berlin Conference fail a year ago? We must examine this as dispassionately as we can in order to see what progress we can now make from the apparently fixed positions which the great Powers on both sides then felt obliged to take. At Berlin, the West proposed the unification of Germany with free elections and the free right of Germany to choose her own foreign policy. Under the so-called 'Eden-plan,' Germany would have chosen either association with the West, association with the East, or neutrality. But the Soviet Government was unable to accept that plan. Yet we all know in our hearts that Germany must be united, and that a great country cannot be permanently prevented from freely deciding its own foreign policy

"The Berlin Conference failed because one of the Powers believed that a united Germany, rearmed and exercising its choice to join the NATO, would constitute an increased threat to its safety and security. I am not now going to argue whether these fears were justified. In these last 10 years there have been plenty of occasions for suspicion and alarms These have found expression in heavy armament programmes. To try to deal with these issues in their wider aspect, we have all agreed to work through the U N Disarmament Commission We welcome the substantial progress which has recently been made there, and the important measure of common thinking which has now emerged between the various proposals of the Western Powers and those recently set before us by the Soviet Government All these discussions will go on, but the immediate need is to make a practical start.

"The urgent problem is how to begin the process of reducing tensions and removing suspicion and fear There is also the practical question of how we can devise and operate an effective control of armaments and armed forces. To reunify Germany will not of itself increase or reduce any threat which may be thought to exist to

European security. Everything will depend on the conditions under which reunification takes place. I wish, therefore, to suggest that we should consider a number of interrelated proposals which are intended to do two things

"First, they are calculated to meet the apprehension of increased danger which some at Berlin felt might follow the acceptance of our plan. Secondly, they are intended to make a practical experiment in the operative control of armaments. This, if locally successful in Europe, might, as it were, extend outwards from the centre to the periphery If we can once establish a sense of security over the Continent of Europe .. can we not hope that this first success will be the preliminary for wider and more far-reaching understanding?

"As I have said, our purpose is to ensure that the unification of Germany and her freedom to associate with countries of her choice shall not involve any threat to anybody There are no doubt many ways of doing this. To illustrate what I have in mind, let me give some examples. . . We would be prepared to be parties to a security pact of which those round this table and a united Germany might be members By its terms each country could declare itself ready to go to the assistance of the victim of aggression, whoever it might be .. We would propose to inscribe any such agreement under the authority of the United Nations. It would also be our intention that if any member-country should break the peace, that country would forfeit any rights which it enjoys at present under existing agreements

"Secondly, we would be ready to discuss and try to reach agreement as to the total of forces and armaments on each side in Germany and the countries neighbouring Germany. To do this it would be necessary to join in a system of reciprocal control to supervise the arrangement effectively All those represented here would, we hope, be partners in this, together with a united Germany. It would be understood that any proposals in this field would not exclude or delay the work of the U.N Disarmament Commission, to which we attach great importance"

After asking whether there were "any further reassurances we can give each other," Sir Anthony proposed that the conference, in addition to examining the above-mentioned suggestions, should also examine "the possibility of a demilitarized area between East and West."

Marshal Bulganin said that the conference was being held "at a time when a certain relaxation of tension in international relations is in evidence, and when more favourable conditions have appeared for the settlement of outstanding international issues" The ending of hostilities in Korea and Indo-China represented "a considerable success for the forces of peace," whilst other "significant" developments were the conclusion of the Austrian State Treaty, the normalization of Soviet-Yugoslav relations, the success of the Afro-Asian Conference at Bandung, and the Soviet proposals to normalize relations with the German Federal Republic "There are, however, urgent issues still dividing us," he added. "These issues have not yet been settled, and that is why the international situation—in spite of a certain improvement—still remains tense on the whole. It is a fact that the so-called 'cold war' is still on . . ."

After saying that the Soviet delegation were "glad to hear President Eisenhower's statement," Marshal Bulganin continued "In the opinion of the Soviet Government, the purpose of this conference is not to indulge in recriminations but to find ways and means to ease international tension and create an atmosphere of confidence in relations between nations. We are not minimizing the difficulties that stand in the way of settling the outstanding problems of Europe and Asia There are difficulties, and they are far from being small ones. But provided we have all come to the conference with the desire to find ways of overcoming difficulties, this will be a real guarantee for the success of the conference . . . The Soviet Government, for its part, is prepared to contribute, together with the Governments of the United States, Britain, and France, to the achievement of that noble aim The foreign policy of the Soviet Union is clear: We have upheld, and continue to uphold, peace among the nations and peaceful co-existence among all States irrespective of their internal systems, irrespective of whether they are monarchist or republican, capitalist or socialist. The social and economic system of any State is the domestic affair of its people."

Marshal Bulganin then announced that the Soviet Union had decided to contribute fissionable materials to the international atomic energy "pool" proposed by President Eisenhower, and that this contribution would be made as soon as the proposed International Atomic Energy Agency was established. "The Soviet Union," he declared, "now as in the past, favours broad international co-operation in the peaceful uses of atomic energy, the importance of which was stressed by President Eisenhower in his well-known statement."

Turning to the question of armaments and armed forces, Marshal Bulganin said that it would be "a fact of great importance" if the conference agreed, by common consent, to establish the following maximum levels of armed forces: (1) the United States, the Soviet Union, and China—each 1,000,000 to 1,500,000 men; (2) Great Britain and France—each 650,000 men, (3) all other countries—a maximum of 150,000 to 200,000 men. He added: "I would like to stress once again that the Soviet Government has accepted the proposal made by the three [Western] Powers in regard to conventional armaments. Now we are entitled to expect that these Powers should take a step which would ensure agreement on the prohibition of atomic weapons. That would put the whole problem of disarmament on firm ground."

Continuing, Marshal Bulganin said that M. Faure's proposals for the reduction of military budgets by the four Powers, and the setting-up of a fund to help under-developed areas, were "of interest and worthy of careful examination." He added: "Moreover, in the opinion of the Soviet Government, the four Powers would make a good beginning if they agreed to demobilize the military contingents which they are withdrawing from Austria in connexion with the conclusion of the Austrian State Treaty, and correspondingly to reduce the strength of their armed forces. The Soviet Government has decided to carry out such a measure, and invites the United States, France, and Britain to follow suit"

As regards the question of European security, Marshal Bulganin said: "The Soviet Government is convinced that the best way to ensure peace and prevent new aggression in Europe is to establish a system of collective security with the participation of all the European nations and of the United States .. Military groupings of some European nations directed against others should be replaced by a system of security based on the joint efforts of all the nations of Europe .. The difficulties in the way of creating such a system have to be reckoned with—in particular, the fact that the Powers engaged in the present talks are bound by military commitments in regard to other nations . . ."

Marshal Bulganin then proposed that the process of establishing a collective security system in Europe should be carried out in two stages, as follows:

(1) In the first stage, the signatories would retain their commitments under existing treaties and agreements, but would undertake to refrain from the use of armed force, and to settle any disputes that might arise between them by peaceful means.

(2) In the second stage, the North Atlantic Treaty, the Paris Agreements, and the Warsaw Treaty would be simultaneously terminated, and would be replaced by an all-European system of collective security

Marshal Bulganin continued: "Sir Anthony Eden spoke of the need for an understanding between countries on the question of European security This is very important, it is precisely what the Soviet Union is striving for The Soviet Government is of the opinion that our eventual objective should be to have no foreign troops remaining on the territories of European States The withdrawal of foreign troops from the territories of European States, and the re-establishment in this respect of the situation which existed before the Second World War, would in itself constitute a factor of great importance in consolidating peace . "

Turning to the German problem, Marshal Bulganin spoke as follows: "The Soviet Government proceeds from the premise that the easing of tension and the creation of an effective system of security in Europe would greatly facilitate the settlement of the German problem, and would bring about the necessary pre-requisites for the unification of Germany on a peaceful and democratic basis The Soviet Government, now as in the past, favours the unification of Germany in conformity with the national interests of the German people and the security of Europe The remilitarization of Western Germany, and her integration into military groupings of the Western Powers, represent the main obstacles to the unification of Germany. It would be a good thing to exchange views here on the solution of the German problem, even though in present circumstances we may fail to reach immediate agreement on the reunification of Germany. In that case the problem should be solved step by step."

Marshal Bulganin felt that it was not appropriate for the conference to discuss either international Communism or the Eastern European countries, as had been suggested by President Eisenhower As regards the former, he said that the conference had been convened to discuss problems of inter-State relations and not the activities of political parties in various countries. With regard to the latter, a discussion on the countries of Eastern Europe would constitute interference in their internal affairs

In conclusion, the Soviet Prime Minister welcomed the proposal for strengthening trade and cultural relations between the U.S.S.R. and the West He declared that there were "considerable possibilities" in this field, and that the Soviet Union stood for the "broad development of international contacts and co-operation in culture and science, and for the removal of obstacles impeding intercourse among nations."

July 19.

The Foreign Ministers met in the morning under the chairmanship of M. Pinay and reached speedy agreement on the following agenda (proposed by Mr. Macmillan) to be presented to the Heads of Government: (1) the reunification of Germany; (2) European security; (3) disarmament; (4) contacts between East and West (trade, tourism, cultural relations, etc.).

When the Heads of Government met in the afternoon, however, differing views as to the timing of German reunification were expressed by the Western leaders on the one hand and by Marshal Bulganin on the other. Whereas Sir Anthony Eden (the principal Western spokesman on this date) declared that the question of German unification was of the greatest urgency, Marshal Bulganin insisted that the reunification of Germany should be subject to delay while a European collective security pact was negotiated. After a 2½-hours' discussion under the chairmanship of M. Faure, the Heads of Government agreed to refer the question to their Foreign Ministers for further consideration.

Sir Anthony Eden (who spoke first at M. Faure's invitation) said that although there appeared to be agreement on the need for German unification, there was a clear division on methods of timing. Marshal Bulganin had said that the creation of an effective system of collective security in Europe was a prerequisite for the unification of Germany. An all-embracing security system, however, would take a considerable

time to work out, and for this reason he (Sir Anthony) had proposed a simpler four-Power pact with a united Germany. Whilst he would be happy to consider other suggestions, he would be deeply concerned if it were agreed to postpone German unity for a long period while elaborate systems to cover the whole of Europe were being worked out.

Marshal Bulganin said that it was in the interests of a united Germany not to enter into any alliances or military obligations. He recalled in this connexion that when the Warsaw Treaty was negotiated, the East German Government had assumed that a united Germany would be free from obligations undertaken by either part of Germany before unification. In his view, conditions were not yet ripe for the unification of Germany, and the settlement of this problem would take a long time On the question of safeguards and guarantees as suggested by Sir Anthony Eden on the previous day, these were comprehensible in the case of weak Powers unable to defend themselves, but not in that of the Soviet Union, which could not depend on guarantees by others The two Germanies should gradually draw together in the interests of eliminating tension, and such a development was now taking place—e g , in commercial negotiations and the exchange of delegations. All-German elections were, he agreed, important, but should be considered at the proper time

President Eisenhower said that he wished to speak from the military point of view, and requested Marshal Zhukov (the Soviet Defence Minister) to listen carefully to what he had to say. After pointing out that he had known Marshal Zhukov for a long time, and that he would speak as soldier to soldier, President Eisenhower emphasized that he (the President) had never said a single word which he did not believe to be true ; that he had accepted the position of Supreme Commander, Allied Powers in Europe, because he believed that SHAPE was a true agency for peace ; that he had " had enough of war " , and that he would not have accepted the SHAPE appointment if there had been any question of preparation for war

If Germany became a military vacuum (the President continued) it would become a fertile breeding-ground for Hitlerite propaganda In the past Germany had been a danger not only to the Soviet Union but to other countries, many of which had had experience of German aggression. The problem was how to draw Germany into a position in which she would not be discontented, unhappy, and a prey to propaganda, and in which she would be strong, though never strong enough to attack other countries.

President Eisenhower then emphasized that the U.S.A. would never take part in any aggressive war, and that no nation need fear a sudden attack by the United States, where a declaration of war was subject to Congressional assent, nor from NATO, which was entirely defensive. Under the present arrangements [i e the Paris Agreements], the German forces would be so intertwined with the NATO system that it would be impossible for them to make war If it were argued that German reunification must be delayed because of the fear of a united Germany in NATO, then the United States would say that such fears were groundless.

Marshal Bulganin intervened to say that he had heard President Eisenhower's statement with the greatest satisfaction. " I believe this statement," he declared, " because I know President Eisenhower to be an outstanding military leader and statesman."

M. Faure said that a clear difference of opinion had arisen on the urgency of the German question, and that he shared the British view.

Marshal Bulganin declared that while he welcomed President Eisenhower's statement on NATO, the Soviet Union had not been allowed to join the North Atlantic Treaty, and this, in his [the Soviet Premier's] view, revealed its true purpose On the German question, he said that his earlier statement represented the well-considered views of the Soviet Government, and that he would say no more on the subject.

It was then agreed that the matter could not profitably be discussed further, and that it should be studied by the Foreign Ministers.

July 20.

Meeting under the chairmanship of Sir Anthony Eden, the Heads of Government agreed that the Foreign Ministers should draft directives for further study on the questions of European security and the reunification of Germany. It was also agreed that the Foreign Ministers should study the following four points put forward by Sir Anthony Eden : (1) the unification of Germany, having regard to the security of all concerned ; (2) a security pact for Europe or part of Europe ; (3) the limitation and inspection of forces and armaments in Germany and countries bordering Germany ; (4) the possibility of creating a demilitarized area. These four points incorporated both the Western and Soviet proposals previously put forward.

Marshal Bulganin reiterated the Soviet proposals for a security pact in which both the German Federal Republic and the German Democratic Republic would participate, and circulated a paper giving the basic principles of a European collective security treaty. These were broadly similar to the draft treaty presented by M Molotov at the Berlin Conference in 1954 (see page 13437), but contained the following modifications : (*a*) the preamble stated that the proposed collective security treaty was aimed at facilitating the early settlement of the German question ; (*b*) the United States was included in the treaty ; (*c*) the proposals contained references to economic and cultural contacts between the East and the West ; (*d*) they included the " two-stage " concept put forward by Marshal Bulganin on July 18.

M. Faure stressed that the unification of Germany implied security and *vice versa*, and that tension and insecurity would persist in the heart of Europe until Germany was united. The two-stage plan proposed by the Soviet Prime Minister might involve the perpetuation of a divided Germany, since the two German Governments might want to stay in existing organizations and might not be in a hurry to join new ones He [M. Faure] preferred a system of collective security containing reciprocal agreements providing for a limitation of arms.

Sir Anthony Eden said that the problem had two aspects · (1) treaty provisions, including the question of who would be members of any pact, and (2) the question of timing. On the first, the British idea had been a five-Power pact which, like the Russian draft, would provide for mutual assistance if one of the signatories was attacked. If the five Powers agreed on such a pact, there would be little or no risk to European security A pact embracing all the European countries, however, was hardly feasible in view of the wide diversity of interests among the European nations , moreover, the organization of such a pact would be a long and laborious task Nevertheless, it might be possible to find a middle course between a five-Power pact and a 26-Power pact, and he was ready to consider any suggestions. In view of the wide divergence of opinion which had manifested itself, he suggested that simultaneous consideration might be given to the question of a security pact and to the reunification of Germany, provided the pact was not so widely drawn as to delay unreasonably the realization of German unity. Sir Anthony then proposed that the Foreign Ministers should study the above-mentioned four points, which was agreed to.

President Eisenhower said that he had talked with every member of the Soviet delegation and was profoundly convinced that they all sincerely desired peace, as he himself did. The problem was how to build a bridge, and this could hardly be solved in the short time in which the conference would last. Marshal Bulganin, in his statement in Moscow on July 15 (see page 14313), had spoken of the need for conciliation and had said that the conference would only be a beginning. Perhaps the Foreign Ministers could now get to work on " building the bridge."

July 21.

When the Heads of Government met under the chairmanship of Marshal Bulganin, President Eisenhower put forward two far-reaching proposals: (1) that the United States and the Soviet Union should exchange blueprints on their military establishments ; and (2) that the two Governments should provide unrestricted facilities for photographic aerial reconnaissance in each other's territories. Marshal Bulganin presented a draft treaty for a non-aggression pact between the NATO Powers and the Warsaw Treaty Powers, and also tabled a draft resolution on disarmament.

President Eisenhower spoke as follows : " . . . After our victory as allies in the Second World War, my country rapidly disarmed. Within a few years our armament was at a very low level Then events occurred beyond our borders which caused us to realize that we had disarmed too much. For our own security and to safeguard peace we needed greater strength. Therefore we proceeded to rearm, and to associate with others in a partnership for peace and mutual security. The American people are determined to maintain and if necessary increase this armed strength for as long a period as is necessary to safeguard peace and to maintain our security.

" But we know that a mutually dependable system for less armament on the part of all nations would be a better way to safeguard peace and maintain security It would ease the fears of war in the anxious hearts of people everywhere. It would lighten the burdens upon the backs of the people. It would make it possible for every nation, great and small, developed and less developed, to advance the standards of living of its people, to attain better food, clothing, and shelter, more education, and larger enjoyment of life. Therefore the U S. Government is prepared to enter into a sound and reliable agreement making possible the reduction of armaments. I have directed that an intensive and thorough study of this subject be made within our own Government.

" No sound and reliable agreement can be made unless it is completely covered by an inspection and reporting system adequate to support every portion of the agreement. The lessons of history teach us that disarmament agreements without adequate reciprocal inspection increase the dangers of war and do not brighten the prospects of peace. Thus, it is my view that the priority attention of our combined study of disarmament should be upon the subject of inspection and reporting

" Questions suggest themselves How effective an inspection system can be designed which would be mutually and reciprocally acceptable within our countries and the other nations of the world ? How would such a system operate ? What could it accomplish ? Is certainty against surprise aggression attainable by inspection ? Could violations be discovered by inspection ? Could violations be discovered promptly and effectively counter-acted ?

" We have not as yet been able to discover any scientific or other inspection method which would make certain of the elimination of nuclear weapons So far as we are aware, no other nation has made such a discovery. We have not as yet been able to discover any accounting or other inspection method of being certain of the true budgetary facts of total expenditure for armaments . . .

" I have been searching my heart and mind for something that I could say here that could convince everyone of the great sincerity of the United States in approaching this problem of disarmament. I

address myself for the moment principally to the delegates of the Soviet Union, because our two great countries admittedly possess new and terrible weapons in quantities which give rise in other parts of the world, or reciprocally, to the fears and dangers of surprise attack.

"I propose, therefore, that we take a practical step, that we begin an arrangement, very quickly, as between ourselves—immediately. These steps would include.

(1) To give to each other a complete blueprint of our military establishments, from beginning to end, from one end of our countries to the other.

(2) Next, to provide within our countries facilities for aerial photography to the other country. We to provide you with the facilities within our country, ample facilities for aerial reconnaissance, where you can make all the pictures you choose and take them to your own country to study. You to provide exactly the same facilities for us, and we to make these examinations. And by this step to convince the world that we are providing as between ourselves against the possibility of a surprise attack, thus lessening danger and relaxing tension.

"Likewise we will make more easily attainable a comprehensive and effective system of inspection and disarmament, because what I propose, I assure you, would be but a beginning. From my statement I believe you will anticipate my suggestion. It is that we instruct our representatives in the U.N. Sub-committee on Disarmament to give priority effort to the study of inspection and reporting. Such a study could well include a step-by-step testing of inspection and reporting methods.

"The United States is ready to proceed in the study and testing of a reliable system of inspection and reporting, and, when that system is proved, then to reduce armaments with all others to the extent that the system will provide assured results. The successful working-out of such a system would do much to develop the mutual confidence which will open wide the avenues of progress for all our peoples.

"The quest for peace is the statesman's most exacting duty. Security of the nation entrusted to his care is his greatest responsibility. Practical progress to lasting peace is his fondest hope. Yet in pursuit of his hope he must not betray the trust placed in him as guardian of the people's security. A sound peace—with security, justice, well-being, and freedom for the people of the world—can be achieved, but only by patiently and thoughtfully following a hard, sure, and tested road."

Sir Anthony Eden pointed out that Britain, like the U.S.A., had drastically reduced her armaments and armed forces at the end of the war. Events, however, had forced her to rearm, and she had made the atomic bomb and was now making the hydrogen bomb. There was nothing that Britain would like better than to engage in a comprehensive disarmament scheme, in which neither she nor other countries would be forced to spend so much on unproductive necessities as they did today. Putting forward a "more modest" plan than that proposed by President Eisenhower, he asked whether it could not be decided here and now that over a specified area—extending perhaps for a fixed depth on either side of the line which now divided Eastern and Western Europe—there should be supervision by inspection teams appointed by the military commanders on either side. This proposal would be a practical experiment in the control of armaments—an experiment which, if successful in Europe, might be "extended outwards from the centre to the periphery."

Marshal Bulganin presented the text of a draft security treaty between the four Powers which contained the following provisions.

"(1) The level of the armed forces of the United States, the U.S.S.R., and China shall be established at 1,000,000 to 1,500,000 men for each; that of Great Britain and France at 650,000 men for each; the level provided for China, as well as other questions bearing upon the armed forces of China, shall be the subject of consideration in which the People's Republic of China shall participate; the level of the armed forces of all other States shall not exceed 150,000 to 200,000 men, and shall be agreed upon at an international conference.

(2) After the reduction of armed forces and conventional armaments has been carried out to the extent of 75 per cent of the agreed reductions, a complete prohibition of atomic and hydrogen weapons shall come into effect. The elimination of such weapons from the armaments of States, and the destruction of those weapons, shall be completed in the course of reduction of armaments to the final 25 per cent of the agreed reduction. All atomic materials shall thereafter be used exclusively for peaceful purposes.

(3) Simultaneously with the initiation of measures to effect the reduction of armaments and armed forces, and before the entry into force of the agreement on the complete prohibition of atomic and hydrogen weapons, the four Powers shall solemnly pledge themselves not to use nuclear weapons, which they shall regard as prohibited to them. Exceptions to this rule may be permitted for purposes of defence against aggression, when a decision to that effect is taken by the Security Council.

(4) As one of the first measures for the execution of the programme for reducing armaments and prohibiting atomic weapons, States possessing atomic and hydrogen weapons shall pledge themselves to discontinue tests of these weapons.

(5) There shall be established an effective international control over the implementation of measures for the reduction of armaments and the prohibition of atomic weapons.

(6) The Heads of Government of the four Powers shall instruct the Foreign Ministers to make efforts to reach necessary agreement on the unsettled aspects of the above-mentioned convention, which is to be considered in the United Nations.

At the same time the Heads of Government of the Soviet Union, the United States, Great Britain, and France, determined not to permit the use of atomic and hydrogen weapons and to liberate the nations from the threat of a destructive atomic war, solemnly declare that: Pending the conclusion of the international convention on the reduction of armaments and the prohibition of atomic weapons, the Soviet Union, the United States, Great Britain, and France undertake not to be the first in the use of atomic weapons against any nation, and call upon all other States to join this declaration."

The Soviet Prime Minister also tabled the text of a proposed non-aggression pact between the four Powers, based on the following principles:

"(1) The States parties to the North Atlantic Treaty and to the Paris Agreements, on the one hand, and the States parties to the Warsaw Treaty, on the other, undertake not to use armed force against one another. This undertaking shall not prejudice the right of States to individual or collective self-defence, as provided for in Article 51 of the U.N. Charter in case of an armed attack.

(2) The parties to the treaty undertake to enter into mutual consultations in case any differences or disputes arise between them which might represent a threat to the maintenance of peace in Europe.

(3) The treaty shall be of a temporary character and shall remain in force until replaced by another treaty relating to the establishment of a system of collective security in Europe."

July 22.

When the Heads of Government met on this date under the chairmanship of President Eisenhower, M. Faure presented a French memorandum on disarmament and on the proposed creation of an International Fund for Equipment and Mutual Aid (IFEMA) to assist under-developed countries. Sir Anthony Eden, supported by President Eisenhower and M. Faure, called for the removal of barriers between the peoples of East and West and urged a much greater flow of cultural exchanges, tourism, etc., between the Western countries and the Soviet Union. The British Prime Minister also formally presented a memorandum on limited disarmament.

M. Faure spoke as follows in presenting the French Government's memorandum:

"The first condition of a lasting peace is progress towards disarmament. The second condition is assistance to the peoples of under-developed territories in improving their living conditions. The French Government believes that these two forms of activity should be carried out side by side, and that the possibility of establishing an organic link between them should be investigated. Such a link would make it possible, at least in part, to solve the problem of control in regard to disarmament.

"The French Government proposes that the four Powers should agree to a reduction in their military expenditures, and that the financial resources thus made available should be allocated, either in whole or part, to international expenditure on equipment and mutual aid... These proposals... will make possible the transfer of military expenditure to productive expenditure at international level... and the following proposals are put forward to that end:

"(1) In order to establish the basis of the contribution to be made, each of the Governments concerned would declare annually the amount it intended to appropriate for military expenditure during a period of 12 months—in effect, the amount laid down in the Budget. The first statement would concern the 12-monthly period covered by the Budget for the current year. The declarations made by the States would be sent to an international Secretariat whose chief task would be to ensure that a common definition of military expenditure was interpreted in the same sense by all the States.

In order to make this possible, the Secretariat would receive copies of the civil and military Budgets presented by each Government to the parliamentary organs which, according to the Constitution of the State concerned, had to vote or approve the Budget. The Secretariat would also... draw up a list of the categories of military expenditure, subject to any agreements reached, and according to the programme for the progressive application and control of disarmament.

The percentage reduction of military expenditure in any annual Budget in relation to a preceding Budget could be laid down for future years by agreement between the Governments concerned. This would make it possible to calculate the amounts to be allocated to the International Fund for Equipment and Mutual Aid.

The amounts to be levied during the years concerned should be progressive, in order to lay stress on the need for disarmament. These amounts could be related either to the figure of actual military expenditure or, if the Powers fix a common 'normal' level of military expenditure in relation either to their national expenditure or to some other criterion, they could apply to the excess of such expenditure over the normal figure thus defined. This second formula would have the advantage of linking the size of the allocation more closely to the unduly high level of military expenditure maintained by some States.

(2) The use of the resources of the I.F.E.M.A. would be supervised by the international Secretariat, whose task it would be to ensure their use according to four criteria:

(i) In order that the peoples of the States concerned may be associated with the results of disarmament, the amount of contribution due from each State should be reduced, on the basis of the formula laid down, by part of the reduction in expenditure effected in the military Budget between one financial year and the next. Each country would thus be able to make internal transfers according to whatever method it liked.

(ii) Each State contributing to the Fund should be in a position to use a portion of its contribution, to be defined, for the benefit of States or territories with which it is constitutionally linked. All that would be necessary would be to prove to the international Secretariat the need for such expenditure.

(iii) A part of the remainder of the available funds would have to be used to place orders of all kinds in the countries providing the funds. This provision would prevent the reduction of armament expenditure from reacting unfavourably on the level of economic activity of each country by guaranteeing the existence of a certain number of orders to take the place of orders for military supplies.

(iv) The balance would be used at international level, without any special restrictions, on equipment for under-developed territories. This allocation would be made in close co-operation with the international organizations within the framework of the United Nations, or even by those organizations themselves It is worth stressing the point that any States increasing their military expenditure would exclude themselves from the benefits to be obtained from the I.F.E.M A.

(3) The United States, the U.S S R., the United Kingdom, and France would, of course, be associated with the procedure to be laid down. As, however, these four nations are all represented on the Sub-committee of the U.N Disarmament Commission, of which Canada is also a member, it might be best to entrust to that sub-committee the task of determining the method of applying this plan "

M. Faure also submitted the following proposals "merely as suggestions "

(a) The administration of the I.F.E.M A could be carried out by a managerial organ associated with the international Secretariat Both these bodies could come under a common political authority, on which the appropriate Ministers of the four Powers might sit

(b) The use of the resources of the Fund might be supervised by the managerial organ, which would not necessarily be composed only of representatives of the four Powers and of the nations prepared to adhere to the principles set out in the memorandum, but also of representatives of countries benefiting from the resources of the international fund for mutual aid.

(c) So far as the application of the plan was concerned, recourse to existing organizations—e g. the International Bank and certain organs of the United Nations—might be considered to avoid the creation of an international administrative organ, which would duplicate the work of those already functioning to the general satisfaction.

(d) The political authority alone would be competent to fix the amount of the contribution from each State. There might be alternative methods of procedure according to whether the State concerned accepted financial supervision or not. If it refused, the contribution would be arrived at by applying the progressive rate of the levy to the figure of military expenditure declared for the first year If it accepted, the contribution would be fixed on the figure of military expenditure for the current financial year as verified by the international Secretariat. The only choice open to the political authority (voting according to a procedure to be defined) would be between the figure determined by the international Secretariat and, in case of rejection, the contribution of a lump sum.

Sir Anthony Eden spoke as follows on the need to develop contacts between the East and West :

" . . . It is evident from what has been said at this conference that we all desire to see a lessening of international tension. This means . . . that we all want to increase mutual confidence between nations. This mutual confidence must be founded on knowledge and understanding of each other's way of life and point of view. What is here in question is not merely understanding between Governments, but between people in all walks of life. This cannot be secured so long as artificial barriers are maintained between East and West.

" It should be our object to break down those barriers, so that there may be a much freer flow of communication of all kinds. Without that, it will be impossible to build that knowledge and understanding of the other man's point of view which is essential to the strengthening of mutual confidence between East and West.

" In recent years a useful start has been made in establishing technical and cultural contacts. We believe that these could be developed with advantage. We should be glad if closer relationships could be established between professional, scientific, and artistic groups of all kinds. We should welcome exchanges of visits by students as well as teachers. We think that more could be done to encourage the exchange of books, learned journals, and documentary films. All these are things which can best be arranged between individual countries of East and West. We have recently established a special committee to further these aims (see 14198 B).

" In addition, technical exchanges can also be conducted under the auspices of international bodies like the Economic Commission for Europe. The development of these arrangements would provide increased opportunities for contact between individuals with a common interest in a particular subject. This is of special value as a basis from which wider contacts may develop. But, in addition, we should like to promote a more normal tourist traffic between East and West We are very willing that ordinary Soviet citizens should travel freely through the countries of the West. We should like to see facilities given to enable ordinary Western tourists to visit the Soviet Union individually, not merely in organized and sponsored tours. The Soviet Government could do much to encourage this by adopting a less restrictive policy in granting visas.

" If a real understanding is to develop between the peoples of East and West, further efforts will have to be made to facilitate the free circulation, not only of individuals, but also of ideas and opinions. It would assist if greater freedom were given for journalists to travel in the Soviet Union and to send their views and impressions back to the newspapers which they represent Soviet journalists are already free to do this in the Western countries. Greater facilities will also be needed for the free circulation of newspapers and books. Press and radio censorship will need to be relaxed

" Increased trading relations would also bring benefits, not only in increasing the volume of trade, but through the relations between individuals and companies which would result. We, for our part, should welcome an expansion of the existing channels of trade between East and West.

" I do not suppose that all the existing restrictions on free communication between East and West can be swept away at one stroke. Nor do I suggest that these are matters on which detailed decisions could be taken by this conference . . . But I would ask that we should agree that this is a desirable objective. After this conference, I would further ask that we should all work patiently towards the breaking-down of the barriers which now restrict this intercommunication. I am sure that we could thereby do much to build that mutual confidence between the peoples of East and West which will help so much to relax international tension "

The memorandum on limited disarmament submitted by Sir Anthony was as follows ·

" The United Kingdom proposes that, as a means of increasing mutual confidence in Europe, consideration should be given to the establishment of a system of joint inspection of the forces now confronting each other in Europe. In specified areas of agreed extent on either side of the line dividing Eastern and Western Europe, joint inspecting teams would operate by mutual consent This project would provide opportunity for the practical test on a limited scale of international inspection of forces in being, and would provide valuable experience and lessons for use over a wider field in the future.

The willingness of the four Governments to accept such inspection would moreover demonstrate their determination to reduce international tension in Europe. The system of inspection here proposed is without prejudice to the work of the U N. Disarmament Sub-committee. It is also distinct from the proposals put forward by the United Kingdom for the limitation, control, and inspection of forces and armaments in connexion with European security "

Both **President Eisenhower** and **M. Faure** spoke in support of Sir Anthony Eden's appeal for the breaking-down of barriers between the peoples of the West and of the Soviet Union.

July 23.

After a five-hour meeting in restricted session on the last day of the conference, the Heads of Government agreed on a directive instructing the Foreign Ministers to meet in Geneva in October. The text of this directive (which was issued in place of a communiqué) was as follows :

" The Heads of Government of France, the United Kingdom, the U S S R , and the United States, guided by the desire to contribute to the relaxation of international tension and to the consolidation of confidence between States, instruct their Foreign Ministers to continue the consideration of the following questions with regard to which an exchange of views has taken place at the Geneva Conference, and to propose effective means for their solution, taking account of the close link between the reunification of Germany and the problem of European security and the fact that the successful settlement of each of these problems would serve the interests of consolidating peace.

European Security and Germany. For the purpose of establishing European security with due regard to the legitimate interests of all nations and their inherent right to individual and collective self-defence, the Ministers are instructed to consider various proposals to this end, including the following .

A security pact for Europe or for a part of Europe, including provision for the assumption by member-nations of an obligation not to resort to force and to deny assistance to an aggressor ;

Limitation, control, and inspection in regard to armed forces and armaments ;

Establishment between East and West of a zone in which the disposition of armed forces will be subject to mutual agreement ;

And also to consider other possible proposals pertaining to the solution of this problem.

The Heads of Government, recognizing their common responsibility for the settlement of the German question and the reunification of Germany, have agreed that the settlement of the German question and the reunification of Germany by means of free elections shall be carried out in conformity with the national interests of the German people and the interests of European security. The Foreign Ministers will make whatever arrangements they may consider desirable for the participation of, or for consultation with, other interested parties.

Disarmament. The four Heads of Government, desirous of removing the threat of war and lessening the burden of armaments ; convinced of the necessity, for a secure peace and for the welfare of mankind, of achieving a system for the control and reduction of all armaments and armed forces under effective safeguards ; and recognizing that achievements in this field would release vast material resources to be devoted to the peaceful economic development of nations, for raising their well-being, as well as for assistance to under-developed countries, agree :

To work together to develop an acceptable system for disarmament through the Sub-committee of the U.N. Disarmament Commission ;

To instruct their representatives in the Sub-committee, in the discharge of their mandate from the United Nations, to take account in their work of the views and proposals advanced by the Heads of Government at this conference ;

To propose that the next meeting of the sub-committee be held on August 29, 1955, in New York;

To instruct the Foreign Ministers to take note of the proceedings in the Disarmament Commission, to take account of the views and proposals advanced by the Heads of Government at this conference; and to consider whether the four Governments can take any further useful initiative in the field of disarmament.

Development of Contacts between East and West. The Foreign Ministers should, by means of experts, study measures, including those possible in organs and agencies of the United Nations, which could (*a*) bring about a progressive elimination of barriers which interfere with free communications and peaceful trade between peoples, and (*b*) bring about such free contacts and exchanges as are to the mutual advantage of the countries and peoples concerned.

The Foreign Ministers of the four Powers will meet at Geneva during October to initiate their consideration of these questions and to determine the organization of their work."

The conference ended with a plenary session at which the four Heads of Government made statements reviewing the work of the conference. The texts are given below:

Statement by Sir Anthony Eden.

"We have now concluded the conference of the Heads of Government which has been so much discussed and so earnestly advocated, notably by Sir Winston Churchill more than two years ago The conference set itself a limited task. This it has more than accomplished Ten years ago the war in Europe was brought to an end Now at last we have made a start to the work which we might have hoped could have begun in 1945

"What we have now agreed makes it possible to get to grips with the twin problems of the unity of Germany and the security of Europe. No-one expects that it will be easy to settle every detail of these complicated issues But there is now a better chance than we have known at any time since the war to get to work on practical proposals to solve the differences which have divided Europe all these years.

"We did not set out to make a detailed plan in these few days. For all that, it will be found that in our directives to the Foreign Secretaries we have included the essentials of a comprehensive settlement. The world will have observed the tone and temper in which our work has been conducted. Those of us who have been engaged in the actual negotiations have been aware that a new spirit of conciliation has been present at our meeting.

"But in addition to this formal work we have had many opportunities for personal contacts, which I know we have all found invaluable The exchanges which have taken place outside the conference room have given us all a far better understanding of each other's points of view and of the problems each has to face. If we can continue our work together in the spirit of this meeting, what is hopeful promise today should become solid performance as events unfold."

Statement by M. Faure.

"Our meeting is drawing to a close. But for all that, we must not separate. I mean by this that if the four of us are no longer present in one room, we must remain morally united with one and the same will. I consider that over and above the agreements which we have reached on certain subjects, texts, and directives, the very fact of our meeting, the spirit which has governed our debates, and the mutual understanding which resulted from it, will leave a profound mark on international relations and will have a happy influence on their evolution

"We have shown a common resolve. It is now our responsibility to find the means. The first step has been taken along this path, but there are still obstacles to overcome. We have not sought to hide them, for it is through truth that all progress is achieved . . . To the peoples who look to us, and not only to those for whom we have responsibility, we must be able to propose the progressive substitution of constructive and beneficial tasks of peace for the security measures which are still necessary."

Statement by Marshal Bulganin.

"The meeting of the Heads of Government has been of positive significance for the easing of tension in the relations between Governments and for an increase in confidence between them. This was facilitated by the personal contacts in Geneva between the leaders of the four Powers. We have got to know each other better here and have exchanged opinions on important international problems. In spite of the fact that on some questions our points of view did not coincide, on the whole the meeting proceeded in an honest atmosphere and was marked by efforts to achieve mutual understanding . . .

"The most important issue at the conference was the problem of European security. The Soviet delegation considers that, in the interests of strengthening peace, a system of collective security should be created in Europe, based on the participation of all European Governments and of the United States. Our new proposals on this question are based on the consideration that in present circumstances—when opposing groupings of nations have been created in Europe—it is necessary to put the relations between the nations included in these groupings on the path of normal peaceful co-operation, and of the peaceful solution of disputes between them.

"In the first stage of creating an all-European security system, the Soviet proposals do not envisage the liquidation of the North Atlantic bloc, the Western European Union, or the Warsaw Treaty Organization. In the second stage—with the passage of time, when successes in the lessening of tension in Europe will have been achieved and confidence between Governments established—the above-mentioned groupings may be dissolved and replaced by a collective security system in Europe

"Together with this, the Soviet delegation proposed that, before the creation of a European collective security system, the Governments participating in these groupings in Europe should conclude a pact to reject force and to use only peaceful means to settle their disputes

"The exchange of opinions on this problem of European security showed that all the participants at the conference wished to find an agreed solution for this important problem We hope that in the course of future consideration of this problem, even greater success will be achieved.

"On the question of disarmament, the Soviet Government tabled even before the Geneva Conference—on May 10—concrete proposals for the reduction of armaments, the outlawing of atomic weapons, and the removal of the threat of war . . The discussion on disarmament showed that all the participants in the conference wished to find an agreed solution of this very important problem . . In the further consideration of this problem, the Soviet Government will make the utmost efforts to find a solution which corresponds to the desire of the nations.

"There was an exchange of opinions on the German problem. Various approaches to this problem were expressed The U S, British, and French delegations based their arguments on the assumption that Western Germany, which is to be remilitarized under the Paris Agreements, and later a reunited Germany, must enter the North Atlantic pact and the Western European Union The Soviet Government, even before the ratification of the Paris Agreements, drew attention to the fact that the coming into force of those Agreements would create difficulties for talks on the German problem and would make pointless any discussion on the reunification of Germany

"The war in Europe ended ten years ago Since that time two Germanies have appeared—the German Democratic Republic and the German Federal Republic—each with its own economic and social structure. Under the Paris Agreements, the German Federal Republic entered the path of remilitarization and was included in the military grouping of the Western Powers. In view of the conclusion of the Paris pacts, the German Democratic Republic took the decision to participate in the Warsaw Treaty Organization. It is clear that in such conditions we cannot argue the question of the mechanical union of the two parts of Germany—the Democratic Republic and the Federal Republic—because this would be an unrealistic approach to the problem

"The Soviet Union was, and remains, a warm supporter of the reunion of Germany as a peace-loving, democratic State We are convinced that the German problem must not be discussed without the participation of the German Democratic and the German Federal Republics. In the situation which has developed in Europe, the only real approach to the reunion of Germany appears to be by a co-ordinated effort of the four Powers and the German people, directed towards a relaxation of tension in Europe and the establishment of confidence. This goal would be best achieved by the creation of a European collective security system, with the participation of both parts of Germany on a basis of equality until reunion is achieved. As this would lead to the strengthening of peace in Europe and create a barrier to the growth of German militarism, the obstacles at present in the path of German reunion could be done away with For the reunion of Germany from the point of view of her internal conditions, a *rapprochement* between her two parts is of the utmost importance.

"The Soviet delegation regrets that further attention was not given to the problems of Asia and the Far East at our conference. Such questions as the restoration of the legal rights of the Chinese People's Republic in the United Nations; the regulation of the situation in the Formosa region on the basis of recognition of the indisputable rights of the Chinese people, the execution of the Geneva agreements on Indo-China—these and other problems will not tolerate postponement. We cannot escape them; they must be solved in the interests of peace and security in Asia and the Far East, and in the interests of world peace.

"We made an important decision about the necessity for widening contacts between East and West, and for developing and strengthening the economic and cultural links between our States. We have thereby laid the basis for wider co-operation between our countries. The Soviet Government is ready to facilitate such co-operation by all means in its power . .

"The decisions made here are the beginning of a new stage in the relations between our countries. They will facilitate the strengthening of confidence between our peoples. They will also have positive significance for other countries and for the strengthening of world peace . . . The Soviet Government will make the requisite efforts to translate our decisions into action. There must be patient and loyal examination of those problems which we must still discuss and resolve But if the same spirit of co-operation is shown by all of us as has been shown at Geneva, this will be a reliable pledge that the noble goal of peace will be achieved, and that the peoples will be able to look calmly towards the future."

Statement by President Eisenhower.

President Eisenhower prefaced his formal statement by saying: "I welcome and warmly reciprocate the spirit of friendliness and good intent that have characterized the content of the preceding speeches. But I hope that my silence respecting certain of the statements by the immediately preceding speaker [Marshal Bulganin] will not by any means be interpreted as acquiescence on my part—

far from it. It has seemed to me that in the closing minutes of this conference there is no necessity for me to announce to the conference and to the world the U.S. position on the important questions we have discussed. These, I hope and believe, have already been made clear; therefore it does not seem particularly fitting once more to recite them in detail. I shall content myself with some reflections on our work of the past week and an expression of some hopes for the future."

The President then continued: "This has been an historic meeting. It has been on the whole a good week. But only history will tell the true worth and real values of our session together. The follow-through from this beginning by our respective Governments will be decisive in the measure of this conference.

"We have talked over plainly a number of most difficult and perplexing questions affecting our peoples, and indeed the peoples of the entire world. We did not come here to reach final solutions. We came to see if we might together find the path that would lead to solutions and brighten the prospects of world peace In this final hour of our assembly, it is my judgment that the prospects of a lasting peace with justice, well-being, and broader freedom, are brighter. The dangers of the overwhelming tragedy of modern war are less

"The work of our Foreign Ministers as they strive to implement our directives will be of great importance, perhaps of even more than what we have done here. Theirs is the task, reflecting the substantive policies of their Governments, to reach agreement on courses of action which we here could discuss only in broad terms. I know we all wish them well I trust we will all support the necessary adjustments which they may find our Governments must make if we are to resolve our differences in these matters.

"If our peoples, in the months and years ahead, broaden their knowledge and understanding of each other, as we, during this week, have broadened our knowledge of each other, further agreement between our Governments may be facilitated. May this occur in a spirit of justice. May it result in improved well-being, greater freedom, and less fear, suffering, or distress for mankind. May it be marked by more good will among men. These days will then indeed be ever remembered.

"I came to Geneva because I believe mankind longs for freedom from war and rumours of war I came here because of my lasting faith in the decent instincts and good sense of the people who populate this world of ours. I return home tonight with these convictions unshaken, and with the prayer that the hope of mankind will one day be realized."

As indicated in the final speeches of the four Heads of Government, many personal contacts were made between them outside the conference chamber—at dinners and receptions given to each other, and in a number of personal conversations President Eisenhower also had two personal meetings with Marshal Zhukov, his wartime colleague. Mr. Harold Stassen (President Eisenhower's adviser on disarmament questions), General Gruenther (Supreme Allied Commander in Europe), and Admiral Radford (chairman of the U.S. Joint Chiefs of Staff) arrived in Geneva during the conference and had an informal meeting with the Soviet and other delegates.

President Eisenhower, Sir Anthony Eden, and M. Faure left Geneva immediately the conference ended and flew back to Washington, London, and Paris respectively. Marshal Bulganin and the Soviet delegation broke their return journey to Moscow for a three-day visit to East Berlin (July 24-26) during which discussions were held with Herr Grotewohl and other leaders of the East German Government.

The West German Foreign Minister (Dr. von Brentano) reported to the Federal Cabinet and to the Foreign Affairs Committee of the Bundestag on July 27 on the results of the Geneva Conference, and also made a press statement on behalf of the Federal Government.

The statement included an expression of gratitude for the attitude taken by the Western Powers at the conference, coupled with the Federal Government's "painful regret" that the gap between the Western and Soviet viewpoints on German reunification was still wide. Gratification was expressed at the fact that the Western Powers had stood by their undertakings under the Paris Agreements to make the reunification of Germany the primary aim of their policy, and that they had opposed the Soviet attempt to relegate the German question to a secondary problem by insisting on its close connexion with that of security. The statement added that a fresh period of negotiation had now opened which would require great patience and tenacity to achieve a settlement of the problems which the Foreign Ministers had been called upon to consider.

Dr. von Brentano said that Dr. Adenauer did not regard his coming visit to Moscow merely as an opportunity for an exchange of views on international problems, but primarily as a means for discussing the reunification of Germany. It was hoped that the Federal Chancellor's visit would be a contribution towards lessening the gap between the Eastern and Western viewpoints.

Full coverage to the American, British, and French proposals at the Geneva Conference was given in *Izvestia*, *Pravda*, and other leading Soviet newspapers.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Soviet Weekly - Frankfurter Allgemeine Zeitung - Neue Zürcher Zeitung) **(14313 A.)**

A. WESTERN GERMANY. — Constitutionality of Franco-German Saar Agreement upheld by Federal Constitutional Court.

The Federal Constitutional Court rejected on May 4 a petition against the constitutionality of the Franco-German Saar agreement which had been submitted by the Social Democratic members of the Bundestag and some other deputies on March 18.

The petition had been signed by 151 Social Democrats, seven Free Democrats, four members of the All-German Bloc (Refugee Party), one Independent, and eleven Social Democratic deputies from West Berlin. This made a total of 174 deputies, although it was doubtful whether the signatures of the 11 West Berlin deputies could be counted, as the representatives of that city have no voting rights in the Bundestag. However, the fact that 163 voting members had signed was sufficient to fulfil the constitutional requirement of one-third of the total membership of the Bundestag for the submission of petitions to the Federal Constitutional Court.

The petitioning deputies argued (*a*) that under the Basic Law the Federal Government was not empowered to conclude any international agreement on the frontiers of Germany or to "dispose" of any territory, even though those frontiers were provisional; (*b*) that the Saar agreement denied to Germans in the Saar the right of access to the privileges of the Basic Law and therefore conflicted with Article 23 of that law, and (*c*) that the Saar agreement also deprived Germans in the Saar of the right—implied by Article 146 of the Basic Law—to take part in the election of an all-German National Assembly.

[Article 23 of the Basic Law defines the present area of its application (i.e. the existing *Länder*) and adds that it is to be put into force "in other parts of Germany after their accession" Article 146 lays down that when a Constitution comes into effect "by a free decision of the German nation," the Basic Law will become invalid.]

The Federal Constitutional Court decided that the Saar agreement was valid for the following reasons:

(1) As the Saar population would be given an opportunity of rejecting or accepting the new Statute, the Federal Republic was not directly participating in bringing about the new status of the Saar and had thus not "disposed" of the Saar territory.

(2) Article 23 of the Basic Law had not been violated, as the Article contained no constitutional guarantee that German territories outside the Federal Republic could at all times exercise their right of joining the Republic.

(3) If the Saarlanders should be unable to participate in any future all-German elections, this would not be due to the Saar agreement but to the situation which had previously been created by French measures.

(4) The Saar agreement did not violate any basic constitutional guarantees to the citizens in general

(5) The Saar agreement only meant the acceptance of a situation which had been unilaterally created by one of the occupation Powers following the political collapse of the Reich. If it failed to bring about a situation completely corresponding to the Federal Basic Law, it nevertheless constituted a clear improvement in this direction as compared with the previous state of affairs.

(6) Whether, as the plaintiffs claimed, the agreement made it more difficult for the Saar to rejoin Germany was an entirely political question which was outside the jurisdiction of the court.

The Court's decision was announced the day before the Paris Agreements came into force.—(Frankfurter Allgemeine Zeitung) **(Prev. rep. 14169 A, page 14172; 14237 A.)**

B. LEBANON. — New Cabinet.

The Lebanese Cabinet headed by M. Sami Solh was reconstituted on July 9 after differences between the Prime Minister and the Foreign Minister (Dr. Naccache) on the appointment of a new Ambassador in Paris. The membership of the new Government was as follows:

M. Sami Solh, Prime Minister and Minister for Planning, M. Hamid Franjiyeh, Foreign Minister; M. Pierre Eddé, Finance; M. Rashid Karame, National Economy; Emir Majid Arslan, Defence; M. Mohieddine Souli, Interior and Education; M Selim Lahoud, Agriculture; M Selim Haidar, Agriculture; M. Naim Moghabghab, Public Works.

Six of the Ministers held office in the former Cabinet and three were new. The most important new appointment was that of M. Franjiyeh as Foreign Minister—a portfolio which he had held in previous administrations—in succession to Dr. Alfred Naccache.—(Le Monde, Paris) **(Prev. rep. 13793 B.)**

C. UNITED KINGDOM. — Civil Defence resumed by Coventry City Council.

The Labour-controlled Coventry City Council, meeting on July 9, agreed by 41 votes to nil, with six abstentions, "to resume in full its civil defence functions and to inform the Home Secretary accordingly," thereby rescinding its decision of April 6, 1954, to disband the council's Civil Defence Committee.—(Times) **(Prev. rep. 13735 A; 13524 B.)**

A. UNITED KINGDOM. — Economic and Monetary Policy. - Mr. Butler's Appeal for Reduction in Public and Private Capital Expenditure. - Reduction in Bank Credit. - Further Hire-Purchase Restrictions.

Mr. R. A. Butler, the Chancellor of the Exchequer, announced in the House of Commons on July 25 a number of new measures to meet the strain on Britain's economy, to cope with the balance of payments situation, and to re-establish the strength of sterling abroad These measures were: (1) fresh credit restrictions by the banks; (2) a restriction of Government expenditure, especially overseas; (3) an appeal to local authorities to hold back schemes for capital expenditure as far as possible; (4) the postponement or slowing-down (as far as possible) of capital expenditure projects by nationalized industries, and the strengthening of the internal resources of these industries available for capital purposes; (5) tighter hire-purchase restrictions by an increase from 15 per cent to 33⅓ per cent in the initial deposit on a large number of hire-purchase transactions.

The Chancellor's statement was as follows:

"The monetary measures taken in February (see 14067 A) have been by their nature slow in their effect on home demand. The trade results for April and May were better, but the strikes, and particularly the dock strike, have made it difficult to evaluate the more recent figures. One thing is clear. We are at present absorbing too much of our production at home. Our success in increasing production and our very prosperity require increased imports, which, in turn, must be paid for by increased exports. Sufficient extra exports, however, are not yet forthcoming. The strikes have undoubtedly set our export trade back considerably, and some of the setback will prove to be a permanent loss, thus adding to the efforts we have to make. Generally, we cannot be satisfied with the way in which our balance of payments and our reserves are moving.

Our foreign exchange position is also being currently affected by many rumours, here and abroad, about our intentions. This has led to sales of sterling, which will adversely affect our reserves in July. My general policy has been to allow rumours to be answered by events as they unfold. But these rumours have reached such unreasonable proportions that I cannot allow them to remain unanswered. I want, therefore, to make it clear that the Government regard the period in front of us as being one of hard work and consolidation to strengthen the home front before we make any further forward move on the exchange front This is relevant to the future of trade and payments arrangements in Europe, including the renewal of the European Payments Union, which we hope to conclude in Paris this week.

For the time being our primary aim must be to reduce home demand, in order to leave room for the extra exports we need. All who can must try to spend less in order to save more. Business firms should endeavour to slow down investment not of the greatest national urgency. Since our principal object is to improve our balance of payments, it would be undesirable to check investment leading to increased production for export. For the rest, even though a high level of productive investment is undoubtedly in our long-run national interest, all those embarking on investment projects should consider whether they could not postpone their initiation, irrespective of whether they finance them from their own resources or by borrowing.

I wish to deal more particularly with policy in those fields in which Government action can help to achieve our aim. They are the expenditure of the Government itself, of local authorities, and of the nationalized industries; credit restriction; and hire-purchase.

I will deal first with credit restriction. In this field, while bank deposits have fallen, advances play a particularly important part. I am sure that the banks will use their undoubted power to reduce the amount of credit below what they would be glad to give if times were easier, and that customers will reduce their applications for credit to a minimum. I am writing today to the Governor of the Bank of England asking him to represent to the banks how important it is that they should achieve a positive and significant reduction in the total of bank advances outstanding.

In the public sector, the Government, while restricting to the minimum all their expenditure, both current and capital, will pay special attention to their oversea expenditure. In this field, savings have a double effect; they not only reduce the charge on the Budget, but they directly relieve the balance of payments.

I must also seek a lightening of the pressure of local authorities' capital expenditure upon the economy. I appeal to the local authorities to hold back their schemes for capital expenditure as far as they can. The Ministers concerned will now adopt a stricter attitude towards proposals by local authorities for capital expenditure for all but the most essential purposes. The recent action of the Government in raising the rates for borrowing from the Public Works Loan Board will ensure that, in embarking on capital expenditure, local authorities will have to count the full cost resulting from the general increase in money rates.

I now refer to the nationalized industries. The House must remember that the services which they provide are basic to the whole of our economy, and that serious damage could be caused to industry as a whole by inadequacies in the supply of transport and power. Nevertheless, in response to the Government's request, certain of the capital requirements of the nationalized industries will be reduced in the immediate future in two ways. First, expenditure on capital projects will be postponed or slowed down so far as may be possible, with due regard to contractual obligations and economical administration. This will be done without jeopardizing essential objectives such as coal production and nuclear power. Furthermore, the nationalized industries will, so far as practicable, increase their internal resources available for capital purposes, as indeed the Central Electricity Authority have already publicly announced is their intention

Finally, I must deal with private spending in the form of hire-purchase. Since the Government imposed restrictions on hire-purchase on Feb. 24, the President of the Board of Trade and I have been watching the effects very closely. Let me emphasize that our object is not to depress the sales of particular goods because they are regarded as less essential or more readily exportable, but to relieve the pressure on home demand generally by asking the consumer to use more of his own income and less borrowed money when he buys the goods of his choice We have reached the conclusion that the measures taken in February must be intensified The President of the Board of Trade has therefore made an Order, to operate from tomorrow, to increase from 15 per cent to 33⅓ per cent the minimum deposit required in certain transactions, of which the most important are those involving motor-cars and motor-cycles, radio and television sets, gramophones, cameras, and certain domestic appliances such as refrigerators, washing machines, vacuum cleaners, and gas and electric fires The maximum repayment periods remain unaltered in all cases.

By such a combination of measures on the Government's part, supported by restraint in spending by individuals and business firms, I hope to achieve the improvement in our internal position which our present situation requires, and which I have always indicated was the first of the pre-conditions for moving to a freer system of trade and payments In other fields we have made satisfactory progress. We have now opportunities for expanding our trade, and we must seize them. I have said before, and I repeat, that our economy is fundamentally sound; but we must concentrate all our attention on increasing our competitive power and developing our export trade"

Mr. Gaitskell (Lab.) asked for a full day's debate to discuss the Chancellor's "depressing statement," which, he declared, would "come as no surprise, except to those who were deluded by his speeches at the time of the Budget and during the election" He also asked (*a*) whether local authority housing programmes were to be cut still further; (*b*) whether furniture was included among the goods for which the initial deposit was to be raised; (*c*) whether the Chancellor was satisfied that his monetary policy had a sufficiently sharp effect on consumption generally, (*d*) whether he was not cutting back investment too hard, and (*e*) whether he contemplated an autumn Budget.

Mr. Butler, in reply to Mr. Gaitskell's political observations, recalled that he [the Chancellor] had indicated in his final election broadcast "that it would not be roses all the way," and that "if there were difficult times we would be ready to take steps to put things right, unlike Mr. Gaitskell himself, who let things slide."

In reply to Mr. Gaitskell's other questions, the Chancellor said that existing local authority programmes would not be affected, and that it was "much more a case of slowing-down than putting-off an existing programme, and of not taking on new commitments." He added: "What we are all trying to do is too much at once The difficulties in the economy are marginal and not fundamental."

As regards (*b*), Mr. Butler stated that furniture was not included in the new hire-purchase restrictions. On monetary policy, he declared: "I am satisfied that, with the intensive drive for credit restriction, we shall get from our monetary policy what we desire." On the subject of an autumn Budget, he confirmed his earlier statements that he was not disposed to consider such a step at present.

Replying to **Mr. Jay** (Lab.), who asked whether there would be an increase in the bank rate, the Chancellor replied that had there been any further measures he would have announced them. "What both the House and the country are interested in now," he added, "is exactly the same problem as faced my predecessors: when the country tends to get a bit too fat on the home front, it is difficult to balance our overseas payments."

The Chancellor's letter to the Governor of the Bank of England asking for further credit restriction by the banks was worded as follows:

"I should be glad if you would urgently call the attention of the British Bankers' Association and other bodies concerned to the statement which I have just made in the House of Commons on the economic situation of the country. The essential need of the moment is for a reduction in the total demand on the country's resources. Only a part of that demand is financed by bank advances; but it is an important part and one which, with the co-operation of the banks, can be readily affected by the granting or withholding of credit.

In such circumstances I have no doubt that the banks will agree that it is their duty to reduce the amount of bank credit below what they would be glad to give in less difficult times. Indeed, the necessary reduction in demand is unlikely to be achieved unless the total of bank advances is reduced below its present level. It is for the banks to decide what steps they must take to make this policy effective. But I look for a positive and significant reduction in their advances over the next few months."

Details of the further tightening-up of hire-purchase restrictions were given by the Board of Trade on the same day, as follows:

Deposit raised to 33⅓ per cent.

Radio and television sets, television aerials and cathode ray tubes. Gramophones, radio-gramophones and record players.

Domestic space-heating appliances, excluding those burning solid fuel only Dish-washers and drying cabinets.

Washing machines and washers, except those designed only for heating water by electricity or gas. Ironing machines and irons. Wringers and mangles.

Pressure cookers, floor polishers, vacuum cleaners, water softeners.

Refrigerators having a storage capacity not exceeding 12 cubic feet; machines for the mixing, extracting, and preparation of food and drink.

Electric kettles and other cooking utensils incorporating heating elements, including electric hot-plates.

Electric dry shavers, sewing machines, and hair-drying machines.

Cameras, photographic enlargers, lenses, and projectors, excluding articles suitable only for industrial and scientific use. Binoculars, monoculars and telescopes.

Motor vehicles for the carriage of passengers, mechanically propelled bicycles and tricycles, auxiliary units designed or adapted for the propulsion of bicycles and tricycles.

Deposit to remain at 15 per cent.

Lawn-mowers and garden rollers; perambulators; baby carriages and push chairs; books and watches

Furniture (including garden furniture), unless unsuitable for domestic use Floor coverings, mattresses, and overlays.

Portable sheds and garages; trunks, bags and suitcases; jewellery and imitation jewellery.

Caravans, bicyles and tricycles.

Wash boilers not designed for operation by electricity or gas, except for the heating of water, cookers, including solid fuel cookers; and water-heating appliances, excluding those for solid fuel only (for which there are no restrictions)

Other changes were. (*a*) If an agreement included both goods controlled under the Order and other goods, the restrictions of the Order would apply to all items; (*b*) if an agreement provided for payment in a shorter period than the maximum allowed by the Order, it might subsequently be altered to extend the period up to that maximum; (*c*) cinema projectors of 35 mm gauge and over, agricultural buildings and greenhouses, and equipment for certain ships, were now excluded from the Order; (*d*) the amount of any allowance for goods taken in part exchange, which could be taken into account in calculating the deposit, must be reasonable in relation to the value of such goods.

The maximum repayment period remained unchanged at 24 months for all goods except wash-boilers, cookers, and water-heating appliances mentioned in the last section of the above list, for which the period is 48 months

The Chancellor's statement led to a spontaneous recovery in the sterling-dollar rate, which rose on July 26 to $2.78\frac{13}{16}$, compared with the closing rate on the previous day of $2.78\frac{7}{16}$. On July 27 the sterling-dollar rate rose still further to $2.79\frac{1}{16}$, and on July 28 closed at $2.79. There were, however, considerable falls in share prices on the London Stock Exchange. (Times - Daily Telegraph - Financial Times - Manchester Guardian) **(Prev. rep. 14067 A.)**

A. WORLD POPULATION. — U.N. Estimate.

The quarterly issue of *Population and Vital Statistics Report*, published by the U.N. Statistical Office in the middle of July, gave the population of the world in mid-1954 as approximately 2,528,000,000, compared with 2,493,000,000 in mid-1953—an increase of some 35,000,000. The following was a breakdown by continents:

Africa	216,000,000
North America	233,000,000
South America	121,100,000
Asia (excluding Soviet Union)	1,323,000,000
Europe (excluding Soviet Union)	406,500,000
Oceania	14,200,000
Soviet Union	214,500,000

The figure for Asia includes the 1948 official estimate for China of 468,498,000. The census taken in China in 1953, however, gave the total Chinese population of the world as over 601,000,000 (see 13999 D), of whom 11,700,000 were stated to be living in overseas countries.
(United Nations Information Centre, London) **(11676 A.)**

B. RHODESIA AND NYASALAND FEDERATION. — Site for New Federal Capital.

The Prime Minister of the Rhodesia and Nyasaland Federation (Lord Malvern) informed the Federal Legislature on July 21 that the Government had acquired a 840-acre plot of land, 4½ miles from the centre of Salisbury, as the site for the Federal capital. Lord Malvern added that Sir William Holford (Professor of Town Planning at London University) was working on a plan for the site; that special legislation would be necessary for taking over the site, when completed; and that the Federal capital would be extra-territorial and would not be part of Southern Rhodesia.—(Times) **(Prev. rep. 13507 A.)**

C. AUSTRIA. — Restoration of National Independence. - State Treaty in Force. - Dissolution of Allied Control Council.

The Austrian State Treaty, signed in Vienna on May 15, came officially into force on July 27 with the deposit of the French instrument of ratification in Moscow. Instruments of ratification had previously been deposited by the British, U.S., and Soviet Governments.

With the deposit of all four instruments of ratification, the ten-year Allied occupation came to an end and Austria became a free and independent State for the first time since the *Anschluss* of 1938. The Allied Control Council, meeting under the chairmanship of M. Seydoux de Clausonne (the French Ambassador and High Commissioner), held its final meeting on July 27 and formally dissolved itself after passing a resolution expressing to the Austrian people and Government "its best wishes for future prosperity in conditions of freedom and peace."

The restoration of Austrian independence was celebrated as a public holiday and was marked by special ceremonies in Vienna. After a final combined military parade by the American, British, French, and Soviet garrisons in the Austrian capital, the flags of the four Powers were formally hauled down and the Austrian flag was ceremonially hoisted in the presence of the Federal Chancellor (Dr. Raab), the four Western Ambassadors, and 100,000 people.

All occupation forces will be withdrawn from Austria by Oct. 25, 1955—the expiration of the 90-day period after the entry into force of the treaty.—(Wiener Zeitung)
(Prev. rep. State Treaty, 14193 A; Ratifications, 14321 E; 14295 B; 14252 C.)

D. NUCLEAR WARFARE. — Further Warning by Scientists against Use of Nuclear Weapons in Warfare. - Sir Anthony Eden's Reply to Lord Russell.

The statement issued in London on July 9 by Lord (Bertrand) Russell (see 14305 A) was reinforced on July 15 by another declaration signed by 18 Nobel prizewinners. In a joint statement issued from Mainau Island (on Lake Constance, Western Germany), where they had been attending a scientific conference, they appealed for the renunciation of war and gave a warning that the use of nuclear weapons might contaminate the world with radioactivity and wipe out entire nations.

The appeal was signed by Professors Max Born and Frederick Soddy (Great Britain), Arthur H. Compton, Fritz Lipmann, H. J. Muller, and W. M. Stanley (United States), Kurt Adler, Adolf Butenandt, Gerhard Domagk, Otto Hahn, Richard Kuhn, Werner Heisenberg, and Hermann Staudinger (Western Germany), Paul Mueller and L. Ruzicka (Switzerland), Hans von Euler-Chelpin and Georg von Hevesy (Sweden), and Hideki Yukawa (Japan) Professors Muller and Yukawa were signatories of the declaration released by Lord Russell on July 9.

The text of letters exchanged between Lord Russell and Sir Anthony Eden was made public on July 15.

In reply to the declaration of July 9, forwarded by Lord Russell, the British Prime Minister said that the "grave situation to which the declaration draws attention" had "long been the concern of H.M. Government." He agreed that "only the abolition of war can finally remove the perils that threaten mankind", and welcomed the fact that "the statement recognizes that it is war itself and not simply nuclear weapons which must be abolished, and that the renunciation of nuclear weapons must form part of a general reduction of armaments"—a point of view that was "in full accord with the policy which H.M. Government have consistently followed." The Prime Minister added that he hoped that at the Geneva "summit" conference "we shall... be able to make progress towards reducing the troubles and tensions which now beset the world"

Count Lennart Bernadotte (nephew of the King of Sweden), who organized the scientific conference on Mainau Island, announced that the declaration signed there would be sent to all Nobel prizewinners for their signatures.—(Times - Le Monde)
(Prev. rep. 14305 A.)

E. SOVIET UNION. — Communist Party. - Increased Membership of Presidium of Central Committee.

The Tass Agency announced on July 12 that the Central Committee of the Soviet Communist Party had appointed two new members to its Presidium (the former Politburo): M. Alexei Kirichenko, First Secretary of the Ukrainian Communist Party, and M. Mikhail Suslov, secretary of the Central Committee and a foreign affairs expert. M. Kirichenko had previously been one of the three "candidate members" of the Presidium. The two new appointments increased the membership of the Presidium of the Central Committee from nine to 11.
(Times - Le Monde, Paris) **(Prev. rep. 14085 B.)**

A. BRITISH EAST AFRICA. — Report of Royal Commission on Land and Population.

The report was published on June 9 of the Royal Commission appointed in 1953 under Sir Hugh Dow to examine the problems of population and of economic and social development in East Africa. Extracts from the report are given below.

Tenure and Disposition of Land. The Royal Commission thought that future policy should aim at substituting private ownership of land for the customary African system of clan or tribal ownership, and that the idea of security based on a policy of reservations should be eliminated and replaced by the conception that greater security rested in the guaranteed recognition of private interests in land. The Commission believed that a system of private ownership would restore, in a modern manner, the mobility of the African population in relation to the land which had existed before all the present rules and regulations were made. It particularly criticized the existence of "watertight compartments" between the indigenous people and the settlers, which was apparent in Tanganyika as well as in Kenya. The retention of land in the Highlands of Kenya for purely European use (said the report) made the Europeans appear as a "tribe hanging on to their tribal territory" instead of pooling it for the common need; it also depicted the Europeans as a political bloc, which generated a "phobia" against any further alienation of land, however much this might be necessary for the common good "This phobia is exaggerated," the Commission declared, "but it needs killing."

Two facts stood out as a consequence of the policy of the exclusive tenure of lands in the Highlands by Europeans. (1) the bitterness which had persisted over the extinguishing of African rights in the area, and (2) the sense of injustice caused in African eyes by "broad acres reserved for a few individuals" alongside an African reserve in which land hunger existed. The Commission recommended the introduction of legislation ensuring the recognition of private interests in land, and advocated a freer interchange of land between owners of different races; legal provisions should ensure that transfers took the form of leases only, which should be subject to the Governor's approval and in which the reversionary rights remained vested in the seller.

With regard to African labour in the White Highlands, the Commission considered it wrong that the African farm labourer should be tied to a particular farm because he had nowhere else to live In order to enable him to offer his services at will, the Government should "purchase, or if necessary compulsorily acquire, land in suitable places in the Highlands for the purpose of enabling farm workers to rent village dwelling-plots on long leases on which they would build houses for their families." These plots should include allotments for food-growing.

Development of Land. Areas of land with high productivity were very unevenly distributed between the three territories, and in view of of this the Commission advocated a regional, as opposed to a territorial, approach to the development of such areas. The report stated: "The material benefits which would accrue to East Africa from a single regional endeavour to bring about development in the interests of the whole East African community cannot at present be attained owing to the inhibiting effect of racial and political interests. At the same time we would be failing in our duty if we did not point out the implications of failure to adopt this unitary approach. If for political or other reasons it is not forthcoming there will inevitably be a slowing-down of the tempo of development in each and all of the territories, and this at a time when it is imperative to accelerate the process."

Agricultural Productivity. The development of increased productivity in agriculture was basically a question of commercializing the indigenous agricultural systems. In East Africa peasant agriculture was not generally directed towards securing the greatest money income, and the appreciation of land as an asset which had to be carefully conserved was for the most part absent. Production for the market should be expanded and accompanied by the establishment of a balanced pattern of agriculture to prevent soil exhaustion.

Although the report listed fragmentation of holdings as one of the major faults in the present usage of land, it nevertheless pointed out that the introduction into the crowded areas of consolidated holdings raised the whole problem of displacement. Neither industry nor irrigation would be able to provide in any short period of time for the absorption of many people on an economic basis. Declaring that the real need in East Africa was the economic development of the fertile land, the Commission therefore recommended increased attention to the use of fertilizers, crop specialization, mechanization, co-operation, and an improved system of agricultural research. It also recommended the establishment in each territory of a land development board, which should be divorced from sectional and interested controls and should act as the main agent of agricultural development.

Health and Education. Improved public health and better and more widespread education were, the Commission considered, prerequisites of a higher standard of living. It recommended that an expert body should be appointed to examine problems of public health, and suggested that the education effort should be concentrated on the primary and intermediate stages, on technical education, and adult education, particularly for women.

Urban Development. A detailed analysis of the growth and development of urban conditions revealed an unsatisfactory state of affairs in which towns were largely considered and administered as non-African centres, and in which too little attention was paid to the problems presented by an expanding African and Asian urban and peri-urban population. The Commission recommended, therefore, the adoption of a new policy based on (*a*) the grant of full security of tenure to Africans living within and outside the towns, (*b*) efficient urban administration, aimed at producing an integrated urban society; and (*c*) a zoning system within the towns based, not upon racialism, but upon building standards. It also proposed that urban development should become the responsibility of an officer of standing responsible to the appropriate Minister.

Population. On the basis of the statistical material available, the Commission deprecated apprehensions concerning an unduly rapid growth of population, and thought that "the fear of over-population which dominates so much of the contemporary debate may prove to be illusory." "Indeed," the report continued, "the economic development of East Africa, which is essential if living standards are to be raised, may require an even larger population than that which now exists." Immigration still had a considerable effect on the total numbers of Indians, but this factor appeared to be a declining one.

Industrial Expansion, Marketing, etc. In the absence of new mineral discoveries, industrial production in East Africa depended in the main on the expansion of local territorial markets, which in turn depended on more efficient agricultural production Non-Africans were at present the main source of skill and enterprise, but they were not numerous. It was estimated that the *per capita* net product in East Africa was among the lowest in all African territories. Rising standards of income involved the expansion of exchange and the division of labour as between persons and regions, this process of change, however, was a threat to the tribal concept of economic social security, and public policy should recognize it as such. The Commission believed that if modern economic institutions were to evolve, they must be freed from the political authority of a tribe when it was obstructive

With regard to the marketing and distributive system, the Commission noted that the growth of modern commerce in East Africa had been almost entirely due to the activities of non-Africans. It condemned the use of physical control of supplies by Governments and restrictions on trade designed to protect Africans; in particular, it expressed doubt whether the policy of the Uganda Government in restricting the number of cotton ginneries had been helpful. As regards public expenditure on development projects, the Commission thought that these should be concentrated on programmes likely to yield immediate and reasonably certain results.

Wages. Although real wages had probably risen for the past 20 years, it was doubtful whether this increase had kept pace with the increase in other real incomes, such as those derived from the production of cash crops The Commission thought that settled African labour was essential, and that to ensure this it must be severed from ties with the reserve Pointing out that the statutory minimum wage failed to cover the cost of living of the type of person to whom it was related in urban areas, the Commission expressed the view that in each of the territories there should be a national minimum wage, with area differentials as in Kenya. Every effort should be made to promote wages councils, which should contain a strong African element, and experiments in setting-up works councils and joint staff committees should be encouraged. The Commission thought, however, that an attempt to encourage trade unions on the British model would probably be a waste of effort for some time to come.

Exploitation of Minerals. The report emphasized that the actual development of mineral production could not be taken as an indication of the mineral potentialities of East Africa, as very little exploration had so far taken place. There was probably no single source from which surplus income could be so readily obtained as from successful mineral exploitation. It was therefore of overriding importance to make conditions for exploration and exploitation attractive, and to this end the setting-up of a single inter-territorial authority, to be known as the East African Prospecting and Mining Leases Board, was recommended. The Commission pointed out that mineral development was retarded by the fact that tax concessions by Colonial Governments were largely negatived for U.K. companies by U.K. taxation policy.

Transport. The East African Railways and Harbours Administration should be constituted as an independent autonomous corporation whose share capital should be owned by the Governments of the three territories An East African Road Corporation should also be established.

Water Resources. There should be a single department in each territory responsible for all water development except urban supplies.

Immigration. The report said that although Africans were afraid of new immigration, the problem was not whether immigration should be permitted—as it was essential for the infusion of capital and enterprise—but on what terms and conditions it should be allowed. No fundamental changes in existing arrangements were proposed, but supervision should be exercised by the Government, and not by boards reflecting sectional interests as in Kenya.

A Colonial Office spokesman pointed out that the recommendations would require detailed study, both by the East African Governments individually and by the U.K. Government, before it could be seen whether existing policies required modification or whether new methods should be adopted in the application of current policies. The Colonial Secretary was asking each of the East African Governments to let him have its views on the recommendations, and to indicate "how far in its opinion it would be practicable and desirable to adopt the Commission's proposals at the present time."

(Prev. rep. Royal Commission, 12684 A.)

A. EGYPT. — British Vessels shelled by Egyptian Batteries. - Rejection of British Protests.

The British merchant ship *Anshun* (owned by the China Navigation Co. Ltd., of Hongkong) was fired on by Egyptian shore batteries at the entrance to the Gulf of Akaba on July 3 and, according to a report by her captain, was damaged between decks above the waterline. The *Anshun* was bound for the Jordanian port of Akaba, where she was to take on board pilgrims from Jordan to Jeddah *en route* for Mecca. Two warning shots were fired by the batteries to compel the ship to stop, and she was subsequently boarded by an Egyptian inspection party which, after examination of her papers, allowed her to proceed. There were no casualties.

A strong British protest was made to the Egyptian Foreign Ministry on July 6. On the same day the British Embassy in Cairo announced that a similar incident had occurred at the entrance to the Gulf of Akaba on April 10, when the British ship *Argobec*, carrying grain from Aden to Akaba, had been fired on by Egyptian shore batteries. The *Argobec* had suffered no damage and had later been allowed to proceed. It was stated that a protest to Egypt had already been lodged in connexion with this incident.

The British protest described the Egyptian action against the *Anshun* as "an unwarranted interference with a merchant ship proceeding about her lawful business." It asked for a full explanation; demanded that the clearest instructions be given to the Egyptian batteries at the Gulf to prevent any repetition of such incidents, and reserved the British Government's right to claim compensation

Mr. Nutting (Minister of State, Foreign Office), gave details of the incident in the House of Commons on July 6. In reply to Mr. Shinwell (Lab.), he said that H.M. Government had never recognized the legality of the Egyptian blockade of the Suez Canal or of waters leading to Israeli ports. He deprecated a statement by the Egyptian authorities that the shore batteries had not hit the ship

In a subsequent statement on July 13, **Mr. Macmillan** (the Foreign Secretary) said that the British Note of July 6 made it clear that H.M. Government did not recognize Egypt's claim to obstruct the right of innocent passage through an international channel, even though such passage lay within Egyptian territorial waters. He described the *Anshun* incident as "even more deplorable" than that of the *Argobec*, since the fire of the shore batteries had evidently been turned directly upon the vessel.

Mr. Turton (Under-Secretary of State, Foreign Office), announced on July 27 that the Egyptian reply to the British protest at the attack on the *Anshun* had been received. He continued.

"The reply denies the Master's account of the facts and asserts that the *Anshun* maintained total silence until the shots were fired. It claims that the shots were not aimed directly at the ship and that the Master never reported that his ship had been hit. It nowhere admits that a shell struck her. In seeking to justify their action, the Egyptian Government call in aid the normal right of the territorial sovereign to stop, visit, and search vessels passing through their territorial waters. The Note ends by repudiating all liability for the incident.

This reply is most unsatisfactory. It is at variance with the facts as known to H.M. Government. As soon as it has been studied and further inquiries have been made, H.M. Government will renew their representations to the Egyptian Government."

The Israeli Foreign Ministry issued a statement on July 6 denouncing the incident as "a further proof of continued Egyptian disregard for international law." Mr. Sharett (the Prime Minister), in an election speech on July 8, said that the sea approach to the Israeli port of Eilat (at the head of the Gulf of Akaba) would be forced "if our enemies fail to respond to our efforts through international channels and peaceful negotiations to lift their blockade." Mr. Ben-Gurion (the Minister of Defence and former Prime Minister), speaking at Beersheba on the same day, said that the port of Eilat would be completed and passage to the Indian Ocean assured, and that this would be done "if necessary with the help of the Israeli Navy, Air Force, and Army."

The Egyptian claim to control all maritime traffic to the Gulf of Akaba is based on the contention that Egypt is still at war with Israel—an assertion not recognized by Britain, the U.S.A., and other maritime Powers, and rejected by the U.N. Security Council on several occasions.—(Times - Daily Telegraph - Manchester Guardian - New York Times)

(Prev. rep. "Bat Galim" Incident, 14157 A.)

B. SWITZERLAND. — Purchase of British Tanks.

A proposal by the Swiss Federal Government to purchase 100 *Centurion* tanks from Britain was approved by the Swiss National Council (the Second Chamber) on March 17 by 110 votes to 41, and by the Council of States (the First Chamber) by 29 votes to nil on March 23. The cost of the tanks will be 171,200,000 Swiss francs (over £14,000,000). The first six *Centurions* were delivered to Switzerland on May 23.
(Neue Zürcher Zeitung) **(Prev. rep. 8694 C.)**

C. CANADA.—Provincial Elections in Prince Edward Island, Ontario, and Alberta.

Provincial elections were recently held in Prince Edward Island, Ontario, and Alberta. The results are summarized below, party strengths at the previous elections being shown in parentheses:

Prince Edward Island (May 25, 1955): Liberals 27 (24); Progressive Conservatives 3 (6). The Liberals were returned for their sixth consecutive period of office, having been in power since 1935.

On June 15 Mr. A. W. Matheson, who had succeeded to the Premiership when Mr. J. W. Jones had been made a Senator in May, 1953, announced that he had reshuffled his Cabinet as follows; Mr. A. W. Matheson (Premier and Attorney-General); Mr. E. Cullen (Agriculture); Dr. M. L. Bonnell (Health); Mr. W. F. Allan Stewart (Welfare and Labour); Mr. D. Mackinnon (Public Works and Industries and Resources); Mr. G. MacKay (Highways); Mr. K. Clark (Education), Mr. B. E. MacDonald (Provincial Treasurer and Secretary); Mr. E. P. Foley (Minister without portfolio).

Ontario (June 9, 1955). Progressive Conservatives 83 (79); Liberals 10 (7), C.C.F. 3 (2); Liberal-Labour 1 (1); Independent-Progressive Conservatives 1 (nil); Labour-Progressives nil (1). The new Legislature has 98 seats, eight more than the old Legislature. The Progressive Conservative Party, led by Premier Frost, was returned to power for the fifth consecutive time, having been in office since 1943.

It was reported that the Indians in Ontario (who had been given the franchise earlier in the year) had virtually ignored the election, many of the older Indians having been opposed to the use of the vote on the ground that it would imperil their treaty rights.

Alberta (June 29, 1955): Social Credit 37 (52), Liberals 15 (4); Progressive Conservatives 3 (2), Co-operative Commonwealth Federation 2 (2); Liberal-Progressive Conservatives 1 (nil); Coalition 1 (nil), Independents 1 (nil); Independent Social Credit 1 (1). The Social Credit Party, which has governed Alberta for 20 years, was therefore returned to power for the sixth consecutive time, although its strength was considerably reduced and three members of Mr. Manning's Cabinet—Mr. Gerhart (Municipal Affairs and Provincial Secretary), Mr. Maynard (Attorney General), and Mr. Casey (Lands and Forests)—lost their seats.

Mr. Manning had asked for the dissolution of the previous Legislature before the end of its normal four-yearly term, and the holding of new elections, in order that the electors might "express their verdict" on allegations made by the Liberal Opposition leader, Mr. Prowse, that most Social Credit members were ineligible to sit in the Legislature because they had accounts with a Government agency—provincial Treasury branches—and thus violated the Legislative Assembly Act. The Treasury branches, which were set up in 1938 to increase public purchasing power and create a demand for goods made in Alberta, now carry on business similar to that of normal banks, but do not operate under the Federal Bank Act. Mr. Manning had refuted Mr. Prowse's assertion as a "legal technicality" which was "absurd, irresponsible, and without foundation."

At a provincial by-election held in Nova Scotia on Nov. 16, 1954, the seat for Halifax South, left vacant by the death of the Liberal Premier, Mr. Angus Macdonald (see 13856 D), was won for the Progressive Conservatives by Mayor Richard A. Donahoe. This was the first time since 1930 that a Progressive Conservative had won a seat in a Halifax constituency.
(Montreal Star) **(Prev. rep. 13489 A.)**

D. ITALY - ALBANIA. — Reparations Agreement.

It was announced in Rome on July 7 that negotiations between the Italian and Albanian Governments for the settlement of Italian reparations payments to Albania had been concluded, and that the total payment—which had been fixed at $5,000,000 under Article 74 of the Italian Peace Treaty—had been reduced to $2,600,000. In return, Italy had renounced her compensation claims in respect of Italian property seized by Albania during the war, valued at $2,400,000. The agreement provided that Italy would settle her obligation by the supply of capital goods to the value of $2,100,000 (chiefly motor-vessels, fishing boats, and ships' engines, as well as heavy motor-vehicles and their equipment), and of consumption goods worth $500,000 (including textiles, engineering products, agricultural products, livestock, dyes, pharmaceutical products, and insecticides.—(Corriere d'Informazione, Milan)

(Prev. rep. Italian Peace Treaty, 8465 A.)

E. SOVIET UNION. — Resumed Membership of World Health Organization. - First Contribution to U.N. Children's Fund.

At the meeting of the U.N. Economic and Social Council in Geneva, the Soviet representative (M. Kumykin) announced on July 8 that the U.S.S.R. intended to rejoin the World Health Organization, from which it had withdrawn in 1949. He also announced that the Soviet Union would make its first contribution to the United Nations Children's Fund (UNICEF), and that this would amount to 2,000,000 roubles ($500,000) in the form of services and donations in kind.
(United Nations Information Centre, London)

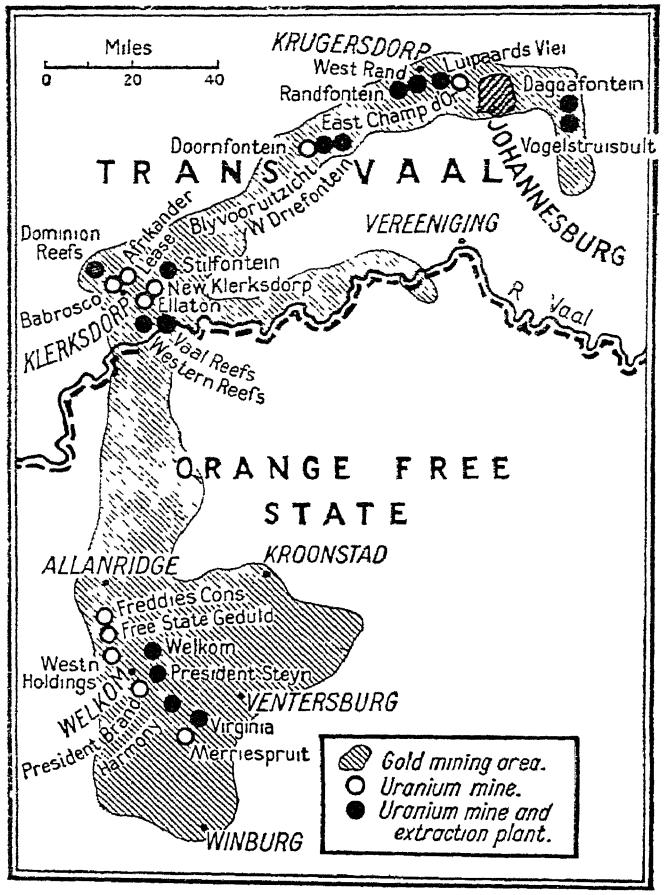
A. SOUTH AFRICA. — Uranium Production.

The President of the Transvaal and Orange Free State Chamber of Mines stated at the Chamber's annual meeting in Johannesburg on June 27 that the South African Atomic Energy Board had given authority to 26 mining companies to provide residue ore and slimes from their gold production plants for treatment in 15 uranium extraction plants. The following table, compiled from information supplied by the



(*Economist*)

London office of the Anglo-American Corporation of South Africa Ltd. and by Messrs. A. Moir & Co. (London Secretaries of the Transvaal and Orange Free State Chamber of Mines), lists the mines with uranium plants and the dates on which the plants went into production or are planned to go into production:

West Rand Consolidated[1]	October 1952
Blyvooruitzicht[2]	April 1953
Daggafontein[2].	May 1953
Western Reefs	September 1953
Stilfontein[3]	October 1953
Randfontein Estates[4] . .	February 1954
Luipaards Vlei	January 1955
President Steyn[5]	January 1955
Welkom[5]	January 1955
Vogelstruisbult . . .	February 1955
West Driefontein[6]	Mid-1955
Dominion Reefs . ..	Mid-1955
Harmony	Mid-1955
Virginia[7]	Late 1955
Vaal Reefs	Late 1955

[1] See 12508 B. [2] See 13090 B. [3] The Stilfontein uranium-treating plant, which cost £4,000,000, will also treat slimes piped from the Ellaton, New Klerksdorp, Afrikaner Lease, and Babrosco mines. [4] The Randfontein plant, which cost £6,541,000, will also treat slimes pumped from the East Champ d'Or mine. [5] Five mines belonging to the Anglo-American Corporation—Free State Geduld, President Brand, President Steyn, Welkom, and Western Holdings—share the two plants on Welkom and President Steyn, whilst Freddies Consolidated also pipe slimes to Welkom for treatment [6] Will also treat slimes from Doornfontein. [7] Will also treat slimes from Merriespruit.

Of the mines shown, Daggafontein, Vaal Reefs, and Western Reefs are in the Anglo-American Corporation group in addition to the five listed; Merriespruit, New Klerksdorp, and Virginia are in the Anglo-Transvaal Consolidated Investment Company Ltd.; Blyvooruitzicht and Harmony are controlled by the Central Mining and Investment Corporation and Rand Mines; Babrosco, Ellaton, Stilfontein, and West Rand Consolidated form part of the General Mining and Finance Corporation Ltd.; East Champ d'Or, Freddies Consolidated, and Randfontein Estates are in the Johannesburg Consolidated Investment Company group; Doornfontein, Luipaards Vlei, Vogelstruisbult, and West Driefontein are owned by New Consolidated Gold Fields Ltd., Afrikander Lease is controlled by Central South African Lands and Mines Ltd, and Dominion Reefs (Klerksdorp) Ltd. are controlled by New Union Goldfields Ltd

Figures published by the South African Commissioner of Customs and Excise on Feb. 28 showed that exports of prescribed material in 1954 under the Atomic Energy Act totalled £14,835,344, compared with only £3,873,029 in 1953. The Minister of Mines, Dr. Van Rhijn, stated on June 22 that South Africa was producing about £26,000,000 worth of uranium a year.—(Anglo-American Corporation of South Africa. - A. Moir & Co., London - Cape Times - Financial Times)

(Prev. rep. 13090 B.)

B. INDIA. — The Land Gift (Bhoodan) Movement.

A movement for the voluntary donation of land to landless peasants was initiated on April 18, 1951, by Acharya Vinoba Bhave (one of the closest associates of the late Mahatma Gandhi), with the result that gifts of over 3,700,000 acres of land had been received for that purpose by May, 1955. The "land gift" (*bhoodan*) movement originated when Acharya Bhave visited the Telengana district of Hyderabad, the centre of a strong Communist-sponsored movement for the redistribution of land. To counteract Communist influence, he persuaded a meeting of villagers to hand over part of their land voluntarily to landless peasants. Acharya Bhave then decided to launch a nation-wide campaign with the aim of distributing 50,000,000 acres (one-sixth of India's cultivable land) among the country's 10,000,000 landless families by 1957. He undertook a propaganda tour on foot for this purpose, holding prayer meetings at which he appealed for gifts of land. Both landowners and peasants responded generously to his appeal, and in Uttar Pradesh (one of the main centres of the movement) and a number of other States legislation was enacted to facilitate the transfer of land. Support was received from the Congress Party leadership, from the Roman Catholic and Protestant Churches, and from several hundred volunteers (among them Mr. J. P. Narain, the former Socialist leader) who dedicated their lives to *bhoodan* work.

Under the scheme—which was intended to apply the Gandhian principle of non-violence to social and economic problems—a target was fixed for a district, and when this had been reached the land was distributed among landless families (the minimum amount given being five acres of dry or one acre of wet land), on condition that the recipients had no other means of livelihood and were prepared to cultivate it with their own hands. Distribution took place at village meetings, at which the villagers decided whose need was the greatest; if disagreement arose, or insufficient land had been allocated, lots were drawn. The land was given in trusteeship on the understanding that it should not be sold, mortgaged, rented, or left fallow, and that if misused it should return to the "pool" for redistribution. An appeal was also launched for money to provide agricultural implements for the beneficiaries under the scheme. A gift of 1,200,000 rupees from the Mahatma Gandhi Memorial Fund for this purpose was announced on July 9, 1955.

It was announced on July 7, 1955, that 3,758,692 acres, including 2,330,554 acres in Bihar (where Acharya Bhave had spent 27 months) and 542,233 acres in Uttar Pradesh, had been received from 502,641 donors up to May 31, and that 197,430 acres had been distributed among 56,561 landless families.

(The Hindu, Madras - The Statesman, Calcutta)

C. UNITED KINGDOM. — Trade Unions. - Mr. Tiffin elected General Secretary of T.G.W.U.

Mr. A. E. Tiffin, assistant general secretary of the Transport and General Workers' Union, was elected general secretary of the union on June 15 in succession to the late Mr. Arthur Deakin, who died suddenly on May 1 and who had held that post since 1945.

About 616,000 members of T.G.W.U (approximately 48 per cent of the union's total membership) voted in the ballot for a new general secretary, Mr. Tiffin receiving 267,019 votes and Mr G. Brandon (the union's London regional secretary) being runner-up with 146,366 votes. Mr. Tiffin (59), a former London bus-driver, is a member of the National Executive of the Labour Party, and a former chairman of the London Trades Council and London Labour Party.

The T.G.W.U., with about 1,300,000 members, is the largest trade union in Britain. It was founded by the late Mr. Ernest Bevin.—(Daily Herald - Manchester Guardian)

JULY 30—AUGUST 6, 1955

A. SCIENTIFIC RESEARCH. — U.S. "Space Satellite" Project. - British and Russian Projects.

It was officially announced in Washington on July 29 that the United States would launch small unmanned satellites into space some time between July, 1957, and December, 1958, as part of the world-wide programme of scientific research to be undertaken during the International Geophysical Year (see 14349 A). The announcement was made by Dr. Detlev Bronk (president of the National Academy of Sciences) and Dr. Alan Waterman (director of the National Science Foundation) with the authorization of President Eisenhower, on whose behalf the following statement was issued from the White House:

"The President has approved plans by this country for going ahead with the launching of small unmanned earth-circling satellites as part of U.S. participation in the International Geophysical Year. . . This programme will for the first time in history enable scientists throughout the world to make sustained observations in the regions beyond the earth's atmosphere. The President expressed personal gratification that the American programme will provide scientists of all nations with this important and unique opportunity for the advancement of science"

It was explained that the satellites would be about the size of footballs; that they would be launched into the upper atmosphere by rocket; that they would encircle the earth at a height of 200 to 300 miles once every 90 minutes, at a speed of 18,000 m.p.h (five miles a second); and that the object of the experiment would be to explore the composition of the ionosphere and to study the effects of cosmic rays outside the earth's atmosphere, as well as to gather information about the possibilities of future space travel. As stated by President Eisenhower, the data obtained will be made available to all countries, including the Soviet Union.

The statement issued by Dr Bronk and Dr Waterman explained that technical advice and assistance, together with the necessary equipment and launching facilities, would be provided by the Department of Defence, "which has long been engaged on research on the upper atmosphere." It contained the following explanatory section

"The atmosphere of the earth acts as a huge shield against many of the types of radiation and objects that are found in outer space It protects the earth from things which are known to be or might be harmful to human life, such as excessive ultra-violet radiation, cosmic rays, and those solid particles known as meteorites. At the same time, however, it deprives man of the opportunity to observe many of the things that could contribute to a better understanding of the universe

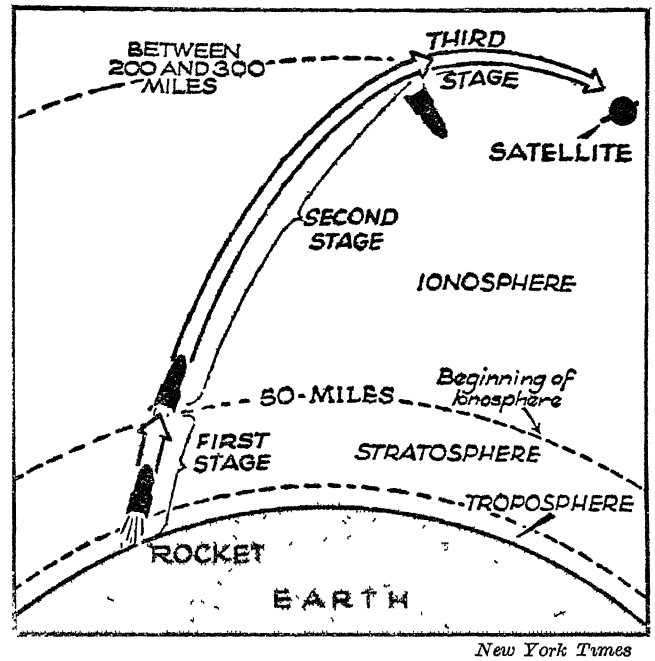
"In order to acquire data that are presently unobtainable, it is most important that scientists be able to place instruments outside the earth's atmosphere in such a way that they can make continuing records of the various properties about which information is desired. In the past, vertical rocket flights to extreme altitudes have provided some of the desired information, but such flights are limited to very short periods of time Only by the use of a satellite can sustained observations in both space and time be achieved Such observations will also indicate the conditions that would have to be met and the difficulties that would have to be overcome if the day comes when man goes beyond the earth's atmosphere in his travels.

"The satellite itself will orbit around the earth for a period of days, gradually circling back into the upper atmosphere, where it will eventually disintegrate harmlessly."

A press conference was held at the White House on the same day by Dr. Waterman and Dr. Athelstan Spilhaus (a member of the committee for U.S. participation in the International Geophysical Year). They explained that the satellite would be propelled into the upper atmosphere by multi-purpose rocket to a height of about 250 miles, at which point it would be launched (by a side-blast from the rocket) into a flat trajectory parallel with the surface of the earth. It had not yet been decided whether to launch a solid body or one containing instruments which would broadcast observations automatically; if instruments were included, other nations would be informed of the wave-length on which they would work. In addition to obtaining information about conditions in the upper atmosphere, cosmic rays, and possibilities of space travel, it was also hoped to gain knowledge affecting radio transmissions from exploration of the ionosphere. Moreover, long-range weather forecasting might be made easier by the experiments to be undertaken. It was not stated whether one or more satellites would be launched.

Further details of the U.S. space satellite project were given in Brussels by Professor Marcel Nicolet, executive secretary of the international committee of scientists co-ordinating the activities of the International Geophysical Year.

Professor Nicolet stated that the satellite would be only 50 centimetres (about 19½ inches) in diameter and would weigh 50 kilograms (110 lb.). It would be launched into the upper atmosphere by a multi-purpose rocket not unlike the German V-2, and in the following manner: (1) the first rocket would take the satellite through the troposphere (the atmospheric envelope immediately surrounding the earth) up to a height of about 14 miles, at which point it would drop off; (2) the second rocket would carry the satellite through the stratosphere into the ionosphere (which begins about 50 miles above the surface of the earth) and thence to a height of about 250 miles, (3) at that height the third rocket would deflect the satellite into a trajectory parallel with that of the earth The satellite would then fall into an orbital position, encircle the earth in 90 minutes, and continue to circle the earth until it gradually lost speed and altitude. [See accompanying diagram.]



New York Times

The controller of the Weapons Research Organization at Woomera (South Australia), Mr. H. J. Brown, announced on July 31 that the exploration of the upper atmosphere and the fringe of outer space was being planned as part of the U.K.-Australian programme for the International Geophysical Year. Mr. Brown explained that British scientists were planning to propel a rocket from a balloon to a height of nearly 60 miles by a much less expensive method than the U.S. "satellite" scheme, adding in this connexion

"A small instrument-crammed rocket, powered by solid instead of liquid fuel, may be sent up about 70,000 feet attached to a large balloon and then fired by radio This rather inexpensive way of getting recording instruments into the upper layers of the atmosphere has been discussed by other countries but has not yet been tried We could probably send aloft a number of such rockets for the cost of one American space satellite"

A British research programme for the exploration of the earth's upper atmosphere by high-altitude rockets was announced on Aug. 4 by the Royal Society in London.

The rockets, to be designed, supplied, and fired by the Ministry of Supply, will carry 100 lb of equipment to heights of 120 miles or more, and are expected to be ready in two years The Royal Society stated that the first experiments would include determination of atmospheric temperature and density, a study of the nature of the ionosphere (the reflecting layers which make the transmission and reception of long-distance radio beams possible), a search for fine meteoric dust below 60 miles altitude; and determination of the heights of the regions from which night "airglow" is strongest. In one experiment, quantities of sodium vapour (like that used in street lighting) would be released at a height of 60 miles, creating a spectacular "full moon" effect.

Five university research groups will take part in the programme, viz., University College, London (Professor H. S W Massey, chairman of the Royal Society's Upper Atmosphere Society), Imperial College, London (Professor P. A Sheppard, Professor of Meteorology); University of Birmingham (Professor James Sayers, who worked on atom bomb research in America in 1943), the Queen's University of Belfast (Professor L E. Bates, F.R S., and Professor Karl Emeleus), and University College, Swansea (Dr W J. G Beynon). Integration of results will be done mainly by Professor Massey and his staff.

The programme will cost £100,000 and will be financed by the Treasury. It has been arranged independently of the International Geophysical Year, but should be in operation during that period, and, in effect, will be a British contribution to it.

Sir David Brunt, secretary of the Royal Society, said that it was possible that some of the rockets might be launched within the British Isles [There is a Ministry of Supply range at Aberporth, Cardigan Bay, but no decision about launching sites has been made.]

Professor Leonid Sedov, head of the Commission on Interplanetary Communications recently set up in the Soviet Union (see 14192 A), stated on Aug. 2 that Soviet scientists were of the opinion that it would be possible for the U.S.S.R. to launch within two years "satellites of much greater size than those planned by the United States." Whilst he could not give an exact date, he added that an announcement would be made in due course when everything was ready for launching the Russian satellite. Professor Sedov gave this information at a press conference in Copenhagen, where, with other Russian scientists, he was attending a congress of the International Astronautical Federation, representing scientists of 14 countries, called to discuss problems of interplanetary travel.

M. Khrushchov, First Secretary of the Communist Party of the U.S.S.R., said in Moscow on Aug. 1 that the Soviet Union was ready to co-operate with the United States in studying natural phenomena by means of artificial satellites.

The announcement of the U S. space satellite project aroused world-wide interest. Eminent scientists in America, Britain, Russia, and other countries expressed the opinion that the project represented the first stage in solving the problems of interplanetary travel, and that the first landing on the moon could be expected before the end of the twentieth century.

A. UNITED KINGDOM. — Press Centenaries.

Three of Britain's leading newspapers recently celebrated their centenaries—the *Daily Telegraph* (London) and *The Scotsman* (Edinburgh) on June 29, and the *Manchester Guardian* on July 2.

Among many congratulatory messages received by the *Daily Telegraph* was one from Sir Winston Churchill, who recalled that he had been correspondent of the paper during the Malakand campaign 58 years ago, and who described himself as "the oldest surviving member of the *Daily Telegraph and Morning Post* staff." [The *Morning Post* was amalgamated with the *Daily Telegraph* in 1937—see 2758 D.] The paper is owned by Kemsley Newspapers Ltd., and achieved its present influential position largely through the efforts of the late Lord Camrose, who died on June 15, 1954. The present editor of the *Daily Telegraph* is Captain Colin Coote, D S O His predecessor, Mr Arthur Watson, held that position from 1924 to 1950

The *Manchester Guardian* was founded as a weekly paper in 1821, and became a bi-weekly in 1836 before becoming a daily in 1855 C. P. Scott, one of the most famous figures in British journalism, was editor from 1871 to 1929, and was followed by Edward T. Scott (1929-32), W. P. Crozier (1932-44), and the present editor, A P Wadsworth. The *Manchester Guardian* has for many years been run by a board of trustees as a non-profit-making body All six members of the present board of trustees are members of the paper's staff, three of them being members of the Scott family

The Scotsman, one of the leading and most influential organs of public opinion in Scotland, received congratulatory messages from H M. the Queen, Sir Anthony Eden, Sir Winston Churchill, and the Secretary of State for Scotland, Mr. James Stuart. The present editor of the paper is Mr J. Murray Watson.

A number of other well-known papers celebrated their centenaries in June or early in July, among them the *Liverpool Daily Post*, the *Sheffield Telegraph*, and the *Irish News* (Belfast). The coincidence of the centenaries was due to the fact that legislation abolishing the newspaper stamp duty came into effect on June 29, 1855.—(Daily Telegraph - Manchester Guardian - The Scotsman - Observer) **(13676 C; 10691 C; 7677 E.)**

B. INDIA. — Government Policy on Admission of Foreign Missionaries.

The Indian Government's policy with regard to the admission of foreign missionaries into India was announced in New Delhi on April 10.

It was stated that foreign missionaries wishing to enter India as additional members of a mission, or to replace existing missionaries, would be admitted only if they possessed outstanding qualifications or specialist experience, and if Indians were not available for such posts Missionaries already in India, however, would not ordinarily be disturbed in their work unless they indulged in "anti-national activities" Those who had been working in India for at least five years would normally be eligible for readmission if they left the country temporarily with the intention of returning to India. Foreign missions or societies working in India, however, would not be able to open a new branch or institution without the prior permission of the Government of India.

It was also announced that Commonwealth missionaries would henceforth be required—like other foreign missionaries—to obtain visas before entering India.
(The Statesman, Calcutta) **(Prev. rep. 12907 B.)**

C. IRISH REPUBLIC. — Proposed Establishment of German Industries in Ireland. - Mr. Norton's Statement.

The Irish Minister for Industry and Commerce, Mr. Norton, announced in Bonn on Aug. 1, during a visit to Western Germany, that his Government would send a high-level mission to the Federal Republic in October or November to seek to interest German industrialists in establishing plants in Ireland. Among the industries to be approached would be the electrical engineering firm of Siemens-Schuckert (which built the Shannon power scheme in 1926), as well as German textile, light engineering, and machinery industries.

Mr. Norton referred to talks which he had with Dr. Blucher (the West German Vice-Chancellor) and other officials of the Federal Government, and said that he had pointed out to them that the Irish Republic would "welcome German investment in Ireland's industrial development" He had pointed out the advantages of such investments viz, the availability of adequate manpower, cheap electricity, an abundance of water-power, and the existence of a stable Government. He had also stressed that the Irish Republic's existing trade agreement with Britain allowed large varieties of goods to be imported into Britain from Ireland duty-free, and that similar arrangements existed with Canada, Australia, New Zealand, and South Africa.

"A German industrialist who already has a market for his products in Great Britain or other Commonwealth countries would have the further advantage of being able to export to them free of tariff if he set up a plant in Ireland," Mr. Norton added. "What we need is not so much money as technical competence for our new industries But we want this German technical competence to be accompanied by German investments to show their faith in us" Among the types of goods which could be manufactured in the Irish Republic, Mr. Norton listed washing machines, refrigerators, sewing machines, harvesting machinery, and pharmaceutical products.

Mr. Norton announced that the Irish mission to Western Germany would be headed by Dr. J. P. Beddy, chairman of the Industrial Development Authority, and Mr. John Leydon, economic adviser to the Department of Industry and Commerce.
(Irish Times, Dublin)

Note. In March last a delegation from the Irish Development Authority had visited Sweden for discussions with Swedish Ministers and industrialists on the possibility of encouraging Swedish manufacturers to produce goods in the Irish Republic. (Irish Times)

D. UNITED STATES. — Navy. - Atomic Submarine Programme. - Launch of U.S.S. "Seawolf."

The U.S. Navy's second atomic-powered submarine, the *Seawolf*, was launched at Groton (Connecticut) on July 21 in the presence of the Secretary of the Navy, Mr. Charles S. Thomas. The keel of a third atomic-powered submarine was laid down at Groton on the same day.

Mr. Thomas announced at the launching ceremony that eight atomic-powered submarines would be in service with the U.S. Navy, or under construction, by the end of the present fiscal year; that others would follow " in rapid succession "; and that the Navy was also giving "careful attention" to the production of nuclear-powered seaplanes. He added that the nuclear plants of the *Nautilus* (the U.S. Navy's first atomic submarine) and of the *Seawolf* had been made "purposely competitive, partly to determine which is the better power plant and partly to exploit the rapidly advancing technology of nuclear propulsion."

It was stated in the *New York Times*: "The key difference between the two [submarines] is that the coolant, or agent of heat transfer, in the *Nautilus* is water In the *Seawolf* it is liquid sodium. The coolant in effect transfers the heat generated by the atomic fission within the submarine's reactor to the boiler, which turns it into steam for the turbine"

According to official statistics, the *Seawolf* has a displacement of about 3,000 tons, is 330 ft. long, and carries a crew of about 100. Her underwater speed is stated to be "over 20 knots."

The commanding officer of the *Nautilus* (Cmdr. Eugene P. Wilkinson) stated on March 31 that the submarine's performance on recent sea trials had been "revolutionary and amazing." Commander Wilkinson said that the *Nautilus* had logged over 3,000 miles in these trials, hundreds of them while submerged, without any serious difficulties.—(New York Times) **(Prev. rep. U.S.S. "Nautilus," 13828 C; 13373 C.)**

E. SPEED-BOAT RACING. — New World Record established by Mr. Donald Campbell.

Mr. Donald Campbell (34), of Britain, set up a new world water-speed record on July 23 by making two runs over a measured kilometre on Ullswater (Lake District) at an average speed of 202.32 m.p.h. His turbo-jet speed-boat, the *Bluebird*, made the first run at 215.08 m.p.h. and the second at 189.57 m.p.h. The previous world water-speed record, 189.57 m.p.h., had been set up five years ago by Mr. Stanley Sayers, an American. By his achievement, Mr. Campbell regained for Britain the record which his father, the late Sir Malcolm Campbell, had held in the late 'thirties. (Observer - Sunday Times)

A. WESTERN GERMANY. — Elections in Lower Saxony and Rhineland-Palatinate. - New Coalition Government in Lower Saxony. - The Schlüter Case.

Land elections which took place in Lower Saxony on April 24 resulted in the loss by the Social Democrats and the Refugee Party of their former overall majority in the *Landtag*. The detailed results were as follows

	Landtag seats 1955*	1951†
Social Democrats	59	64
Christian Democrats	43	35‡
German Party	19	
Refugee Party (B.H.E.)	17	21
Free Democrats	12	12
German Reich Party	6	3
Centre Party	1	4
Communists	2	2
Socialist Reich Party	–	16§
German Social Party	–	1

* Total 159 seats. † Total 158 seats. ‡ The Christian Democrats and the German Party campaigned together as the Lower German Union. § The S R P was dissolved as an anti-constitutional party by the Federal Constitutional Court on Oct. 23, 1952, and thereby lost all its seats in the former *Landtag* (see 12697 A)

Owing to the redistribution in March 1953 of the former Socialist Reich Party's seats, and because of further changes caused by deputies transferring from one party to another, the distribution of seats in the former *Landtag* at the time of its dissolution was as follows: Social Democrats 58, Christian Democrats - German Party 43; Refugee Party 22, plus one associate, Free Democrats 15; Centre Party 3; Communists 3, German Reich Party 2, Liberal League 2, Farmers' Party 1; Independents 3, Others 1.

The number of votes was as follows, those in the 1951 *Landtag* elections and the 1953 *Bundestag* (Federal) elections being shown for comparison:

	1955 *Landtag*	1953 *Bundestag*	1951 *Landtag*
Social Democrats	1,182,066	1,136,729	1,123,199
Christian Democrats	893,917	1,332,316	790,766
German Party	415,184	449,459	
Refugee Party (B H E.)	370,432	406,990	496,569
Free Democrats	264,862	261,258	278,088
German Reich Party	126,699	132,269	74,017
Centre Party	37,612	—	110,473
Communist Party	44,783	40,060	61,364
Socialist Reich Party	—	—	366,793
Others	22,317	23,870	28,952

Polling percentages in the three above-mentioned elections were respectively Social Democrats 35 2 (1955), 30 (1953), 33.7 (1951), Christian Democrats 26.6, 35 2, 23.7 (together with German Party), German Party 12 4, 11 9, 23.7 (together with Christian Democrats); Refugee Party 11, 10 8, 14 9; Free Democrats 7 9, 6 9, 8 3, German Reich Party 3.8, 3.5, 2 2; Communists 1 3, 1.1, 1 8; Centre Party 1 1, nil, 3 3, Socialist Reich Party (1951 only) 11, Others 0.7, 0.6, 1 1

The electorate totalled 4,398,660, of whom 77 5 per cent went to the polls.

The Social Democrats, though losing six seats, remained the largest single party and increased their percentage of the total votes. The Christian Democrats, fighting on their own and no longer in alliance with the German Party, gained considerably both in votes and in seats.

The reduced poll of the Refugee Party was attributed to the fact that many refugees who had originally settled in Lower Saxony had meanwhile moved to other parts of the Federal Republic. The Centre Party was virtually wiped out, but the neo-Nazi German Reich Party doubled its representation, whilst the Communists maintained their position. The electoral campaign was dominated by foreign policy issues—i.e., support of, or opposition to, the Paris Agreements.

The loss by the Social Democratic - Refugee Party Coalition Government of its working majority in the *Landtag* led to the resignation of Dr. Kopf (who had held the *Land* Premiership for 10 years) and to the formation, under Christian Democratic auspices, of a new coalition in line with that supporting the Federal Government. On May 15 it was announced that Herr Hellwege, Federal Minister for *Bundesrat* Affairs, had been entrusted with the formation of a new Cabinet consisting of Christian Democrats, Free Democrats, and representatives of the German Party and Refugee Party. Herr Hellwege was formally elected Prime Minister by the new *Landtag* on May 26, receiving 89 votes against 81 for Dr. Kopf, with six abstentions. The membership of the new Ministry, which commands 91 out of the 159 seats in the *Landtag*, was announced on the same day as follows:

Herr Heinrich Peter Hellwege (German Party), Prime Minister; Dr. Richard Langeheine (German Party), Justice; Herr August Wegmann (Christian Democrat), Interior; Dr. Helmuth Koch (Christian Democrat), Finance; Dr. Heinz Rudolph (Christian Democrat), Social Welfare; Herr Hermann Ahrens (Refugee Party), Economic Affairs, Herr Friedrich von Kessel (Refugee Party), Agriculture, Herr Erich Schellhaus (Refugee Party), Refugees, Herr Leonhard Schluter (Free Democrat), Education; and Dr Konrad Melzig (Free Democrat), Reconstruction

The appointment of Herr Schluter as Minister of Education aroused strong protests throughout Germany. The Rector of Gottingen University (Professor Wormann) and the 18 members of the University's Senate resigned their offices in protest, declaring that Herr Schluter was a neo-Nazi, that they could not work with him, and that his appointment would "give German education a bad name at home and abroad." Of the 4,800 students at Gottingen University, over 3,000 went on strike in support of the attitude taken by the Rector and Senate. The Rector of Brunswick Technical College (Professor Justi) and several other heads of academic institutions and faculties in Lower Saxony also resigned, and the Brunswick Teachers' Association publicly protested against Herr Schluter's appointment. Many West German newspapers gave editorial support to the protest campaign, which was joined by the German Trade Union Federation and the Social Democratic Party.

Herr Schluter, a former member of the neo-Nazi German Right Party (now banned), joined the Free Democrats in 1952 and quickly achieved a prominent position in the *Land* organization of that party A publisher by profession, he had been the first post-war Chief of Criminal Police at Gottingen, and it was alleged that during his tenure of this office (from which he was later removed by the British Military Government) he had ordered the unlawful arrest of trade unionists and other citizens, and had detained them for weeks without trial. Furthermore, it was alleged that he had associated with extreme Right-wing politicians and was a close friend of Herr Adolf von Thadden, co-founder of the German Right Party and of its successor, the German Reich Party Particular objection was raised to the fact that his firm (the *Gottinger Verlagsanstalt*) had published a number of books by former prominent Nazis or Nazi supporters in which these men had tried to disclaim responsibility for their actions under the Nazi régime Herr Schluter denied that he had ever been a Nazi or a member of the prohibited Socialist Reich Party, and pointed out that he was himself partly Jewish and that his own relatives had suffered under the Nazis. Whilst admitting that he had been prominent in defending ex-Nazis upon whom disabilities had been imposed, he attributed his attitude to his "dislike of persecution."

Following a meeting between Herr Hellwege and the Rector and several professors of Gottingen University, it was announced in Hanover (the *Land* capital) on June 5 that Herr Hellwege had appointed a committee to examine the accusations that Herr Schluter had misused official positions in the past and had published books by unrepentant ex-Nazis. Pending the results of this inquiry, Herr Schluter was granted leave from his ministerial duties. The committee (which consisted of members of the coalition parties) reported on June 8 that the accusations against Herr Schluter were of a general nature, that they did not show that he was opposed to the democratic order, and that there was no reason why he should not take part in the Government Herr Schluter, however, resigned on the following day, declaring that the controversy caused by his appointment had made co-operation with the university authorities impossible and that he wished to remove a difficulty in the way of the new *Land* Government. [Herr Schluter had been advised to resign by Dr. Dehler, the national chairman of the Free Democratic Party.] The *Landtag* decided on June 11 to set up another parliamentary inquiry commission to examine the "Schluter case."

On June 27 the Free Democratic executive in Lower Saxony nominated Herr Erich Schmidt, a lawyer and former Chief Burgomaster of Gottingen, as successor to Herr Schluter at the *Land* Education Ministry. His formal appointment must await the reassembly of the *Landtag* in the autumn.

Landtag elections also took place on May 15 in the Rhineland-Palatinate, the Christian Democrats emerging with an overall majority of one and the coalition government of Christian Democrats and Free Democrats obtaining 64 seats out of a total of 100. Detailed results were as follows:

	Landtag seats 1955	1951
Christian Democrats	51	43
Social Democrats	36	38
Free Democrats	13	19
Communists	–	–
Refugee Party (B.H.E.)	–	–
Free Electors' Assoc (F.W.G.)	–	–
Others	–	–

The number of votes was as follows, those in the 1951 *Landtag* elections and the 1953 *Bundestag* (Federal) elections being shown for comparison:

	1955 *Landtag*	1953 *Bundestag*	1951 *Landtag*
Christian Democrats .	741,568	925,424	563,274
Social Democrats .	501,748	482,726	488,374
Free Democrats	201,839	214,806	240,071
Communists .	50,891	41,048	62,483
Refugee Party (B H.E)	28,272	26,181	27,573
Free Electors' Assoc. (F.W G)	45,209	—	—
Others .	14,463	85,624	55,475

Polling percentages in the three above-mentioned elections were respectively Christian Democrats 46.9 (1955), 52 1 (1953), 39.2 (1951); Social Democrats 31 7, 27 4, 34; Free Democrats 12 7, 12.1, 16 7; Communists 3.2, 2 3, 4 3, Refugee Party 1.8, 1 5, 1 9, Free Electors' Association 2 9; Others 1, 4 8, 3.9

The electorate totalled 2,144,157, of whom 76 2 per cent went to the polls.

The election, the first to be held since the Federal Republic became sovereign, was used by both Dr. Adenauer and the Social Democrats as a platform to put forward their views on German rearmament and the Paris Agreements.

The success of the Christian Democrats in obtaining an absolute majority in the new *Landtag*, and in increasing their voting percentage considerably, was claimed by Herr Altmaier, the *Land* Premier, as an expression of support for the Chancellor's conduct of foreign affairs Otherwise, the overall pattern of the voting figures was the same as in the other *Lander* of the Federal Republic—i e , the Christian Democrats increased their poll compared with the previous *Landtag* elections, but did not obtain as many votes as in the Federal elections.

Herr Altmaier was re-elected *Land* Premier for the third time on May 26, and reappointed his Cabinet with the same members as before. They were as follows:

Herr Peter Altmaier (Christian Democrat), Prime Minister, Economics, and Communications, Dr Alois Zimmer (Christian Democrat), Interior and Social Welfare, Herr Bruno Becher (Free Democrat), Justice, Dr Albert Finck (Christian Democrat), Education, Dr. Wilhelm Nowack (Free Democrat), Finance; Herr Oskar Stuvinger (Christian Democrat), Agriculture, Viticulture, and Forests.

A. EUROPEAN INDUSTRIAL PRODUCTION. — Indices of Industrial Production for 1953.

The following table, taken from the *Economic Survey of Europe* prepared by the Economic Commission for Europe, gives the indices of industrial production in the countries of Western Europe during 1953, with 1952 figures for comparison. Comparable figures for Spain, Portugal, the Soviet Union, and the countries of Eastern Europe were not available.

	Percentage share of total in 1952	1950 =100 1952	1953	1950 =100 1st Qtr	2nd Qtr	3rd Qtr	4th Qtr.

B. CYPRUS. — New Currency.

A new currency—the Cyprus pound sterling, divided into 1,000 mils—came into force in Cyprus on Aug. 1. It replaced the pound sterling, which was divided into 20 shillings (as in Britain), with the shilling divided into nine piastres The new currency system—the first such change since the beginning of British rule in 1878—therefore entailed the abandonment of the shilling and the piastre as monetary units, but involved no change in the value of the pound. The new bank-notes will be in denominations of £5, £1, 500 mils, and 250 mils, whilst the new coins will be in denominations of 100, 50, 25, five, and three mils. Banks and trading interests in the Colony had recommended the new system in order to simplify commercial transactions. (Times - Daily Telegraph)

C. LITERATURE. — Book Selections for July.

Selected books published in Great Britain, the United States, and France are given below:

Great Britain. Amery, L S —"My Political Life Volume III—The Unforgiving Years, 1929-1940." (Hutchinson, 30s)

Cameron, James—"Mandarin Red." A Journey behind the Bamboo Curtain. (Michael Joseph, 15s)

Chesterton, G K —"The Glass Walking-Stick" Essays from the *Illustrated London News*, 1905-1936 (Methuen, 10s. 6d)

Church, Richard—"Over the Bridge." An Autobiography (Heinemann, 18s)

Gavin, Catherine—"Liberated France" (Jonathan Cape 18s)

D. BURMA. — Cabinet Changes.

It was announced in Rangoon on June 1 that U Aung Pa, hitherto Minister for the Karen State, had been appointed Minister of Health; that Dr. Saw Hla Tun had been appointed Minister for the Karen State, that U Khin Maung Lat, hitherto Minister of Health and Judicial Affairs, would retain the latter portfolio; and that Sama Duwa Sinwa Nawng had been appointed Minister for National Solidarity—a new post.

U Aung Pa, the outgoing Karen State Minister, is president of the Union Karen League (U K.L), which in the general elections of 1951 secured 21 seats in both Houses of the Burmese Parliament and thereby also obtained a majority on the Karen State Council Dr Saw Hla Tun, the new Karen State Minister, and Member of Parliament for Moulmein, is head of the United Karen Organization (U.K.O) and a prominent leader of the Anti-Fascist People's Freedom League (the ruling party in Burma)

Although the U K O. and the U K.L. have been strongly opposed to each other ever since their formation in 1949, it was agreed in 1952 that the respective leaders of the two parties should each serve as Head of the Karen State, and Minister for the Karen State in the Central Government, for a period of two years. As a result, U Aung Pa became Head of the Karen State in the latter year. After lengthy negotiations a fresh agreement was reached under which Dr Saw Hla Tun (who was originally to have succeeded U Aung Pa in 1954) will now be Head of State and Minister for the Karen State for only one year, pending the general elections to be held in 1956

The Karen State occupies a narrow strip of territory 300 miles long and 30-50 miles wide along the Burmese-Siamese frontier. Only about 500,000 Karens out of the total Karen population of 1,750,000 live within the borders of the State, the remainder being distributed in "pockets" throughout Lower Burma.—(Burmese Government Information Dept., Rangoon - The Statesman, Calcutta) **(Prev. rep. Cabinet, 14007 B; Karen State, 13755 B.)**

E. UNITED KINGDOM. — Oxford University. - 400th Anniversary of St. John's College and Trinity College.

Two Oxford colleges, St. John's and Trinity, celebrated their 400th anniversaries on June 25. The colleges were founded in the reign of Mary Tudor—St. John's by Sir Thomas White, alderman of the City of London, and Trinity by Sir Thomas Pope, of Hertfordshire—on the sites of two older religious foundations dissolved by Henry VIII. Famous students of St. John's have included Archbishop Laud and Bishop Juxon, whilst those of Trinity have included Lord Baltimore (founder of Maryland), Lord Chatham (the elder Pitt), and Cardinal Newman.—(Times - Observer) **(Prev. rep. 10102 B.)**

A. PAKISTAN. — Constituent Assembly Elections. - First Assembly Session. - Dismissal of Frontier Province Cabinet. - Restrictions lifted on Abdul Ghaffar Khan.

In the elections to the new Pakistan Constituent Assembly, which were held on June 21, no one party secured a majority, the results being as follows . Moslem League 25, United Front 16, Awami League 13, Independents 4 (including 2 non-Moslem members), Pakistan National Congress 4, Scheduled Castes Federation 3, "Noon group" 3, United Progressive Parliamentary Party 2, Azad Pakistan Party 1, Communists 1. Under a Government Order issued on May 28, the representatives of East Bengal, the Punjab, Sind, and the N.W. Frontier Province were elected by the Provincial Legislative Assemblies, the representative of Baluchistan by the *Shahi Jirga* and the non-official members of the Quetta municipality, and the representative of Karachi by the municipal corporation. It was laid down that the method of election of the eight representatives of Bahawalpur State, the Baluchistan States Union, Khairpur State, the Frontier States, and the Tribal Areas would be decided upon by the Assembly when it convened.

Details of the elections in the various Provinces are given below.

East Bengal (31 Moslem and nine non-Moslem seats) Of the 31 Moslem seats, 16 went to the United Front, 12 to the Awami League, one to the Moslem League, one to a Moslem League Independent, and one to a Communist The successful candidates included Mr. Mohammed Ali (the Prime Minister), Mr. Fazlul Huq (the leader of the United Front, and former Chief Minister), and Mr Suhrawardy (leader of the Awami League, and Law Minister in the Central Government) Mr Mohammed Ali was the sole candidate nominated by the Moslem League, which holds only 10 of the 300 seats in the Provincial Assembly, and which, under the proportional representation system employed, was therefore entitled to return only one representative The Moslem League Independent was Mr Fazlur Rahman

Of the nine non-Moslem seats, the Pakistan National Congress won four, the Scheduled Castes Federation three, and the United Progressive Parliamentary Party two.

Punjab (20 Moslem seats and one non-Moslem). Of the Moslem seats, 15 were won by Moslem League candidates, three by the dissident Noon group (led by Mr. Firoz Khan Noon, a former Chief Minister), and one each by the Awami League and the Azad Pakistan Party. Successful Moslem League candidates included Mr M A Gurmani (Governor of the Punjab), Mr. Daultana (a former Chief Minister), Khan Iftikhar Hussain, the Khan of Mamdot (Chief Minister after the partition of the Punjab), and four members of the Central Government Major-General Mirza (Minister of the Interior), Mr Mohammad Ali (Finance Minister), Colonel Husain Shah (Minister of Education), and Sardar Amir Azam Khan (Minister for Refugees). Sardar Mumtaz Ali Khan (Minister of Information in the Central Government) failed to secure election The five Opposition candidates elected included Mr Firoz Khan Noon, Mian Iftikharuddin (Azad Pakistan Party), and Mian Abdul Bari (Awami League) Mr. C. E. Gibbon was returned for the non-Moslem seat.

Sind (four Moslem seats and one non-Moslem). The Moslem seats were won by Mr. M. A Khuhro (the Chief Minister), Pir Ali Mohammed Rashdi and Haji Moula Bux (members of Mr. Khuhro's Cabinet), and Mir Ghulam Ali Talpur (the former Speaker of the Provincial Assembly), all of whom stood as Moslem League candidates The nomination of Mir Ghulam Ali Talpur, who had been accused in March of conspiracy against the Government (see 14153 A), was regarded as a sign that a reconciliation had taken place between the rival factions in the Sind Moslem League. Kazi Fazlullah, a former Chief Minister who had also been accused of complicity in the March "conspiracy," stood unsuccessfully as an Opposition candidate. The non-Moslem seat was won by Mr. Kripaldas, leader of the Hindu group in the Provincial Assembly.

N.W. Frontier Province (four seats). The four successful candidates, all of whom belong to the Moslem League, were Sardar Abdur Rashid (Chief Minister), Mr Jaffar Shah (Education Minister), Mr. M. R. Kayani (Minister of Works), and Mr Jalaluddin Khan. Khan Abdul Qayum Khan (the former Chief Minister, who stood as an Independent after failing to secure nomination by the Moslem League) and an Awami League candidate were defeated.

Baluchistan (one seat) Dr Khan Saheb (Minister of Communications in the Central Government) was elected, receiving 68 of the 87 votes cast.

Karachi (one seat). Mr. Yusuf Haroon (formerly Pakistani High Commissioner in Australia), standing as the Moslem League candidate, was elected.

Only seven of the 14 members of the Government, therefore, secured election to the Constituent Assembly (Mr. Mohammed Ali, General Mirza, Mr. Suhrawardy, Mr. Mohammad Ali, Colonel Shah, Sardar Amir Azam Khan, and Dr. Khan Saheb). Two (General Ayub Khan and Mr. Ispahani) did not present themselves for election ; four (Dr. A. M. Malik, Mr. Pathan, Mr. Chaudhury, and Mr. Rahimtoola) failed to obtain nomination ; and Sardar Mumtaz Ali Khan was unsuccessful in the voting.

The Assembly met for the first time at the hill station of Murree (Punjab) on July 7 under the chairmanship of Mr. Gurmani (Governor of Punjab and Governor-designate of West Pakistan), who had been nominated as chairman by the Governor-General pending the Assembly's further decision. The session ended on July 14, the following being a summary of the proceedings.

Election of Assembly Chairman. On a motion by the Law Minister, Mr. Suhrawardy, the Assembly decided on July 7 (by 40 votes to 26, with four abstentions) to consider immediately the question of confirming Mr Gurmani's appointment as chairman until the election of a President of the Assembly The Moslem League and the Awami League supported the motion, whilst the United Front Party opposed it Subsequently the Assembly unanimously approved Mr. Gurmani's continued appointment as chairman

Rules of Procedure. On the same date (July 7) the Assembly unanimously passed another motion by Mr Suhrawardy to adopt the rules of procedure of the former Constituent Assembly, with such modifications as the chairman might think fit, pending the adoption of new procedural rules

Representation of States and Tribal Areas. A Bill providing for the representation of States and Tribal Areas in the Assembly, and regulating the mode of election of the eight representatives allocated to them, was passed by the Assembly on July 9 and assented to by the Governor-General on July 11 In accordance with the Governor-General's earlier proposals (see 14232 A), the Tribal Areas and States will be represented by three members, Bahawalpur State by two, and the Baluchistan States Union, the Frontier States, and Khairpur State by one each Of the eight seats, six were filled by election from the respective States, and the two for Bahawalpur State by nomination by the Amir of Bahawalpur. The election and nomination of the various representatives was completed on July 20, when the Wali of Swat (Abdul Haq Jahanzeb) was elected by the Rulers to represent the Frontier States.

Revalidating Bill. The Assembly decided on July 11 to refer to a Select Committee a Bill (moved by Mr Suhrawardy) to validate 36 Acts passed by the old Assembly which had not received the Governor-General's assent and had therefore been considered invalid as a result of the Federal Court's decision of March 21 (see 14121 A), but which had since been provisionally revalidated by the Governor-General (see 14232 A) The Acts included the one inserting Section 92A into the Government of India Act (1935) and thereby permitting the establishment of Governor's rule in a Province ; the Rawalpindi Conspiracy Special Tribunal Act , and the Acts of 1949 providing for the increase and redistribution of seats in the old Constituent Assembly The Bill also sought to validate the Financial Statement for 1955-56, which had already been authenticated by the Governor-General , it did not, however, cover the Act passed by the former Assembly which had inserted Section 223A of the Government of India Act, giving the High Court power to issue writs of *habeas corpus*, etc

Mr Suhrawardy gave an assurance that the Select Committee would consider suggestions made by members during the debate. It was subsequently announced that the Select Committee would meet in Karachi on Aug. 9 under Mr Suhrawardy's chairmanship

Speaker and Deputy-Speaker. A Bill to provide for the election of a Speaker and Deputy-Speaker after the completion of the Assembly's full membership was passed on July 13 The Bill also amended the relevant section of the Government of India Act changing the designation of President of the Assembly to that of Speaker

Members' Privileges. A Bill laying down the rights and privileges of members of the Assembly, including immunity from arrest, was passed on July 14 Mr Suhrawardy (who moved the Bill) accepted an amendment by Sardar Amir Azzam Khan to the effect that no Pakistani citizen should be debarred from membership of the Constituent Assembly unless he had been sentenced to imprisonment for more than two years for an offence involving moral turpitude.

After adopting the Constituent Assembly (Rights and Privileges) Bill, the Assembly adjourned until Aug. 8, when it will re-convene in Karachi.

On July 23 it had been reported that three more Acts of the former Constituent Assembly, which had been invalidated by the Federal Court's decision, had now received the Governor-General's assent, viz., the Indian Independence (Amendment) Act, 1949 ; the Constituent Assembly for Pakistan (Increase and Redistribution of Seats) Act, 1949 , and the Constituent Assembly for Pakistan (Increase and Redistribution of Seats) (Amendment) Act, 1949. With the 35 Acts already approved by the Governor-General under his Emergency Powers Ordinance of March 27 and his proclamation of April 16, the total number of Acts of the former Constituent Assembly which had retrospectively received the Governor-General's assent was increased to 38

Other recent developments in Pakistan are summarized below.

North-West Frontier Province. Sardar Abdur Rashid and his Ministry were dismissed by the Governor of the N W F P. on July 18 This action followed the Chief Minister's sudden intervention in the Constituent Assembly's debate on July 12, when he strongly opposed the formation of West Pakistan under the Central Government's one-unit plan, thereby withdrawing his earlier support for the plan. After Sardar Abdur Rashid's dismissal, Sardar Bahadur Khan formed a new Ministry at the Governor's invitation on the same day (July 18), and on taking office expressed his unqualified support for the one-unit plan Sardar Bahadur Khan is a former Minister of Communications in the Central Government and a brother of the C -in-C and Minister of Defence, General Mohammad Ayub Khan , since November 1954 he had been Agent to the Governor-General in Baluchistan (see 13893 A, page 13896).

Sardar Abdur Rashid's Ministry was the fourth Provincial Ministry in West Pakistan to be dismissed because of its opposition to the one-unit plan. The first was the Bahawalpur State Ministry headed by Mahmud Hassan, the second the Sind Ministry headed by Pirzada Abdus Sattar (see 13893 A), and the third the Punjab Ministry headed by Mr. Firoz Khan Noon (see 14232 A).

The Minister of the Interior (Major-General Mirza) had earlier informed the Constituent Assembly on July 12 that the Central Government had decided to remove the restrictions on Khan Abdul Ghaffar Khan (who had been released from detention in January 1954—see 13354 B) banning him from entering his home Province, the N.W.F.P. General Mirza's announcement followed a statement in the Assembly by Sardar Abdur Rashid (then still in office) to the effect that he was prepared to let Khan Abdul Ghaffar Khan enter the Province and would welcome the removal of the restrictions still imposed upon him.

Khan Abdul Ghaffar Khan, who was reported to have expressed opposition to the one-unit plan for West Pakistan under present conditions, and to have proposed the holding of a referendum on this issue, returned to Peshawar on July 17.

Punjab. A sub-committee of the Moslem League Assembly Party in the Punjab, sitting under the chairmanship of Mr. Dasti (Chief Minister of the Province), decided on June 30 to expel from the party the former Chief Minister, Mr. Firoz Khan Noon, as well as Mr. Muzzafar Ali Qazilbash and Choudhry Ali Akbar (members of the former Noon Ministry) and Raja Ahmad Ali (general secretary of the Provincial Moslem League). The four members, as well as two others about whom a decision was deferred, had been suspended by the Assembly Party on June 22. The sub-committee found them guilty of a "gross and deliberate breach of discipline" and of defying the decisions of the Central Moslem League Parliamentary Board in connexion with the elections of Moslem League candidates from the Province to the Constituent Assembly, the sub-committee also accused them of promoting "insubordination and factionalism" in the party to sabotage the establishment of West Pakistan.

Sind. The ban on the entry into Sind Province of three former Chief Ministers—Pirzada Abdus Sattar, Qazi Fazlullah, and Pir Ilahi Baksh—was lifted by the Sind Government on July 8. It was announced on the same day that the restrictions on the movements of Mr. G. M. Syed, leader of the Awami League in Sind, had likewise been removed.

The Governor-General, Mr. Ghulam Mohammad, issued an Order on July 8 merging the tribal areas lying beyond the Mardan and Hazara districts into the North-West Frontier Province. The Order was made under Section 290 of the Government of India Act, 1935, at the unanimous request of tribal representatives living in these districts, and with the agreement of the Frontier Province Government.—(Pakistan High Commissioner's Office, London - Dawn, Karachi - Times - Manchester Guardian) **(Prev. rep. Constituent Assembly, 14232 A; Frontier Province, 13083 A; Punjab, 14232 A; Sind, 14153 A.)**

A. UNITED KINGDOM. — Destroyers sold to Egypt.

Mr. Nutting (Minister of State, Foreign Office) informed the House of Commons on July 25, in reply to Mr. Patrick Maitland (C.), that H.M. Government had agreed on May 21 to sell to Egypt two "Z" class destroyers from the Reserve Fleet—H.M.S. *Myngs* (1,730 tons) and H.M.S. *Zenith* (1,700 tons). He added that the Egyptian authorities had paid for the vessels and were making arrangements for their refitting in Britain.

When **Mr. Maitland** suggested that the Government should delay the transfer of the destroyers until they had obtained satisfaction for the recent incident in the Gulf of Akaba (see 14335 A), **Mr. Nutting** replied that the refit would take several months at least, and possibly a year.

Mr. Shinwell (Lab.) asked for an assurance that the warships would in no circumstances be used against British ships engaged in open and lawful trading operations in the Suez Canal. **Mr. Nutting** replied that H.M. Government had recently sold two similar destroyers to Israel (see 14321 F), and that they were still applying the policy, laid down under the tripartite declaration of 1950, of providing limited quantities of arms for Middle Eastern States for their legitimate self-defence. When **Mr. Callaghan** (Lab.) commented that the transfers had been agreed to in May but had only been announced in response to a question on July 25, **Mr. Nutting** denied that there had been any attempt at "concealment."

In reply to further questions by **Mr. Fell** (C.) and by **Mr. Herbert Morrison** (Lab.), who criticized the fact that equipment had been transferred to a country which considered itself at war with another State and had fired on British ships, **Mr. Nutting** declared: "We go into these matters extremely carefully before any releases are made, and we seek to preserve a balance. In the case of these destroyers we have preserved a balance. We regard it as important from the point of view of preserving a balance to keep these arms deliveries so far as possible within our hands, and not to get them into the hands of other less responsible Governments in other countries."

In reply to Mr. Dugdale (Lab.), Mr. Nutting said that there was no intention of making further transfers of warships to Egypt or to any other country.—(Times - Daily Telegraph) **(Prev. rep. 14321 F; "Anshun" Incident, 14335 A.)**

B. SIERRA LEONE. — The Freetown Riots. - Report of Commission of Inquiry.

The report was published on June 5 of a commission of inquiry into the causes of serious riots which occurred in Freetown (the capital of Sierra Leone) on Feb. 11-12, during which 17 people were killed and 84 injured.

The riots broke out after a strike by the Artisans' and Allied Workers' Union (which had demanded a wage increase of 10d. a day and had rejected the employers' offer of 6d.) and the Transport and General Workers' Union. Many shops were looted and sacked, a police station burned down, barricades erected, the city's water supply sabotaged, and attempts made by mobs to break into the docks, railway yards, and power station. A European police officer, Mr. W. M. Everitt, was stoned to death while leading his men against the rioters. Troops had to be called out to restore order and were forced to open fire on two occasions. The Governor of the Colony (Sir Robert Hall) imposed a curfew and issued an ordinance giving the police powers to disperse crowds and to arrest anyone found to be carrying firearms.

On Feb. 26 the Governor appointed a three-man commission of inquiry consisting of Sir John Shaw (chairman), formerly Governor of Trinidad, Mr. Justice Acolatse, a puisne judge in the Gold Coast; and Mr. G. G. Honeyman, a lawyer with wide experience of industrial conciliation.

The report of the commission of inquiry—which was unanimous—placed the main responsibility for the strike and its consequences upon Mr. Marcus Grant, the general secretary of the Artisans' and Allied Workers' Union.

The commission found that the workers' case for a wage increase to meet rising costs of living was basically sound, and that the employers had perhaps conceded too little. Grant and his associates, however, had been extravagant in their first claims, and had put themselves in the wrong by refusing to accept arbitration. The commission was convinced that Grant had imposed his will on the members of his union, many of whom were illiterate and were unaware of the machinery provided for arbitration. Moreover, he had exceeded his authority by calling for a general strike, although only two unions were involved in the dispute.

As regards the riots of Feb. 11-12, the commission stated that its main concern had been (*a*) to trace the connexion, if any, between the strike and the riots, and (*b*) to determine whether the amount of force used by the police and the military was excessive. Their findings on the first point were inconclusive; on the second, they entirely vindicated the action of the authorities. There was no foundation whatever for the allegation—made by counsel for the unions—that "wild, indiscriminate and vengeful shooting" had occurred, or that there had been "callous disregard for the lives of unarmed and innocent civilians." The commission found that the police and military had used no more force than the circumstances warranted, and that a European officer who had killed three men and injured a fourth with his Bren gun could not be held blameworthy in the situation with which he was faced. As regards the riots themselves, it was pointed out that the attempt to sabotage the city's essential services had apparently been carried out to a deliberate plan, and that over £11,000 worth of damage had been caused to Government property.

With regard to Marcus Grant, the report said: "It is tragic that within the youthful trade union movement in Sierra Leone so much authority should be concentrated in the hands of a man as ambitious, unscrupulous, and worthless as Marcus Grant. So long as he remains where he is, the interests of the workers, and incidentally of the community at large, will not be well served."

The commission considered that the leader of the other union involved (Mr. H. N. Georgestone, of the T.G.W.U.) had a mistaken sense of loyalty in backing Grant. It added: "Although we cannot exonerate Georgestone altogether, we do not attribute to him a major share of responsibility for the strike and its consequences."

The commission's main recommendations were as follows:

(1) The Government, "as a gesture of good faith and conciliation", should rescind its decision to regard the strike days as an interruption of gratuitable service.

(2) The position and rights of workers in essential services should be made clearer than hitherto.

(3) The Joint Industrial Councils should make a new attempt to reach agreement on the wages issue.

(4) Separate councils should be set up for Government and non-Government employment, with private individuals as chairmen.

(5) Daily wage-earners in Government employment should as far as possible be placed on a weekly or monthly basis to give them a greater sense of security.

The Sierra Leone Government accepted the main conclusions of the report and promised to give serious consideration to its recommendations. It announced that changes would be made in the wage-negotiating structure and that no employees would be dismissed for having taken part in the strike.—(Times - Daily Telegraph - Manchester Guardian - New Commonwealth)

C. AUSTRIA. — Increase in Bank Rate.

The Austrian bank rate was raised on May 20 from 3½ to 4½ per cent.—(Wiener Zeitung) **(Prev. rep. 13721 B.)**

A. UNITED KINGDOM.—Anti-Inflationary Measures. - House of Commons Debate.

The Government's new monetary measures announced by the Chancellor of the Exchequer on July 25 were debated in the House of Commons on July 26.

Mr. Gaitskell, who opened the debate for the Opposition, began by asserting that the Chancellor should have made his statement sooner. Three questions, he said, had to be asked "Is the economic situation so serious that action is necessary? If so, why has it become so serious? Are the Government's measures the right ones?"

The Opposition did not deny the seriousness of the situation, Mr. Gaitskell continued They had made repeated efforts to convince the Government that it was not as good as Ministers appeared to think. The balance of trade figures were bad and the foreign exchange situation weak, the trade deficit had worsened by about £200 million in the last six months alone The Chancellor ought not to try to give the impression that the dock strike (see 14351 A) was the cause of the difficulties Imports in the first six months of this year had been 14 per cent up on last year, a rise which was neither fortuitous nor temporary.

"During the election," he went on, "I said that we were heading for a deficit for the year of at least £100 million. I was accused of being alarmist Does the Chancellor contest that estimate of mine?" After pointing out that American industry was booming, that the terms of trade had not moved sharply against Britain, that the rest of the sterling area was not over-importing, and that there was no increase in the defence burden, Mr. Gaitskell argued that there were three causes of the crisis (1) "A doctrinaire application of what is called Conservative freedom in a situation of brimful employment" (2) "Blatant electioneering" by the Government (3) "Bad and incompetent administration."

Under the first, he instanced increases in dollar imports after relaxation of restrictions, a "free-for-all policy" in the building industry, which put council housing "at the bottom of the queue", and the wage-price spiral The Government, he asserted, had encouraged this spiral by their refusal to do anything about limiting dividends

As regards electioneering, he asked whether the Chancellor really believed that if his statement of the previous day had been made during the election, it would not have seriously affected the result? "In February," Mr Gaitskell continued, "the Chancellor was worried. At the time of the Budget, when an election had been announced, he decided he could give away £150 million a year, most of it to companies and wealthy individuals. He did this solely to give an impression of abounding prosperity Nothing was said about the dangerous situation of our balance of payments, or of coal price increases. We take an extremely poor view of a Government which deliberately deceives the electorate in the way he has done"

As to the charge of incompetence, there was the "extraordinary muddle into which we have got regarding the convertibility of sterling" Mr. Gaitskell asserted that it was well known that rumours that there was to be a floating rate for the £ had existed for some time, with the result that a lot of people had apparently started to sell sterling, thus creating additional difficulties The rumours had apparently started because the Chancellor, according to his own account, had said at a meeting of the O.E.E.C. in Paris that he was opposed to fixed rates of exchange in the event of convertibility.

Mr. Butler, intervening at this point, strongly denied any knowledge of such a statement and asked Mr. Gaitskell to quote the exact words of what he [the Chancellor] was supposed to have said. **Mr. Gaitskell** was unable to do this and, after some heated exchanges, said that he was not criticizing the Chancellor for the substance of what he had said, but because, though pressed to do so by the Opposition a week earlier, he had declined to refute the rumours which, according to the Press, had started as a result of something he had said in Paris. **Mr. Butler** replied. "It is one matter to say there are rumours, which I acknowledge and which we all regret We all wish to defend sterling It is quite another thing to lay a charge at my door and say those rumours were due to me because of a statement I made in Paris" **Mr. Gaitskell:** "If the Chancellor says he made no such statement that, of course, is very satisfactory I only wish he had said this earlier"

Continuing, Mr Gaitskell referred to the Government's decision to sell another $15,000,000 worth of the dollar securities held by it. The total value of these securities was about $2,000,000,000, which meant in effect that Britain's reserves were a great deal larger than was indicated by the figure of the gold and dollar reserves. He therefore asked the Chancellor to consider publishing the amount of the securities, as, by so doing, he would improve confidence in Britain's ability to weather any temporary difficulties in her balance of payments

It had been said (Mr. Gaitskell went on) that the Treasury and the authorities—by which he thought was meant the Bank of England—spoke with different voices on the question of convertibility. The Treasury spoke as if convertibility was something remote, and about which we should proceed with caution; the authorities spoke of it as something "just round the corner." If the Bank of England and the Treasury spoke with different voices, it was a dangerous thing. He asked the Chancellor to comment

After asserting that the Chancellor, when raising the Bank Rate five months ago, had been "deceiving the House and himself about the effectiveness of this instrument," Mr. Gaitskell asked why Mr. Butler had delayed taking direct action to see that his policy worked. On the question of convertibility, he pointed out that bonds owned by non-residents might now be converted at the transferable sterling rate. In consequence, any country in the transferable account area could finance its own dollar imports by converting sterling into dollars in London. There was obviously a great danger of that if dollars became scarce once more, and there were signs of this happening. The Chancellor should say whether he envisaged the present position continuing, and should indicate what he understood now by further steps towards convertibility. He [Mr Gaitskell] had always supposed that this meant the unifying of the transferable rate and the official rate, together with the removal of restrictions on dollar imports in Britain and in the rest of the sterling area. If that was so, was the Chancellor satisfied that Britain could afford to relax dollar import control without seriously affecting her own competitive position in the sterling area's export markets?

Turning to general home restrictions, Mr. Gaitskell said: "The crucial question is this Can the Chancellor cut down spending at home by these general measures in such a way as simply to divert more of our products to exports or in such a way as to reduce our imports directly? Or will these measures and the cutting-back of investment, not merely divert what is being produced but lead to a reduction in the level of production as a whole? The Chancellor should make plain whether he believes that the level of production and employment is now too high, whether it has to be cut back because it involves an increase in imports which we cannot sustain. If he takes that view, I would not deny that credit restriction may well be effective. But if he is hoping to hold the level of unemployment at one per cent, and to maintain the brimful employment economy, how is this going to be achieved by general credit restrictions?"

Mr. Gaitskell asked how the new policy was to be applied to capital investment in roads, housing, education, and the nationalized industries Council houses had already been "cut back," and there were 40,000 fewer under construction than a year ago Other house-building was affected by restriction of loans by the building societies, though the "big man" who had money in reserve could build as he liked without any restriction whatever. Whilst young married people were going to find it more difficult to buy refrigerators and vacuum cleaners, nothing was being done to discourage luxury spending, and the Government's priorities were exactly opposite to those of the Labour Government There had also been "no whisper about dividend limitation," and since the election the Stock Exchange had "gone on even faster with its boom" A "colossal" increase in share prices—of no less than 27 per cent since the middle of March—had brought great capital gains and a great increase in luxury spending. He doubted whether what was now proposed would really make any difference, and said that no real impact had been made upon the Stock Exchange

Mr. Gaitskell concluded "The present difficulties, in contrast to those after the war, are of the Government's own making The Government have allowed inflation here when there has not been inflation elsewhere. They have done so for electoral reasons. The Government's policy of freedom to industry on the one hand, with the removal of all controls and the free-for-all on the other—a policy of 'devil take the hindmost'—is the main cause of the present situation, and their indifference to fair distribution makes it impossible for them to tackle it."

Mr. Butler, in reply, strongly denied that any crisis existed "Mr. Gaitskell, the House, and the nation," he declared, "would be wrong to regard the situation we are facing as one of crisis at all." There was a degree of inflation in which it was necessary to reduce home demand, to get more into exports, and for people to save rather than to spend more. The reception which his statement had had showed that the Government had found about the right balance in the measures they proposed, and the result on the markets had been distinctly favourable

After quoting from his own election broadcast and from the Conservative manifesto, Mr. Butler repudiated Mr. Gaitskell's contention that the Conservatives had attempted to run the election without warning the country of economic dangers. "The major issue before the country today," he declared, "was set out fairly and squarely in the election manifesto of the Conservative Party. The manifesto of the Labour Party said nothing on the subject Not only did we warn the country, but the language used in the manifesto corresponds almost exactly with the language I used yesterday."

The reason for the Government's latest measures had been that the excess of imports had become too great, and he suggested these measures had had an immediate and distinct effect By a combination of monetary and other disciplines, the Government had reduced the trade gap in April-May to £49,000,000, which was almost equivalent to that of a year earlier It was not until they received the June trade figures, with an excess of imports over exports of £129 million, that the Government recognized that it was largely due to the dock strike that these exports had not been sent abroad. A great many imports were taken off the ships, but most of the exports were not sent out. The Chancellor added: "While I have no desire to treat the strikes as an alibi for the fundamental difficulties in our economy, the immediate effect of the dock strike, in particular, was disastrous as regards our trade figures and had an undoubtedly bad result on our situation."

If Labour Members were going to try and claim that industrial unrest and strikes had not set the country back, he would remind them of the unofficial coal strike which had cost 1,000,000 tons of coal. This had to be imported, and so added to the present balance-of-payment difficulties While there were other fundamental difficulties, it was right to emphasize some of the obvious results of industrial unrest, if only to show the desirability of avoiding it in future. "I am not criticizing any particular sections," Mr. Butler said, "but the country must realize that we cannot afford these disputes and cannot afford to hold up our export trade in any way."

Continuing, Mr. Butler said that production had been "almost better" than he had forecast in the Budget The figures for April and May showed that industrial production was four or five per cent above last year's level One of their main difficulties derived from this increased production and enlarged prosperity These were causing Britain to increase her imports of raw materials and, to a certain extent, of food. If Britain was to retain full employment with rising production and increased imports, it was essential to keep down costs and make herself competitive with others. This was one reason why the Government could not tolerate any sign of inflation

Retail trade figures showed that sales of goods (other than food) by large retailers in February-May were about nine per cent higher than in the same four months of 1954. This was a slightly smaller increase than in the fourth quarter of 1954, but it indicated buoyant consumer demand and was another reason why he had had to take action.

Bank deposits had fallen by over £200 million, or about three per cent. "Frankly," Mr. Butler added, "the position about bank advances is quite unsatisfactory If it had been allowed to go on, we could not have said that the credit policy was doing the work we wanted it to do to curb inflation" The rise in advances, however, had partly been due to the needs of the gas and electricity undertakings, and this had clouded and befogged the whole of their operations in the first instalment of the "credit squeeze" Now that the Government had arranged for these undertakings to go on to the market for the money they wanted, he was hoping for a direct result from his policy

The "credit squeeze" (the Chancellor went on) was being operated at a time of almost unrivalled buoyancy in the British economy There was an expansion that had not been seen for years It was most desirable in many ways and it brought a great deal of improvement to many people, and not only to rich people This surge had been so considerably backed by confidence in the Government that it had been a different economic proposition to operate the 'squeeze' against this tide than it was in 1952 "We are going through a period of experimentation in the use of some of these weapons," said Mr. Butler "I am now convinced that, having got the advances to the national sector out of the way, and with the new directive to the Bank of England, the 'credit squeeze' will now operate to the general advantage of the economy."

The question of dealing with the country's economic problems by cutting imports was a difficult one The Government believed that if they indulged in that policy, the retaliation against the export trade would be so severe that Britain would lose the advantage of the advances made in the last 3½ years They had therefore to rely on credit policy As regards dollar import policy, the position broadly was that the Government had now freed from licence about half the U K.'s dollar imports. This dollar policy was sensible and sound. "It is hardly likely," he added, "that we should obtain a response from the United States in freer trade policies and greater opportunities for our goods if we were to go back on this policy."

Reverting to credit policy, Mr. Butler stressed that the Government wanted investment to go on Expenditure by private manufacturing industry on new factory building had risen by about 25 per cent between 1953 and 1954, and there was every indication that this rise was continuing Approvals of new factory building in the first quarter of 1955 were for 23,835,000 square feet—an increase of 65 per cent on the first quarter of 1954. It was because of pressure on the metal-using sector of the economy that he had had to take action on hire purchase, to make sure that the export sector was not prejudiced and that the defence sector could go on He wanted to control the rate of investment, but not destroy investment itself

Dealing with the position of sterling, the Chancellor again denied having made any statement at the O.E E C. meeting in Paris insisting on the door being left open to fluctuating exchange rates in future European currency arrangements. "All that was arranged," he said, "was that we should make provision for some successor mechanism to the European Payments Union." When he reached Paris after the election, he had found anxiety lest the Union should be disbanded if one or more European currencies became convertible. They had the difficult task of trying to plan some future system of European payments and consolidation in the event of there being some currencies which were floating and some which were fixed. It was impossible to have a payments system with monthly payments in these circumstances With considerable ingenuity and under the leadership of the Dutch Government, a scheme of clearing—a new form of payments—had been invented. Settlement of this, he hoped, would be made at the end of the present month, thereby ending rumours.

Continuing, Mr Butler did not deny that he had said that rumours had been harmful to sterling. The Government had been determined to go ahead with a collective approach to a system of freer trade and payments, and such a system would involve not only the Commonwealth but European nations also. In framing such a system of clearing as an alternative to the Payments Union, it was natural that reference should be made to margins and rates, and it was not surprising that the International Monetary Fund already recognized that some movement on either side of a declared parity was desirable and permissible without calling that parity into question. He regretted that rumours should have arisen which had damaged sterling "in the midst of an exercise, the motives of which were above-board and in the interests of Europe as a whole."

On the question of convertibility, the Chancellor declared. "Certain conditions must be fulfilled for the convertibility of sterling:

(1) We must have a strong internal position, and that we are attempting to remedy with the measures announced.

(2) We should have a degree of credit available. I think that would be easy to arrange in the event of convertibility.

(3) There should be wider trade policies, particularly as between the dollar and non-dollar world.

"There can be no doubt about the policy of the Government in relation to the exchange value of the pound It has been, and will continue to be, the maintenance of the exchange parity of $2 80 to the pound, either in existing circumstances or when sterling is convertible. In the long run, that must depend on our efforts"

Dealing with the effect of his new measures on public investment programmes, the Chancellor pointed out that, in general, it would not affect any programme already announced unless a nationalized industry or local authority could, "with reason and without doing any harm," slow it up a bit so that too much was not attempted at once. Coal must have full investment, because it was the major national economic problem at present They must also press ahead with nuclear power for civil purposes, and with oil, if only to supplement the coal resources The railway modernization programme must also go on, not only for the future of the railways but also for the sake of morale among the railwaymen For the roads, however, all that he could permit to go on at present was the programme announced by the Minister of Transport, which was a considerable one In the autumn, or whenever he considered that the economy could bear the strain of an extra road programme, he would review the position.

The nationalized industries themselves (which he had consulted previously) had undertaken to defer certain projects for varying periods of from three to 12 months In the gas industry, these included expansion of carbonization, underground gas storage, and plant for handling coal and coke Four of the Area Boards expected to reduce working capital costs by £1,000,000 in the next six months by reducing stocks of appliances and fittings, whilst three of the Boards would apply internally some superannuation funds which would normally be invested externally. The electricity industry was prepared to defer certain projects, mainly in relation to distribution, as generation could be held up only with danger to the regularity of supply in industry. The electricity industry would also reduce working capital needs by cutting stocks of appliances Like the gas industry, it would apply certain superannuation money to internal needs

As regards local authorities, the Government would not withdraw authorizations already given or cut down specific programmes which had already been announced, such as the recently-announced programmes for schools and hospitals They did not intend to create uncertainty and run the risk of delaying essential work, as might happen if they embarked on a rearrangement of these programmes

The extent of house-building by local authorities had been reduced for a variety of reasons. The Government could not do everything. It had encouraged the development of private building and was adhering to the target of 300,000 houses a year, which was 50 per cent above the target set by the Opposition. The target actually reached under Mr Macmillan had been approximately 350,000 a year, and it was likely to remain at above 300,000 in the immediate future

Mr. Shinwell (Lab.) expressed surprise that no mention had been made of the possibility of some restraint on capital investment on defence **Mr. Butler** replied that the House could take it for granted that the considerable success which the Government had achieved in getting the defence programme within bounds would be maintained and intensified Any examples of waste would be ruthlessly dealt with by the Treasury Already they had had a considerable saving in overseas defence expenditures since the ending of the Korean War He was hoping that, as a result of examinations now taking place, they would be able to examine more closely, and if possible limit, some of the liability arising out of the new situation in respect of the maintenance of British forces in Germany.

Summing up the position, the Chancellor declared: "There is no question of a crisis The British economy is fundamentally sound. It is not the aim of the Government so to conduct financial policy as to cause a large section of the workpeople to become unemployed Our aim is a social democracy fully employed . . There must be more realization of our increased wage costs, and a greater realization that our costs do not compare favourably with Germany or the United States. Several countries in Europe are going through similar problems to ours There is nothing here which can be attributed to gross maladministration by the Government or to lack of foresight. We are dealing with one of the classic British difficulties of combining increasing prosperity, production, and over-full employment, which involves vacancies running into half a million, with balance-of-payments difficulties The attack on inflation, started in February, will be carried on At the same time our exchange policy, despite rumours and the difficulties of carrying with us other nations of Europe and the Commonwealth, will be carried on inflexibly and with the same determination and strength shown hitherto. If we do this, we shall be able to get a synthesis between full employment and the general difficulties in the economy."

Sir Edward Boyle (Economic Secretary to the Treasury) pointed out during the further debate that it was not the practice to disclose details of the assets held by the Exchange Equalization Account, but stated that the Treasury-owned securities were worth less than half of the $2,000,000,000 mentioned by Mr Gaitskell. He also said that there had been no radical change in the policy—followed by Mr. Gaitskell when he was Chancellor—of continuing to hold and manage these securities in the national interest They were not part of the reserves, but should be considered as part of the national block of foreign investments, and in pursuance of this policy it might become appropriate from time to time to sell a number of these securites. In that case the long-run national interest was best served by giving British investors an opportunity to acquire the securities for sterling.

It had been said (Sir Edward continued) that the Chancellor's visit to Paris was a costly affair But it had been the unanimous view of every country represented that Mr Butler should become chairman of the O E E C for a further year. From the political and economic view the conference had done a great deal of good, and Mr Butler deserved the support of the House and the country for the work he had done there The Government did not pretend that there were no problems ahead They believed it better, however, to take essential measures before a crisis developed rather than allow it to develop as in 1951 and engulf the whole nation.

The Labour motion for the adjournment was negatived by 290 votes to 231—a Government majority of 59.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

(Prev. rep. 14332 A.)

Note. The following table was published by the *Financial Times* showing monthly averages of sales of durable consumer goods in the home market

	1955 (first 4 mths)	1954 (first 4 mths)	1953 (year)	1952 (year)
Cars (1)	43,397	31,923	23,446	14,389
Motor cycles	11,060	8,875	7,310	7,340
Washing machines (2)	63,600	40,400	28,400	21,000
Radio sets	90,500	81,500	69,000	55,000
Television sets	98,700	91,800	95,600	67,700
Vacuum cleaners (2)	97,600	58,300	45,300	33,900

Refrigerators (£'000)	529	455	343	231

(1) First six months (2) First quarter

It was pointed out that the increase in production had resulted in larger sales in the home market rather than in a corresponding rise in exports (Financial Times)

A. PAKISTAN. — Report on Inquiry into Assassination of Liaquat Ali Khan.

It was announced in Karachi on June 25 that Mr C. W. E. Uren, the British security expert who had been appointed by the Pakistan Government to investigate the assassination of the late Liaquat Ali Khan on Oct. 16, 1951, had now submitted his report to the Government.

Mr Uren found that "whatever political differences may have existed among Pakistan's leading men, there is no evidence whatsoever to suggest that any one of them was in the remotest way interested in the murder of the Prime Minister" He (Mr. Uren) had made lengthy inquiries into seven "conspiracies," but not one of them had provided any solid basis in fact, and in none of them could any connexion whatever be established between Said Akbar (the assassin of Liaquat Ali Khan), and persons believed to be responsible for these plots In particular, any suggestion that Khaksars were concerned in a conspiracy to murder the former Prime Minister, or to inspire Said Akbar to do so, could be "definitely discounted."

Continuing, Mr. Uren said he was satisfied that Said Akbar had "planned and executed this murder without reference to, or instigation by, any other individual" The evidence was "sufficient to establish that Said Akbar was, in the last days of his life, almost fanatically serious in his attitude towards *purdah* [the Moslem law requiring women to veil their faces] and that he was troubled by the failure of many Moslem women to observe it" Some 18 months before Liaquat Ali Khan's assassination, Said Akbar had returned from a meeting "outraged at the immodesty" of the Begum Liaquat Ali Khan, who was present on the platform without a veil; according to evidence given by his wife, Said Akbar had said that he would have shot the Begum had he been carrying a pistol This remark (Mr Uren said) indicated that Said Akbar was "prepared to take an extreme step to register his protest against the growing emancipation of Moslem womanhood" Moreover, Said Akbar had also been subject to hallucinations and had claimed to have had contact with spiritual forces

Said Akbar, an Afghan living in the Frontier Province, had been immediately killed by the crowd, and by shots from a policeman, after assassinating Liaquat Ali Khan.—(Times)

B. FEDERATION OF RHODESIA AND NYASALAND. — Inauguration of Federal Supreme Court.

The new Federal Supreme Court of the Federation of Rhodesia and Nyasaland was inaugurated at Salisbury on July 1, when the members of the Court were sworn-in by the Governor-General, Lord Llewellin. The ceremony was attended by the Lord Chancellor of England (Viscount Kilmuir), the South African Minister of Justice (Mr. Swart), and the Chief Justice of South Africa (Mr. Justice Centlivres). The Chief Justice of the Federation is Sir Robert Tredgold (the former Chief Justice of Southern Rhodesia), whilst its other members are Sir Arthur Lewey (the former Chief Justice of Northern Rhodesia), Mr. H. J. Clayden (formerly of the Transvaal Division of the Supreme Court of South Africa) and, *ex-officio*, the Chief Justices of Southern Rhodesia, Northern Rhodesia, and Nyasaland.—(Federal Information Department, Salisbury)

C. OBITUARY. — Mr. Cordell Hull.

Mr. Cordell Hull, Secretary of State under President Roosevelt from 1933 to 1944, died on July 23, aged 83.

Born on a farm in Tennessee, the son of a backwoodsman of British extraction, Cordell Hull graduated in law at Cumberland University (Tenn.), was admitted in 1892 to the Tennessee Bar, and subsequently became a Judge of the Tennessee Circuit Court. He saw active service in Cuba during the Spanish-American War, serving as a captain of infantry of Tennessee volunteers.

Cordell Hull joined the Democratic Party as a young man, was elected to the Tennessee State Legislature, and in 1906 was elected to the U.S House of Representatives Specializing in tax problems, he was entrusted by President Wilson in 1913 with the task of drafting a Federal income tax system. During the First World War he gave strong support to the domestic and foreign policies of the Wilson Administration, supported President Wilson's efforts to bring the United States into the League of Nations, and strongly opposed the isolationist trend in U S foreign policy which prevailed after 1918.

After losing his seat in the Republican landslide of 1920, Cordell Hull served for four years (1920-24) as chairman of the National Committee of the Democratic Party, in which capacity he was largely successful in restoring the party's fortunes and status. He was elected as a Senator for Tennessee in 1930, and three years later accepted an offer by President Roosevelt to become Secretary of State Although he had had no previous diplomatic experience, he subsequently achieved wide recognition as one of the most distinguished American Secretaries of State, and remained at the State Department for 11 years throughout all President Roosevelt's administrations.

In the 'thirties Cordell Hull was particularly successful in developing the "good neighbour" policy with the Latin American nations, and was a prominent figure at Pan-American conferences He was also an ardent supporter of international free trade and, despite unfavourable world conditions in the immediate pre-war years, succeeded in negotiating a number of reciprocal trade agreements. After the outbreak of the Second World War he strongly supported President Roosevelt's policy of all-out aid to the Allies, as exemplified in the Lend-Lease Act and the provision of 50 U.S. destroyers for Britain in exchange for bases in the West Indies During the war he took part in the Quebec Conference (August 1943) with President Roosevelt, Sir (then Mr.) Winston Churchill, and Mr. Mackenzie King, and in the Moscow Conference (October 1943) with Sir (then Mr.) Anthony Eden and Mr Molotov.

In November, 1944, Cordell Hull was compelled to retire from the State Department and from active politics on medical advice Although his last months at the State Department were devoted to drafting plans for a post-war international security system in which the U.S A would participate, he was unable to remain in office long enough to witness the inauguration of the United Nations Mr. Hull's preparatory work in establishing the U N was, however, recognized by the award of the Nobel Peace Prize in 1945, and he was publicly referred to by President Roosevelt as the "father" of the United Nations.

Since his resignation Mr Hull had lived in retirement in Washington. His two-volume memoirs were published in 1948

Tributes to the late Mr. Cordell Hull were paid by President Eisenhower and by many foreign statesmen, among them Sir Anthony Eden and Mr. Molotov.—(New York Times - New York Herald Tribune) **(Prev. rep. Mr. Cordell Hull, Resignation, 6953 A; Nobel Peace Prize, 7564 A.)**

D. SIAM. — Cabinet Reorganization.

The following Cabinet changes were announced in Bangkok on Aug. 3: (*a*) the Prime Minister, Field-Marshal Pibul Songgram, took over the portfolio of the Interior in addition to the Premiership and the Defence Ministry; (*b*) the former Minister of the Interior, Vice-Admiral Sunavin Vivadh, became Minister of Co-operatives, whilst the former holder of that post, Admiral Luang Yudhasat Kosol, was appointed Minister of Culture, a post previously held by the Prime Minister; (*c*) Air-Marshal Ronabhakas, hitherto Minister of Communications, was appointed a Deputy Premier, whilst Air-Marshal Vejyant Rangsrit, a former Deputy Premier, took over the portfolio of Communications; (*d*) Lieut.-General Sawai Saenyakorn was appointed Deputy Minister of Communications, and Lieut.-General Ronam Kittikachorn became Deputy Minister of Co-operatives.

Field-Marshal Pibul Songgram had relinquished the portfolio of Economic Affairs (which he held in addition to those of Defence and Culture) on March 24, when he was succeeded as Minister of Economic Affairs by Major-General Siri Siriyothin. (Times - New York Times) **(Prev. rep. 12203 B; 11904 A.)**

E. BELGIUM - PORTUGAL. — Cultural Agreement. - Legations raised to Embassy Status.

A cultural agreement between Portugal and Belgium was signed in Lisbon on Aug. 1 by Professor Paulo Cunha and M. Spaak, the respective Foreign Ministers. On the same date it was announced that the two countries had decided to raise their Legations in each other's capitals to Embassy level.

(La Nation Belge, Brussels)

A. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. — Production and Distribution of Power in Europe. - M. Armand's Report.

The report on intra-European economic co-operation in the production and distribution of power, which had been prepared by M. Louis Armand (now chairman of the *Société Nationale des Chemins de Fer Français*) at the request of the O.E.E.C. Council (see page 14087 first column) was submitted to the Council for its consideration on June 10.

M. Armand said that his report "tried to single out those aspects of power production and consumption which merit attention either because they go beyond the competence of specialized committees, or on account of their general or specific nature, their novelty, or their comparatively remote importance, as no corresponding national or international bodies exist which are capable of dealing with them." The report is summarized below.

Economic Aspects.

Economic theory on matters relating to energy, said the report, had long been dominated by two principles: (1) available supplies must be increased, and (2) resources must be exploited economically These two principles had prevailed in what might be called the "quantitative and technical era." Today, however, there was competition between the main sources of energy and, because of this, economic studies must be increasingly directed towards prescribing their respective spheres The present time might be called the "qualitative and economic era," in which the question of selection became more imperative than that of production. "The point is to extract the maximum kilowatts from a given amount of investment in power-supply schemes, keeping in mind their respective running costs and the technical advantages offered by their method of use."

The report suggested that transport and power problems presented very striking structural analogies The transport industry's problems had become gradually more complex "because they were not isolated from their purely technical aspects in time to be dealt with in a spirit of economic co-operation and co-ordination," and there was "no denying the fact that, because the economic principles that should have governed the development of transport were not grasped at the right time, the general economy has not derived all the benefit that it might have done from the great technical progress achieved." Now that the first signs of the "economic era" had appeared in the realm of power production, it was important that the question of energy "should be restated from an entirely new angle and with an eye to the future, with less accent on technique and the fear of shortage than on economic considerations."

M. Armand pointed out that, as might be expected in the "technical era," much more information was available on production and consumption than on the cost of power. Economic studies were, moreover, confronted with exceedingly complex price structures and the necessity for distinguishing between the real cost of energy and the price charged to the consumer. It could reasonably be asserted, however, that the potential expansion of power consumption in any country might to some extent be measured by the ratio of labour costs to power costs, since its expansion would very largely depend on how far power could economically replace labour. Again, by comparing a worker's wages in any country with the cost of power, it was possible to gauge the efficiency of a country's power supplies, or to show the extent to which power had been "harnessed" in that country. Such an examination enabled the various countries to be roughly classified into three categories: (1) the United States, with power costs very low compared with labour costs; (2) most European countries; (3) the under-developed countries. Compared with his European counterpart, the U S. worker could buy out of his earnings 2-16 times more coal, 3-11 times more fuel oil, 4-13 times more petrol, and 2-9 times more electric power The privileged position of the U.S.A., therefore, was attributable not only to the abundance of power available but also to its cheapness, and it would consequently "be rash to place too great hope in a policy of power expansion if the costs remain high in relation to the cost of labour."

A distinction should also be drawn between "amenity" power, which was used for everyday needs such as heating, cooking, and lighting, and "productive" power, which was used "to activate the production and distribution circuits on which the increase of a country's wealth depends." "Productive" power helped to raise a country's standard of living; "amenity" power served to measure it. If the aim was to achieve once and for all a genuine increase in the wealth of a community, a policy of cheap "productive" power might be applied to such productive processes as would lead to a rise in wages which would then allow "amenity" power to be sold at normal rates. In this case, a rate-fixing policy should be adopted "which would direct cheap supplies towards the more productive uses—just as, in a garden, it is better to water vegetables rather than flowers if a family has to be raised and the supply of water is limited." It would be necessary, however, to work out priorities very carefully.

A good pointer to the way in which a country used its labour force was given by the amount of "productive" power potential available to the individual industrial worker, i.e. "the amount of harnessed power behind the elbow of the worker." In 1953 the power consumed per industrial worker in the U.S.A. and in O E.E.C. countries was as follows (in megawatt-hours):

United States	175
Total for O.E.E.C. member-countries	56
of which:	
Belgium-Luxemburg	97
Western Germany	87
United Kingdom	85
France	68
Netherlands	62
Norway	60
Sweden	49
Denmark	46
Irish Republic	33
Italy	31

On the other hand, if allowances were made for the fact that the energy requirements of countries were affected to a varying extent by climatic and other conditions, figures of "amenity" power consumption served as a yardstick to measure the degree of comfort enjoyed by the population—and here again the U.S.A was well ahead of Europe In 1953 the figures for O E.E.C countries were as follows (in megawatt-hours per inhabitant).

United Kingdom	13 5
Belgium-Luxemburg	7.6
Western Germany	7.3
Iceland	7 3
Netherlands	5.3
Sweden	5.0
France	4.4
Norway	3.5
Irish Republic	3.4
Denmark	2 3
Austria	2 0
Italy	0.7
Portugal	0.4
Turkey	0 2

The report pointed out that neither of the tables took account of the "considerable losses in consumer plant" (i e energy wastage through plant inefficiency, which differed greatly from one country to another) If these losses had been taken into account to arrive at the net energy consumed, the countries would have appeared in a different order In this connexion, the report said that it was worthy of note that between 1920 and 1940 two-thirds of the net increased demand for power in the U.S A. had been covered merely by improving the efficiency of plant.

The transmission of power had also to be examined. Despite the progress made, it was still only convenient to distribute electricity within a radius of about 500 kilometres. Oil could now be transported by pipe-line and tankers and, in terms of calories, its transport was now cheaper than for any other source of energy. Gas was more expensive to transport than petrol if expressed in terms of calories, but heavy bulk transport could be effected over long distances by pipeline

New Facts—Atomic Energy.

"The history of energy resources," the report continued, "is marked by sudden changes, veritable revolutions that constitute important stages in the advance of civilization. It is at times when such trends make their first appearance, at such turning-points in economic history, that it becomes necessary to survey the situation as a whole before deciding on a policy with a view to the future"

One of Europe's first questions must be whether the advent of atomic energy marked a turning-point "The sources of nuclear energy are at present uranium and thorium, supplies of which are abundant . . . It may be regarded as certain that, by the time these supplies have been exhausted, other processes based on nuclear energy will have been discovered and a means found of directly using solar energy" An important point was that, whereas Europe had made no great effort to exploit all its natural resources at the opening of the "oil era," it was at least fully conscious of its geological wealth at the opening of the "atomic era."

Calculations had shown that the cost of producing one kilowatt-hour by atomic power would be about 0 6d. (or 7 millidollars) during the next two years, and would thereafter diminish as technique improved: this was lower than the average cost of generating thermal power in the United Kingdom, although not lower than generating cost in an up-to-date power station fired by coal or fuel-oil Compared with the average cost of building a traditional type of plant in O.E E.C. member-countries ($180 per kW for thermal, and $270 per kW. for hydro, electric stations), the cost of building a nuclear power station ranged between $300 and $400 per kW, although there was every likelihood that in the near future it would settle down between thermal and hydro-electric costs.

One of the more important features of atomic energy was that, because the cost of transporting fissile material would be negligible, power would be able to be produced wherever it was needed—a factor which "may profoundly alter economic geography." Moreover, there seemed to be no reason why Europe and the U.S.A. should not have atomic energy at the same price, and it would therefore be seen that atomic energy offered an even greater opportunity for Europe than for the U.S.A., since power produced from traditional sources was already cheaper in the U.S.A. than in Europe.

The report expressed the opinion that the United Kingdom's atomic power programme (see 14045 A) was "timely and . . . should precipitate a decision in the matter by other European countries." There was, however, "an undeniable case for international co-operation between member-countries of the O.E.E.C." and it was suggested that this could take three forms: (1) the exchange of scientific

knowledge; (2) the supply of fissile materials; and (3) the exchange of technical information and the joint construction and financing of plant. The first two suggestions would appear to be met by the European Organization for Nuclear Research, the European Society for Atomic Energy, and the proposed International Agency for Atomic Energy. As regards the third suggestion, the report stressed that the tremendous technical problems involved clearly called for a co-ordinated approach by all the European interests concerned, as it was only in this way that possibilities in Europe could bear comparison with those in the U.S.A. There was an imperative need, therefore, for the O.E.E.C. to take the lead in achieving such co-ordination.

The first consequence of the dawn of the atomic era, said the report, must be to abolish the fear of any power shortage in the future, and it would "therefore be necessary to abandon the idea that power costs in Europe are linked irretrievably with the price of coal and are therefore bound to rise" At first, traditional sources would naturally still supply a considerable proportion of power, and there would consequently be no need for any profound change in equipment plans in the immediate future "Nevertheless, investment policy will have to be diverted towards a future very different from what was anticipated a few years ago. Instead of 'more and more power,' the slogan will now have to be 'cheap power above all' With regard to European plans for new capital equipment, it must be remembered that it would be particularly advantageous to promote co-operation right at the outset of the atomic era, as it is always easier to co-operate in the new rather than the old."

Traditional Sources of Energy.

M Armand then discussed certain aspects of traditional sources of energy, as follows,

Crude Oil. Most of Europe's supplies of oil had to be imported, and in 1953 imports of crude oil had amounted to about 77,000,000 tons, i e, 97 per cent of consumption. This led to a substantial drain on foreign exchange, including a large amount of dollars Prospecting in Italy, France, the French Saharan territories, and Cyrenaica suggested that substantial deposits of oil-bearing strata might be found, and the report recommended that European co-operation in undertaking further prospecting in Africa might well reap considerable rewards

Natural Gas. This was a particularly valuable form of energy since costs were low and it was a polyvalent fuel (i e it would very easily supply heat, drive machinery, or provide raw materials for a number of chemical industries) The report maintained that natural gas should be regarded as an industrial rather than a town gas, but pointed out that whereas, in the U.S.A., 56 per cent of natural gas output was consumed by industry, in Europe gas had so far been used preferably for domestic purposes.

M. Armand went on to suggest that Europe might find it desirable to draw on sources of gas outside the continent itself. For instance, an American company had put forward a project for supplying about 15 European countries (with an aggregate population of over 300,000,000) with gas brought to them by pipeline from the oilfields of Iraq; in this way, energy equivalent to 6,500,000 tons of coal a year could be made available in Europe at a cost which compared very favourably with present gas-production costs The O E E C might also consider the possibilities of transporting gas liquefied at low temperatures in ships specially equipped for the purpose

Manufactured Gas. After commenting on the success of the "Ruhrgas" project, which enabled a large number of German industries over an extensive geographical area to make use of coal gas, the report emphasized the necessity for giving full consideration to the integral gasification of coal when studying European energy problems.

Electricity. Although technical progress had considerably reduced the amount of coal necessary to generate a given amount of thermal power, the resulting reduction in cost had partly been offset by the rise in the price of coal—a fact which served to emphasize that "coal is a factor making for complexity and inertia in power costs, especially for industrial purposes, in Europe."

As regards hydro-electric power, the report said that it represented a hitherto unexploited source of energy which, if rapidly harnessed, "could serve like an inhalation of oxygen to stimulate some sections of European industry." In this sphere, member-countries might profitably co-operate in studying favourable sites (classified independently of national territories and solely on costs) and in reviewing industries that might be set up near such sites "It is not impossible," the report continued, "to imagine Customs facilities similar to those granted to free ports in respect of deliveries of raw materials and the despatch of finished products Genuine concessions would then be granted in 'European industrial zones' thus constituted, to which countries where power is dear could could transfer some of their industries." Other zones of the same type might be set up around the enormous sources of hydro-electric power in certain African territories. The development of such sites "might, within a very few years, bring Europe substantial additional supplies of cheap power which would enable certain industries to expand and become competitive in world markets."

Coal. Coal represented 80 per cent of member-countries' gross consumption of energy, and it was well known that European coal prices were "a serious handicap." There could be no immediate prospect of a reduction in coal requirements; on the contrary, they were likely to increase and, because of the important bearing on prices of new equipment, modernization plans for certain mines would remain necessary for years to come. Whereas, however, the mining companies' traditional policy had hitherto been dominated by their determination to exploit deposits rationally with a view to maximum output, while at the same time nursing reserves, it seemed as if the moment might have arrived to adopt an 'extensive' policy under which some degree of waste would be acceptable, provided costs were kept down. The same point of view applied to brown coal (lignite), and it might be profitable to work out this source of cheap energy in the next five to ten years

In conclusion, M. Armand suggested that the O.E.E.C. Council should set up a Fuel and Power Economics Committee, comprising a few members specially qualified to deal with matters relating to energy. With the help of experts able to advise on particular aspects, this Committee would keep abreast of economic developments, try to avoid competition between the various forms of energy where this might be to the detriment of the community, stimulate the study of specific problems by working parties, and generally encourage the spirit of co-operation. By this means he hoped that the problem of energy would be studied in terms of general economics "in order that technical progress may be put to the best possible use for improving the lot of each inhabitant of an even more United Europe."—(O.E.E.C. Information Division, Paris)

A. CEYLON. — The Second Six-Year Plan.

The Ceylon Government's second Six-Year Plan for Economic Development was introduced in the House of Representatives on July 18.

An accompanying report stated that the Plan aimed at laying a basis for a cumulative process of growth and expansion, and that it contained a pattern of priorities conforming with this objective. Government investment would be considerable, especially in basic utility services, agriculture, and irrigation and fishery schemes, but in industry direct governmental outlay would be relatively restricted, since it was the Government's policy to encourage private enterprise in this sector of the economy It was hoped particularly to increase total production during the six years by raising the productive capacity of the export industries, by increasing the land under cultivation, by raising the yields of areas already under cultivation, and by improving the earning capacity of other sectors such as fisheries and tourism.

The total cost of the Plan was given as Rs.2,528,786,000 (£189,658,950), to be divided as follows:

	Rupees
Economic Development (76.79 per cent)	
Public utilities	837,621,000
Agriculture, irrigation, and fisheries	922,602,000
Industry	111,799,000
Rural development and village works	57,550,000
Tourism	12,376,000
Social Services (15 93 per cent)	
Health	118,369,000
Education	146,101,000
General housing	105,131,000
Unclassified	33,137,000
Defence (3.74 per cent)	94,623,000
Administration (3 54 per cent),	
Civil administration	41,228,000
Police and prisons	38,120,000
Law and justice	10,129,000

A White Paper presented to the House of Representatives on July 15 explained the Government's policy with regard to private foreign investment in Ceylon. It said that the Government welcomed the entry of foreign capital and that foreign investors would at all times be assured of fair treatment, provided that their objects were not in conflict with the national interest.—(Ceylon Government Information Dept.)

(Prev. rep. First Six-Year Plan, 11349 A.)

B. ITALY. — U.S. Aid for Needy Italian Children.

Under an exchange of Notes which took place in Rome on July 1, Italy and the U.S.A. agreed on a three-year programme of special food supplies for needy Italian children. The agreement provided that the U.S. Government would send 40,000 tons of U.S. surplus foods to Italy in the first year at a cost of $18,000,000, whilst 16,000 tons of food would be contributed by the Italian Government at a cost of 4,000,000,000 lire ($6,400,000). The programme will benefit 1,324,000 needy children in 20,000 asylums, schools, and orphanages, as well as 465,000 poor children in 3,400 summer camps.

(Giornale d'Italia, Rome - New York Times) **(14121 B.)**

C. AFGHANISTAN. — Admission to International Bank and International Monetary Fund.

Afghanistan became a member of the International Bank and the International Monetary Fund on July 14, with a quota in the Fund and a subscription to the Bank's capital stock of $10,000,000 each. Since Czechoslovakia had ceased to be a member of both institutions on Dec. 31, 1954, the admission of Afghanistan restored the membership of each to 57.

(International Bank, Washington) **(13685 F; 13544 D.)**

A. UNITED KINGDOM. — Ban on "Horror Comics." - The Children and Young Persons (Harmful Publications) Act. - Parliamentary Passage and Enactment.

The House of Commons gave a second reading on Feb. 22, without a division, to the Children and Young Persons (Harmful Publications) Bill, which made it an offence (1) to print, publish, sell, or let on hire "certain pictorial publications (known as 'horror comics') harmful to children and young persons"; (2) to import a "horror comic" or "any plate or film prepared for the purpose of printing copies" of such comics.

The Bill applied to "any book, magazine, or like work which consists wholly or mainly of stories told in pictures (with or without the addition of written matter) portraying either (*a*) the commission of crimes; (*b*) acts of violence or cruelty; (*c*) incidents of a repulsive or horrible nature—in such a way that the work would tend to corrupt a child or young person into whose hands it might fall, whether by inciting or encouraging him to commit crimes or acts of violence or cruelty, or in any other way."

The maximum penalty for offences under the Bill was fixed at four months' imprisonment, or £100 fine, or both. The Bill empowered magistrates to issue warrants authorizing police officers to enter (if necessary by force) and search any premises, vehicle, or stall where there was reason to suspect the presence of harmful publications or of plates or films, and to seize any they might find. The forfeiture of such articles might subsequently be ordered by the Court.

The Bill applied to England, Wales, and Scotland, but not to Northern Ireland except as regards the importation of "horror comics" or plates.

Major Lloyd-George (Home Secretary) explained that before introducing the Bill the Government had carefully considered whether the distribution of "horror comics" could be prevented by prosecutions under the law relating to obscene publications. They had found, however, that as the result of judicial decisions the meaning of "obscene" had come to be regarded as restricted to matters relating to sex, and that it was unlikely that publications dealing with horror and violence could be the subject of successful prosecutions under existing law. The Bill did not seek to amend the law relating to obscene publications, which was a much more complicated and controversial subject and which was now being examined

The Home Secretary also explained that the Bill would not apply to publications consisting mainly of reading matter illustrated by pictures, but only to the fully pictorial type of publication of which the "horror comic" was an example There was no serious danger of its affecting other publications, such as the children's "comics" which had been published in Britain for many years Finally, he replied to criticisms which had been expressed outside the House that the Bill disregarded the "intention of the accused," and that it contained no provision for considering literary or artistic merit, or for the admission of expert evidence on these points Major Lloyd-George stressed in this connexion that it would not be practicable to enforce the Bill if the accused's "intention" were made the central issue, since the accused would inevitably deny that he had any intention of corrupting children or young persons Similarly, if the Court were required to pay attention to artistic merit, it would be necessary to define its relevance carefully, since the mere fact that pictures were skilfully drawn ought not to be a defence against proceedings under the Bill

Sir Frank Soskice (Lab) welcomed the Bill on behalf of the Opposition, but thought that the publishers' and sellers' intentions should have been made the relevant test, and that a conviction under the Bill should be dependent on proof that the publication was intended for sale to children or young persons.

An amendment to extend the scope of the Bill to include newspapers (moved by **Mr. Roy Jenkins,** Lab., in the Committee stage) was defeated by 153 votes to 123, but a Government amendment was agreed to in the Report stage to ensure that a retailer should not be convicted if he could satisfy the court that he did not know, and could not reasonably have been expected to know, that he was dealing with harmful publications

The House of Lords gave the Bill a second reading on April 21. In the Committee stage the Government accepted an amendment by Lord Jowitt (leader of the Labour peers) which sought to safeguard scientific and medical publications from the risk of coming within the scope of the Bill by limiting it to "publications of a kind likely to fall into the hands of children or young persons." The amendment was agreed to by the House of Commons, and the Bill was enacted on May 6.

The introduction of the Bill followed widespread demands, both inside and outside Parliament, for legislation to stop the sale of "horror comics," culminating on Nov. 12, 1954, in a deputation (led by the Archbishop of Canterbury) to the Home Secretary from the Church of England Council for Education. A motion expressing "grave concern" at the increase in the sale of "literature of a sordid and horrific nature" had been adopted on Nov. 16, 1954, by the autumn session of the Church Assembly, whilst an exhibition, intended to make clear to the public the true nature of "horror comics," had been staged in London by the National Union of Teachers in November, 1954.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. "Horror Comics," Action in U.S.A., 14295 C; in India, 14281 E.)**

B. WESTERN GERMANY. — Civil Aviation Agreements with Britain and the U.S.A.

Civil aviation agreements between the German Federal Republic and the U.S.A., and between the Federal Republic and Britain, were signed in Washington on July 7 and in London on July 22. Details were as follows.

U.S.-German Agreement. This granted the German *Lufthansa* extensive air rights in the U S A, allowing it to compete with U S. airlines for transatlantic and Latin American passenger traffic. In return, U S airlines were granted "indefinite" permission to fly over routes in Germany which they had hitherto served under a temporary authority

Specifically, the agreement granted *Lufthansa* the right to fly from Western Germany to Boston, New York, and Philadelphia; beyond these cities to any Caribbean or South American country willing to grant it landing rights, to Chicago *via* Montreal, and to San Francisco or Los Angeles on a polar route.

U S. air lines were granted authority to fly (*a*) from the U S A. to Hamburg, and beyond to points in Europe north and east of Germany; (*b*) from the U S A to Dusseldorf, Cologne, Bonn, Frankfurt, Stuttgart, and Munich, and beyond to points in Europe east and south-east of Germany, (*c*) from the U S A to Frankfurt and beyond to points in Europe south and south-east of Germany, as well as to North Africa, the Near East, etc. [Pan-American Airways and Trans World Airlines had been operating the first two routes and part of the third under arrangements with the Occupation authorities, but were no longer authorized to fly from Frankfurt to points beyond]

The agreement may be cancelled by either party after consultation and at a year's notice

U.K.-German Agreement. Under this agreement (which is subject to ratification) the U K granted rights to West German air lines to fly to London, Manchester, Glasgow, and Edinburgh It also granted rights at Manchester on routes to Dublin and North America, at the Bahamas on a route to South America; at Singapore on a route to Australia, and at Kano or Lagos on a route to South Africa Rights between Hong Kong and Japan on a route between Germany and Japan will not be exercised for three years.

In return, the German Federal Republic granted rights to U K. airlines to fly to Hamburg, Hanover, Düsseldorf, Cologne, Frankfurt, Munich, Stuttgart, Nuremberg, and beyond, if desired, to Scandinavia, Prague, Yugoslavia, Austria, Athens, Istanbul, Cyprus and Cairo; also through Frankfurt, Dusseldorf and Munich to the Middle East, Malaya, Indonesia, Hong Kong, the Philippines, Australasia, China and Japan, and to West Africa and South Africa.

The agreement between the U.S.A. and Germany was to have been signed on June 11, but signature was postponed because of strong protests by a number of American airlines against the provision allowing the *Lufthansa* to serve the Caribbean and Latin American routes *via* the U.S.A. in competition with American carriers. The objecting U.S. airlines (which included Pan-American Airways and Panagra) maintained that the concessions made to *Lufthansa* in this respect were far in excess of those enjoyed by U.S. airlines flying into and over Germany. A State Department spokesman, however, declared that the Civil Aeronautics Board and the Civil Aeronautics Administration had decided that no changes were necessary to preserve U.S. national interests, and that the agreement was fair and equitable to both sides.
(New York Times - New York Herald Tribune - Financial Times - Daily Telegraph) **(Prev. rep. 14167 D)**

C. SOVIET UNION. — Return of U.S. Naval Vessels. - Repayment of $7,700,000 on Lend-Lease Account.

It was announced in Washington on April 21 that the Soviet Union had agreed to return to the United States a further 62 small naval vessels obtained under Lend-Lease during the Second World War. The first group of 13 motor torpedo-boats and one submarine chaser were accordingly returned at Kiel on July 2, and a second group of 21 small craft on July 8.

A U.S. naval spokesman at Bremerhaven stated on July 11 that the ships were in such bad condition—and were in any case obsolete—that they would undoubtedly be scrapped. He said that the Russians had informed them that the ships had been beached shortly after the war and had remained in this condition until being refloated for return to the U S. Navy

Of the 186 naval vessels held by the Soviet Union under Lend-Lease, 38 had been handed back in May, 1954, 27 are being handed over in Japan this summer (see 13973 C), 62 are covered by the present agreement, and discussions are continuing over the remaining 59.

The U.S. State Department announced on July 4 that the Soviet Union had recently paid $7,692,766 to the United States, this sum representing interest and principal due on Lend-Lease goods which were in the "pipeline" to Russia when World War II ended. A State Department official said that in 1954 the Soviet Union had paid "about $7,800,000" in principal and interest.—(New York Times) **(13973 C; 13598 D.)**

A. SCIENTIFIC RESEARCH. — The International Geophysical Year. - Plans for World-wide Studies of Natural Phenomena in 1957-58. - Antarctic Expeditions. - British Attempt at Trans-Antarctic Journey. - Permanent Australian Antarctic Station.

Detailed plans were announced early in 1955 for a world-wide co-ordinated study of natural phenomena relating to the world as a whole. The project, in which scientists of 40 nations will participate, will be known as the International Geophysical Year and will cover an 18-month period from July 1, 1957, to Dec. 31, 1958. Each country will plan and execute its own programme under a general plan developed by a co-ordinating committee (the Special Committee for the International Geophysical Year) headed by Professor Sydney Chapman, Fellow of Queen's College, Oxford, and lately Professor of Natural Philosophy at Oxford University The committee's headquarters will be in Brussels, Professor Marcel Nicolet being the executive secretary.

The 40 nations taking part in the International Geophysical Year will include Argentina, Australia, Austria, Belgium, Brazil, Burma, Canada, Chile, Czechoslovakia, Denmark, Finland, France, Germany (East and West), Great Britain, Greece, Hungary, India, the Irish Republic, Israel, Italy, Japan, Mexico, the Netherlands, New Zealand, Norway, Pakistan, Peru, Siam, South Africa, the Soviet Union, Spain, Sweden, Switzerland, the United States, and Yugoslavia Of the principal countries of the world, only China has so far not announced her intention of taking part in the project

Intensive investigations—the most comprehensive of their kind ever undertaken—will be made in many parts of the world into problems of meteorology and climatology, latitude and longitude determination, geo-magnetism, gravity measurements, ionospheric physics, auroras and airglow, solar activity, cosmic rays, glaciology, oceanography, seismology, and rocket exploration of the upper atmosphere. For the purpose of these studies the world will be divided into six areas—the Antarctic, the Arctic, the Equatorial zone, and three regions running longitudinally from the North to the South Pole so as to include the world's largest land masses: (*a*) North and South America, (*b*) Europe and Africa, and (*c*) the Soviet Union, Asia, and Australia.

Over 20 observation stations will be established by 11 countries on the Antarctic continent, where investigations will be carried out on a scale hitherto unknown in the South Polar regions. In the Arctic regions, similar stations will be established in Alaska, the Canadian Arctic, Greenland, and the Soviet Arctic. Widespread researches into the upper atmosphere will be carried out in many parts of the world by thousands of instrument-carrying balloons and scores of rockets. They will include the U.S. space satellite project (see 14337 A), as well as rocket launchings by U.S. scientists in New Mexico, by Canadian scientists in the Arctic, by British and Australian scientists at the Woomera range in South Australia, and by French scientists in the Sahara.

The aims and purposes of the International Geophysical Year were explained in a B.B.C. broadcast in February last by the British Astronomer-Royal (Sir Harold Spencer Jones), who described it as "the largest scheme for international co-operation in science that has ever been planned."

Sir Harold recalled that in 1882-83 many countries had co-operated in an International Polar Year during which observations were made at temporary stations in Arctic regions and co-ordinated with those made at permanent observatories in lower latitudes A second International Polar Year was organized in 1932-33, during which an extensive programme of observations was also carried out in high latitudes. The data collected during these two Polar Years had provided much important information about the weather of the North Polar area, variations in the earth's magnetic field at different latitudes, and other problems

Latterly, it had been suggested that a third Polar Year should be organized for a concerted attack on many scientific problems whose solution was needed. This proposal had been approved by the International Council of Scientific Unions, which had widened the scope of the scheme to cover the entire world, and which had given it the title of the "International Geophysical Year." Sir Harold explained that the 18-month period chosen (July 1, 1957, to Dec. 31, 1958) had one great advantage. "By 1958 the sun's activity should be at or near a maximum Large [sun] spots, as well as bright eruptions, are likely to occur frequently, so permitting the terrestrial effects associated with these phenomena to be studied The second Polar Year, on the other hand, came at a time of minimum [solar] activity."

After describing the investigations to be made into the relationships between solar and terrestrial phenomena, Sir Harold continued. "Special methods of observation will be used to supplement observatories from the ground Balloons . . . will be widely used and will carry recording equipment that will telemeter information back to the ground. They will provide information about the density, pressure, and temperature of the atmosphere, and about the velocities of the wind at different heights . . Important additional data will be obtained by the use of rockets, which can carry 150 lb. of equipment to heights of 125 miles . The rocket observations will also contribute information about cosmic rays Photographs of the earth's surface from balloons and rockets will give information about the distribution of cloud, snow, and ice over large areas of the globe . .

"Three regions of the globe are of special importance in geophysical investigations the Arctic, the Antarctic, and the Equatorial belt. The Antarctic, a large continent covered with a huge mass of ice, is the coldest and windiest region of the globe. Its importance for world weather . . must be very great The Aurora Australis has hardly been studied at all, and the southern zone of maximum auroral frequency has not been properly mapped It is important to find out if the Aurora Australis differs in its characteristics from those of the Aurora Borealis The long winter of the Antarctic continent, with a prolonged absence of sunlight, will enable the physical characteristics of the ionosphere to be studied . . . Eleven stations on the [Antarctic] continent, and ten on the surrounding islands, have been planned, or are already in operation. It is hoped that arrangements can be made for a further eight stations. Never before will the Antarctic have been so well populated

"The Arctic region is favourably situated for observing the auroral zone. Much of it lies in or adjacent to Soviet territory, and it is gratifying that the Soviet Union has agreed to co-operate fully in the observations made during the Geophysical Year. Greenland is a region of special interest, as it lies within the auroral belt and extends from the North Magnetic Pole almost to that belt It is hoped that several stations will be established in Greenland.

"The Equatorial region is an important one for investigating the earth's magnetism, the ionosphere, the airglow, and cosmic rays. . . Airglow is the faint intrinsic light of the night sky, whose brightness depends upon the latitude and upon the sunspot cycle . . Its relationship with the aurora, if any, needs investigating . . During the Geophysical Year, chains of stations will be established along the three meridians of 80 deg West, 10 deg. East, and 140 deg. East, which have been selected because they pass through or near major land masses Observations at these stations will be combined with data from balloons and rockets to provide information for the study of the circulation of the atmosphere . . .

"For some purposes it is desirable to have simultaneous observations of all inter-related phenomena, so two days in each month, to be known as Regular World Days, have been selected for concentrated observations at all stations. One of these days will be at new moon, the other at or near quarter moon. Some additional World Days have been added because of an eclipse of the sun or of expected meteoric activity. For the investigation of atmospheric movement some periods longer than a day are necessary, so during each quarter an interval of ten consecutive days, to be known as a World Meteorological Interval, has been selected for intensive meteorological observation"

An International Antarctic Conference, which ended in Paris on July 10, reached full agreement on the allocation of sites for the bases and observatories of 11 countries which will send expeditions to the Antarctic during the International Geophysical Year—Great Britain, the United States, the Soviet Union, Australia, New Zealand, France, Norway, Belgium, Japan, Argentina, and Chile. Details were as follows:

U.S.A.—six bases, (1) on the Knox Coast, in Australian Antarctica; (2) in McMurdo Sound, on the Ross Sea, (3) at Little America, the base established by Rear-Admiral Byrd in earlier expeditions; (4) in Marie Byrd Land, (5) at Vahsel Bay, on the Weddell Sea, (6) in the vicinity of the South Pole. **Soviet Union**—three bases, (1) on the Knox coast, near the U.S base, (2) midway between the first base and the South Pole; (3) in the vicinity of the Pole **Great Britain**—a base at Vahsel Bay. **Australia**—bases at Mawson, on the coast of MacRobertson Land (see below), and further inland. **New Zealand**—a base at McMurdo Sound. **France**—bases in Adélie Land (French Antarctica) and further inland. **Norway**—a base in Queen Maud Land (Norwegian Antarctica). **Belgium**—a base in Queen Mary Land, near the Knox coast **Japan**—a base on Peter I Island, in the Bellinghausen Sea **Argentina**—a base at Vahsel Bay, together with the existing Argentine bases in the Antarctic. **Chile**—existing Chilean bases in the Antarctic.

The British Antarctic Expedition, in co-operation with the New Zealand Expedition, will attempt to cross the Antarctic continent from one side to the other *via* the South Pole, a feat never before attempted. These and other plans are described below.

British and New Zealand Expeditions. The British Expedition will be led by Dr Vivian Fuchs (46), director of the Falkland Islands Dependencies Scientific Bureau, and geologist to the Cambridge East Greenland Expedition in 1929 Using tracked vehicles and dog-teams, it will start from the British base at Vahsel Bay, drive directly inland in a straight line to the South Pole, cross the high Polar plateau, and skirt the mountains at the southern end of the Ross Ice Shelf For some 200 miles the route will follow that taken by Captain Scott to the Pole in 1911-12, but instead of turning into the Beardmore Glacier (as Scott did) it will continue inland in a direct line towards South Victoria Land, thence eastwards to the Ferrar Glacier, and so on to the New Zealand base on McMurdo Sound The Expedition, if successful, will thereby have crossed the Antarctic Continent from east to west—a distance of 1,750 miles —after traversing vast areas never before seen by man.

The New Zealand Expedition will be led by Sir Edmund Hillary, who, with the Sherpa Tensing, successfully climbed Everest in 1953. Starting from its base on McMurdo Sound, it will strike inland for some 300 miles, laying depots and supply bases for the use of the British Expedition It is planned that the N.Z. Expedition will link up with the British Expedition during the latter's journey from the South Pole to McMurdo Sound Sir Edmund and other members of the N.Z. Expedition will reconnoitre South Victoria Land to establish the most suitable places for laying depots.

The joint Trans-Antarctic Expedition will cost £250,000, of which £100,000 will be contributed by the British Government, £50,000 by the New Zealand Government, and the balance by private subscription. A company (Trans-Antarctic Expedition Ltd.) "to promote and organize an expedition for the exploration of the Antarctic" was formed in London in June. Its sponsors include Dr. Vivian Fuchs, Marshal of the R.A.F Sir John Slessor, the Bishop of Portsmouth (Dr Fleming), who was chaplain and geologist to the Graham Land Expedition of 1934-37, and Mr. James Wordie, Master of St. John's College, Cambridge.

[The South Pole has so far been reached on only two occasions on Dec. 15, 1911, by five members of the Norwegian Expedition (Roald Amundsen, Olav Bjaaland, Hilmer Hansen, Sverre Hassel, and Oscar Wissing), and on Jan. 17, 1912, by five members of the British Expedition (Captain Robert Falcon Scott, Dr Edward Wilson, Capt Lawrence Oates, Lieut Henry Bowers, and Petty-Officer Edgar Evans), all of whom perished during the return journey to their base at McMurdo Sound.]

American Expedition. The U.S Antarctic Expedition will be led by Rear-Admiral Richard E. Byrd (66), who led previous expeditions to the Antarctic in 1928, 1934, 1939, and 1947, and who has mapped over 1,000,000 square miles of Antarctica by aerial reconnaissance A White House statement (March 28) said that the Expedition would "conduct scientific studies in meteorology, glaciology, ionospheric physics, geo-magnetism, aurora and airglow, cosmic rays, seismology, and gravity measurements," and that it would include several ships and aircraft As stated above, one of its six bases will be established near the South Pole.

Soviet, French, and Norwegian Expeditions. The Soviet Expedition, under Professor Vladimir Balusov, will employ transport planes, helicopters, and tractors, as well as a specially-fitted icebreaker. Like the U.S. Expedition, it will have a base near the Pole.

The French Expedition, under M. Paul-Emile Victor, plans *inter alia* to establish a base at the South Magnetic Pole.

The Norwegian Expedition, led by Hr. Nils Schumacher (a member of the U.K.-Norwegian-Swedish Antarctic Expedition of 1949-52) will carry out extensive survey and meteorological work in Queen Maud Land

British Antarctic Aerial Survey. The British Colonial Office announced on June 7 that an aerial survey of Graham Land and adjacent islands of the Falkland Islands Dependencies would start towards the end of the present year and continue throughout the Antarctic summer (1955-56) It was stated that it was hoped to produce "a mosaic of air photographs of some thousands of miles of the most hazardous terrain in the world to fly over", that it was also hoped to obtain valuable information in assessing the scientific and mineral potentials of the area, and that a contract for the survey had been given to a U.K. company, Hunting Aero-surveys Ltd. The survey will have its headquarters at the British meteorological base on Deception Island.

A ten-man Australian Antarctic Expedition, led by Mr. Philip Law (director of the Antarctic Division of the Department of External Affairs), established a permanent scientific base in MacRobertson Land (part of the Australian Antarctic Territory) on Feb. 14, 1954. The base was named Mawson in honour of Sir Douglas Mawson, the famous Australian antarctic explorer. The expedition subsequently reconnoitred Princess Elizabeth Land (400 miles east of Mawson), where the Australian flag was hoisted in latitude 68½ deg. south, longitude 77½ deg. east. The Mawson base—the nearest inhabited settlement to the South Pole, being in 67½ deg. south and 65 deg. east—will be used by the Australian expedition during the Geophysical Year, as stated above.

The Australian Minister for External Affairs (Mr. Casey) had pointed out during 1953 that the Australian Antarctic Territory covered a vast area of 2,742,000 square miles, almost as large as Australia itself. He emphasized that it was important for strategic reasons that an area so close to Australia's "back door" should remain under Australian control, since no-one could predict what importance it might assume during the next 50 years After announcing that a permanent scientific station would be established in the Australian Antarctic (as was subsequently done at Mawson), Mr. Casey pointed out (*a*) that it was possible in the future that aircraft flying between South America or South Africa and Australia would take the short route over the Antarctic; (*b*) that big deposits of coal had been discovered in Antarctica, whilst other valuable minerals were known to exist there; (*c*) that the possibility of uranium deposits should not be overlooked, in view of the geographical similarity of the Australian Antarctic to parts of Australia where uranium had already been found; (*d*) that great food resources—whales, fish, seals, seabirds, and plankton—awaited exploitation in the Antarctic seas, to which the world might soon be obliged to turn, (*e*) that weather forecasts in Australia could be improved by collection of meteorological data from the Antarctic. For all these reasons it was essential that Australia should have effective control of her Antarctic territories.

It was announced by Mr. Casey on Jan. 9, 1955, that a hitherto unknown range of 10,000-ft. mountains, largely ice-free and extending for more than 100 miles, had been discovered in the Australian Antarctic by an exploring party. They were believed to offer possibilities for future mineral prospecting.—(Times - Daily Telegraph - Manchester Guardian - The Listener - New York Times - New York Herald Tribune - Le Monde, Paris - Australian News and Information Bureau - N.Z. Directorate of Information Services, Wellington)

A. WESTERN GERMANY. — Slovak Emigré Leader assassinated in Munich.

Dr. Matus Cernak, a Slovak nationalist émigré leader living in Munich, was killed on July 5 by a bomb which was enclosed in a parcel addressed to him. The explosion, which occurred at a post office in a Munich suburb, also caused the deaths of two people and injuries to 12 others.

Dr Cernak had been a leading member of the group of Slovak separatists, headed by Mgr Tiso, which collaborated with the Germans before and during the war He was Minister of Education and leader of the "Hlinka Youth" in the autonomous Slovak Government formed after the Munich Agreement of 1938 When the Germans occupied Prague and Slovakia was declared independent under Mgr. Tiso's Presidency, Dr Cernak became Slovak Minister in Berlin, a post he held from 1939-45. After the war, when Mgr Tiso was tried and executed as a traitor in 1947, Dr. Cernak escaped to Germany. He subsequently re-emerged as a Slovak émigré leader, being a member of the Slovak National Committee in Germany and head of a Slovak institute in Munich. His group was opposed not only to the Communists but also to the concept of a united Czecho-slovak Republic and to the Slovak Liberal and Socialist parties In a trial held at Bratislava in June, the prosecutor had named Dr Cernak as director of an anti-Communist espionage organization which, he alleged, was plotting the overthrow of the present Czechoslovak Government

In spite of a nation-wide search for a man who was found to have posted the parcel with the bomb in Frankfurt, the police failed to trace the persons responsible for Dr. Cernak's assassination.—(Frankfurter Allgemeine Zeitung - Times)

B. YUGOSLAVIA - UNITED KINGDOM. — Joint Naval Exercises.

Four British destroyers (including the *Agincourt, Barrosa,* and *Corunna*), two submarines (the *Sanguine* and *Seneschal*), and a frigate, arrived at Split on July 15 to take part in the first combined exercises to be held with a Yugoslav naval squadron, the latter consisting of a destroyer, patrol ships, and motor torpedo-boats. The exercises, which were primarily in defensive tactics against attacks by submarines and high-speed torpedo-boats, ended on July 31.

(Tanjug Agency, Belgrade - Times)

C. CHINA - NEPAL. — Diplomatic Relations.

An agreement was signed in Delhi on Aug. 1 by Sardar Gunjman Singh, principal adviser to the King of Nepal, and Mr. Yuan Chung-hsien, Chinese Ambassador to India, establishing normal diplomatic relations between Nepal and the People's Republic of China. It provided that the Nepalese and Chinese Ambassadors in Delhi would be accredited to China and Nepal respectively as well as to India. The last treaty between Nepal and China was signed in 1792. It was abrogated in 1908 after the fall of the Manchu dynasty in China.

(Times)

D. ITALY. — New Chief of Naval Staff.

It was announced in Rome on Aug. 3 that Vice-Admiral Corso Pecori Giraldi had been appointed Chief of Italian Naval Staff in succession to Admiral Emilio Ferreri, who was recently appointed head of the Armaments Control Agency of W.E.U. (see 14237 A). Admiral Pecori Giraldo (56), who commanded the battleship *Vittorio Veneto* during the Second World War, was Deputy Chief of Naval Staff from 1947-50, and C.-in-C., Adriatic Command, since 1951.—(Giornale d'Italia, Rome)

(Prev. rep. 9684 E.)

E. NICARAGUA. — Currency Devaluation.

The International Monetary Fund announced on July 1 that it had agreed to a new par value for the Nicaraguan cordoba at the rate of 7 cordobas to the U.S. dollar, instead of 5 to the dollar as hitherto. Other parities would be 1 cordoba = 14.2857 U.S. cents or 0.126953 grams of fine gold.

A. UNITED KINGDOM. — Further Dock Strikes. - Dispute between National Amalgamated Stevedores' and Dockers' Union and Transport and General Workers' Union. - Time Lost through Disputes in 1954.

A further dock strike, involving at its height about 20,000 men and rendering idle some 175 ships, began on May 23 in London and the northern ports of Liverpool, Birkenhead, Manchester, and Hull. It continued for six weeks, its consequences being severely felt in the export trades. The stoppage —in reality a continuation of the earlier dispute between the National Amalgamated Stevedores' and Dockers' Union and the Transport and General Workers' Union—had been called by the N.A.S.D. executive in support of a demand for representation on the joint negotiating committees at the northern ports, from which the N.A.S.D. is excluded. The progress of the strike, which was entirely unsuccessful in effecting its object, and during which the resignation was announced of Mr. Barrett, general secretary of the N.A.S.D., is summarized below.

The decision of the N.A.S.D. executive to call the strike was taken on May 12 and was endorsed by mass meetings at London, Hull, Merseyside, and Manchester. Meanwhile, the T.G.W.U. executive had appealed to the union's members to take no part in the threatened stoppage, and had warned them that "failure to stand by industrial agreements can only result in anarchy." On May 17 Sir Walter Monckton (the Minister of Labour), in an effort to avert the strike, met representatives of the port employers and of the T.U.C.; both bodies, however, declined to intervene, the former stressing that it was for the port workers themselves to decide who should represent them on the port joint committees, and the T.U.C. pointing out that the N.A.S.D. had been suspended from affiliation for alleged "poaching" of members from the T.G.W.U. Although a meeting took place on May 18 between N.A.S.D. leaders and the general purposes committee of the T.U.C. General Council, the committee refused to discuss the dispute unless the N.A.S.D. agreed to return to the T.G.W.U. the members allegedly "poached" from it at the northern ports in 1954, and also promised to cease "poaching" in future, to abide by T.U.C. rules, and to accept the findings of a "disputes panel" to be set up by the T.U.C. General Council. These terms were rejected by the N.A.S.D. on May 19, whereupon the T.U.C. issued a statement condemning the threatened strike and appealing to all dock workers to refuse to support it.

At the end of the first day of the stoppage (May 23) it was officially stated that over 18,000 dockers and stevedores had stopped work at the ports affected (6,000 at London, 9,000 at Liverpool and Birkenhead, 2,000 at Hull, 1,400 at Manchester, and 200 at Garston), and that about 86 ships had been rendered completely idle. The number of strikers increased gradually during the next ten days, until by June 3 a total of 19,976 men (about two-fifths of the total labour force at the ports) and 166 ships were idle. On that day, however, Mr. Richard Barrett, general secretary of the N.A.S.D., urged the London strikers to return to work, and Mr. Newman, the assistant general secretary, declared that the dispute could only be settled through T.U.C. machinery. In accordance with a decision taken at an N.A.S.D. delegate conference, held in London on June 6, Mr. Newman wrote to Sir Vincent Tewson (general secretary of the T.U.C.) asking for a clarification of the terms on which the latter body would allow the claim to be submitted to its disputes machinery. Sir Vincent replied on June 8 that the T.U.C. was prepared to re-admit the N.A.S.D. to membership (thus enabling the dispute to be submitted) on condition that the union agreed (1) to stop accepting members in ports where it had no membership before Aug. 17, 1954, (2) to discontinue collecting subscriptions from ex-T.G.W.U. members at the northern ports; (3) to respect the decisions of the T.U.C. disputes committee when given. These terms were rejected by the N.A.S.D. executive, and on June 10 Mr. Newman announced that the N.A.S.D. would continue to regard the 10,000 men recruited at the northern ports as its members until the disputes committee had heard the union's case and given its decision, in the meantime, the strike would continue. On the same day the full N.A.S.D. executive issued a statement dissociating itself from Mr. Barrett's earlier appeal to the strikers to return to work.

After the port employers had again declined to take part in the dispute, and after a request for the Minister of Labour's intervention had been refused, the N.A.S.D. executive decided on June 16 to accept the T.U.C.'s terms and to submit the union's claim to a disputes panel; the T.U.C. had meanwhile agreed that N.A.S.D. "recruits" at the northern ports should remain in the union until the disputes panel had announced its decision. On June 21 it was announced that the disputes panel would consist of Mr. C. J. Geddes (chairman of the T.U.C. General Council), Mr. E. Jones (president of the National Union of Mineworkers), and Mr. J. Crawford (president of the National Union of Boot and Shoe Operatives).

The news that the T.U.C. contemplated readmitting the N.A.S.D. to membership was followed on June 21 by an overwhelming vote of London strikers in favour of calling off the stoppage on June 27. Strikers' meetings at the northern ports, however, decided on June 22, against their leaders' advice, to continue the strike. Later on the same day Mr. Barrett announced his resignation from the position of general secretary, and two other N.A.S.D. officials, Mr. Newman and Mr. G. Hern (secretary of the dockers' section), announced that they would not seek re-election when their terms of office expired on June 30.

Before beginning its hearings on June 24, the T.U.C. disputes panel appealed for a resumption of work "to enable full and proper consideration to be given to the dispute." This appeal, however, was disregarded, and although a gradual return to work had taken place in the Port of London for some days (over 600 men having returned at the Royal Docks within a week), a march of several hundred strikers from the northern ports through parts of the London dock area on June 27 was instrumental in persuading the bulk of the London men to continue the strike.

The disputes panel concluded its hearings on June 27 and published its report on June 30, its findings being as follows:

(1) Both the N.A.S.D. and the T.G.W.U. had broken the "Bridlington agreement" by "poaching" each other's members.

(2) Whereas the T.G.W.U., however, had broken the agreement in London only, the N.A.S.D. had broken it in London, Hull, Liverpool, Birkenhead, and Manchester.

(3) The N.A.S.D. had no right to have members in the northern ports, and therefore had no right to representation on local joint negotiating committees in those ports.

(4) The N.A.S.D. must "exclude from membership" all the 10,000 men recruited in the northern ports in 1954.

(5) The two unions should meet as soon as possible to arrange their future relations on the basis of the "Bridlington" principles.

(6) In consequence of these findings, there was no reason why the strike should continue, and the strikers should return to work forthwith.

The N.A.S.D. executive announced on July 1 that, in view of the disputes panel's findings, all members would be instructed to resume work on July 4, and that the 10,000 former members of the T.G.W.U. would be "surrendered."

It was subsequently explained that this decision had been reached by the six London members of the executive, who claimed that they alone were entitled to vote and that the six members co-opted from the northern ports—who had voted against the resumption of work —had no constitutional authority to do so. Although the executive's decision to abandon its claim aroused strong protests from a comparatively small number of dissatisfied elements at the northern ports, strikers' meetings at Liverpool, Birkenhead, Manchester, and Hull voted on July 3 by overwhelming majorities to resume work immediately.

The strike was unofficially estimated to have cost over 600,000 working days and more than £1,250,000 in wages. On July 2 Sir Walter Monckton had emphasized its serious effects on exports of cars, motor cycles, bicycles, cement, tractors, farm machinery, and electrical equipment.

Sir Walter Monckton had announced in the House of Commons on April 21 that he proposed to appoint a committee to inquire into the working of the dock labour scheme and to advise what alterations, if any, should be made in the terms of the scheme.

On July 28 he announced that the committee would consist of Mr. Justice Devlin, as chairman; Mr. J. A. Birch (general secretary, Union of Shop, Distributive, and Allied Workers); Sir Frederick Rees (vice-president of the University College of South Wales and Monmouthshire); Professor J. G. Smith (formerly Vice-President of the University of Birmingham); and Mr. A. B. Waring (chairman and managing director, Joseph Lucas Ltd.).

The National Dock Labour Board, in its annual report for 1954 (published on May 2, 1955), gave the number of man-days lost through industrial disturbances during the year as 714,569, or more than in any year since the introduction of the dock labour scheme in 1947. Over 90 per cent of the time lost was attributable to the overtime dispute in the Port of London in October last, and to the supporting action which took place at certain other ports.—(Times - Daily Telegraph - Manchester Guardian - Ministry of Labour Gazette) **(Prev. rep. 13970 A.)**

B. UNITED STATES. — Wage Increases for Postal Workers and other Federal Employees.

President Eisenhower signed a Bill on June 10 granting wage increases averaging 8 per cent to 50,000 postal workers, with retroactive effect to March 1. The Bill, which was estimated to cost $163,000,000 a year, also reorganized the existing wage structure in order to provide greater incentives. Two earlier Bills designed to raise the wages of postal employees had been vetoed by the President.

Another Bill, signed by President Eisenhower on June 28, provided for wage increases averaging 7.5 per cent for more than 1,000,000 Federal Government employees other than postal workers. The increases, which were the first general rises granted since 1951, were estimated to cost about $325,000,000 a year.—(New York Times) **(Prev. rep. 14114 C.)**

A. MALTA. — Constitutional Relationship with Britain. - London Discussions. - Forthcoming Round-table Conference. - Maltese Proposals for Representation at Westminster.

The discussions on the future constitutional and economic relationship between Malta and the United Kingdom opened in London on June 20 and concluded on July 13. The Maltese delegation comprised representatives of the Malta Labour Party (led by Mr. Dominic Mintoff, the Prime Minister) and the Nationalist Party (led by Dr. Borg Olivier, leader of the Opposition), whilst the British representatives included Mr. Lennox-Boyd (Colonial Secretary), Mr. Hopkinson (Minister of State, Colonial Office), Mr. Wingfield Digby (Civil Lord of the Admiralty), Mr. Fitzroy Maclean (Under-Secretary for War), and officials of the Treasury, Home Office, Admiralty, War Office, and Commonwealth Relations Office.

The Malta Labour Party's delegation consisted of Mr. Mintoff, Mr. Cole (Minister of Posts and Agriculture), Professor Mamo (acting Attorney-General), Mr. Cuschieri (Treasurer), and Mr. Cremona (general secretary of the party), whilst the Nationalist Party's delegation comprised Dr. Borg Olivier, Dr Azzopardi, Dr. Felice, and Dr. Ragonesi The Progressive Constitutional Party, led by Miss Mabel Strickland, did not take part in the conversations in view of the Colonial Secretary's decision that they would be restricted to parties represented in the Malta Legislative Assembly [The Progressive Constitutionalists failed to return any candidates in the recent Maltese general elections—see 14120 B]

During the conference Sir Anthony Eden informed the House of Commons on July 6 that H.M. Government proposed to convene a round-table conference later in the summer, comprising representatives of all the political parties at Westminster, to consider constitutional questions arising from proposals made by the Prime Minister of Malta for a closer association between Malta and the United Kingdom—including the possibility of Maltese representation in the British Parliament. Sir Anthony Eden's statement was as follows :

" In the discussions which he has been holding with the Colonial Secretary, the Maltese Prime Minister has put forward proposals for a closer association between Malta and the United Kingdom. H M. Government welcome this initiative They feel sure that in all parts of the House there will be a sympathetic response to the suggestion that the two peoples should draw more closely together

The administrative and financial aspects of these proposals are at present under discussion with the Maltese Government delegation On the constitutional side, there is included a proposal that Malta, while retaining its own Legislative Assembly, should in future be represented in the Parliament at Westminster The Government feel that all sections of political opinion in Parliament should have an opportunity to consider and express their views upon a new constitutional development of such importance They therefore propose to convene a round-table conference, comprising representatives of all the political parties at Westminster, to consider constitutional questions arising from these proposals

This conference will meet during the summer recess. It will call into consultation representatives of the political parties in the Malta Legislative Assembly. H M Government believe that by this procedure of practical co-operation between the two Parliaments, this imaginative proposal can be considered in a way that accords with its constitutional importance and with the interests of both peoples "

Mr. Attlee (Leader of the Opposition) welcomed the Prime Minister's statement He added " The proposals put forward by the Maltese Government are of very great interest and importance, and I do not think we should be afraid of setting precedents I do not think there is a precedent in this case, because the position of Malta is quite exceptional, as a part of Europe attached to us and seeking self-government. It is a definite matter for the House to consider any addition to its members, and it is right it should be considered by all members . I welcome the suggestion that this round-table conference should be held in September, in order that the Maltese people may not feel that there is any undue delay When these matters are discussed, it is my hope they will go forward to closer association between the people of Britain and the very gallant people of Malta, whose services we remember so well in the last war "

In reply to **Mr. Teeling** (C.), who asked whether the position of the Roman Catholic Church in Malta would be safeguarded at the coming conference, the Prime Minister said that it was " quite evident that the question of the Church is one matter that will have to be considered " Replying to **Sir Ian Fraser** (C), Sir Anthony said that contact would be maintained with other Commonwealth countries with regard to the constitutional position of Malta

The following statement was issued by Mr. Mintoff in London on the same day :

" We deeply appreciate the help and consideration given to us by H.M. Government and their endeavour to find, with us, the right solution for both our countries We realize the far-reaching implications of our proposals, and we fully agree that the suggested round-table conference is the most helpful immediate measure. The British Parliament clearly must give full consideration to historic proposals which affect its own constitution.

We are aware of the warm sympathy and imaginative response with which the Prime Minister's statement was received on both sides of the House, and we appreciate the full association of the Leader of the Opposition with it We are confident that our proposals, when fully examined, will be acceptable They seek to provide for a closer union between our two countries, so that we will share, in peace-time as we did in war, victories and hardships

I am certain that the people of Malta will receive the news with rejoicing, and that the abiding and traditional friendship of our two nations will be strengthened to our mutual advantage This is a historic moment for us "

The U.K.-Maltese discussions ended on July 13 with a joint statement on the social and economic development of Malta, worded as follows :

" All parties to this conference are agreed that the social and economic development of Malta is a necessity and calls for a joint and sustained effort by both countries To assure the steady advance of the islands, a long-term development plan is being prepared Meanwhile, as part of the effort to improve the living standards of the Maltese people, the conference endorses the following objectives.

(1) Raising the standard of education and other social services
(2) Increasing substantially the opportunities for employment outside Service establishments
(3) Avoiding unemployment

It is recognized by the U.K Government and by the Maltese delegations that improved living standards can be maintained only by increasing productivity and expanding the national income of Malta. With this in view, H M Government undertake to contribute to the cost of the necessary capital works, to help secure the technical means, and, in the interim period before these measures lead to the required expansion in Malta's own revenues, to assist as may prove necessary in balancing the Budget on recurrent account

The Maltese delegations, on their part, recognize that the long-term development plan needs detailed elaboration and examination, and each delegation pledges its close co-operation with H M. Government in this common task They also recognize that the degree of success attained will depend on the hard work and self-discipline of the Maltese people, and on the Maltese Government and people making the best possible contribution from their own resources "

The composition and terms of reference of the Malta round-table conference (which is to begin on Sept. 19) were announced by Sir Anthony Eden on July 28, The terms of reference were :

" (1) To consider constitutional and related questions arising from proposals for closer association between Malta and the United Kingdom and, in particular, from the proposal that Malta should in future be represented in the Parliament at Westminster.
(2) To consult representatives of the political parties in the Legislative Assembly of Malta, and such other persons as may seem fit to them
(3) To report their conclusions and recommendations "

The conference will consist of the following 17 members . Viscount Kilmuir, the Lord Chancellor (chairman) ; the Earl of Perth ; seven members of the Government parties (Mr. Walter Elliot, Mr. J. S. Maclay, Sir Patrick Spens, Mr. W. T. Aitken, Mr. Julian Amery, Mr. Kenneth Pickthorn, and Mr. Richard Wood) ; Mr. Attlee, the Leader of the Opposition ; five Labour members and a Labour peer nominated by Mr. Attlee (Mr Aneurin Bevan, Mr. Chuter Ede, Mr. James Griffiths, Mr. Richard Crossman, Mr. Douglas Houghton, and Lord Listowel) ; and Mr. Clement Davies, representing the Liberal Party.—(Times - Daily Telegraph - Manchester Guardian - New Commonwealth) **(Prev. rep. Malta, 14120 B.)**

Note. After having been for centuries under the successive control of the Normans, Angevins, and Aragonese, Malta was handed over in 1530 to the Knights of St John, who governed the island until 1798, when they were expelled by Napoleon The Maltese, aided by British and Neapolitan forces, rose against the French garrison and compelled it to capitulate in 1800 The island was then admitted at its own request into the British Empire. (Ed. K.C A)

B. UNITED KINGDOM. — Guided Missile Range in the Hebrides.

The Government's decision to establish a guided missile range in the Hebrides was announced on July 27 by Mr. Selwyn Lloyd, the Minister of Defence.

Mr Lloyd explained that it was necessary to have a range for training Servicemen in the operation of guided missiles , that it was impracticable to establish such a range overseas, not only because of the difficulties of maintenance and supply, but also because it would entail the absence of front-line units of the Home Forces for long periods , and that investigations had shown that the only suitable area in the United Kingdom for the purpose was the Hebrides. All firings would be made out to sea, and there would be no serious interference with shipping or fishing There would be some encroachment on crofting land, but every effort would be made to limit this as much as possible. The Government would agree that any question of compensation to crofters should be referred to the Scottish Land Court.

Mr. Lloyd disclosed that the launching base would be on the island of South Uist, in the Outer Hebrides. (Daily Telegraph)

AUGUST 6—13, 1955

A. SOUTH AFRICA. — The Senate Act. - Change in Method of electing Senators. - Increase in Senate Membership. - Opposition Protests.

A Bill to increase the membership of the South African Senate from 48 to 89, and to change the method of electing Senators, was published on May 11 after having been given a first reading earlier in the day. The introduction of the Bill, which was designed to give the Government the two-thirds majority in a joint session of Parliament necessary to alter the "entrenched clauses" of the South Africa Act and place the Cape Coloured voters on a separate electoral roll, followed the defeat of all the Government's earlier efforts to secure the enactment of such legislation. The principal provisions of the Bill were as follows:

(1) The existing Senate of 48 members (eight elected by each of the four provinces, two elected in South-West Africa, four representing the Natives, eight nominated for the Union, and two nominated for S.W. Africa) would be dissolved by the end of 1955.

(2) A new Senate would be elected in which the number of senators from each province would vary according to the size of the European population in that province; this number would be calculated by adding together the number of parliamentary and provincial council constituencies in each Province and dividing the total by five to the nearest figure. Under this formula, the Orange Free State and Natal would each retain eight seats, but the number of senators returned by the Transvaal and the Cape would be increased to 27 and 22 respectively. In addition, the number of nominated senators for the Union would be doubled to 16, half of whom must be nominated "on the ground mainly of their thorough acquaintance, by their official experience or otherwise, with the reasonable wants and wishes of the coloured [i.e. all non-European] races in South Africa." The four Natives' Representatives in the Senate would be unaffected by the change, as would the two elected and two nominated senators for South-West Africa.

(3) The existing system of electing senators, under which the members of the House of Assembly and of the Provincial Council for each province sat as electoral colleges and elected their representatives to the Senate on the basis of proportional representation, would be abolished in favour of a system under which the majority party in each province would take all the Senate seats in that province.

(4) The property qualifications for election to the Senate would be abolished.

(5) The quorum in the Senate would be increased from 12 to 15.

Under the altered procedure for election, it was calculated that 77 of the 89 members of the new Senate would be Nationalists and only 12 Opposition members (eight United Party and four Natives' Representatives), compared with 30 Government and 18 Opposition supporters at present. The United Party would take all the eight Natal seats, but the Nationalists would have all the seats in the other three provinces and in South-West Africa, as well as the 16 nominated members for the Union. The Nationalists' increased representation would give them 171 votes in a joint sitting of the two Houses of Parliament—five more than the two-thirds figure of 166 needed to alter the "entrenched clauses" and remove the Cape Coloured voters from the common electoral roll.

A Government motion for leave to introduce the Bill had been proposed in the House of Assembly by Dr. Donges (Minister of the Interior) earlier in the day, before the terms of the Bill had been made public. The motion was strongly opposed by all the Opposition parties, but was eventually carried by 82 votes to 53.

Mr. Strauss, the Leader of the Opposition, declared that the Government aimed not at establishing the sovereignty of Parliament but at establishing the sovereignty of the Nationalist Party. He moved an amendment giving the Minister leave to introduce the Bill provided that it did not alter the constitution of the Senate "in such a manner as to destroy the composition of Parliament entrusted with the observance of the entrenched clauses of the South Africa Act". The United Party, he said, wanted to avoid, by its amendment and by its attitude, the evil of "a debasement" of the country's institutions, and would fight the measure at every stage.

Mr. Bailey Bekker, on behalf of the National Conservative Party, said that although the proposed Bill—which everyone knew was designed to give the Nationalists a two-thirds majority in a joint session—might have been justifiable at another time, in present circumstances it was "a hasty, ill-judged and wrong step, which would have grave repercussions on South Africa." He therefore proposed that the debate be adjourned at an appropriate stage to give the Prime Minister and the Leader of the Opposition a last chance to find a middle course by way of compromise.

Mrs. V. M. L. Ballinger (Liberal, Natives' Representative) moved an amendment declining to grant leave to introduce the Bill because: (1) No proposal to change the composition and constitution of the Senate had been submitted to the electorate, and the Government therefore had no mandate for such a measure. (2) The Bill was the declared second step towards the removal of the entrenchments in the South Africa Act without the support of the requisite majority of the electorate envisaged in the Constitution. (3) The Bill was designed to circumvent a decision of the Appellate Division of the Supreme Court and was therefore in defiance of the law of the land. Mrs. Ballinger said that no understanding could be reached between the Government and the Opposition which would solve the issue and bring peace in the country, and for that reason the Natives' Representatives would oppose the measure outright.

Mr. Alex Hepple (Labour) declared that his party "rejected outright" the Minister's motion for leave to introduce the Bill. As far as the Government's intentions could be interpreted, they were aimed at wiping out the "entrenched clauses" of the South Africa Act. The Government was no longer much concerned about removing Coloured voters from the common roll—that was incidental. They now intended to "pack" the Senate in such a way as to abolish representative Government there and introduce party Government.

Dr. Dönges dismissed all Opposition objections as "speculative," and refused to anticipate his second-reading speech.

Mr. Strauss's amendment was rejected by 82 votes to 41, the Conservative Party and the Natives' Representatives abstaining. Mrs. Ballinger's amendment was defeated by 82 votes to 53, the amendment being supported by the United Party, the Conservative Party, and the Labour Party.

The debate on the second reading in the House of Assembly took place from May 23-27, culminating in a final 31-hour session at the end of which the Bill was passed by 91 votes to 61. All the Opposition parties voted against the Government. An amendment by Mr. Strauss that the Bill be read "this day six months" was defeated.

Dr. Donges, moving the second reading, said that the Bill's object was to carry out the mandate of the people, given to the Government in four general elections (including two provincial elections), for separate representation of voters. At two of these elections the people had also given the Government a mandate to ensure the sovereignty of Parliament. Having tried in the normal way to effect this mandate, and having failed, the Government was now compelled to use its reserve powers and the special measures provided in the South Africa Act. Section 25 of that Act provided for the enlargement of the Senate, it was clear and specific, with no conditions attached.

The Government's proposals, Dr. Donges continued, were not unique in the history of democratic government. It was the practice of all democratic governments to use all constitutional means at their disposal to carry out mandates received at general elections, and there were many precedents for the proposal to enlarge the Senate. In Britain, 12 peers had been created in 1711 to approve the Treaty of Utrecht, and the subsequent attempt to impeach the Prime Minister had failed because he had acted constitutionally. In 1831 the British Government had threatened to create additional peers to pass the Reform Bill, and in 1911 the Liberal Government of the day had threatened to create 300 peers; in both these cases the Opposition had compromised and the Government's policy had been carried out.

Discussing the major changes contemplated in the Bill, Dr Dönges claimed that the enlargement of the Senate's membership was not new in principle, as it had been done in 1936 and in 1949. The proposed ratio of the House of Assembly to the Senate in numbers —two to one—was the same ratio as had been advocated in 1920 at the Speaker's Conference (called to consider the constitution of the Senate) by Mr. Owen Clough, then Clerk of the Senate. No-one in 1920 had suggested that such a ratio was undemocratic. Dr. Donges mentioned other countries, including members of the Commonwealth, to show that the ratio of two to one was normal.

A second major change was that the provinces' representatives in the Senate would be elected by direct *bloc* votes, instead of by proportional representation; when this had been proposed at the National Convention, nobody had suggested that it struck at the roots of democracy. As regards the third change—the number of senators representing each province—Dr. Donges pointed out that under the present system of having the same number of senators for each province, the larger provinces were inadequately represented, i.e., the Transvaal had 24,348 voters for each electoral senator, the Cape 22,325, Natal 19,350, and the Orange Free State 16,834.

Dr. Donges concluded by saying that the constitutional crisis would not have arisen if the Opposition had abided by the 1937 judgment of the Appeal Court. The Government had tried every means to carry out the will of the electors to place Coloured voters on a separate roll, but the Opposition had remained "stubborn." Every sensible person in South Africa wanted the constitutional crisis to end; but a Government with a great majority could not "leave the voters in the lurch"—its only recourse was the present Bill.

Mr. Strauss, who called upon the Government to appeal to the country, contended that the Bill was not only "evil and reprehensible" in its means, but equally bad in its ends. He gave a warning that if this Bill were passed, and others of the same pattern which would follow it, the road was clear for a one-party system of an authoritarian republic—a republic completely divorced from the Commonwealth. Dismissing the precedents quoted by Dr. Dönges, the Leader of the Opposition said that in every one of them the Upper House had been deliberately thwarting the Lower House in such a way that a deadlock had ensued or would have ensued. "Our

situation is entirely different," he declared. "There is no deadlock or threatened deadlock between the Senate and this House, and if there were any evidence of any deadlock, the framers of our Constitution have provided for such an eventuality."

"The United Party," Mr. Strauss continued, "cannot accept the Bill under any circumstances . . . because, firstly, it conflicts with all the fundamental principles applying to the Upper House; secondly, it deprives large sections of the population of representation in the Senate; and thirdly, it is in conflict with the stated aim of the framers of the Constitution. The Senate, under the Bill, becomes the caucus of the Nationalist Party in the Upper House. That was not the intention of the framers of our Constitution."

It was obvious from statements made by the Prime Minister and other members of the Cabinet (Mr. Strauss asserted) that the placing of Coloured voters on a separate roll was not the whole end which the Government had in view. If the Bill were passed, it would be the beginning of the complete disappearance both of the "entrenched clauses" from the South Africa Act and of the testing right of the Courts, which was the only effective guarantee of the political rights of the South African people, both Coloureds and Whites. Rejecting the Conservative Party's proposal for a compromise, Mr Strauss said that no concession by the United Party would end the constitutional crisis, as the Prime Minister was prepared only to accept the Opposition's "unconditional surrender" and to give nothing in return. Therefore a compromise would not bring peace and quiet, but only "dishonour and a disreputable record to the people who represent the vast majority of the voters of South Africa." "We are not prepared to have any truck with this suggestion of compromise," he concluded. "We are prepared to stand up and fight in the name of South Africa for the abiding interests of the people of South Africa. I have enough faith in the people to feel convinced that we shall succeed."

Mr. Strydom, the Prime Minister, recalled that the main reason for General Hertzog's decision to place the Natives on a separate roll had been to ensure the continued supremacy of the White man. It was for precisely the same reason that the Nationalist Party now wanted to place the Coloured voters on a separate roll. He asked whether the United Party, which claimed the late General Hertzog as one of its leaders, still adhered to General Hertzog's principle of ensuring the lasting supremacy of the White man in South Africa. With regard to the constitutional argument, Mr. Strydom reiterated that if the 1937 judgment of the Appeal Court had prevailed, Parliament would have been absolutely sovereign. According to the 1952 judgment of that Court, however, the sovereignty and power of Parliament and the people could be limited by a Court, which might continually reverse its judgment. It was for this reason that the Government were determined to carry on the struggle, since it felt that where the powers and sovereignty of Parliament were at issue, the only testing right upon any decision lay with the people.

Mrs. Ballinger reiterated that the Government had no mandate to introduce the Senate Bill, as it had failed in the 1953 elections to get the two-thirds majority required to change the law. The Government might have gone to the country on the Coloured vote, she said, but it had certainly not done so on the issue of changing the constitution of the Senate. **Mr. Hepple** said that the Labour Party supported Mr. Strauss's amendment, and emphasized that the House had a responsibility to the non-European population of South Africa who had no vote.

Mr. Frank Waring (Conservative) made a strong plea for a compromise on the Coloured franchise in order to resolve the deadlock. Another Conservative member, **Mr. Coetzee,** declared, however, that whilst favouring a compromise on the Coloured vote, the Conservative Party could not accept a compromise on the Senate Bill, as the Bill was designed to abolish the entrenched clauses in the Constitution. As regards the Coloured vote, he blamed both the "unreasonable haste" of the Prime Minister and the "completely unreasonable stubbornness" of the Leader of the Opposition for the deadlock on this question.

Of the United Party speakers, all of whom were vehemently opposed to the Bill, **Major van der Byl** denied that there was any question of Parliament not being supreme, and asked why the Government did not hold another general election or a referendum if it wanted its two-thirds majority. The Senate had been created as a check to hold up legislation which was not in the interests of the people, but if the present Bill became law it would "create a Senate of Government hirelings with no will or power of their own but who will have to do exactly what they are told. **Mr. Waterson** and **Mr. Lawrence** asserted that the Coloured question was a side issue. "If it was not the Coloured vote," Mr. Waterson said, "it would be something else, because this Government is determined to abolish the 'entrenched clauses' so as to remove any possible obstacle to tearing up the Act of Union and establishing a republic by a synthetic majority."

Mr. Louw (the Finance Minister) replied that the Government, after having received four mandates from the electorate, was being thwarted by a combined session of Parliament, of which the Senate was a part. He accused the Opposition of "playing on sentiment, whipping up emotion, creating fear, and working up a state of hysteria." The present Bill was a direct outcome of the refusal by the Opposition and the Appeal Court to recognize the effect of the Statute of Westminster and the repeal of the Colonial Laws Validity Act, and to abide by the Appeal Court's decision of 1937.

An important new factor was brought into the debate when **Mr. Norman Eaton** (Labour) pointed out that even if another party were returned at the polls with a large majority, it might yet be unable to govern, since its legislation could be rejected continually by the Senate. **Mr. Lovell** (Labour) declared in this connexion: "The Senate Bill will all but make it impossible for an alternative Government to rule in South Africa. We will have reached the stage where we, who represent the Opposition voters, will have to tell the truth—that they have no effective constitutional means left to change the Government." The Provincial Councils, which continued in office for a year after the dissolution of Parliament, would still be Nationalist-dominated and, under the new electoral system proposed in the Bill, would keep the Nationalist majority in the Senate. Even if the Opposition parties captured 17 Assembly seats in the Transvaal, five in the Cape, and two in Natal—an almost impossible task—they would not have the effective power to govern the country because, in spite of its majority in the Assembly, the new Government would be unable to gain control of the Senate. And even if the United Party were successful in the Provincial Council elections a year after the general election, it would not be able to dissolve the Nationalist-dominated Senate as the Senate could only be dissolved within four months after a general election. In such an eventuality the only way to dissolve the Senate after Provincial Council elections would be to call a new general election. The outstanding fact of the situation was therefore that, unless a second general election were called, the United Party would not be able to govern the country for five years—the usual life of the Senate. Any attempt either to advance the date of the Provincial Council elections, or to pass a law for an earlier dissolution of the Senate, could be blocked by the Nationalist majority in the Senate. A Government faced by a hostile Senate could resort to the expedient of submitting its legislation to a joint session of both Houses, but even in such a joint session the Nationalists, because of the overwhelming "loading" of the Senate, would still command a majority.

Dr. Donges, replying for the Government, stressed that in practically every country where there were two Houses it was the fate of every new Government to struggle against a majority in the Upper House. In South Africa the situation was not new, for the Government returned in 1924 with a landslide majority had been in a minority of 13 to 27 in the Senate, despite its majority of 81 to 53 in the Assembly; it could not have secured a majority with those figures in a joint sitting until the second session of that Parliament. Moreover, any delay of the kind mentioned by Mr Lovell would be only temporary. There would be another general election in 1958 and Provincial Council elections in 1959, whilst in 1960 the Senate would automatically expire. If any new Government put its main legislation through in the second session of the next Parliament (i.e. in 1959-60) it could come to a joint session only in 1960, by which time there would be reconstituted Provincial Councils as well as a reconstituted Senate.

As a result of the possibility envisaged by Mr. Eaton and Mr. Lovell, an amendment to the Bill was tabled by Mr. Strauss on June 1 providing for the dissolution of Provincial Councils within 120 days after a change of Government (as is the case with the Senate under the terms of the Senate Act of 1926), thus enabling the Senate to be reconstituted on the basis of the newly-elected Provincial Councils. Another amendment, proposed by Mr. Waring, provided for the dissolution of Provincial Councils and of the Legislative Assembly of South-West Africa within 90 days of any dissolution of the Union House of Assembly.

On June 2, however, a Government amendment designed to overcome any deadlock between the two Houses was tabled by Dr. Donges. This provided: (1) That if a money Bill passed by the Assembly was rejected by the Senate, it should be submitted to the Governor-General unless the Assembly decided otherwise; if assented to by the Governor-General, it should become an Act of Parliament in spite of the Senate's non-concurrence. (2) That any other Bill passed by the Assembly but rejected by the Senate in two successive sessions, and in successive calendar years, should be presented to the Governor-General and, if he assented thereto, should become law.

On June 3 a further debate on the Bill took place, on a motion by Dr. Donges that the Committee of the whole House should consider the Government's new amendment. The motion was carried by 75 votes to 44, the Conservative Party abstaining.

Dr. Donges said that under the proposed amendment the Senate could not act as a "block" but only as a "brake." Decisions of the Assembly would in some cases still be subject to delay, but that was a normal function of the Senate. The amendment would prevent the possibility of a clash between the two Houses and would empower the Assembly to decide all disputed issues. If the method proposed by Mr Strauss were adopted, it would mean that every new Government would first be involved in a period of conflict with the Senate and in the expenses of a second general election through having to dissolve the Provincial Councils. The same objection applied to the Conservative Party's proposal. Mr Strauss's proposal would also make it necessary for a new Government to win two general elections before it could rule effectively—one for the House of Assembly and another for the Provincial Councils. Moreover, it would not eliminate the danger which the Opposition had in view, for it would still be possible for them to win a majority in the Assembly at a general election but to be in a minority in the Senate and in a joint sitting of the two Houses.

Mr. Waterson (U P.) contended that the Government's amendment made the Bill "still more reprehensible and outrageous," and declared that the United Party would reject the amendment. The Government's legislation, he said, was so repugnant to everyone, including its own supporters, that it had been forced to modify one aspect of it, having prepared a plan to destroy the composition of the Senate, it now proposed to destroy one of its main functions

Mr. Hepple also argued that the new proposal would render the Senate virtually powerless Of the Conservatives, **Dr. Jonker** said that he was prepared to accept the Government's amendment, but **Mr. Waring** and **Mr. Coatzee** both opposed it

Mr. Swart (Minister of Justice) assured the House that the possibility of the Senate being placed in a position where it would be able to thwart the Assembly in the event of the United Party's coming to power had never been contemplated by the Minister of the Interior or by the Government. He said that if the danger which the Opposition claimed to have discovered in the Senate Bill was a real one, then they must either press Mr Strauss's amendment or support the Government's amendment Unless they did one of these two things, the Opposition's whole protest against the Bill was meaningless

During the Committee stage (June 6-7) the various clauses of the Bill were approved by Government majorities of 32-34. Mr. Strauss, who announced that the United Party would refuse to participate in the committee debate because it would have nothing to do with the Bill, had earlier announced the withdrawal of his proposed amendment.

Dr. Donges moved an amendment (which was adopted) providing that the Governor-General could authorize the dissolution of the Senate within 120 days after the expiry of the term of office of a Provincial Council, this proposal, he said, would eliminate the difficulty with which the Opposition appeared to be so much concerned. Another Government amendment (also accepted) provided that the period of office of senators should be reduced from 10 to five years.

The Bill was read a third time on June 9 by 79 votes to 46.

In the Senate, the Bill was debated on June 13-14, and was given a second reading by 27 votes to 16 after all the Opposition Senators had spoken against it. An amendment by Senator Jackson (U.P.) that the Bill be read "this day six months" was defeated by the same margin. The third reading was given on June 16 by 24 votes to 15, and on June 20 the Prime Minister announced that the Governor-General had assented to the Bill.

During the Report stage in the Senate several amendments to the clause providing for the dissolution of the Senate were all defeated. **Senator Rubin** (Natives' Rep) moved that the Senate should not be dissolved until the Government had received a mandate from the country at a general election (rejected by 26 votes to 5), **Senator Cowley** (Natives' Rep) moved an amendment to make it permissive and not obligatory on the Governor-General to dissolve the Senate before Dec 31, 1955 (rejected without a division), and **Senator Browne** (Federal Party) proposed that the Governor-General should not be able to dissolve the Senate before the end of the year (defeated by 26 votes to 5).

Protests against the Bill were voiced by many individuals and organizations throughout the Union, large public meetings of protest being held in Johannesburg, Cape Town, Port Elizabeth, and East London.

The South African Coloured People's Organization issued a statement on May 15 unanimously rejecting the Bill, whilst the Action Committee of the Christian Council of South Africa (which represents English churches in the Union) stated on June 10 that the Bill "nullifies the express purpose which underlay the creation of an Upper House," and expressed its "deep concern at the disregard of moral principles" implicit in the Bill.

A petition protesting against the Bill on moral and constitutional grounds, signed by 13 professors and lecturers of Pretoria University —all registered members of the National Party or Nationalist in sympathy—was published on May 17. A number of other members of university teaching staffs subsequently associated themselves with the petition or presented their own protests, including 80 from the Witwatersrand University, 31 from Rhodes University, 100 from Natal University, and 100 from Cape Town University On the other hand, six professors and lecturers of the Department of Law in the University of the Free State issued a statement on May 19 dissociating themselves from the petition by the 13 Pretoria professors and lecturers.

A petition signed by 94,000 women, asking the Governor-General to withhold his assent from the Bill, was presented on June 16. On June 28 more than 1,000 women from all parts of the Union staged a protest march in Pretoria. It was subsequently arranged by the Women's Defence of the Constitution League that four women, wearing black sashes, should maintain a "silent vigil" outside the Union Buildings in Pretoria (the administrative headquarters of the Government) on every working day for the next six months.—(Cape Times - Die Burger, Cape Town - The Star, Johannesburg) **(Prev. rep. Enlargement of Appeal Court, 14207 A; Cape Coloured Voters, 13672 A.)**

A. PAKISTAN. — Currency Devaluation.

The Pakistan Government announced on July 31 that it had decided, with the approval of the International Monetary Fund, to devalue the Pakistani rupee, and that the new parity would be 0.186621 grams of fine gold per rupee or 4.76190 rupees for one U.S. dollar. The exchange rate between the Pakistani rupee and the pound sterling would accordingly revert to 1s. 6d.—i.e., the rate existing before the devaluation of sterling in 1949.

An official statement issued in Karachi said that the decision had been taken "purely on economic grounds." It continued: "Pakistan's economy has been developing at a fast pace The exchange rate appropriate so far is no longer suited to the needs of the growing economy Hitherto, our exports consisted entirely of primary products, the more important of which were jute and cotton They could be disposed of in the world market without difficulty and at a reasonable return to the grower. Our main need at the time was to stimulate the import of capital goods in order to accelerate economic development, both agricultural and industrial The decision not to devalue the rupee has effectively served its purpose and has facilitated a remarkable expansion in indigenous production Industrial production has increased by 285 per cent during the period 1950 to 1954 We are now self-sufficient in food, cloth of coarse and medium varieties, jute manufactures, cigarettes, and matches, and nearly so in cement, paper, and other essential commodities It should now be possible for Pakistan to export manufactured goods in increasing quantities. But it is essential to give competitive strength to Pakistan's exports

"The two most important considerations are to ensure a reasonable return to the grower of jute and cotton and to facilitate exports so as to increase foreign exchange earnings The new rate of exchange will serve to achieve both objectives The prices of jute and cotton in international markets have fallen considerably. Agriculturists, who form the bulk of our population, are therefore in economic difficulties The revaluation of the rupee will immediately help to improve their economic condition and increase their purchasing power The disposal of the jute crop will not present any serious problem, and jute will hold its own against substitutes It is one of the primary objectives of national policy to increase cotton production With the increasing consumption of raw cotton by our own textile industry, the volume of cotton available for export has decreased, thus adversely affecting our foreign exchange earnings. The rise in the internal price of cotton will stimulate production In the case of jute manufactures it is essential to utilize our manufacturing capacity in full This will have a healthy effect on raw jute prices and will considerably increase our foreign exchange earnings. Similarly, in cotton textiles and other manufactured goods it should now be possible for us to undertake exports on an expanding scale, after satisfying the demand of the home market"

In conclusion, the statement pointed out that the decision had been timed to come into effect before the movement of the jute and cotton crops started, "so as to confer the maximum benefit on the growers."

Prior to the devaluation the exchange rate between the Pakistani rupee and the pound sterling had been 2s. 1½d., compared with 1s. 6d. for the Indian and Ceylon rupees. (Pakistan High Commissioner's Office, London) **(10229 A.)**

B. MOZAMBIQUE. — Opening of Limpopo Railway. - Direct Rail Link from Lourenço Marques to Bulawayo.

A 200-mile railway was opened on Aug. 1 linking the port of Lourenço Marques, on the Indian Ocean, with the railway network of the Rhodesia and Nyasaland Federation. The line (single-track) runs from Guija, in Mozambique (Portuguese East Africa), along the left bank of the Limpopo River to Pafuri, on the frontier, where it links up with an existing Rhodesian line to Bannockburn. As Lourenço Marques is already linked by rail with Guija, and Bannockburn with Bulawayo, the new line made it possible to run direct train services from Bulawayo to the Indian Ocean, a total distance of 660 miles—320 from Lourenço Marques to the Rhodesian frontier, and 340 miles from the frontier to Bulawayo. The junction of the Portuguese and Rhodesian tracks was completed a year ahead of schedule.

The new line gives the Rhodesia and Nyasaland Federation a second rail outlet to the sea, complementary to the existing 600-mile line from Bulawayo to the Portuguese East African port of Beira. As the latter line was greatly overloaded, three alternative proposals were considered: (1) to build a second track from Bulawayo to Beira, (2) to build a new line linking Bulawayo with Durban, a distance of over 1,000 miles, or (3) to establish a rail connexion with Lourenço Marques. The third course was adopted and, as stated above, was completed with the opening of the Limpopo section.—(Federal Information Dept., Salisbury - Times - Daily Telegraph) **(11925 D.)**

C. INDIA. — Abolition of Jute Export Duty.

Following the devaluation of the Pakistani rupee, it was announced in New Delhi on Aug. 1 that the Indian Government had abolished the export duty on jute sacking and jute hessian. (The Statesman, Calcutta) **(Prev. rep. 14355 A.)**

A. UGANDA. — Acceptance by Buganda of Recommendations of Namirembe Conference. - Agreement with British Government on Return of Kabaka. - Uganda Executive Council Appointments. - New Constitution for Kingdom of Bunyoro.

The committee set up by the Lukiko last December to consider the recommendations of the Namirembe Conference on constitutional reforms presented its report to the Lukiko on April 22. The Lukiko adjourned to consider the report, and on reassembling on May 9 approved it by 77 votes to eight, with one abstention. It then appointed a drafting committee to draw up, with Government lawyers, the legal instruments necessary for implementing the amendments to the reforms proposed by the committee, and also approved the appointment of a six-member delegation to go to London and ask the Colonial Secretary for the immediate return of the Kabaka.

The Lukiko committee, affirming that the purpose of the reforms should be "to cement the cracks which have appeared in the friendship" between the British and the Baganda, accepted in general the recommendations of the Namirembe Conference. In particular, it accepted the recommendations that the Kabaka should become a constitutional monarch, and that Baganda representatives should serve on the Uganda Legislative Council The committee recounted the fears of the Baganda about the Legislative Council—that it might reduce the status of the Lukiko, involve the Baganda in an East African federation, and lead to multi-racial government—but stated: "We think that these fears should no longer prevent the Lukiko from accepting Baganda representation on the Legislative Council." The committee nevertheless recommended a number of amendments to the recommendations of the Namirembe Conference, the most important of which were as follows:

(1) In place of the proposed "solemn engagement" to be made by the Kabaka, a royal declaration before the Lukiko would be more in accord with the ruler's dignity.

(2) When the Kabaka was absent he himself should appoint regents, or, if this were impossible, the Lukiko should elect them subject to the Governor's approval.

(3) The Governor should not have a veto over the list of candidates for the post of Katikiro (Chief Minister) but only (as with other Ministers) power of veto after the Katikiro's election

(4) The list of names from which the Katikiro would choose the other Ministers should be reduced from 40 to 15

(5) In the proposed consultative committee which would link the Buganda and Protectorate governments, parity should be observed between the two sides It was also suggested that the British Residency should confine itself to advice as defined by Sir Charles Dundas in 1944, and that the Governor should be referred to as "her Majesty's representative," as in the 1900 agreement.

(6) The Kabaka himself should appoint the chairman of the proposed Buganda Government Appointments Board.

(7) Baganda representatives on the Uganda Legislative Council should be directly elected, rather than be elected by the Lukiko. The report also asked for some assurance from the Governor that any nominated Baganda members would not be fundamentally opposed to representatives of the people, and that all African representative members would be elected by methods which would ensure that they were truly representative It was further suggested that meetings should be held regularly between the Buganda and other African Governments in the Protectorate to counteract any tendencies towards separatism.

(8) The Lukiko committee thought that the British Government's pledge against federation should be written into the constitution, and that agreements between Britain and Buganda should be incorporated where appropriate into the Uganda Order-in-Council, so as to provide for legally enforceable rights such as existed in the Federation of Malaya.

At the invitation of the Colonial Secretary, Mr. Lennox-Boyd, discussions were held in London in June and early July between himself, the Governor of Uganda (Sir Andrew Cohen), the Buganda constitutional drafting committee, and the delegation appointed to see him about the Kabaka's return. A compromise agreement was finally reached after specific details had been agreed to at a special session of the Lukiko on July 16. On July 28 Mr. Lennox-Boyd gave details of the compromise to the House of Commons and announced that, as agreement had now been reached, he would authorize the Kabaka to return to Buganda.

Mr. Lennox-Boyd said that the draft agreement, which would be submitted to the Lukiko for formal acceptance as soon as it could be translated into Luganda, was based primarily on the report of the Lukiko constitutional committee. The main problem in the discussions had been to reconcile the wish of the Baganda that the Kabaka should bring the new agreement into force by signing it in Buganda, with his [Mr. Lennox-Boyd's] statement of Nov. 16, 1954, that, before the Government could agree to the Kabaka's return, a new situation must be created in which the new constitutional arrangements for Buganda were in full operation. To solve this, it had been agreed that the new arrangements should be brought into force by a transitional agreement which would run until the main agreement was signed in Buganda by the Kabaka on his return. This transitional agreement would be in the same terms as the main agreement, apart from the transitional provisions, and after approval by the Lukiko, it would be signed by personal representatives of the Kabaka. Six weeks after the appointment of Buganda Ministers and the Buganda representative members of the Uganda Legislative Council under the new arrangements, he [Mr. Lennox-Boyd] would authorize the Kabaka to return to Buganda, where he would sign the main agreement and perform such inaugural ceremonies as might be wished or required.

"I know that the House will share my satisfaction," the Colonial Secretary continued, "that the way now seems clear for a new start in Buganda, and that the reconstruction of the Protectorate Executive and Legislative Councils, approved last November, can now take place in the confident hope of early Buganda participation The representatives of the Buganda Lukiko have put clearly before me the views of the Lukiko on the composition of the Executive Council, and have maintained these views [see below] I have taken these views into consideration, but this is a matter affecting the whole Protectorate on which constitutionally the decision must rest with H.M. Government alone. The Governor, who with his advisers has been closely associated with myself in all these negotiations, is now on his way back to the Protectorate, and I have authorized him to bring the central reforms into effect on his return"

Mr. James Griffiths (Lab), on behalf of the Opposition, warmly welcomed the successful outcome of the new negotiations, and asked the Colonial Secretary to reaffirm that the ultimate objective of policy in Uganda remained as had been affirmed by the Government some time ago In reply, **Mr. Lennox-Boyd** said that he could "fully assure" Mr. Griffiths that the undertakings made by the Government remained absolutely unaltered, particularly the undertaking given by his predecessor in February 1954 and repeated by the Governor [i.e. that the Uganda Protectorate should be built into a self-governing territory and should not become part of an East African federation —see 13516 A, 14034 A].

The new constitution for Buganda, in accordance with the amended proposals of the Namirembe Conference, was unanimously agreed to by the Lukiko on Aug. 12.

The names of the first Ministers on the Executive Council of Uganda, appointed in accordance with the proposals appended by Sir Andrew Cohen to the report and recommendations of the Namirembe Conference (see page 14035, second column), were announced in Kampala on July 31. It was also announced that the newly constituted Executive Council would come into being on Aug. 15 and would consist of the Governor and the following members:

Official Ministers. Chief Secretary, Mr. C. H. Thornley; Finance, Mr. A Padley, Attorney-General, Mr. R. L. E. Dreschfield, Q C.; Agriculture and Natural Resources, Mr. T. Y. Watson; Local Government, Mr L. M. Boyd; Social Services, Mr. G. B. Cartland.

Unofficial Ministers. Minister without portfolio (statutory corporations), Mr A N Maini; Works and Commerce, Mr. C. Handley Bird, Assistant Minister for Social Services, Mr. Z. C K. Mugonya.

Parliamentary Secretaries. Mr D J. K. Nabeta, Local Government; Mr. G. Oda, Natural Resources.

Additional Official Members. Mr. C. A. L Richards, Resident of Buganda, and Mr C Spender, chairman of the lint marketing, coffee industry, and grain conditioning boards.

All the official Ministers were secretaries of the same departments under the previous system Of the unofficial Ministers, Mr. Maini, a barrister, was leader of the Asian representatives on the Legislative Council; Mr. Handley Bird, a businessman and former president of the Chamber of Commerce, is also a member of the Legislative Council; and Mr. Mugonya has been Enganzi (Chief Minister) of the Kingdom of Ankole in Western Province since 1948. Mr. Nabeta, a trader, is a member of the Legislative Council for Busoga in Eastern Province, and Mr. Oda, formerly a schoolmaster, is a member of the Legislative Council and secretary of the West African local government administration in West Nile Province.

Before the announcement of the names of the new Ministers, considerable African opposition had been expressed to the proposed appointment of an Asian.

The Lukiko, at its above-mentioned meeting on May 9, had passed a resolution saying that it was "greatly perturbed" at the proposed introduction of a multi-racial central Government in Uganda, and protesting strongly against any such "imposition" A letter from the Lukiko's constitutional committee to the Colonial Secretary, which was read to the Lukiko, said that although the matter was outside its terms of reference, it felt it to be its duty to inform H.M. Government of the widespread opposition in Buganda to the appointment of an Asian Minister in the central Government. The Lukiko resolution, expressing support for the committee's letter, added that the Lukiko wished it to be clearly understood that Uganda was "wholly" an African State, and not "primarily," as mentioned in Lord Chandos's statement in 1954

The Colonial Secretary replied to the African criticisms in a dispatch to Sir Andrew Cohen, published on July 25.

Mr. Lennox-Boyd stated that at the present stage of constitutional development the Governor was responsible for choosing Ministers, and that these must be chosen not as representatives of any tribe or race, but on merit. "If the members of any particular tribe or race were to be regarded as debarred from appointment as Ministers," he added, "that would amount to tribal or racial discrimination, and would be entirely contrary to the whole policy of H.M. Government."

The dispatch pointed out that the Asian community in Uganda had laid the foundations of economic progress throughout the country; that it was performing an essential service in the economic field; that leading Asians had given valuable public service, and that many Asians had been in Uganda for three generations and had no other home The Colonial Secretary concluded "The African people of Uganda have a political future which, in my judgment, is absolutely secure, and, in their attitude to the political rights of the minority communities in Uganda, they can, I believe, give an example and set a pattern which could help to solve similar problems in other parts of the world."

A revised agreement between the United Kingdom and Bunyoro, the oldest of the three western kingdoms of Uganda, was approved by the Rukurato (Council) of Bunyoro on May 30 and by the Colonial Secretary on July 19. Similar to that between the U.K. and Buganda, the new agreement established the Mukama of Bunyoro (the ruler) as a constitutional monarch, with a Chief Minister and Treasurer under him, who would be responsible to the Rukurato. Membership of the Rukurato would remain at 74, but the number of elected members would be increased from 21 to 52.—(Times - Daily Telegraph - Manchester Guardian - Commonwealth Survey)

A. EUROPEAN TRANSPORT. — Creation of "Eurofima" Company.

At a meeting of the European Conference of Ministers of Transport, held in Paris on July 8 under the chairmanship of General Corniglion-Molinier (French Minister of Public Works, Transport, and Tourism), the Transport Ministers of Austria, Belgium, France, Western Germany, Italy, Luxemburg, the Netherlands, Spain, and Switzerland approved the text of a convention creating the first "European company" for the financing of purchases of railway rolling-stock. The company —to be known as "Eurofima," and to be set up for 50 years— will come into being after the signature of an inter-governmental convention in the autumn.

The principal aim of the company, the shareholders of which will be the railway administrations of the participating countries, will be to assist these administrations in modernizing their rolling-stock, and at the same time to encourage the concentration of orders with a resulting reduction in prices As a result of a guarantee given by the Governments concerned to the railway administrations holding shares in the company, the latter will be able to borrow on favourable terms the funds required for the purchase of rolling-stock, which will then be allocated to the various administrations either against outright payment or on deferred terms The first operations of "Eurofima" will deal with standard goods-waggons for the restocking of the "pool" (known as the "Europ" Pool) operated jointly by 10 European railway administrations (see 13935 B) "Eurofima" will enjoy certain taxation privileges.

The initial capital of "Eurofima" will be 50,000,000 Swiss francs. The company's headquarters will be in Basle, and the Belgian representative will become its first chairman.

After the conference ended, three countries which had not taken part in the preparations for setting-up "Eurofima"— Denmark, Portugal, and Yugoslavia—indicated their intention of joining the company.—(European Conference of Ministers of Transport - Le Monde, Paris) **(Prev. rep. 13935 B.)**

B. EASTERN GERMANY.—Marshal Bulganin's Visit.

On their return journey to Moscow from the Geneva "summit" conference, Marshal Bulganin and M. Khrushchov visited East Berlin on July 24-26 for discussions with Herr Grotewohl and other members of the East German Government. A joint statement said that the Soviet delegation had informed the East German Government fully about the Geneva discussions, with special reference to the German question, and that there had been a full exchange of views.

The statement recapitulated most of the points made by Marshal Bulganin in his final speech at Geneva (see page 14330), *inter alia*, that the best way to achieve German unification was a European collective security system in which both parts of Germany could take part—a method which "takes into account the existence of two German States, each with its own social order." Stressing the necessity of closer relations between the German Democratic Republic and the German Federal Republic, the statement declared that "a solution of the German problem is impossible without the participation of the Germans themselves and the drawing together of the two parts of Germany."

The statement contained the following reference to prisoners-of-war: "On the initiative of the German Democratic Republic, an exchange of views took place about the remaining German prisoners-of-war who are serving sentences in the Soviet Union for offences against Soviet law. It was agreed to continue this exchange of views, taking into account the wishes of the Government of the German Democratic Republic."—(Times - Le Monde, Paris - Der Tagesspiegel, Berlin)

(Prev. rep. Geneva Conference, 14325 A.)

C. UNITED KINGDOM. — Parliament. - Unseating of Sinn Fein Member for Mid-Ulster. - The Mid-Ulster By-election. - Sinn Fein Candidate re-elected.

The Leader of the House of Commons (Mr. Crookshank) drew the attention of the House on July 7 to the following facts: (*a*) that the two Sinn Fein members returned for Northern Irish constituencies at the general election (Mr. Philip Clarke for Fermanagh and South Tyrone, and Mr. Thomas Mitchell for Mid-Ulster) were both serving sentences of ten years' imprisonment for treason-felony, and were accordingly disqualified from election; (*b*) that a petition claiming the seat in Fermanagh and South Tyrone had been presented to the High Court of Northern Ireland and was still *sub judice*; and (*c*) that no such petition had been presented in the case of Mid-Ulster, and the period for presenting such a petition had now passed. In view of the last-mentioned fact, the House was "bound to take notice of the legal disabilities affecting its members and to see that a writ was issued in the room of a member judged to be incapable of sitting."

Both Mr Clarke and Mr Mitchell had been sentenced to ten years' imprisonment at the Ulster Assizes on Dec. 15, 1954, for participating in the I.R A raid on the Royal Inniskilling Fusiliers' depot at Omagh, in which five soldiers were wounded (see 13975 A) They were both returned at the general election for their respective constituencies by small majorities—Mr. Clarke by 261 votes, and Mr. Mitchell by 260 votes. The unsuccessful Ulster Unionist candidate in Fermanagh and South Tyrone, Lt.-Col. Robert Grosvenor, subsequently presented a petition for the unseating of Mr. Clarke

On July 18, after a lengthy debate, the House of Commons approved a Government motion empowering the Speaker to issue a writ for the election of a new Member for Mid-Ulster. The motion was carried without a division after the rejection (by 197 votes to 63) of a Labour back-bench amendment which proposed that a Select Committee should be appointed and that no writ should be issued during the present Parliament.

Mr. Sydney Silverman (Lab), who moved the amendment, maintained (*a*) that the appointment of a Select Committee would conform to the precedent established in the case of Mr Michael Davitt before the passing of the Forfeiture Act of 1870, (*b*) that the case of Mr. Davitt was essentially similar to that of Mr. Mitchell, and (*c*) that the second part of his amendment [i e. that no writ should be issued for a by-election in Mid-Ulster during the present Parliament] would be in accordance with similar action taken in the case of Colonel Lynch, who had taken part in the Boer War against Her Majesty's Forces. [The cases of Mr Davitt and Colonel Lynch, referred to by Mr Silverman, were those of two Irish Nationalist members of Parliament who had been convicted of treason-felony] The amendment was supported by **Mr. Eric Fletcher, Mr. Paget, Mr. Emrys Hughes,** and a number of other Labour members.

Mr. Montgomery Hyde (Ulster Unionist) said that he had a certain sympathy with the second part of Mr. Silverman's amendment. The Sinn Fein organization had announced its intention of re-nominating Mr. Mitchell if there were a by-election, and if he was again elected the Mid-Ulster Unionist Association might decide once more not to present a petition claiming the seat. The whole business would then start again, and the constituency might be faced with the prospect of an endless series of by-elections. "Only in Ireland," said Mr Hyde, "could such a thing as this take place"

Sir Reginald Manningham-Buller (the Attorney-General) said that it was clear in law that Mr Mitchell, having been convicted of treason-felony and sentenced to imprisonment, was incapable of being elected to Parliament. He maintained that no case had been made out for disenfranchising the Mid-Ulster constituency during the life of the present Parliament; that there was no point in setting up a Select Committee, and that not only was the law clear, but the precedents since 1870 conformed to the law as laid down by the Forfeiture Act. He explained that two courses would be open if Mr. Mitchell were re-elected at the by-election, the defeated candidate could claim the seat by petition, or the Government could move the issue of another writ

The motion adopted by the House said that "Thomas J. Mitchell . having been adjudged guilty of felony and sentenced to penal servitude for ten years, and being now imprisoned under such sentence, is incapable of being elected or returned as a member of this House" It empowered the Speaker to issue a new writ "for the electing of a member to serve in this present Parliament for Mid-Ulster in the room of Thomas J. Mitchell."

A writ for a by-election in Mid-Ulster was accordingly issued, two nominations being presented: those of Mr. Charles Beattie, the unsuccessful Ulster Unionist candidate at the general election, and of Mr. Thomas Mitchell, who was re-nominated by Sinn Fein. The election was held on Aug. 11 with the following result:

Mitchell, Thomas J. (Sinn Fein)	30,392
Beattie, Charles (Ulster Unionist)	29,586
No change. Sinn Fein majority ..	806

About 89 per cent of the electorate voted in the by-election, including 8,500 postal votes. (Times - Belfast Telegraph)

A. YUGOSLAVIA. — President Tito's Speech on Foreign Relations. - Soviet Cancellation of Yugoslav Pre-1948 Debt. - Hungarian Assurances of Friendship.

President Tito made an important speech on July 28 at Karlovac (Croatia) when addressing a meeting to celebrate the tenth anniversary of Yugoslavia's liberation from German occupation. In his speech he announced that during the recent talks with the Soviet leaders in Belgrade, the Soviet Union had cancelled the Yugoslav debt of over $90,000,000 which had accumulated before 1948 through the supply of arms and raw materials by the Soviet Union. On the other hand, he criticized Western Germany's attitude in negotiations with Yugoslavia on the payment of German reparations, and also complained about the high interest rates charged by the Western countries for their loans to Yugoslavia. In the political sphere he contrasted the new attitude of the Soviet Union towards Yugoslavia with that adopted by some of the "satellite" countries, notably Hungary and Czechoslovakia.

Yugoslavia, said President Tito, was in debt to various foreign countries as a result of the importation of machinery and raw materials after her break with the Cominform in 1948, when she directed her trade towards the West. Although no political conditions were then imposed by the Western countries, they had asked high interest rates which were putting a heavy burden on Yugoslavia's economy Yugoslavia ought not to have been treated in this way in view of the great contribution in human lives that she had made towards the Allied victory.

The President regretted that Yugoslavia had failed so far to obtain reparations from Western Germany, with whom she had tried to come to terms. She would certainly not withdraw her claim for $100,000,000, which she regarded as a minimum demand in view of the great damage and losses she had suffered under the German occupation. Yugoslavia had been the first country to say that Germany had a right to reunification, sovereignty, and limited rearmament, and she would continue to extend this support to German claims; she was therefore surprised that the German Federal Republic had adopted the attitude it had so far shown with regard to Germany's debts to Yugoslavia.

President Tito compared the German attitude with the action of the Soviet leaders, who, during the recent talks in Belgrade, had agreed—in view of the material losses suffered by Yugoslavia—to cancel the Yugoslav debt of over $90,000,000 that had accrued before 1948

Expressing satisfaction at the results of the "summit" conference at Geneva, President Tito declared "I consider that the results of Geneva show that war will be avoided, that mankind can breathe more calmly, but that great efforts are still required to settle the still unsolved questions" Constructive and realistic proposals had been submitted for the settlement of the German question and for disarmament. There had also been various statements "in the grand manner," such as that by President Eisenhower about the exchange of information on military bases and aerial inspection of one another's territory. Although this proposal had come from a man who had proved himself a wise statesman and who was devoted to the preservation of peace, he [President Tito] thought that in present circumstances it was not realistic.

President Tito went on to suggest that it was precisely those people abroad who did not share the U.S President's conciliatory spirit who had tried to exploit it for propaganda purposes against the Soviet Union, and for upsetting the accord reached at Geneva They were saying that on the question of inspection the Russians were remaining silent, which showed that they "had been driven into the open and do not want peace." Such statements, however, were merely "international propaganda", the Russians wanted peace no less than the Americans and all other people in the world.

Referring to the recent Belgrade talks between Soviet and Yugoslav statesmen, President Tito said that the results had been favourable and that the improvement in relations between the two countries had made quite good progress. The Soviet leaders had fully familiarized themselves on the spot with the true state of affairs—namely, that Yugoslavia was not a country which had "sold" herself, that there were no capitalist or imperialist bases in Yugoslavia, and that Yugoslavia had not betrayed the ideals of Marx, Engels and Lenin. They were able to see that the Yugoslavs were building up their internal Socialist life in their own way, and that Yugoslavia was a peace-loving country with her own realistic views on international affairs. They had become convinced that Yugoslavia was independent of West and East alike, that she wished to remain so, and that she could not permit anyone to interfere in her internal affairs. As a result, a common language had been found and it had become easier to approach questions of further mutual economic and political co-operation.

"No matter what anyone in the West thinks," continued the President, "we are progressing boldly, step by step, towards normalization of friendly relations with all countries in the East, but we are also determined not to take a single step to deflect us from our friendly relations with the Western countries, and there is no reason for anyone to fear that we shall cancel all that has happened. This is not in keeping with our political conception We wish to strengthen our relations with America and Britain, as with other countries, not to weaken them. Of course, we cannot allow any of them to interfere in our domestic affairs."

"We are Communists," President Tito went on, "but we do not wish to belong to any camp We want to be an independent country building up Socialism, a country which will show whether our way is better than theirs If in the Soviet Union or elsewhere there is something better than we have we shall gladly copy it Likewise, we hope that what we do well the Soviet Union will copy We shall not, for the sake of anyone's pleasure, wage a war—not even a propaganda war—against the Soviet Union and other Eastern countries" After declaring that the Soviet leaders did not want war either, he continued "These are new men, men who do not wish the delusions, false moves, and actions of the past to be repeated, men who wish to start along another road for the benefit of themselves and of the whole world, men who wish to prove that they are not what they are rebuked as being by the West, but are just the leaders of a Socialist country There is no reason why we should not go along with them on all questions which are of benefit to mankind and ourselves"

Continuing, President Tito expressed strong criticism of the attitude of the leaders of some of the Soviet-bloc countries, declaring in this connexion "There are still people who do not like the normalization of relations They dare not speak out, but are acting under cover They will not recognize what the Soviet leaders have said. They raise objections against Yugoslavia whenever they can, and continue to arrest men who happen to be in favour of friendship with Yugoslavia They say that what has happened is only a manoeuvre, and that the Soviet Union is conducting a cunning policy with the aim of deceiving others Such people exist, especially in Hungary

"These men have their hands soaked in blood They have staged trials, given false information, sentenced innocent men to death They have dragged Yugoslavia into all these trials, as in the case of the Rajk trial, and they now find it difficult to admit their mistakes before their own people. These people lack the Communist boldness to say that they have erred and acted badly, and that they have now changed to a new course. In Czechoslovakia, too, there are people who find it difficult to admit their mistakes before their own people"

Finally, President Tito mentioned certain disagreements which had arisen with the U S A over further U S supplies of armaments. "Of late," he said, "there has been misunderstanding on this question and the matter has been increasingly referred to in the American Press Yugoslavia is being criticized for not allowing control of the arms she has received She has, however, fulfilled her conditions —that the U.S A. should have a right to know how Yugoslavia was maintaining the arms, that she was not selling them to anyone else, and where they were allocated. Yugoslavia cannot allow an inspection of military units where no American arms exist It is their own affair whether they give us more arms or not, but Yugoslavia cannot accept more arms if the conditions are different from those which already exist—if an attempt is made to impose new conditions in conformity with some U S. law. It is the laws of Yugoslavia, not those of the United States, which hold good in this country"

In another statement which he made when receiving a number of U S. visitors on Aug. 5, President Tito declared that whilst Germany's unification could not be avoided for ever, he did not believe that it was possible to achieve it at present.

He also indicated that he did not attach much value to the idea of forming a "neutral belt," and said that for Germany such a scheme was impossible There was, however, another possibility—namely, a *rapprochement* between countries not attached to blocs "This attitude of ours," he said, "is based on the conviction that blocs are not a good solution for the settlement of controversial issues. Bloc arrangements begin with political and ideological groupings, which always carry military groupings in their wake We know the consequences of this. That is why I think that the great Powers divided into blocs should give guarantees to countries which do not wish to join any bloc They should not exercise pressure upon those countries to join any bloc."

As regards the Balkan Pact, President Tito said that it had been created at a time when the three signatory countries felt themselves to be threatened Now, however, when the danger was no longer imminent, he thought that the pact should not be developed "along intensive military lines" and that co-operation between Yugoslavia, Greece, and Turkey "should acquire more the character of peaceful collaboration in the economic, political, and cultural spheres" Once collective security was achieved, the Balkan Pact—like other pacts —would lose its military character altogether. Nevertheless, the pact itself was not of a transitory nature, as it was meant to be "a lasting foundation for friendly co-operation between the three countries which would remove the danger of conflicts from the Balkans."

Summing up his views on international affairs, President Tito told his questioners that he was profoundly convinced that the West was not now threatened by the Soviet Union. "I am convinced myself," he added, "that the Soviet Union truly desires peace, for it has quite enough worries without entering open conflicts. I think that was also the impression of the Western statesmen at Geneva."

M. Rakosi, First Secretary of the Hungarian Workers' (Communist) Party, replied on Aug. 8 to President Tito's recriminations. After assuring President Tito of the good faith of the Hungarian Communists in pursuing the new policy of friendship towards Yugoslavia, he declared: "I can set

their fears at rest and assure Comrade Tito and other Yugoslav comrades that our party and the Government will take all measures to deepen relations between ourselves and them and make them as friendly as possible." He attributed the blame for the previous bad relations between the two countries to the former head of the Hungarian State Security Service, General Gabor Peter, "and his gang," who were sentenced to life imprisonment in March 1954 for crimes against the people and the State (see 13464 B). M. Rakosi said that "tension, friction, and mutual recriminations" had resulted from the activities of General Peter, who had "slandered the Yugoslav comrades."—(Tanjug Agency, Belgrade) **(Prev. rep. Soviet-Yugoslav Talks, 14265 A; Relations with Western Powers, 14295 D; 14162 A; Balkan Pact, 14209 A.)**

A. UNITED KINGDOM. — Higher Interest Rates on Local Authority Loans.

The Financial Secretary to the Treasury (Mr. Henry Brooke) announced on Feb. 28 that, in consequence of the raising of the Bank Rate to 4½ per cent, interest rates to local authorities from the Local Loans Fund would be increased from March 1 as follows: up to 5 years, from 2¼ to 3½ per cent, 5-15 years, from 3¼ to 3¾ per cent; over 15 years, from 3¾ to 4 per cent.

Mr. Brooke's announcement was made when moving the second reading of the Public Works Loans Bill, which increased the lending powers of the Public Works Loan Board in respect of loans to local authorities by a further £500,000,000. As a similar increase had been made under a Bill enacted on Dec 18, 1953, the total increase in the Board's lending authority since 1953 was therefore £1,000,000,000 Mr Brooke explained that the sum authorized by the 1953 Act was nearing exhaustion, and that it was expected that the £500,000,000 authorized by the present Bill might last for 16 months. He added that since they had obtained the power to do so in November, 1953, local authorities had borrowed about £20,000,000 in the open market. Their borrowings from trustee savings banks had been about £40,000,000 a year, possibly about £200,000,000 a year had been raised on private mortgages; and borrowings from the Public Works Loan Board were now running at the rate of about £300,000,000 annually.

The interest rates of loans from the Local Loans Fund were further raised on July 9 to 3¾ per cent for loans up to 5 years, and 4¼ per cent for all longer periods, and on Aug. 13 to 4⅛ per cent and 4½ per cent respectively.—(Times - Daily Telegraph - Financial Times) **(Prev. rep. Interest Rates, 13627 B; Private Borrowing, 12770 C.)**

B. FRANCE. — New Chief of Army Staff and Secretary-General of National Defence.

The French Cabinet decided on June 15 to appoint General André-Marie Zeller (57) as Chief of Staff of the Army in succession to General Blanc, who was appointed Director of the *Institut des hautes études de défense nationale et du Centre des hautes études militaires.*

General André-Marie Zeller [who should not be confused with his brother, General Henri Zeller, the Military Governor of Paris and Inspector-General of Reserves] served during World War II with the Free French forces in Italy and Southern France. He subsequently commanded the artillery of the Free French First Armoured Division during the campaign in Eastern France and Germany

On March 30 the Cabinet had appointed M. Geoffroy de Courcel as Permanent General Secretary of National Defence —the highest administrative civilian post in the French defence organization. M. de Courcel (42) had formerly been Political Director-General in the Ministry for Moroccan and Tunisian Affairs.—(Le Monde, Paris) **(Prev. rep. 10400 D.)**

C. AVIATION. — Trans-Polar Service inaugurated by Canadian Pacific Airlines.

A new inter-continental service linking Western Canada and the Netherlands *via* the North Pole and Greenland was inaugurated on June 4 by Canadian Pacific Airlines. The new route is 1,000 miles shorter than that across Canada and the North Atlantic, and the actual flying time between Vancouver (British Columbia) and Amsterdam is only 19 hours, including one hour's refuelling stop at Sondre Strömfjord (Greenland). The service will run once a week from Sydney (Australia) across the Pacific to Vancouver and thence across the North Polar regions to Amsterdam. It will be operated by DC-6B planes.—(Montreal Star) **(Prev. rep. 13916 D.)**

D. JAPAN. — New Head of Defence Board.

The Japanese Government on July 31 nominated Mr. Shigemasa Sunada (chairman of the Diet policy committee of the Democratic Party) as head of the Japanese Defence Board. (New York Herald Tribune) **(Prev. rep. 13621 C.)**

E. BULGARIA - ISRAEL.— Israeli Airliner shot down by Bulgarian Fighters. - Loss of 58 Lives. - Bulgarian Apology and Offer of Compensation.

A Constellation airliner of Israel Airlines (the *El Al* Company) was shot down by Bulgarian fighters on July 27 near the Greco-Bulgarian frontier. All 51 passengers on board were killed, among them three children, as well as the crew of seven.

The airliner was flying from London Airport to Lydda (Israel) *via* Paris, Vienna, and Istanbul At the time of the disaster it was on the Vienna-Istanbul run, and near the point where the Greek, Bulgarian, and Yugoslav frontiers intersect First reports of the disaster came from the Greek frontier authorities, who announced that the plane had been shot down by Bulgarian gunfire and had crashed a few miles inside Bulgarian territory. On July 28 the Bulgarian Government issued a communiqué saying that the airliner had "departed from its route and entered Bulgarian airspace without warning"; that the anti-aircraft defences had opened fire on the machine, which they had been unable to identify; and that it had crashed with the loss of all passengers and crew on board After expressing "the deepest regret of the Bulgarian Government and the entire Bulgarian people at this disaster," it was announced that a ministerial committee of investigation had been set up under the chairmanship of the Foreign Minister, Dr. Neichev.

On the same day (July 28) the Israeli Government sent two strongly-worded Notes to Bulgaria The first denounced the Bulgarian attack on the airliner as "shocking recklessless" and "a wanton disregard for human life and for elementary obligations of humanity", and demanded the punishment of those responsible, as well as full compensation for the loss of the aircraft and for the families of the 58 passengers and crew who had lost their lives The second Note protested at the Bulgarian Government's refusal to permit an Israeli investigating team to enter Bulgaria to examine the wreckage of the machine. [Six Israeli civil aviation experts had arrived at the Bulgarian frontier for this purpose, but were refused permission to enter Bulgaria.] The *El Al* Company issued a statement denying the Bulgarian allegation that the plane was off its course, and pointing out that radio messages transmitted from the aircraft up to the time of the disaster showed that it had not entered Bulgarian airspace

In a Note to the Israeli Government on July 29, the Bulgarian Government reiterated its regret at the shooting-down of the aircraft and declared its readiness to accept responsibility "for part of the material damage caused."

Three of the Israeli civil aviation experts were eventually allowed to enter Bulgaria on July 30 and inspect the wreckage of the plane Their report, published on Aug. 1 by the Israeli Foreign Office, stated that the plane was riddled by machine-gun bullets, which seemed to indicate that it had been shot down by fighters and not by anti-aircraft fire, that the Bulgarian authorities had tampered with the wreckage in an obvious attempt to remove incriminating evidence, that the investigators had been allowed to stay in Bulgaria for only six hours, that the Bulgarian officers had been uncommunicative and unwilling to impart information, and that no interrogation of Bulgarian witnesses had been permitted.

The passengers in the aircraft included British, Canadian, South African, American, French, and Swedish nationals, as well as Israeli citizens, whilst the pilot, Capt Stanley Hinks, was a British national. [Captain Hinks, a wing-commander in the R.A F during the war, was formerly personal pilot to Sir Winston Churchill and had also piloted King George VI.] In addition to the protest Notes from Israel, strong protests were made to Bulgaria by the British Government (acting also on behalf of Canada and South Africa) and by the U S, French, and Swedish Governments The British Note said that "H M. Government cannot accept that any Government is in its right in shooting down a civil aircraft in time of peace", the U.S. Note said that the "brutal attack" on the Israeli airliner was a "grave violation of all principles of international law"; whilst the French Government described the Bulgarian action as an "act of war" All the Notes demanded the punishment of those responsible and the payment of full compensation to the families of those who had been killed.

The Bulgarian Government issued a statement on Aug. 3 admitting that the Israeli airliner had been shot down by two Bulgarian fighters and not, as originally stated, by anti-aircraft fire. It promised to "discover and punish those responsible for the catastrophe," to take "all measures to prevent a repetition of such incidents," and to pay compensation to the families of the 58 victims.

The statement (claimed to be based on the findings of the ministerial commission of inquiry) said that the "unidentified" aircraft had gone off its course without warning and had flown over Bulgarian territory for 125 miles at a depth of 25 miles Fighters had been sent up to investigate "this deep penetration of Bulgarian airspace," but the airliner had ignored their signals to land Seeing that the plane was "trying to escape across the frontier," they had opened fire on the machine, which had caught fire and crashed. The statement admitted that the air defences had "shown hastiness" and had failed to take all necessary measures to force the aircraft to change direction.

The remains of the 58 victims of the disaster were flown to Israel and were buried in a common grave near Tel-Aviv on Aug. 4 in the presence of the Prime Minister of Israel (Mr. Sharett), the British and U.S. Ambassadors, and many other diplomatic representatives. (Times - Daily Telegraph)

A. ATOMIC ENERGY. — Opening of International Conference on Peaceful Uses of Atomic Energy. - Atomic Energy Developments in the U.S.A., Britain, France, Australia, Canada, Germany, India, the Netherlands, and the U.S.S.R. - Civilian and Military Agreements between Britain and the United States.

The first international conference on the peaceful uses of atomic energy opened at the *Palais des Nations* in Geneva on Aug. 8. The convening of such a conference had been unanimously agreed to at the ninth session of the U.N. General Assembly in connexion with President Eisenhower's "atoms for peace" plan (see page 13994). The conference was attended by 1,260 delegates and 800 observers from 72 countries, and over 1,000 scientific papers were submitted by 33 of the countries represented, as well as by the World Health Organization, the U.N. Food and Agriculture Organization (FAO), the U.N. Educational, Cultural, and Scientific Organization (Unesco), and the United Nations itself. Messages stressing the importance and significance of the conference were received from President Eisenhower, Sir Anthony Eden, Marshal Bulganin, Mr. Nehru, and other statesmen.

The seven-nation advisory committee, which had been set up by the General Assembly to assist the U.N. Secretary-General (Dr. Hammarskjold) in organizing the conference, took the following decisions at its first session in January last:

(1) The conference would be held in Geneva under U.N. auspices and would last for approximately two weeks.

(2) Invitations would be sent to all U.N. member-countries, and also to 24 non-members which were co-operating with U.N. specialized agencies (i.e., to 84 countries in all).

(3) Dr. Homi Bhabha, F.R.S., chairman of the Indian Atomic Energy Commission, would act as President of the conference.

It was subsequently agreed that Dr. Walter Whitman, of the Massachusetts Institute of Technology, would act as secretary-general of the conference, that Dr. Viktor Vavilov, of the Academy of Sciences of the U.S.S.R., would serve as deputy secretary-general; that an international team of 17 scientists, recruited from 11 countries, would draw up a provisional agenda and rules of procedure, and that the conference would have six vice-presidents—General Bernardino de Mattos, chairman of the Brazilian Atomic Energy Commission, Dr. W. B. Lewis, Vice-President (Research and Development) of Atomic Energy of Canada Ltd. (the government-owned Crown Company operating the Chalk River atomic energy plant); Professor Francis Perrin, French High Commissioner for Atomic Energy; Professor D. V. Skobeltzin, of the Academy of Sciences of the U.S.S.R.; Sir John Cockcroft, Director of the British Atomic Energy Establishment at Harwell, and Dr. Isidor Rabi, chairman of the General Advisory Committee of the U.S. Atomic Energy Commission.

After a meeting of the advisory committee in New York, presided over by Dr. Hammarskjold, it was announced on May 27 that the conference would provide "an opportunity for positive exchange of information and views" on the following subjects: the need for new sources of power, and the role of nuclear energy in meeting this need; the building of a nuclear energy enterprise, including experience with existing nuclear power plants (reactors), health and safety aspects of atomic energy; production of isotopes and their use in technology, industry, medicine, biology, and agriculture. It was explained that the conference would hold plenary sessions to discuss these subjects, followed by three parallel series of technical sessions dealing with (*a*) reactors and reactor physics, (*b*) reactor chemistry, technology, and metallurgy, and (*c*) the use of isotopes in biology, medicine, and industry. The conference would not discuss the establishment of an International Atomic Energy Agency as proposed by President Eisenhower, since this matter was under negotiation through normal diplomatic channels.

Simultaneously with the opening of the conference, two exhibitions illustrating the peaceful uses of nuclear power—the first of their kind—were opened in Geneva: (*a*) an exhibition of a scientific and technical nature, held in the grounds of the *Palais des Nations* and open only to delegates to the conference; (*b*) an exhibition at the *Palais des Expositions*, open to the general public and sponsored by private industries, universities, and research institutions in a number of countries. The latter exhibition—unconnected with that held at the *Palais des Nations*—contained both official and commercial exhibits and was primarily designed to illustrate the importance of nuclear power in industry.

One of the principal exhibits at the *Palais des Nations* exhibition was an American "swimming pool" type of nuclear reactor, which had been flown across the Atlantic from Knoxville, Tennessee. A prototype of the models that will be made available to over 20 countries under bilateral agreements with the U.S.A. (see below), it operates in a cylinder of purified water 10 ft. in diameter and 21 ft. deep, and uses approximately 18 kilograms of uranium. Prior to the opening of the conference, the U.S. Atomic Energy Commission had stated that qualified scientists of all countries would be able to observe and operate the reactor, and that the reactor itself would "use the type of fuel that other nations can draw from the 100 kilograms of Uranium-235 which the U.S.A. has made available for reactors in other countries as a major step in President Eisenhower's atoms-for-peace programme." It was announced on June 9 that the U.S.A. had agreed to sell the reactor to Switzerland for $180,000 after the conference ended.

The Soviet Union also presented important exhibits at the *Palais des Nations* exhibition, notably a reactor of graphite-moderated water-cooled type and a model of a research reactor. Other Soviet exhibits covered a wide field in the peaceful application of atomic energy and, for the first time, gave an indication to the outside world of Russian progress in this field of research.

The principal exhibitors at the *Palais des Expositions* were Britain, the U.S.A., and France, whilst Belgium, the German Federal Republic, Italy, the Netherlands, and Switzerland were also represented. The biggest and most comprehensive section was that of Great Britain, some 27,000 sq. ft. of floor-space being taken up by exhibits of the U.K. Atomic Energy Authority and over 30 British companies. Among British firms exhibiting were H. M. Hobson & Co., Tube Investments, Philips Electrical, Isotope Developments, and the English Steel Corporation. The major British companies capable of manufacturing complete atomic power stations for export were also represented—General Electric, Associated Electrical Industries, Metropolitan Vickers, English Electric, Babcock & Wilcox, Taylor Woodrow, and the Nuclear Power Plant Company. The American section was on a smaller scale, only 16 U.S. commercial firms being represented.

After addresses of welcome by the President of Switzerland (M. Petitpierre) and Dr. Hammarskjold, the conference opened with an inaugural speech by its President, Dr. Homi Bhabha. In the course of his address, Dr. Bhabha predicted that unlimited power would be available to mankind within two decades, by which time, he said, "the energy problems of the world will have been solved for ever."

Dr. Bhabha discussed the course of world energy consumption through the ages in terms of a large unit, denoted by a Q, which was equal to a million million million British thermal units of energy. In the first 18½ centuries of the Christian era, consumption was at an average rate of under half a Q a century. By 1850 the rate was probably about one Q a century. By 1950 roughly another five Q might have been consumed, and the rate of consumption had risen to 10 Q a century. Of this, 37 per cent was consumed in the United States, and if the entire present population of the world were to consume energy at the same rate a head, world consumption would now be running at five and a half Q in 10 years, instead of one Q. Coupled with a doubling of the world's population within the next 100 years, which was the least that could be expected, this would exhaust the known reserves of coal, oil, and natural gas (the so-called fossil fuels) within less than a century. This conclusion showed the absolute necessity of finding some new source of energy "if the light of our civilization is not to be extinguished because we have burned out our fuel reserves."

Continuing, Dr. Bhabha stressed that the dawn of the atomic age marked a change in the pattern of energy-use by mankind comparable to that introduced by the Industrial Revolution. "For the full industrialization of the under-developed countries," he said, "and for the continuance of our civilization and its further development, atomic energy is not merely an aid—it is an absolute necessity." He believed that within two decades means would be found of liberating energy by controlled fusion reactors, using the heavy hydrogen contained in the waters of the oceans; when that happened, the world's energy problems "will truly have been solved for ever."

Dr. Bhabha expressed regret that the People's Republic of China, comprising about one-quarter of the world's population, was not represented at the conference.

Three important announcements—two from the American side and one from the British—were made simultaneously with the opening of the conference.

(1) Rear-Admiral Lewis Strauss (chairman of the U.S. Atomic Energy Commission, and a member of the U.S. delegation at Geneva) announced that the U.S. Government would make fissile materials for research purposes available to other countries on the following terms: $25 a gramme for uranium enriched up to 20 per cent (to be leased only, and not sold); $40 a kilogram for normal uranium metal; and $28 a kilogram for heavy water. [Heavy water is used as a moderator and coolant in certain types of reactors.]

Rear-Admiral Strauss explained that the prices announced were designed to assist nations planning research reactors "for benign purposes," and that it was unlikely that any uranium enriched above 20 per cent would be leased or sold to other countries, since this would be "fringing on material for warlike purposes."

(2) The Ford Motor Company announced the establishment of a $1,000,000 fund to finance an annual prize for the best contribution by a scientist or scientific group to the peaceful uses of atomic energy. The awards would be made by an international jury on a world-wide basis and "without regard for nationality or political belief." The jury would select every year an individual or group of individuals to receive a prize consisting of $75,000 and a medal. If no award was made in any particular year, the money would be used for scholarships and fellowships to scientists "most likely to contribute to the advancement of the new science of the peaceful application of atomic energy."

It was stated that the offer was a response to President Eisenhower's appeal to business and professional men throughout the world to "provide an incentive in finding new ways" of using atomic science for the benefit of mankind It was also explained that the award would constitute a memorial by Mr Henry Ford (the head of the company) and his brothers to their father, Henry Ford I, the founder of the Ford Motor Company

(3) In a statement (issued in Geneva) describing recent British advances in nuclear power production, it was disclosed that British scientists had built a reactor that made two atoms of new fuel for every atom consumed. The relevant sentence ran as follows: "In 'Zephyr' [the name given to the Zero Energy Fast Reactor at Harwell] it has been found that the amount of plutonium created by the breeding method has been double that consumed in the reactor."

The British statement related to two new projects in the so-called "third stage" of atomic energy development—when "fast breeder reactors" are expected to be in use for the combined purposes of electricity generation and production of nuclear fuel in quantities greater than those consumed by the reactor. It was explained that the first project was an experimental reactor which was being built at Harwell, and which would be a full-scale copy of the type under construction at Dounreay (Caithness) The Harwell reactor, which would be known as "Zeus" (Zero Energy Uranium System), would operate at only one-millionth of the power intended for the Dounreay plant, and was expected to be in operation by the end of 1955. The second new project was for the construction at Dounreay of an experimental heavy water reactor

Important recent developments in the civilian and military application of atomic energy, and other related developments, are described below.

United States.

President Eisenhower's New "Atoms for Peace" Proposals. Speaking on June 11 at Pennsylvania State University, the President announced that he intended to submit two new proposals to Congress "(1) We propose to offer research reactors to the free nations who can use them effectively for the acquisition of skills essential to peaceful atomic purposes The U S A will contribute half the cost, and will also furnish the acquiring nation with the nuclear material needed to fuel the reactor (2) Within prudent security considerations, we propose to make available to the peoples of such friendly nations as are prepared to invest their own funds in power reactors, access to and training in the technological processes of construction and operation for peaceful purposes"

On June 24 Rear-Admiral Strauss announced that the President had authorized a doubling of the amount of enriched uranium which would be made available by the U S.A. for nuclear research in friendly countries—i e , from 100 kilograms (the amount allocated by the Atomic Energy Commission for this purpose in November last) to 200 kilograms A formal announcement to this effect was made by Admiral Strauss at the opening of the Geneva conference

Uranium Supplies from Belgian Congo. Details of an agreement signed on June 15 between the U.S A and Belgium, whereby both the U.S A and Britain would retain their existing option on the output of nuclear materials produced in the Belgian Congo, were announced by President Eisenhower on June 20. The relevant provision reads . "Belgium agrees not to transfer to any country, other than the United States or the United Kingdom, any nuclear materials produced in Belgium, the Belgian Congo, or Ruanda-Urundi, unless the Belgian Government is given assurances that the material will not be used for military purposes The Belgian Government agrees to consult with the United States on the international significance of any proposed transfer of any uranium or thorium ores, or any special nuclear materials, to any country other than the United Kingdom."

It was recalled in Washington that, under wartime agreements concluded in 1944, the U.S A. and Britain had been given an option on all nuclear power supplies produced in the Congo These purchases had been made through a Combined Development Agency, which had entered into contracts with the African Metals Corporation, acting for the *Union Minière du Haut Katanga* As regards the new U.S.-Belgian agreement, President Eisenhower informed Congress (1) that the Combined Development Agency would have the first option to purchase 90 per cent of the uranium and thorium ores produced in Belgium and the Congo during the calendar years 1956 and 1957, and 75 per cent of the ores produced in 1958, 1959 and 1960; (2) that Belgium had agreed to evaluate her requirements of these ores after 1960, and to consult with the U.S A on establishing an agreed percentage of materials on which the Agency could have a first option after that year; (3) that the U.S. Atomic Energy Agency, in return, would sell to Belgium enriched uranium for use in Belgian reactors for purposes of peaceful research

Military and Civilian Atomic Co-operation Agreements with Britain and Canada. On the same day (June 20) President Eisenhower announced that two agreements on co-operation in the civil and military uses of atomic energy had been concluded with Britain on June 15; that the civil agreement would run for ten years; and that the military agreement would remain in force until terminated by mutual consent. The announcement relating to the military agrreement was contained in the following letter from the President to Senator Clinton Anderson, chairman of the Joint Congressional Committee on Atomic Energy:

"... Under the terms of the proposed agreement, the U S.A may exchange with the United Kingdom ... atomic information which the U.S.A. considers necessary to: (1) the development of defence plans, (2) the training of personnel in the employment of, and defence against, atomic weapons; (3) the evaluation of the capabilities of potential enemies in the employment of atomic weapons The U.K. will make atomic information available to the U S A on the same basis

"Atomic information made available [under this agreement] will not be transferred to unauthorized persons, or beyond the jurisdiction of the recipient Government, except where that information is to be communicated to another nation or regional organization which has already been given the same information under an agreement similar to this, and then only to the extent that such transfer is specifically authorized by the originating Government Transfers of atomic information by the U S A. under the agreement will be made only in accordance with the Atomic Energy Act of 1954, and such information will be safeguarded by the stringent security arrangements in effect between the U S A. and the United Kingdom .

"The Department of Defence has strongly recommended this agreement Through the co-operative measures foreseen, we will have aided materially not only in strengthening our own defences but also those of our British ally, and will thereby contribute greatly to the mutual defence efforts which are of such vital importance to the maintenance of our common freedom"

Details of the civil agreement were contained in a White Paper issued on the same day by the British Government (see section "United Kingdom" below)

Military and civil agreements with Canada, identical with those concluded between the U.S A and Britain, were also announced in Washington on June 20.

Bilateral Atomic Agreements for Peaceful Purposes. The first bilateral agreement on co-operation in the use of atomic energy for peaceful purposes was signed with Turkey on May 3, 1955. It was followed in May, June and July by similar agreements with Brazil, Colombia, Lebanon, Israel, Argentina, Italy, Spain, Switzerland, Denmark, Venezuela, Nationalist China, the Netherlands, Portugal, Britain, Canada, Belgium, Pakistan, the Philippines, Chile, Japan, Greece, Uruguay, Sweden, Peru, South Korea, and Siam By the end of July the U S A had thus concluded "atoms for peace" agreements with 27 countries.

The agreement with Italy (signed on June 7) also provided that the U S A. would supply Italy with an atomic reactor for the development of the peaceful use of atomic energy, together with some uranium fuel Under the agreement with Pakistan (June 15) it was provided that the U S Atomic Energy Commission would lease to the Pakistani Government up to six kilogrammes of enriched uranium On June 27 it was announced in Washington that an agreement had been concluded with France for the sale of 30 tons of heavy water to that country for use in the two French atomic reactors

In anticipation of a bilateral agreement on the exchange of atomic information, the U S Embassy in Paris announced on March 28 that the U S Government would supply to France an "atomic library" covering reports and surveys of the U S. Atomic Energy Commission, as well as technical summaries of 50,000 articles on atomic subjects published throughout the world. The first volumes of this library were handed over in Paris on April 15 Similar libraries were handed over to Norway, South Africa and Australia in July

Atomic Power for Civilian and Industrial Uses. The first atomically-generated supply of electric power for civilian consumers went into operation on July 18. The electricity is "fed" into the transmission system of the Niagara-Mohawk Power Corporation, covering a wide area of northern New York State. The power is obtained from a 10,000-kilowatt reactor which had been constructed at West Milton by the General Electric Corporation The reactor is of the same type as that used in the U S atomic submarine *Seawolf* (see 14338 D).

Plans to help American private industry to develop and operate experimental atomic power plants were announced by the Atomic Energy Commission on Jan 9, 1955 It was stated that the programme was designed primarily for the development of private power plants that would generate electricity, and that companies and individuals submitting acceptable proposals could qualify for three types of Federal aid—the free use of nuclear fuel, free research work in A E.C laboratories, and payments for technical and economic data In studying proposals, the A.E.C would employ five basic criteria. (1) the probable contribution of the proposed project towards the eventual achievement of competitive economic power, (2) the cost to the Commission, (3) the risk to be assumed by the private interests concerned, (4) the competence and responsibility of the private interests, (5) assurances to be given by the private company against the possible abandonment of the project. Prices for materials and services would be made available to "properly cleared persons," and price lists would be drawn up for natural uranium, thorium, heavy water, uranium-235, uranium-233, and plutonium [The last three may not be owned by private industry, but only leased, the others may be either sold or leased.]

The manufacture, ownership, and operation of atomic reactors and related activities by private concerns had been authorized in the Atomic Energy Amendment Act (1954), which lifted the restrictions imposed by the "McMahon Act" of 1946 (see 13756 A).

President Eisenhower's Proposal for Atomic-powered Merchant Ship. President Eisenhower announced on April 25 that he intended to ask Congress for funds to build an atomic-powered merchant ship which would "travel round the world to demonstrate to people everywhere the peace-time uses of atomic energy, harnessed for the improvement of human living." He added that the ship would be "an atomic exhibit carrying to all people practical knowledge of the usefulness of this new science in medicine, agriculture, and power production"

A request for $21,000,000 for this purpose was made by the President on May 26, the proposed sum being included in a series of supplementary appropriations, totalling $140,000,000, which were submitted for Congressional approval. [It was explained that the cost of the proposed atomic-powered ship would be $33,000,000, of which $21,000,000 would be for the power plant and $12,000,000 for the design and construction of the hull.] The Joint Congressional Atomic Energy Committee, however, rejected the President's request on June 13 on the ground that the proposal was impracticable; nevertheless, it inserted in an Appropriations Bill a sum of $25,000,000 for the development of a power plant that could be used to propel large surface vessels, either military or freight-carrying Senator Clinton Anderson (the committee's chairman) said that the ship proposed by the President would be a "museum piece" serving no practical purpose.

Although a Bill appropriating $294,700,000 for the Atomic Energy Commission was passed by the Senate and the House of Representatives on June 28-29, both Houses refused to insert in it the appropriation of $21,000,000 which the President had requested for an atomic-powered ship The proposal was rejected in the Senate by 42 votes to 41

On July 18, however, the House of Representatives passed a Bill (by voice vote) authorizing the Maritime Commission to construct an experimental atomic-powered passenger-freight ship. Representative Herbert Bonner (chairman of the House Merchant Marine Committee) said that this vessel could carry U S goods to foreign ports in the same manner as the President's proposed "demonstration" vessel, moreover, it would do more to advance the U S merchant marine than the ship proposed by the President. After a personal appeal by President Eisenhower to reconsider the matter, the Joint Congressional Committee on Atomic Energy met on July 29 and approved (by 9 votes to 3) both the atomic "peace ship" and the prototype merchant vessel No further action, however, was taken before Congress adjourned on Aug. 2.

The "Hydrogen-Uranium" Bomb. In a speech on June 3 to the University of Chicago, Dr. Willard Libby (a member of the A.E.C., and one of America's foremost atomic scientists) indicated that a thermo-nuclear (hydrogen) bomb could be made with the cheapest atomic explosives and in virtually limitless size The *New York Times* commented as follows on Dr. Libby's speech, which was of a highly technical nature:

"The chief significance of Dr. Libby's speech was his reference to a nuclear explosion capable of releasing 'ten megatons of fission energy.' The key word is 'fission' The ordinary atomic bomb releases energy by fissioning or splitting atoms. The thermo-nuclear weapon does this by 'fusion' of hydrogen atoms Ordinary atomic bombs are placed in the 'kiloton' category, and thermo-nuclear weapons in the 'megaton' class A kiloton is equivalent to 1,000 tons of TNT; a megaton to 1,000,000 tons.

"Dr. Libby referred to a 10,000,000-ton weapon that released energy by fission rather than fusion This indicated that ordinary, cheap Uranium-238 was the major explosive content The significance of this is held to be enormous. To physicists it means that Russia or any other country able to make ordinary atomic bombs can, with a little more effort, create super-weapons of the megaton class The great complications and expense hitherto associated with the manufacture of the thermo-nuclear bomb thus become negligible

"Moreover, this cheaper weapon is tremendously more deadly than a pure hydrogen bomb. The product of fusing hydrogen in the hydrogen bomb is stable helium, which is not radioactive. . . . By adding ordinary uranium to this weapon, additional lethal radioactivity is created"

United Kingdom.

Civil and Military Agreements with U.S.A. Details of the U.K.-U.S. agreement for co-operation in the civilian uses of atomic energy, referred to by President Eisenhower on June 20 (see above), were given in a White Paper issued in London on the same day

The civil agreement (the White Paper stated) dealt mainly with the exchange of information, and provided also for the exchange of materials and of specialized facilities for research Information primarily of military significance was excluded, and this would apply for the present to the development of power reactors for use in submarines, ships, and aircraft, and also to certain types of transportable ("package") reactors. Patents owned by either country could be used by the other without royalty, subject to safeguards

Information to be exchanged under the civil agreement would cover all data of a general character needed in the design of a reactor—e.g., reactor physics and engineering, the properties and specification of materials used in reactors, the general specification of components, and the general characteristics of experimental and power reactors. Information would not, however, be exchanged on specific power reactors, whether experimental or for use, "unless the reactor is currently in operation in the receiving country or is being considered seriously for construction by the receiving country" as part of a power-production programme

There would be full exchange on all stages of the finding, production, and purification of uranium and thorium. On other relevant materials, including "special nuclear material," there would be full exchange in respect of properties of all kinds and behaviour under all conditions; but, except as agreed, information on their production and use would stop short of the design and operation of pilot plants. This restriction would apply in particular to the design and operation of plants for the separation of Uranium-235 (the fissile isotope of uranium) and of heavy hydrogen and tritium; also, by implication, to plants for the separation of plutonium

A separate White Paper was issued on the military agreement. It gave the same information as that contained in President Eisenhower's statement.

Nuclear Power for Industry. The Nuclear Power Plant Company, with a capital of £1,000,000, and registered offices at Newcastle-upon-Tyne, was formed in May to design and construct nuclear power plants. It comprises the following eight companies—C A Parsons & Co (Newcastle), Head, Wrightson and Co (Thornaby-on-Tees), A E. Reyrolle, Sir Robert McAlpine & Co, Whessoe, Findlay & Co, Strachan and Henshaw, and Clarke, Chapman & Co. The activities of the eight associated companies will be co-ordinated by the Parolle Electrical Plant Co, which is owned jointly by Parsons and Reyrolle The Parolle and Whessoe companies have been concerned with design and construction work at Calder Hall, whilst Head, Wrightson is designing and building the heavy water plant now under construction in New Zealand, as well as a heavy water plant (the first of its kind in Britain) at Harwell

It was announced on March 16 that some of the largest engineering firms in Britain, who were likely to be concerned in the Government's programme for developing nuclear power for industry, had formed a joint team of nuclear physicists, engineers, and technicians to study the problems of designing larger and more powerful atomic power stations The study group would be known as the A E I-John Thompson Atomic Energy Group, and would be recruited from the staffs of Metropolitan-Vickers Ltd (Manchester), British Thompson-Houston Ltd (Rugby), and the John Thompson group of companies (Wolverhampton)

The U K Atomic Energy Authority disclosed on June 14 that big new sources of atomic radiation, obtained from "waste" products in atomic reactors, would be made available to industry and medicine. In addition to a wide range of now conventional applications, such as the treatment of disease and the X-raying of steel plates, many new uses for atomic "waste" products were envisaged—e.g., the manufacture of antibiotic drugs, the killing of insect pests, and the sterilization of food. The Authority announced that a Technological Irradiation Group, concentrating for the time being on the industrial applications of atomic "waste" had been formed to handle this new sphere of work

New Atomic Reactors. The Minister of Fuel and Power (Mr. Geoffrey Lloyd) informed the House of Commons on June 13 that the Government had decided to build six more reactors, additional to those announced in the Government's £300,000,000 programme (see 14045 A) Mr Lloyd stated that all six reactors would be of the Calder Hall type, that they would be designed "to produce fissile material for military purposes, as well as electricity", and that two of them would be built at Calder Hall, and the other four near the chemical processing plant at Windscale He added that "this work will go full speed ahead and produce a useful contribution to the electricity of the grid within the lifetime of the present Parliament."

The Atomic Energy Authority announced on the following day that four atomic reactors would be erected near Annan (Dumfriesshire) on the site of a disused airfield.

British Exports of Isotopes. An official survey of British and Commonwealth nuclear research, published on Aug 8 by the Central Office of Information, showed that Britain was the world's greatest exporter of radio-isotopes, such exports in 1954 having been greater than those of all other countries combined. British exports of isotopes from the Amersham and Harwell plants had risen from 135 in 1947 to 19,531 in 1954; the exports were "reasonably priced"—e g, the average value of each item dispatched from Amersham in 1954 was £20, while a number of items cost as little as £5.

Committee on Medical Effects of Radiation. The Parliamentary Secretary to the Ministry of Works (Mr. Bevins) announced on May 4 that a 16-member committee had been appointed by the Medical Research Council to prepare a report on medical aspects of nuclear radiation The committee's chairman is Sir Harold Himsworth, secretary to the Medical Research Council, its other members including Sir John Cockcroft and Sir Edward Salisbury, Director of the Royal Botanic Gardens, as well as a number of university professors.

The Government's decision to set up such a committee had been announced on March 29 by Sir Winston Churchill, then Prime Minister.

Atomic Co-operation Agreement with France. It was announced on May 5 that the U K Atomic Energy Authority and the French Atomic Energy Commission had concluded an agreement "for the exchange of unclassified information between the two organizations on a range of subjects" In addition, the U.K. Authority would help the French Commission "by giving advice and by supplying experimental quantities of various materials."

An atomic co-operation agreement between the U.K. and Denmark had been announced on June 10—see 14245 B.

France.

Renunciation of Atomic and Hydrogen Bombs. The French Prime Minister, M. Faure, announced on April 13 that atomic research in France would be devoted solely to peaceful purposes, and that the French Government would manufacture neither atomic nor hydrogen bombs. He added that France would become "a peaceful atomic Power" (*une puissance atomique pacifique*) and that M Palewski, the Minister responsible for atomic energy development, was drawing up an important plan designed to make up for past delays and to ensure future progress in the peaceful application of atomic energy.

In a previous statement on March 16, M. Faure had stated at a press conference that he was of the opinion that France should make the hydrogen bomb. Asked about the French Government's attitude

to the H-bomb, in view of the British decision to manufacture it, he replied: "It seems clear that there will soon be two classes of nations: 'strong and aristocratic' nations possessing thermo-nuclear weapons, and 'inferior' nations—not from the moral but from the material point of view—who do not possess them. I ask myself whether France can relinquish her right to be in the former category. This question will be examined in the near future, and I think it safe to say that we shall reject a purely negative solution... France cannot remain a 'diminished great Power' in face of this new criterion."

No official explanation was given as to the reasons for the Government's change of mind on the question of manufacturing atomic weapons. The French Socialist Party, however, had announced on March 23 that it was strongly opposed to the manufacture of any atomic weapons on the grounds that the entry of France into military atomic competition would be ineffective militarily, difficult in practice, and financially unsupportable. Considerable opposition to the manufacture of atomic weapons had also been expressed on the ground of the great expense involved.

Commission for Nuclear-produced Electricity. A consultative commission to study the possibility of producing electricity from nuclear sources (*commission consultative pour la production d'electricité d'origine nucléaire*) was set up by decree on April 27. Headed by M. Blum-Picard, vice-president of the *Conseil-général des mines*, it includes leading industrialists, technicians, and scientists, among them Professor Perrin, the High Commissioner for Atomic Energy.

Atomic Energy Development Plan. It was announced on May 1 that the Government had approved a plan, drawn up by M. Palewski, under which it was proposed to spend 100 milliard francs (about £100,000,000) during the next three years on the peaceful development of atomic energy. The sum was divided approximately as follows: 15 per cent for the production of raw materials (minerals), 15 per cent for the primary materials needed for atomic piles or reactors—i.e., uranium, thorium, and heavy water; 30 per cent for the extension of the present research centre at Marcoule by constructing two supplementary atomic piles, which would bring about a considerable increase in the production of plutonium and nuclear-produced electricity, 20 per cent for research on marine engine prototypes; 20 per cent for research on new technical methods and secondary reactors.

Atomic energy developments in other countries are summarized below:

Australia. The Federal Minister of Defence (Sir Philip McBride) announced on July 6 that a £750,000 contract had been given to a British company (Head, Wrightson) for the design and supply of the 10,000-kilowatt nuclear reactor to be built under Australia's current five-year atomic research and development programme (see 14102 A). He added that it would be of the heavy water type, similar to the one under construction at Harwell, in England, and that it would be used by the Australian Atomic Energy Commission for the production of radio-isotopes, as well as for research.

Canada. The Federal Minister of Trade (Mr. Howe) announced in March that Canada's first atomic power station for the production of electricity was being built jointly by the Federal Government and the Ontario Hydro-Electric Power Commission at a cost of about $15,000,000. Situated at Des Joachims, on the Ottawa River 150 miles north-west of Ottawa, it is expected to be in production by 1958 and is designed to produce 10,000-20,000 kilowatts of electric power.

Mr. W. J. Bennett, president of Atomic Energy of Canada Ltd., disclosed on June 17 that a $2,500,000 plant designed to make Canada self-sufficient in pure uranium supplies had been opened at Fort Hope, Ontario. Previously Canada had shipped uranium ore to the U.S.A. for processing.

German Federal Republic. The Federal Government's decision to build Germany's first atomic reactor at Karlsruhe was announced in Bonn on Aug. 2. The official statement pointed out that the restrictions on the development of atomic energy in the Federal Republic had been removed by the Paris Agreements, and that the Karlsruhe reactor would be used "for the technological and scientific exploitation of nuclear energy for peaceful purposes." It added that the site had been chosen by a committee of experts under the chairmanship of the Federal Chancellor, Dr. Adenauer, that the *Land* Government of Württemberg-Baden and the Karlsruhe municipal authorities had been consulted; and that the question of co-operation between the Karlsruhe project and the Max Planck Institute of Physics at Göttingen was under consideration.

For some time previously the Bavarian Government had urged that Munich should become the principal centre of atomic research in Western Germany. Despite the Federal Government's eventual choice of Karlsruhe, a sum of 9,000,000 DM was voted by the Bavarian Government on Aug. 5 for the construction of an atomic reactor near Munich, together with another 6,000,000 DM. for the possible transfer from Göttingen to Munich of the Max Planck Institute. It was officially announced that the Bavarian Government would set up its own Atomic Energy Authority in the near future; that it would consist of 15 members representing universities, technical institutes, and the chemical, coal, and electrical power industries, under the chairmanship of the *Land* Premier (Dr. Hogner), and that the Bavarian reactor would be devoted solely to research work into the peaceful applications of atomic energy.

India. Mr. Nehru informed the Indian Parliament on March 21 that it was planned to construct an experimental atomic reactor in India during the present year and a bigger one in 1956. He also disclosed that the Government were planning to construct a plant near Bhakra for the production of heavy water.

Netherlands. In a ministerial memorandum presented to the States-General on July 20, it was announced that a foundation known as the Netherlands Reactor Centre (N.R.C.) would be responsible for planning and constructing an atomic reactor and for the peaceful development of atomic energy generally, under Government supervision. [In August 1954 the States-General had approved the construction of an atomic reactor in the Netherlands at a cost of 28,000,000 guilders, half to be borne by the Government and half by private industry.] Dr. J. M. W. Milatz, Professor of Experimental Physics in the University of Utrecht, was appointed Director of the N.R.C.

The memorandum stated that the N.R.C. would be in charge of the development of a new type of reactor, designed by Dutch scientists and known as "Suspop," which had attracted attention outside the Netherlands, that it would also be responsible for atomic energy co-operation with Norway under the joint Netherlands-Norwegian programme (see 11918 E, 11463 B), and that an agreement had been signed with the U.S.A. for the construction in the Netherlands, with American assistance, of a materials-testing reactor.

Soviet Union. An International Atomic Conference, attended by scientists and technicians from all the Communist countries and from 11 non-Communist countries (Austria, Norway, Sweden, Finland, Japan, India, Burma, Egypt, Persia, Israel, and Yugoslavia), was held in Moscow on July 1-5. The delegates saw models of the Soviet 5,000-kilowatt atomic power station opened in 1954 (see 13685 E), as well as a number of new Soviet atomic devices for use in industry and agriculture.

The Soviet Government's decision to contribute fissionable materials to the international "atoms for peace" pool proposed by President Eisenhower was announced at the Geneva "summit" conference on July 18 by Marshal Bulganin (see page 14326, first column).

A world survey of nuclear reactors, present and projected, was issued in New York on Aug. 7 by Atomic Industrial Forum Inc., which had conducted an international survey of atomic energy development.

The survey stated that a total of 42 reactors was known to exist in the world at present, with the "strong probability" that several more existed in the Soviet Union. Of the known reactors, 29 were located in the U.S.A., five in Britain, two each in France and Canada, and one each in the Soviet Union, Norway, Sweden, and Switzerland. [The last-named was the U.S. "swimming-pool" reactor exhibited in Geneva, which, as stated above, will be sold to Switzerland.] In addition, another 20 reactors were known to be under construction: nine in the U.S.A., three each in Britain and France, and one each in Australia, Belgium, Canada, India, and the Soviet Union.

As regards future planning, Britain led the world with 22 reactors projected, the U.S.A. was second with 16, and France third with three. Seven other countries were planning to build one reactor apiece: Belgium, Canada, Italy, the Netherlands, Sweden, Switzerland, and Western Germany.

The survey stated that of all the countries approached for information, only the Soviet Union had failed to respond.
(U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - Financial Times - New York Times - New York Herald Tribune - Le Monde, Paris - Australian News and Information Bureau - Montreal Star - Netherlands News Agency - Frankfurter Allgemeine Zeitung - The Statesman, Calcutta) **(Prev. rep. U.N. Resolution, 13993 A; President Eisenhower's "Atoms for Peace" Proposals, 13285 A; U.K. 10-Year Plan, 14045 A; U.S. Developments, 13946 A; France, 13802 B; Australia, 14102 A.)**

A. RUMANIA. — Retention of Soviet Troops.

The Rumanian Prime Minister, M. Gheorghiu-Dej, announced on Aug. 12 that Soviet troops would continue to be stationed in Rumania after the withdrawal of the Russian occupation forces from Austria. He added that although the U.S.S.R. was permitted, under the Rumanian Peace Treaty, to keep troops in Rumania only as long as they were required to maintain lines of communication with the Soviet forces in Austria, the situation had changed because of the signing of the Paris Agreements and the "revival of German militarism." Under the East European treaty of mutual assistance (the Warsaw Treaty), Soviet forces would therefore remain in the country until the withdrawal of "foreign forces" from Western Europe and the dissolution of the NATO.
(Le Monde, Paris) **(Prev. rep. Warsaw Treaty, 14249 A; Rumanian Peace Treaty, 8483 A.)**

B. NETHERLANDS. — Minister for Realm Affairs.

It was announced early in August that Mr. W. F. M. Lampe, hitherto Minister of Justice in the Netherlands Antilles Government, had come to The Hague to take up the post of Minister for Realm Affairs for the Netherlands Antilles, with a seat in the Netherlands Cabinet. Mr. Lampe, who was born in Aruba, will attend Cabinet meetings when matters affecting the whole Realm (i.e. the Netherlands Antilles and Surinam in addition to Metropolitan Holland) are under discussion.
(Netherlands News Agency) **(Prev. rep. 14041 A.)**

A. UNITED STATES. — Foreign Aid, 1955-56. - Authorization and Appropriation Bills. - Hoover Commission Report on Foreign Aid.

A Bill appropriating $2,703,341,705 for foreign aid in the year July 1955 - June 1956 was signed by President Eisenhower on Aug. 2 after having been given final approval by both Houses of Congress on July 28. The distribution of the principal items was as follows:

(1) Military assistance		$705,000,000
(2) Direct military support		317,200,000[1]
(3) Defence support :—		
(a) *Asia*	825,000,000[2]	
(b) *Near East and Africa*	113,700,000[3]	
(c) *Europe*	85,500,000[4]	
		1,024,200,000
(4) Development assistance :—		
(a) *Near East and Africa*	73,000,000	
(b) *Asia*	51,000,000[5]	
(c) *Latin America*	38,800,000[6]	
		162,800,000
(5) Technical co-operation		127,500,000
(6) Special Presidential funds		200,000,000[7]
(7) U.N. Relief and Works Agency		58,400,000
(8) U.N. Technical Assistance Programme		24,000,000[8]
(9) Inter-Governmental Committee on European Migration		11,250,000
(10) Escapee programme		6,000,000
(11) NATO		3,700,000

[1] Including $12,200,000 for additional assistance to Siam and Nationalist China. [2] Including $25,000,000 of unexpended funds carried over from previous years [3] Including not less than $26,200,000 for Greece [4] Including $50,000,000 for Spain, $22,000,000 of which would be used for the purchase of U S surplus agricultural products. [5] $50,000,000 for India and $1,000.000 for Nepal. [6] And dependent territories of Western Hemisphere [7] $100,000,000 (to be available in the three years to June 30, 1958) for Asian economic development, and $100,000,000 for a special fund to be used where the President deemed advisable. [8] For 18-month period January 1955 - June 1956

The Authorization Bill for foreign aid (which has to be passed before the money can be appropriated) had been signed by the President on July 8. It had authorized a total of $3,285,800,000, which was the same as that approved by the House of Representatives on June 30 by 273 votes to 128. Although the Senate (by 59 votes to 18) had on June 2 authorized some $122,000,000 more, it subsequently agreed in conference committee to accept the House figure.

When the Appropriations Bill came up for consideration, the House Appropriations Committee, complaining of the "chaotic fiscal situation" in that part of the programme dealing with military aid, reduced the amount to be appropriated to $2,638,741,750, which was approved by the full House on July 11 by 251 votes to 123. However, as a result of warnings by the Administration of the serious effect which such a reduction would have on U.S. foreign policy objectives in a number of countries, it was largely restored by the Senate Appropriations Committee on July 19, and on July 22 the full Senate approved the appropriation of $3,205,841,750 by 62 votes to 22. In the Senate-House conference committee, the major item in dispute—a House cut of $420,000,000 in appropriations for military assistance—was agreed to by Senate conferees after it had been decided that $302,000,000 in unexpended funds from previous years could be used by the Defence Department in addition to the new funds provided. After the committee had reached a compromise on the other differing items, it approved the appropriation of $2,703,341,705 on July 27.

Although the foreign aid Bills encountered less opposition in Congress than in previous years, a number of attempts were nevertheless made to reduce the authorizations or appropriations still further, or to eliminate certain items. Thus, in the Senate debate on the Authorization Bill, Senator Jenner (Rep) attacked the whole concept of foreign aid and moved that the Bill be sent back to committee, whilst Senators Ellender and Russell B. Long (Dem.) proposed a number of amendments seeking to cut the authorizations by up to $1,000,000,000. All these proposals were rejected, as were amendments by Senators Potter and Knowland (Rep) proposing that 75 per cent and 50 per cent respectively of the economic aid should be in the form of loans. In the House debate on the Authorization Bill, proposals that aid to India and Yugoslavia should be eliminated were also rejected.

During the House debate on the Appropriation Bill an amendment by Representative Alvin Bentley (Rep.) that no aid should be given to the British military aircraft industry was defeated.

A report on the U.S. foreign aid programme was published on June 5 by the Hoover Commission on Organization of the Executive Branch of the Government. The Commission thought that the foreign aid programme should be continued despite past "mistakes and waste", but recommended that Congressional committees should make a thorough examination of future programmes, which, it said, should have "the primary purpose of strengthening the security of the United States." It estimated that at least $360,000,000 a year could be saved by better administration of foreign aid, and endorsed the President's proposals to replace the Foreign Operations Administration on June 30 by the International Co-operation Administration under the State Department.

Some of the principal points from the report were as follows:

(1) The time had come when "certain" countries no longer needed extensive support from the U.S A because of their increased economic strength Although the Commission did not specify the countries in question, it noted that the President had not requested any funds for economic aid to the European countries originally members of NATO.

(2) Technical assistance still being given to the original NATO countries in Europe should also cease.

(3) In the aid programme for the "free arc of Asia" no large manufacturing or industrial projects should be undertaken, except possibly in Japan The Commission thought that the fundamental need of many countries in Asia and Africa was for increased food supplies, and that U.S. aid to such areas was only justified if employed in developing irrigation and improving agricultural methods.

(4) The U.S A. should not undertake the same technical assistance programmes as the United Nations.

Seven of the 12 members of the Commission, in a separate statement, expressed the view that "substantial reductions" should be made in the foreign aid programme. The statement said: "Surely, after almost 10 years, the time has come to apply some brakes to this overseas spending programme. We believe that the Commission should recommend substantial reductions in expenditures for this purpose. By no other means will the growing trend towards permanent foreign spending be halted"

The Hoover Commission reported that the foreign aid programme had cost U.S. taxpayers $50,000,000,000 since the end of the Second World War.—(New York Times - New York Herald Tribune) **(Prev. rep. 14173 A; 13744 A.)**

B. UNITED KINGDOM. — Gold and Dollar Reserves in July. - Fall of $136,000,000.

The sterling area had a gold and dollar deficit in July of $136,000,000 after taking account of (*a*) the receipt of $16,000,000 in U.S. defence aid, (*b*) the payment of $10,000,000 to the European Payments Union, representing that part of the June settlement which was paid in gold or dollars, and (*c*) the payment of $2,000,000 under bilateral settlements with creditors of the E.P.U. As a result, the sterling area's gold and dollar reserves fell to $2,544,000,000 on June 30, the lowest figure since January 1954.

It was explained by the Treasury that the $16,000,000 in U.S. defence aid included $12,000,000 for tobacco held in the U.S.A for supply to Britain, and that the net amount of defence aid accruing to the reserves during the month was therefore only $4,000,000

The estimate of defence aid received in June was increased from $10,000,000 to $13,000,000 so as to include amounts made available for tobacco late in the month and used for similar purposes.

Provisional figures for the E.P.U. July settlement showed that the U.K. had a deficit of $70,000,000 (£25,000,000), which would be settled in August half in gold or dollars and half by an increase in the U.K. debt to the Union.
(Treasury Press Office) **(Prev. rep. 14295 F.)**

C. AUSTRALIA. — University of New England.

Sir Earle Page, the Federal Minister of Health, was installed on Aug. 4 as the first Chancellor of the University of New England, which had been opened at Armidale (N.S.W.) in 1954.

A University College had been established at Armidale in 1938 as a constituent college of the University of Sydney. In February, 1954, it was raised to the status of a full University by the Government of New South Wales. Situated on a 700-acre site, it has at present faculties of Arts, Natural Science, Rural Science, and Agricultural Economics. Although only 75 of the University's 240 students "live in," it plans in time to become fully residential.

New England is an area of northern and north-western New South Wales covering some 64,000 miles, bounded approximately by the Hunter, Barwon, and Maclean Rivers. It contains a population of about 680,000. A strong local movement for Statehood has existed in New England for many years.
(Times)

D. JAPAN. — American Cotton Credit.

The U.S. Export-Import Bank announced on Aug. 3 that it was extending a credit of $60,000,000 to the Bank of Japan to finance Japanese purchases of U.S. cotton in the 12 months ending July 31, 1956. The credit—the fifth of its kind to Japan—would, it was estimated, finance the purchase of about 330,000 bales of cotton at current prices.—(New York Times) **(Prev. rep. 13801 E.)**

AUGUST 13—20, 1955

A. NORTH ATLANTIC TREATY ORGANIZATION. — The First Five Years of NATO. - Developments in 1955.

A book surveying the activities and structure of NATO during the first five years of its existence, written by Lord Ismay (the Secretary-General of the North Atlantic Treaty Organization), was published on Jan. 30, 1955, under the title *NATO—The First Five Years, 1949-1954*. It gave a history of the setting-up and development of the Organization; a description of its machinery; a list of its chief personnel; a survey of its activities in various spheres, both military and civil; and a summary of its achievements during the five-year period.

Some of the information contained in the book is summarized below.

The Structure of NATO.

Lord Ismay (then a Cabinet Minister in the U.K. Government) was appointed Secretary-General of NATO on March 12, 1952. He has under him an international Secretariat drawn from all NATO countries, together with a Staff (also internationally recruited) grouped into three main divisions (1) a Political Affairs Division, headed by Signor Sergio Fenoalta (Italy), (2) an Economics and Finance Division, headed by M René Sergent (France), (3) a Logistics Division, headed by Mr. Lowell P. Weicker (U.S A). There are also an Office of Statistics, a Financial Comptroller's Office, and an Information Division, headed respectively by Mr Loring Wood (U.S.A.), M. Bastin (Belgium), and Mr Geoffrey Parsons jr (U S A).

North Atlantic Council. The chairmen of the North Atlantic Council since its inception have been as follows:

1949-50	Mr. Dean Acheson (United States)
1950-51	M Paul Van Zeeland (Belgium).
1951-52	Mr. Lester B Pearson (Canada).
1952-53	Hr. Ole Bjorn Kraft (Denmark)
1953-54	M. Georges Bidault } (France)
	M Pierre Mendès-France }
1954-55	M. Stephanos Stephanopoulos (Greece).

The permanent representatives on the North Atlantic Council were as follows on July 1, 1954:

Belgium	M André de Staercke
Canada	Mr Dana Wilgress.
Denmark	Hr J A Vestbirk
France	M Hervé Alphand.*
Greece	M. Exintaris
Iceland	Hr. H G Andersen
Italy	Signor Adolfo Alessandrini.
Luxemburg	M Nicolas Hommel
Netherlands	Jonkheer A. W L Tjarda van Starkenborgh-Stachouwer.
Norway	Hr Arne Skaug.†
Portugal	Count de Tovar.
Turkey	M Fatin Zorlu.
United Kingdom	Sir Christopher Steel
United States	Mr. John A. Hughes.‡

* Succeeded in September, 1954, by M. Couve de Murville (see 13820 B), who in turn was succeeded by M. Alexandre Parodi in November, 1954 (see 13876 B) † Succeeded by Hr Boyesen (see below). ‡ Succeeded by Mr George W. Perkins in March, 1955 (see 14113 B).

Consequent upon the recent entry of the German Federal Republic into NATO, Herr Herbert Blankenhorn became West German permanent representative on the North Atlantic Council (see 14237 A.)

Military Organization. Supreme Headquarters, Allied Powers in Europe (SHAPE) was established in the Versailles area in 1951. General Eisenhower remained Supreme Allied Commander in Europe (SACEUR) until May 1952, when he was succeeded by General Matthew B. Ridgway (U.S A) In July 1953 General Ridgway was nominated Chief of Staff of the U.S Army and was succeeded as SACEUR by General Alfred M. Gruenther (U S.A.), who had been Chief of Staff to both the former Supreme Commanders

Field-Marshal Viscount Montgomery of Alamein (U.K.) has been Deputy Supreme Commander of NATO from the outset. He has two deputies a First Air Deputy (originally Air Chief Marshal Sir Hugh Saunders, U K, and now General Lauris Norstad, U.S.A) and a First Naval Deputy (Admiral Lemonnier, France).

Under the North Atlantic Council (which meets at the Palais de Chaillot in Paris) comes the Military Committee of NATO, which is divided into (*a*) a Military Representatives Committee, and (*b*) a Standing Group, both with their headquarters in Washington The Military Committee—the supreme military authority, consisting of one Chief of Staff from each member-country—exercises general supervision over the four main NATO military organizations those of the Supreme Allied Commander, Europe; the Supreme Allied Commander, Atlantic; the Canada-U.S. Regional Planning Group; and the Channel Committee. The Military Committee meets periodically in Washington.

The chairmen of the Military Committee since its inception have been as follows:

1949-50	General Omar N. Bradley (U.S.A)
1951-52	Lieut.-General Etienne Baele (Belgium).
1952	Lieut.-General Charles Foulkes (Canada).
1953	Admiral E J. C. Qvistgaard (Denmark).
1954	General Paul Ely } (France).
	General Guillaume }

The Military Representatives Committee consists of officers of all NATO countries except Iceland, which has no military forces

The Standing Group—the permanent agency for day-to-day work—consists of three senior officers drawn from France, the United Kingdom, and the United States. At July 1, 1954, they were General Valluy (France), General Sir John Whiteley (U K.), and General J. Lawton Collins (U.S.A.).

There are two main NATO Commands—Allied Command, Europe, and Allied Command, Atlantic, each divided into subsidiary Commands

The European Command Allied Command, Europe, comprises the following four Commands (headquarters in parentheses), all under the general control and direction of SHAPE:

(1) Allied Forces, Northern Europe (Oslo), which is sub-divided into the following Commands: (i) Allied Land Forces, Norway (Oslo): (ii) Allied Land Forces, Denmark (Copenhagen); (iii) Allied Air Forces, Northern Europe (Sandvik, Norway); (iv) Allied Naval Forces, Northern Europe (Oslo).

The C.-in-C, Allied Forces, Northern Europe (CINCNORTH) is General Sir Robert Mansergh (U K). He has under him an American general commanding Air Forces in Northern Europe, a Norwegian Land Forces Commander, and a Danish Land Forces Commander.

(2) Allied Forces, Central Europe (Fontainebleau), sub-divided into the following Commands, which also have their headquarters at Fontainebleau (i) Allied Land Forces, Central Europe, (ii) Allied Air Forces, Central Europe; (iii) Allied Naval Forces, Central Europe.

The C.-in-C., Allied Forces, Central Europe (CINCENT) is Marshal Alphonse Juin (France), who has under him an Allied Land Forces Commander (French) directly subordinate to him. Marshal Juin's Command includes the Northern Army Group, consisting of Belgian, British, Canadian, and Netherlands forces, and the Central Army Group, consisting of French and American forces. Vice-Admiral Jaujard (France) commands Allied Naval Forces, Central Europe, whilst Air Chief Marshal Sir Basil Embry (U.K.) commands Allied Air Forces, Central Europe Sir Basil Embry controls two Tactical Air Forces, one of which would give support to the Northern Army Group and one to the Central Army Group

(3) Allied Forces, Southern Europe (Naples), sub-divided into the following Commands (i) Allied Land Forces, South-Eastern Europe (Izmir), comprising the Greek and Turkish forces; (ii) Allied Land Forces, Southern Europe (Verona), (iii) Allied Air Forces, Southern Europe (Naples), (iv) Naval Striking and Support Forces, Southern Europe (Naples).

The C.-in-C, Allied Forces, Southern Europe (CINCSOUTH) is Admiral Fechteler (U S A), who has under his command an Italian general commanding Allied Land Forces, an American general commanding Air Forces, and an American admiral commanding the U.S Sixth Fleet in the Mediterranean

(4) Allied Forces, Mediterranean (Malta), sub-divided into the following Commands: (i) Gibraltar Area (Gibraltar); (ii) Western Mediterranean Area (Algiers), (iii) Central Mediterranean Area (Naples); (iv) Eastern Mediterreanean Area (Athens); (v) North-Eastern Mediterranean Area (Izmir), (vi) South-Eastern Mediterranean Area (Malta).

The C.-in-C, Allied Forces, Mediterranean (CINCAFMED) is Admiral Sir Guy Grantham (U.K), who succeeded Admiral Earl Mountbatten (see 13960 A) He has under his command six admirals (two British, one French, one Italian, one Greek, and one Turkish) who are responsible for the six areas into which the Mediterranean Command is sub-divided In time of war the CINCAFMED would be responsible for securing the lines of communication through the Mediterranean

The four Commanders-in-Chief—Marshal Juin, General Sir Robert Mansergh, Admiral Fechteler, and Admiral Sir Guy Grantham—report direct to General Gruenther, the Supreme Allied Commander.

The Atlantic Command. The Allied Command in the Atlantic is headed by the Supreme Allied Commander, Atlantic (SACLANT)—Admiral Jerauld Wright (U.S.A), with Vice-Admiral J. W. M Eaton (U K) as Deputy Supreme Commander—and has its headquarters at Norfolk, Virginia (U S.A) Under SACLANT are (i) the C.-in-C., Western Atlantic Area (headquarters at Norfolk, Va.), (ii) the Commander, Striking Fleet, Atlantic (Norfolk); and (iii) the Naval C.-in-C., Eastern Atlantic Area, and Air C.-in-C., Eastern Atlantic (both with headquarters at Northwood, U.K.). The staff of SACLANT is drawn from the navies, armies, and air forces of eight nations—Canada, Denmark, France, the Netherlands, Norway, Portugal, the United Kingdom, and the United States.

The Western Atlantic Area is commanded by a U S. Naval Commander (at present SACLANT himself), and is divided into sub-areas based on Norfolk, New York, and Halifax (Canada). The Eastern Atlantic Area is headed by British Naval and Air Commanders-in-Chief, and is divided into sub-areas based on Plymouth (U K.), Gosport (U.K.), Pitreavie (U.K.), and Brest (France). A third area—the Iberian Atlantic Command, covering the south-eastern portion of the Atlantic Command—has been defined but not yet established.

The Atlantic Command extends from the North Pole to the Tropic of Cancer, and from the coastal waters of North America to those of Europe and Africa (excluding, however, the English Channel and the waters round the British Isles). The Atlantic islands—Iceland, Greenland, the Azores, Bermuda, and the Faroes—are placed for military defence purposes under island Commanders, all but one of whom is a national of the sovereign island Power The primary task of SACLANT in time of war would be to provide NATO with security in the Atlantic Ocean by guarding the sea lanes and denying their use to an enemy.

Channel Committee and Channel Command. Apart from the European and Atlantic Commands of NATO, there is a Channel Committee consisting of the Chiefs of Naval Staff (or their representatives) of Belgium, France, the Netherlands, and the United Kingdom. [A special arrangement of this kind was considered essential, since it was thought that the Standing Group in Washington would be too far away and too occupied by matters of high strategy to attend to the detailed problems which would arise in the small but vital Channel area.] Directly under the Channel Committee is a Channel Command headed by a Naval C.-in-C., Channel and Southern North Sea (Admiral Sir George Creasy, U.K., who is also C.-in-C., Portsmouth) and an Air C.-in-C., Channel and Southern North Sea (Air Marshal Sir John Boothman, U.K., who is also chief of R.A F. Coastal Command). The Channel Command would have the following tasks in time of war: (1) to control the English Channel and the southern North Sea and deny them to an enemy; (2) to protect sea communications in this area; (3) to support operations conducted by SACEUR and SACLANT.

The Canada - United States Regional Planning Group. This group (the only survivor of NATO's original five regional planning groups) is directed by the Canadian and U S. Chiefs of Staff, and is responsible for making plans for the defence of the North American continent. It has its headquarters in Washington. Its defence plans are seen by the other NATO nations and approved by the Standing Group, in the same way as are those of the Supreme Commanders

Military Agencies. Apart from the military structures described above, the following military agencies work under the general direction of the Standing Group:

(1) The NATO Defence College (housed in the *Ecole Militaire* in Paris), which trains officers of NATO countries in problems of international co-operation affecting the Atlantic alliance as a whole The languages of instruction are French and English

(2) The Military Agency for Standardization, aimed at the standardization throughout the member-countries of war material and of operational and administrative practice. It is established in London and is directly responsible to the Standing Group.

(3) The Advisory Group for Aeronautical Research and Development (AGARD), headed by Dr Theodore von Karman (U S.A) and consisting of one or two scientific representatives from each NATO country.

(4) The Air Training Advisory Group (ATAG), based at Villacoublay airfield, near SHAPE, and manned by highly qualified flying instructors of the various NATO countries. It has set up a Flying Instructors' School for the Italian Air Force at Foggia

Civilian Planning Committees. In addition, there are a number of NATO committees which deal with various aspects of emergency planning They include the following

(1) The Civil Defence Committee —This deals with civil defence problems such as air-raid warning systems, construction of shelters, precautions to reduce casualties and damage in industrial areas, and special problems created by the possible use of atomic and radioactive weapons.

(2) The Committee on Refugees and Evacuees —In close collaboration with the military authorities, this committee deals with such questions as the organization of hospital or safety zones in accordance with the Geneva Convention, evacuation of certain categories of persons from operational and combat zones, the temporary residence during wartime of refugees and evacuees in a foreign country; evacuation plans, and control of mass movements of persons anxious to escape from threatened bombardment or the menace of enemy occupation.

(3) The Planning Board for Ocean Shipping (PBOS) —Created in 1950, the PBOS is engaged on plans to ensure the most efficient use of available shipping resources in an emergency. Its most important decisions have been as follows ·

(*a*) At the outbreak of a war, the great bulk of ocean-going merchant ships under the flags of NATO countries would be pooled and, for allocation purposes, put at the disposal of an inter-allied body to be called the Defence Shipping Authority. This Authority will be responsible for the allocation of ocean-going shipping throughout the whole area controlled by NATO and its allies

(*b*) The Defence Shipping Authority will consist of a Defence Shipping Council and a Defence Shipping Executive Board The main duty of the Defence Shipping Council will be to formulate general shipping policy in accordance with overall strategy The Executive Board will administer the central shipping "pool" and will have two branches, one in Washington and one in London.

The work of the PBOS is carried on chiefly by a small group of British and U.S. Civil Servants, with the co-operation of shipping experts from other member-governments.

(4) The Planning Board for European Inland Surface Transport (PBEIST).—This was set up in 1952 to plan the co-ordination in an emergency of the use of roads, railways, canals, and ports of Western Europe It has collected data on the existing transport systems in the NATO European area, and has drafted the constitution of an agency to co-ordinate transport between the various countries in time of war. For this purpose it has set up six working groups dealing with road transport, rail transport, inland water transport, ports and beaches, port emergency planning, and inland transport of bulk petroleum products Within the framework of these groups, military sub-groups have been set up on a geographical basis (corresponding to the Northern, Central, and Southern Commands) to study questions of inland surface transport.

(5) The Petroleum Planning Committee.—This body has estimated the military, and the minimum essential civilian, requirements for petroleum products necessary, in wartime, to maintain the economy of each country at full production. It has also estimated the likely availabilities of crude oil and refined products, and has examined the rationing plans drawn up by NATO countries.

(6) The Coal and Steel Planning Committee.—Has studied the vulnerable and distant sources of supply of coal and steel, and has asked the principal coal-producing NATO countries of Europe for information about the steps they would take to maintain their labour force in time of war

(7) The Food and Agriculture Committee.—Has examined imports of the various countries over the past few years, and has drawn attention to the supplies which are likely to be lost on the outbreak of a war. It is also studying the effect of hypothetical cuts in seaborne imports. In addition, this committee has considered the changes that might be necessary in the pattern of wartime agriculture, and is inquiring into the supply of agricultural machinery, fertilizers, etc., essential to the maintenance of increased production in an emergency.

(8) The Industrial Raw Materials Planning Committee —Concentrates on the problems which would arise from the loss of commodities from vulnerable sources, from the need to reduce the import of bulky commodities owing to the shortage of shipping, and from the scarcity of certain commodities owing to increased demands in time of war

Other important information contained in *NATO—The First Five Years* is summarized below.

Defence Expenditure of NATO Countries.

Expenditure was as follows in 1953 (the last full year for which statistics have so far been published) Belgium, 19,901,000,000 Belgian francs, Canada, 1,960,000,000 Canadian dollars; Denmark, 889,000,000 kroner; France, 1,451,000,000 francs, Greece, 2,767,000,000,000 drachmas; Italy, 480,000,000,000 lire, Luxemburg, 489,000,000 Lux francs, Netherlands, 1,330,000,000 guilders, Norway, 1,067,000,000 kroner; Portugal, 1,975,000,000 escudos, Turkey, £T 1,080,000,000, United Kingdom, £1,689,000,000 sterling, United States, $49,734,000,000.

[These figures should be read in conjunction with the table for 1949-52 and estimates for 1953 in Vol IX, K.C A, page 13358]

Defence expenditure by areas for 1953 was as follows (in U.S. dollars)

NATO Europe	11,227,000,000
NATO North America .	51,694,000,000
Total NATO .	62,773,000,000*

* Expenditure financed from U S. Special Military Support is included in the figures for both the U S A and France. It amounted to 60 million dollars (21 milliard French francs) in 1952 and to 148 million dollars (52 milliard French francs) in 1953 The 'total NATO' figures have been adjusted to eliminate double counting of these amounts.

Infrastructure Programme.

Up to July 1, 1954, expenditure of £700,000,000 sterling had been approved for infrastructure projects, and detailed programmes costing £540,000,000 had been worked out and accepted The balance of £160,000,000 will be used for additional projects to be started in 1955 and 1956. The various "infrastructure" projects are summarized below.

Airfields. By April, 1954, some 125 airfields were ready for use and about 40 more under construction and scheduled for completion in 1955 These figures compared with only 15 available airfields in April, 1951. Every airfield conforms to standards laid down by the NATO authorities and can be used by all types of aircraft.

Signals Communications. About one-half of more than 300 new projects ranging from Northern Norway to Turkey had been completed before mid-1954, and the remainder were scheduled for completion by 1955 An estimated 16,000 kilometres of land lines, 10,000 km of radio relay circuits, and 1,700 km of submarine cables would then have been added to the existing civilian networks.

Fuel Supply Systems. Under the plans for a pipeline and storage system (the construction of which was started in the autumn of 1953) more than 3,500 km. of pipelines would be laid in Central Europe alone Smaller systems were under construction in Denmark, Greece, Italy, Norway, and Turkey, and the whole system, totalling 6,100 km of pipelines and 1,283,000 cubic metres of storage capacity, was expected to be in operation by the end of 1956.

Training Facilities. Four air training bases were under construction in the Mediterranean area, where weather conditions permit the maximum number of flying-hours. The NATO land forces were being provided with training grounds permitting simultaneous exercises by all elements of a single infantry division or a substantial portion of an armoured division There would also be special tank-training grounds.

Naval Projects. About 26 naval projects—mainly storage facilities at naval bases for oil, fuel lubricants, and ammunition—were under construction In addition the Supreme Allied Commander, Atlantic, was being provided with fleet facilities, airfields for naval air forces, and a chain of stations providing navigational aids in the Eastern Atlantic.

Defence Production.

Within the total defence expenditure of all NATO countries, the amount devoted to the production of arms and equipment has risen from under $3,000,000,000 in 1949 to $9,700,000,000 (23 per cent of the total) in 1951, $20,800,000,000 (35 per cent) in 1952, and $24,800,000,000 (40 per cent) in 1953.

These figures are based on conversions at present exchange rates and therefore conceal certain differences in the true relative values of currencies In the case of countries like France, the U.K., and the U S.A they include expenditure for defence items outside the NATO area.

Total Armed Forces in NATO Countries.

A diagram showed that these had risen from 4,000,000 in 1950 to 5,800,000 in 1951, 6,500,000 in 1952, and 6,600,000 in 1953. No "breakdown" of national forces was given.

Apart from the information contained in Lord Ismay's book and summarized above, recent developments in connexion with the North Atlantic Treaty Organization are brought below under cross-headings

Military Appointments.

The following NATO appointments were announced in recent months:

Northern European Command. The British Minister of Defence announced on March 2 that Vice-Admiral G. V Gladstone would succeed Vice-Admiral Sir Edward Evans-Lombe as Commander, Allied Naval Forces, Northern Europe, on or about June 1 Vice-Admiral Gladstone was recently Flag Officer, Second-in-Command, Far East Station.

Central European Command. Under a French decree of March 27, General Gelée was appointed Chief of Staff to the C.-in-C., Allied Forces, Central Europe (Marshal Juin) in succession to General Bailly, recently appointed Chief of the French Air Staff—see 14309 D.

The British Admiralty announced on Feb 10 that Rear-Admiral K McN. Campbell-Walter would succeed Rear-Admiral R. S. Warne as Commander, Allied Naval Forces, Northern Area, Central Europe Rear-Admiral Campbell-Walter was a member of the British Joint Services Mission in Washington before taking command of the cruiser H.M.S *Sheffield.*

South-East European Command It was announced in Washington on July 6 that Major-General George W. Read jr would succeed Lieut-General Paul W Kendall as Commander, Allied Land Forces, South-Eastern Europe, with the rank of lieutenant-general. General Read had hitherto been Commander of the Armoured Centre at Fort Knox (Kentucky).

SHAPE announced on July 13 the appointment of Major-General Richard A Grussendorf (U S. Air Force) as Commander of the 6th Allied Tactical Air Force at Izmir (Turkey), succeeding Major-General Robert Eaton.

Atlantic Command The appointment of Vice-Admiral J W M. Eaton as C-in-C, America and West Indies Station (Royal Navy), and concurrently as Deputy Supreme Allied Commander, Atlantic, was announced by the British Admiralty on July 26 Admiral Eaton, hitherto Flag Officer commanding the Reserve Fleet, succeeded Vice-Admiral Sir John Stevens.

Civil Appointments.

Lord Ismay (Secretary-General of NATO) announced the appointment of M. Didier Gregh as Assistant-Secretary-General for economic and financial matters on April 25. M Gregh, head of the International Bank's department of operations for Asia and the Middle East, succeeded M. René Sergent, whose resignation had been announced on March 12 in connexion with his forthcoming appointment as Secretary-General of the O.E.E.C.

Permanent Representatives.

NATO Headquarters announced on June 6 that the Norwegian Government had designated Mr. Jens Mogens Boyesen (Under-Secretary of State in the Defence Ministry) as its Permanent Representative on the North Atlantic Council in succession to Mr. Arne Skaug, now Minister of Commerce.

German Representatives at NATO.

Following the coming into effect of the Paris Agreements, General Speidel was formally installed on May 9 as chief German representative at SHAPE. General Speidel (58) was successively Chief of Staff to the German C.-in-C. in occupied France, to a German army on the Russian front, and, in 1944, to Field-Marshal Rommel when he commanded the Second German Army group in Normandy at the time of the Allied landings Arrested by the Gestapo in connexion with the attempt on Hitler's life, he was released in 1945 Since 1950 he has been military adviser to the German Federal Government.

Six German officers took up duty at Supreme Allied Headquarters on July 27. As their appointments had not yet been approved by the committee set up under the Federal German defence legislation, they joined Supreme Headquarters in the first instance as officials of the German Ministry of Defence and not as officers, and consequently wore civilian clothes.

Canadian Adoption of Belgian Rifle.

It was announced in Ottawa on June 17 that Canada had adopted the Belgian F N automatic rifle as the standard rifle for the Canadian Army.

Atomic Artillery for U.S. Army in Europe.

The U.S. Army announced on Feb. 2 that a sixth battalion of heavy artillery capable of firing atomic shells would be sent to Europe to reinforce the NATO forces. The battalion, which is equipped with six 280 mm. guns, arrived at Bremerhaven in March.

Transfer of U.S. Warships to Italy.

A submarine—the former U.S.S. *Barb*—and six U.S. minesweepers were handed over to the Italian Navy at Taranto on March 14.

U.S. Offshore Orders for Aircraft.

The British Ministry of Defence announced on July 29 that the U.K. and U.S Governments had concluded arrangements under which the *Sabre* aircraft at present in service with the R.A.F. would shortly be exchanged for Hawker *Hunter* fighters to be delivered from an offshore procurement contract which the U.S. Government had placed in the United Kingdom.

The statement said that between 300 and 400 *Sabres* had been supplied to the R A F from Canada in 1952 and 1953, under a joint U.S - Canadian mutual aid arrangement, and further *Sabres* had been provided by the U S.A early in 1953 "This very generous assistance from the U S A. and Canada," it went on, "enabled the U K to equip part of the R.A F fighter force with modern swept-wing jet aircraft at an earlier date than would otherwise have been possible, and at a critical time in our re-equipment programme The U.K. also acknowledges with gratitude the assistance received from the U.S and Canadian Governments in the maintenance of these aircraft by the provision of spare parts under mutual aid arrangements

"The *Sabre* has given the R A F. most valuable service, both in the 2nd T A F. and Fighter Command. There are, however, substantial operational and logistic advantages in equipping the R A F. front-line to the maximum possible extent with British types of aircraft that can be supported from U.K. sources. The Standing Group of the NATO Military Committee has been consulted regarding this arrangement, and has agreed that this exchange of aircraft is in the best interests of NATO. The U.K. Government has accordingly accepted with gratitude the generous offer of the U.S Government to make *Hunters* available to the R A F in place of *Sabres*, which are now to be rehabilitated and transferred to the U S. Government for reallocation under the mutual defence aid programme"

Statements by Ministry spokesmen and by the Hawker Siddeley group (which manufactures the *Hunter*) made it clear that the aircraft referred to were part of the U S offshore order of $182,000,000 for 450 *Hunters* which had been placed in 1954 (see 13844 B), and that no new orders were involved

A Paris announcement of Aug. 2 stated that the French and U S. Governments had signed an agreement for the joint development of two French fighters, the *Bréguet Taon-1001* and the *Mystère-20*, as light tactical aircraft for the NATO forces. Three prototypes of the aircraft will be built under the agreement, the U S A. contributing about $5,000,000 and France providing inspection and technical test services.

Air Bases.

In implementation of its commitment to station 12 jet fighter squadrons on the Continent, the Royal Canadian Air Force transferred its No 1 Fighter Wing from North Luffenham (Rutland) to a new air base at Marville (150 miles east of Paris) early in 1955. With the completion of this move there will be three R C A F squadrons at each of four stations on the Continent—Baden-Soellingen and Zweibrucken (in Western Germany) and Grostenquin and Marville (in France)

It was reported in March that a new air base at Laarbruch in Germany, near the Dutch border—believed to be the largest of its kind in Western Europe—was in full operation after being built in 18 months Laarbruch is a base for R A.F and Netherlands aircraft belonging to the 2nd Tactical Air Force

Exchange of Atomic Information with U.S.A.

It was announced in Paris and Washington on April 13 that President Eisenhower and the North Atlantic Council had approved an agreement between the members of NATO on co-operation concerning atomic information. The text of the agreement was issued at the same time.

Art. 1. Section (1): "While the NATO continues to make substantial and material contributions to the common defence efforts, the United States will from time to time make available to the NATO, including its civil and military agencies and commands, atomic information which the U S. Government deems necessary to (*a*) the development of defence plans; (*b*) the training of personnel in the employment of and defence against atomic weapons; and (*c*) the evaluation of the capabilities of potential enemies in the employment of atomic weapons"

Section (2) said that "atomic information" to be provided by the U.S A. would be in accordance with the relevant provisions of the U.S Atomic Energy Act of 1954, and would relate primarily to the military utilization of atomic weapons which had been removed from the restricted data category in accordance with Section 142d of that Act.

Section (3) stated that all transfers of U.S. atomic information would comply with the provisions of the U.S. Atomic Energy Act, 1954, and that there would be no transfers of atomic weapons or special nuclear material under the agreement.

Art. 2 laid down the channels through which "atomic information" would be provided to the NATO; stipulated that only those persons within the Organization whose duties required access to such information were to be the original recipients; and provided that the information in question would not be transferred by the Organization "to unauthorized persons or beyond the jurisdiction of the Organization"

Art. 3 affirmed that "atomic information" would be accorded full security protection under applicable NATO regulations and procedures, and under national legislation and regulations.

Art. 4 laid down that "atomic information" from the U.S A. would be used "exclusively for the preparation of and in implementation of NATO defence plans," and that NATO would from time to time present reports to the U S Government on the use which had been made of the information.

Art. 5 provided that "the parties to the North Atlantic Treaty other than the U S.A. will make available to the NATO similar atomic information to the extent that they deem necessary," and "on the same or similar conditions as those which apply under this agreement with respect to the United States."

Art. 6 said that the agreement would enter into force "upon notification to the U.S.A. by all parties to the North Atlantic Treaty that they are bound by the terms of the agreement." New member-countries and their nationals would only be entitled to receive information under the agreement after the country in question had notified the U.S. Government that it felt itself bound by the terms of the agreement. Finally, it was laid down that the agreement would be "valid as long as the North Atlantic Treaty is in force."

General Gruenther's Statement on NATO Strategy and Atomic Warfare.

The Supreme Allied Commander in Europe, General Gruenther, stated on March 15, in a speech to the SHAPE Correspondents' Association, that the NATO forces planned to use atomic weapons only in the event of all-out war, and that his Command had not considered the use of such weapons in the event of a limited "brush-fire" war.

General Gruenther stressed that while NATO strategy was based on the use of atomic weapons, the final decision on whether to use them lay with the political leaders. In the case of a partial war, nuclear weapons were not precluded, but "SHAPE simply has not dealt with the possibility of using the atom bomb in a local war." The General added that his Command's new approach was "geared ahead three or four years, at which time the German military contribution should become effective."

General Gruenther said that the transition to atomic tactics could not be too sudden, though "we could retaliate with atomic weapons today if we had to." He declined to say whether there were any atomic explosives on the Continent of Europe available for use by the atomic cannon or guided missiles now in use by NATO forces. True deterrent power was determined not by the possession of nuclear weapons but by the ability to deliver them.

Recently (General Gruenther recalled) several NATO countries had expressed "anxiety and doubt about the place of our Army forces in an era of atomic weapons," and were worried about "spending money on units and equipment that may be out of date." Because of the "revolutionary state of weapons development," the organization of land forces was in a period of transition. But there was wide high-level agreement that "even with atomic weapons, NATO must still have land formations to stop the enemy onslaught on the ground."

General Gruenther said that overall military manpower requirements would remain about the same in the atomic era, whether the men were spread among a larger number of small divisions or a smaller number of large ones. He added: "Because of the limited strength available to us today, without Western Germany, it is not possible to defend far enough to the East in Central Europe. This is an unsatisfactory strategy . . . A defence much farther to the East, usually referred to as a forward strategy, will be feasible when the German contribution is an effective one." If all went well, this "effective contribution" could be counted on three or four years from now. At that time the NATO military alliance would have completed its conversion to atomic tactics.

General Gruenther claimed that "if the Soviets were to attack now they would be defeated." Although the Russians had "the strongest aggregation of military power in the history of the world," they also had their weaknesses, and the Western alliance, notably the United States, was far ahead in retaliatory power.

Air defence, he went on, "is perhaps our major weakness," and to remedy this an Air Defence Staff was being set up at SHAPE. It would be headed by Air-Commodore Charles G. Lott, of the R.A.F., and would operate under General Norstad, the Supreme Commander's Air Deputy. A technical centre was being established at The Hague, and would be staffed by scientific personnel from the NATO countries.

Discussing Britain's decision to abolish her Anti-Aircraft Command structure, General Gruenther said that Britain considered that the main threat to her lay in bombers flying out of effective range of conventional A.A. guns. Moreover, the approaches to Britain lay over open sea or friendly territory, permitting warning of hostile approach and giving time for piloted or automatic interceptors to go up. Most NATO forces on the Continent lay within range of the Soviet tactical air forces, which would "in many cases find it necessary to fly well within range of anti-aircraft gunfire."

The Supreme Commander said that the replacement of anti-aircraft guns by guided missiles to any appreciable extent still lay "too far ahead for present planning." He added: "Even when the guided weapon is available in sufficient numbers to deal with the high-flying threat, there will still be the problem of dealing with low- and medium-altitude attacks, which, for as far ahead as can be foreseen, will be the task of anti-aircraft artillery." Britain had appreciated this point, as shown by the fact that conventional A.A. guns were to be retained for all British forces stationed on the Continent, as well as for the defence of "a number of potential targets in the United Kingdom against which the most likely threat is from precision bombing."

After stating that the Soviet military potential had constantly increased, and mentioning in this connexion the building of Soviet aerodromes in the "satellite" countries, General Gruenther said that NATO, which had only 21 aerodromes in 1951, today had 125, excluding those in Britain, Morocco, and Spain. Moreover, NATO was currently building a vast pipeline system of over 4,000 miles to feed these bases with oil.

NATO Fellowship Programme.

Lord Ismay announced on July 16 that the North Atlantic Council would establish a NATO fellowship programme "to further the study of the common traditions, historical experience, and present needs of the North Atlantic Community." Member-countries would contribute to a fund of at least 10,000,000 francs (£10,000) a year to finance the programme, which would be worked out by a group of experts in international education, and one of whose aims would be to strengthen transatlantic ties. Where candidates for grants had equal qualifications, the awards would be given to those who were prepared to do research in North America.

Lord Ismay stated that the fellowship programme was due to the initiative of the committee on information and cultural relations of the North Atlantic Council presided over by Mr Dana Wilgress (the Canadian permanent representative on the Council). It was hoped that it would fulfil the aims laid down in Article 2 of the North Atlantic Treaty, viz., "to contribute toward the further development of peaceful and friendly international relations by strengthening free institutions, by bringing about a better understanding of the principles upon which these institutions are founded, and by promoting conditions of stability and well-being."

Conference of NATO Parliamentarians.

An inter-parliamentary conference of the NATO member-countries was held at the Palais de Chaillot in Paris on July 18-22 under the chairmanship of Mr Wishart Robertson, Speaker of the Canadian Senate. M. Van Cauwelaert (a former President of the Belgian Chamber of Deputies), Hr. Finn Moe (Norway), and M. P.-O. Lapie (France) were elected vice-presidents.

The British delegation was led by Mr. Walter Elliot (C.), and included Lord Amulree, Viscount Goschen, the Earl of Listowel, and Lord Teynham (House of Lords); Air-Commodore Harvey, Vice-Admiral Hughes-Hallett, Mr Longden, Mr Sharples, and Mr Maclay (representing the Government parties); Mr de Freitas, Mr Thomas Fraser, Mr. Healey, Mr. Philip Noel-Baker, and Mr Pannell (Labour) and Mr. Clement Davies (Liberal).

The conference adopted a resolution inviting the Speakers of the various Parliaments to send delegations to a similar meeting in 1956, and providing for the setting-up of a "continuing committee" of 15 members to make arrangements for the next meeting. The preamble to the resolution recalled that the purpose of the North Atlantic Treaty was both to ensure the defence of member-countries and to contribute to the economic, social, and cultural developments of the peoples of the Atlantic community. It expressed the view that the second of these aims, in particular, "would be facilitated by closer relations between the members of the representative Assemblies of the different countries."

It was reported from Paris on June 2 that the North Atlantic Council, meeting in secret session, had given its "reluctant consent" to France's decision to transfer the equivalent of a full army division from Western Europe for police duties in North Africa.—(NATO Information Division, Paris - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune - Montreal Star) **(Prev. rep. NATO, 13988 A; North Atlantic Council, Meetings, 14237 A.)**

A. BANK RATES. — Recent Increases.

The following increases in the Bank Rates in various countries were announced in recent weeks.

Belgium. The Belgian National Bank increased its bank rate on Aug. 4 from 2½ to 3 per cent. (Prev. rep. 13297 D.)

Canada. The Bank of Canada raised its bank rate on Aug. 7 from 1½ to 2 per cent. (Prev. rep. 14052 E.)

Western Germany. The West German bank rate was raised on Aug. 4 from 3 to 3½ per cent. (Prev. rep. 13573 B.)

Japan. The Bank of Japan raised its discount rate on Aug. 9 from 5.84 per cent to 7.3 per cent.

United States. The Federal Reserve Banks in Chicago, Boston, and Atlanta raised their discount rate on Aug. 6 from 1½ to 2 per cent, whilst the Reserve Bank in Cleveland raised its rate from 1½ to 2½ per cent. On the following day the Reserve Banks in New York, Philadelphia, Kansas City, Dallas, and San Francisco also raised their rate from 1½ to 2 per cent. (Prev. rep. 14177 A.)

Recent increases in the Bank Rate had also been announced in New Zealand (14323 D), Austria (14342 C), and Turkey (14311 B). (Financial Times - New York Times)

B. INDIA. — Decimal Coinage Bill.

The Indian House of the People adopted a Government-sponsored Bill on July 29 introducing a decimal coinage. The Bill, as originally introduced, provided (*a*) for the division of the rupee into 100 cents (instead of its present division into 16 annas, with 12 pies to the anna), and (*b*) for the issue of new coinage in denominations of cents. During the debate, however, objections were raised to the use of the word "cent" for the new small coinage unit. To avoid confusion during the transition period, the Government therefore introduced an amendment deleting the word "cent" and empowering the Government to designate a name for the new unit after further consultations. This amendment was adopted after Mr. Nehru had stated that the Government intended to call the unit the "paisa," and that it would work out a method to avoid confusion with the existing pie.—(The Hindu, Madras) **(Prev. rep. 14318 B.)**

A. UNITED KINGDOM. — Sir Anthony Eden's Report on the Geneva Conference. - Marshal Bulganin and M. Khrushchov to visit Britain in 1956.

A report on the Geneva conference of the Heads of Government was given to the House of Commons on July 27 by the Prime Minister, Sir Anthony Eden. In the course of his statement Sir Anthony announced that Marshal Bulganin and M. Khrushchov had accepted an invitation to visit Britain in the spring of 1956.

Sir Anthony Eden said that the Government's first aim had been to improve the atmosphere of international relations and to end the tension between East and West "This it tried to do at the conference by discussion, both candid and conciliatory, on the international issues which divide the Powers We tried to do it also by frequent private discussions outside the conference room. I believe the latter had real value in removing some of the mutual suspicion which has been the root cause of many of our difficulties for so long" This (Sir Anthony added) corresponded also to the purpose which Sir Winston Churchill had in mind when he first proposed a meeting of Heads of Government, "as so many times before, his was the foresight and instinct of what we should do."

The Prime Minister continued "Ten years had passed since the last meeting of the four Powers at Potsdam. There had been many changes, not least among the personalities concerned, and it was right that the new leaders should meet The Geneva meeting has certainly changed the climate of international relations . ."

Turning to the German problem, Sir Anthony said: "We have never asked that Germany should be integrated with the West To do so would not be consistent with Germany's freedom of choice. Germany, under our plan, would have three choices—association with the West, with the East, or neutrality. Admittedly, we do not believe it is a practical policy to try to impose neutrality on Germany. We also accept that a united Germany would probably choose of her own free will to associate with the West But the principle is there; the choice would be Germany's alone.

"Russia, and Europe as a whole, are ready to accept that reunification of Germany would not create a danger to Russia or Europe This is the cardinal problem of Europe today. It was for this reason we put forward proposals at Geneva which we believe were practical and safeguarded the legitimate interests of the Soviet Union The first was a European security pact of which the four Powers would be members, with the addition of a united Germany Under such a pact each country would undertake to go to the aid of any one of them if attacked by another. The guarantees would be reciprocal We should guarantee the Soviet Union and the Soviet Union would guarantee us. The pact would not be linked with existing frontiers, but would be solely concerned with resisting acts of aggression The Russians may prefer a wider plan of membership, embracing a greater number of countries If so, we are ready to examine that, although we think it best to start with the simpler proposition If these countries were united in a pact of that character, it is unlikely that any other Power in Europe would wish to start up any major trouble. But if it were desired, membership could be wider.

"The next proposal was intended to provide some physical guarantee against war in Europe. That was why we suggested an agreement on the total forces and the total armaments on each side in Germany, and in the countries neighbouring Germany. In our view a united Germany would be a partner in such an arrangement It would also provide for reciprocal control and make provision for joint inspection and the limitations which the Powers had agreed upon.

"Finally, we also suggested that we should examine the possibility of a demilitarized area between the East and the West—to interpose, as it were, something in the nature of a protective pad between the armies which face each other in Europe

"All these proposals, with others, were accepted for examination by the Foreign Secretaries. They are capable of adjustment and development, and are of the utmost importance to the twin problems of German unity and European security. I call them twin problems because in my judgment these problems will only be solved together

"In all our discussions the Soviet representatives maintained that a system of European security must come first. They argued that the two fragments of Germany could take their place in that system and that the uniting of Germany could come later by degrees We could not accept this argument, because we are convinced that no European security is possible on the basis of a divided Germany That is the deep difference between us at this time. All the parties at the conference clearly understood its significance All would like to solve it. Admittedly, it is not going to be easy, but I think it is possible that in time some solution on the lines I have indicated may provide a way through.

"If some members are pessimistic enough to believe that no reconciliation of our views on this point can ever be realized, I would recall the position at Berlin last year. Nothing seemed less likely at the end of that conference than that the position of Austria would be settled by an agreed treaty within 18 months. On the contrary, it seemed then that the problem of Austria would never be settled before the problem of Germany was settled. Well, there has been a remarkable change of climate in these last few months. And it is not so long ago that we were told that the ratification of the Paris Agreements would mark the end of any possibility of negotiations with the Soviet Union. Despite this, the four Heads of Government have now met, with results which they all consider encouraging. So, despite all the difficulties of the German problem and of the security of Europe, we must continue to seek a solution. If we keep pushing up against our difficulties long enough we shall, given time, find a way through, provided the climate of international relations remains as it was in Geneva."

After recapitulating the Western and Soviet disarmament proposals that had been put forward at Geneva and would be studied by the Foreign Ministers, the Prime Minister welcomed the "bold and imaginative proposal" made by President Eisenhower at the conference [i e for the exchange of blueprints of military establishments between the U S.A. and the U.S S R., and for aerial reconnaissance of each other's territories.] He also welcomed the "constructive suggestions, some of them very far-reaching," which had been presented by M Faure, and "the advance of the Soviet Government towards the Anglo-French proposals on joint disarmament"

Sir Anthony said that the situation in the Far East, which was "definitely more dangerous than that in Europe," had been discussed at Geneva in private meetings He did not think that more formal discussions would have been helpful in the absence of some of the principals. In this connexion he welcomed the discussions which were scheduled to begin in Geneva on Aug. 1 between U S and Chinese representatives, and which could be "a helpful beginning towards resolving the tension in the Far East."

The Prime Minister continued by giving the House "some personal impressions of the results of the conference" "Making all possible reserves," he said, "I believe we have reduced tension, and have created a situation in which the Foreign Secretaries can get to grips with major political problems this autumn. Some people will no doubt complain that the practical results of the conference have been small. That is true, but it was never to be expected that the problems of Europe could be solved in the short time at the disposal of the Heads of Government What we have done is to set in motion a long process of negotiations It will be rash to expect rapid, far-reaching results It may well be that limited solutions will prove the most practical method of approach, and perhaps as confidence grows we can advance towards more ambitious proposals. Meanwhile, Geneva has given this simple message to the whole world. It has reduced the dangers of war"

Sir Anthony then announced that he had invited Marshal Bulganin and M. Khrushchov to visit Britain in 1956, and that the invitation had been accepted The Prime Minister's announcement, which was warmly cheered from all parts of the House, was as follows: "In Geneva the Foreign Secretary and I had several meetings in private with Marshal Bulganin, M Khrushchov, and their colleagues. We discussed very frankly our anxieties about the great problems which divide the world. We also considered how to maintain and strengthen the personal relations we established at Geneva. As a result of our discussions, we agreed upon the terms of the following communiqué for announcement in Moscow and London this afternoon:

> 'During the Geneva Conference the Prime Minister of the United Kingdom and the Chairman of the Council of Ministers of the Soviet Union discussed the importance of strengthening relations between their two countries by maintaining the personal contact which they had established at Geneva. The Chairman of the Council of Ministers of the U S S R, Marshal Bulganin, and member of the Presidium of the Supreme Soviet of the U S S.R. M Khrushchov, have accepted an invitation by Sir Anthony Eden to visit the United Kingdom in the spring of next year.'

"I think," the Prime Minister concluded, "that both the House and the country will welcome it as a step towards ending that state of mutual distrust which we call the cold war"

Mr. Herbert Morrison (Deputy Leader of the Opposition) expressed "very great pleasure" at the Prime Minister's announcement, and recalled that he (Mr Morrison) had met Marshal Bulganin when the latter—then Mayor of Moscow—visited London in 1936. Marshal Bulganin had then studied London transport and government, and one result of his visit had been the construction of the Moscow Underground

As regards the Geneva conference, Mr Morrison said that both Sir Winston Churchill and Mr Attlee deserved credit for the way in which they had urged such a meeting. Much still remained to be done and the Foreign Ministers were faced with many problems, the difficulties of which should not be underestimated; nevertheless, the situation had improved and all the nations participating were to be congratulated on the good temper shown Disarmament remained the real key to peace, and its economic consequences should also be closely studied In this connexion Mr. Morrison attached much importance to M Faure's plan for an International Fund whereby part of the savings on disarmament would be devoted by the nations concerned to helping the under-developed areas of the world

One important contribution to peace, which he hoped was not far distant, would be a change in U.S policy towards China by recognizing the actual Government of China and agreeing to its admission to the United Nations. "We have seen some change in the attitude of Russia," he declared "Their spirit at Geneva was much better than anything we have experienced before. I believe the United States is no less capable of a change."

In conclusion, Mr Morrison said that the Western nations must recognize Soviet fears of the possibility of German aggression and should do their best to alleviate those fears He did not think, however, that a neutralized Germany would solve the problem, though there might be a demilitarized zone He also felt that it was important that the U.S. forces should not withdraw from Europe.

Mr. Crossman (Lab) said that Geneva had marked a fundamental change in world relations and was undoubtedly " Eisenhower's conference." Moreover, Sir Winston Churchill had been proved right in urging that such a conference should take place. There had been " a real break in the cold war, and we ought to thank Eisenhower for doing it." **Mr. Zilliacus** (Lab.) also congratulated Sir Anthony Eden and Mr Macmillan on their " really great achievement " at Geneva, and said that the Prime Minister had been too modest in merely saying that a change of " political climate " had taken place , what the Heads of Government had really done was nothing less than to " sign an armistice in the cold war." **Viscount Hinchingbrooke** (C.) thought it was a " skilful and brilliant " move to invite the Russian leaders to Britain, because it would ensure in advance the success—or at any rate the partial success—of the Foreign Ministers' meeting in the autumn.

Mr. Robens (Lab), making his first speech as Opposition " specialist " in foreign affairs (see 14323 A), said that the Geneva conference had lifted from mankind the threat of a war, and that it would be ungracious not to congratulate Sir Anthony Eden and Mr. Macmillan. Much remained to be done, but the conference had been a new starting-point, for the first time there had been unanimous decisions by the four Great Powers to give directives to their Foreign Ministers to deal with specific and important subjects After expressing his pleasure at the invitation extended to Marshal Bulganin and M. Khrushchov, and reiterating that German unity was essential, Mr. Robens said that agreement at the forthcoming meeting of Foreign Ministers could usher in a new era for the world —the removal of the fear of war and of the huge burden of defence, with a combined attack on poverty and ignorance wherever it existed. He added · " The Foreign Secretary goes to these discussions to speak not for party but for Britain. We wish him God-speed in his task."

Mr. Macmillan (the Foreign Secretary), replying to the debate, said that no-one had done more to prepare the way for the Geneva " summit " conference than Sir Winston Churchill He added : " It was sad that he was not able to render in person this last service to the world, but in spirit, if not in physical presence, he was there with us at Geneva." Before discussing the results of the conference, Mr. Macmillan congratulated Mr Robens on his speech, saying in this connexion . " I could not have any more agreeable ' shadow ' to live with, and, I hope, for many a long year."

The Foreign Secretary emphasized that a great gulf still remained between East and West as to the methods by which European security could be assured and the conditions in which the German problem could be solved. Marshal Bulganin's speech [at the final session of the conference] had left no doubt that the Soviet Government still adhered to the view that Germany must not be reunited until after a security system had been created in conformity with the Soviet Union's own ideas " Therefore," Mr. Macmillan continued, " I must strike a note of warning against any premature optimism about the task which lies before us in October . We have somehow got to solve the German problem by devising at the same time such a degree of European security as will give full satisfaction to the legitimate apprehensions and anxieties of the Russian people. We shall try in October to come to grips with this problem, but I can't promise that we shall get a solution in a short time . . ."

In conclusion, Mr. Macmillan said that such success as had been achieved at Geneva, and as might stem from future meetings, was largely based on general acceptance of the view that war as an instrument of policy was now an obsolete conception, and that there could be no victor in modern war He added, however : " This proposition that there can be no victor is true only if the will to resist is maintained until final settlements are made, in spite of all temptations to relax during these dangerous and formative years. We are entering on a new process of negotiations which will subject the democracies to new and severe pressures. It would be tempting to relax efforts in all directions in an atmosphere of premature optimism. If we do that, in my opinion we are lost If we show courage, determination, and understanding of both sides of these questions, if we have perseverance to go through what may be a prolonged test of nerves and strength, I really believe we may be at the beginning of a new and fruitful period in the history of man's life on earth."

Sir Winston Churchill was not present in the House when the Prime Minister made his report, or during the ensuing debate.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Geneva Conference, 14325 A.)

A. UNITED NATIONS. — Economic and Social Council. - Spain admitted as Consultative Member of Economic Commission for Latin America.

The U.N. Economic and Social Council approved a resolution early in August for the admission of Spain, in a consultative capacity, to the U.N. Economic Commission for Latin America. The resolution was introduced by Nicaragua and supported by Argentina, China (Nationalist), Ecuador, Egypt, France, the Netherlands, Norway, Pakistan, Turkey, the United Kingdom, the U.S.A. and Yugoslavia. Consideration of a proposal by the Dominican Republic and Ecuador that Spain should be admitted to the U.N. Economic Commission for Europe was postponed until the Council's next session.

B. ISRAEL. — General Elections.

General elections were held in Israel on July 26 with the following result, comparison being shown with the last (1951) elections :

	Seats		Votes		Percentages	
	1955	1951	1955	1951	1955	1951
Labour Party (*Mapai*)	40	45	274,735	256,456	32 2	37 3
Nationalists (*Heruth*)	15	8	107,190	45,651	12 6	6 6
General Zionists	13	20	87,099	111,394	10.2	16 2
Mizrachi and Hapoel Hamizrachi*	11	10	77,936	56,730	9.1	8 2
Agudat Israel and Poalei Agudat Israel*	6	5	39,836	24,993	4.7	3.6
Ahdut Avodah	10	—	69,475	—	8 1	—
Socialist Workers' Party (*Mapam*)	9	15	62,401	86,095	7 3	12 5
Communists	6	5	38,492	27,334	4 5	3.2
Progressives (Liberals)	5	4	37,661	23,171	4 4	4.0
Arab lists†	5	5	37,777	32,288	4 3	4.6
Sephardic Party	—	2	6,994	12,002	0.8	1.7
Yemenites	—	1	—	7,965	—	1.1

* Religious parties. † Affiliated to *Mapai*.

The electorate numbered 1,057,609, compared with 883,000 in 1951 and 506,567 in 1949, when the first *Knesset* was elected. The total votes cast numbered 876,085 (83 per cent), as compared with 695,007 (79 per cent) in 1951 and 440,095 (87 per cent) in 1949.

The *Mapai* was again returned as the largest party in the *Knesset*, though with five fewer seats than formerly, despite the fact that it polled 18,000 more votes than in 1951. The extreme right-wing Nationalists (*Heruth*) emerged as the second strongest party, gaining seven seats and polling 61,000 more votes than in 1951. The General Zionists (Conservatives), who left the Government shortly before the elections as a result of the Kastner case (see 14308 A), dropped from second to third place, losing seven seats and 24,000 votes. The four religious parties (who contested the elections as two opposing blocs, shown in the table above), did slightly better than in 1951, gaining two additional seats and increasing their aggregate poll by about 36,000. A feature of the elections was the success of the new *Ahdut Avodah* party, which obtained ten seats and polled nearly 70,000 votes. The *Ahdut Avodah*, a left-wing group of " neutralist " tendency, had broken away from the *Mapam* in protest at the latter's pro-Communist policy. The *Mapam*, weakened by the defection of the *Ahdut Avodah*, lost seven seats and polled 24,000 fewer votes than in 1951. Of the other parties, both the Communists and the Progressives gained one seat and polled more votes than at the last elections.

Under the Israeli electoral system, candidates do not run for office as individuals but party lists are presented to the electorate. Each party is allotted representatives in the 120-member *Knesset* in proportion to its share of the total vote, a minimum of one per cent of the total poll being required for representation. The present elections were contested by 18 parties, many of them small groups which failed to obtain the required minimum quota. The electoral programme of the *Mapai* urged the abandonment of the present electoral system and its replacement by the British method of election ; this demand, however, was not supported by any of the other parties Among the new voters were many recent Jewish immigrants from Morocco, Libya, Iraq, Yemen, and other Arab countries, as well as from the Far East.

Among the 35 new members of the *Knesset* were Mr. Berl Locker (chairman of the Jewish Agency), Mr. Ehud Avriel (formerly Minister in Prague), and Mr. Aharon Remez (onetime Commander of the Israeli Air Force), all of whom were returned for the *Mapai* ; Brigadier Yigal Allon, one of Israel's leading soldiers, who was returned for the *Ahdut Avodah* party ; and Mr. Gershom Shocken, editor of the newspaper *Ha'aretz*, who was elected for the Progressives.

The *Mizrachi* and *Hapoel Hamizrachi* parties, the most strictly orthodox of the Israeli politico-religious groups, decided at a congress in Jerusalem on Aug. 9 to merge into a single party. The following conditions were laid down for joining a new coalition Government : (*a*) a law making all public transport on the Sabbath unlawful ; (*b*) a law against the sale of pork ; (*c*) decrees against missionary activity in Israel. As stated above, the two parties had contested the elections on a joint list, each retaining its separate identity. The other religious parties—the *Agudat Israel* and *Poalei Agudat Isaael*—are less orthodox in character.—(Israeli Embassy, London - Jewish Observer and Middle East Review)

C. INDIA. — New Minister of Industries.

Mr. Nityananda Kanungo, Deputy Minister for Commerce and Industry in the Government of India, was appointed Minister of Industries on Aug. 11.—(The Statesman, Calcutta)

(Prev. rep. 14295 E.)

A. PAKISTAN. — General Mirza appointed Acting Governor-General. - Resignation of Mr. Mohammed Ali. - Coalition Government formed by Chaudhri Mohammad Ali. - New Speaker of Constituent Assembly.

It was announced in Karachi on Aug. 5 that the Governor-General of Pakistan, Mr. Ghulam Mohammad, was taking two months' leave for health reasons, and that Major-General Iskander Mirza would act as Governor-General during his absence.

Major-General Mirza (55) was gazetted to the Indian Army from Sandhurst in 1919, transferred to the Political Service in 1926, and became Defence Secretary on the formation of Pakistan. He served from May-October, 1954, as Governor of East Bengal, where he reorganized the provincial administration after the dismissal of the United Front Ministry headed by Mr Fazlul Huq. Since then he had been Minister for the Interior, States, and Frontier Regions in Mr. Mohammed Ali's Cabinet.

The Moslem League Parliamentary Party elected Chaudhri Mohammad Ali, the Finance Minister, as party leader on Aug. 7 in place of the Prime Minister, Mr. Mohammed Ali, and authorized him to negotiate with the Opposition parties to obtain a working majority in the Constituent Assembly. The same night Mr. Mohammed Ali tendered his resignation to the acting Governor-General. Following negotiations between leaders of the Moslem League, the United Front, and the Awami League, Chaudhri Mohammad Ali succeeded on Aug. 11 in forming a coalition government with United Front support, after Mr. H. S. Suhrawardy, leader of the Awami League, had declined an invitation to join an all-party Government as Deputy Premier. Earlier proposals for the formation of a coalition government under Mr. Suhrawardy's leadership had broken down as a result of his demand for equal representation for the Moslem and Awami Leagues, and his refusal to co-operate with the United Front.

The secretary-general of the Awami League subsequently explained that the League had refused to participate in the new Government primarily because it objected to the posts of Governor-General and Prime Minister both being held by West Pakistanis. He pointed out that it had hitherto been the convention that one of these posts should be held by a West Pakistani and the other by an East Pakistani.

The provisional distribution of portfolios in the new Cabinet was announced on Aug. 12, as follows :

Chaudhri Mohammad Ali (Moslem League)	Prime Minister, Defence, Foreign Affairs and Commonwealth Relations, & Financial and Economic Affairs.
Dr. Khan Sahib (Independent, associated with the Moslem League)	Communications, and States and Frontier Regions.
Mr. A. K. Fazlul Huq (United Front) .. .	Interior.
Mr. Habib Ibrahim Rahimtoola (Moslem League) ..	Commerce and Industries.
Lieut.-Colonel Syed Abid Hussain (Moslem League) ..	Education and Kashmir Affairs.
Mr. Kamini Kumar Dutta (United Front) .	Law and Health.
Pir Ali Mohammed Rashidi (Moslem League)	Information and Broadcasting.
Mr. Nurul Huq Chaudhry (United Front)	Labour, Works, and Minority Affairs.
Mr. Abdul Latif Biswas (United Front)	Food and Agriculture.
Sardar Amir Azam Khan (Moslem League) .. .	Minister of State for Refugees, Rehabilitation, and Parliamentary Affairs.
Mr. Lutfur Rehman Khan (United Front)	Minister of State for Finance.

Chaudhri Mohammad Ali (50), a Punjabi, joined the Indian Audit and Accounts Service and was private secretary to the Finance Minister in 1936 and Financial Adviser to the Ministry of War and Supply in 1945. He served as a member of the "steering committee" of the Partition Council for India and Pakistan, and on the establishment of Pakistan became Secretary-General to the Government, in which capacity he played a prominent part in organizing the administration of the new State. He entered Mr. Nazimuddin's Cabinet in 1951 as Finance Minister, and continued to hold this post in Mr. Mohammed Ali's Governments.

Four other Ministers had been members of the former Government : **Dr. Khan Sahib** (who had held the Communications portfolio) ; **Mr. Rahimtoola** (who had been Minister of Commerce) ; **Lt.-Colonel Hussain** (Minister of Food since January last), and **Sardar Amir Azam Khan** (who had been Minister of State for Defence and for Refugees and Rehabilitation) **Pir Ali Mohammed Rashidi** had been Minister for Revenue, Public Health, and Information in the Sind Government. Of the United Front representatives, **Mr. Fazlul Huq** (82), was Chief Minister of Bengal from 1937-42, and of East Bengal from April-May, 1954. **Mr. Dutta** (77), a Hindu, and a Congress member of the former Constituent Assembly, is the leader of the Progressive Party **Mr. Biswas,** a member of Mr. Fazlul Huq's Cabinet of 1954, is general secretary of the *Krishak Sramik* Party, of which **Mr. Lutfur Rehman Khan** is also a member.

The following members of the Mohammed Ali Cabinet left the Government in addition to the former Premier himself : Lt.-General Mirza (see above), Mr. H. S. Suhrawardy (who had held the portfolios of Law and Parliamentary Affairs) ; Dr. A. M Malik (previously Minister of Labour and Works) ; Mr. Ispahani (the former Minister of Industries), General Mohammed Ayub Khan (the Minister of Defence, who, however, remained C.-in-C of the Pakistan Army) ; Mr. G. Pathan (who held the Agriculture portfolio) ; and Mr. Nurtaza Raza Chaudhury (who had been Minister of State for Finance).

Chaudhri Mohammad Ali made a policy statement in a broadcast on Aug. 11.

After expressing the hope that the Awami League would join a National Government, he said that the foremost problem facing the country was the Kashmir dispute. Friendship between Pakistan and India was essential if they were to raise the living standards of their inhabitants, but Kashmir's 4,000,000 people must be allowed freedom to decide their destiny. Another urgent task was the framing of the new Constitution, which must be completed with the minimum of delay and which must reflect the finest traditions of Islam. In conclusion, he gave an assurance that East Bengal's problems would receive the closest attention, and announced in this connexion that the Government had sanctioned a grant of Rs. 2,500,000 to relieve distress caused by recent floods in the Province

Mr. Abdul Wahab Khan, a United Front member from East Pakistan, and Mr. P. E. Gibbon, the Independent non-Moslem representative from the Punjab, were unanimously elected Speaker and Deputy Speaker respectively of the Constituent Assembly on Aug. 11.—(Pakistan High Commissioner's Office, London - Times) **(Prev. rep. 14341 A ; Cabinet, 14273 C.)**

B. CENTRAL AMERICA. — U.S. Aid for Completion of Pan-American Highway.

Under a Bill signed by President Eisenhower in July, $78,980,000 was appropriated for a three-year programme to complete the 7,300-mile Pan-American Highway from Fairbanks, Alaska, to the Panama Canal Zone, the U.S. contribution being twice that of the Central American republics through whose territories the road will run. The road—a two-lane all-weather highway—is largely completed, the principal remaining gaps (all between the southern border of Mexico and the Canal Zone) being . (1) A 145-mile stretch in the mountainous region between San Isidro, in southern Costa Rica, and El Volcán, in northern Panama, for which the route has not yet been surveyed ; (2) a 14-mile stretch (now under construction) between La Cruz, Costa Rica, and the Nicaraguan border town of Pena Blanca, work on which was delayed during the recent fighting in northern Costa Rica ; (3) a 25-mile section between Huehuetenango, Guatemala, and the Mexican town of Ocotal, on which work had been delayed when relations between the U.S. Government and the former pro-Communist Government of Guatemala became strained. In addition to these gaps, most of the 1,590 miles of road between the Guatemalan-Mexican border and the Canal Zone requires all-weather surfacing to bring it up to accepted standards.—(New York Times)

(Prev. rep. Pan-American Highway, 5564 A ; 4680 D.)

C. WESTERN GERMANY. — New Head of Federal Office for Protection of the Constitution.

It was announced in Bonn on July 8 that Dr. Robert Schrubbers, chief public prosecutor (*Generalstaatsanwalt*) in Dusseldorf, had been appointed Director of the Federal Office for the Protection of the Constitution in succession to Dr. Hans Jess, who had held the post *ad interim* after the defection of Dr. Otto John to East Berlin. (Frankfurter Allgemeine Zeitung)

(Prev. rep. 13851 A.)

D. CHINA.—Adherence to Inter-Parliamentary Union.

The New China News Agency announced on July 30 that the Chinese People's Republic would join the Inter-Parliamentary Union, and that a delegation from the National People's Congress would attend the Union's conference at Helsinki in August.—(New York Times)

(Prev. rep. Soviet Adherence, 14293 C.)

E. UNITED STATES.—Senate Ratification of Revised U.S.-Panamanian Treaty.

The U.S. Senate ratified on July 1 the new U.S.-Panamanian treaty on the Panama Canal, which revised the provisions of the 1936 treaty.—(New York Times) **(Prev. rep. 14121 D.)**

A. INDIA. — Mr. Nehru's Visits to the Soviet Union, Poland, Austria, Yugoslavia, Italy, Britain, and Egypt. - Marshal Bulganin to visit India.

The Prime Minister of India, Mr. Nehru, left Bombay by air on June 5 for official visits to a number of countries. After a one-day visit to Czechoslovakia (June 6) he spent 15 days in the Soviet Union (June 7-23), and thereafter visited Poland (June 23-25), Austria (June 26-27), and Yugoslavia, where he spent a week (June 30-July 6). After a short visit to Italy (July 7-8) he flew to Britain for discussions with Sir Anthony Eden, and then paid an official visit to Egypt (July 11-12), returning on July 14 to Delhi. Mr. Nehru was accompanied throughout his tour by his daughter, Mrs. Indira Gandhi, and by Sir Raghavan Pillai (Secretary-General of the Ministry of External Affairs) and other officials.

Prior to his arrival in Moscow, Mr. Nehru paid a short visit on June 6 to Prague, where he was received by President Zapotocky and had talks with the Czechoslovak Prime Minister (M. Siroky) and the Foreign Minister (M. Vaclav David). During his 15 days' stay in the Soviet Union, Mr. Nehru had a number of discussions with members of the Soviet Government, and visited many different parts of the U.S.S.R. by air, covering some 10,000 miles.

While in Moscow from June 7-10, Mr Nehru discussed international problems with Marshal Bulganin, M. Khrushchov, and M. Molotov; attended receptions given in his honour by the Soviet Government; called upon President Voroshilov; and visited the Kremlin, the Lenin-Stalin Mausoleum, the University of Moscow, schools, and factories, receiving everywhere an enthusiastic welcome.

On June 11 Mr Nehru left Moscow by air for a ten-day tour of the U.S S.R. After visiting Stalingrad (June 11) he flew to the Crimea for visits to Simferopol and Yalta (June 12) and thence to Tiflis, capital of the Georgian Soviet Republic, where he arrived on June 13 He then visited the historic cities of Tashkent and Samarkand, in Uzbekistan, and Alma-Ata, in Kazakhstan (June 14-16). From Soviet Central Asia he flew to the Ural region for visits to the industrial cities of Sverdlovsk and Magnitogorsk (June 18). After a two-day visit to Leningrad (June 19-20) he returned to Moscow to continue his discussions with the Soviet Ministers.

On June 21 Mr. Nehru addressed a mass rally of 100,000 people in the Dynamo Stadium in Moscow—the first occasion on which such a meeting had been addressed by a non-Communist statesman. Earlier on the same day Mr. Nehru had announced at a press conference that Marshal Bulganin had accepted an invitation to visit India at a date to be fixed later.

In his speech at the Dynamo Stadium, Mr. Nehru expressed his gratitude for the "affection and welcome" which had been extended to him wherever he had gone in the Soviet Union. He continued:

"Almost contemporaneously with your October Revolution under the leadership of the great Lenin, we in India started a new phase of our struggle for freedom. . . . Even though we pursued a different path in our struggle under the leadership of Mahatma Gandhi, we admired Lenin and were influenced by his example. . . We did not understand some of the developments in your country, even as you might not have understood much that we did. We wished the Soviet Union well in the great experiment she was making, and tried to learn from it where we could The backgrounds of our countries were different—their geography, history, traditions, and culture, and the circumstances wherein they had to function . . . We all have to learn from others and we cannot isolate ourselves, but this learning cannot be fruitful if it is imposed from outside. We believe in democracy, in equality, and in the removal of special privileges, and we have set ourselves the goal of developing a socialistic pattern of society in our country through peaceful methods . .

"It was in recognition of the right of each country to fashion its own destiny that India and the People's Republic of China agreed that the 'Five Principles' should govern their relations with each other Subsequently these principles were accepted by Burma and Yugoslavia, and the Soviet Government has also expressed its approval of them. At the Bandung Conference these principles were elaborated into ten, and embodied in a declaration on world peace and co-operation Thus over 30 countries have accepted them. I have no doubt that these principles of international behaviour, if accepted and acted upon by all countries, would go a long way to put an end to the fears and apprehensions which cast dark shadows over the world. .

"Peace is of paramount importance if this world of ours is to make progress, or indeed to survive. Peace is not merely abstention from war, but an active and positive approach to international relations leading, first, to the lessening of present tensions and an attempt to solve our problems by methods of negotiation, and secondly, to growing co-operation between nations—by cultural and scientific contacts, increased trade and commerce, and exchange of ideas, experience and information. . . There is no reason why different countries having different political, social, or economic systems should not co-operate in this way—provided there is no interference with each other and no attempt at domination. . . ."

The following joint statement was signed in the Kremlin on June 22 by Marshal Bulganin and Mr. Nehru:

". . . The relations between the Soviet Union and India rest on a firm foundation of friendship and mutual understanding The Prime Ministers are resolved that these relations shall continue to be informed and guided by the following principles [i e the "five principles of peaceful co-existence," known as *Panch Sila*]

(1) Mutual respect for each other's territorial integrity and sovereignty

(2) Non-aggression.

(3) Non-interference in each other's internal affairs for any reasons of an economic, political, or ideological character

(4) Equality and mutual benefit

(5) Peaceful co-existence.

The Prime Ministers are convinced that . . the wider acceptance of these principles will enlarge the area of peace, promote mutual confidence among nations, and pave the way for greater international co-operation"

After welcoming the decisions of the Bandung Conference as "of historic importance," the statement continued "The Prime Ministers recognize that there have been signs of improvement in the general international situation In particular, they welcome the lessening of tension in the Far East, the advent of Austrian independence, the improved relations between the Soviet Union and Yugoslavia, and the keener and more general appreciation now discernible everywhere of the dangers of war in an atomic age Nevertheless, in large areas fear and suspicion dominate the minds of men and nations and vitiate international relations. In the Far East, while there has been a lessening of tension, the causes of tension still remain It is the earnest hope of both Prime Ministers that it will be possible by peaceful means to satisfy the legitimate rights of the Chinese People's Republic in regard to Taiwan (Formosa) At the same time the Prime Ministers reiterate their conviction that the continued refusal to admit the Chinese People's Republic to the U.N lies at the root of many troubles in the Far East and elsewhere They consider it essential that the Chinese People's Republic should be given its rightful place in the United Nations, whose role and authority would thereby be enhanced. . "

The statement went on to call for a complete ban on the production of atomic and thermo-nuclear weapons, for a "simultaneous and substantial" reduction of conventional armaments, and for disarmament through effective international control In conclusion, it referred to the recent agreement for the construction of a steel plant in India with Soviet assistance (see 14103 A), and said that the two Prime Ministers would "seek to promote and strengthen the relations between the two countries in the economic and cultural fields, as well as in those of scientific and technical research."

Mr. Nehru left Moscow for Warsaw on June 23, declaring at the airfield that he had "left part of my heart behind" in the Soviet Union.

Before leaving Moscow, Mr Nehru paid a visit on June 22 to the newly-opened Soviet atomic energy plant, described by Indian press correspondents as being "somewhere outside Moscow"

During his three-day visit to Poland, Mr. Nehru had discussions in Warsaw with M. Cyrankiewicz (the Prime Minister), M. Boleslaw Bierut (First Secretary of the United Workers' Party), and other Polish leaders. A joint communiqué said that Poland and India would be guided by the "five principles" in their mutual relations, that there were "no problems or controversies between the two countries," and that both countries would foster mutual economic and cultural relations. The statement added that Mr. Nehru and M. Cyrankiewicz had discussed the problems of Indo-China, "where both Poland and India have been associated in the International Commission as they had previously been associated in the International Commission in Korea."

While in Poland, Mr Nehru visited Cracow, Stalinogrod and other industrial centres in Silesia, and the Nowa Huta iron and steel plant, the largest in Poland He received the Freedom of Warsaw while in the Polish capital

Mr. Nehru flew from Warsaw to Vienna, where he had discussions with Dr. Raab (the Austrian Chancellor) and Dr. Figl (the Foreign Minister). A communiqué issued on June 27 stated that the conversations had covered questions of international importance, particularly the position of Austria after the conclusion of the State Treaty, as well as the possibility of promoting trade between Austria and India.

Mr. Nehru was the guest of honour at a State banquet given by the Austrian Government and held in the hall where the Congress of Vienna took place in 1815. He also lunched with President Körner at the Hofburg.

On July 28 Mr. Nehru had discussions at Fuschl-am-See (near Salzburg) with the Indian High Commissioner in London (Mrs. Pandit, his sister), the Indian Ambassadors in Belgrade, Bonn, Brussels, Cairo, Moscow, Paris, Prague, and Rome, and the Chargé d'Affaires in Stockholm.

From Vienna Mr. Nehru flew to Yugoslavia, where he spent a week as the guest of President Tito and visited many parts of the country.

The Prime Minister received an enthusiastic welcome from 200,000 people when he arrived in Belgrade on June 30. After discussions at the White Palace with President Tito and other Yugoslav leaders, he addressed a joint session of the Yugoslav Parliament on July 2, his speech being mainly on the theme of peaceful co-existence. The Freedom of Belgrade was conferred upon Mr. Nehru on the same day.

Mr. Nehru paid visits on July 3-4 to Sarajevo (the capital of Bosnia-Herzegovina), Jablonica, in Bosnia (where he inspected Yugoslavia's biggest hydro-electric station), and Dubrovnik and Split, on the Dalmatian coast. From Split he sailed in President Tito's yacht to the island of Brioni for further discussions with the Yugoslav President, and paid short visits to Zagreb, capital of Croatia, and Ljubljana, capital of Slovenia.

A joint statement, signed by Mr. Nehru and President Tito, was issued from Brioni on July 6.

After pointing out that Mr. Nehru had returned the visit paid to India by President Tito in 1954, the statement said that the talks had been held "in an atmosphere of cordiality characteristic of the increasingly close friendship between India and Yugoslavia," and that they had "revealed close identity of views on all problems considered" It continued

"The policy of full independence pursued by both countries, based on the principles of peaceful co-existence, represents an important contribution to the growth of international co-operation and mutual understanding among an increasingly large number of countries The President and the Prime Minister noted that the general world situation had improved of late. . These trends have found expression at the Bandung Conference, in the signing of the Austrian State Treaty, in a notable extension of the area of agreement on the question of disarmament, and in the Yugoslav-Soviet talks in Belgrade and the Indian-Soviet talks in Moscow, as well as at the tenth anniversary session of the United Nations. It is earnestly hoped that the same spirit will prevail at the forthcoming Geneva meeting of the Heads of Government of France, the United Kingdom, the U S S R, and the United States . . ."

After stressing the need for a settlement of the German and Formosan problems, and calling for the admission of the Chinese People's Republic to the United Nations, the statement concluded "The President and the Prime Minister reviewed economic relations between the two countries and came to the conclusion that commercial exchanges were not on a scale commensurate with the close relations between them . . Both parties agreed to an early exchange of economic missions to explore practical measures of co-operation between the two countries in the scientific and technical fields. The President and the Prime Minister also agreed that the rich cultural heritage of both countries offers broad possibilities for cultural co-operation."

While in Rome on July 7-8, Mr. Nehru had discussions at the Palazzo Viminale with Signor Segni, the new Italian Prime Minister, and Professor Martino, the Foreign Minister. He also called upon President Gronchi, and attended a reception given in his honour by the Italian Government at the Villa Madama. On July 8 Mr. Nehru was received in private audience by the Pope at the Vatican.

The following message was read by the Pope to Mr. Nehru: "We are happy to welcome heartily a great statesman whom we have the pleasure of meeting for the first time. . . We feel sure that you are fully mindful of the lofty responsibilities that, in striving to establish true peace based on love and justice among the peoples of the world, devolve upon those in authority. . . . As we recall that one of the distinguished sons of India has been elevated by us to the honour of the Cardinalate, we avail ourselves of the opportunity to address, through you, a message of affectionate regard to the President, the Government, and the noble people of India, whose welfare and happiness are ever in our remembrance in prayer to Almighty God"

At a subsequent press conference, Mr. Nehru disclosed that he had discussed the Goa question with the Pope, and that the Pope had agreed with him that the question was a purely political one "My difficulties with the Portuguese," Mr Nehru added, "are that they want to bring in the religious question all the time They have an untenable political position, and drag in the religious aspect just to confuse people's minds Goa is no religious issue, and His Holiness agrees with me that it is not a religious issue" Questioned about India's attitude towards the 200,000 Roman Catholics in Goa, Mr Nehru replied that there were seven or eight million Catholics in the Indian Union, who enjoyed complete religious freedom. Asked how India planned to deal with the Goa problem on a political basis, Mr. Nehru said: "You don't expect me to give you a detailed account of the Government of India's future policy But of one thing you can be absolutely sure—Goa will be Indian."

In response to a special invitation from Sir Anthony Eden, Mr. Nehru flew from Italy to Britain for informal discussions on world problems with the British Prime Minister.

The discussions took place at Chequers, where Mr. Nehru stayed as Sir Anthony Eden's guest on July 8-9 Other participants on the British side were Mr. Macmillan (the Foreign Secretary), Lord Hume (Secretary for Commonwealth Relations), and Mr. Malcolm Macdonald, U.K. High Commissioner in Delhi and lately Commissioner-General for South-East Asia On the Indian side, Mr Krishna Menon (permanent Indian representative at the U N.), Mrs Pandit, and Sir Raghavan Pillai took part in the discussions. A brief statement from Chequers said that the talks had covered a wide field, including the Far East and the prospects of the Geneva "summit" conference.

Mr Nehru dined with the Queen at Windsor on July 9, and also visited Lord and Lady Mountbatten. In a statement at London Airport before leaving for Cairo, he expressed the opinion that the world had reached "a psychological moment of history—a turning away from the tense atmosphere of the 'cold war' towards peace."

On July 11-12 Mr. Nehru visited Cairo as the guest of the Egyptian Government, and had discussions with Colonel Nasser, the Prime Minister of Egypt. A joint statement was issued by Mr. Nehru and Colonel Nasser after the conversations ended.

After recalling that the two Prime Ministers had met at the Bandung Conference, the statement said that there had been "general agreement" on the subjects discussed in Cairo—"international problems, the situation in the Middle East, and other matters of mutual interest to the two countries" It added "The Prime Ministers reiterate their conviction . that involvement in military pacts or in alignments with the great Powers does not serve the cause of peace, and, indeed, often has the opposite effect"

The statement contained a plea for general disarmament and the banning of atomic and thermo-nuclear weapons; expressed the hope that the Geneva "summit" conference would "result in averting the great dangers which threaten the very existence of the human race", and noted that there had been some improvement in the international situation in recent months, although in some parts of the world "grave problems still remain and the situation is full of danger" It also endorsed the declaration on the dangers of thermo-nuclear warfare which had been issued by Bertrand Russell, the late Professor Einstein, and other eminent scientists (see 14305 A)

Mr. Nehru arrived back in Delhi on July 14 after an absence of nearly six weeks, during which he had visited eight countries and covered 25,000 miles. On July 16 President Rajendra Prasad conferred on Mr. Nehru the *Bharat Ratna* (Jewel of India), the highest Indian award, for his "heroic endeavours in the cause of peace for mankind."—(The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London - Soviet Weekly - Polish Embassy Press Dept., London - Wiener Zeitung - Tanjug Agency, Belgrade - Giornale d'Italia - Times - Daily Telegraph) **(Prev. rep. Mr. Nehru, 14303 A.)**

A. UNITED KINGDOM. — Wholesale and Retail Prices. - Movements in Second Quarter of 1955.

The movements of wholesale and retail prices in the second quarter of 1955 is shown below:

Wholesale Prices (1930 = 100)

	April	May	June
Intermediate products	373.2	373 3	374.1*
Iron and steel	374 9	374 9	374 8*
Food and tobacco	301 1	298 4	305 1*
All items	334 1	332.6*	336 0*

Retail Prices (Jan. 15, 1952 = 100)†

Food	119 9	119 8	124 8
Rent and rates	114 4	114.7	114.9
Clothing	96 3	96 2	96 2
Fuel and light	114 8	111.4	112.7
Household durable goods	95 5	95 6	95.6
Miscellaneous goods	99 9	101.4	101 5
Services	113 5	113.9	115 3
Alcoholic drink	102 7	102.7	102.7
Tobacco	100.3	100 3	100.3
All items	110.8	110 6	112.9
All items (June 1947 = 100)	146 8	146 5	149.6

* Provisional. † On April 19, May 17, and June 14 respectively

It was pointed out in the *Ministry of Labour Gazette* that the sharp rise in the food prices index in June was due to the early exhaustion of stocks of old potatoes in many areas, with the result that many retailers had only the much higher-priced potatoes of the new crop for sale. The increase in the "Services" index in June resulted principally from the increases in rail fares and road passenger fares in London and other areas.

The Board of Trade Basic Materials index in the second quarter (June 30, 1949 = 100) was 149.4 in April, 148.9 in May, and 151.0 in June.—(Board of Trade Journal - Ministry of Labour Gazette) **(Prev. rep. 14185 A.)**

B. AUSTRIA - WESTERN GERMANY. — Joint Construction of Danube Power Station.

A new hydro-electric power station on the Danube at Jochenstein, in the German-Austrian frontier region near Passau, was opened on July 1. Built jointly by the Austrian, German Federal, and Bavarian Governments, it will be the largest hydro-electric station in Central Europe on completion, with an annual capacity of 1,000,000,000 kilowatt-hours. The power will be shared equally between Austria and Western Germany.—(Wiener Zeitung - Welt der Arbeit, Cologne)

A. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. — Council Decisions on Temporary Renewal of E.P.U. and Procedure for Introduction of Convertibility.-Proposed European Monetary Agreement.

The O.E.E.C. Council met at ministerial level on June 9-10 under the chairmanship of Mr. R. A. Butler, British Chancellor of the Exchequer, and at deputy level on July 28-29. The most important decisions reached at these meetings concerned the renewal of the European Payments Union and preparations for a return to currency convertibility. They are summarized below.

Renewal of the E.P.U.-New European Monetary Agreement.

During the ministerial discussions on June 9-10 on the subject of an intra-European clearing system, two opposing viewpoints were reported to have been advanced On the one hand, Britain argued that, once sterling and other European currencies had been made fully convertible, the need for a multilateral clearing system would disappear and the function of short-term lending could be assumed by the proposed new European Fund (see 14086 A). On the other hand, Switzerland, France, and other member-countries contended that, even when convertibility was realized, a clearing system would still be needed and the function of short-term lending could be carried out by a transformed E P U., to which all member-countries would belong whether or not their currencies were convertible. Eventually the Council accepted a compromise (based on a suggestion put forward by the Netherlands), the main terms of which were as follows :

(1) The European Payments Union would be prolonged until June 30, 1956.

(2) For the month of July, 1955, settlements would be on the same basis as hitherto—50 per cent gold and 50 per cent credit.

(3) After that, the system would be " hardened " and settlements would be made on the basis of 75 per cent gold and 25 per cent credit. This would entail an adjustment of the quotas, which would be doubled, so that the credit facilities or obligations of each country could remain the same.

(4) A special credit of $50,000,000 would be granted within the E P.U to Italy, partly because she was near the end of her quota, and partly because of the strain which would be imposed on her economy by the " Vanoni " development plan. Italy would repay the credit in gold not later than June 30, 1957.

Greece's quota would remain blocked but could be opened again at any time before June 30, 1956, subject to the Greek Government having given three month's notice.

(5) At any time (even before June 30, 1956) the E.P.U. could be " terminated " and the post-convertibility arrangements could come into effect if member-countries whose trade quotas accounted for at least 50 per cent of the total amount of quotas notified the O E.E C. that they were in favour of such a step. [It was pointed out in the Press that, of the total E P.U. quotas, the U K., Western Germany, Switzerland, Belgium-Luxemburg, and the Netherlands—known to be the principal countries in favour of convertibility—accounted for well over 50 per cent]

(6) When the E.P U. came to an end, the credit balance remaining in the Union's income and expenditure account (which at the end of June amounted to 2,862,000 units of account) would be distributed among member-countries by adjustment of their claims on, or debts to, the Union, in accordance with the percentages already laid down in the E.P U. Agreement

If the liquidation of the E P.U. took place before June 30, 1957, any balance still owing by the Union to Belgium-Luxemburg under the 1953 arrangements for funding 50,000,000 units of account (see page 12811, first column), would be included in the last settlement to be carried out Thus, in accordance with the gold-credit ratio prevailing at the time of liquidation, part of the balance would be settled in gold, whilst the credit element would be added to Belgium-Luxemburg's claims on the Union and be repaid in accordance with the liquidation percentages mentioned above.

(7) As soon as the E P U. had come to an end, a European Monetary Agreement, administered by a Management Board similar to that of the E.P.U., would come into operation. Under this arrangement, two interconnected structures would be set up .

(*a*) The European Fund, to provide short-term credit to any member-countries needing it to enable them to withstand balance-of-payment difficulties. Credits would be granted by the Fund in gold and would have to be repaid (plus interest) within two years The capital of the Fund would be $600,000,000, part of which would come from E P.U assets (the remainder being distributed among member-countries), whilst the balance would be contributed by O E.E.C. member-countries according to an agreed scale (see below).

(*b*) A Multilateral Clearing System, which would ensure that, in conditions of convertibility, any member-country (whether its currency was convertible or not) would be able to secure temporary financial accommodation, and that outstanding balances were settled at regular intervals and at known rates of exchange.

(8) Subject to a few minor amendments, the existing O.E.E C trade liberalization code would be continued for " an unspecified period " after the adoption of convertibility.

(9) In order that regular discussions might be held on the problems which would arise from convertibility and, in particular, on the effect of exchange rate policies on trade, " a new body of high-level officials from capitals " would be set up within the O.E.E.C.

Further details of the European Fund and the Multilateral Clearing System were given in a memorandum published by the O.E.E.C. on August 5.

The European Fund.

As stated above, the capital of the Fund will amount to $600,000,000 consisting of (*a*) $271,575,000 from the residue of the E.P.U. capital, and (*b*) $328,425,000 in contributions from member-countries.

Part Transfer of E.P.U. Capital. That part of the E P.U. capital to be transferred to the Fund with the consent of the U.S Government will correspond to the residue of the capital which had been provided for the E.P.U under U S. aid (see 11181 A). It will be made available as follows :

(i) $113,037,000 held in gold by the E.P.U.

(ii) $123,538,000 representing that part of the amount allocated to the E P.U. by the U.S Government which has not yet been used.

(iii) $35,000,000 in the form of loans to Norway and Turkey, being the initial balances granted as loans by the U.S Government to Norway ($10,000,000) and to Turkey ($25,000,000) The Fund's claims against Norway and Turkey will be amortized over a period of 15 years, starting from the date of the E P U 's liquidation, in 13 equal instalments, the first of which will fall due at the end of the third year The terms—which are the same as would have applied bilaterally under the Union's liquidation procedure—had been agreed to by Norway and Turkey.

Contributions from Member-countries. These will be as follows :

	$ million
Austria	5 0
Belgium-Luxemburg	30 0
Denmark	15 0
France	42 0
Germany (Western)	42.0
Greece	2 850
Iceland	15.0
Italy	15.0
Netherlands	30.0
Norway	15 0
Portugal	5.0
Sweden	15.0
Switzerland	21.0
Turkey	3 0
United Kingdom	86 575

Call-up of Capital. (1) The capital of the Fund will be called up as follows :

(i) To begin with, the Fund will have at its disposal $148,037,000, consisting of $113,037,000 in gold transferred from the E.P U and the claims on Norway and Turkey of $35,000,000 also transferred from the E.P.U.

(ii) When it needs further liquid resources, it will call on members to contribute another $148,037,000, their contributions to be divided in the same proportions as the total contributions shown above.

(iii) Any further amounts needed by the Fund will be drawn in equal shares from the balance of $123,538,000 on the U.S. Treasury Account (transferred from the E.P.U) and from members' contributions up to the same amount, making a total of $247,076,000.

(iv) If still more is needed, the Fund will call up the remaining $56,850,000 of members' contributions

(2) In view of their special position and, in particular, the level of their reserves, certain countries will be called upon to pay their contributions only when all other contributions have been fully paid. The total amount of deferred contributions will not exceed $56,850,000 and, provisionally, the countries concerned and the amount of contributions deferred will be as follows :

	$ million
Austria	5.0
Denmark	15.0
Greece	2 850
Iceland	1.0
Italy	15.0
Norway	15.0
Turkey	3.0

(3) The call-up of further contributions will be made automatically by the Fund's Agent (see below) whenever liquid assets fall below $100,000,000, although the Fund's Board of Management will be able to authorize the raising of the assets above $100,000,000 if it appears at any time that total assets of $100,000,000 will be insufficient to meet expected drawings.

Other Provisions. (i) Interest will be paid by the Fund in gold on members' contributions, the rate being determined by the O E.E C. every six months for the preceding half-year.

(ii) All the Fund's transactions will be carried out in gold and its accounts will be kept in terms of a unit of account defined in terms of gold Initially, the unit of account will be the same as that used by the E.P.U. (i.e. equivalent to one U.S. dollar at $35 per fine ounce of gold).

The Multilateral Clearing System.

Basic Principles. The Multilateral Clearing System was designed so as to comply with the following conditions : (*a*) that it should be compatible with the exchange arrangements contemplated by member-countries ; (*b*) that it should allow member-countries to adopt different methods of determining their rates of exchange ; (*c*) that it should make financial facilities available to member-countries in the period between settlements, provided that these facilities were not on such a scale as to impose an undue strain on any member-country.

Accordingly, members of the system will have three obligations to other members · (*a*) to announce in advance the margins beyond which they will not be prepared to let their currencies fluctuate—i.e. the margins at which they will buy or sell their currencies (it being laid down that these margins should be as moderate and stable as possible); (*b*) to make their currencies available, within certain defined limits, to any other participating countries which should ask for them (i e interim finance), (*c*) to agree to settlements of outstanding debts being made each month in U.S dollars This last obligation means that those countries linking their currencies to gold will either fix buying and selling prices for the U S. dollar as well as for gold, or, alternatively, accept a fixed relationship between gold and the dollar.

Interim Finance Limits. The maximum amount of interim finance which may be drawn or granted by each country will be as follows (in millions of units of account):

Austria	5.0
Belgium-Luxemburg	20.0
Denmark	12.0
France	32.0
Germany (Western)	30.0
Greece	7.5
Iceland	2 0
Italy	13.0
Netherlands	22.0
Norway	12.0
Portugal	5.0
Sweden	16.0
Switzerland	15.0
Turkey	7.5
United Kingdom	64 0

A moderate and uniform rate of interest will be charged on all drawings of interim finance

Monthly Settlements. These will cover

(*a*) all interim finance advanced but not repaid before the end of the month,

(*b*) any balance in the currency of a member-country which another member-country holds and decides to bring into the settlement,

(*c*) all balances on any accounts kept under bilateral payments agreements (The O.E E.C must be notified of any such agreement and, if it considers the financial clauses to be prejudicial to the satisfactory operation of the Multilateral Clearing System, may make recommendations for the agreement's revision, if these recommendations are not complied with, the O.E E C may then decide that balances of accounts kept under the agreement shall not be brought into the monthly settlements.)

Calculation of Net Amounts due. On the basis of information supplied by the central banks, the Agent (see below) will determine the amounts in dollars required to settle the resulting balances each month For this purpose

(*a*) all interim finance balances will be calculated in dollars at the selling price fixed for its currency by the lending country;

(*b*) all balances held in another currency which a member decides to bring into the settlement will be calculated in dollars at the buying price for its currency fixed by the debtor country,

(*c*) all balances on accounts kept under bilateral payments agreements will be calculated on the basis of the rates agreed between the parties to these agreements.

[The difference between the proposed Multilateral Clearing System and the present E P U. will be that it will be optional whether a pair of countries bring their claims and debts for settlement within the system, or settle them in the ordinary way through the foreign exchange market. It was, however, pointed out in the Press that, as debtors will have to settle at the most favourable rate for the creditors (and the least favourable for themselves), whenever possible it will in practice be preferable for a debtor country to settle its debts with a "convertible country" before the monthly settlement, by recourse to the foreign exchange markets. The actual amount of business to pass through the Multilateral Clearing System may therefore be quite small. On the other hand, the guarantee of a rate, even though it be a maximum one, will be a real privilege which membership of the clearing system will afford]

Guarantee against Default. Should any default occur, it will be carried up to an amount of $50,000,000 by the European Fund. At the same time the defaulting country will be automatically suspended and the Fund will use all the means at its disposal to ensure repayment of the debt in dollars.

Provisions governing the European Monetary Agreement. (1) It was laid down that if the special termination clause had not brought the E.P U to an end and the E.M.A. into force by March 31, 1956, the O.E.E.C. would review both the conditions on which the E.P U. might be renewed from July 1, 1956 onwards, and the provisions of the E M.A.

(2) The provisions of the E.M.A. were designed to remain in force for an indefinite period, but the operation of the Multilateral Clearing System would be reviewed not later than three months before the end of its first year, and the Agreement as a whole not later than three months before the end of its third year.

(3) The Multilateral Clearing System would be terminated, unless the O.E.E C. decided otherwise, if, at the end of the first year or on any subsequent renewal date, countries responsible for at least 50 per cent of the contributions to the Fund indicated that they did not want the system to continue. The Agreement as a whole could be brought to an end in two ways. (i) if the member-countries unanimously decided to do so; (ii) if, at any time after the third year from its coming into force, the contributions of its member-countries (excluding those countries which, while still members, had given notice of withdrawal) amounted to less than 50 per cent of the total contributions fixed when the Agreement came into force.

The Bank for International Settlements in Basle will act as Agent for both the European Fund and the Multilateral Clearing System, as it has done in the past for the European Payments Union.—(O.E.E.C. Information Division, Paris - Financial Times) **(Prev. rep. 14254 A; 11181 A; Mr. Butler's Statement, 14343 A.)**

A. UNITED STATES.—Administration. - Resignation of Secretary of Air Force. - Appointment of Mr. Quarles.

Mr. Harold Talbott, Secretary of the Air Force, resigned on Aug. 1, following an inquiry into allegations that he had misused his office in order to obtain business for an industrial engineering firm of which he was a partner.

Before the Senate had confirmed Mr Talbott's nomination in 1953, Mr. Talbott, like other members of the Administration, had agreed to sever his connexions with any firms with whom he might subsequently have to do business when in office (see page 12702, column one). He had, however, explained that he would remain "a special partner" in one company, Paul Mulligan & Co. (an industrial engineering firm specializing in clerical efficiency studies), but had assured the Senate that no work concerned essentially with defence would be done by that firm while he was a member of the Administration. Nevertheless, it was subsequently alleged that Mulligan & Co had continued to do business with companies holding defence contracts; that Mr. Talbott had continued to receive part of the firm's profits; and that he had solicited companies to give business to Mulligan & Co.

The Senate Permanent Investigating sub-committee held public hearings on the allegations at the end of July, at which it heard testimony from Mr. Talbott, Mr Mulligan, and a number of other witnesses Mr. Talbott admitted that he had tried to get new business for Mulligan & Co., but denied that he had acted with impropriety, broken the law, or used his official influence to further his business interests He offered to give his interest in Mulligan & Co. to his partner, and to accept no further money from the firm "if in the opinion of this group of gentlemen I will be helping the Air Force and the Administration and making people sure of my purpose." The committee, however, published no findings before Mr Talbott announced his resignation

In his letter of resignation to the President, Mr Talbott stated that he was resigning because he did not "in any way wish to be a source of embarrassment to you, or to your . Administration." Referring to "the recent unfortunate and, I believe, distorted publicity" about his continued association with Mulligan & Co, he declared "I am clear in my mind and conscience that my actions have been within the bounds of ethics This connexion has never influenced me, or interfered in the slightest with the discharge of my responsibilities as Secretary of the Air Force, and I have never used that office to further its business"

President Eisenhower, in accepting the resignation, said that he felt that Mr. Talbott's decision was the "right one in the circumstances." He paid a tribute to Mr. Talbott's "unexcelled diligence" in the administration of his department and to his "fine accomplishment" as Secretary of the Air Force. Earlier, at a press conference on July 27, the President had stated that the actions of a public servant had to be "impeccable, both from the standpoint of law and from the standpoint of ethics," and that a public servant should avoid any indiscretion which even gave the appearance that he was using his office improperly

Mr. Donald Quarles, Assistant Secretary of Defence in charge of research and development, was nominated by President Eisenhower on Aug. 11 as Secretary of the Air Force in succession to Mr. Talbott. Mr. Quarles (61), formerly vice-president of the Bell Telephone laboratories and president of the American Institute of Electrical Engineers, had been responsible for all the Defence Department's research work, including the guided missiles programme and the recently-announced plans for launching a space satellite.
(New York Times - New York Herald Tribune) **(Prev. rep. Administration, 14279 D; Mr. Talbott, 12777 B.)**

B. ARGENTINA. — New Provinces.

A Bill raising all Argentine Federal Territories to the status of Provinces was passed by the Argentine Congress in June, the whole country thereby being divided into 22 Provinces and the Federal District of Buenos Aires. It was laid down (*a*) that three new provinces would be formed within the present territorial limits of Formosa, Neuquén, and Rio Negro; (*b*) that a fourth province would be created between the 42nd and 46th parallels, bounded on the west by Chile and on the east by the Atlantic Ocean and including the present Federal Territory of Chubut and the Military Territory of Comodoro Rivadavia; and (*c*) that a fifth province would be formed from the Territory of Santa Cruz, the Maritime Territory of Tierra del Fuego, and those areas of Antarctica over which Argentina claims sovereignty.—(Bank of London and South America) **(Prev. rep. New Provinces, 12981 A.)**

A. MALAYA.—Federal Elections. - Victory for Triple Alliance. - Cabinet formed by Tengku Abdul Rahman.

The first elections in Malaya since the enlargement of the Legislative Council under the recent constitutional proposals (see 13586 A) were held on July 27. They resulted in an overwhelming victory for the Triple Alliance, led by Tengku Abdul Rahman and formed by the United Malays' National Organization (U.M.N.O.), the Malayan Chinese Association, and the Malayan Indian Congress, which won 51 of the 52 elected seats. The Negara (National) Party, led by Dato Sir Onn bin Ja'afar, which had been expected to provide the main opposition to the Triple Alliance, failed to return any members, the remaining seat being won by the small Pan-Malayan Moslem party. Nearly 85 per cent of the electorate went to the polls, and the Triple Alliance, with 818,000 votes, received more than four times as many votes as all other parties combined. The two principal items in the Alliance's programme were the achievement of Malayan independence by 1959 and the offer of an amnesty to the terrorists.

Indicating the new Government's policy in a number of statements after the election, Tengku Abdul Rahman said that his first task would be the establishment of independence, though they would go "dead slow" for a few months rather than "rush into it" as Singapore had done. Talks on a fully-elected legislature and on independence would be opened with the Colonial Secretary, Mr. Lennox-Boyd, when he visited the Colony in the near future, and he (Tengku Abdul Rahman) hoped that the issues could be settled amicably He announced that the Government would work for constitutional reforms and that a special commission, with Malayan membership, would be set up to study the question.

Tengku Abdul Rahman strongly criticized the High Commissioner's present powers of veto, saying that these powers must be made "purely advisory" within two years, "or one year if possible." "If the High Commissioner vetoes Bills passed by us," he declared, "we are not working for the people and we might as well walk out. I can see no immediate crisis arising from proposed legislation. Naturally we are not anxious to clash. But I cannot rest until this matter of veto powers is finally settled."

With regard to closer association between the Federation and Singapore, the Chief Minister-elect said that as Malaya was "in a hurry for independence," whilst Singapore, he thought, would never get complete independence, he could see no possibility of an eventual union between Malaya and Singapore. "Singapore," he added, "is a bastion not only for Britain but for the whole world I feel that the United States would object if Britain offered Singapore full independence. I see Singapore and the Federation like Spain and Gibraltar, China and Hong Kong." Nevertheless, he hoped to maintain friendly relations with Singapore, and he announced that a committee of Singapore and Federation Cabinet Ministers would be set up to deal with problems common to both territories.

On the question of an amnesty for the terrorists, Tengku Abdul Rahman said that this would not be put into effect until "the right time and with the advice of experts" If the Communists accepted the amnesty, the guerrilla leaders would be deported and the other guerrillas rehabilitated, an amnesty, he explained, should cover guerrillas (other than leaders) guilty of atrocities because "if we want peace we must forget them" If the terrorist leaders refused an amnesty, however, every able-bodied man over the age of 18 would be mobilized for part-time military service in the Federation

The composition of the new Executive Council was announced in Kuala Lumpur on Aug. 4, Tengku Abdul Rahman being appointed Chief Minister and Minister of Home Affairs. The other elected Ministers were:

Dato Abdul Razak bin Hussain (deputy president of U.M N O)—Education; Dr. Ismail bin Dato Abdul Rahman—Lands and Mines; Colonel H. S. Lee (president of the Associated Chinese Chambers of Commerce)—Transport; Inche Abdul Aziz bin Ishak (a journalist)—Agriculture; Mr. Leong Yew Koh (secretary-general of the Malayan Chinese Association)—Health; Inche Sardon bin Jubir (president of the U.M.N.O. Youth)—Works; Mr. V. R Sambantham (president of the Malayan Indian Congress)—Labour; Inche Sulaiman bin Dato Abdul Rahman—Local Government, Housing, and Town Planning; Mr. Ong Yoke Lin (a Kuala Lumpur businessman)—Posts and Telecommunications.

The new Legislative Council consists of 50 Malays, 25 Chinese, seven Indians, two Ceylonese, five European officials, seven European unofficials, and one representative from Malacca. The Opposition will be led by Dato Sir Clough Thuraisingham of the Negara Party, which has five nominated members in the Legislative Council.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 13586 A.)**

B. AUSTRIA. — Withdrawal of Soviet Forces.

The Soviet Defence Minister, Marshal Zhukov, announced on July 31 that all Soviet occupation troops would be withdrawn from Austria by Oct. 1—i.e., 25 days before the time-limit set in the Austrian State Treaty for the withdrawal of the forces of all the occupying Powers.—(Wiener Zeitung) **(Prev. rep. 14333 C.)**

C. FRANCE - LIBYA. — Agreement on Evacuation of French Troops from Fezzan. - French Rights of Transit and of Wartime Reactivation of Bases. - Franco-Libyan Treaty of Friendship. - "Good Neighbour," Cultural, and Economic Conventions.

It was announced in Paris and Tripoli on Aug. 11 that the Franco-Libyan negotiations on the evacuation of the French troops in the Fezzan had ended; that a treaty of friendship between France and Libya had been signed in Tripoli the previous night; and that a political agreement on the French position in the Fezzan, a "good neighbour" convention, a convention on economic co-operation, and a cultural convention, had been concluded at the same time. The provisions of the various agreements were summarized by the Quai d'Orsay as follows:

Political Agreement. This provided that French troops would evacuate the Fezzan within 12 months of the ratification of the treaty, and that the French bases would be handed over to the Libyan Army France would retain the right to reactivate these bases in the event of war, and also retain at all times the landing and transit facilities at these bases hitherto enjoyed by the French armed forces Libya agreed to employ French technical advisers to a large extent, including French technicians for the maintenance of the aerodromes at Ghatt, Ghadames, and Sebha, which serve for the transit of French troops.

"Good Neighbour" Convention. This guaranteed the security of the Libyan-Tunisian frontier, provided for "more efficacious" joint supervision of the frontier area, and regulated the movement of flocks and caravan traffic across the border.

Economic Co-operation Convention. This dealt with the manner in which the Libyan Government would utilize the financial contributions offered by France. [Hitherto the French Government had paid 160,000,000 francs per annum (about £160,000) as a general subsidy for the Libyan Budget, as well as 100,000,000 francs (£100,000) for the activities of the Libyan economic development agency.]

Cultural Convention. Under this convention, the French Government undertook to provide a certain number of scholarships annually for Libyan students studying in France

The negotiations on the future relationship between France and Libya, following the Libyan demand for the evacuation of the French forces from the Fezzan (400 strong), had opened in Paris in January last and had been resumed in Tripoli on July 18, leading to final agreement on Aug. 10. At Libya's request, Britain was consulted on the question of reactivating the French bases in the event of war, and H.M. Government gave its consent to this arrangement after discussions in London. In the final stages of the Franco-Libyan negotiations the Libyan delegation was headed by M. Mustapha Ben Halim, Prime Minister of Libya, and the French delegation by M. Maurice Dejean, the French Ambassador in Tripoli.
(Le Monde, Paris) **(Prev. rep. 14047 A.)**

D. SOUTH-EAST ASIA. — Overseas Chinese.

The following table, taken from the *External Affairs Review* published by the New Zealand Department of External Affairs, shows the number of Chinese living in the countries of South-East Asia, and their proportion to the total population:

	Total Population	Chinese	Percentage of Chinese
North Vietnam ..	11,500,000	50,000	0.5
South Vietnam .	9,500,000	950,000	10.0
Laos .	2,000,000	5,000	0.25
Cambodia	4,500,000	300,000	7.0
Burma .	18,000,000	310,000	1.75
Siam .	19,500,000	3,000,000	15 0
Malaya ..	5,700,000	2,150,000	38.0
Singapore .	1,120,000	860,000	77.0
Indonesia. .. .	80,000,000	2,000,000	2.5
Philippines .	21,000,000	300,000	1.5
British Borneo and Sarawak	950,000	240,000	25.0

The total number of Chinese given above, some 10,000,000, compares with the estimate of over 11,700,000 Overseas Chinese contained in the recent Chinese population census.
(Department of External Affairs, Wellington) **(13999 D.)**

E. UNITED STATES. — Employment and Unemployment. - Figures at Mid-1955.

The number of employed persons in the U.S.A. in June (over 14 years old, but excluding the armed forces) was 64,016,000, of whom 7,681,000 were employed in agriculture. The total was the highest figure on record, comparing with 60,688,000 in December 1954 and 62,098,000 in June 1954. The number of unemployed was 2,679,000, compared with 2,838,000 in December last and 3,347,000 in June 1954. An indication of the size of the armed forces was given by the difference between the total labour force and the total civilian labour force, which amounted in June to 2,996,000.
(Federal Reserve Bulletin, Washington) **(Prev. rep. 14085 A.)**

AUGUST 20—27, 1955

A. SUDAN. — Completion of Transitional Period of Self-government. - Anglo-Egyptian Discussions on Membership of International Supervisory Commission. - Cabinet Changes. - Mr. Azhari's Visit to Cairo. - Deterioration in Sudanese-Egyptian Relations. - The Nile Waters Dispute. - Army Mutiny in Southern Sudan.

The Sudanese Parliament unanimously adopted a motion on Aug. 16 requesting the Governor-General to inform the British and Egyptian Governments that the Sudanization of the Administration was complete, that "arrangements for self-determination should be put in motion forthwith," and that British and Egyptian forces should be withdrawn from the Sudan within 90 days. The Anglo-Egyptian agreement of 1953 (see 12794 A) had laid down that the adoption of such a motion would mark the end of the transitional period of self-government and would be followed by the election of a Constituent Assembly, which would decide whether the Sudan should maintain some form of union with Egypt or become completely independent.

Mr. Azhari (Prime Minister of the Sudan), who proposed the motion, said that the Sudan was unique in obtaining its liberty and the evacuation of foreign troops without bloodshed, and that it must never again allow its independence to be taken away. He would prefer the decision on complete independence or on a link with Egypt to be taken by means of a plebiscite, rather than by a Constituent Assembly. **Mr. Nur ed-Din**, the former Minister of Works and the leading supporter of maintaining a link with Egypt (see below), appealed to members to remember Egypt's help in the struggle for independence, and emphasized that all viewpoints should be given an equal chance of expression **Mr. Mahgoub** (Leader of the Opposition), declared, however, that the Sudan could show its gratitude to Egypt, not by sacrificing its independence, but by helping the Egyptian people to achieve democracy and liberty for themselves. **Sayed Siddiq el-Mahdi**, leader of the Umma Party, also spoke in support of Sudanese independence.

After the resolution had been adopted, Mr. Azhari, his Ministers, and all members of Parliament walked in procession from Parliament House to Kitchener Square, where the Prime Minister addressed some 50,000 people. Mr. Azhari and Mr. Mahgoub, who also spoke, were enthusiastically greeted by the large crowd, some of whom carried anti-Egyptian posters.

Support for the proposal that the future status of the Sudan should be decided by a plebiscite rather than by a Constituent Assembly, to which Mr. Azhari had referred, had previously been expressed by Sayed Ali el-Mirghani, leader of the pro-Government Khatmia sect, and by Sir Abdel Rahman el-Mahdi, leader of the Ansar sect and patron of the Umma Party.

At a press conference on Aug. 18, which was attended by Mr. Azhari and leading members of his Cabinet, Mr. Yahia el-Fadli (Minister for Social Affairs) read a statement expressing the hope that complete independence, without any formal link with Egypt, would be granted to the Sudan as soon as possible, and suggesting that neither a plebiscite nor the election of a Constituent Assembly was necessary.

"The liberty and independence of the Sudan" the statement said, "are no more in need of the consent of the co-domini, or of any other Government The position we have reached and the consciousness of what the nation has attained will not permit any Power to rob us of our legitimate right." A "unanimous desire" had been shown by all sections of the Sudanese people, headed by the two religious leaders, that self-determination should be expressed through a plebiscite instead of through a Constituent Assembly, and the events of Aug. 16 had constituted an "unofficial plebiscite" expressing the people's unanimous preference for independence It would therefore be gratifying if Egypt and Britain would "win the friendship of the Sudanese nation by meeting their wish and declaring the independence of the Sudan." Although the general desire for independence had become "so obvious that it needs no plebiscite," the Government favoured the holding of a such plebiscite to satisfy the co-domini and world opinion.

In reply to questions, Mr. Zarouk (Minister of Communications) said that feeling against association with Egypt had hardened as a result of Egyptian interference in the Sudan's internal affairs, and of the suppression in Egypt of normal political life and the strict censorship on public opinion, which had aroused fears that the same conditions might be imposed on the Sudan.

The committee set up under the Anglo-Egyptian agreement to supervise the transfer of key posts in the Administration (judiciary, defence force, police, etc.) from foreign to Sudanese control had reported on Aug. 4 that Sudanization was complete. It held its last meeting on Aug. 7.

It had been reported on June 22 that out of 1,177 British civil servants employed by the Sudanese Government in February, 1954, only 153 remained who were not under notice; of these, 66 were teachers and most of the remainder were specialists and technicians. Egyptians holding senior "influential" posts had also been discharged, and 35 Egyptians in junior posts were under notice to leave. On July 19 it was announced that Mr. V. Narahari Rao, the former Comptroller and Auditor-General of India, had accepted the post of Financial and Economic Adviser to the Sudanese Government.

Other recent developments relating to the Sudan are summarized below under cross-headings.

International Supervisory Commission.

Anglo-Egyptian discussions on the membership of the international commission which would supervise the process of self-determination opened in Cairo on June 8, the British delegation being headed by Sir Ralph Stevenson (then Ambassador in Cairo) and the Egyptian by Major Salem (Minister for National Guidance and Sudanese Affairs). After it had been suggested that the commission should consist of representatives of Burma, Pakistan, Persia, Switzerland, and Sweden, the Egyptian Government proposed instead a body consisting of two "Western" and two "Eastern" representatives, with an Asian chairman, and nominated the Soviet Union and the Ukraine as the two Eastern States to be represented. This was opposed by the British delegation on the ground that it was a misunderstanding of the commission's functions. The British delegation also opposed an Egyptian proposal for the inclusion of British, Egyptian, and Sudanese representatives, which it considered inconsistent with the stipulation in the Anglo-Egyptian agreement that the elections should take place in "a free and neutral atmosphere." Opposition to British and Egyptian representation on the commission had been expressed by Mr. Azhari in a letter to both Governments on July 6. The Egyptian Government finally announced on Aug. 14 that it had proposed to Britain that the composition of the commission should be referred to the Sudanese Parliament, whose decision would be accepted. This proposal was agreed to by the British Government on the following day.

The Sudanese Parliament accordingly decided on Aug 22 (*a*) to set up a seven-nation international commission to supervise the elections; (*b*) to exclude Britain, Egypt, and the Sudan from serving on the commission; (*c*) to invite Czechoslovakia, India, Norway, Pakistan, Sweden, Switzerland, and Yugoslavia to appoint representatives on the commission.

Cabinet Changes. - Split in National Unionist Party.

Mr. Mohammed Nur ed-Din (Minister of Works and vice-president of the National Unionist Party) and Mr. Bullen Alier (Minister of Animal Husbandry) were dismissed by the Prime Minister on June 18. Although no official statement was issued, Mr. Azhari told the Press that the two Ministers' views did not conform with the Government's policy, and that their behaviour did not accord with the Cabinet's standards. Mr. Nur ed-Din was the leader of that section of the National Unionist Party which continued to advocate union with Egypt, whilst Mr. Bullen Alier led a group of Southern politicians who favoured federation between the Northern and Southern Sudan and a constitutional link with Egypt.

On Aug. 7 Mr. Azhari, as president of the National Unionist Party, expelled Mr. Nur ed-Din from the party on the ground that he had made false accusations against his colleagues during a recent visit to Egypt (see below). Mr. Nur ed-Din, however, refused to recognize the Prime Minister's authority to expel him without the sanction of the party's general assembly, and on Aug. 13 he convened a meeting of the party's assembly which expelled Mr. Azhari and four of his Ministers. The Prime Minister and his followers refused to recognize this decision, which, they claimed, had been taken by less than half of the 500 members of the party's assembly

Relations with Egypt.

Relations between the Egyptian and Sudanese Governments deteriorated during the summer as a result of the Sudan's increasingly independent attitude towards Egypt, and of attacks on Mr. Azhari by the Egyptian Press and radio. In reply to these attacks, Mr. Zarouk declared on July 1 that it was clear that "a link with Egypt means domination by Egypt," and added: "We have not struggled against the British simply to have them replaced by the Egyptians. We stand for complete independence for our country."

Mr. Azhari and six members of his Cabinet visited Cairo from July 23-28 for the celebrations of the anniversary of the 1952 revolution, and during their stay had lengthy talks with Major Salem. Other Sudanese visitors to Cairo for the celebrations included Mr. Nur ed-Din, Mr. Alier, and a group of Southern senators and deputies supporting the latter's policy. Both during and after his visit the Egyptian Press continued its attacks on Mr. Azhari, whom it accused of "disgraceful behaviour" and denounced as a "British agent"; it also gave

prominence to statements made by the Southern politicians visiting Cairo, in which they alleged that Mr. Azhari was "spreading a reign of terror" in the Southern provinces of the Sudan.

Mr. Azhari told a *Times* correspondent on Aug. 13 that he and his Ministers had visited Cairo because they wished to "tell the Egyptian Government two things: that our two countries must be friends, and attacks by one against the other should cease; and that the Sudanese people had an ever-increasing desire to cling to their independence" He added: We were not received as friendly guests. We were badly treated. If we had represented a foreign Power, the treatment we received from our hosts would have made us break off diplomatic relations." Mr. Azhari explained that he had formerly supported the union of an autonomous Sudan under an Egyptian constitutional monarchy, in much the same relation as existed in the British Commonwealth, but that subsequent events in Egypt had altered his views

The Nile Waters Dispute.

Mr. Hammad (the Sudanese Minister for Irrigation) stated on June 21 that negotiations with Egypt on the division of the waters of the Nile between the two countries were "in a state of complete deadlock," and that the Government was considering asking the World Bank to appoint mediators.

The Sudan, he explained, had put forward four alternative proposals (1) to cancel the 1929 agreement (under which the Sudan received less than 5 per cent of the Nile's total annual flow, Egypt received nearly 60 per cent, and the rest flowed into the sea) and negotiate a new agreement for the division of the total available water on a *per capita* basis, bringing the Sudan's share to about 33 per cent, (2) to divide the water on the basis of areas in each country irrigated or susceptible of easy irrigation, giving the Sudan about 40 per cent; (3) to accept proposals made by a neutral commission in 1920, under which the Sudan would receive nearly 30 per cent and Egypt would be free to exploit the entire surplus, (4) to recognize the existing rights of both parties, in exchange for an agreement by Egypt to grant the Sudan a negotiable fair share of the surplus Egypt, however, had rejected the first three proposals and had demanded that the Sudan should consent to the construction of the proposed high dam above Aswan (which, said Mr Hammad, would permanently prejudice the development of the Sudan's agriculture) before the division of the surplus was discussed.

On July 26, however, Mr. Hammad announced that the Egyptian Government had put forward new proposals during the Cairo discussions, whereby the surplus water available after the construction of the high dam at Aswan would be divided equally between the two countries, these proposals, he said, would be considered by the Sudanese Government.

Mutiny in Sudan Defence Force.

The Sudan Government announced on Aug. 19 that two companies of the Equatoria Corps of the Sudan Defence Force had mutinied at Torit, in Equatoria Province (Southern Sudan); that three Northern Sudanese officers of the corps were missing, one of whom was believed killed; and that full details were not yet available, as it was impossible to communicate with Torit. The statement added that the situation in Equatoria Province was being "closely watched"; that the two other southern provinces (Upper Nile and Bahr-el-Ghazal) were quiet; and that the Government would take "the necessary steps to maintain security and stability." A state of emergency in the provinces of Equatoria, Upper Nile, and Bahr-el-Ghazal was proclaimed on the same day.

Reports reaching Khartoum from Juba (the administrative capital of Equatoria) stated that disaffected units had mutinied at Torit (75 miles east of Juba, near the Uganda border), the headquarters of the Equatoria Corps, and at Yei (80 miles south-west of Juba, near the Belgian Congo border). It was suggested in the British Press that the fact that the missing officers were all Northern Sudanese indicated that latent antagonism between the Northern and Southern Sudanese might be connected with the mutiny

The Sudan Defence Force, about 5,000 strong, is British-trained and equipped and was originally led by British officers, who, however, are now replaced by Sudanese. It consists of four corps, three of which—the Eastern Arab Corps, the Central Camel Corps, and the Western Arab Corps—are entirely Moslem, being recruited from the Arab tribes and the mixed Nubian and Negroid population of the Northern and Central Sudan. The fourth corps—the Equatoria Corps—is predominantly recruited from the Negro population of the Southern Sudan

At the request of the Sudan Government, R.A.F. *Hastings* and *Valetta* aircraft from the Middle East were flown to Khartoum on Aug. 21 to assist in the transport of Sudanese troops to Juba, from where the troops would be deployed into the troubled areas. (Juba was chosen because it has an airstrip.) It was also stated in Khartoum that strong Government forces, supported by mechanized units, were heading for Torit. In view of the disturbed situation in the Southern Sudan, the Governor-General (Sir Knox Helm) cut short his holiday in Scotland and flew back to Khartoum.

Mr. Azhari stated at a press conference on Aug. 23 that he had sent the mutineers a radio message calling upon them to surrender unconditionally, and that they had offered to do so if Northern Sudanese troops were withdrawn from Juba and replaced by British or Egyptian troops. The mutineers had also asked for a board of inquiry and had expressed fear of the northerners.

Mr Azhari disclosed that the mutiny had started when a company of troops at Torit refused to move north on Aug. 18 and attacked their officers. Another 190 men of the Equatoria Corps mutinied in the western districts of Juba, Yei, Yambio, and Meridi, of whom 138 had attempted to link up with the mutineers at Torit by crossing the border into Uganda and then re-entering Sudanese territory in the Torit area. These men, however, had been disarmed in Uganda, and the remainder were at large in western Equatoria In reply to questions, Mr. Azhari said. "The Government cannot make accusations at this stage, but broadcasts by Cairo Radio were harmful, particularly those made in southern dialects."

It was announced in Khartoum on the same day that loyal troops had captured the leader of the mutineers and eight of his aides.

The new British Ambassador in Cairo (Sir Humphrey Trevelyan—see 14386 A) informed the Egyptian Government on Aug. 21 of the arrangements for transporting Sudanese troops to Juba by air to restore order in Equatoria. Proposals that the British and Egyptian Governments should hold a round-table conference to discuss the "serious situation" caused by the mutiny of the Sudan Defence Force, and that British and Egyptian troops should be sent to the Southern Sudan, were made to Sir Humphrey Trevelyan by Major Salem. On Aug. 23, however, the Ambassador informed Major Salem that Britain could not accept these proposals, since they would be likely to undermine the authority of the Sudan Government. (Times - Daily Telegraph - Manchester Guardian - Le Monde)

(Prev. rep. Sudan, 14175 A; 13969 A.)

A. NORTH VIETNAM. — President Ho Chi-minh's Visits to Peking and Moscow. - Chinese and Soviet Economic Aid for North Vietnam.

President Ho Chi-minh of North Vietnam, accompanied by his Ministers of Commerce and Industry, Finance, and Education, visited Peking from June 25 to July 8 for talks with President Mao Tse-tung and the Chinese Government, resulting in the conclusion of an agreement for Chinese economic and technical aid to North Vietnam

A communiqué issued on July 7 announced that China would (*a*) make a grant to North Vietnam of 800,000,000 yuan (over £115,000,000) for the construction or rebuilding of railways, roads, bridges, dykes, and factories, for electrical, agricultural, and medical equipment, and for the supply of textiles and textile machinery; (*b*) would provide technical aid for the design and construction of railways, roads, and other installations; and (*c*) would send health and educational experts to North Vietnam The agreement also provided for an expansion of trade between the two countries, exchanges of students, and the employment of Vietnamese workers in certain Chinese enterprises

The communiqué called for strict observance of the Geneva Agreements, paid tribute to the work of the International Control Commission, and accused the United States of violating the Agreements by including South Vietnam, Cambodia, and Laos in the "designated areas" protected by the Manila Treaty, of converting South Vietnam into "a military base and an American colony," and of opposing "the holding of free elections in Vietnam."

From Peking President Ho Chi-minh proceeded *via* Mongolia to Moscow, where he stayed from July 12-18 and had discussions with Marshal Bulganin, M. Molotov, and other members of the Soviet Government. An agreement was concluded for Soviet economic and technical aid to North Vietnam.

A communiqué issued on July 18 announced (*a*) that the Soviet Union had agreed to allocate to North Vietnam 400,000,000 roubles (about £35,800,000) to help restore her economy, to build 25 "enterprises" in North Vietnam, to train Vietnamese technicians, and to assist in conducting geological surveys and in setting up medical centres; (*b*) that a trade agreement between the two countries had been signed; and (*c*) that it had been decided to widen political, economic, and cultural ties between them The communiqué also called for the strict observance of the Geneva Agreements and condemned U.S. policy in Indo-China, in similar terms to that issued in Peking,

Peking Radio announced on March 2 that a 100-mile railway linking Hanoi with the Chinese frontier had been opened.

(Le Monde, Paris - Times) **(Prev. rep. 14253 A.)**

B. UNITED NATIONS.—Palestine Truce Supervisory Organization. - Reappointment of General Burns.

The U.N. Secretary-General, Dr. Hammarskjöld, announced on July 22 that Major-General E. L. M. Burns (Canada) had been reappointed Chief of Staff of the U.N. Palestine Truce Supervisory Organization for a further year.

(New York Herald Tribune) **(Prev. rep. 14079 A.)**

A. FRANCE. — Parliamentary Ratification of Franco-Tunisian Home Rule Agreements.

The Franco-Tunisian agreements granting internal autonomy to Tunisia, and the accompanying conventions, were debated by the French National Assembly from July 6-9 and adopted by an overwhelming majority on the latter date. The three commissions of the Assembly which had previously examined the conventions had all declared themselves in favour of ratification.

The **Foreign Affairs Commission** had taken this decision on June 30 by 20 votes to five, with 13 abstentions Those supporting ratification included the Socialists, the M.R P., the Radicals, two Gaullists (out of six), one *Progressiste*, one Overseas Independent, and one Independent Republican; the opposition comprised two Gaullists, two Independent Republicans, and one *Paysan*, whilst the abstentions included the Communists, the Dissident Gaullists (A.R S.), the Independent *Paysans*, two Gaullists, and one Independent Republican.

The Commission's report, presented by M. Robert Verdier (Socialist), declared that the conventions represented a conciliation between Tunisian internal autonomy and the general interests of France, that they sufficiently guaranteed the rights and essential interests of the French community in Tunisia, and that they provided "vast possibilities" for the development of Franco-Tunisian co-operation.

The **Financial Commission** approved ratification by 31 votes (including that of its chairman, M Pierre Ferri—Gaullist) out of 38 members present.

The **National Defence Commission** declared itself in favour of ratification by 13 votes to seven, with five abstentions. Some 20 members of the commission, however, took no part in the voting, and one of its members—General de Monsabert (Gaullist), who had opposed ratification—resigned as *rapporteur* of the commission immediately afterwards

Four dissenting motions were put forward on July 6-7, as follows:

(*a*) A motion by M. Dronne (Gaullist) demanding the postponement of ratification until the fulfilment of the following conditions. (i) the creation of a permanent link of a federal character between France and Tunisia, within the framework of a reorganized French Union; (ii) amendment of the conventions to provide increased guarantees for the French population of Tunisia and for foreigners living there, as well as "real co-operation" between French and Tunisians on the basis of equal rights and duties; (iii) the promulgation by the Bey of a new democratic Tunisian Constitution.

(*b*) An amendment by M Isorni (*apparenté* to the Independent *Paysans*) proposing that instruments of ratification should not be exchanged pending the conclusion of an agreement on reciprocal rights for Frenchmen in Tunisia and Tunisians in France

(*c*) A *motion préjudicielle* by M. Barrachin (A R S) demanding the adjournment of the ratification debate until the French Government could announce details of the new Constitution which the Bey would grant to the Tunisian people.

(*d*) Another *motion préjudicielle* by M. Jean-Michel Flandin (Gaullist) approving the principle of the conventions but asserting that they were inadequate to establish the indispensable political co-operation between France and Tunisia

During the debate on July 7, M. Faure (the Prime Minister) announced that the Government was opposed to any delay in the ratification or in the exchange of instruments of ratification, as well as to any amendment which would necessitate a reopening of the Franco-Tunisian negotiations.

In support of their respective motions, **M. Dronne** asserted that ratification of the conventions in their present form meant "launching Tunisia on the path of secession," that there was an absence of good faith on the Tunisian side, and that the Néo-Destour Party was "dictatorial and nazi", whilst **M. Flandin** argued that the conventions could only be accepted if they were accompanied by a pact of political association, and warned of the danger of secession by Tunisia on the basis of the present agreements.

M. Barrachin contended that a favourable vote of the Assembly would mean "a vote of resignation," and accused the Government of not having sufficiently considered the "human aspect" of the problem so far as the 220,000 Frenchmen and 180,000 other Europeans in Tunisia were concerned. Although expressing confidence in the present Tunisian Premier (M Tahar Ben Ammar), M. Barrachin quoted a statement made by M. Bourguiba to the effect that the conventions represented "only a stage on the way to independence"; he particularly criticized the Judicial Convention as insufficient, and demanded that additional guarantees should be given, especially on the nature of the future Tunisian Constitution **M. Isorni** (who had recently visited Tunisia) spoke of the disquiet among the French settlers in the country, demanded additional guarantees for their future. He asked the Government for a "solemn declaration affirming that France will strictly apply the conventions and will stay in Tunisia in the face of all eventualities."

General Aumeran (deputy for Algiers, and *apparenté* to the Independent Republicans) strongly denounced those who had "since 1946 liquidated the empire in the most dishonourable manner," and declared: "Internal autonomy does not exist. Either one lives under a protectorate with certain improvements, or one marches towards independence, as shown by the example of Indo-China." **M. Bardoux** (*Paysan*) paid tribute to the "political maturity of the Tunisian *bourgeoisie*," the "dignity of the Bey," and the qualities of M. Bourguiba, and declared that none of the Frenchmen in Tunisia to whom he had spoken had believed in the possibility of maintaining direct French administration, whilst all the Tunisians whom he had seen had declared that co-operation with France was absolutely indispensable. M. Bardoux also disagreed with those who asserted that the conventions would liquidate the *présence française* in Tunisia, or that they were prejudicial to public security in Algeria. Nevertheless, he said that he would vote against the conventions because there were "certain gaps" in them, and, in particular, because it would not be possible to grant Tunisia internal autonomy without knowledge of her future political institutions **M. De Gracia** (Gaullist) regretted that the Néo-Destour had dominated the negotiations, and declared that he and his friends could only vote for the ratification of the present conventions if the Government gave satisfactory assurances on the true meaning of Article 6 of the general convention (providing for the entry of Tunisia into a revised French Union) and on the future Tunisian Constitution Another opponent, **M. Quilici** (Ind Republican, Oran) denounced the action of both the previous and the present Governments, and gave a warning that "France would be at the mercy of the elected Assembly promised by Bourguiba, which will certainly proclaim Tunisian independence."

M. July (Minister for Moroccan and Tunisian Affairs), replying to these criticisms, defended the conventions and maintained that the granting of autonomy to Tunisia was not equivalent to "scuttle." "The *présence française*," he said, "cannot be maintained by force, but only by a true understanding of the problems of Tunisia and by a far-sighted attitude. Our economic and technical assistance will be all the more efficacious if it is considered as friendly aid and not as a dole. . . . We are in Tunisia to help those Tunisians who look to the West, but we will not tolerate the activities of those bad shepherds who, helped by foreign radio stations, appeal to the mob and the murderers" Among other speakers supporting the conventions, **M. Maurice Schumann** (M R.P) stressed that no French Government could run the risk of having them rejected or even delayed, and appealed for their ratification by "the largest national majority", **General Billotte** (A R.S) agreed that it would have been impossible to maintain the *status quo* in Tunisia, and believed that the conventions would be crowned with success if they were loyally applied, if the French Union were reconstructed, and if strong representations were made to France's allies to bring about "a harmonious policy towards the Arab and Islamic countries", whilst **M. Savary** (Socialist) declared that the immense majority of the Tunisian people were in favour of the conventions.

The debate on July 8 was dominated by three important speeches in favour of ratification, made respectively by M. Paul Reynaud, Prime Minister at the outbreak of the Second World War; by M. Mendès-France, the former Prime Minister, who had initiated the policy of internal autonomy for Tunisia; and by M Edgar Faure, the present Prime Minister.

At the beginning of the day's debate **M. Waldeck-Rochet** announced on behalf of the Communist Party that, in spite of their criticisms of the conventions—which "emptied Tunisian internal autonomy of its contents because of their restrictive character"—the Communists would support ratification as "a beginning of the march of the Tunisian people towards independence" **M. Maurice Faure** and **M. Depreux** expressed support for the conventions on behalf of the Radical and Socialist parties respectively. **M. Legendre** (A.R.S), on the other hand, denounced the conventions as going too far, expressed "anguish" at the concessions made, and asked when "this policy of scuttle" would come to an end.

M. Paul Reynaud (Ind Republican) stressed the backwardness of Tunisia's agriculture, the poverty of its soil, the poor quality of its mineral resources, and the pressing problem of over-population, all of which made economic development the overwhelming task for Tunisia's future. He strongly criticized the past failure of French Administrations to pay more attention to this task, which applied equally to the other parts of French North Africa and throughout the French Union. On the other hand, he drew attention to the great interest which the Tunisians had in remaining in association with France, and declared that "the Tunisian Government must go hand in hand with France if it is to avoid catastrophe." "The interest of France," M Reynaud went on, "lies in helping the Tunisian Government. . . What would happen if we inflicted on the Tunisian people the humiliation of a delay? Why should we refuse to hear them talk of independence and liberty? It is we who have taught them these words. Why wait for a new Constitution? Assuming that the Bey would leave the drafting of this Constitution to an Assembly —would we reject it if we did not like it? And what would we do if the Bey accepted it? Would we go back on internal autonomy? . . . In the next few days we are going to discuss Algeria, then Morocco, and then French Africa. In the face of these problems let us comport ourselves like men of 1955."

M. Mendès-France (Radical) declared that his "home rule" declaration a year ago had only fulfilled what had already been announced or promised by various French Governments on many occasions in the past. He had been attacked for negotiating with the Néo-Destour, but experience in Syria before the war, and in Indo-China since, had shown the dangerous fallacy of negotiations with men "whom one has oneself made" and who "at best represent only themselves." The Néo-Destour expressed the feelings of the great majority of the Tunisians, and any undertaking given by a Tunisian Government without that party's support would have been worthless. M. Mendès-France stressed that it was a great advantage to deal with an organized and responsible party, the leaders of which were themselves the target of attacks by fanatics.

Ratification, he went on, was only one condition for the success of the undertaking, and everything depended on the application of the conventions France must help the new Tunisian State " to resist the pressure of extremists and the temptations of demagogy, to develop efficiency, impartiality, and morality in its administration, to constitute a body of qualified civil servants, to devise democratic institutions combining modernity with tradition, and above all to give priority to economic and social problems." He added : " Building a new State is a crushing task. We should offer them large and generous aid, asking as our reward only that they should recognize that they have more to gain than to lose by association with us. Let us send to them our best technicians and teachers ; let us open wide our educational institutions to them ; let us give them the chance of making careers in France "

After denouncing as " a strange and morbid colonial pessimism " the supposition that French culture and influence could only survive by force, and deprecating the " intellectual and moral disorder " which tried to repress in subject peoples the very ideas of freedom which France had taught them, M. Mendès-France concluded · " If we try to prevent progress, we shall build up against us a natural and in the long run irresistible movement. Certain people assert that Tunisia will make herself independent of us, but that will only happen if we apply indefinitely a policy of repression. We are going to set a precedent and to prove to the world that France is capable of applying to difficult problems an original solution in conformity with progress and democracy. . . . "

M. Edgar Faure, replying to the various criticisms expressed in the debate, pointed out that it would be impossible to subject the future Tunisian Constitution " to our censorship," as this would run counter to internal autonomy and would hurt the susceptibilities of the Tunisian people. It was, nevertheless, quite understandable that France had a great interest in the Constitution, and the Government were following developments in close contact with the Bey. " We are all convinced," he added, " that a refusal to ratify would have very grave consequences and would, in fact, constitute a striking break with the policy followed by French Governments for many years." He asked how such a decision could be explained to world opinion, let alone to the Tunisian people, to whose deep-rooted friendship for France it would deal a fatal blow

Dealing with the position of the French settlers in Tunisia, M. Faure emphasized the importance of the guarantees provided for them in the economic, financial, cultural, public security, and judicial spheres. " The settlers must stay in Tunisia for the sake of Tunisia and of France," he declared. " They represent France's presence in the country, and France must support and help them to stay in the difficult period of adjustment ahead. They must recognize, however, that it is impossible that they should stay without the psychological assent of the Tunisian people ; to insist on exaggerated guarantees would have been to defeat their very object."

To those who accused the Tunisians of " bad faith " because they had spoken of complete independence as their aim, M Faure replied that such an attitude on the Tunisian side was perfectly natural. After asking how one could expect the Tunisian nationalists to take " home rule only, and in stages " as their slogan, he said that it was quite a normal thing that the nationalists should try to obtain the maximum for Tunisia, just as the French Government had tried to obtain the maximum for France. If the Tunisian negotiators had not thought in terms of independence, their concessions would have had no value and no significance. " It depends on them and on us," he added, " whether or not their ideal will be realized without a breakdown of the conventions. To the ideal of independence we must reply by making interdependence seem even more attractive."

To those who were alarmed about the " fascist manners " which the Tunisian parties had appeared to adopt, M. Faure replied that every nation encountered " temptations and perils " on its path towards democracy, but that this was no reason why they should have less confidence in democracy. " If we keep up the same rhythm of progress," he said, " why should the Tunisians turn their backs on us ? Foreign intrigues ? Yes, we cannot forget the part they play, but they will only be able to play it in an atmosphere of disappointment and hostility."

Answering those critics who had queried the absence of wider perspectives beyond the conventions, M Faure said that they could not imagine the Tunisians remaining permanently debarred from their own diplomacy and defence, but neither could they imagine the French in Tunisia permanently debarred from full civil rights It was for this reason that he had insisted on the insertion of Article 6 into the general convention, which committed both Governments to study the principle and the practical implementation of the mutual admission of the nationals of each country to full civil rights in the other. These were not " empty words," and the Tunisian Government had already approved what was the germ of a still closer association

After warning his critics to beware of generalized distrust, the Prime Minister declared : " It is impossible to perpetuate a régime of direct administration. Not only internal forces but also world opinion condemn it. Certain people see in the present world three forces, all of which they distrust · international Communism, the aggressive and hostile Oriental countries, and even our Allies. . . But where does this spirit of distrust lead ? To an isolated France, to the disregard of world opinion, and to the rejection of those aspirations which cannot be misjudged." It was because France had brought the Tunisians to their present level of evolution that she now had the duty of pursuing her mission to the end. " The period of colonialism is finished," he declared : " the period of free association has begun. Our old country, which has agreed to accept limitations on its sovereignty, possesses sufficient authority to expect the same attitude from those countries which have not yet achieved their full sovereignty."

M. Faure said in conclusion : " We must vote today for the work which we have prepared over long years past I ask you to vote for ratification on a broad basis, and without bad humour or reticence . . We have to throw overboard any inferiority complex. Yesterday we seemed to have it *vis-à-vis* Germany, today we seem to have it in respect of Tunisia Doubting others too much, we will end by giving the impression that we doubt ourselves. . . "

After further debate, voting began in the early hours of July 9. The National Assembly rejected M. Dronne's prejudicial motion by 470 votes to 120, and that moved by M. Barrachin by 466 votes to 121. M. Isorni's amendment was likewise rejected by 470 votes to 125, and M. Flandin's by 484 votes to 110. The ratification Bill itself was then adopted by 538 votes to 44, after which the Assembly passed another Bill laying down that all French civil servants, other Government employees, railwaymen, etc. in Tunisia would be incorporated in the French Metropolitan staff *cadres*, whilst continuing to carry out their duties in Tunisia within the local *cadres*.

The deputies supporting the ratification Bill comprised the 94 Communists and four *Progressistes*, the 104 Socialists, 68 Radicals (out of 75), 23 members of the U D.S.R. (out of 24), the 16 Overseas Independents, 83 M.R P deputies (out of 85), 38 Independent Republicans (out of 56), 22 Independent *Paysans* (out of 27), nine *Paysans* (out of 21), one Dissident Gaullist (A R S.) (out of 34), 52 Social Republicans (Gaullists) (out of 71), and 13 *non-inscrits* (out of 15)

The opposing votes were cast by 12 Social Republicans (including MM. Barrès, Dronne, Flandin, and General de Monsabert), 11 Dissident Gaullists (including MM Barrachin and Legendre), 9 *Paysans*, 7 Independent Republicans (including General Aumeran, M. Montel, and M. Quilici), 3 Independent *Paysans*, and 2 Radicals (M. de Léotard and M Martinaud-Déplat)

Abstentions totalled 29, including 10 Independent Republicans, 10 Dissident Gaullists, 3 Social Republicans (including M. Pierre de Gaulle, brother of General de Gaulle), 2 Independent *Paysans* (including M. Isorni), 2 *Paysans*, and one *non-inscrit* Four deputies, including M. Schneiter (the Assembly's President) and M. Herriot, did not take part in the vote, whilst 11 were absent.

The Council of the Republic ratified the conventions on Aug. 4 by 253 votes to 26, after a debate which had opened on Aug. 2 and which followed similar lines to that in the National Assembly.

Among those who strongly attacked the conventions were three Gaullist Senators (M. Michel Debré, M. Jean Bertaud, and M. Gabriel Puaux, a former Resident-General in French Morocco), as well as Senator Colonna, who, with Senator Puaux, represents the French settlers in Tunisia Several M R P. Senators, as well as M. Leonetti (a Socialist Senator representing the French colony in Morocco), supported the agreements.

Those Senators opposing ratification comprised 14 Independent Republicans, four members of the *Rassemblement des Gauches*, four Gaullists, and four Overseas Gaullists ; 36 Senators abstained, whilst three did not take part in the vote, including the President of the Council, M Gaston Monnerville.

After voting the main ratification Bill, the Council of the Republic also adopted (by a voice vote) the Bill laying down the new status of French civil servants and other employees in Tunisia.

M. Bourguiba, the Néo-Destour leader, arrived in Paris on July 9 and expressed great satisfaction at the outcome of the debate. He declared : " I am deeply convinced that France will not regret having placed such wide confidence in Tunisia. It is now up to the Tunisians to face their new responsibilities courageously."—(Le Monde, Paris - Le Figaro, Paris)

A. ETHIOPIA. — Cabinet Changes. - Appointment of New Minister of the Pen.

It was announced in Addis Ababa on June 4 that the Emperor Haile Selassie had appointed the Minister of the Interior, Ras Abebe Aragai, as Minister of Defence ; that the new Minister of the Interior would be Dejazmatch Mesfin Sileshi (hitherto Lord Chamberlain to the Palace), who had accompanied the Emperor on his European tour in 1954 (see 14026 D) ; that the Vice-Minister of Education, Akalawork Haptewold, had been appointed Vice-Minister for Social Affairs, a new post ; and that Brigadier-General Mulugueta Bulli, commander of the Emperor's bodyguard, had been appointed Chief of Staff of the Army with the rank of major-general.

On April 28 it was reported that Tsahafe Tezaz Welde Guiorgius, Minister of the Pen and the most influential member of the Emperor's Cabinet, had been appointed Governor of the outlying Arussi province in Southern Ethiopia, and had been succeeded as Minister of the Pen by Tafara Lorq, the Emperor's private secretary. At the same time Dejazmatch Makonnen Desta became Minister of Culture, a new post.

(Times)

A. UNITED KINGDOM. — Parliament. - Validation of Election of Mr. J. C. George, Sir Roland Jennings, and Mr. Holland-Martin. - Legislation to amend Law on Offices of Profit under the Crown.

Legislation validating the election of three Conservative M.P.s—Mr. John C. George (Glasgow, Pollok), Sir Roland Jennings (Sheffield, Hallam), and Mr. C. J. Holland-Martin (Ludlow)—was enacted on July 27 after an unopposed passage through Parliament. A Select Committee of the House of Commons had found that the Members concerned were, at the time of their election, technically occupying offices of profit under the Crown and were thus disqualified from membership of the House under the existing law.

The Leader of the House (Mr Crookshank) stated on June 29 that Mr. George was chairman of Scottish Slate Industries (a company set up to revive the declining slate industry of Scotland) at the time of his election, a post to which he had been appointed eight years ago by the Minister of Works Although Mr. George had never received any remuneration for acting in this capacity, he (Mr Crookshank) was advised "that in law the directorship may be an office of profit under the Crown" and that consequently Mr George might have been "incapable of election to the House" Mr George had since resigned his directorship of Scottish Slate Industries.

In a further statement on July 5, Mr. Crookshank informed the House that Sir Roland Jennings (a chartered accountant by profession) had for a number of years held an appointment from the Treasury as an approved auditor for the purposes of the Industrial Provident Societies Act, the Friendly Societies Act, and the Industrial Assurance Acts—an appointment which might be an office of profit under the Crown and which consequently might have made Sir Roland incapable of election to the House Sir Roland Jennings, like Mr. George, had immediately resigned his appointment when he became aware of the position.

In a third statement on July 25, Mr Crookshank announced that Mr. Holland-Martin, at the time of his election in 1951, was a local director in London of the Bank of New Zealand, that this directorship might be an office of profit which might disqualify him from membership of the House, and that Mr. Holland-Martin had since resigned the directorship.

The all-party Select Committee, presided over by Mr. Charles Williams (C.), published its findings with regard to Mr. George and Sir Roland Jennings on July 15, and with regard to Mr. Holland-Martin on July 25, after taking evidence from the Members concerned.

The committee unanimously recommended that legislation should be introduced "at once" to validate the election of the first two Members, and to indemnify them from any penalties they might have incurred, "in view of the fact that Mr. George and Sir Roland Jennings are disqualified for purely technical reasons and have inadvertently contravened the law" It was satisfied that the posts formerly held by them had been "taken in a public spirit and not for profit"

The committee reported that Mr George had received no actual remuneration as chairman of Scottish Slate Industries, a post he had taken up because of his desire to help preserve the slate industry of Scotland, which was then in a difficult position. In the eight years in which he held that post, he had received a total of £107 for out-of-pocket expenses; so far from the post having been an "office of profit," he was in fact out of pocket because his expenses had been considerably greater than the sums he had drawn.

With regard to Sir Roland Jennings, the report stated that he had become a public auditor for the purposes of auditing the accounts of the Cotherstone British Legion and Village Club, of which he was a member He had undertaken to do this in order to save the club the expense of employing an auditor from elsewhere He had found, however, that he could not do this by law unless he was a public auditor, and had obtained the appointment for this sole reason. It was the only work he had undertaken as a public auditor, and he had never received any payment from the Treasury He had received from the British Legion a fee of one guinea a year, which had involved him in some loss, and which had only been charged "because he had to charge something."

Commenting on the present unsatisfactory state of the law with regard to the holding of offices of profit under the Crown, the report said: "The committee have noted the fortuitous way in which the cases they have considered have been brought to notice They cannot overlook the possibility that there may be among present Members of the House of Commons some who might be found to have unexpected technical disabilities. They consider that all Government departments should at once examine their lists of public appointments in order to determine whether there may be other Members who should be warned that there may be doubt about the validity of their election."

With regard to Mr Holland-Martin, the Select Committee found that he had held an office of profit under the Crown, and was accordingly disqualified from membership of the House, because he had received since 1950 a director's fee of £550 a year consequent upon his appointment as a director of the London branch of the Bank of New Zealand, After pointing out that Mr. Holland-Martin had acted in all good faith, that he had drawn attention to this matter entirely on his own initiative, and that he had meanwhile relinquished his directorship, the committee unanimously recommended that his election should be validated by legislation, as in the cases of Mr. George and Sir Roland Jennings, and that he should be indemnified from any penalties he might have incurred.

[The Bank of New Zealand's shares are vested in the Crown under the Bank of New Zealand Act, 1954. The New Zealand Minister of Finance appoints the Bank's board of directors, which, in turn, appoints the local directors, of whom Mr. Holland-Martin was one.]

The Validation of Elections Bill, validating the election of Mr. George and Sir Roland Jennings, and the Validation of Elections (No. 2) Bill, validating the election of Mr. Holland-Martin, were given unanimous second readings by the House of Commons on July 22 and July 27 respectively, and were enacted before Parliament rose for the summer recess.

Meanwhile, on July 12, the Government had introduced a Bill—the House of Commons Disqualification Bill— amending and clarifying the law relating to the holding of offices of profit under the Crown. It was designed to give effect to the recommendations of a Select Committee of the House of Commons which sat in 1941 under the chairmanship of the late Lord Hemingford (then Sir Dennis Herbert), and which had drawn attention to the "archaic, confused, and unsatisfactory" state of the law on this subject (see 4911 C). The Bill repealed in whole or part more than 100 Acts of Parliament, the earliest of which dated from 1693. Its principal provisions were as follows:

(1) A person would be disqualified from membership of the House of Commons who (*a*) held any of the judicial offices specified in the First Schedule to the Bill (see below), (*b*) was employed in the Civil Service, whether whole-time or part-time, (*c*) was a member of any of the armed forces of the Crown; (*d*) was a member of any police force maintained by a police authority; (*e*) was a member of the legislature of any country or territory outside the Commonwealth; (*f*) held any office or place specified in the Second Schedule to the Bill (see below), (*g*) held any paid office or place under the Crown not described in this section of the Bill.

The "armed forces of the Crown" would include the Women's Royal Nursing Service, Queen Alexandra's Royal Naval Nursing Service, and Voluntary Aid Detachments, as well as the Women's Services (i e the W R.A.C., the W R N.S, and W R A F) The "Civil Service of the Crown" would include the Civil Service in Northern Ireland, whilst "police authority" would include the Northern Irish Ministry of Home Affairs.

(2) Not more than 70 holders of Ministerial offices would be entitled to sit and vote in the House of Commons at any one time, of whom not more than 27 might be senior Ministers [At present there are 63 Ministers in the House, including both senior and junior Ministers.]

(3) A person would not be disqualified from membership of the House by reason of his being (*a*) a member of any reserve or auxiliary force; (*b*) an officer on the retired or emergency list of the Royal Navy, the Royal Marines, the Army, or the Royal Air Force, (*c*) an officer holding an emergency commission in the Army or R.A.F, or belonging to the reserve of officers. Such persons, however, would be disqualified if they were "for the time being embodied or called out on permanent or actual service."

(4) The offices of Steward or Bailiff of the Chiltern Hundreds or of the Manors of Northstead, East Hendred, and Hempholme would continue to be deemed offices of profit under the Crown, so that the traditional method of resigning from membership of the House could be continued [These are the traditional sinecures, acceptance of which is the only means whereby an M.P. can resign his seat.]

(5) Holders of certain Government contracts would be disqualified, as well as holders of Crown pensions. The latter category would include recipients of Civil List pensions.

(6) (i) This section laid down (*a*) that if a person disqualified under the provisions of the Bill was elected to membership of the House of Commons, his election would be void, (*b*) that if a person who had been elected should subsequently be disqualified, his seat must be vacated.

(ii) "If in a case falling or alleged to fall within the foregoing sub-section it appears to the House of Commons that the grounds of disqualification or alleged disqualification . . have been removed, and that it is otherwise proper to do so, the House may direct that any such disqualification incurred on those grounds at that time shall be disregarded."

(7) This section of the Bill abolished the common informer procedure, thereby doing away with the present necessity for a special Bill of Indemnity in the cases of M P s who were found to be inadvertently holding offices of profit under the Crown. [Under the existing law, an informer could claim in the Courts a daily penalty of £500 from an M P. who was disqualified from sitting in the House —i.e £500 for each day that such an M P. sat and voted]

It was laid down that any person seeking to establish that an M.P. was disqualified from holding his seat might apply to the Judicial Committee of the Privy Council for a declaration to that effect. In such cases the applicant must give security (not exceeding £200) for the cost of the proceedings [This provision preserved the right of challenge in place of the "common informer" system, whilst discouraging merely trivial or mischievous complaints.] The Judicial Committee of the Privy Council might direct that such cases should be tried (*a*) in the High Court, if the constituency of the Member concerned was in England or Wales, (*b*) in the Court of Session, if the constituency was in Scotland, or (*c*) in the High Court of Northern Ireland, if the constituency was in Northern Ireland. The decisions of these courts would be final.

(8) The provisions of the Bill, and of its accompanying Schedules, would apply to the Senate and House of Commons of Northern Ireland as well as to the House of Commons of the United Kingdom.

There were seven Schedules to the Bill, dealing respectively with (1) judicial offices disqualifying for membership of the House of Commons; (2) miscellaneous offices disqualifying for membership; (3) definition of paid offices under the Crown; (4) Ministerial offices; (5) offices involving limited disqualification or no disqualification; (6) modifications relating to the Parliament of Northern Ireland; and (7) the repeal of former enactments. Summaries of the first five Schedules are given below.

First Schedule. The holders of the following judicial offices would be disqualified for membership of the House of Commons Judge of the High Court of Justice or of the Court of Appeal, Judge of the Court of Session, Judge of the High Court of Justice or Court of Appeal in Northern Ireland; Judge of the Courts-Martial Appeal Court; Chancellor of the County Palatine of Durham, Vice-Chancellor of the County Palatine of Lancaster, Chairman of the Scottish Land Court, Judge of Appeal in the Isle of Man; Recorder of London; Common Serjeant, Assistant or Additional Judge of the Mayor's and City of London Court; Judge of a County Court in England and Wales; Sheriff or salaried Sheriff-substitute in Scotland; County Court Judge in Northern Ireland, Chairman or paid Deputy Chairman of London Quarter Sessions, Stipendiary Magistrate; Registrar of the Judicial Committee of the Privy Council, Master or Assistant Master of the Supreme Court; Official Referee to the Supreme Court; Registrar of the High Court, Clerk of Assize; Clerk of the Crown and Peace in Northern Ireland; Industrial Injuries Commissioner (or Deputy Commissioner), National Insurance Commissioner (or Deputy Commissioner); and members of certain tribunals, including the Industrial Court the Lands Tribunal, the Scottish Land Court, and the Transport Tribunal

Second Schedule. The following were among the miscellaneous offices disqualifying from membership of the House Agent in Great Britain of the Northern Ireland Government, Ambassador; Commissioner of the City of London Police; Commissioner of the General Board of Control for Scotland, Comptroller and Auditor-General for Northern Ireland; Crown Solicitor in Northern Ireland; Director (appointed by the Board of Trade) of a trading or industrial estate company within the meaning of the Distribution of Industry Act, 1945, Forestry Commissioner, Governor of the B.B.C.; High Commissioner appointed by H.M. Government in the United Kingdom; Local Government officer (certain categories, see below); Member of an Agricultural Marketing Board, Member of a County Agricultural Executive Committee; Member of a National Broadcasting Council; Member of the Ulster Transport Authority; Minister of the Northern Ireland Government, or any other officer in the Executive of Northern Ireland, Public Works Loan Commissioner; Speaker of the Senate or House of Commons of Northern Ireland, Standing Counsel to any Department of H M. Government in the United Kingdom; Standing Counsel to the Speaker of the Senate or House of Commons of Northern Ireland.

The following categories of Local Government officers were disqualified. (*a*) Clerk or deputy clerk of a county council in England and Wales, or of an urban or rural district council in England, Wales, or Northern Ireland, (*b*) County clerk or depute county clerk of a Scottish county, (*c*) Secretary or deputy secretary of a Northern Irish county council, (*d*) Clerk or depute clerk of a Scottish district council; (*e*) Town Clerk or deputy town clerk of the City of London, of a London metropolitan borough, of a borough in England and Wales outside London, or of a borough or county borough in Northern Ireland, (*f*) Town clerk or depute town clerk of a Scottish burgh

Third Schedule. This schedule was aimed at clearing up doubts which had existed for many years about the exact meaning of the words "office of profit under the Crown" It contained the following principal provisions

(1) "A person holding an office or place . . holds it under the Crown if and only if he is appointed thereto by Her Majesty, by any Minister of the Crown, or by any officer or servant of Her Majesty employed for the purposes of a Government department"

(2) "A person holding the office of director, general manager, secretary, or other similar officer of a body corporate holds it under the Crown if and only if—

(*a*) he is appointed to it as mentioned in (1) above, or

(*b*) he is elected to it, or appointed to it . in the following circumstances:

(i) Where any such Minister, officer, or servant as aforesaid has control over the body corporate, either generally or so far as concerns the election or appointment in question; or

(ii) where the nomination or recommendation of any such Minister, officer, or servant is necessary for the election or appointment in question."

(3) "An office or place held by any person is a paid office or place under the Crown if and only if:

(*a*) he has received remuneration in respect of the office or place, being remuneration for a period since the appointment or election by virtue of which he holds it; or

(*b*) he holds the office or place on the terms of an agreement or arrangement (whether legally enforceable or not) under which, if carried out, he will, or will in certain events, receive such remuneration; or

(*c*) there is in force in respect of the office or place—

(i) any enactment,

(ii) any Order in Council, order, scheme, rule, regulation, or other instrument made under or by virtue of any enactment;

(iii) any Order in Council, Letters Patent, Royal Warrant, or other instrument made in the exercise of Her Majesty's Prerogative; or

(iv) in the case of an office or place in or under any body corporate, any provision of the articles of association or other document regulating the constitution of that body,

which authorizes or requires remuneration to be paid to the holder, or to all or any of the holders, of the office or place . ."

[The effect of the above-mentioned provisions meant that the following persons, among others, would be disqualified from membership of the House of Commons: the Governor, Deputy Governor, and Directors of the Bank of England, and the chairmen and members of the British Overseas Airways Corporation, the British European Airways Corporation, the British Transport Commission, the Central Electricity Authority, the Colonial Development Corporation, the Foreign Compensation Commission, the Gas Council, the Herring Industry Board, the Independent Television Authority, the Iron and Steel Board, the Iron and Steel Realization Agency, the Monopolies and Restrictive Practices Commission, the National Broadcasting Council, the National Coal Board, the National Film Finance Corporation, the National Parks Commission, the National Research Development Corporation, the U K Atomic Energy Authority, the War Damage Commission, the War Works Commission, and the White Fish Authority (or its Scottish Committee), as well as members of Development Councils established under the Industrial Organization and Development Act, 1947]

Fourth Schedule. This schedule listed the various Ministerial offices, the holders of which would be entitled to sit and vote in the House of Commons [see (2) above, under provisions of the Bill].

Senior Ministers—Prime Minister, Lord President of the Council, Lord Privy Seal, Chancellor of the Duchy of Lancaster, Paymaster-General, Secretary of State, Chancellor of the Exchequer, First Lord of the Admiralty, Minister of Agriculture, Fisheries, and Food, Minister of Defence, Minister of Education; Minister of Fuel and Power; Minister of Health, Minister of Housing and Local Government; Minister of Labour, Minister of Pensions and National Insurance; Postmaster-General; Minister of Supply, President of the Board of Trade, Minister of Transport and Civil Aviation; Minister of Works, Minister of State

Other Ministers (including Law Officers)—Attorney-General; Lord Advocate, Solicitor-General; Solicitor-General for Scotland; Financial Secretary to the Treasury, Parliamentary Under-Secretary of State; Parliamentary and Financial Secretary to the Admiralty, Civil Lord of the Admiralty, the Parliamentary Secretaries to the Treasury, the Board of Trade, and the Ministries of Agriculture, Defence, Education, Fuel and Power, Health, Housing and Local Government, Labour, Pensions and National Insurance, Supply, Transport and Civil Aviation, and Works, Assistant Postmaster-General, Secretary for Overseas Trade, Junior Lord of the Treasury; Treasurer of H M. Household; Comptroller of H M. Household, Vice-Chamberlain of H M. Household

[The designation "Secretary of State"—under "Senior Ministers"—includes the Home Secretary, the Foreign Secretary, and the Secretaries of State for War, Air, Commonwealth Relations, the Colonies, and Scotland]

Fifth Schedule. This schedule listed (1) offices disqualifying their holders from being returned for particular constituencies, and (2) offices involving no disqualification.

(1) Holders of the following offices would be disqualified for the constituencies mentioned: (*a*) Lord-Lieutenant of London—the Cities of London and Westminster constituency; (*b*) Lord-Lieutenant of a county in Great Britain—the county concerned; (*c*) High Sheriff of a county in England or Wales—any constituency comprising the whole or part of the area for which he is appointed; (*d*) Recorder of a municipal borough having a separate Court of Quarter Sessions—any constituency comprising the whole or part of the city or borough for which he is appointed, (*e*) Chairman or deputy chairman of a Court of Quarter Sessions—any constituency comprising the whole or part of the area for which the Court has jurisdiction

(2) The holders of the following offices, among others, would not be disqualified for election to the House of Commons Astronomer-Royal for Scotland; Historiographer-Royal for Scotland; Lord-Lieutenant and High Sheriff of a county or county borough in Northern Ireland, Church Estates Commissioner; Commissioner for Oaths; Justice of the Peace; Lord High Commissioner to the General Assembly of the Church of Scotland; Lord Warden of the Cinque Ports; Captain of Deal Castle, Master of Trinity College, Cambridge; Member of the Advisory Commission for Scientific and Industrial Research, Member of the Agricultural Research Council; Member of a Fishery Harbour Authority; Member of a Local Fisheries Committee; Member of the Medical Research Council; Principal of King's College, London; the Principals of the Universities of St. Andrews, Glasgow, and Aberdeen; Provost of Eton; Professors in the Universities of Oxford, Cambridge, St. Andrews, Glasgow, Aberdeen, and Edinburgh; Queen's Counsel; and the Regius Keeper of the Royal Botanical Garden, Edinburgh

It was laid down that the Bill, when enacted, would come into effect (*a*) on the dissolution of the present Parliament of the United Kingdom, insofar as it related to the U.K. House of Commons; and (*b*) on the dissolution of the present Parliament of Northern Ireland, insofar as it related to the N.I. Senate and House of Commons.—(Times - Daily Telegraph - Manchester Guardian - House of Commons Disqualification Bill, H.M. Stationery Office) **(Prev. rep. Offices of Profit, Legislation, 5052 A; 4516 H; 4481 A.)**

A. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. — Further Decisions of O.E.E.C. Council. - Increased Liberalization of Invisible Transactions. - Report on Economic Recovery of Western Europe. - M. Sergent appointed Secretary-General of O.E.E.C. - New Director of European Productivity Agency. - Agricultural Co-operation Programme. - Tourist Statistics.

Although the meetings of the O.E.E.C. Council on June 9-10 and July 28-29 were concerned principally with the renewal of the E.P.U. and the provisions of a European Monetary Agree- discussed. These and other O.E.E.C. developments are summarized below.

Italian Economic Development. The working committee set up to study the Italian Economic Development Programme (the "Vanoni Plan") stated in a report to the Council that the Italian Government was right in attempting to solve the country's three main problems—unemployment, lack of balance between the economies of Northern and Southern Italy, and a balance of payments deficit—within the framework of a formal, but by no means rigid, plan, and that its general method of approach towards the solution of these problems was correct. It recognized, however, that "without international co-operation it is likely to be difficult for Italy alone to face the burdens that the Plan will impose," and therefore suggested the following six ways of co-operation by member-countries. (*a*) technical help and advice, (*b*) measures which would help Italy to expand her foreign earnings, (*c*) encouragement of private investment in Italy, (*d*) appropriate financial aid and public long-term capital, (*e*) short-term credits to meet temporary balance-of-payments difficulties, and (*f*) continued efforts to facilitate emigration from Italy.

These recommendations were endorsed on June 10 by the Council, which urged all member-countries to bear them in mind when framing their own policies The working committee was instructed to report from time to time on the progress being made and on the various problems arising from the execution of the Plan

Current Power Problems. In view of the Armand report on fuel and power problems (see 14346 A), the Council decided to set up (*a*) a Commission for Energy with the task of inquiring into the matter of power as it affected Europe as a whole; (*b*) a working party to examine, and report as soon as possible upon, the manner and the extent to which member-countries could co-operate to secure the greatest benefits from the use of nuclear power as a new factor of economic expansion.

On Aug. 24 it was announced that Sir Harold Hartley (U K) would be chairman of the Commission for Energy, and that the other members would be as follows: M. Jacques Desrousseaux (France), Hr. H D Fransen (Sweden); Professor F Giordani (Italy), M H. Niesz (Switzerland), Mr. G A. Tuyl Schuitemaker (Netherlands), and Dr. F. W. Ziervogel (Western Germany). The eighth member would be M Pierre Uri, nominated by the High Authority of the European Coal and Steel Community A U.S. observer would also be present at meetings of the Commission.

Liberalization of Invisible Transactions and Transfers. The O.E.E C. announced on July 27 that:

(1) Restrictions would be still further relaxed on the following transactions.

(*a*) Residents travelling as tourists from one member-country to another would be allowed to take the equivalent of at least $200 per year, instead of $100 as hitherto

(*b*) The amount which nationals of member-countries, or residents of foreign nationality who were emigrating from member-countries, would be allowed to take with them, in addition to tourist allocations, would be raised from $200 to the equivalent of $300 per family.

(*c*) Foreign nationals returning to their country of origin would be allowed to export, in addition to tourist allocations, at least $10,000 per family per year.

(*d*) Residents of member-countries would be free to carry out authorized operations on the terminal markets of other member-countries.

(*e*) Transfers of inheritances would be authorized so long as the deceased and the beneficiary were residents of different member-countries at the time of the deceased's death. If the inheritance exceeded $10,000, it might be transferred in annual instalments of up to that amount.

(*f*) Transfers of dowries would also be authorized to the extent of $10,000 a year

(2) The existing two lists of invisible transactions in the Code of Liberalization—the first covering those transactions which member-countries undertook to free, and the second those which members agreed to be as liberal about as possible—would henceforth be combined, and all items on the combined list freed. Member-countries feeling unable to free a particular item, however, could lodge a reservation; such reservations would be examined periodically by a newly-created Committee for Invisible Transactions, which would determine whether or not the reasons invoked were justified.

(3) The reasons which a member-country might invoke for not conforming with the Code of Liberalization would be still further limited In particular, any member-country suspending liberalization of invisible transactions because of balance-of-payments difficulties would be required to free such transactions again to a reasonable extent within 12 months, with a view to being in a position to fulfil all its obligations under the Code within 18 months.

Sixth Annual Report. This report, entitled *From Recovery towards Economic Strength* and published on April 7, outlined the substantial economic progress which had been achieved by Western Europe, and announced that member-countries had "completed—indeed exceeded—the economic recovery which, when the Marshall Plan began, was no more than a hope, and .. a doubtful hope at that." *Inter alia*, it was stated that between 1938 and 1945 Western Europe had increased the volume of its exports to the rest of the world by 70 per cent and of those to the dollar area by 114 per cent, whilst imports had risen by only 12 per cent. Between mid-1951 and mid-1952, the gold and dollar reserves fell by $1,500,000,000, but between mid-1952 and the end of 1954 they rose by $4,600,000,000. Even so, the dependence on "extraordinary dollar receipts" (i.e. aid and military receipts), rather than on ordinary commercial earnings and U.S. foreign investment, presented a problem for the future, particularly in view of the fact that most European countries still restricted dollar imports Intra-European trade had increased by 70 per cent between 1938 and 1954—far more than was expected—but the report emphasized that there was still room for co-operation, particularly as regards productivity, the development of the more backward economies, and trade and payments policies.

The report contained the following table showing the progress of Western Europe recovery:

National Product and Expenditure of Member-Countries Combined
($'000,000,000 at 1951 exchange rates)

	1938	1948	1950	1951	1952	1953
Defence expenditure	—	6.5	7.6	8.8	11.2	11.3
Civil public expenditure	—	13.1	13.9	14.4	15.3	15.8
Public consumption	20.0	19.6	21 5	23.2	26 5	27.0
Private consumption	96 6	96 0	105 7	108 3	111.0	115.8
Total consumption	116 6	115 6	127.1	131.5	137.5	142.9
Gross domestic capital formation	21.7	20 1	25 4	26 4	26 4	28 8
Increase in stocks		2 0	1 6	5.0	1.4	1.3
Total national expenditure ..	138 4	137.7	154 1	162 9	165.3	173 0
Export of goods	9 2	8 5	12.0	14 1	13.5	14.3
Less. Imports of goods minus net invisible surplus	13.0	14 1	13.5	15 1	14 5	15.4
Gross national product at market prices .	134.6	132.2	152.6	161 9	164.2	172.0
Population of member-countries combined (millions)	*247.7*	*267.7*	*273.3*	*275 5*	*277 6*	*279.7*

Reports on European Industries. During recent months a number of reports were published by the O.E.E C. reviewing developments in specific industries, and making recommendations to the O.E E.C. Council for concerted Government action. The industries covered included cement, chemicals, coal, electricity, maritime transport, non-ferrous metals, pulp and paper, textiles, and timber. In all cases the committees concerned emphasized the need for a higher degree of co-ordination at European level.

European Productivity Agency. It was announced on April 26 that the Agency had set up an *ad hoc* group to investigate the means by which prosperity could be brought to those areas of Europe where development had hitherto been prevented by economic or physical disadvantages. For this purpose, the group was asked to study the development of schemes in Southern Italy, Southern France, and the Tennessee Valley in the United States

Other activities of the E P.A in recent months included an inquiry into "automation" techniques in Western Europe; organized seminars on improving marketing methods in the European fruit trade; and the first European congress on productivity in the textile industry, which was held at Ostend. In addition, on behalf of the E P A, the German Federal Ministry of Food, Agriculture, and Forestry arranged a European seminar to discuss measures to improve Europe's farming efficiency by overcoming the difficulties created by scattered land holdings.

It had been announced on Feb. 18 that M. Roger Grégoire, the deputy director of the E P A., would on April 1 succeed the existing director, Herr Karl Harten, who was resigning in order to return to industrial work in Germany. Mr. Edwin Fletcher, who had been in charge of the British T.U.C. Production Department since its formation in 1950, was appointed E.P.A. deputy director in July.

Food and Agriculture. The O.E E C. Ministerial Committee for Agriculture and Food met on July 4-5 under the chairmanship of M. Réne Lefèvre, the Belgian Minister of Agriculture, and approved the "programme of work" which had been drawn up by its committee of deputies. This recommended that action should be concentrated in four main directions: (*a*) the "confrontation and co-ordination of agricultural policies," in which connexion it was hoped that the committee of deputies would be able both to take stock of present government policies and to indicate where these could be co-ordinated, and to make arrangements for information on government policies to be permanently submitted and analysed; (*b*) the continuing study of consumption trends and methods by which demand could be raised; (*c*) the expansion of trade in agricultural produce by reducing quantitative restrictions, tariffs, etc.; (*d*) the encouragement of every means by which productivity in both farming and agricultural marketing could be improved.

Tourism. A report published by the O.E.E.C. in March showed that there were more than 23,000,000 tourists in Europe during 1953—10 per cent more than in 1952. Between 1949 and 1953 American visitors to Europe increased by just over 100,000. Although the 376,000 visitors from the U.S.A. formed only a small minority of the total number of tourists in Europe in 1953, they spent about $475,000,000—an amount roughly equal to 19 per cent of the total visible export trade of Europe with the U.S.A. Tourism thus became by far the largest single dollar-earner for Europe as a whole. The report gave the following details of tourist expenditure and receipts in 1953 (the last full year for which such statistics were available):

	Payments $m.	Receipts $m.	Surplus (+) or deficit (−) $m.
Austria	7 9	60.8	+ 52.9
Belgium and Luxemburg	57 4	35.3	− 22.1
Denmark	45 0	42.0	− 3.0
France	128 0	122.5	− 5.5
German Federal Republic	118 1	121.4	+ 3.3
Greece	6.6	26.3	+ 19.7
Irish Republic	27 7	83.7	+ 56 0
Italy	16.6	147.3	+130 7
Netherlands	42 0	41.0	− 1.0
Norway	30.5	23.5	− 7 0
Sweden	40 2	32.0	− 8.2
Switzerland	75 0	182.0	+107 0
United Kingdom	240.0	246.0	+ 6.0
United States	895.0	527.0	−368 0
Canada	365.0	302.0	− 63.0

Chairman of O.E.E.C. Council. It was announced on July 15 that the United Kingdom had been re-elected to the chairmanship of the O.E.E.C. Council. The British Chancellor of the Exchequer, Mr. R. A. Butler, would therefore continue to be chairman at ministerial level and Sir Hugh Ellis-Rees at deputy level.

Steering Board for Trade. The membership of the Steering Board for Trade for 1955-56 was announced on July 22 as follows. Baron Snoy (Belgium), chairman; M. Bernard Clappier (France) and Mr Russel Bretherton (Britain), vice-chairmen, and Dr Johann Augenthaler (Austria), Hr. Leif Belfrage (Sweden), Signor Giuseppe Dall'Oglio (Italy), and Herr Hilger von Scherpenberg (Western Germany).

M. René Sergent, joint Secretary-General of the NATO responsible for economic and financial questions, was appointed Secretary-General of the O.E.E.C. on April 1 in succession to M. Robert Marjolin.—(O.E.E.C. Information Division, Paris - Board of Trade Journal - Times - Financial Times - New York Times - Le Monde, Paris) **(Prev. rep. 14374 A; Armand Report, 14346 A; Agricultural Co-operation, 14108 A; U.S. Tourists, 13015 C.)**

A. UNITED KINGDOM. — Foreign Trade. - Figures for June and First Half of 1955.

Imports into the United Kingdom in June totalled £294,000,000, exports £157,000,000, and re-exports £8,100,000, the adverse visible balance thus amounting to £128,900,000. Total imports in the first six months of 1955 amounted to £1,909,500,000 and exports and re-exports to £1,449,500,000, the adverse balance thus totalling £460,000,000.

The terms of trade, which had moved against Britain in the latter half of 1954, turned in her favour during the first six months of 1955, as a result of a fall in the price of imports and a rise in the price of exports. The index of import prices (1954 = 100), which had stood at 103 in December 1954, rose to 104 in January and 105 in February, but thereafter fell to 104 in March and 103 in April, May and June. The index of export prices, which had remained at 100 during the last four months of 1954, rose to 101 in February, March, April and May, and to 102 in June.

It was pointed out in the *Board of Trade Journal* that the dock strike of October, 1954 (see 13970 A) had caused a severe distortion in the monthly trade figures which had persisted in the first quarter of 1955, and that the further dock strike in May-July 1955 (see 14351 A), and other strikes affecting the movement of goods in the same period (see 14280 A), had considerably affected the June figures. Analysis of the trends in U.K. trade by comparison with preceding months and the previous year had thus been rendered virtually impossible. (Board of Trade Journal) **(Prev. rep. 14281 B.)**

B. INDIA. — Attempted Assault on Mr. Nehru. - Six-year Sentence on Assailant.

The trial opened at Nagpur on July 20 of Babu Rao, a cycle-rickshaw driver, on a charge of attempting to assassinate Mr. Nehru last March. The defendant, who pleaded "not guilty," said that he had only gone to meet Mr. Nehru and had no intention of killing him, though admitting that he had held a knife in his hand as he approached Mr. Nehru's car. The trial, during which Mr. Nehru himself gave evidence, ended on July 28, when Babu Rao was found guilty of the charge and sentenced to six years' rigorous imprisonment.—(The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. 14114 B.)**

C. SOVIET UNION. — Reduction in Armed Forces.

The Soviet Government's decision to reduce its armed forces by 640,000 men was announced in the following statement issued in Moscow on Aug. 13:

"Recent circumstances, and in particular the results of the Geneva Conference of the Heads of Government, show that a certain lessening of tension has been brought about in international relations. With the aim of achieving a continued easing of international tension and the establishment of confidence among States, the Soviet Government has decided to reduce the strength of the armed forces of the Soviet Union by 640,000 men by Dec 15, 1955. Members of the armed forces discharged from the Army and Navy will be found work in industrial establishments and on collective and State farms at their places of residence."

The following comment was made in Washington by the U.S. Secretary of State, Mr. Dulles:

"We welcome the Soviet decision to reduce its armed forces by 640,000 men. If carried out, this action will be in keeping with the general atmosphere of the Geneva Conference. The reduction appears to reflect Soviet recognition of the peaceful purposes of the U.S.A. and its allies and of the fact that, as President Eisenhower said at Geneva, the U.S.A. will never be a party to aggression. What other factors may lie behind the announced Soviet action we do not know.

So far as we are aware, this would be the first significant reduction in Soviet armed manpower in the past eight years. Its military significance is not easy to judge. No official information has ever been provided as to the size of the Soviet armed forces and reserves. . . . Even after this reduction, however, the Soviet forces will certainly still be much larger than those of the United States. Moreover, the number of men under arms is only one element of military strength. The Soviet Union also maintains very large organized reserves of men and equipment, capable of being mobilized rapidly. And the capacity to utilize modern weapons greatly affects the value of mere numbers in the armed forces. Thus, the U.S.A. has been able to cut its armed forces from 3,500,000 to 2,900,000 over the past two years.

These factors indicate why full information regarding armed forces and effective inspection to verify the facts are necessary for any meaningful and intelligent approach to the problem of international control and reduction of armaments. The U.S.A. has long sought to build this foundation. President Eisenhower's proposal at Geneva for the exchange of information and for aerial inspection is the latest U.S. initiative in this field. . . ."

The Soviet Government's decision was welcomed in London. A Foreign Office spokesman, however, noted that its significance was difficult to assess as the U.S.S.R. had never revealed its armed strength.—(Soviet Weekly - New York Herald Tribune - Times) **(Prev. rep. Geneva Conference, 14325 A.)**

Note. The Military Correspondent of *The Times* commented: "Since 1947 the Russian ground forces have remained numerically fairly constant at about 175 divisions, and the Soviet air forces at about 20,000 aircraft. The usual guess of the total strength of the Soviet fighting force is 4,750,000 men. To these figures must be added the strengths of the East German and East European 'satellite' forces. Since 1947 the number of 'satellite' divisions has almost doubled, until today there are about 80. The total strength of the 'satellites' is thought to be about 1,250,000 men. The NATO has at its disposal about 48 active divisions, varying in size from about 18,000 men in the British and American divisions to about 12,500 in the Greek and Turkish divisions. A re-armed Western Germany would provide another 12 divisions and a total of 500,000 men. Another difficulty in assessing the worth of the Russian disarmament is that when the 640,000 men are demobilized and become civilians they will still be trained soldiers. The Russian mobilization system is practised periodically to ensure its effectiveness, and it is estimated that within 30 days of the outbreak of war the Soviet and satellite ground forces could number 400 divisions. . . ."—(Times)

D. CZECHOSLOVAKIA. — Armed Forces reduced.

Prague Radio announced on Aug. 24 that the Czechoslovak armed forces would be reduced by 34,000 men by the end of the present year. The announcement, like that issued a few days earlier by the Soviet Government (see above), stated that the reduction was being made because there had been "a certain lessening of international tension" as a result of the Geneva conference of Heads of Government. The Czechoslovak Army is unofficially estimated at about 200,000 men, no official figures being available.—(Times - Le Monde, Paris) **(Prev. rep. 14384 C.)**

E. TURKEY. — Cabinet Changes.

It was announced in Ankara early in August (*a*) that M. Fatin Rustu Zorlu, Minister of State and Deputy Prime Minister since the formation of the second Menderes Cabinet in 1954, had been appointed acting Foreign Minister, retaining the post of Minister of State; and (*b*) that Professor Köprülü, Foreign Minister until April 1955, had been appointed Deputy Prime Minister, retaining the position of Minister of State which he had held since April.—(Turkish Embassy, London) **(Prev. rep. Cabinet, 14150 B.)**

A. KOREA.—South Korean Demands for Withdrawal of Neutral Nations' Supervisory Commission. - Attacks on N.N.S.C. Compounds. - U.S. Support for Swedish and Swiss Proposals for Abolition of N.N.S.C. - Allegations of Collusion between Communist Members of Commission and North Koreans. - U.N. Allegations of Expansion of North Korean Air Force. - Air Incidents. - Withdrawal of Chinese Divisions. - South Korea rejects North Korean Proposal for Conference on Unification.

The South Korean Government announced on Aug. 2 (*a*) that it would " demand " the withdrawal of the Neutral Nations' Supervisory Commission (N.N.S.C.) from Korea ; and (*b*) that it would also demand " within a certain specified time " the withdrawal of Communist forces from those areas south of the 38th Parallel which had been left under Communist control by the armistice terms. The latter demand referred to the strip of territory at the western end of the truce demarcation line lying south of the 38th Parallel—see map, page 13078.

As regards the first demand, the South Korean Government alleged that the Communists were building up their military strength in North Korea in violation of the armistice agreement, and that the Polish and Czechoslovak members of the N.N.S.C were engaging in " espionage activities " and had prevented the Commission from carrying out its duties under the truce terms.

With regard to the second demand, it was alleged that the Communists had prevented the dredging of the Han River which was urgently necessary to prevent flooding of the international airport at Seoul Moreover, it was stated that the defence of South Korea made it essential that the Communists should withdraw from the area under their control at the western end of the armistice line. After recalling that the South Korean Government had agreed " not to obstruct the armistice for a period of three months, during which negotiations were to have been completed [for a Korean peace treaty]," the statement added : " We are no longer under any such obligation. Two years have already elapsed, not three months . . . The Communists have blocked our main waterway and no longer have any right to occupy our land under the pretext of the ridiculous armistice terms."

On Aug. 7 the South Korean Government announced that an " ultimatum " had been sent to the headquarters of the N.N.S.C. at Panmunjom calling upon the Commission to leave Korea by Aug. 13, and reiterating the allegation that the Communist (i.e. Polish and Czechoslovak) members of the N.N.S.C. had been engaged in espionage activities. During the following week large-scale demonstrations against the N.N.S C. inspection teams occurred in Seoul, Pusan, and other centres, coupled with attempted attacks on the Communist members of the teams. Attempts to storm billets occupied by inspection teams were repulsed by American troops and military police, who used tear-gas and fire-hoses against the demonstrators and who frequently had to fire over the heads of the crowds. On Aug. 13, however, a few hours before the " deadline " set by the South Korean Government for the withdrawal of the N.N.S.C., President Syngman Rhee announced in a broadcast that the demand would be " postponed " and that the Commission would be given " time to leave Korea peacefully and voluntarily." He subsequently declared that persons attempting to attack members of the N.N.S.C. inspection teams would be regarded as " creators of violence " and would be arrested and punished. President Rhee had had a meeting with General Lemnitzer (the U.S. and U.N. C.-in-C. in the Far East) before issuing his statement of Aug. 13.

The most serious incidents occurred on Wolmi Island, in Inchon harbour, where the causeway leading to the mainland was blocked by thousands of demonstrators The demonstrators made a number of attempts to storm the compound housing the local N N S C inspection team, with the aim of attacking the Polish and Czechoslovak members. All these attempts were repelled by strong forces of U.S. troops and military police, who drove off repeated attacks with tear-gas and fire-hoses and who opened fire over the heads of the mob from time to time. Seven U.S. soldiers and military policemen were injured by stones and rocks hurled by the crowds, whilst one Korean was shot dead and a number were injured.

Other demonstrations against the N.N.S.C teams occurred in Seoul, where American troops drove off thousands of demonstrators (six of whom were wounded) with tear-gas, hoses, and rifle-butts , in Pusan, where two U S. soldiers were wounded ; and at Taegu, Kunsan, Hangnung, and other places

At a meeting of the Military Armistice Commission at Panmunjom, the senior U.N. delegate (Major-General Parks) assured the Communists on Aug 12 that the N.N.S.C. would be given full protection and that the U N. Command, " to the limit of its ability," would ensure that the armistice terms were observed. In reply to the senior Communist delegate, who described the attacks on the N.N.S.C. as a " grave violation of the armistice agreement," General Parks accused the Polish and Czechoslovak members of the Commission of " failing to deport themselves in accordance with the standards of conduct expected of accredited diplomatic personnel," and of conniving at armistice violations.

The Foreign Ministry of the Chinese People's Republic issued a statement on Aug. 11 (broadcast by Peking Radio) declaring that " the action which the Syngman Rhee clique threatens to take [against the N.N.S.C.] is a plot by certain international forces to upset the present situation." The statement continued :

" Acts aimed at sabotaging the Korean armistice agreements or threatening the N N.S.C. are impermissible. The United States, which signed the armistice agreement on behalf of the U.N. Command, bears the unshakable responsibility . . . of taking immediate and effective measures to stop the threatened action of the Syngman Rhee clique, and to give proper protection to all the staff of the N.N S.C. stationed in South Korea The Governments of all other countries concerned on the side of the U N. Command also have the responsibility to see that the U N. Command carries out the international obligations which it has undertaken.

" Although no agreement was reached at the 1954 Geneva conference on Korea, China has unremittingly continued its endeavours for the consolidation of the Korean armistice and for the peaceful unification of Korea. We have always maintained that all foreign troops should be withdrawn from Korea . . Contrary to the slanders of certain people, the Chinese People's Volunteers are ready to withdraw from Korea at any time, together with all other foreign troops. . . . We hold that the Korean armistice must be consolidated, and that nobody should be allowed to wreck it. The N.N.S.C. must be respected by both sides to the armistice, and no-one should be allowed to direct threats against it. . "

For some months previously the Polish and Czechoslovak members of the N.N.S.C. had been repeatedly accused, both by the U.N. Command and by the South Korean Government, of obstructing on-the-spot checks of reported armistice violations in North Korea, particularly with regard to the build-up of North Korean air forces (see below) On Jan. 27, 1955, the Swedish and Swiss Governments had sent *aide-mémoires* to the United States and China proposing that the Commission should be abolished, or, alternatively, that its staff should be curtailed by agreement among the nations which signed the Korean armistice. Both the Swedish and Swiss representatives on the N.N.S.C. had complained that it was virtually impossible to supervise the armistice effectively, and had drawn attention to the fact that the Commission had been trying to carry out its duties for 20 months—a much longer period than had been envisaged under the armistice agreement.

Under the Korean armistice agreement, the N.N S.C , consisting of equal numbers of Swedish, Swiss, Polish, and Czechoslovak personnel, was given the task of ensuring that the armistice provisions were observed in both parts of Korea—i e , that there was no military build-up, no reinforcement of troops or *matériel* beyond the limits specified in the armistice agreement, etc. In addition to a headquarters staff at Panmunjom, the Commission maintains five inspection teams at North Korean ports and five at South Korean ports, in addition to a number of mobile inspection teams.

The Chinese reply to the Swedish-Swiss representations said that the Commission had been useful but that " certain bellicose elements " were trying to destroy it. It opposed the disbanding of the Commission, but agreed that certain of its functions might be curtailed. The U.S. reply, published on March 3 after consultation with the 16 nations represented on the U.N. Command, upheld the Swedish-Swiss proposal that the Commission should be abolished. The text of the U.S. reply to the Swedish Government (that to the Swiss Government was in identical terms) was as follows :

" The U.S Government appreciates the difficulties which Sweden is encountering in carrying out a task which the Swedish Government had undertaken on the condition that the Commission would last for only a limited time. Furthermore, it is aware that obstructionist activities on the part of the Communist side have made it impossible for the N.N.S.C. to fulfil its responsibilities under the armistice agreement. The U.S Government therefore agrees that the N.N.S.C. should be abolished. It is understood, however, that the Chinese reply to the Swedish *aide-mémoire* rejects the liquidation of the N.N.S.C., which is the solution preferred by Sweden, but accepts the less preferred alternative of a reduction in the Commission's personnel.

" Despite the current activities undertaken by the N.N.S C. at the request of either the U N. Command side or the Communist side, it is the view of the U.S. Government, primarily because of the consistent history of Communist obstruction, that it is doubtful that any useful purpose would be served by a continuation of the Commission."

Other developments in Korea during recent months are summarized below under cross-headings :

Air Incidents. It was announced on Feb 6 in Washington that two MIG-15 fighters had been shot down by U.S. *Sabre* jets on the previous day over the Yellow Sea. The announcement stated that eight MIG-15s had attacked an unspecified number of *Sabres* which were escorting a U.S bomber carrying out a reconnaissance mission over " international waters west of Korea " ; that two of the MIGs had been shot down , that the remainder had broken off the engagement and flown back towards " Communist territory " (whether Chinese or North Korean was not stated) ; and that the U S. planes had returned to their base at Osan (South Korea) without loss. The nationality of the MIGs was not given.

On May 10 it was announced that U.S. *Sabres* had shot down two MIG-15s, and probably destroyed a third, after being attacked by 12-16 Communist fighters over international waters off North Korea. It was stated that the *Sabres* (all of which returned safely to base) were on patrol off the coast when the attack occurred The New China News Agency alleged that the U S. planes had flown over two Chinese islands south-west of Antung (Manchuria), claimed that one of them had been shot down; and protested against "a grave military provocation" by the U.S. Air Force.

The U.N. Command made a strong protest on Aug 18 at the shooting-down of an unarmed U.S training plane over North Korea It was stated that the plane, carrying an American pilot and an observer, was flying near the U.N. side of the demilitarized zone between North and South Korea when it was fired upon by North Korean anti-aircraft guns and crashed in North Korean territory. At a meeting of the Military Armistice Commission, Major-General Parks stressed that the training plane was unarmed and defenceless, accused the Communists of violating the spirit of the armistice agreement, and protested against the "wanton murders and acts of inhumanity" committed by the Communist side After pointing out that the demarcation line was difficult to identify from the air, and that Communist aircraft had intruded over the line on 53 occasions without being fired upon from the U.N. side, General Parks declared "In the past ten months alone there have been nine officially-recorded instances in which U.N Command aircraft have been fired upon by your [i.e. the Communist] trigger-happy gunners . . ."

The North Korean authorities subsequently agreed to return to the U.N. Command the pilot of the training plane (who had been wounded and was in hospital with head injuries) and the body of the observer (who had been killed in the crash) They also agreed to return the wreckage of the aircraft.

Build-up of North Korean Air Force.—Allegations by U.N. Command. A 17-page statement alleging that North Korea had illegally built up her air forces since the armistice on June 27, 1953, was handed to General Lee Sang Cho (the senior Communist member of the Military Armistice Commission) by Major-General Parks at Panmunjom on July 15. The statement said *inter alia* (1) that at the time of the armistice the U.N. Command had evidence that North Korea did not possess a single jet aircraft, nor any airfields capable of taking such machines; (2) that, within a few months of the signing of the armistice agreement, "our radar surveillance detected continuously increasing jet aircraft" in North Korea; (3) that the U N Command now had "irrefutable proof of the illegal build-up of combat forces" by the North Koreans; (4) that collusion between the Communists and the Polish and Czechoslovak members of the N N.S C had successfully thwarted "any realistic investigation" of North Korean military activities since the armistice, (5) that two North Korean pilots who had recently defected to the U.N Command with their machines (of the Soviet *Yak* type) had revealed that the North Korean Air Force now possessed 580 combat planes, including 300 MIG-15 jets, and that many airfields had been built or were under construction. Lodging "the strongest and most serious protest since the signing of the armistice," General Parks charged that the Communists, by their "wilful, deliberate, and illegal build-up of combat forces," had "flagrantly violated every basic provision of the armistice agreement" with the intention of "acquiring a favourable military position over the forces of the United Nations Command."

General Lee Sang Cho, in reply, denied the allegations *in toto*, and alleged that the two North Korean airmen mentioned by General Parks were in reality specially-trained South Korean agents.

Withdrawal of Six Chinese Divisions. Peking Radio announced on March 25 that six more Chinese divisions were being withdrawn from North Korea, bringing to 13 the number of Chinese divisions withdrawn since the armistice It was simultaneously announced that General Yang Teh-chin, Commander of the "Chinese People's Volunteers," had returned to China and had been succeeded by his deputy, General Yang Yung.

Withdrawal of Belgian and Filipino Forces. The last Belgian unit in Korea (a 216-man company) sailed from Pusan for Belgium on June 15. The last Filipino forces under the U N. Command had left Korea in May.

Repatriation of U.N. Soldiers from China. The Chinese Red Cross announced on June 18 that five of the 22 U N. soldiers who had refused repatriation after the Korean armistice (three Americans and two Belgians) had received permission to leave China at their own request The three Americans crossed the Hong Kong border on July 10 and were handed over to the U.S. authorities, who warned them that they would be liable to prosecution on their return to America under U S. military law [The three men concerned, together with other American soldiers who refused repatriation, had previously been discharged from the U.S Army with ignominy as deserters.] All three men made statements declaring that their experiences in China had completely disabused them of their former sympathy with Communism, that they were willing to face punishment on their return to the U.S.A.; and that China, as a country, was "ruled by fear" and characterized by "intimidation, terror, and the police State system." They also said that the Chinese people hated both the Communist regime and the former regime of Chiang Kai-shek, which they regarded as "rotten"; of the two, however, they would prefer to live under the Chiang regime.

The men stated that they had worked on a State farm and in a factory for making agricultural implements, after having been subjected to an intensive course of indoctrination. They disclosed that a number of the U.N. soldiers who had refused repatriation were studying at "people's universities" (including the one British non-repatriate, Marine Condron), whilst others were working on farms and in factories.

The Prime Minister of North Korea, Kim Il Sung, proposed on Aug. 15 that a meeting should be held between the North and South Korean Governments, together with a parallel conference between "countries interested in the Korean question," with the aim of bringing about the peaceful unification of Korea. The South Korean Government, however, declared on the following day that it would only negotiate with the North Koreans after the withdrawal of all Chinese forces and the demobilization of the North Korean forces. When these two conditions had been fulfilled, "the people of North Korea can join with the people of South Korea in speaking freely, and we shall have peace and unification immediately without the loss of a single life."—(New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Neue Zurcher Zeitung) **(Prev. rep. Korea, 13968 D; 13874 A; President Rhee, 13829 A.)**

A. UNITED KINGDOM. — Foreign Service.

The following appointments in the Foreign Service were announced in recent months (date of announcement in parentheses):

Mr George Peter Labouchère, H M. Minister in Budapest, as Ambassador to Belgium *vice* Sir Christopher Warner, retiring (July 30). It was announced that the K.C M G. had been conferred on Mr. Labouchère

Mr. (now Sir) Humphrey Trevelyan, H M Chargé d'Affaires in Peking, as Ambassador to Egypt *vice* Sir Ralph Stevenson, retiring (May 18) A knighthood was conferred on Mr. Trevelyan in the Birthday Honours (see 14252 A)

Mr. C. D W O'Neill, head of the News Department of the Foreign Office, as Chargé d'Affaires in Peking *vice* Mr. Trevelyan (May 18) Sir George Young succeeded Mr O'Neill as head of the Foreign Office News Department

Sir Alexander Clutterbuck, U K. High Commissioner in New Delhi, as Ambassador to the Republic of Ireland *vice* Sir Walter Hankinson, retiring (April 7).

Mr. John Walker, an inspector of Foreign Service establishments, as Ambassador to Venezuela *vice* Sir Robert Urquhart, retiring from the Foreign Service to become chairman of the Crofters' Commission (Aug 19)

Mr. George Clinton Pelham, Ambassador in Jedda, as Ambassador to Czechoslovakia *vice* Sir Derwent Kermode, retiring (Feb 24).

Mr. Harold Beeley, Counsellor at H M Embassy in Washington, as Ambassador to Saudi Arabia *vice* Mr Clinton Pelham (Feb. 24)

Mr George Lisle Clutton, of the Foreign Office, as Ambassador to the Philippine Republic *vice* Sir Frank Gibbs, retiring (March 17)

Mr Thomas Ravensdale, Counsellor at H M. Embassy in Libya, as Ambassador to the Dominican Republic *vice* Mr. Gybbon-Monypenny, retiring (March 17).

Mr T. H. Gamble, lately Commercial Counsellor at H.M. Embassy in Athens, as Ambassador to Ecuador *vice* Mr. Norman Mayers, retiring (April 21).

Mr. M S. Henderson, H M. Consul-General at Hanover, as Minister to Luxemburg *vice* Sir Geoffrey Allchin, retiring (July 9).

Mr. Richard Tollinton, H M. Consul-General at Leopoldville, as Ambassador to Nepal *vice* Sir Christopher Summerhayes (Jan. 14).

Mr. James Murray as Ambassador to Honduras *vice* Mr. Coghill, retiring (July 30).

Mr. S. Simmonds, Commercial Counsellor at Baghdad, as Ambassador to Haiti *vice* Mr Mill Irvine, retiring (Dec. 22. 1954).

It was announced on Aug. 9 that the British and Laotian Governments had agreed to raise their respective Legations in Vientiane and London to Embassy status. The British Ambassador to Laos is Lord Talbot de Malahide (hitherto Minister), whilst the Laotian Ambassador in London is Prince Tiao Khampane, who has not yet taken up his appointment. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Foreign Service, 13940 A.)**

B. WESTERN GERMANY. — Gehlen Intelligence Service transferred from U.S. to German Control.

It was officially disclosed in Bonn on Aug. 8 that the espionage service headed by the former Lieut.-General Reinhard Gehlen had been transferred from American to German control and had been placed under the direct control of Dr. Adenauer, the Federal Chancellor. The "Gehlen organization," which is said to employ 3,000-4,000 agents and which has been financed out of U.S. funds during the past eight years, specializes in collecting intelligence material on the Soviet Union and the Soviet-bloc countries. During the Second World War General Gehlen was in charge of the counter-intelligence section of the *Wehrmacht* on the Eastern front from 1942 to 1945. (New York Times - Le Monde, Paris)

A. UNITED STATES. — Defence Policy. - Military Reserves Bill. - Reduction in Strength of Armed Forces. - Four-year Extension of Selective Service Act. - Service Pay Increases. - Defence Appropriations, 1955-56. - Defence Production Act extended.

President Eisenhower, in a message to Congress on Jan. 13, 1955, outlined the Administration's proposals for strengthening the U.S. reserve forces, and also requested a four-year extension of the Selective Service system and a two-year extension of the provisions authorizing the registration and call-up of doctors and dentists. In a separate message on the same day the President proposed increases in servicemen's pay so as to stop the drift of skilled personnel from the armed forces to civilian employment. The President's proposals were subsequently embodied in four Bills sent to Congress by the Defence Department.

The enactment of these Bills by Congress, and other matters relating to U.S. defence policy, are described below.

The Reserves Bill.

The Administration's proposals were approved, largely unaltered, by the House Armed Services Committee on April 27, but after two days' debate in the full House further consideration of the Bill was indefinitely postponed on May 19.

This postponement arose out of an amendment moved by Representative Adam C Powell (Democrat, a Negro member of the House) proposing that reservists should not be assigned to National Guard or other units which practised racial segregation. As the tentative adoption of this amendment (by 126 votes to 87) weakened the support for the Bill and threatened to involve the rejection of the entire measure, Representative Carl Vinson (chairman of the House Armed Services Committee) proposed a compromise amendment which would have eliminated the clause to which Mr. Powell objected, but would also have eliminated Mr. Powell's amendment. When this proposal was rejected by the House (by 167 votes to 143), Mr Vinson, in order to prevent the Bill being defeated altogether, moved that the House cease further immediate consideration of the measure. By 161 votes to 124 the House agreed to let the Bill "go back to the Speaker's table" until called for further consideration.

Following a number of requests from President Eisenhower for reconsideration of the measure, the House Armed Services Committee approved a Bill on June 28 (by 28 votes to one) which differed from that originally passed by the committee only in the exclusion of the provision relating to National Guard units. In this form the Bill was passed by the full House by a voice vote on July 1. An alternative Reserves Bill, also a modified version of the Administration's proposals, was approved by the Senate Armed Services Committee on July 13 and by the full Senate on July 14. A compromise version, agreed to by a Senate-House conference committee on July 21, was given final approval by the House on July 25 and by the Senate on July 26.

The principal provisions of the Bill laying down the periods and types of Reserve service obligation for both volunteer and called-up servicemen were as follows:

Reserve Duty as Alternative to Call-up. Youths between the ages of 17 and 18½ might in future choose the following Reserve obligations as an alternative to being called up for two years' active service under the Selective Service Act:

(*a*) Up to 250,000 youths a year might volunteer for three to six months' active service, followed by 7½ or 7¾ years in the Ready Reserve. They could sign up at any time and could be deferred from the start of active service until they had graduated from high school, had left school, or had attained the age of 20. Pay during active service would be $50 a month This programme would end on Aug. 1, 1959

(*b*) They could enlist directly in Reserve units and take the Ready Reserve training continuously until they reached the age of 28, after which they would no longer be liable to call-up.

Ready Reserve training would generally entail at least 48 drill parades a year, plus not more than 17 days annually in camp under field training, or, alternatively, 30 days of active field training a year. Those defaulting from their training obligation would be ordered into active service for 45 days.

Men at Present on Active Service. Those now on active service, or who had already completed their active service, would be exempted from further active Reserve training (i.e. in the Ready Reserve). They would, however, be subject to a stand-by, or inactive, obligation for a total of eight years' service (including their active service) under which they would only be recalled in the event of war. As an alternative, those men now on active service and released after enactment of the new programme could volunteer for one year of Ready Reserve training, and by so doing fulfil their whole obligation. This alternative (which was designed to help build a trained "hard core" in the Reserves) would be limited to 200,000 volunteers a year and would end on July 1, 1957.

Limited Active Service. For the next two years (until July 1, 1957) men enlisting or called up for two or more years could apply, after 12 months of active service, for their transfer to the part-time training of the Ready Reserve for three years. This programme, which would be limited to 150,000 men a year, would enable them to discharge their service obligation in four instead of six years.

Two-year or longer Active Service. Men performing active service followed by a period in the Reserves would serve for a total of six years (instead of eight as hitherto), the length of time in the Ready or Stand-by Reserves depending upon the period of active service. The alternatives open to them would be as follows:

(*a*) Two years of active service, followed by three years in the Ready Reserve and one in the Stand-by Reserve; or

(*b*) Three years of active service, two years in the Ready Reserve, and one year in the Stand-by Reserve; or

(*c*) Four years of active service, one year in the Ready Reserve, and one year in the Stand-by Reserve; or

(*d*) Five or more years of active service and one year in the Stand-by Reserve.

Other Provisions. (1) There would be no restriction on servicemen volunteering for long-period or career-Reserve training.

(2) The States would be permitted to raise and maintain in peacetime organized militia forces to take over the National Guard's domestic duties upon the latter's withdrawal, and to support civil defence activities.

(3) The National Security Training Commission should, within 60 days, draw up a programme to safeguard the health, welfare, and morals of the youths aged 17 to 18½ volunteering for the six months of active service.

The Bill was signed by President Eisenhower on Aug. 9. In signing it, however, the President pointed out that whilst it contained provisions which would "definitely strengthen the Reserve structure," it nevertheless fell short of the programme which he had sent to Congress. He was therefore instructing the Secretary of Defence to prepare for the next session of Congress the amendments necessary to correct "the deficiencies in this legislation."

In particular, the President criticized:

(1) "the failure of the Bill to afford the same guarantees of prior training for the National Guard as it has done for the Reserves";

(2) the failure "to grant authority to induct into the Reserve if sufficient numbers to meet military requirements are not obtained voluntarily",

(3) the reduction of the total period of obligation for military service for men doing at least two years' active service from eight years to six years.

The clause relating to the National Guard was that struck out as a result of Mr Powell's proposed amendment.

Reduction in Armed Forces.

In connexion with the Administration's plans for military training and the creation of large Reserve forces, an acceleration in the planned reduction in the size of the armed forces was announced on Dec. 20, 1954, by the Secretary of Defence, Mr. Wilson. The strength of the armed forces, Mr. Wilson said, would be reduced from the existing 3,218,000 men to 2,940,000 by June 30, 1955, and to 2,815,000 by June 30, 1956. (Previous plans had called for a reduction to 3,047,000 by June 30, 1955, and to 2,945,000 by mid-1956). As a part of the reduction now to be carried out, the number of men called up would be reduced as from February, 1955, from 23,000 a month to 10,000 or 11,000.

Mr. Wilson explained that the Administration's decision was based on its belief that the threat of global war had decreased, and claimed that it was a "sound decision" which would leave the armed forces in a "flexible position" to meet aggression. He pointed out that, in line with the Administration's growing emphasis on continental air defence, there would not only be no cut in the Air Force but that it would even be increased from the present figure of 961,000 to 970,000 on June 30, 1955, and 975,000 on June 30, 1956. The other Services, however, would be reduced as follows:

	Nov. 30, 1954	June 30, 1955	June 30, 1956
Army	1,343,000	1,100,000	1,000,000
Navy	692,000	665,000	650,000
Marine Corps	222,000	205,000	190,000

Mr Wilson also announced that the First Marine Division would shortly be withdrawn from Korea and moved to the U.S. West Coast, where it would be ready as a highly trained amphibious force. It would be replaced in Korea by an Army division now in Japan.

The accelerated reduction in the strength of the armed forces, and in particular the heavy cuts in the strength of the Army, were strongly criticized by a number of Congressmen, who thought that the international situation did not warrant such reductions at the present time. They were also criticized by General Ridgway, Army Chief of Staff until last June, both in evidence before the House Armed Services Committee and in a report to Mr. Wilson, which he wrote on his retirement and which was published on July 14.

General Ridgway argued that it was doubtful whether the Soviet Union would be the first to use nuclear weapons in a future conflict, in view of the preponderance of such weapons in U S hands, and that it was therefore debatable whether the United States had the

freedom to rely mainly on such weapons Moreover, the Soviet Union would not want to initiate nuclear warfare, as it would not desire the prizes to be gained from a global war to be converted into "a vast ash-heap of devastated animal life, or of a human race debilitated by the effects of radiation." Unlike the U.S.A., therefore, which was relying mainly on air-nuclear power, the Soviet Union was building large ground forces, supported by integral air forces and a big submarine fleet.

General Ridgway went on to say that the U.S.A. should be able to defeat the forces of the Soviet bloc in a general war, in any climate and terrain and regardless of whether or not nuclear weapons were used. "In my view, however," he declared, "U.S. military forces are inadequate in strength and improperly proportioned to meet the above commitments, specific or implied," for the following reasons:

"(*a*) As the point in time approaches, possibly between 1958 and 1962, when Soviet nuclear weapons and delivery developments will give the Communist bloc the capability of inflicting critical damage on the U.S. war-making potential, coupled with a concurrent improvement of Soviet air defence capability, the U.S. nuclear air superiority will have lost most of its present significance.

"(*b*) The free world military forces deployed around the perimeter, other than those in Western Europe, are in the position of being military detachments which are not mutually supporting, which have little or no strategic mobility of their own, and which are difficult to reinforce because of the lack of truly mobile and adequate reserves.

"(*c*) Present U.S. military forces cannot support fully American diplomacy. If military power is to support diplomacy effectively, it must be real and apparent to all concerned, and it must be capable of being applied promptly, selectively, and with the degree of violence appropriate to the occasion.

"(*d*) While a 'mobile ready force' element is provided for in published policy statements, the actual development of a mobile ready force must compete with increasingly emphasized continental defence, and with . . . over-emphasized nuclear-air requirements; all of which are requirements related primarily to general war."

Mr. Wilson, at a press conference on July 17, maintained that General Ridgway's analysis had ignored the roles of reserves and of tactical or small atomic weapons. By ignoring the reserves, General Ridgway had come to the conclusion that the Army was short of men, but even if the millions of reserves or ex-servicemen were not properly trained, they could be regrouped or formed into reserves "pretty quickly." This, Mr. Wilson thought, was really the reason for the difference of opinion.

Extension of Selective Service Act.

The Selective Service Act, which provides for the call-up of young men between the ages of 18½ and 26 for two years' active service, followed by six years in the reserves, was extended for four years—i.e. until June 30, 1959—by a Bill signed by President Eisenhower on June 30. The extension Bill had been approved by the House of Representatives (by 394 votes to four) on Feb. 8 and by the Senate (on a voice vote) on June 16.

A second Bill signed by President Eisenhower on June 30 extended for two years (until June 30, 1957) the authority to call up doctors and dentists for military service.

Increases in Service Pay.

A Bill granting pay increases ranging from six to 25 per cent, and also increases in certain allowances, was passed by the House of Representatives on March 10 (by 399 votes to one) and by the Senate on March 30 (unanimously), and was signed by the President on March 31. The Bill, which was designed to retain skilled and highly-trained men in the Services, applied only to enlisted men who remained in the Services for more than two years, and to officers who remained for over three years, the amount of the increase varying according to rank.

In addition, the Bill provided for higher "hazardous pay" for airmen and submarine crews, and for similar benefits, on a selective basis, for parachute duty, demolition work, deep-sea diving, and certain other special jobs. It also covered a number of "non-pay benefits," including "dislocation" allowances for servicemen with dependants who were ordered to a new permanent station; an increase in the daily allowance for temporary duty travel from $9 to $12; and improved housing and better medical facilities for servicemen's families.

It was estimated that the increases in pay and allowances would cost about $745,000,000 a year, but this was expected to be largely offset by the amount saved by the reduction in the strength of the armed forces.

Defence Appropriations, 1955-56.

The House of Representatives unanimously approved a Bill on May 12 appropriating $31,488,206,000 for the armed forces in the fiscal year July 1955-June 1956, whilst the Senate passed a Bill on June 14 appropriating $31,836,521,336. The House, in passing the Bill, agreed to the proposed cuts in the armed forces already announced by the Administration, but the Senate (by 40 votes to 39) adopted an amendment by Senator Stuart Symington (Dem.) designed to keep the strength of the Marine Corps at 215,000 men and to appropriate an extra $46,394,390 for this purpose. The Senate also added a further $356,000,000 to the Bill to increase the production of the *B-52* inter-continental bomber. A Senate-House conference committee agreed to the Senate additions and also to certain other increases, the amount finally agreed upon being $31,882,815,726. The major items were $14,739,763,170 for the Air Force, $9,118,179,556 for the Navy and Marine Corps, and $7,329,953,000 for the Army. After its final passage the Bill was signed by the President on July 13. At the same time, however, the President sent a special message to Congress in which he described one of the Bill's provisions as unconstitutional and another as "most unfortunate." He said that had the money made available in the Bill not been urgently required, he would have witheld his approval from the measure.

The section which President Eisenhower claimed was unconstitutional was one which required the Secretary of Defence to obtain the approval of the House and Senate Appropriations Committees before he transferred such non-military functions as bakeries, laundries, coffee-roasting, and rope-making from the Defence Department to private industry Stating that this section was "an unconstitutional invasion of the province of the Executive," and that to acquiesce therein would establish "a dangerous precedent," the President declared that he would regard it as invalid in the administration of the Act.

The section to which the President objected as "most unfortunate" was one which "virtually precludes the services from considering the purchase of foreign-made spun silk yarn for cartridge cloth." The President said in this connexion: "By making it virtually impossible for our friends abroad to sell us goods when such goods are materially less expensive to our taxpayers than those that can be procured domestically, such provisions could effect a deadly attrition of our whole international trade policy and bring about an impairment of our relations with other nations."

Mr. Wilson announced on July 14 that he was impounding the additional $46,000,000 voted for the Marine Corps, and that the Corps would continue to be reduced in accordance with the Administration's original decision.

Extension of Defence Production Act.

The Defence Production Act was extended for a further year until June 30, 1956, under a Bill signed by President Eisenhower on Aug. 9.

The President's request for a two-year extension had been approved by the Senate, but the House voted for a one-year extension only and the Senate finally concurred with this decision.

The Act, as extended, grants the President authority to make allocations of scarce materials for defence and atomic contracts; empowers the Administration to forbid ships and aircraft to visit Communist China or to carry items destined for that country; and provides for the stockpiling of scarce materials and, for the first time, of certain items such as turbines which take a long time to produce. The Act also contains numerous other provisions relating to the control of the nation's economy in the event of war.

U.S. Forces Overseas.

The Defence Department, in reply to a "privileged resolution" introduced in the House of Representatives, stated on Feb. 15 that there were 1,370,000 U.S. troops serving overseas in about 950 bases, compared with 1,602,000 troops serving in the United States. In addition to the servicemen overseas, there were about 167,000 U.S. civilian employees; 218,000 civilians who worked for foreign Governments under contract to the U.S.A.; and 124,000 Germans working for the U.S. forces and paid in German currency. The cost of the overseas bases was about $601,699,000 a year; the cost of civilian employees in the U.S.A. and abroad was estimated at $4,530,276,000 a year; and the volume and value of military and non-military supplies needed to maintain U.S. establishments at home and abroad was estimated at 4,100,000 long tons, and $3,300,000,000 a year.

U.S. Air Force.

It was announced by the U.S. Defence Department on Nov. 29, 1954, that the U.S. hydrogen-bomb striking force would consist of 11 wings of B-52 jet bombers (*Stratoforts*), four more than had originally been envisaged. In addition there would be some 200 Boeing-717s (*Stratotankers*), the jet tanker version of the Boeing-707 airliner. The cost of the whole programme was estimated at approximately $4,800,000,000. (New York Times - New York Herald Tribune)

AUGUST 27—SEPTEMBER 3, 1955

A. EGYPT - ISRAEL.—Breakdown of Israeli-Egyptian Talks on Measures for Prevention of Border Incidents. - Clashes in Gaza Area.

Egyptian and Israeli military representatives, at a meeting on May 2, accepted " in principle " proposals put forward by General Burns, Chief of Staff of the U.N. Truce Supervisory Organization in Palestine, as the basis of a new agreement for easing tension on the Egyptian-Israeli frontier. These proposals envisaged the use of regular troops only along the armistice line, the erection of obstacles to prevent infiltration from either side, and the stationing of additional U.N. observers on the Egyptian side to help in the detection of violations of the demarcation line.

After discussions with Egyptian officials in Cairo, General Burns announced on May 9 that Egypt had accepted, with reservations, his four main proposals: (1) the formation of joint Israeli-Egyptian border patrols, (2) the erection of barbed-wire barriers along the border; (3) an agreement whereby local commanders would deal with minor incidents directly; (4) the use of regular troops only. Egypt had made reservations to the effect that the erection of barriers should not be held to imply recognition of the frontier line, and that the agreements between local commanders should preferably be known as " arrangements for maintaining security," as Egypt would make contact with Israel only through the U.N. Supervisory Organization and not directly. The Israeli Government had previously accepted the last three proposals, but had rejected that for joint patrols on the ground that the entry of foreign troops was incompatible with Israel's national sovereignty.

The resumption of discussions on the proposed new agreement, which had been scheduled for May 18, was postponed at Israel's request following an incident in which three Israeli soldiers were killed. Almost daily clashes occurred in the Gaza area during the remainder of May, as well as towards the end of August.

A marked increase in tension followed an incident on May 17, when an Israeli jeep was blown up by a land-mine, three officers being killed and two others wounded. On the following day Egyptian troops fired on Israeli civilians and later fired on a U.N. investigating team On May 19 Israeli troops attacked an Egyptian post in what was officially described as retaliation for the incident of May 17; according to Israeli sources, the raiders withdrew without casualties after blowing up the post, but an Egyptian spokesman claimed that they had been repulsed with heavy losses. On May 21 another Egyptian post was attacked, whilst on May 27 an Egyptian village was bombarded and an Israeli vehicle destroyed by a mine. On May 30 Egyptian troops fired on three Israeli settlements and Israeli forces returned their fire, the casualties being two Israelis killed and seven wounded and one Egyptian killed and three wounded.

No major incidents occurred during June and July, although Israeli water installations were blown up by Egyptian infiltrators on June 6, 19, and 25. On Aug. 22, however, a serious incident occurred when an Egyptian officer was killed and four soldiers wounded in a clash near Gaza. An Israeli spokesman stated that an Israeli patrol, on being fired on from Egyptian posts, had stormed the nearest post to obtain cover, but had withdrawn after the arrival of U.N. observers; an Egyptian communiqué, on the other hand, alleged that Israeli armoured cars had been used in a planned attack. The incident was described by the Israeli Foreign Ministry as an Egyptian attempt to sabotage the Gaza talks at a time when special efforts were being made to break the deadlock; on the other hand, Colonel Gohar described the incident as an Israeli attempt to force Egypt to change her declared policy on direct negotiations.

Further serious clashes in the Gaza area occurred during the last week of August. Whilst a Cairo announcement of Aug 26 stated that Israeli patrols had made several attempts to infiltrate into Egyptian-controlled territory and had been driven back with the loss of 12 men killed, the Israel Army authorities announced that an Egyptian unit had crossed the demarcation line, occupied a hill in Israel, and had been driven back by an Israeli counter-attack Several Israeli vehicles were mined in the border area on Aug 25-26, two soldiers being killed and three seriously wounded On Aug 27-28 Egyptian and Israeli batteries and mortars exchanged fire for several hours, with casualties on both sides, whilst further patrol clashes occurred along the border on Aug 28, 29 and 30.

Armed bands of Egyptians made deep penetations into Israeli territory during the night of Aug. 29-30, killing and wounding several unarmed civilians. Four persons were killed near Rehovot (25 miles south of Tel-Aviv) while working in an orange grove, whilst a family of five was ambushed near Askelon, the father being killed and the others wounded, among them a child. The Israeli Army authorities announced that a prisoner taken near Askelon had said that he was one of 24 trained Egyptians who had been sent across the frontier with instructions to split up into three groups of eight, each with specific objectives; the evidence indicated that although the raiders were not members of the regular Egyptian Army, they had received training as saboteurs and were under the control of the Egyptian military authorities Further clashes occurred in the Gaza area on Aug. 30, each side accusing the other of frontier violations.

An Egyptian spokesman announced on Aug. 31 that an Egyptian " commando " party had dynamited the mast of a radio station nine miles inside Israel territory after it had broadcast warnings to Egypt of the consequences of attacks on Israeli nationals. It was claimed that the " commandos " had penetrated 25 miles into Israel, as far as the Beersheba and Majdal areas, and had killed 15 Israelis in " punitive action."

During the night of Aug 31-Sept. 1 an Israeli detachment attacked and destroyed a police station at Khan Yunis, in Egyptian-controlled territory ten miles south of Gaza, which, according to the Israel defence authorities, had served as a base for terrorists and saboteurs carrying out penetrations into Israeli territory. Tel-Aviv Radio said that 40 Egyptians had been killed and 40 wounded in the raid on Khan Yunis, that the police station had been blown up, and that the raid was " the heaviest reprisal yet " for Egyptian raids on Israel. The Egyptian version said that 10 Palestine Arab volunteers had been killed and 12 wounded at Khan Yunis, but that there had been no Egyptian Army casualties. The clash was described in Cairo as the worst since 1949

On Sept. 1 the Israeli authorities announced that two Egyptian jet fighters flying over Israeli territory had been shot down by the Israel Air Force and had crashed in flames near the farm settlement of Yad Mordecai A Cairo statement admitted the loss of two planes, but said that they had collided in bad visibility while on a reconnaissance flight over the Gaza area A protest at a violation of Israeli air space by the Egyptian Air Force was made by Israel to the U N. Truce Supervisory Organization.

The deterioration in Egyptian-Israeli relations, which Sir Ralph Stevenson (the retiring British Ambassador to Egypt) described on June 13 as worse than at any time in the past five years, gave rise to concern at U.N. headquarters and in the Western countries. Dr. Hammarskjöld (the U.N. Secretary-General) appealed to the Egyptian and Israeli Governments on June 5 to refrain from any acts that would increase tension, and similar appeals were addressed to both countries by the British Government on June 6, to Colonel Nasser (the Egyptian Premier) by Mr. Byroade (U.S. Ambassador in Cairo) on June 9, and to the Egyptian and Israeli Ambassadors in London by Mr. Macmillan (the British Foreign Secretary) on June 14.

In view of the increasing tension, General Burns had an interview on June 1 with Colonel Nasser, who proposed that Egypt and Israel should each withdraw their forces one kilometre from the armistice line to create a demilitarized zone, and that General Burns's four-point plan should be put into effect immediately. On June 7 General Burns met Mr. Sharett, the Prime Minister of Israel, who expressed willingness to take part in high-level talks at which the proposal for a demilitarized zone could be examined. The Egyptain Government, however, rejected the suggestion for a high-level conference dealing with political matters, though it agreed to take part in purely military talks.

New proposals for the relief of tension on the border were submitted to General Burns on June 17 by Mr. Eytan, Director-General of the Israeli Foreign Ministry.

Mr. Eytan suggested that a mined security zone 100 metres wide should be laid along the armistice line; that a barbed-wire fence should be erected on each side of the zone, guarded by mixed Israeli-Egyptian patrols, that arrangements should be made for meetings of local commanders and for telephone communication between them; and that Egyptian outposts should be instructed not to fire on Israeli troops patrolling their own side of the border.

Egyptian and Israeli delegations, headed respectively by Colonel Gohar (of the Egyptain War Ministry) and Mr. Tekoa (of the Israeli Foreign Ministry), began discussions near Gaza on June 28, with General Burns in the chair. Although agreement was reached on a number of issues, progress was hindered by disagreement on Israeli proposals for frequent meetings and direct telephone communication between local commanders to deal with minor incidents, and for the exchange of information between them concerning the punishment of persons who had crossed the border illegally. These proposals were rejected by the Egyptian delegation, which insisted (in accordance with Egypt's policy of refusing all direct dealings with Israel until she had carried out the U.N. resolutions on the repatriation or compensation of the Palestine Arab refugees) that all contacts must be made through the Truce Supervisory Organization. In consequence an *impasse* was reached, and on Aug. 16 further talks were indefinitely postponed.

Following the Gaza incident of Aug. 22 (see above), the talks were broken off by the Egyptian Government, which communicated its decision to the U.N. Secretary-General and to General Burns. A statement issued in Cairo accused the Israeli armed forces of " intransigence," and said that the meetings of Egyptian and Israeli delegates had shown that Israel " aims at removing international supervision and conducting direct talks between Egypt and Israel in violation of the armistice agreement and the Security Council resolutions."

The Israel Embassy in London issued a statement on Aug. 30 stressing that Egypt had launched "a continuous series of attacks upon Israeli patrols, villages, and civilians" since breaking off the talks at Gaza on Aug. 22. After declaring that "the Government of Israel is prepared, as ever, to observe the provisions of the armistice but will take whatever measures are called for to safeguard the lives and property of its citizens," the statement added: "Full responsibility for the breaking-off of the negotiations, as well as for the situation created through continuous Egyptian attacks since then, must rest squarely upon Egypt. Since the breaking-off of the talks there have been 18 Egyptian attacks on Israel villages, 12 attacks on Israel patrols, and seven cases of Egyptian aircraft flying over Israel territory. In these attacks eight Israelis have been killed and 20 wounded, a number of them seriously."

The Egyptian Embassy in London issued a statement on the following day denying that Egypt bore responsibility for the breaking-off of the Gaza talks. After accusing the Israeli representatives of having rejected Egyptian proposals which would have reduced incidents and tension, it said that Egypt had withdrawn from the talks because of Israel's "aggressive action to force Egypt to accept her views." The Egyptian Embassy also denied that Egyptian troops had launched continuous attacks against Israeli territory, and alleged that recent incidents had been "incited by Israeli patrols."

General Burns called upon both sides on Aug. 31 to cease firing across the demarcation lines in the Gaza and El Auja areas, as well as to stop "raids, mining, and sabotage." The Egyptian authorities agreed to order a cease-fire from 6 p.m. on that date, but the Israeli Government objected to the form of General Burns's request for a cease-fire, which it was stated, "apparently proceeds from an assumption of common responsibility on the part of Israel and Egypt for the events of the past week." After drawing attention to deep penetrations into Israel by "terrorist bands of the Egyptian armed forces," which had waylaid and killed civilians, planted mines, and sought to terrorize the population, the Israeli Government asked General Burns "to obtain the assurance of the Egyptian Government that it accepts responsibility for these acts and that it is ready to give guarantees for immediate, complete, and definite cessation of all further hostile acts, and the strictest compliance with its obligation under the armistice agreement." On Sept. 1, however, the Government of Israel informed General Burns that they would be willing to order a cease-fire along the whole front if Egypt did the same, and if there was an end to "all attacks by Egypt in whatever form."

The following statement was issued by General Burns on the same day (Sept. 1):

"Nine days of violence, during which 7 Egyptians and 11 Israelis lost their lives and 24 Egyptians and 19 Israelis were wounded, culminated in the destruction of a police station and other buildings at Khan Yunis by Israel armed forces on the night of Aug 31. U N. military observers are investigating this very serious incident, and from preliminary reports the number of casualties, both civil and military, will exceed the casualties enumerated above I must express my deep regret at what I believe to have been an unnecessary loss of lives, and my sympathy with the relatives of the victims. I hope that the parties will now accept the proposals that are before them for a cessation of all hostile acts until an appropriate organ of the United Nations can deal with this very dangerous threat to peace. I am keeping the U.N Secretary-General fully informed of all developments."

The U.S. Secretary of State, Mr. Dulles, announced on Aug. 30 that the U.S. Government had made direct approaches to Egypt and Israel to stop the fighting in the Gaza area and to refrain from the use of force. The British Foreign Office announced on the following day that similar approaches to both parties had been made by the British Government.

A. JAPAN. — Bikini Hydrogen-Bomb Explosion. - Recovery of Japanese Fishermen affected by "Fall-out."

Dr. F. B. Berry, U.S. Assistant Secretary of Defence in charge of health and medical matters, stated on Aug. 23 that, so far as was known, 22 of the 23 Japanese fishermen who were affected by radioactive "fall-out" after the hydrogen-bomb explosion at Bikini on March 1, 1954, had all recovered. He added that U.S. Servicemen exposed to the same "fall-out" had also recovered, with no subsequent ill-effects. As regards the 23rd Japanese member of the crew of the *Fukuryu Maru*, who had died on Sept. 23, 1954, Dr. Berry disclosed that his death had been due to jaundice and not to radiation.

B. FRANCE - WESTERN GERMANY. — New Trade Agreement. - Ratification of Cultural Agreement.

A new trade agreement between France and the German Federal Republic, valid for 3½ years and providing for a considerable increase in trade exchanges in both directions, was signed in Paris on Aug. 5 by M. Pinay, the French Foreign Minister, and Herr von Maltzan, the German Ambassador. The agreement, which implemented the arrangements for economic co-operation envisaged by Dr. Adenauer and M. Mendès-France at their talks at La Celle-Saint-Cloud in October 1954, represented an important political development in the normalization of Franco-German relations. It gave France a guaranteed market for some of her agricultural produce, providing especially for French exports to Western Germany of (*a*) 500,000 tons of wheat annually, compared with 250,000 tons hitherto, (*b*) 200,000 tons of oats, compared with only 108,000 tons previously, and (*c*) table wines to a value of 350,000,000 francs. In return, France agreed that, in addition to the prevailing 75 per cent liberalization applicable to imports from all O.E.E.C. member-countries, the French import quotas for non-liberalized products from Western Germany would be completely restored to the levels which were in force before the heavy import cuts reintroduced in 1951 with the aim of protecting the French balance of payments.

The lists covering trade exchanges for the first 18 months (April 1, 1955-Sept. 30, 1956) included—in addition to the above-mentioned French supplies of food grains and wine—French exports of meat and cattle, potatoes, flour and manufactured wheat products, coal, steel, iron, leather and hides, woollen yarns, cotton textiles, optical articles, perfumes, watches, etc.

German exports to France and the Saar will be chiefly machine-tools, woodworking machinery, special motor-vehicles, tractors, agricultural machinery, paper and printing machinery, photographic cameras and accessories, textiles, ready-made clothing, chemical products (including plastic materials), coal, and steel

Since 1954 the Federal Republic had become the leading commercial customer of France, and the franc zone the principal commercial customer of the Federal Republic. During the first six months of 1955, trade exchanges between the two countries showed a further expansion from an annual monthly average of 19,000,000,000 francs in 1954 to 27,000,000,000 fr Total French exports to Germany in 1954 amounted to 123,400,000,000 fr,, compared with 98,700,000,000 fr. in 1953, 78,900,000,000 fr in 1952, 69,800,000,000 fr. in 1951, and 84,300,000,000 fr in 1950 German exports to France in 1954 totalled 119,800,000,000 fr,, as against 110,200,000,000 fr in 1953 114,900,000,000 fr. in 1952, 101,500,000,000 fr. in 1951, and 69,700,000,000 fr. in 1950. Since June, 1954, the French trade balance with Germany had shown a surplus Under the new agreement the total annual trade between the two countries was expected to reach the equivalent of about $1,000,000,000,

The Franco-German cultural agreement signed in October last came into force on July 28, when instruments of ratification were exchanged in Bonn.—(Le Monde, Paris - Frankfurter Allgemeine Zeitung) **(Prev. rep. 14256 B; 13845 A.)**

C. CANADA. — Provincial Ministries reorganized in Alberta and Ontario.

A reorganization of the Provincial Ministries in Alberta and Ontario was announced on Aug. 2 and Aug. 17 respectively, following the recent elections in the two Provinces.

Alberta. Mr. Manning, the Provincial Premier, announced that although he was not a lawyer he would take over the post of Attorney General, and that the other portfolios would be re-distributed as follows Mr E W Hinman, Provincial Treasurer, Mr. N A. Willmore, Lands and Forests; Mr A J. Hooke, Municipal Affairs and Provincial Secretary, Mr F. C Colborne, Minister without portfolio, Mr A. R. Patrick, Economic Affairs; Mr R Reierson, Industries and Labour, and Mr. J. Hartley, Public Works. The four last-named were new Ministers.

Ontario. Mr Frost, the Provincial Premier, announced the following Cabinet reshuffle. Mr D Porter, Provincial Treasurer, Mr. K. Roberts, Attorney General; Mr. W. M. Nickle, Planning and Development; Mr. G. Dunbar, Provincial Secretary; Mr W. A. Goodfellow, Municipal Affairs, Mr. B. Cathcart, Travel and Publicity; and Mr. Louis Cecile, Welfare. Mr. W. K. Warrender, formerly Minister of Planning and Development, became vice-chairman of the Ontario Hydro-Electric Power Commission in place of Mr. W. E. Hamilton, Minister without portfolio, who resigned. Mr. Roberts and Mr Cathcart were new Ministers.

It was announced on July 29 that Mr. J. B. McNair, Premier of New Brunswick from 1940 until 1952, when his party (the Liberals) was defeated, had been appointed a judge of the New Brunswick Supreme Court.—(Montreal Star) **(14335 C.)**

D. PAKISTAN. — Adoption of Right-hand Driving.

Under an Ordinance promulgated on Aug. 18, the "rule of the road" in Pakistan was changed from left-hand to right-hand driving. The change will come into effect on Jan. 1, 1956.

(Pakistan High Commissioner's Office, London)

A. SOVIET UNION. — Marshal Bulganin's Report on the Geneva Conference.

A report on the Geneva conference of Heads of Government was given by Marshal Bulganin on Aug. 4 to the Supreme Soviet, meeting in Moscow.

Marshal Bulganin's speech was largely devoted to a review of the Soviet position as expounded by him at Geneva, and, in particular, to a reaffirmation of the Soviet contention that the unification of Germany should be preceded by a comprehensive European security pact to which both parts of Germany should adhere

As regards the conference itself, Marshal Bulganin said that it had taken place in an atmosphere of co-operation and mutual understanding among the four Powers, all of whom had shown their desire to end the "cold war" The policy of "positions of strength" had been discarded, and the Soviet Government particularly welcomed President Eisenhower's statement that it was "essential to go forward along constructive paths and not merely to repeat the negative actions of the past" For all these reasons the conference had been "a success for the forces of peace," and constituted "an important historic event because it marked a turning-point in the relations between the Soviet Union and the West"

In the course of his speech Marshal Bulganin stressed that the Soviet Government was prepared to consider the proposals put forward by other countries In this connexion he said that Sir Anthony Eden's suggestion for a European security pact of a more restricted character than that proposed by the Soviet Union "deserved attention" and could have "positive significance." Nevertheless, the Soviet Government felt that its own proposal for a comprehensive pact—i e , one comprising all the countries of Europe, including the two German Republics, as well as the United States—could best solve "the main, basic question—that of European security" He admitted that the Soviet Union and the Western countries had not "found a common language" at Geneva on the German question, and that the forthcoming meeting of Foreign Ministers in October would encounter "not a few difficulties and not a few submerged rocks" before that question was solved

On the question of disarmament, Marshal Bulganin said *inter alia* . "We are profoundly convinced that genuine security can only be achieved when military groupings are done away with and when all countries, the U S A included, pledge themselves not to resort to military force Different peoples live on earth. Some are religious, some are atheists, some are Communists, some are anti-Communists, but all agree about one thing—they are all interested in peace, and since that is so we should spare no efforts to achieve it"

With regard to President Eisenhower's proposal for an exchange of military blueprints and for mutual aerial reconnaissance of each other's territories, Marshal Bulganin paid tribute to the sincerity of the President's attempt to find a solution of "so complicated a problem as that of international control" of armaments He added, however "In the course of unofficial conversations with leaders of the U S Government [at Geneva], we stated that the taking of aerial photographs could not produce the expected results, because both our countries have vast territories in which, if one wishes, anything can be concealed The fact should also be noted that the proposed plan touches only upon the territories of both countries, excluding armed forces and military installations situated on the territories of other States We consider as more realistic and more effective those proposals for international control which were put forward by the Soviet Government."

After announcing that he and M. Khrushchov had accepted the invitation from Sir Anthony Eden to visit Britain in 1956 (see 14369 A), Marshal Bulganin disclosed that he and Sir Anthony had also discussed "in a positive sense" the possibility of mutual visits of warships and military delegations between Britain and the U S S.R., as well as the development of cultural relations between the two countries He also disclosed that he had invited M Faure and M Pinay to visit the Soviet Union

The Supreme Soviet unanimously adopted a resolution approving the work of the Soviet delegation at the Geneva conference, and noting that the conference had opened a new stage in improving relations between States, irrespective of their political or social systems, based on confidence and peaceful co-existence.

A Yugoslav parliamentary delegation was present at the Supreme Soviet's session, to whom Marshal Bulganin conveyed "greetings to our Yugoslav friends and Comrade Tito." Marshal Bulganin added that the Soviet Government, Communist Party, and people would "exert every effort for friendship and co-operation with the fraternal peoples of Yugoslavia"

All foreign diplomatic representatives in Moscow, together with their wives and children, as well as all foreign press correspondents in the Soviet capital, were the guests on Aug. 7 at a garden party given by Marshal Bulganin and the Soviet Government at the Prime Minister's summer villa at Semyonovskaya, 60 miles from Moscow Many leading personalities, including M. Molotov, M. Khrushchov, M. Mikoyan, M. Malenkov, Marshal Zhukov, and Marshal Koniev, were present at the party and helped to entertain the guests, who numbered 250. The party was the first of its kind ever given by the Soviet Government.—(Soviet Weekly - Manchester Guardian)

(Prev. rep. Geneva Conference, 14325 A.)

B. SUDAN. — The South Sudan Mutiny.

The Governor-General of the Sudan, Sir Knox Helm, arrived back in Khartoum from Britain on Aug. 25 and immediately called upon the mutineers at Torit, in Equatoria Province, to surrender unconditionally. After saying that he was "deeply shocked" at the mutiny, which had brought "shame and disgrace" upon the Equatoria Corps of the Sudan Defence Force, he ordered them, in his capacity as Supreme Commander, to lay down their arms immediately and surrender. Sir Knox Helm recalled that the Prime Minister of the Sudan (Mr. Azhari) had given a personal pledge that a "full and fair investigation" would be held if the mutineers surrendered; repeated that pledge on his own behalf; and offered to send his personal representative, Mr. W. H. Luce, to Torit if his (the Governor-General's) orders were obeyed "fully and without question."

The mutineers sent a message to the Governor-General on the following day thanking him "most sincerely" and expressing their gratitude that he had returned to the Sudan "to end their trouble." Expressing fears about possible reprisals by Northern Sudanese troops, they asked him to order the withdrawal of those troops from Juba before the surrender took place, or, alternatively, to send British troops to the area. In reply, Sir Knox Helm said that he was "greatly disappointed" at the mutineers' response to his first message, and pointed out that he could neither recall the Northern troops from Juba nor send British troops to the south. He gave a personal guarantee, however, that "if you surrender peacefully, Northern troops will do you no harm," and that Mr. Luce would be present to watch the surrender as his personal representative. He again called upon the mutineers to surrender unconditionally by noon on Aug. 27 or to "take the full consequences of your refusal."

Mr. Luce, Major-General Ahmed Mohamed Pasha (C.-in-C. of the Sudan Defence Force), and Sayed Mubarek Zarroug (the Minister of Communications, representing Mr. Azhari) flew on Aug. 27 from Khartoum to Juba, where the surrender terms were handed to Lieutenant Lolya, an officer representing the disaffected units. The terms were conveyed by this officer to Torit, where—according to official reports from Khartoum—the mutineers accepted them and agreed to surrender their arms. When the Torit area was reoccupied by Northern troops on Aug. 30, however, only two officers and 57 mutineers were present to surrender The remaining mutineers, numbering over 300, were believed to have dispersed into the surrounding countryside and to be making for the Uganda or Ethiopian frontiers It was pointed out in Khartoum that the missing mutineers had a vast area of wild and little-frequented country in which to scatter, and that their pursuit would be a matter of difficulty because of extensive flooding and deep mud caused by the seasonal heavy rains. A few small groups of rebels were also believed to be at large west of the White Nile.
(Times - Daily Telegraph) **(Prev. rep. Sudan, 14377 A.)**

C. INDIA. — Defence Production Board.

It was announced in New Delhi on Aug. 20 that the Government of India had decided to set up a Defence Production Board to take over the management of all Indian ordnance factories, to co-ordinate research and development in the three armed services, and to secure effective liaison with civil industry to meet defence requirements. The chairman of the Board will be the Minister for Defence Organization, Mr. Tyagi, whilst Mr. N. N. Wanchoo (Joint Secretary to the Defence Ministry) will act as its administrative head under the title of Controller-General of Defence Production. The setting-up of such a board was the principal recommendation of a committee, headed by Sardar Baldev Singh (the former Defence Minister), which had been appointed in 1954 to report on the reorganization of India's ordnance factories. (The Statesman, Calcutta)

D. EGYPT. — Cabinet. - Major Salem given "Leave of Absence." - Duties taken over by Colonel Nasser.

It was officially announced in Cairo on Aug. 29 that Major Salah Salem, Minister for National Guidance and Sudanese Affairs, had been given "indefinite leave of absence" and that his duties would be taken over by the Prime Minister, Colonel Nasser. No official explanation was issued, but foreign correspondents in Cairo expressed the opinion that the move was due to the failure of Major Salem's Sudanese policy. A year earlier (September 1954) it had also been announced that Major Salem had been given leave of absence, but on the following day it was stated that he was back at work. Major Salem had held the portfolios of National Guidance and Sudanese Affairs since the deposition of King Farouk.
(Times - Daily Telegraph) **(Prev. rep. Cabinet, 13772 C.)**

A. MIDDLE EAST. — U.S. Proposals for Guarantee of Israel-Arab Frontiers. - Loan Offer to Israel for Compensation of Arab Refugees. - Mr. Dulles's Statement. - British, Australian, New Zealand, and Ceylonese Support.

Mr. Dulles, the U.S. Secretary of State, made an important statement on U.S. Middle Eastern policy when addressing the Council of Foreign Relations in New York on Aug. 26. In his speech, which was made with President Eisenhower's agreement, he expressed the willingness of the U.S. Government, in order to achieve a peaceful settlement between Israel and the Arab countries, (*a*) to join in formal treaties with other Middle Eastern Powers to protect agreed boundaries between Israel and the Arab States; (*b*) to support an international loan to Israel to enable her to compensate the Arab refugees; and (*c*) to contribute to the cost of water development and irrigation projects in the area. Mr. Dulles's speech was as follows:

" One of the first things I did as Secretary of State was to go to the Middle East . Upon my return I spoke of the impressions gathered on that trip and of the hopes which I held as a result of talks with leaders and people there Some of those hopes have become realities

At that time the Suez base was a centre of controversy and potential strife. Now, as a result of patient effort in a spirit of conciliation, the problem of the Suez base has been successfully resolved Another problem which was then concerning many of the leaders in the Middle East was that of the security of the area. It was clear that effective defence depended upon collective measures and that such measures, to be dependable, needed to be a natural drawing together of those who felt a sense of common destiny in the face of what could be a common danger Here, too, there has been some encouraging progress.

A third problem which called for attention was the need for water to irrigate land I mentioned in my report the possibility that the rivers flowing through the Jordan Valley might be used to make this valley a source of livelihood rather than dispute. Since then Ambassador Eric Johnston has held talks with the Governments of countries through which the River Jordan runs They have shown an encouraging willingness to accept the principle of co-ordinated arrangements for the use of the waters. Plans for the development of the valley are well advanced Ambassador Johnston is now on his fourth visit to the countries concerned, in an effort to eliminate the small margins of difference which still exist

A beginning has been made in doing away with the obstacles that stand in the way of the aspirations of the Middle Eastern peoples It is my hope that the time has come when it is useful to think in terms of further steps towards stability, tranquillity and progress in the Middle East.

. Three problems remain that conspicuously require to be solved The first is the tragic plight of the 900,000 refugees who formerly lived in the territory that is now occupied by Israel. The second is the pall of fear that hangs over the Arab and Israeli peoples alike. The Arab countries fear that Israel will seek by violent means to expand at their expense. The Israelis fear that the Arabs will gradually marshal superior forces to be used to drive them into the sea, and they suffer from the economic measures now taken against them. The third is the lack of fixed permanent boundaries between Israel and her Arab neighbours. There are other important problems. But if these three principal problems could be dealt with, the way would be paved for the solution of others.

Serious as the present situation is, there is a danger that unless it improves it will get worse. One ill leads to another, and cause and effect are hard to sort out. The atmosphere, if it worsens, could becloud clear judgments, making appear attractive what in fact would be reckless Both sides suffer greatly from the present situation, and both are anxious for what they would regard as a just and equitable solution. But neither has been able to find that way.

This may be a situation where mutual friends could serve the common good. This is particularly true since the area may not, itself, possess all of the ingredients needed for the full and early building of a condition of security and well-being The United States, as a friend of both the Israelis and the Arabs, has given the situation deep and anxious thought and has come to certain conclusions, the expression of which may help men of good will within the area to fresh constructive efforts. I speak in this matter with the authority of President Eisenhower.

(1) To end the plight of the 900,000 refugees requires that these uprooted people should, through resettlement and, to such an extent as may be feasible, repatriation, be enabled to resume a life of dignity and self-respect To this end, there is need to create more arable land where refugees can find permanent homes and gain their own livelihood through their own work. Fortunately, there are practical projects for water development which can make this possible All this requires money.

Compensation is due from Israel to the refugees However, it may be that Israel cannot, unaided, now make adequate compensation. If so, there might be an international loan to enable Israel to pay the compensation which is due and which would enable many of the refugees to find for themselves a better way of life President Eisenhower would recommend substantial participation by the U.S A. in such a loan for such a purpose. Also, he would recommend that the U S A should contribute to the realization of water development and irrigation projects which, directly or indirectly, would facilitate the resettlement of the refugees.

These projects . . would enable the people throughout the area to enjoy a better life. Furthermore, a solution to the refugee problem would help in eliminating the problem of recurrent incidents which have plagued and embittered the settlements on both sides of the border.

(2) The second principal problem which I mentioned is that of fear The nature of this fear is such that it is hardly within the capacity of the countries of the area, acting alone, to replace the fear with a sense of security. There, as in many other areas, security can be assured only by collective measures which commit decisive power to the deterring of aggression President Eisenhower has authorized me to say that, given a solution of the other related problems, he would recommend that the U S A should join in formal treaty engagements to prevent or thwart any effort by either side to alter by force the boundaries between Israel and her Arab neighbours I hope that other countries would be willing to join in such a security guarantee, and that it would be sponsored by the United Nations

By such collective security measures the area could be relieved of the acute fears which both sides now profess The families located near the boundaries could relax from the strain of feeling that violent death may suddenly strike them, the people of the area, whose standards of living are already too low, would no longer have to carry the burden of what threatens to become an armaments race, if indeed it does not become a war; the political leadership of the area could devote itself to constructive tasks

(3) If there is to be a guarantee of borders, there should be prior agreement upon what the borders are That is the third major problem The existing lines separating Israel and the Arab States were fixed by the armistice agreements of 1949 They were not designed to be permanent frontiers in every respect, in part, at least, they reflected the status of the fighting at the moment

The task of drawing permanent boundaries is admittedly one of difficulty There is no single and sure guide, for each of two conflicting claims may seem to have merit The difficulty is increased by the fact that even territory which is barren has acquired a sentimental significance Surely, the overall advantages of the measures here outlined would seem to outweigh vastly any net disadvantage of the adjustments needed to convert armistice lines of danger into boundary lines of safety In spite of conflicting claims and settlements I believe it is possible to find a way of reconciling the vital interests of all the parties The U.S.A would be willing to help in the search for a solution if the parties to the dispute should desire.

(4) If agreement can be reached on these basic problems of refugees, fear, and boundaries, it should prove possible to find solutions for other questions, largely economic, which presently fan the flames of hostility and resentment It should also be possible to reach agreement on the status of Jerusalem. The U S A. would give its support to a U N review of this problem.

I have not attempted to enumerate all the issues on which it would be desirable to have a settlement; nor have I tried to outline in detail the form which a settlement of any of the elements might take I have tried to show that possibilities exist for an immeasurable improvement, and that the possibilities do not require any nation's taking action which would be against its interests, whether those interests be measured in terms of material strength or in terms of national prestige and honour I have also, I trust, made clear that the U S Government is disposed to enlarge those possibilities by contributions of its own, if this be desired by those concerned.

Both sides in this strife have a noble past, a heritage of rich contributions to civilization Both have fostered progress in science and the arts. Each side is predominantly representative of one of the world's greatest religions Both sides desire to achieve a good life for their people and to share and contribute to the advancements of this century At a time when a great effort is being made to ease the tension which has long prevailed between the Soviet and Western worlds, can we not hope that a similar spirit should prevail in the Middle East? That is our plea. The spirit of conciliation and of the 'good neighbour' brings rich rewards to peoples and nations. If doing that involves some burdens, they are burdens which the U.S.A. would share, just as we would share the satisfaction which would result if happiness, contentment, and good will could drive hatred and misery away from peoples whom we hold in high respect and honour "

The U.S. initiative for an Arab-Israeli settlement was strongly endorsed by the British Foreign Office in a statement issued on Aug. 27.

The statement recalled that Britain had already suggested a guarantee to Israel and the Arab States in Sir Anthony Eden's speech to the House of Commons on April 4. It described Mr. Dulles's statement as " an important contribution towards the most critical outstanding problem in the Middle East," and continued .

" H M. Government share the concern of the U.S. Government at the dangerous consequences which may flow from a continuation of present tensions, and are ready, as they have always been, to play their full part in an effort to bring about more settled relations. They agree with the analysis which Mr. Dulles has made of the problems which require to be solved.

H M. Government also agree with the U.S. Government in thinking that it should be possible to reach a settlement of these problems by direct or indirect negotiations, without detriment to the vital interests of either side. In that event H.M Government would be ready, as previously stated in Parliament, to guarantee, by treaty or treaties with the parties concerned, any territorial settlement so agreed.

H M Government also welcome the statement that the United States would be willing to participate in an international loan to assist Israel in paying compensation to the Arab refugees The British Government would also be ready to make their contribution"

It was disclosed that Mr. Dulles's speech had been communicated in advance to the British and French Governments.

Sir John Kotelawala, the Prime Minister of Ceylon, offered on Aug. 28 to help in the search for a peaceful solution in the Middle East. He said:

". . The ending of the strife and bitterness that have so long affected Arab-Israel relations, and the restoration of peace in the Middle East, are matters of concern to all countries alike Ceylon therefore welcomes the initiative taken by the U S. Government in putting forward constructive proposals for the easing of tensions in the Middle East The Government of Ceylon would be ready to assist in the search for a peaceful solution It would be willing and glad to do everything within its power to contribute to the efforts of the parties concerned and of other friendly States in facilitating the restoration of peace, stability, and progress in the Middle East"

Both Mr. Casey and Mr. Macdonald, the respective Australian and New Zealand Ministers of External Affairs, expressed their Governments' support for the U.S. proposal. Directorate of Information, Wellington) **(Prev. rep. 14389 A.)**

A SOVIET UNION - WESTERN GERMANY. — Note Exchanges on Dr. Adenauer's Visit to Moscow.

A Soviet Note welcoming the German Federal Government's willingness to discuss the establishment of diplomatic, trade, and cultural relations between the U.S.S.R. and the Federal Republic was transmitted to the German Ambassador in Paris (Herr von Maltzan) on Aug. 3 by the Soviet Ambassador, M. Vinogradov. It suggested that the talks between the Soviet Government and the German delegation headed by Dr Adenauer should be held in Moscow "at the end of August or the beginning of September"; said that the Soviet Government "proceeds from the premise that the establishment of diplomatic, trade, and cultural relations between the two countries will naturally not be bound by any preliminary conditions on the part of one side or the other"; and added that the Soviet Government had no objection to the German suggestion that Herr von Maltzan and M. Vinogradov should have informal discussions in Paris "for the purpose of specifying the questions which are to be discussed and studied during the talks in Moscow."

The German reply, presented to M. Vinogradov by Herr von Maltzan on Aug. 12, suggested that the Soviet-German talks should begin in Moscow on Sept. 9. It accepted the agenda suggested by the Soviet Government (i e. the establishment of diplomatic, trade, and cultural relations) but, in addition, proposed that the two Governments should also discuss (1) the question of German unity, and (2) the release of those Germans who were still held in the U S.S R. or in "the Soviet Union's sphere of influence." The German Note stressed that the Federal Government was of the opinion that these two questions could not be separated from the question of establishing diplomatic relations between the two countries

In a further Note on Aug. 19, the Soviet Government agreed that the Moscow talks should begin on Sept. 9 It added "As regards the question of Germany's national unity . . . the Soviet Government sees no obstacles to an exchange of views on this issue or on other international questions of interest to both parties." No specific mention was made of the question of German prisoners of war.—(Frankfurter Allgemeine Zeitung - Soviet Weekly) **(Prev. rep. 14293 A; 14271 A.)**

B. RUMANIA. — Reduction in Armed Forces.

Following the similar action taken by the Soviet Union and Czechoslovakia, the Rumanian Government announced on Aug. 30 that the strength of the Rumanian armed forces would be reduced by 40,000 men by Dec. 1, 1955, because of the recent relaxation of international tension. Although the Rumanian forces are limited to 125,000 men under the Rumanian Peace Treaty, they are believed to number about 230,000. No definite figures are available.—(Times - Le Monde, Paris) **(Prev. rep. 14384 B; 14384 C.)**

C. NORTH BORNEO. — Filipino Immigration.

An agreement was signed in Manila on Aug. 29 by Vice-President Carlos Garcia and the British Ambassador (Mr. G. L. Clutton) providing for the employment and settlement of Filipino workers in British North Borneo. The agreement initially covered the migration of 5,000 skilled and unskilled workers, who will be given an opportunity to acquire land and to become independent farmers. (Times)

D. OBITUARY. — Thomas Mann.

Thomas Mann, the eminent German novelist, died in Zurich on Aug. 12, aged 80. He had been a naturalized American citizen since 1940, and had lived in Switzerland since 1952.

Born in Lubeck in 1875, Thomas Mann was the son of a merchant who was a senator of that city After his father's death he went with his mother and the other members of his family to Munich, and worked for some time as a clerk in an insurance company He abandoned a commercial career for writing, went to live in Italy, published a number of short stories, but subsequently returned to Munich to join the staff of the satirical weekly *Simplicissimus* In 1901, at the age of 25, he published his famous novel *Buddenbrooks*, which he had begun in Italy and which brought him international recognition A saga of family life, and the precursor of a number of other works of this type, it was subsequently translated into many languages and has sold more than 1,200,000 copies In the decade before the First World War he wrote the novels *Royal Highness* (1906) and *Death in Venice* (1912), as well as many short stories.

A conservative and nationalist in the early part of his life, Thomas Mann gave strong support to the policy and war aims of Imperial Germany during the 1914-18 war After 1918, however, his views underwent a radical change, and in subsequent years he became famous in both Europe and America as one of the most ardent champions of democracy Bitterly opposed to the National Socialist regime, he left Germany when Hitler came to power, and lived for some years in France and Switzerland before accepting an invitation from President Benesh to become a Czechoslovak citizen His German nationality was cancelled by the Nazi regime, which he strongly attacked in speeches and writings.

Forced to leave Czechoslovakia in 1938 through the Nazi aggression against that country, he went to the U S A., where he was naturalized, and became Lecturer in the Humanities at Princeton University. In the immediate pre-war period he uttered frequent warnings against the dangers of the "appeasement" policy, and during the Second World War made many anti-Nazi broadcasts to Germany. He returned to Germany in 1949—for the first time since his self-imposed exile in 1933—to lecture on the occasion of the 200th anniversary of Goethe's birth, and received the Freedom of Weimar.

In addition to *Buddenbrooks* and the other novels mentioned above, Mann's principal works included *The Magic Mountain* (1924), *Mario and the Magician* (1930), *Lotte in Weimar* (1940), *Joseph and his Brethren* (a "prose epic" based on the Biblical story and completed in several volumes between 1935 and 1945), and *Doctor Faustus* (1948). His political writings included *The Coming Victory of Democracy* (1938), in which he forecast the eventual downfall of the dictators, and *Order of the Day* (1943), his collected essays and speeches. He received the Nobel Prize for Literature in 1929 The Freedom of his native city of Lubeck was conferred on him three weeks before his death, whilst the Federal Order of Merit—the highest award of the German Federal Republic—was conferred on him only three days before he died He held honorary degrees (D Litt) of Oxford and Cambridge

Two of Thomas Mann's six children—Erika Mann (wife of W. H. Auden, the poet) and Klaus Mann—became themselves well-known writers. His brother, Heinrich Mann, who died in 1950 (see 10685 A), was also a distinguished novelist.—(Times - Frankfurter Allgemeine Zeitung - Neue Zurcher Zeitung)

E. UNITED KINGDOM. — Unemployment Figures.

Figures of registered unemployed in Great Britain in the first seven months of 1955 were as follows.

	Wholly Unemployed (including Casuals)		Temporarily Stopped		
	Males	Females	Males	Females	Total
January 10	185,376	95,503	9,321	7,647	297,847
February 14	170,494	95,657	8,483	6,998	281,632
March 14	162,999	88,298	10,616	7,998	269,911
April 18	144,654	81,674	22,930	10,871	260,129
May 16	125,104	73,703	11,122	13,714	223,643
June 13	116,113	64,404	14,221	15,805	210,543
July 11	108,982	56,721	7,708	11,518	184,929

There were 30,884 unemployed in Northern Ireland in July, the figure for the United Kingdom in that month therefore totalling 215,813

In spite of the rail and dock strikes, the number of registered unemployed in Great Britain in June was 13,000 fewer than in the previous month, and fewer than in any June (except 1951) since the war. The July figure of 184,000 unemployed was the lowest since the war, representing 0.9 per cent of the total working population and including 33,896 married women. (Ministry of Labour Gazette) **(Prev. rep. 14041 D.)**

F. FRANCE. — Uranium-mining Company.

The formation of a company (the *Compagnie française des minerais d'uranium*) to explore, prospect, mine, and process deposits of fissile materials in France, and possibly abroad, was announced in Paris on Aug. 24. The company, founded by Rothschilds Frères in co-operation with mining and chemical firms, has an initial capital of 400,000,000 francs, of which 15 per cent will be subscribed by the French Atomic Energy Commission.—(Le Monde, Paris) **(Prev. rep. 14360 A.)**

A. CYPRUS. — Increase in Terrorist Activities. - Anti-Terrorist Measures. - British Protests at Broadcasts from Athens Radio. - Mr. Lennox-Boyd's Visit to Cyprus. - Meetings with Communal Leaders.

Intensified terrorist activities by the underground *Eoka* organization during the past three months, resulting in several deaths, led to a number of arrests in different parts of the island and to anti-terrorist measures by the Government of Cyprus. These and other related developments are described below under cross-headings.

Terrorist Activities. After a comparative lull in terrorist activities since April, a series of bombing and hand-grenade attacks were carried out in different parts of Cyprus on four successive nights between June 19-20 and June 23-24 In Nicosia, a bomb explosion outside police headquarters killed a civilian and seriously injured two policemen and two civilians, as well as causing several minor casualties. Bombs were also thrown outside the Kyrenia residence of General Sir Charles Keightley (C -in-C., Middle East Land Forces) and the Nicosia residence of Brigadier T. E. Williams (of British Middle East H Q staff) without causing any casualties Elsewhere in the island, a Cypriot police sergeant was shot dead by masked terrorists who attacked a police station in the village of Amianos and escaped with several rifles ; a British soldier was wounded when a hand-grenade was thrown into a bar at Famagusta ; and explosions occurred at Paphos and other places.

Several caches of arms and ammunition were found by the police in raids on June 30, ten suspected members of *Eoka* being taken into custody. A reward of £1,000 for information leading to the arrest of the murderers of the police sergeant at Amianos was offered by the police authorities, as well as £500 for information leading to the arrest of the persons who had taken part in the other attacks

A Cypriot detective was shot dead in Nicosia on Aug 28 as crowds were dispersing from a Communist meeting which had condemned the tripartite U K -Greek-Turkish talks due to open in London on the following day (see 14396 A) The murder was carried out by a youth who shot the detective in the back and subsequently escaped in the crowd.

On May 25 a delayed-action bomb had exploded in a Nicosia cinema a few minutes after the Governor of Cyprus (Sir Robert Armitage) and the audience—most of whom were British—had left the building. The cinema was heavily damaged, but no casualties were caused. Two women were injured in a bomb explosion at the Cyprus broadcasting station on Aug. 31.

Sentences on Terrorists. Five Cypriot youths, members of the *Eoka* organization, were found guilty at Larnaka on June 23 of plotting to overthrow the Government by armed force, and were sentenced to terms of imprisonment ranging from three to nine years All had been arrested in connection with the bomb attacks in Larnaka on the night of March 31 (see 14221 A). Pro-*enosis* demonstrators outside the court-room were dispersed by tear-gas.

On June 30 another Cypriot youth was sentenced to four years' imprisonment in Nicosia after he had been found with a bomb in his pocket outside a hotel in which the Governor of Cyprus was dining The defendant pleaded " guilty " to a charge of plotting to overthrow the Government by force

Anti-Terrorist Measures. An emergency law was published on July 15 in the *Cyprus Gazette* giving the Governor powers to detain " any person who he is satisfied has belonged to, or is a member of, an organization which has been responsible for acts of violence directed at the overthrow of the Government." It was officially explained that the law was similar to Defence Regulation 18B issued in Britain during the war , that it would come into immediate effect and would last until Oct 31, 1955, after which it might be extended for six-month periods at the Governor's discretion ; and that persons detained under the law would have the right of appeal to an advisory committee appointed by the Governor.

The following statement was issued by the Government in connexion with this law . " Terrorists have shown by their recent actions their intention to murder police officers, and have also made threats against the Governor, leaders of the Turkish community, and Army personnel. This state of affairs cannot be tolerated, and the Government is confident that in taking the present step it will have the support of all those who have the true interests of Cyprus at heart. A special law is necessary because people are reluctant to come forward with evidence or information for fear of reprisals. It is emphasised that this law is directed only against active terrorists. The Government is determined to bring to an end the acts of terrorism which have been committed against persons and property during recent weeks. Since June 20 attacks have been made resulting in two deaths and injuries to 22 persons."

Forty-six persons had been arrested under the new law by the middle of August as a result of island-wide searches for suspected terrorists carried out by the police and British security forces Arrests were made in Nicosia, Famagusta, Larnaka, Limassol, and Paphos, and in a number of villages, the detained persons including students, clerks, small tradesmen, and a deacon of the Greek Orthodox Church.

Another law was promulgated on Aug. 4 banning persons under 21 from possessing firearms. It also provided for the registration with the police of all firearms in the Colony, and for the imposition of penalties of six months' imprisonment and a fine of £25 for illegal possession of firearms.

Rioting in Nicosia. A 24-hour general strike, sponsored by both Nationalist and Communist unions, was called in Nicosia on Aug 2 to protest against the law giving the Governor powers to detain suspected terrorists without trial The " central committee " organizing the strike warned all shopkeepers and others to close their premises under penalty of being " blacklisted," and ordered the complete cessation of all forms of transport except doctors' cars called to emergency cases The strike call was ignored by the Turkish community but was otherwise generally complied with except in the case of food shops and cafes, which were forbidden by law to close

Damage running into several hundred pounds was caused by demonstrators who attacked the British Council building, Government offices, and a large British grocery store, where windows were smashed and attempts made to set fire to the premises Tear-gas was used to disperse the demonstrators, several of whom were arrested

Mr. Lennox-Boyd's Visit to Cyprus. The British Colonial Secretary, Mr Lennox-Boyd, paid a three-day visit to Cyprus on July 9-11 during which he had discussions with Sir Robert Armitage, members of the Cyprus Government, Archbishop Makarios (leader of the *enosis* movement in Cyprus), leaders of the Turkish community, and the mayors of the leading towns, including the Communist mayors of Famagusta, Larnaka, and Limassol

Anti-British Broadcasts by Athens Radio. A strong British protest was presented to the Greek Government following an Athens radio broadcast of July 19 which accused Britain of using " Hitlerite " and " Gestapo " methods in Cyprus, and which described the action taken against the terrorists as " British Fascist measures " The broadcast said, *inter alia*, that Mr Lennox-Boyd's visit had " resulted in the creation of concentration camps," and added " No Power, no trap, no plot, no tripartite conference, no Boyd [*sic*], no Armitage, no concentration camp, can stop the struggle for liberty of the Cypriot people " In London, the Under-Secretary for Foreign Affairs (Mr. Turton) informed the House of Commons on July 27 that H M. Ambassador in Athens had protested against " this and other recent broadcasts of a malicious and insulting nature which are incompatible with the Greek Government's professed desire for an improvement of relations with the United Kingdom " In addition, the Greek Ambassador in London had been told that such broadcasts had made " a deplorable impression " and were " hampering efforts to settle differences with regard to Cyprus "

A further British protest was presented in connexion with the broadcasting by Athens radio on June 21 of an *Eoka* proclamation which, *inter alia*, called upon the Cypriots to " sweep away all those who, like the constables of the Queen of Britain, hunt you to prevent your national manifestations " It was announced in Athens on June 29 that the protest had been rejected on the ground that the broadcast was a quotation from an Athens newspaper which had published the text of the *Eoka* manifesto The statement said that whilst the Greek Government had done " everything in its power to prevent insults, personal attacks, and incitement to violence," it could accept no responsibility for " the inclusion in broadcast statements of information and comments published in the Press."

The Greek Government protested to Britain on May 21 at the refusal of the British authorities in Cyprus to allow the crews of five Greek aircraft which had landed at Nicosia airport to visit Nicosia itself. It was explained by the British Foreign Office that five *Dakotas* carrying 43 Greek airmen from Korea to Greece had arrived at Nicosia airport on May 19 , that less than an hour's notice had been given of the arrival of these machines , and that, although the Greek Consul-General and his staff were given every facility to meet the aircraft on their arrival, the Governor of Cyprus did not feel justified in allowing the Greek airmen—who were in uniform—to visit Nicosia, in view of the risk of incidents after recent inflammatory broadcasts from Greece.

The Greek delegation at the United Nations asked on July 25 that the General Assembly, at its tenth session in September, should include in its agenda the question of self-determination for Cyprus. The matter had also been raised at the ninth session of the General Assembly in December last, when it had been decided that discussion of the Cyprus question was " inappropriate for the time being."—(Times - Daily Telegraph - Manchester Guardian - U.N. Information Centre, London)

(Prev. rep. Cyprus, 14221 A.)

B. ECUADOR. — Acquisition of British Destroyers.

A British *Hunt*-class destroyer acquired by Ecuador, H.M S. *Quantock*, was handed over to the Ecuadorean Navy at Portsmouth on Aug. 16 and renamed the *Presidente Alfaro*. A second *Hunt*-class destroyer, H.M.S. *Meynell* (renamed the *Presidente Velasco Ibarra*), will be transferred to the Ecuadorean Navy after refitting at Cowes. Both vessels saw active service in the Second World War, during which many *Hunt*-class destroyers (1,000 tons) were built by the Royal Navy. (Times)

C. UNITED KINGDOM. — Agriculture. - Increased Interest Rate on Farm Loans.

The Agricultural Mortgage Corporation raised the interest rate on new farm loans from 4½ to 5½ per cent on Aug. 8. Existing loans, and loans offered but not completed, were unaffected. Outstanding loans from the Corporation to farmers and landowners totalled £25,733,180 on March 31, 1955.
(Times - Daily Telegraph) **(Prev. rep. 13277 C.)**

A. UNITED NATIONS. — Expanded Programme of Technical Assistance. - Report of Technical Assistance Board. - Postponement of Special U.N. Fund for Economic Development.

The seventh report of the Technical Assistance Board, for presentation to the Technical Assistance Committee of the U.N. Economic and Social Council, was published on July 5 and is summarized below.

The report said that the year 1954 was "another year of paradox" for the U.N. Expanded Programme of Technical Assistance because, although many of the projects begun in previous years had been completed and the success of others had been consolidated, the actual tempo of operations had had to be slowed down owing to a prolonged uncertainty about some contributions and the late payment of others The amount pledged for 1954 had been $25,300,000 and the amount actually collected during the year (including arrears) $28,600,000, but almost one-half of this had only come in during the last quarter of the year As a result, expenditure on the three main forms of assistance—the provision of experts, the award of fellowships, and the supply of equipment—had been reduced from $17,818,000 in 1953 to $15,111,000 in 1954 The report emphasized that this clearly illustrated the difficulty of carrying out what should be essentially a long-term programme on the basis of year-to-year financing, and gave a warning that "until the programme can be planned and implemented on a more continuing basis, it will fall short of the ideals of those who conceived it"

Despite these limitations, technical assistance was given to 97 countries and territories in 1954 and the "two-way nature" of participation by countries was continued Thus, Europe promised $7,120,000 and received assistance amounting to $1,500,000, Asia and the Far East promised $1,288,000 and received $4,650,000, Latin America promised $1,286,000 and received $3,921,000, the Middle East promised $248,000 and received $3,252,000, whilst Africa, though not in a position to offer much assistance, received $1,279,000 The number of experts provided was 1,584 at a cost of $11,194,000, they were recruited from as many as 63 countries and went to 71 other countries Fellowships were awarded to 1,529 persons in 86 countries at a cost of $2,540,000, and the value of equipment supplied was $1,377,000.

The report gave examples of the variety of projects covered by the programme. These included courses in public administration (in Brazil, Libya, and Turkey), fundamental education and community development schemes (Latin America, Libya, Haiti, Egypt, Iraq, Ceylon, Siam), "on-the-job training" for engineers and other skilled workers (Yugoslavia, Turkey, Bolivia, Colombia, Israel, Persia), malaria control (Afghanistan, Ceylon, India, Siam), irrigation and hydro-electric power schemes (Bolivia, Brazil, Ecuador, the Gold Coast, Greece, Iraq, Jamaica, Pakistan, Persia, Syria, Tanganyika, Yugoslavia), fishing-boat mechanization (Ceylon, India), and a scheme for the development of the Amazon Valley. Many of these projects were integrated with programmes of assistance provided from other sources, such as the U N specialized agencies, the U S. Foreign Operations Administration, the Colombo Plan, and the Organization of American States During 1954 a scheme was elaborated under which U.N. resources were used to recruit experts or to place Fellows, with the receiving Government reimbursing the U.N for the cost involved; by this means, the volume of technical assistance could be increased without a corresponding increase in the original technical assistance funds available.

The report gave details of the new procedure which it had been decided to adopt in planning the 1956 programme Recipient countries would be responsible for formulating their technical assistance requirements according to their judgment of the priorities involved and their own national development plans The Technical Assistance Board would then draw up "target figures" for each country on the basis of the funds assumed to be available for the Expanded Programme in the following year, and the Technical Assistance Committee, having reviewed and approved the Programme, would finally allocate funds to the participating organizations (e.g. the specialized agencies) according to their respective shares in the Programme, instead of on the basis of fixed percentages as in the past Thus, while the Board would be responsible for general co-ordination and the Committee for ensuring that the basic objectives of the programme were being effectively promoted, it was hoped that recipient governments, by playing a larger part in the planning themselves, would feel a greater responsibility for the outcome of each project.

On April 20 it was reported in the Press that the Soviet Union was understood to have placed 12,000,000 roubles (more than £1,000,000) at the disposal of the Technical Assistance Board, and that the Governments of India, Burma, Indonesia, Afghanistan, and Chile had expressed an interest in receiving Soviet assistance in the form of technical experts or equipment.

Detailed proposals for a Special U.N. Fund for Economic Development (SUNFED)—the setting-up of which had been recommended in April 1953 (see 13233 A) as a means of supplementing aid to under-developed countries under the Expanded Technical Assistance Programme and other schemes —were put before the U.N. Economic and Social Council on July 27 by M. Scheyven (Belgium), who had been chairman of a body appointed to inquire into the project. The British, U.S., and Soviet delegates, however, all declared that their countries felt unable to subscribe to the Fund until resources had been released through internationally controlled disarmament. Eventually, on Aug. 3, the Economic Committee of the Council approved a compromise resolution by 15 votes to one, with two abstentions, which called for the appointment of a special inter-governmental committee; this would analyse M. Scheyven's proposals in the light of views submitted by Governments before March 31, 1956, and would make two reports to the full Council—an interim one in the summer of 1956 and a final one in the spring of 1957. The two abstentions came from the U.S. and British delegates, both of whom felt that progress would be possible only on the basis of agreement by all members of the Council, and that the creation of an inter-governmental body was premature. Countries supporting the compromise proposal—which the full Council endorsed on Aug. 5—included Ecuador, Egypt, France, India, Netherlands, Norway, Pakistan, the Soviet Union, Turkey, and Yugoslavia. (U.N. Information Centre, London - Manchester Guardian - New York Times) **(Prev. rep. 13367 A; 13121 B.)**

B. UNITED STATES. — Foreign Service.

Appointments in the U.S. Foreign Service during the past ten months are listed below (date of appointment in parentheses):

Mr. Edward T. Wailes, of Washington, as Ambassador to South Africa (Sept 15, 1954) *vice* Mr Waldemar Gallman, who had been appointed Ambassador to Iraq (see 13768 F).

Mr. Gerald A Drew, Director-General of the Foreign Service, as Ambassador to Bolivia *vice* Mr Edward J. Sparks (Oct. 11, 1954)

Mr Henry A Byroade, Assistant Secretary of State for Near Eastern, South Asian, and African Affairs, as Ambassador to Egypt *vice* Mr Jefferson Caffery, retiring after 43 years in the Foreign Service (Nov 26, 1954).

Mr John Davis Lodge, lately Republican Governor of Connecticut, as Ambassador to Spain *vice* Mr. James C Dunn (Dec 28, 1954). Mr. Lodge, a brother of Mr Henry Cabot Lodge (head of the U.S. delegation to the United Nations), was defeated in the Gubernatorial elections in November last by Mr Abraham Ribicoff (Democrat), the present Governor of Connecticut.

Mr James C Dunn, Ambassador in Madrid, as Ambassador to Brazil *vice* Mr James S. Kempner, who had resigned to resume his business career (Dec 28, 1954). One of America's leading diplomats, Mr Dunn had been Ambassador in Paris and Rome before going to Madrid

Mr Robert Hendrickson, formerly Republican Senator for New Jersey, as Ambassador to New Zealand (Jan. 12, 1955).

Mr. John Sherman Cooper, formerly Republican Senator for Kentucky, as Ambassador to India *vice* Mr. George V Allen, who had been appointed Assistant Secretary of State for Near Eastern, South Asian, and African Affairs in succession to Mr. Byroade (Jan. 27) Mr. Sherman Cooper was well known in Congress as a "liberal" Republican

Mr. Homer Ferguson, formerly Republican Senator for Michigan, as Ambassador to the Philippine Republic *vice* Admiral Raymond A. Spruance (March 11). Mr. Ferguson was formerly chairman of the Senate Republican policy committee.

Mr William Lacy, Counsellor at the U S. Embassy in Manila, as Ambassador to the Republic of Korea *vice* Mr. Ellis O. Briggs, who was appointed Ambassador to Peru (March 28).

Mr. Frederick Reinhardt, Counsellor at the U S Embassy in Paris and American political adviser at Supreme Headquarters, Allied Powers in Europe, as Ambassador to South Vietnam *vice* Mr. Donald Heath (April 13), who had been appointed Ambassador to the Lebanon It was explained that Mr. Reinhardt would be the principal U S. diplomatic officer in Vietnam, whilst General J Lawton Collins would continue as special U S representative with the personal rank of Ambassador.

Mr. Edward J. Sparks, lately Ambassador to Bolivia, as Ambassador to Guatemala *vice* Mr. Norman Armour, retiring (May 6).

Mr. Selden Chapin, Ambassador to Panama, as Ambassador to Persia *vice* Mr Loy Henderson, who had been appointed Deputy Under-Secretary of State for Administration in the State Department (May 20). Mr. Chapin, a career diplomat for 30 years, had previously served as Ambassador in Budapest and The Hague

Mr. Richard Lee Jones, head of the Foreign Operations Administration in Liberia, and vice-president of a Chicago department store, as Ambassador to Liberia *vice* Mr Jesse D. Locker (May 20), who had died some weeks previously Mr. Jones, like his predecessor at the Monrovia Embassy, is a Negro.

Mr. Robert H. Thayer, a member of the Operations Co-ordination Board of the National Security Council, as Minister to Rumania *vice* Mr Harold Shantz (Aug 18).

Mr. John E. Peurifoy (48), the U.S. Ambassador to Siam, was killed in a car crash on Aug. 12, together with his nine-year-old son. Mr. Peurifoy had succeeded Major-General William K. Donovan as Ambassador in Bangkok in September, 1954. He had previously been Ambassador to Greece and Guatemala.—(New York Times - New York Herald Tribune)

(Prev. rep. Foreign Service, 13768 F.)

A. GREECE - TURKEY - UNITED KINGDOM. — Opening of London Conference on Eastern Mediterranean Problems and Cyprus Question.

Sir Anthony Eden informed the House of Commons on June 29 that H.M. Government had invited Greece and Turkey to a conference on strategic and other problems affecting the three countries in the Eastern Mediterranean, at which the Cyprus question could also be discussed. His statement was worded as follows:

"H.M. Government have been giving further consideration to the strategic and other problems affecting alike the United Kingdom, Greece, and Turkey in the Eastern Mediterranean. They consider that the association of the three countries in that area, based on mutual confidence, is essential to their common interest. H M. Government accordingly invite the Greek and Turkish Governments to send representatives to confer with them in London at an early date on political and defence questions which affect the Eastern Mediterranean, including Cyprus.

The Government very much hope that the Greek and Turkish Governments will accept this invitation. The terms of the invitation are not restricted, and it is our intention that there should be no fixed agenda and that these discussions should range widely over all the questions involved. The discussions will be without prior commitment by any party."

The convening of the tripartite conference was welcomed by Mr. Attlee (Leader of the Opposition) and Mr. Clement Davies (the Liberal leader).

The Turkish Government announced its acceptance of the British invitation on July 2. The Greek Government's acceptance was announced on July 5 by M. Stephanopoulos (the Greek Foreign Minister), who was then in Strasbourg for a meeting of the Council of Europe's Consultative Assembly at which he had had discussions with the British Foreign Secretary, Mr. Macmillan.

The tripartite conference opened at Lancaster House in London on Aug. 29. It was agreed that Mr. Macmillan would act as chairman and that regular communiqués would be issued, although the proceedings would be confidential.

Prior to the opening of the conference, it had been announced that the British delegation would be headed by Mr. Macmillan and that its other members would include Mr Lennox-Boyd (Colonial Secretary), Mr Hopkinson (Minister of State, Colonial Office), Lord Carrington (Parliamentary Secretary, Ministry of Defence), Sir Charles Peake (H M Ambassador in Athens), Sir James Bowker (H.M. Ambassador in Ankara), Sir Robert Armitage (Governor of Cyprus), Air Marshal Sir Ronald Ivelaw-Chapman (Vice-Chief of Air Staff), and Lieut.-General W. P Oliver (Vice-Chief of Imperial General Staff)

The Greek delegation was headed by M Stephanopoulos and included M. Kanellopoulos (Minister of Defence) and the Greek Ambassadors in London and Washington. The Turkish delegation was headed by M Zorlu (acting Foreign Minister and Minister of State) and included M. Ethem Menderes (Minister of Defence), the Turkish Ambassadors in Athens and Bonn, and the Chargé d'Affaires in London.

Representatives of Greek Cypriot organizations and of the Turkish minority in Cyprus were also present in London while the conference was in session. The Greek Cypriots were led by the mayors of Famagusta and Lanarka, and the Turkish Cypriots by Dr Sazil Kuchuk, leader of the Turkish community in the Colony

Archbishop Makarios, head of the Greek Orthodox Church in Cyprus and leader of the movement for *enosis* (union with Greece) in the island, visited Athens from July 11-17 for talks with M. Stephanopoulos and other Greek Ministers, during which he presented a memorandum setting forth the views of the Cyprus Ethnarchy on the forthcoming tripartite conference. In a press statement in Athens on July 16 he said that he disagreed with the Greek Government's "tactics" on the Cyprus question, and that he would have preferred (1) that an immediate appeal had been made to the United Nations, and (2) that the Greek Government had accepted the invitation to a tripartite conference only after the British Government had given an undertaking to grant self-determination to Cyprus The Archbishop expressed the opinion that the London conference was "a trap aimed at torpedoing recourse to the United Nations," and declared that "the people of Cyprus will never accept any decisions of the London conference which do not accord with their rights and aspirations, even if those decisions are endorsed by the Greek Government." In a sermon in St. John's Cathedral, Nicosia, on Aug. 26, Archbishop Makarios reiterated that the decisions of the London conference would only be regarded as binding "if they conform to the will of the people of Cyprus."

On the other hand, the *enosis* campaign was strongly denounced by Dr. Sazil Kuchuk, leader of the Turkish community in Cyprus, in a press statement on Aug. 26 after his arrival in London.

Dr Kuchuk said: "A handful of ambitious adventurers in Cyprus, using Hitlerite methods of propaganda, have concocted a so-called 'Cyprus question.' Unless Greek ambitions are stopped, they could bring about a third world war . . Cyprus was never Greek Historically it is Turkish and geographically a part of Turkey . Britain has neither the legal nor the moral right to hand over Cyprus to any other nation than Turkey should she decide to leave the island The terrorist activities in Cyprus are carried out by a handful of terrorists, egged on by Greece, who threaten with death those who have the island's best interests at heart It is the duty of Britain to stamp out this terrorism"

The following statement on the Cyprus question was issued on Aug. 24 by the Turkish Prime Minister, M. Adnan Menderes, before the Turkish delegation left Istanbul for the London conference:

". . The Cyprus issue has artificially reached an acute state during the past two years, at a time when a number of other and more important world-wide issues have been causing much concern to responsible statesmen As a result of deliberate and systematic incitement, the situation in the island has greatly deteriorated, and there is a rumour that disturbances may take place which may lead to a massacre of the Turkish population We trust that the local authorities are taking the necessary steps to meet the situation, but I wish to assure the Turkish population that whatever happens they will not be left unprotected

It is said that the majority of the population in Cyprus is Greek, but this majority criterion in a given area cannot override other geographical, political, economic, and strategic considerations At the time of the Lausanne conference Turkey proposed a plebiscite for Western Thrace, but Greece refused it To-day Greece relies on the majority issue. After obtaining Crete and other islands, Greece attempted after the First World War to conquer Anatolia; surely that attempt was not based on the 'majority of population' argument We are anxious to continue Turco-Greek co-operation and friendship on the basis established by the late Atatürk and Venizelos, but the events of to-day remind us of the dangers for our national existence which manifested themselves at that time.

The Greek Government, like any other Government, may be faced with troubles and difficulties, but these should be met in a manner not disturbing to the safety of their neighbours or world peace The Turkish Anatolian coast is to-day surrounded by the advanced posts of a foreign Power [i e the Soviet Union], and Cyprus is the only area free from this danger. Consequently, the Turkish thesis which will be put forward at the London conference is that the maintenance of the *status quo* is the minimum acceptable to Turkey If a change occurs in the status of the island, it should revert to Turkey.

The pressure exerted by irresponsible persons in the Greek Government has been going on for months, but there are limits to the forbearance that one may feel for such tactics. We cannot understand how a Government can treat a provincial cleric like an independent State and bow to his wishes. I want to emphasize that neither to-day nor tomorrow could we accept a status for Cyprus incompatible with the interests of Turkey"

The leaders of the two principal Opposition parties in Turkey —the People's Party and the National Party—fully endorsed M. Menderes's declaration.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Cyprus, 14394 A.)**

B. AUSTRIA. — Agreement on Compensation for Jewish and non-Jewish Victims of Nazi Persecution.

After negotiations which had lasted for 2½ years and had repeatedly broken down, agreement was reached on July 18 between the Austrian Chancellor, Dr. Raab, and the president of the World Committee for Jewish Claims, Dr. Nahum Goldmann, on the settlement of Jewish compensation claims for victims of the former Nazi régime in Austria who were now living abroad.

The agreement provided that the Austrian Government would for 10 years make payments into a fund for the relief of such victims, up to a total of 550,000,000 schillings ($22,000,000). Out of this fund, former Austrians now resident abroad, irrespective of their present nationality, would receive compensation grants ranging from $1,500 to $3,000 per person according to need, no distinction being made between Jews (estimated at 95 per cent of the persons concerned) and non-Jews

Earlier Austrian legislation had already provided for special relief payments to Jewish victims of Nazism living in Austria, whilst other Austrian laws had enabled Jewish victims to recover the property and businesses taken from them during the period of Nazi rule. The difficult question of heirless Jewish property (i.e., property belonging to families which had been completely wiped out in Nazi concentration camps) was settled by the Austrian State Treaty, which laid down that all such property in Austria must be allocated to a fund for victims of political persecution in that country.

The World Committee for Jewish Claims stated on July 19 that the amount available for Jewish victims under the new agreement and the earlier Austrian relief legislation would exceed $40,000,000, and that it was estimated that it would benefit 15,000-17,000 needy Jewish families now living in the U.S.A., Britain, and Israel.—(Wiener Zeitung - New York Times - World Jewish Affairs) **(Prev. rep. 12419 A.)**

A. AVIATION.—Military and Civil Aircraft Developments in Britain, the U.S.A., France, and Canada. - Report of Court of Inquiry on "Comet" Airliner Disasters. - B.O.A.C. Order for 20 New "Comets." - Experiments with Vertical Take-off Aircraft. - The "Flying Bedstead," "Flying Platform," etc. - Canadian "Flying Saucer" Project.

A number of developments of new military and civil aircraft and aero-engines in Britain, the United States, France, and Canada, details of which were published in the British, American, French, and Canadian Press, are summarized below under cross-headings.

British Military Aircraft.

Supersonic Fighters. Britain's first interceptor fighter capable of exceeding the speed of sound in level flight, the English Electric *P-1* powered by Armstrong Siddeley *Sapphire* turbo-jet engines, flew for the first time on Aug. 4, 1954. It was announced that 20 pre-production aircraft had been ordered to shorten the development period.

The second U K aircraft capable of level supersonic speed—the *Fairey Delta 2*—made its maiden flight on Oct 6, 1954 This aircraft, a single-seat mid-wing design of all-metal construction, has very thin dart-shaped wings and an elongated fuselage which can be lowered in flight to give the pilot a good forward view, it is powered by a Rolls-Royce *Avon* jet engine

The "Gnat." Mr Selwyn Lloyd, then Minister of Supply, announced on March 24, 1955, that an order for a number of *Gnats* for development purposes had been placed with the Folland Aircraft Company The *Gnat* (powered by a Bristol *Orpheus* jet engine) was first envisaged as an interceptor aircraft because of its rate of climb and performance at high altitudes, but can also be employed as a fighter-bomber; it is a development of the Folland *Midge*, which in level flight has a top speed of over 600 m p h and has dived at supersonic speed.

The "Sherpa." It was announced by Short Bros and Harland (Belfast) on Oct 6, 1953, that the *Sherpa*, a research aircraft designed as a forerunner of planes intended to fly at high speed at altitudes of over 60,000 feet, had made its first flight It had earlier been announced that the *Sherpa* embodied a revolutionary wing structure, known as the "aero-isochnic" wing, designed to prevent the form of instability caused when a normal swept-back wing bent upwards under the pressure of air loads The aircraft was produced as part of the company's own research programme and not under a Ministry of Supply contract It was explained that the "aero-isochnic" wing could be used either for fighters or for civil aircraft

New Bomber Types. The second Avro *Vulcan* delta-wing bomber, powered by Bristol *Olympus* jet engines (as opposed to the first *Vulcan* which used Rolls-Royce *Avon* engines), made its first flight on Sept 3, 1953

The *Valiant B* (Mark II), a new version of the Vickers-Armstrong *Valiant* swept-wing jet bomber powered by four Rolls-Royce *Avon* engines, made its maiden flight on Sept. 4, 1953

It was announced on July 30, 1954, that a new type of the English Electric *Canberra* twin-jet bomber, known as the *B8* and powered by more powerful Rolls-Royce *Avon* engines, had made its first flight a week earlier. The plane is designed for two roles—long-range intrusion at night to attack ground targets, and high-altitude bombing Unlike the usual *Canberra* bombers, which are unarmed, the night intruder version is fitted with forward-firing armament which can be controlled by the pilot It was stated that this version of the *Canberra* was also being made under licence in the United States by the Glenn Martin Company.

Delta-wing Fighter-Bomber. It was announced on Feb 11, 1954, that a new Avro delta-wing jet fighter-bomber would be developed from the Avro *707* delta-wing jet research aircraft It was designed to meet NATO requirements for a lightweight, inexpensive, ground-attack jet aircraft, with supersonic combat performance, capable of operating from temporary airstrips in close support of ground forces Its cost would be less than a third of conventional fighters and it would be able to carry a heavy load of rockets, cannons, and bombs.

The "Seamew." Details of a new type of anti-submarine aircraft were disclosed on Aug 31, 1953 The plane, built by Short Bros and Harland and known as the *Seamew*, is powered by a *Mamba* airscrew-turbine It can be mass-produced comparatively cheaply, carries a crew of two, and has special electronic search equipment and anti-submarine weapons It was specifically designed for operating from light escort carriers, merchant vessels fitted with flight decks, and short coastal airstrips.

Transport Planes. The Secretary of State for Air (Lord De L'Isle and Dudley, V.C.) announced on June 23, 1954, that the *Vickers-1000* (see 12904 A) would replace the *Hastings* as the Army's transport aircraft, and that the Government had placed a "sizeable order" He added that the *Vickers-1000* could carry 120 troops with their equipment for distances of up to 2,500 miles, that it would be fitted with an internal lift and other special devices to enable it to be used for freighting, and that a further order had also been placed on behalf of the Royal Air Force for the Blackburn *Beverley* (the largest freight aircraft yet produced in Britain), which weighed 60 tons and could carry a load of about 20 tons.

"Prone Pilot Meteor." The first British jet aircraft to be flown by a pilot lying in the prone position, with body, head, and elbows supported by shock-absorbing "cushions," made its maiden flight on Feb. 10, 1954. The aircraft is an adapted Armstrong Whitworth night-fighter version of the *Meteor* interceptor, and the object of using the prone position is to reduce the effect of the great gravitational forces to which a pilot is subjected when flying at very high speeds

Jet Deflection. The Westland Aircraft Company (Yeovil) announced on Feb. 14, 1955, that tests had been carried out of the first British aircraft equipped with jet deflection—a method of obtaining lift from the thrust of an aircraft's engines instead of solely from its wings By deflecting the blast from its jet engines downwards, the plane—a *Meteor* fighter using Rolls-Royce *Nene* engines—was able to take off with a shorter run and to land at a lower speed, it was stated that when using 60 per cent thrust during the approach to land, the approach and stalling speeds were reduced by as much as 20 per cent It was subsequently announced that, following further experiments, the plane had been handed over to the Royal Aircraft Establishment for "ultra-slow" speed tests

On June 10 it was announced that the Bristol Aeroplane Company and the *Société Française d'Etudes et de Construction de Moteurs d'Aviation* (S N E C M A), one of the French national aircraft companies, had entered into a licence agreement under which the B A C. had secured rights to the French company's jet deflector and reverser device for application to the Bristol range of gas-turbines.

Rocket Motors. It was announced on Aug 22, 1955, that, with the approval of the British and U S Governments, Rolls-Royce Ltd and North American Aviation Inc. had entered into an agreement which would enable the British company to manufacture under licence rocket propulsion systems designed by the U.S company The agreement, which was for 10 years, also provided for the exchange of technical information on engineering and manufacturing developments relating to rocket motors, particularly in their application to guided missiles

Details of the use of British liquid-propellent rocket motors in aircraft (as opposed to their use in guided missiles) had been given on April 28, 1955, when the de Havilland Engine Co and Armstrong Siddeley Motors announced impending flight trials of two rocket motors which they had developed, the *Spectre* and the *Screamer* According to the announcements, rocket motors would be used to give interceptor fighters more height, manoeuvrability, and speed, and their great advantage lay in the fact that they were entirely independent of the atmosphere and could therefore maintain their thrust at extreme altitudes, or even in outer space where no other type of engine could operate Theoretically, they could operate from sea-level to infinite height because their power increased as the altitude increased, in practice, however, they would be used as a take-over source of power from the jet turbine when additional climb, height, and speed were needed in combat.

Early in 1955, it was stated, the *Super Sprite* (also produced by the de Havilland Co.) had become the first rocket motor to pass the Ministry of Supply's test and so to qualify for quantity production and general service use Details of the *Super Sprite* had been released on Aug 19, 1953, when it was pointed out that an important feature was the solid catalyst which broke down hydrogen peroxide into steam and oxygen which provided the thrust; additional energy—which could be used either to increase thrust or to prolong the rocket's operation—was created by injecting petrol or kerosene into the thrust stream.

On July 30, 1954, Mr. Duncan Sandys (then U.K. Minister of Supply) had informed the House of Commons that the British and U.S. Governments had approved arrangements for closer collaboration in the development of guided missiles, which were "urgently needed for the common defence."

British Civil Aircraft.

The Avro "Atlantic" Airliner. It was announced on June 11, 1953, that Britain's first delta-wing civil airliner, the *Atlantic*, had reached the project stage. A development of the Avro *Vulcan* bomber, the *Atlantic* was designed to fly non-stop from London to New York in under seven hours, carrying 76-131 passengers at more than 600 m.p h. at an altitude of over 40,000 feet. Passenger accommodation will be forward of the noise-cones of the jets

The "Viscount" Airliner. It was announced on Nov. 11, 1954, that agreement had been reached between the British Air Registration Board and the U S. Civil Aeronautics Administration on conditions for the validation of the *Viscount* in the U.S.A. A few weeks later (Dec. 2) Capital Airlines, the U S. operators, exercised their option to order a further 20 *Viscounts*, bringing the total value of the contract, with spare parts, to $67,000,000 (about £24,000,000) The managing director of Vickers-Armstrongs' aircraft division, Mr. G. R. Edwards, stated on May 17, 1955 (the date on which the first of the *Viscounts* for Capital Airlines was handed over) that 55 *Viscounts* had so far been delivered, 97 would have been produced by the end of 1955, 71 would be produced in 1956, and the current production orders for 200 aircraft would be completed by the middle of 1957.

Further orders for *Viscounts* were announced during recent months as follows. Trans-Australian Air Lines, 4; K.L.M. (Royal Dutch Airlines), 9; B O A C, 12; Indian Airlines, 5, U.S. Steel Corporation, 3, Standard Oil Co. of California, 1; Howard Hughes Tool Co. of Delaware, 1. The order from the K L M was particularly notable, since it was the first substantial order placed by the company with the British aircraft industry.

The "Comet" Airliner. - Report of Court of Inquiry. The Court of Inquiry into the *Comet* disasters near Elba and Naples in 1954 (see 13486 A and 13549 A) sat under the presidency of Lord Cohen (a Lord of Appeal) from Oct. 19 to Nov 24, 1954, and published its report on Feb. 12, 1955 Three assessors had been appointed by the Lord Chancellor: Sir William Farren (a former director of the Royal Aircraft Establishment), Professor W J. Duncan (Mechan Professor of Aeronautics and Fluid Mechanics at Glasgow University), and Air Commodore A H. Wheeler (Officer Commanding the Ministry of Supply's Aeroplane and Armament Experimental Establishment at Boscombe Down, Wiltshire).

Among the main evidence given during the inquiry was that presented by Sir Arnold Hall, the present director of the Royal Aircraft Establishment where exhaustive investigations had been carried out with a view to reconstructing the actual disasters These investigations—described by Sir Lionel Heald, representing the Crown, as "one of the most remarkable pieces of scientific detective work ever done"—included a novel method of testing a whole *Comet* immersed in a huge water tank and subjected to heavy pressures.

In his report, Lord Cohen stated that he had "unhesitatingly" reached the decision that the first disaster, near Elba, had been caused by the structural failure of the pressure cabin, brought about by metal fatigue. Although it had been impossible to recover any appreciable wreckage from the second disaster, and therefore to give a positive verdict on its cause, in view of the similarity of the circumstances it was "at least possible" that the cause of the Naples disaster had been the same Lord Cohen found that neither accident had been due to any wrongful act, default, or negligence He accepted the view of the R A.E. that the structural failure was due to metal fatigue, and rejected the other explanations put forward at the public inquiry. He also approved decisions made by the Air Registration Board—announced during the inquiry on Nov. 13—regarding further requirements to be met before certification of prototypes, these included the need for complete cabins of pressurized aircraft to undergo water-tank tests, for entire components to be made available for fatigue testing, and for at least two airframes of each prototype to be provided—one for static testing and the other for fatigue testing.

During his evidence Sir Arnold Hall reported that the R A E. had "formed the opinion that the accident at Elba was caused by structural failure of the pressure cabin," and added that the low-fatigue resistance of the cabin had been demonstrated. Tests had shown that, in view of the age of the plane at the time of the accident, there was a distinct risk of fatigue failure arising In addition to the water-tank pressure tests, another *Comet*, manned by more than 20 scientists, had carried out experimental flights for more than 100 hours under conditions as near as possible to those known to exist at the time of the crash.

An experiment had also been carried out with a scale model of the pressurized cabin, fitted with scale seats and dummy passengers. The model had been placed in a pressure chamber under conditions simulating an altitude of 40,000 feet, and had then been charged with air at 8¼ lb above external pressure The cabin had burst at the top near the point where the Elba-disaster *Comet* was believed to have burst, with substantially the same kind of hole. Photographs of the experiment showed that 6/1000ths of a second after the burst no particular disturbance had occurred in the cabin. After 1/30th of a second some of the seats had begun to move forward, and after 1/10th of a second complete chaos had developed in the cabin, one then saw the dummy passengers hitting the roof and seats flying about in all directions Sir Arnold, who said that some photographs showed dummy passengers going straight through the hole in the cabin "without touching," believed that something like this had happened in the actual disaster.

At the conclusion of his evidence, Sir Arnold Hall gave it as his view that there was no inherent defect in the *Comet* airliner and that, provided a thicker gauge skin was used and there was some strengthening of the fuselage and wings, there was no reason why the *Comet*—which was a "safe aircraft, well designed and well made"—should not go back into service and have a "very successful career"

In a joint statement issued on March 17, 1955, by the de Havilland Aircraft Company and B O.A C., it was announced that the latter had decided to buy 20 *Comet* aircraft of an entirely new type—a Mark IV fitted with *R.A 29* Rolls-Royce engines The Mark IVs, delivery of which would start in 1958, would carry 58 first-class passengers on a stage flight of 2,870 miles, against a headwind of 50 m p.h., and would be faster than the earlier *Comets*. The structural design improvements to be incorporated were the result of research carried out at the Royal Aircraft Establishment, and of the findings of the Court of Inquiry.

The "Britannia" Airliner. The first production model of the *Britannia* airliner (Mark 100) carried out high-altitude and tropical trials in Africa from March 13-April 13, 1955. The journey out to Johannesburg (6,070 statute miles) was completed in 17 hr. 24 min., although the actual flying time was only one minute better than the *Comet's* record, the elapsed time of 18 hr 52 min compared with the *Comet's* 21 hr. 40 min. The chairman of B.O.A.C., Sir Miles Thomas, said that the *Britannia* had made a very good impression and that it was hoped to have six in service by the summer of 1956, starting with the London-Johannesburg route

The Bristol Aeroplane Company announced on March 17 that Israel Airlines (*El Al*) had decided to acquire three *Britannia* airliners (Mark 300 LR) and had asked for an option on a further two. The Mark 300 LB, a development of the Mark 100, is powered by *Proteus* engines and has increased pay-load capacity and range.

U.S. Military and Civil Aircraft.

Military Aircraft. It was announced on April 15, 1955, that further research on the U S Air Force's new *F-102* interceptor fighter had enabled it to reach a speed of 800 m.p h Intended as a front-line interceptor for defence purposes, this delta-wing plane, is able to operate in all kinds of weather and will be armed with *Falcon* guided missiles, which, it is claimed, can "destroy any enemy bomber in the world"

On Aug 25, 1953, it had been announced that the *B-36*, the world's heaviest known bomber, could carry a *Thunderjet* fighter in its bomb bay, release it, and retrieve it in flight; both aircraft were also equipped for refuelling in flight from tanker planes On Oct 14, 1954, the U S A F stated that it had ordered 'initial production" of its first supersonic bomber—the Convair *B-58*, a medium-weight development of the heavy *B-52* which itself had a range of about 6 000 miles

The Boeing "Stratoliner." The first U.S. jet airliner, the Boeing 707, to be known as the *Stratoliner*, made its maiden flight on July 15, 1954, and later made further test flights at over 42,000 feet and at speeds "above four-fifths the speed of sound." It was stated on Sept. 17 that the *Stratoliner*—popularly regarded as the U S answer to the British *Comet*—would be capable of carrying 80-130 passengers on regular non-stop New York-London flights of under seven hours It is powered by four Pratt and Whitney *JT-3L* engines, each of 10,000 lb thrust, suspended from the swept-back wing

The Douglas "DC-8." The Douglas Aircraft Company announced on June 7, 1955, that it had under construction a jet transport plane, the *DC-8*, which would be ready for flights between the U S A and European cities in 1959. The plane, which would be of swept-wing design, would be powered by four Pratt and Whitney *J-57* jet engines, and would carry 80-125 passengers at speeds of up to 550 m.p.h

The Lockheed "Electra." An American challenge to the British *Viscount* turbo-prop airliner—the *Electra*—was announced by the Lockheed Aircraft Corporation on June 9, 1955. The plane, which was said to have a cruising speed of 400 m.p.h., will initially be powered by four *Allison Model 501* engines, will have a range of 2,000 miles, but will also be operationally-economical over short- and medium-range routes Delivery of a 65-seat version of the *Electra* (an order for 35 of which had already been placed by one of the largest U S domestic operators, American Airlines) is expected to begin in 1958

French Military and Civil Aircraft.

Military Aircraft. A new French aircraft, the *Vautour* ("Vulture"), broke the sound barrier—being the first French plane to do so—on June 30, 1953. The manufacturers, the *Société Nationale de Constructions Aéronautiques du Sud-Ouest* (S N.C A S O.), were said to have produced three versions of the *Vautour*—a night fighter, a ground-attack aircraft, and a light two-engined bomber of which the French Government has ordered 70 units The *Vautour* is powered by two *Atar B* engines.

It was reported in August 1954 that the Marcel Dassault *Mystère 4N*, a night version of the *Mystère 4* fighter for which NATO offshore orders had been placed (see 13061 A), had recently flown for the first time. It was also reported that a prototype of the *Mystère 4B*, an improved version of the *Mystère 4*, had already flown many times The aircraft, 150 of which will be built for the French Government, is powered by a Rolls-Royce *Avon* jet engine with reheat, and is capable of exceeding the speed of sound in level flight A still more advanced version of the plane, the *Mystère 4B1*, or *Super-Mystère*, was shown during the annual *Salon de l'Aéronautique* held in Paris in June 1955; this machine also achieved supersonic speeds in level flight

During the Paris exhibition, the *Trident*, a new fighter manufactured by S N.C A S O, was demonstrated for the first time. Probably the fastest normal aircraft in the world, the *Trident* (a development of the *Triton*, the first French jet aircraft) has two Armstrong Siddeley *Viper* jet engines on the wing-tips and three rocket motors in the tail of the fuselage During its test flights it had broken the sound barrier, not only in a dive, but also—with rocket assistance—during a climb Also seen at the exhibition was the *Baroudeur*, manufactured by the *Société Nationale de Constructions Aéronautiques du Sud-Est* (S N C A S E); by taking off from a detachable trolley, this plane has the tactical advantage of not being dependent on normally prepared airstrips

Yet another French aircraft flown for the first time in public at the Paris exhibition was the *Leduc 0 21*, variously described as "a diabolically dangerous device" and as "something approaching engineering genius." The *Leduc 0.21*, which takes off from a *Languedoc* airliner, is known as the "flying stovepipe" by virtue of the fact that it has no moving parts but is a pipe into which fuel is steadily pumped and ignited while the air is rammed into it by the sheer speed of the aircraft. Planned to fly at twice the speed of sound, the plane is piloted from a glass cone-shaped cabin which, together with the metal ring to which it is attached, fits into the front of the tunnel-shaped body and which, if necessary, can be ejected in flight

Jet Airliners. It was announced on April 22, 1955, that the Beechcraft Company in the U.S.A. had obtained an option on the construction under licence of a French-designed aircraft, the *Morane Saulnier 760*. This plane, a four-seater, twin-jet, light transport with pressurized cabin, has a speed of 370 m.p h. at 26,000 ft. A new jet airliner, the S N.C A.S.E *Caravelle*, flew for the first time in May, 1955. The *Caravelle*, which is intended to carry up to 70 passengers at

about 480 m.p.h., is unique in that, while it is designed to use the complete nose section and control cabin of the British *Comet*, its two jet engines (Rolls-Royce *Avons*) will be housed not in the wings but in the pods on either side of the fuselage below, and just forward of, the tailplane. Earlier, in August 1954, it was announced that another medium-range jet airliner, the Hurel-Dubois *HD 45*, was also expected to begin flight tests in 1955 This aircraft, powered by *Avon* turbo-jets, is also unique in having a high wing braced by large struts.

Vertical Take-off Aircraft.

A number of experiments with machines capable of taking off vertically have been made in various countries, the published details being summarized below.

United Kingdom. Mr. Duncan Sandys (then Minister of Supply) announced on Sept 6, 1954, that, in conjunction with his Ministry, Rolls-Royce had constructed a research machine—popularly referred to as the "Flying Bedstead"—which, without the aid of wings or motors of any kind but using the vertical lift of downward-facing jet streams, had been able to take off from a normal horizontal position The following details of this machine were released by Rolls-Royce it weighed 3½ tons, was powered by two *Nene* engines discharging their jets downwards, and its movements were controlled by compressed air jets discharged through nozzles at the ends of the cross arms of the simple, light framework These air jets were regulated by the pilot sitting on a platform above the two engines and using a conventional control column and rudder bar It was stated that the machine had flown at heights of up to 25 feet.

United States. Two U S Navy fighter aircraft capable of taking off vertically (though not from a normal horizontal position) were made public on March 15, 1954 the *XFV-1*, built by the Consolidated Vultee Aircraft Corporation, and the *XFV-1*, built by the Lockheed Aircraft Corporation The *XFV-1*—later named the *Pogo*—has a delta wing, the two corners of which, together with two large fins, forms a base on which the plane rests for its vertical take-off; it is powered by a 5,850 h p Allison-built gas turbine engine driving two contra-rotating propellers. In a demonstration flight on Nov. 5, the *Pogo* flew at over 500 m.p h. and then backed straight down on to its tail. The *XFV-1* has a conventional wing with a mild sweep-back and stands on four fins, it also has an Allison turbo-prop engine. An official of the Lockheed Company said that the plane was "designed to perform a number of varied but still secret missions and to carry various kinds of armament, including atomic weapons."

Details of a number of machines designed to rise vertically from a normal horizontal position were released in the first six months of 1955. They were of three kinds—those lifted by rotor-propellers (similar to a helicopter), another lifted purely by jet engines (similar to the British "Flying Bedstead"), and a third using a new principle of lift and propulsion known as the "ducted fan."

The first kind included the Bell *XV-3*, the McDonnell *XV-1*, and a plane built by the Transcendental Aircraft Corporation The *XV-3*—designed specifically with a view to increasing military mobility—has a three-bladed rotor-propeller mounted on a mast at the end of each of its two fixed wings; these act as helicopter lifting rotors during take-off, landing, and low-speed flight, and can then be tilted through an arc of 90 degrees to serve as aeroplane propellers for higher-speed flight. During the conversion from vertical to horizontal flight—taking about 15 seconds—the lift load of the plane is designed to be borne by the fixed wings The *XV-1*, which is designed to carry three passengers, has a single three-bladed rotor-propeller on top of its fuselage, powered by small pressure jets at the top of each blade, its forward flight is achieved by means of another propeller installed in the rear of the fuselage. The Transcendental plane is similar to the *XV-3* in that conversion from vertical to horizontal flight is brought about by tilting the rotors at the end of each wing

The plane using jet thrusts to lift it off the ground was also built by the Bell Aircraft Corporation. Known as the "Magic Carpet." it is powered by two Fairchild *J-44* jet engines which not only eject air downwards from the wing-tips and the tail to lift it vertically, but can be tilted so as to direct the thrust for the purposes of horizontal propulsion. The plane has no wheels and is piloted from an open cockpit

The third kind of machine, which was manufactured for the U S. Navy by the Hiller Helicopter Company, was said to have made its first flight on Feb 4, 1955. Variously described as "an airborne manhole cover" and "a cast-iron stew-pot on four short legs," but officially known as the "Flying Platform," the device is about six feet in diameter and 30 inches high, and can be flown by a man standing in the centre of the platform, the directional flight of which is altered by the pilot leaning in the direction he wishes to go. The "ducted fan" mothod of lift and propulsion is achieved by two propellers rotating in opposite directions, sucking air through holes in the platform and supplying a downward thrust to give the vertical lift Enclosed in a circular casing which protects the pilot from the blades, the propellers are powered by separate engines which together develop less than 100 h.p. The U.S Navy announcement giving details of the "Flying Platform" said that its flights had indicated that the methods employed had possible application in larger vertical flight aircraft.

France. As early as April, 1953, it was announced by S.N.C.A S.O. that the first French combined helicopter and aeroplane—known as the SO-1310 *Farfadet*—had been completed and would shortly make its test flights. According to the announcement, the *Farfadet* has two independent jet engines, one powering the plane in ordinary flight and the other driving the helicopter rotor-blades mounted on top of the fuselage It is capable of carrying a pilot, an assistant, and three passengers at a cruising speed of about 180 m.p.h.; eventually, however, it is expected that a larger model capable of carrying 20-30 passengers will be built.

Towards the end of 1954 details of a new design-principle for a vertical take-off aircraft were made public by another nationalized aero-engine company, S.N.E.C.M A. Known as the *Coleoptère* ("Beetle"), the design is a development of a principle evolved by the *Bureau Technique Zborowski*, and is the first example to be made known of an aircraft in which the power plant and the airframe were closely integrated. The essential feature of the *Coleoptere* is an annular wing which surrounds the engine and, in addition to acting as the lifting surface, serves as the housing for the power plant. The annular wing, being tubular in form, was said to be intrinsically one of the stiffest and lightest structures known to engineering, to cause less drag than any conventional shape, and to give excellent manoeuvrability and a high rate of climb. The main fields of application foreseen for the *Coleoptère* were as a supersonic interceptor, for certain types of guided missile, and for high-speed ground support aircraft; they could be single- or multi-engined, jet or airscrew. Among projects envisaged by the B T Z. were the *Charençon VI*, a pilotless interceptor, said to be capable of climbing to 2,000 metres in about two minutes and of achieving a speed of more than 1,300 m.p.h., a civil *Coleoptère*; and a *Bruche* piloted ground-attack machine powered by an *Atar 101* turbo-jet fitted with reheat and a ram-jet engine, and capable of a maximum speed of 900 m.p.h.

Canadian "Flying Saucer" Aircraft.

Reports that an attempt had been made in Canada to build a "Flying Saucer" type of aircraft were confirmed on Dec. 2, 1954, by the Canadian Minister of Defence Production, Mr. C. D. Howe, who added, however, that the project had been dropped. "We did engineering on it," said Mr. Howe, "and proved to ourselves that it would fly, but we did not carry it to the mock-up stage because it did not seem to have any useful purpose."

A description of the machine (which was then thought to be in an advanced stage of design at the Avro Canada works at Malton, near Toronto) had been published in the *Toronto Daily Star* and in the *Royal Air Force Review* during the early months of 1953. Said to be nearly circular in shape and to measure about 40 feet across, it was described as being designed to attain level speeds of about 1,500 m.p h and to take off vertically from a tripod-type launching chassis. The pilot was to be seated in a central plastic capsule around which a gas-turbine power plant of unconventional design would rotate at several hundred revolutions a minute; surrounding the rotating power plant and forming the "rim" of the saucer would be the stationary wing, with a series of slot intakes in the leading edge to feed air to the turbine Part of the air intake would be compressed, fed to combustion chambers in the wing, and ejected through a series of exhaust orifices lining the outer rim of the disk; the remainder of the air inflow would be fed over a series of vertical deflector vanes for control purposes The article in the *Royal Air Force Review*, which said that it was claimed that the "saucer" would make 180-degree turns in flight without changing altitude, concluded. "There are very real design reasons for adopting saucer-like shapes. When speeds of the order of twice the velocity of sound are considered, drag is primarily dependent upon the thickness/chord ratio of the wing, and the circular disk offers an acceptable solution to the problems involved."

A spokesman of the Canadian Defence Department stated on Dec. 3, 1954, that, if the "Flying Saucer" project had been carried to completion and to the production stage, the cost would have been about $100,000,000; in fact, however, only a minute fraction of that amount had actually been spent.

The *Globe and Mail* (Toronto) reported on Aug. 23, 1955, that, under a contract said to have been completed several months earlier, the U.S. Government had undertaken to finance the continued development in Canada of the "Flying Saucer" project, which had accordingly become the exclusive property of the U.S. Air Force.—(Times - Manchester Guardian - Daily Telegraph - Financial Times - New York Times - New York Herald Tribune - Le Monde, Paris - Globe and Mail, Toronto) **(Prev. rep. U.K. Aircraft Industry, 12707 A; "Comet" Disasters, 13549 A; 13486 A; "Viscount" Orders, 13765 C; The "Vautour," 12541 A.)**

A. INDIA. — Pondicherry State Elections.

The first elections for a new Legislative Assembly in Pondicherry State since the *de facto* transfer of the former French Settlements to Indian rule took place on July 18-23 and resulted in a victory for the Congress Party, the results being as follows: District Congress 20; People's Front 16; Independents 3. The Pondicherry National Congress and the Tillers' Party failed to obtain any seats. The District Congress was backed by the official Congress Party in India, whilst the People's Front comprised the Communists and Left-wing groups, as well as some Independents.—(The Hindu, Madras) **(Prev. rep. Pondicherry, 13857 A.)**

A. WESTERN GERMANY. — Split in Refugee Party.

The two representatives of the Refugee Party (B.H.E.) in Dr. Adenauer's coalition Government, Professor Theodor Oberländer and Herr Waldemar Kraft, announced on July 11 that they had left the party's parliamentary group in the *Bundestag*, that they had also tendered their ministerial resignations to the Federal Chancellor, and that Professor Oberländer had relinquished the chairmanship of the party. Professor Oberländer is Minister for Refugee Questions, whilst Herr Kraft is Minister without portfolio for special tasks.

The decision of the two Ministers to leave the parliamentary group was the result of internal dissensions which had been evident in the Refugee Party for over a year, and in which 18 of the party's 27 deputies in the *Bundestag* (including the two Ministers), of Right-wing tendencies, had been opposed to the Left-wing policies advocated by the remaining 14 members. The differences between the "13 group" and the "14 group" had led to an open split at the election of the parliamentary party's executive on March 15 last, when Dr. Karl Mocker was elected chairman of the executive by the "14 group" after the two Ministers and their 11 supporters had left the meeting in protest.

In a statement issued on July 11, Professor Oberländer explained that he could no longer carry on within the party in view of the "political tensions and personal insufficiencies" which had come to the fore He also referred to the fact that, contrary to party instructions, four of the party's deputies in the *Bundestag* had signed the Social Democratic appeal to the Federal Constitutional Court against the Saar agreement (see 14331A); that half the members had voted against the estimates for Herr Kraft's Ministry; and that there had been "continual criticism" of his (Professor Oberländer's) own policy. Herr Kraft, in a similar statement, asserted that the party had dissolved itself into *Land* organizations pursuing opposing policies

The Refugee Party in Bavaria, which was previously affiliated to the Christian Social Union, decided after the last *Land* elections to participate in a coalition under the leadership of the Social Democrats In Hesse, similarly, the Refugee Party entered into a coalition Government with the Social Democrats. In Lower Saxony, however, the party is now participating in a coalition Government with the Christian Democrats, Free Democrats, and German Party, although it had previously co-operated with the Social Democrats (see 14022A, 14339A).

Six further Refugee Party deputies left the parliamentary group on July 12, and a seventh on July 14. Two of these joined the Free Democrats, whilst the other seven, including Professor Oberlander and Herr Kraft, formed a special "Oberländer-Kraft" group and were accepted by the Christian Democratic parliamentary party as *Hospitanten* ("guests").

The remaining 18 Refugee Party deputies decided to continue their association as a parliamentary group, whilst a national executive meeting called to consider the crisis appointed the party's deputy-chairman, Herr Friedrich von Kessel (Minister of Agriculture in the new Lower Saxony *Land* Government—see 14339 A) as acting chairman in the place of Professor Oberländer. On July 23 the party's national executive decided to withdraw from Dr. Adenauer's coalition Government. No decision, however, was taken by Dr. Adenauer on the resignation offers of Professor Oberlander and Herr Kraft.

These dissensions in the Refugee Party reduced Dr. Adenauer's majority from 333 to 315 out of a total *Bundestag* membership of 487, thus giving his Government a continued simple majority but depriving it of the two-thirds majority (325) required for constitutional amendments.

(Frankfurter Allgemeine Zeitung)

B. JAPAN - PHILIPPINES.—Reparations Agreement.

President Magsaysay of the Philippines announced on June 14 that he had accepted a draft agreement on Japanese reparations which had been negotiated by his special emissary, Señor Felino Neri, after lengthy discussions with Japanese representatives.

The agreement provided that Japan would pay to the Philippines $550,000,000 in capital goods, services, and cash, and another $250,000,000 in the form of investment funds and development loans. $500,000,000 of the $550,000,000 would be for the supply over a 20-year period of such capital goods as ships, locomotives, complete factories, and machinery; $20,000,000 would be payable in cash within five years to war widows and orphans; whilst $30,000,000 would be for services (including labour and machinery) to salve over 60 ships sunk in Philippine waters during the Second World War, for the reclamation of swamp lands, and for freight and insurance for the delivery of the capital goods. The $250,000,000 in investment funds or loans for industrial development would be furnished by private Japanese interests, and would also be on a 20-year basis.

An earlier draft agreement, negotiated in April 1954 by Vice-President Carlos P. Garcia, had provided for reparations totalling only $400,000,000, but was rejected by President Magsaysay.—(New York Times - New York Herald Tribune)

C. SYRIA. — Election of President Kuwatli. - Mr. Khaled el-Azem resigns from Cabinet. - Sentence on ex-President Shishakli.

Mr. Shukri el-Kuwatli (64) was elected President of Syria for a five-year term on Aug. 18, after two ballots in the Syrian Chamber of Deputies. He had held the Presidency on two previous occasions: from 1943 to 1948, when he was re-elected for a second term, and from 1948 to March 1949, when he was overthrown by a *coup d'état* staged by the late Colonel Husni Zaim. He had lived in Egypt from 1949 until July, 1955, when he returned to Syria to take part in the election for the Presidency. Mr. Kuwatli will be installed as President of Syria on Sept. 6, when he will succeed the nonagenarian President Hashem Atassi.

On the first ballot in the Chamber of Deputies, Mr Kuwatli received 89 votes (five short of the two-thirds majority required for election) and Mr. Khaled el-Azem 42 votes, whilst one vote was cast for the Saudi Arabian Ambassador in Damascus, Sheikh Abdul Aziz ben-Zeid On the second ballot (in which only a simple majority was required) Mr Kuwatli polled 91 votes and thereby secured election, Mr. el-Azem received 41 votes, whilst one vote was cast for the Prime Minister of Iraq, General Nuri es-Said

Immediately after the election of President Kuwatli, Mr. Khaled el-Azem resigned from the Syrian Cabinet, in which he had held the posts of Foreign Minister and Defence Minister. The resignation was tendered directly to President Atassi and not to the Prime Minister, Mr. Sabry Assali, who was accused by Mr. el-Azem of having violated the agreement on which the present coalition government was based. Mr. Assali and his National Party had supported Mr. Kuwatli's election to the Presidency.

Brigadier Adib Shishakli, the former President of Syria, was sentenced *in absentia* by a Damascus military court on Aug. 15 to 20 years' hard labour on a charge of causing the death of a Syrian Army sergeant during the last days of his régime. The sergeant in question had been imprisoned shortly before the *coup d'état* which overthrew President Shishakli in February, 1954, and had been charged with plotting to assassinate him. Captain Abdulhaq Shihadi, head of the Syrian police at the time, was also sentenced *in absentia* to 20 years' hard labour. Brigadier Shishakli, who had been living in France since his overthrow, arrived at Beirut by air on Aug. 22, bearing a Saudi Arabian passport, and asked permission to enter Syria so that he could reply to the charges made against him. The Lebanese authorities refused this request lest it should disturb relations between Syria and the Lebanon, and Brigadier Shishakli was obliged to return to France.—(Le Monde, Paris)

(Prev. rep. Syria, 14315 B; 14063 B; Brigadier Shishakli, 13463 C; Mr. Kuwatli, 9928 B.)

D. SOUTH-EAST ASIAN DEFENCE TREATY. — Military and Economic Conferences.

A conference of military representatives of the eight member-countries of the South-East Asia Treaty Organization was held at Baguio (Philippines) from April 25-May 5 under the chairmanship of Brig.-General Pelagio Cruz, head of the Philippine delegation.

The conference was held *in camera*, an official statement explaining that it would be inappropriate to disclose the results of the talks, and that the recommendations adopted would be submitted to a meeting of the military advisers to be held at Bangkok. It was unofficially reported that it had been agreed not to set up a permanent military headquarters of the Organization, as had been proposed by Siam and the Philippines.

The military advisers' meeting at Bangkok took place on July 6-8. The SEATO Secretariat announced that the talks were solely of a defensive character; that they would be concerned with preparatory measures necessary to ensure the collective defence of the Treaty area; and that they would take place separately from, but in close co-ordination with, similar discussions on non-military matters, such as economic and other forms of self-help and mutual assistance.

A communiqué said that "good progress had been made" and that further planning meetings by various sub-committees of military advisers would be held in the next few months in the Philippines, Pakistan, Hawaii, Singapore, Australia, Siam, and New Zealand.

A conference of economic experts of the SEATO countries was held in Karachi from June 20-23 under the chairmanship of Mr. Said Hassan, of the Pakistani Ministry of Economic Affairs. It drew up a practical programme of work for the economic development of the region, the communiqué stating that the experts were "in complete agreement on the way they should handle various issues relating to economic problems."

(Prev. rep. SEATO, 14062 F.)

SEPTEMBER 3—10, 1955

A. INDIA - PORTUGAL. — The Goa Dispute. - Mass Entry of Indian Volunteers into Goa. - Anti-Portuguese Riots in Indian Cities. - Rupture of Diplomatic Relations between India and Portugal. - Indian Ban on Further Entry of "Satyagrahis" into Goa. - New Statute for Portuguese Settlements.

Demonstrations in Portuguese territory by Indian *satyagrahis* (non-violent resisters) in support of the Goan nationalist movement continued throughout June and July, culminating on Aug. 15 (Indian Independence Day) in the entry into Goa of over 3,000 volunteers, at least 13 of whom were killed by police fire. The existing tension in relations between India and Portugal was intensified by these incidents, and led to the breaking-off of diplomatic relations by India on July 25, and of consular relations on Aug. 18.

On June 25 a party of 147 volunteers, the largest which had so far taken part in the movement, crossed into Goa, one of the volunteers died of his injuries after being beaten by the Portuguese police, and two others were wounded by police fire. Other parties entered Goa on eight occasions during July and four in the first ten days of August, two volunteers being killed on Aug. 3 when the police opened fire, and two seriously wounded. All these groups of volunteers were organized by the Opposition parties, including the Praja Socialists, the Communists, and the right-wing *Jan Sangh* and Hindu Mahasabha.

The attitude of the Indian National Congress was defined by its Working Committee on July 23 in a resolution which stated that it was "the right and duty of the people of Goa and the people of the rest of India, as well as of the Government of India, to strive for the liberation of Goa and integration with the Union of India." The resolution emphasized, however, that all methods employed must be peaceful; stated that "it is principally for the Goans themselves to carry on the struggle"; and deprecated the mass entry of *satyagrahis* from India, as this was likely to change the peaceful nature of *satyagraha* and might prevent the realization of the objectives aimed at. It was observed, however, that the resolution did not forbid individual members of Congress to take part in mass *satyagraha*, so long as they confined themselves strictly to peaceful methods.

The Governor-General of the Portuguese Settlements in India (General Guedes) stated on Aug. 12 (*a*) that 454 Goans and 176 Indian *satyagrahis* had been arrested since July 20, 1954, of whom 132 had been released for lack of evidence, 127 had been expelled to India, and 371 had been held for trial; (*b*) that 193 had been tried, 27 of whom had been acquitted; and (*c*) that 1,120 Indians who had entered Goa since May 18 had been expelled.

The Bombay Transport and Dock Workers' Union decided on July 29 to boycott all foreign ships bound for Goa, three British ships being delayed in consequence during the next few days. About 500,000 Bombay workers took part in a one-day token strike on Aug. 12 called by the Goa Liberation Aid Committee, with the support of the Socialist and Communist trade unions, despite the fact that the strike was opposed by the Congress unions and the State Government. During the strike the Portuguese Consulate in Bombay was attacked by demonstrators, who attempted to hoist the Indian flag over it.

Railway services between India and Goa were suspended by the Indian railway authorities on July 25.

It was announced in Karachi on Aug. 11 that, in order to counter what was described as "the Indian blockade," a regular air service had been opened between Pakistan and Goa.

Statements by Mr. Nehru.

At a press conference on July 19, Mr. Nehru reaffirmed his view that India was not bound by the Anglo-Portuguese treaty of alliance, and declared that the Government of India would tolerate "no nonsense" from the Atlantic Powers.

Asked whether the Indian Government, as successor to the British Government in India, considered itself bound by the Anglo-Portuguese treaties, Mr. Nehru said that these treaties had been signed "in an age long gone by" and contained provisions having no relation to the modern world; e.g. an obligation to provide bowmen for a particular purpose. He added: "Let the world take notice, let the Atlantic Powers take notice, that we will tolerate no nonsense about Goa from wherever it comes, from a big or small Power. But we will adhere to the path of peace." If the Portuguese Government refused to yield to moral pressure, he observed, "we think that their regime in Goa will collapse, and if they are not careful their regime in Portugal will also collapse."

During a debate in the House of the People on July 25-26, Mr. Nehru announced that the Government of India had asked for the closing of the Portuguese Legation in Delhi, thus breaking off diplomatic (but not consular) relations between the two countries. He also gave details of the nationalist agitation in Goa.

Mr. Nehru stated that about 800 *satyagrahis* had entered Goa since May 18, of whom nine (including Mr. T. C. Choudhury, a Revolutionary Socialist member of the House of the People) had been detained and the rest had been returned to India, some after being beaten. In the past year about 2,500 Goans had been arrested, about 450 of whom were still in custody, and 122 (most of whom were resident in Goa) had been sentenced to terms of imprisonment ranging from one to 28 years, 13 Indians had also been sentenced to terms of imprisonment of eight to nine years. Mr. Nehru denied Portuguese allegations that Indians had carried out acts of violence in Goa, and said that the terrorist activities which had occurred were "apparently done by some odd individuals in Goa itself, as a result of desperation following the repressive policy of the Portuguese Government."

In reply to claims that Goa was part of Portugal, Mr. Nehru cited Portuguese official statistics showing that in 1951, out of a total population of 638,000, all but 1,438 were of purely Indian origin; that 61 per cent of the population were Hindus and only 37 per cent Roman Catholics, and that only a small percentage of the population could read and write Portuguese. The Indian Government, he continued, had opened a Legation in Lisbon in the hope that this might help to bring about direct negotiations on the Goan question; however, following the Portuguese Government's continued refusal even to discuss the question, the Legation had been closed in July, 1953, as of no practical utility. The Portuguese Legation in Delhi had continued to function, but in view of Portugal's rejection of proposals for a meeting of representatives of the two Governments, and because of recent developments, the Indian Government had decided that maintenance of the Legation served no useful purpose. A Note asking for its closure as from Aug. 8 had therefore been delivered to the Portuguese Chargé d'Affaires.

In the ensuing debate demands were put forward by **Mr. A. K. Gopalan** (Communist) for an economic blockade of Goa, and by **Mr. J. B. Kripalani** (Praja Socialist) for either mass *satyagraha*, with Government backing, or a "limited war" with Portugal. Replying on July 26, **Mr. Nehru** again referred to the Anglo-Portuguese treaties, one of which, he recalled, provided that Portugal might recruit 12,000 persons in England, Scotland, and Ireland for her protection. He observed that if Portugal claimed the right to enforce the clause, the British Government would undoubtedly refuse to recognize it, and that the treaties must be seen not only in terms of historical developments in the past but also in terms of the changes that had recently taken place in India. After recalling that the U.S.A., under the Monroe Doctrine, had claimed the right to regard interference by any European Power in the political affairs of the American continent as an unfriendly act, Mr. Nehru continued: "I submit that in existing circumstances Portuguese retention of Goa is a continuing interference with the political system established in India. I would go further and say that any interference by any other Power would also be interference with the independence of India." He rejected the suggestion of a "limited war" with Portugal on the ground that such a war would create an atmosphere leading to a larger one. In conclusion, he mentioned that although the Government could not "think in terms of patronizing *satyagraha*," it would not interfere with *satyagraha* provided that it was non-violent and did not lead to a situation of violence.

The Independence Day Demonstrations.

In spite of Mr. Nehru's warnings against a mass movement of Indians into Goa, a spokesman of the All-Party Goa Liberation Committee stated on Aug. 10 that planned mass *satyagraha* by thousands of Indians would take place on Aug. 15 (Indian Independence Day). The Governor-General of Goa stated on Aug. 12 that his police had been instructed not to permit Indian demonstrators to enter Portuguese territories; that Portuguese Army units had, however, been withdrawn from the frontiers and would only be used to repel armed invasion; and that the police had been instructed to use force only as a last resort. On the same day the Portuguese Foreign Minister, Dr. Cunha, called upon "India and the civilized world to prevent the provocation now being planned on Indian soil."

Several thousand *satyagrahis* nevertheless entered Goa, Daman, and Diu on Aug. 15, all of them in groups ranging in number from 12 to 50. Although Praja Socialists were in the majority, members of other Indian parties also took part, as well as some *saddhus* (Hindu "holy men") and a number of women. In all instances the *satyagrahis* were halted and rounded up by the Portuguese police, and were later returned to Indian territory. In a number of instances the police opened fire on the ground that the *satyagrahis* had disregarded orders to stop and had continued to march forward, but it was alleged in the Indian Press, and confirmed by foreign newspaper correspondents, that in several instances the Portuguese police had opened fire without giving any previous warning.

According to figures given by Mr. Nehru to the Indian Parliament on Aug. 16 and 17, 1,711 volunteers in all had entered Goa, of whom 1,691 were returned, including the bodies of a number of those who had been killed; of the 20 missing, some were detained or in hospital, and some were possibly dead. A total of 1,249 volunteers had entered Daman, all but five (one of whom was known to be dead) being returned. Another 81 volunteers had entered Diu and nothing was known

of their fate, although there had been no police firing. Vice-President Radhakrishnan told the Council of States on Aug. 18 that 15 of the volunteers were known to be dead; 225 were injured, 38 of them seriously; and 10 were missing, seven of whom were believed to be dead. A Goan police communiqué of Aug. 16 stated that the evidence indicated that 13 people had been killed.

Demonstrations by Goan nationalists also took place on Aug. 15 in and around Marmagao; according to Mr. Nehru's statement of Aug. 17, about 70 demonstrators were arrested, most of whom were released after being beaten up. A Portuguese official spokesman gave the number of those detained as 29.

The Goa Liberation Aid Committee announced on Aug. 16 that no more volunteers would be sent to the Portuguese settlements until all the bodies of those killed had been accounted for. Further groups of *satyagrahis*, however, entered Goa on four occasions between Aug. 16-30, and also entered Diu on Aug. 16-17.

Reactions in India.

Addressing the House of the People on Aug. 16, Mr. Nehru strongly condemned the "brutal and uncivilized" behaviour of the Portuguese authorities in firing on unarmed demonstrators who were acting in a peaceful and orderly manner. The Indian Government, he added, would nevertheless continue their policy of a peaceful approach to the problem, and did not propose to be "forced into what they consider is wrong action, because the Portuguese authorities might perhaps want them to commit that wrong action." Both Houses of the Indian Parliament subsequently adjourned for half an hour as a mark of respect to the memory of those *satyagrahis* who had been killed.

Large-scale protest strikes and demonstrations against the conduct of the Portuguese authorities took place in the principal Indian cities on Aug. 16. In Bombay, where crowds attacked the Portuguese Consulate and the offices of the British Deputy High Commissioner and the Pakistani Assistant High Commissioner, about 80 people were injured in clashes between demonstrators and police, and 83 arrests made; in Calcutta, where a "day of mourning" was declared, the Portuguese Consulate was raided by students who hoisted the Indian flag; and in Delhi and other cities one-day strikes took place. Mr. Nehru, speaking in the House of the People on Aug. 17, strongly condemned the violent actions by demonstrators, expressed deep regret that foreign Consulates and missions had been attacked, and offered full compensation for any damage that had been caused, adding that the Government did not intend to have its international policy "directed from the market-place."

The Indian Government, in a Note delivered by its Consul-General in Goa to General Guedes on Aug. 18, protested against the Portuguese authorities' "wanton and brutal exercise of force against unarmed people," and categorically denied allegations by the Portuguese Government that they had had to "defend themselves from violence by violence" and that India had massed troops on the Goan border. The Note stated that the Indian Government had decided to withdraw its Consulate-General from Goa as from Sept. 1, and requested that the Portuguese Consulate-General in Bombay and the Consulates in Calcutta and Madras should be closed down on or before that date.

The Portuguese Government announced on Aug. 20 that the Indian Note had been returned as it had been couched in "unacceptable terms," but that Portuguese Consulates would be withdrawn from India. The statement complained about "deliberate misrepresentation" of the conduct of the Portuguese authorities towards the "Indian invaders," and put the sole responsibility upon the Indian Government for the severance of direct relations between the two countries. The appointment of Dr. Laborinho (Portuguese Minister in Delhi until the closing-down of the Legation), as Minister to Pakistan was announced in Lisbon on Aug. 27.

The Indian Director-General of Posts and Telegraphs announced on Aug 18 that money-order services between India and the Portuguese Settlements had been suspended, and that orders already booked but not yet forwarded would be returned to the senders. Nationalist circles commented that this decision was expected to produce a serious effect on Goa's economy, which was largely dependent on remittances from Goans working in India.

In a speech to the Council of States in Delhi on Sept. 6, Mr. Nehru declared that the Government of India could never tolerate a colonial *enclave* in her territory, and that there was only one solution to the Goan problem—the ending of Portuguese domination.

After declaring that the outside world was beginning to realize "the absurdity of Portuguese rule continuing over this small corner of India," Mr. Nehru said that if the problem were regarded from a narrow point of view, it would obviously be easy to take possession of Goa by military means. The use of military measures, however, would not be in keeping with the policy which India had frequently advocated Mr. Nehru said in this connexion. "It would be remarkable if . . we, who are supposed to be champions of the idea that problems should be solved peacefully, should indulge in military operations In considering the Goa problem, therefore, we should be clear in our minds. Should we consider ourselves free to use military measures or to take what might be called police action? From every aspect of principle as well as of expediency it will be clear that we should not take military measures. For the removal of Portuguese rule we should limit ourselves to peaceful methods."

As regards the *satyagraha* campaign in Goa, Mr Nehru declared "We have always said that any kind of mass entry [into Goa] or mass *satyagraha* was undesirable and would lead to all kinds of complications. To some extent this took place in August I do not wish the House to imagine that I am attacking those who were there Certainly a large number of people came from all parts of India, impelled by the same urge for freedom that moved us to fight for India's independence, and impelled by the same spirit of self-sacrifice. One must appreciate it and admire it" After paying tribute to the courage displayed by the *satyagrahis*, both Goans and Indians, Mr Nehru said that he was not aware of a single instance in which these people had been armed or had indulged in violence. Nevertheless, the Portuguese authorities had opened fire on them, causing a number of deaths, and had ill-treated and beaten others before sending them back across the border "It may be of little consequence to the Portuguese," Mr Nehru added, "but I would like to say that the action of the Portuguese Government on Aug 15 was very wrong from the point of view of international law, of international standards of behaviour, and of decency."

Mr Nehru continued "I am not for a moment engaged in pushing Goa into the Indian Union What I am engaged in—and I think this is much more important—is the removal of Portuguese sovereignty over Goa. I am not making any fine distinction between the two. But I want to remove the idea from any person's mind that we are out to coerce people to come into the Indian Union I have no doubt that the Goans want to come in. . But the main point for us, as well as for the people of Goa, is, first of all, the general proposition that colonization should not continue; and secondly, that colonial rule should not continue on our doorstep. That a foreign Power can hold on to our territory right on the mainland of India is a position we can never tolerate. Therefore the Portuguese have to go . . . There can be only one solution—the ending of Portuguese domination and Goa's association with India .

"I am quite clear in my mind that *satyagraha*, certainly of the mass variety but also of the individual variety, is undesirable in the existing circumstances. Whatever has happened has happened. But for us to continue in this way will not help in the liberation of Goa, and will certainly impede it. . . . Surely Goa is not such a problem that we should go to war or take any warlike measures. I am not prepared to prophesy as to how and when this problem will be solved. But I can say with some confidence that forces are at work—national, international, economic, and others—which are bringing the solution nearer and which will ultimately solve this problem."

The All-India Congress committee accepted a resolution on Sept. 4 stating that in future no Indian national should enter Goa as a *satyagrahi* or political demonstrator. On Sept. 7 the Bombay Government issued instructions to the police to prevent *satyagrahis*, whether individuals or groups, from crossing the border into Goa and Daman. Similar instructions were issued in Saurashtra to prevent *satyagrahis* from entering the settlement of Diu.

New Statute for Portuguese Settlements.

A statute providing for the inclusion of elected members in the Legislative Council of the Settlements, and increasing the Council's powers, was published by the Portuguese Government on July 5 and came into operation on Aug. 1.

It was laid down that the Legislative Council would consist of 23 members, of whom five would be appointed by the Government, 11 would be elected by direct vote, and seven would be elected by economic, religious, and other bodies and by village communes. The franchise was limited by literacy and other qualifications. The Council, which would be elected for four years, would meet twice yearly and would vote on Bills submitted by the Governor-General, who would preside. For the first time it was also authorized to give its opinion on the budget presented by the Governor-General; its members were forbidden, however, to move any Bill involving an increase in expenditure or a reduction in revenue, and the financial autonomy of the Settlements remained subject to the overall control of the Portuguese Minister for Overseas Territories, who might impose restrictions in "grave situations." Members of the Council were guaranteed freedom of speech, provided they did not express "opinions against the unity and independence of the nation."

The first elections under the statute took place on Aug. 22, all but one of the candidates being returned unopposed. Out of a total population of 638,000, only about 50,000 had entered their names on the electoral registers.—(Indian High Commissioner's Office, London - The Hindu, Madras - The Statesman Calcutta - Times - Daily Telegraph) **(Prev. rep. 14274 A.)**

A. CHINA. — Economic Development. - The First Five-Year Plan. - Industrial and Agricultural Targets. - Development of Rail and Road Communications. - Yangtse Bridge Project. - Economic Development of Sinkiang. - "Go-slow" Policy in Collectivization of Agriculture. - Grain Rationing in Urban Areas.

Official figures of the targets of China's first Five-Year Plan were given for the first time on July 6 by Mr. Li Fu-chun (head of the State Planning Commission, and a Deputy-Premier) in a report to the National People's Congress, meeting in Peking. The decision to embark upon a Five-Year Plan, covering the years 1953 to 1957 inclusive, had been taken in December 1952 (see 12784 A).

As compared with the original objectives of the Five-Year Plan, Mr Li disclosed that the following changes in emphasis had been made : (1) greater concentration upon heavy industry and industrial production, (2) lower targets for agricultural production; and (3) slower collectivization of agriculture.

Mr Li said that the Five-Year Plan envisaged an increase of 104 1 per cent in China's industrial capacity. The Plan covered a total of 7,600 projects, of which 1,600 ranked as "major" and the remaining 6,000 as "minor" Of the 1,600 "major" projects, 694 were industrial (iron and steel, motor-cars, shipbuilding, non-ferrous metals, chemicals, coal, oil, textiles, cement, etc.), 252 agricultural, and 220 communications, the remainder including the construction of schools, hospitals, and housing. Of the 694 industrial projects, 156—described by Mr Li as the "core" of the industrial construction sector—would be built with Soviet assistance

Among the major industrial projects covered by the Five-Year Plan, Mr. Li mentioned 15 new power-stations, each with a capacity of over 50,000 kilowatts; 31 coalmining enterprises, each with a capacity of over 1,000,000 tons; 13 large reservoirs, and a number of dams to be built on the Yellow River. All these projects would be completed by 1957 At Anshan (the Manchurian steel-producing centre) 48 major projects were under construction and were scheduled for completion by 1960; when completed, Anshan would produce 2,500,000 tons of pig-iron, 3,220,000 tons of crude steel, and 2,480,000 tons of rolled steel a year.

As regards industrial production, Mr. Li gave the following figures showing (*a*) production in 1952 (the year before the start of the Five-Year Plan), (*b*) the target for 1957, and (*c*) the planned percentage increase over 1952.

	1952 (actual)	1957 (target)	Percentage increase (1957 over 1952)
Coal (tons)	63,500,000	113,000,000	80
Steel (tons)	1,350,000	4,120,000	200
Cement (tons)	2,860,000	6,000,000	110
Electricity (million kilowatt-hours)	7,260	15,920	120

Figures for agricultural production were also given, as follows :

	1952 (actual)	1957 (target)	Percentage increase (1957 over 1952)
Grain (tons)	163,900,000	192,800,000	17.6*
Cotton (tons)	1,304,000	1,635,000	25.4
Jute and hemp (tons)	300,000	365,000	19.7
Tobacco (tons)	221,000	390,000	76.6
Sugar-cane (tons)	7,142,000	13,150,000	85.0

* The Five-year Plan had originally provided for a 30 per cent increase in grain production by 1957. The actual target of 17.6 per cent over 1952 showed that this target had been nearly halved.

Among other targets envisaged by the Plan were : machine-processed paper, 650,000 tons by 1957, compared with 370,000 tons in 1952; machine-processed sugar, 686,000 tons by 1957, compared with 249,000 tons in 1952, cotton piece-goods, 163,720,000 bolts by 1957, compared with 111,630,000 bolts in 1952.

Mr. Li stated in his report that it would take about 15 years to carry out the "socialist transformation" of China, and that it would be half a century before China reached the industrial level of "the more advanced capitalist countries."

The 1957 targets for Chinese coal and steel production were very much below the levels already achieved in America and Britain; e g, the steel target of 4,120,000 tons by 1957 compared with actual production of over 88,000,000 tons in the United States in 1954 and of over 18,500,000 tons in Britain in the same year Similarly, the 1957 coal target of 113,000,000 tons compared with U.S. production of about 380,000,000 metric tons of hard coal in 1954 and with British coal production of over 224,000,000 tons (deep-mined and opencast) in the same year. The following comment on the Chinese Five-Year Plan was brought by *The Times* in its issue of Sept. 7, 1955 :

"When the Five-Year Plan was first announced, China was still in its sanguine phase. Retrenchment began soon after, and this year has been even more drastic. Light industry has been almost cut out of the plan, apart from textiles Schools, hospitals, and housing have been ruthlessly cut; 88 per cent of investment is going entirely into heavy industry.

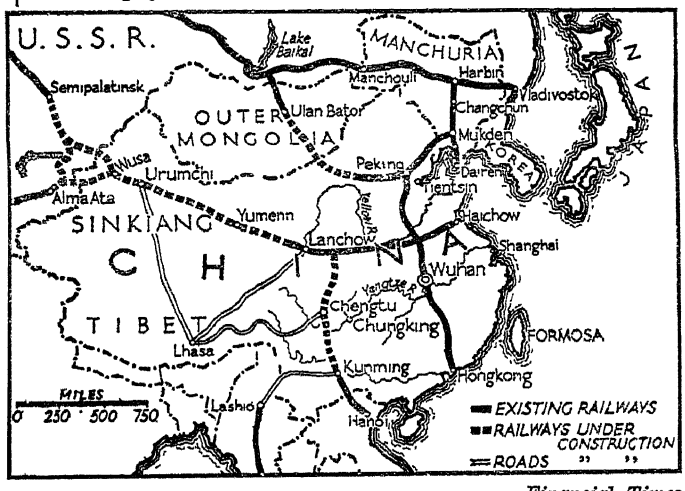
"Steel production is roughly comparable with that of India, but falls well behind that of Japan. Oil is in very short supply, still far from supplying China's own needs, though fields at Yumenn (Kansu) and in Sinkiang are being developed Ships for river traffic have been built and perhaps a few larger vessels, thanks to the Russians, who have now relinquished their base at Dairen. Cars, tractors, and lorries are being assembled with imported engines. The same may be true of aircraft. . . . Of the major projects mentioned [in the Five-Year Plan] there will be factories producing boilers, steam turbines, generators, transformers, switch-gear, and rolling-stock.

"China now produces all its steel rails and steel tubes. Machine-tools are being feverishly produced, but the only machinery China can begin to export herself, thus far, is textile machinery . . . . Little is known of the armaments industry. Nothing much may yet be produced apart from small arms and heavy guns, but no doubt development is being pressed There is little being done with advanced industry such as radio, optical, or scientific instruments.

"China's problem in the next few years will be capital. An agricultural surplus will be hard to produce with a population reaching 700 million before a decade is out . . . Fertilizers, new irrigation, and tractors are wanted, and industry must first provide what is necessary for the farmer So much, in China, depends on the weather. Last year's floods were a setback, but a string of good harvests could speed China's industrialization just as disastrous harvests in succession could cripple it It is still too early to judge the potentialities of China as an industrial power. In another five years the progress will be apparent But it will need many more years than that before the products of Chinese industry ever appear on the markets of the world"

Development of Communications.

Apart from the industrial developments mentioned above, an extensive rail- and road-construction programme has been launched (see accompanying map), primarily with the object of opening up the interior of China. The major rail projects at present under construction include the two new lines across Mongolia and Sinkiang, which will link up with the Soviet rail system (see 13855 A), and a line linking Lanchow with Kunming (Yunnan) which will enable through services to be run to Hanoi, in North Vietnam. Among the major road projects are the Lhasa-Chungking motor-road (completed in 1954, see 13932 G); roads connecting Lhasa with Lanchow and Urumchi (Sinkiang); and a road linking Kunming with Lashio (Upper Burma), the terminus of the Burma Road—a vital Allied supply line during the Second World War, and now largely derelict.



Financial Times

It was announced on July 6, 1954, that a rail- and road-bridge was being built over the Yangtse River at Wuhan; that it was expected to be open for traffic at the end of 1957; and that it would be more than twice as long as the Sydney Harbour Bridge, the main span being 3,760 ft. and the approaching spans and connecting lines totalling over eight miles. It would be equal in height to a 20-storey building, enabling ocean-going shipping to pass beneath, and would have two "decks"—a "lower deck" for trains and an "upper deck" for motor traffic. The Yangtse Bridge, together with the bridge over the Han River, will link up the north and south sections of the railway from Peking to Kowloon and thus make direct rail communication possible between the Chinese capital and Hong Kong. [At present passengers have to be ferried across the Yangtse at Wuhan.] It was stated that the bridge had been designed with the cooperation and assistance of Russian experts.

A Peking announcement of June 23, 1955, said that a 200-mile railway had been completed linking Litang (on the Hunan-Kwangsi line in South China) with the port of Tsamkong, on the Liuchow Peninsula off Hainan Island. The new line runs near the Vietnamese border and gives direct rail access to Peking *via* the South China railway network and the Peking trunk line.

Economic Development of Sinkiang.

Reports in the British and American Press in recent months had drawn attention to the increasing economic importance of Sinkiang (Chinese Turkestan), the natural resources of which had been developed by the joint Sino-Soviet companies since transferred to Chinese control (see 14003 D, 13855 A). The following extracts are brought from an article in the *Financial Times* (London) on Dec. 6, 1954:

". . In the hands of Soviet industrial planners, Sinkiang has changed beyond recognition. They have opened up mines, sunk colliery shafts, drilled oil wells, built two large refineries, and completed a cracking plant and a number of ancillary works, including power stations, which will all be turned over to China. . . . The economic reality behind the Soviet retrenchment is . . . that it falls within the range of a wider scheme to 'alter the historical panorama of China's economic geography' to which both countries are equally committed.

"The main stage of the scheme is the North-West, the largest of the six administrative areas of China, covering one-third of the country's territory but inhabited by only 32,000,000 people—5 per cent of the total population. The overwhelming majority [of the Chinese population] is crowded together in the great plains of the East . With 12,000,000 new mouths to feed each year, the Chinese Government finds itself under the urgent compulsion to accelerate the economic build-up of the under-developed Western territories . . . Where only tools of stone, copper, and iron were wielded, steel and electricity are now shaping a new industrial landscape The change wrought by a building boom and a burst of new industries is seen at Urumchi, where the skyline has become a forest of tall factory chimneys and scaffolding; at Yumenn, with its dense concentration of oil derricks; at Lanchow, now a city of over a million inhabitants. But the stage is still predominantly one of large-scale prospecting to lay the foundation for the second and third Five-Year Plans. . . ."

Agricultural Policy.

Details of a plan for the gradual collectivization of agriculture were announced in Peking on Jan. 11, 1954, after having been adopted on Dec 16, 1953, by the Chinese Government and the central committee of the Chinese Communist Party. It was stated that the scheme would be voluntary, and that it was aimed at increasing the number of agricultural co-operatives from the then existing level of 14,000 to 35,000 by the end of 1954 and to 800,000 by 1957, the last year of the Five-Year Plan. Whilst it was emphasized that "the agricultural economy of the small peasants must be transformed into a co-operative economy of organized farms," it was stressed that "precipitate haste and adventurism must be avoided at all costs" and that the new measures must be made "understandable to the peasant masses" to cover the transitional period towards Socialism. It was admitted that the goal of 800,000 co-operatives set for 1957 would comprise only about one-fifth of the peasant households of China.

A directive on the Government's policy with regard to the collectivization of agriculture had been issued in March 1953. It stated that the collective farms—those already existing and those to be formed—would be of three main types.

(1) Seasonal or temporary groups on the basis of "simple mutual aid" by peasants banding themselves together for this purpose.

(2) Organizations based on long-term mutual aid arrangements enabling their members to engage in subsidiary occupations, and thus to supplement their income from agriculture. It was stated that the number of these organizations was still small, but was increasing in areas where "mutual aid" farming had taken firm root

(3) Agricultural produce co-operatives whose members would be "entitled to pool or withdraw their land on the same principle of voluntary and mutual benefit." The number of these co-operatives was also admitted to be small as yet.

Future policy would be aimed at organizing the first—and least rigid—type throughout the country; at developing the second type in those areas where the first type was operating successfully; and at establishing the third type in "key areas where the peasants have rich experience of mutual aid and where there is a strong nucleus of leadership."

The directive underlined the importance of observing the voluntary principle, of avoiding undue haste in forcing collectivization on the peasants, and of making allowances for variations in local conditions It drew attention to the need for "patience in helping and educating individual peasants," and stressed that the working of land by peasants who insisted on the retention of their private holdings was "perfectly legal" and that "no-one has the right to encroach on the individual peasant."

[In commenting on the above-mentioned measures, the British and American Press contrasted the cautious approach of the Chinese Government to the question of agricultural collectivization with the drastic measures taken in the Soviet Union in the 'thirties]

Food Rationing.

Peking Radio announced on Aug. 24, 1955, that food grains, including rice, would be rationed in all Chinese cities before the end of November, and that rationing had already begun in the provinces of Shantung and Shansi.

The announcement said that the rationing of cereals and food grains had been introduced to "ensure fair distribution" in the urban areas, and that the ration would vary according to age, type of work, and regional grain-eating habits. In urban areas where flour was the staple food, the monthly ration would be as follows: workers on heavy physical work, 44 catties; workers on light work, 35; university and secondary school students, 35; office workers, teachers, and shop assistants, 31, "residents in general," 27.5. [The "catty" is a weight measurement used in the Orient; it varies from country to country, but in China is equivalent to about 1⅓ lb.] In areas where rice was the staple diet, the ration would be somewhat lower for each category.

Households in rural areas were classified in three categories: (1) those with a grain surplus, (2) those which were self-supporting, (3) those with a grain deficit The announcement said that farmers with a surplus would have "between 80 and 90 per cent of the surplus bought by the State at a fair price" and would be allowed to keep the rest, that those in the second category would be prohibited from buying or selling grain; and that households in the third category would be "supplied by the State to bring them up to the average in grain consumption"

For some months beforehand an intensive "save grain" campaign had been waged by the Government and local authorities, following severe droughts in 1954 which had adversely affected the crops The "rice bowl" area of Central China had also been seriously affected in 1954 by floods which were among the worst in the country's history.—(Times - Manchester Guardian - Financial Times - Economist - New York Times - New York Herald Tribune) **(Prev. rep. Five-Year Plan, 12784 A; Communications, 13932 G; 13855 A; Sino-Soviet Companies, 14003 D; 13855 A.)**

A. PERSIA. — Cabinet Changes. - Arrest of Former Collaborators of Dr. Mossadeq.

It was announced in Teheran on Aug. 21 that General Ahmad Vosogh had been appointed War Minister in M. Ala's Government in succession to General Hedayat, and that Dr. Mohammed Sajadi had become Finance Minister *vice* Dr. Ali Amini, who had relinquished that portfolio on May 23 when he became Minister of Justice. M. Ali Ashgar Forouzan, who had been acting Finance Minister since May, became head of the foreign trade department of the Ministry of National Economy, whilst General Hedayat was made Head of the Chiefs of Staff of the Armed Forces in succession to General Batmanqlich, who became Ambassador in Karachi.

Earlier, on May 19, it had been announced that five collaborators of Dr. Mossadeq, the former Prime Minister, had been arrested on charges of conspiring against the Government. They were M. Bagher Kasemi, a former Persian Ambassador in Paris, and Deputy Premier in Dr. Mossadeq's Cabinet; Dr. Moazami, the former Speaker of the Majlis, M. Amir Alai, a former Cabinet minister; M. Nainy, a newspaper editor; and Said Fatemi, a cousin of the late Dr. Hussein Fatemi (Dr. Mossadeq's Foreign Minister), who had been executed in 1954 (see 13959 A). M. Kazem Hassibi, Dr. Mossadeq's special adviser on oil questions, was arrested on March 21.

Six Persian officers, who were among those condemned to death in October-November 1954 on charges of participation in a clandestine Tudeh Party spy ring, were executed on Aug. 18, 1955. [Twenty officers and one civilian had already been executed immediately after the trials.] On the same date (Aug. 18) it was announced that the Shah had commuted the death sentence on 42 other officers and two civilians to life imprisonment.—(Times - Le Monde, Paris - New York Times) **(Prev. rep. Cabinet, 14151 B; Spy Ring, 13959 A.)**

B. NEW ZEALAND. — Increase in M.P.s' Salaries.

The N.Z. House of Representatives on Aug. 19 unanimously adopted the recommendations of a Royal Commission which had been set up in April to inquire into the salaries of Ministers and M.P.s. The recommended increases were as follows: Prime Minister—£3,750 salary and £1,500 allowances, as against £3,000 and £1,000 previously; Ministers—£2,500 and £550 (£2,000 and £450); Ministers without portfolio—£2,000 and £400 (£1,650 and £250); the Speaker—£1,950 and £600 (£1,600 and £500); Leader of the Opposition—£1,950 and £490, plus £215 travelling allowance (£1,600 and £400, plus £150); Members—£1,100 and £275 - £705, depending on size of electorate (£900 and £250 - £550).

(Directorate of the Information Services, Wellington)

C. UNITED STATES. — New President of Export-Import Bank.

It was announced on Aug. 22 that President Eisenhower had appointed Mr. Samuel C. Waugh as president of the Export-Import Bank in succession to Major-General Glen E. Edgerton, resigning. Mr. Waugh, an Assistant-Secretary of State, will assume his new post on Oct. 1.—(New York Times) **(13115 A.)**

A. UNITED KINGDOM. — I.R.A. Raid on Military Depot. - Recovery of Stolen Arms and Ammunition.

A band of armed men, members of the underground Irish Republican Army organization, attacked a British Army depot at Arborfield (Berkshire) in the early hours of Aug. 13, overpowered the guard, and escaped with 55 Sten guns, 10 Bren guns, two rifles, a pistol, and over 80,000 rounds of ammunition. The following statement on the raid was issued by the War Office :

" At 02 10 hours on Aug 13 a number of Irishmen with loaded weapons visited 5 Training Battalion, R.E M.E., and held up the night guard consisting of one sergeant, one corporal, and 16 privates. The sentry at the main gate was initially overpowered by the party, who then went to the main guardroom where they overpowered the sergeant in charge of the guard, and subsequently those members of the guard who were off duty resting in the guardroom. Patrolling pickets (two men each) returning to the guardroom on relief were overpowered as they came in The whole party, excluding the guard commander, were put in the cells, which were locked The guard commander was tied up and left on the guardroom floor The party then forcibly entered the armoury and magazine, which was adjacent to the guardroom, and stole a large quantity of ammunition and a number of rifles, Sten guns, Bren guns, and a pistol The guard commander subsequently managed to free himself and raise the alarm."

The sergeant in charge of the R.E.M.E. depot at Arborfield (Sgt. Ronald Ernest Carter) refused to tell the raiders where the keys of the armoury were kept, despite the fact that he was roughly handled, bound hand and foot, and threatened with loaded revolvers held at his head and mouth.

A War Office spokesman disclosed that the sentries on duty at the entrance to the Arborfield camp were unarmed, and that the guards at the R E.M.E. depot were carrying only pick-handles. In reply to questions, he explained that whilst in troubled places abroad sentries were generally armed with loaded rifles, it was the common practice in Britain in peace-time for sentries to be armed only with a pick-shaft or similar weapon. A subsequent War Office statement said that special precautions were being taken to deal with any further raids.

One of the vans was stopped by a police patrol near Ascot (a few miles from Arborfield) shortly after the raid, and was found to be laden with some of the stolen ammunition. Two Irishmen in charge of the van—Joseph Doyle (30) and Donal Murphy (23)—were taken into custody. After a nation-wide search by the police and the Special Branch, during which a close watch was kept on ports and airfields, the remainder of the stolen weapons and ammunition was recovered on Aug. 16 from the basement of an unoccupied shop in the Caledonian Road, Islington (North London). Armed detectives who broke into the premises found no trace of the I.R.A. men, who, it was believed, had abandoned their haul because they realized that there was no hope of getting it out of London. Some of the weapons had been transferred to specially made wooden boxes which had been nailed down ready to be taken away, while others were only half packed as if the men had been disturbed.

The two Irishmen arrested near Ascot, together with a third Irishman—James Andrew Mary Murphy (20)—appeared on Sept. 5 before the Wokingham magistrates (sitting at Reading) and were charged with (1) conspiring with other persons unknown to break into the Arborfield camp; (2) stealing a quantity of firearms and ammunition from the camp; and (3) causing grievous bodily harm to Sergeant Carter. The three men were subsequently committed for trial at Berkshire Assizes on all three charges.

A statement was issued to Dublin newspapers on Aug. 16 in the form of a " communiqué " signed by D. MacDiarmada, who described himself as " Adjutant-General of the I.R.A." It said that a " successful raid " had been made on the R.E.M.E. depot at Arborfield " by a party of ten volunteers," all of whom had " now been accounted for " After describing how the guard had been overpowered, the " communiqué " said, *inter alia*, that forcible entry into the armoury had been " effected with the necessary implements which had been brought along to deal with such an eventuality."

A British Home Office spokesman explained that there were no means of imposing restrictions on the movement of British or Irish subjects to and from the Republic of Ireland since the termination of the Emergency Regulations which had been in force during the war. To re-establish such controls, the Government would have to introduce new legislation in Parliament. As regards the I.R.A., the Home Office again had no means of declaring the organization illegal. This could only be done if the law courts decided that the provisions of the common law for conspiracy applied to the I.R.A., and such a finding could only be made in a special case brought before the courts.—(Times - Daily Telegraph - Irish Times, Dublin)

B. ALBANIA - GREECE. — Albania rejects Greek Conditions for Resumption of Diplomatic Relations.

The Greek Government informed the U.N. Secretariat on Aug. 3 that, under certain conditions, it was ready to resume normal diplomatic relations with Albania, as proposed by the latter country on June 30.

Although no announcement was made of the conditions laid down by Greece, it was reported in the British Press that the Greek Note had proposed negotiations between the Albanian and Greek General Staffs to end the state of war existing between the two countries since 1940, and to conclude a frontier agreement for the prevention of border incidents It was also understood that Greece had requested Albania to cease aiding and abetting Greek Communist agents to infiltrate into Greece across the border, and to return all Greek military and civilian hostages taken into Albania by the Greek Communists during the civil war The Note was believed to have upheld Greece's claim on Northern Epirus (Southern Albania), but to have offered to seek a settlement through normal channels.

An official Albanian statement issued on Aug. 14 rejected the conditions put forward by Greece as " unfounded, unacceptable, and offensive," and said that the Greek Government had " not only failed to show any understanding or wish for the resumption of diplomatic relations " but had taken " an openly hostile attitude." It refuted " categorically and definitely " the Greek contention that " there allegedly exists a state of war " between the two countries, and rejected the Greek territorial claims on the ground that " the question of Northern Epirus does not exist, as this area is Albanian territory."—(Times - Le Monde, Paris - New York Times)

(Prev. rep. 14302 A.)

C. PERSIA. — Foreign Contracts.

A Teheran announcement of Aug. 24 stated that contracts aggregating $160,000,000 (over £57,000,000) had been awarded to three American, French, and German firms for the construction of 700 agricultural schools and colleges, 780 art and technical training centres, 245 health centres, 160 hospitals, 400 village clinics, and 12 sanatoria. It was explained that Persia would be divided into three " segments " for this project, with each of the three firms—Litchfield-Whiting (U.S.A.), Tourador (France), and Koch (Western Germany)—controlling one area. British and Belgian companies were outbid by the above-mentioned firms for these contracts.

It had earlier been announced on Aug. 10 that the Persian Government had placed a contract with Western Germany for the supply of 180,000 telephones. The contract was obtained in the face of British, American, Japanese, Belgian, and Swedish competition, and was valued at between $20,000,000 and $30,000,000 (£7,000,000 and £11,000,000).

On April 13 it had announced that a British firm (Costain-John Brown) had been given a £6,500,000 contract to build the northern section of 600-mile pipeline from the Abadan oilfields to Teheran. A contract for the southern section of the pipeline was given to a French firm—(Financial Times - Manchester Guardian) **(Prev. rep. 14206 A.)**

D. HUNGARY. — New Ministry of State Supervision. - Cabinet Change.

A decree was issued on Aug. 29 setting up a Ministry of State Supervision to replace the existing State Supervision Centre, and appointing M. Arpad Hazi as Minister of State Supervision. It was stated that the new Ministry would supervise the implementation of the Second Five-year Plan (commencing on Jan. 1, 1956) and would deal with infringements of the law and with mistakes and deficiencies in carrying out the Government's economic policy.

It was announced on Sept. 4 that M. Bela Szalai, hitherto Minister of Light Industries, had been relieved of his ministerial duties at his own request and had been appointed a secretary of the central committee of the Hungarian Communist Party, thereby filling the vacancy caused by the " recall " of M. Mihaly Farkas from the party's central committee and Politburo in April last for his support of M. Nagy's " right-wing deviations." Mme. Joszef Nagy, the only woman holding a ministerial post in Hungary, succeeded M. Szalai as Minister of Light Industries.—(Hungarian News and Information Service, Budapest - Times) **(Prev. rep. 14208 B.)**

E. PAKISTAN. — Cabinet Appointment.

Mr. Ismail Chundrigar (58) was sworn-in as Law Minister in the new Pakistani Government on Aug. 31. He had formerly held the posts of Minister of Commerce, Governor of the Punjab and the North-West Frontier Province, and Ambassador in Kabul.—(Pakistan High Commissioner's Office, London)

(Prev. rep. 14371 A.)

A. UNITED KINGDOM.—Steel Industry. - Production Statistics. - Price Increases. - Expansion Schemes. - Denationalization of Hadfields Ltd. - Responsibility for Steel Industry transferred to Board of Trade.

Figures published by the Iron and Steel Federation on July 14 showed that, in spite of a temporary falling-off in output in June owing to the effects of the dock and railway strikes (see 14351 A, 14280 A), production of steel in the first half of 1955 was at the average weekly rate of 387,500 tons, equivalent to an annual rate of 20,149,000 tons. These figures compared with a weekly average of 366,300 tons and an annual rate of 19,048,000 tons in the first six months of 1954. The average weekly production of pig-iron in the first half of 1955 was 235,400 tons, equivalent to an annual rate of 12,242,000 tons, compared with an average weekly production of 230,100 tons and an annual average of 11,964,000 tons in the corresponding period of 1954. Detailed figures for the first six months of 1955 are given below, with 1954 figures for comparison:

	1955		1954	
	Weekly Average (tons)	Annual Rate (tons)	Weekly Average (tons)	Annual Rate (tons)
Steel Ingots and Castings				
January	381,000	19,789,000	360,000	18,737,000
February	394,000	20,498,000	357,000	18,577,000
March	395,000	20,536,000	365,000	18,969,000
April	393,000	20,454,000	368,000	19,155,000
May	401,600	20,884,000	374,500	19,476,000
June	364,200	18,939,000	371,700	19,328,000
Pig-Iron				
January	236,000	12,292,000	230,000	11,941,000
February	242,000	12,567,000	222,000	11,557,000
March	241,000	12,516,000	231,000	12,007,000
April	239,000	12,401,000	232,000	12,069,000
May	241,800	12,574,000	231,400	12,033,000
June	216,800	11,274,000	233,200	12,129,000

Other developments in the iron and steel industry in recent months are summarized below:

Price Increases. The Iron and Steel Board announced on July 22 that maximum prices of iron and steel products would be increased by an average of 5 per cent in consequence of higher production costs resulting from increases in the cost of imported ores, as well as in wages and railway rates. It was explained that higher production and efficiency had made it possible for the industry itself to absorb part of the increased costs, and that the new prices would still be about 15 per cent below U.S and continental prices

Export prices for heavy steel products were increased by £2 per ton from April 4, and by an average of 5 per cent for all steel products from July 28. The latter increase brought British export prices up to the level established by the Brussels Export Cartel at the beginning of July.

Steel Industry Expansion. It was stated on July 4 that preliminary work had begun on a continuous strip mill, to cost about £3,600,000, at the Rotherham works of Steel, Peach, and Tozer, a branch of the United Steel Companies Ltd.

The August issue of the *British Iron and Steel Federation Monthly Bulletin* gave details of major development projects in hand for the iron and steel industry in the North-Eastern area. It was estimated that between 1953 and 1958 about £62,000,000 would have been spent on new capital developments in the area, that production of pig-iron and steel would rise by nearly two-fifths, to 3,650,000 tons and 4,750,000 tons respectively; and that the area would then have almost doubled its output of pig-iron and steel since the war. The projects included, in addition to the Dorman, Long developments already announced (see 12871 A): (*a*) five new blast furnaces (two at Cleveland and one at West Hartlepool, expected to be ready in 1955, one at Middlesbrough, to be completed in 1956, and a second furnace at West Hartlepool, expected to be ready in 1957-58), (*b*) new wharves, ore stockyards, and sinter plants at the South Durham Steel Co.'s West Hartlepool and Middlesbrough works, and extensions to rolling-mills at these works intended to increase production of plates, sections, etc., by 50 per cent; (*c*) new coke-ovens at Consett and West Hartlepool; (*d*) extensions to rolling-mills at Skinnington and Darlington.

Public Offer of Steel Shares. On July 26 the Iron and Steel Holding and Realization Agency offered for sale the whole of the reorganized share and loan capital of Hadfields Ltd., viz., 2,500,000 £1 Ordinary shares (at 27s 6d. each) and £1,250,000 4½ per cent Debenture stock (at £96 per cent).

The Ordinary share offer was heavily over-subscribed, and it was announced on July 28 that about 2,000 applications for approximately 3,600,000 shares had been received from former shareholders and from employees of the company (who had been promised preferential treatment), and nearly 100,000 from the general public Of the preferential applications, those for up to 500 shares were accepted in full, but larger ones only to an average of under 25 per cent, with the largest applications heavily scaled down. Non-preferential applications were dealt with by ballot, each successful applicant receiving 100 shares

The Debenture stock issue was also over-subscribed, with 900 applications for nearly £1,600,000 of stock. Those for up to £10,000 were accepted in full, and larger ones to the extent of about 70 per cent.

Sir Anthony Eden announced in the House of Commons on June 14 that the responsibility of the Ministry of Supply for the iron and steel, non-ferrous metals, and engineering industries would be transferred to the Board of Trade "in about one month's time." He explained that the purpose of the transfer was "to relieve the Minister of Supply of duties that are extraneous to his prime duty of supplying the armed forces, and to associate the Board of Trade more closely with certain major industries of great importance to the country's export trade."—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. Production Statistics, 14003 A; Denationalization Offers, 14206 B.)**

B. AVIATION. — New Records by British Airmen. - Double Transatlantic Crossing in 14½ Hours. - World Altitude Record.

Two British airmen, Captain John Hackett (32) and Mr. Peter Moneypenny (28), set up a new record on Aug. 23 by being the first men to have breakfast in London, luncheon in New York, and supper in London after a double crossing of the Atlantic. The outward and return flight was carried out in 14 hours 21 minutes 45 seconds (including a 35-minute stop in New York for refuelling) at an average speed of 481.5 m.p.h. The machine was an English Electric *Canberra* twin-jet photo-reconnsaissance aircraft, with Captain Hackett as pilot and Mr. Moneypenny as navigator.

Subject to confirmation by the *Fédération Internationale Aéronautique*, three new records were set up. (1) for the east-west crossing of the Atlantic (Croydon Airport to the Floyd Bennett Naval Field, New York, a distance of 3,457.9 miles) in 7 hours 29 min. 56 sec., at an average speed of 461.1 m.p h., (2) for the return flight in 6 hours 16 min. 59 sec, at an average speed of 550 35 m.p.h., and (3) for the round trip of nearly 7,000 miles, as given above

The *Canberra* left London Airport at 7.10 a.m. B S.T., flew over Croydon Airport (the official starting and finishing point), and arrived at the Floyd Bennett Field, New York, at 2.48 p m. B S T. After a 35-minute break, during which the plane was serviced and refuelled by U S. Navy mechanics working under the supervision of British technicians, the *Canberra* left New York at 3.23 p.m. B.S T., passed over Croydon at 9 41 p.m, and touched down at London Airport The flight was timed by observers of the Royal Aero Club on behalf of the *Fédération Internationale Aéronautique*.

On returning to London Airport, Captain Hackett paid special tribute to the co-operation given by the U.S Navy in refuelling the machine during the 35-minute stop in New York.

An English Electric *Canberra*, powered by two Bristol *Olympus* turbo-jet engines, set up a new world altitude record of 65,876 ft. (20,079 metres, or nearly 12½ miles) on Aug. 29. The machine took off from Filton airfield, Bristol, and was piloted by Wing-Commander W. F. Gibb, a test pilot of the Bristol Aeroplane Company. The previous altitude record of 63,668 ft. had been achieved by the same pilot and the same aircraft in May, 1953.—(Times - Daily Telegraph) **(Prev. rep. Record Flights, 14298 C; Altitude Record, 13227 B.)**

C. PAKISTAN. — Diplomatic Appointments.

It was announced in Karachi on Aug. 24 that Mr. Mohammed Ali, the former Prime Minister, had been appointed Ambassador in Washington—a post which he had held for a short time before his appointment to the Premiership in April 1952.

Other recent Pakistani diplomatic appointments were those of Mr. Tafazzal Ali as Ambassador to Egypt, Minister to Libya, and Minister to the Yemen (December 1954); Mr. Shuaib Quroshi as Ambassador to Iraq (January 1955), General Raza, previously Ambassador in Peking, as Ambassador to Persia, where he took up his appointment on Feb 10; and of Dr. A M Malik as Ambassador to Switzerland and Minister to Austria (in July).

Mr Akhtar Husain presented his credentials in March as the first Pakistani Ambassador to Italy, following the decision of both Governments to raise their Legations in Rome and Karachi to Embassy level

It was announced in Karachi in February that Pakistan would establish diplomatic relations with Mexico at Embassy level and with Cuba at Legation level. The Pakistani Ambassador in Washington was subsequently accredited to Mexico as well as to the U.S.A.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 14021 D).**

D. ISRAEL. — The Bar-Ilan University.

A new university was opened near Tel-Aviv on Aug. 8 under the name of the Bar-Ilan University—so called after the Hebrew name of the late Rabbi Meier Berlin, an eminent religious scholar. Established from funds raised by Jewish orthodox groups in the United States, it aims to teach the humanities and sciences against a background of traditional Judaism. It is the second institution of university status in Israel, the other being the Hebrew University of Jerusalem. (Jewish Observer and Middle East Review)

A. ARGENTINA.—Political Developments. - President Perón's "Political Pacification" Offer. - Demand for Restoration of Constitutional Freedoms by Radical Party and Roman Catholic Church. - Formation of Christian Democratic Party. - Cabinet Changes. - Alleged Plot to assassinate President Perón. - State of Siege in Buenos Aires.

In a radio broadcast on July 5, President Perón offered the Opposition parties "a truce in the political fight" and absolved them from any responsibility for the uprising of June 16, thereby reversing his earlier condemnation of the Opposition for alleged complicity in the revolt. After expressing his conviction that the revolt was solely the work of certain naval units, who had intended "to assassinate the Commander-in-Chief of the armed forces" (i.e. President Perón himself), the President continued:

"They [the dissident naval units] counted upon the help of certain groups of civilians recruited from the non-political sectors. Political forces as such did not participate, although some politicians may have acted in a personal capacity . I consider that the political parties would not participate in criminal attempts against defenceless people . . . and that there are few political leaders who desire disturbances rather than peace . . .

We have heard, for the first time in many years, some voices in the Opposition asking for peace and understanding among Argentinians. . . We have been asking for the same thing for the past ten years . . . Peronistas and Oppositionists all have something in common. Let us get together to serve this common interest, although in other things we may disagree We Peronistas are so numerous that there is no reason why we should attempt to convert our adversaries. . . In order to demonstrate our good faith and party discipline, I ask that our fellow-countrymen effect a truce in the political fight."

Dr. Arturo Frondizi, leader of the Radical Party (the principal Opposition party in Argentina), declared on July 7 that President Perón's appeal for a political truce "would only become significant when it is backed up by real moves towards pacification"; otherwise it could only be "a manoeuvre to subjugate political opinion." He added that political pacification was "impossible without a climate of liberty," and expressed the opinion that the uprising of June 16 was "simply a result of the pressure under which the country has been living for the past ten years—in the absence of normal liberties something had to give way sooner or later."

In a broadcast from Belgrano Radio on July 27 (the first broadcast that an Opposition leader had been allowed to make for ten years), Dr. Frondizi said that "political pacification," as called for by President Perón, could only be achieved by restoring constitutional government, ending the "state of internal war" which had been in force by decree for over three years, and repealing all laws and edicts suppressing freedom. He called, *inter alia*, for freedom for all the political parties, freedom of the Press, freedom of religion, an amnesty for all who had "suffered persecution, imprisonment, or exile for their ideals"; an end to "embezzlement and bribery" so as to "clear the atmosphere of corruption which envelops the life of the country"; and the appointment of an independent judiciary "without political affiliation."

President Perón announced on July 15 that he had relinquished the leadership of the Peronista Party in order that he could become "President of all Argentinians, friends or foes." He declared that the Peronista revolution had achieved its aims and that a new phase had begun; promised that all constitutional guarantees, rights and liberties would be restored, including freedom of the Press; and reiterated that his Government intended to work for political pacification. In conformity with the new policy of separating the party from the Government, Rear-Admiral Teisaire (the Vice-President) announced his resignation from the chairmanship of the National Council of the Peronista Party on July 22 in order to devote himself solely to his duties as Vice-President of the Republic. Dr. Alejandro Leloir, a lawyer, landowner, and cattle-breeder, was elected chairman of the party's National Council on July 27.

On the morning of Aug. 31 President Perón sent a letter to all branches of the Peronista movement—the party organization, the General Confederation of Labour, and the women's organization—offering to resign from the Presidency of the Republic "if it will guarantee peace." [It was pointed out in the American and British Press that the proffered resignation had not been made to the Argentine Congress, which was the only body constitutionally authorized to accept or reject such an offer.] The letter was worded, in part, as follows:

"For 12 years we have fought for the sovereign rights and dignity of the Argentine people against fraud, privilege, and exploitation of the workers. To achieve it, in the face of violence, we have unavoidably been forced to limit constitutional guarantees of freedom. . . . We have achieved social justice, economic independence, and sovereignty such as the country had never previously known. We took over a colony; we hand over a free and sovereign nation. We have organized the people, making manifest its will through labour unions and political and economic institutions which it will be difficult for the perfidious oligarchy and its agents to destroy.

What remains to be realized is the exclusive task of the people in its cultural and spiritual evolution. . . . It is time for Argentinians to reach agreement and to consolidate what we have offered them through our struggle, our labour, and our sacrifices. The hours of reform and conflict are past; now come those of labour and consolidation

As I once offered my life to restore justice and correct the social, economic, and political ills of the country, I now believe that the moment has come to offer my resignation if it will guarantee peace . I have often heard it said that my disappearance will bring grave problems I do not think it will be so serious. . Some madmen or political adventurers speak of civil war We shall have no such thing here—there will be peace or dictatorship I do not have the makings of a dictator. If there is to be such a solution, another must replace me. . ."

The Peronista Party and the trade unions immediately declined to accept President Perón's resignation and called upon him to remain Head of State; Vice-President Teisaire declared that he would also resign if the President did so, whilst all Peronista senators and deputies announced that they would resign their seats in Congress if the President carried out his intention. The General Confederation of Labour proclaimed an immediate nation-wide general strike in support of President Perón, and called upon all workers to demonstrate in city centres and to "remain in permanent civic session" until the President had withdrawn his resignation. Despite the fact that President Perón's intended resignation had only been announced a few hours beforehand, large numbers of workers in Buenos Aires and in towns and villages throughout the country asssembled for mass demonstrations in support of President Perón, the stoppage of work being virtually complete throughout Argentina. President Perón announced on the same evening that he had withdrawn his offer of resignation.

Other recent developments in Argentina are summarized below under cross-headings:

Cabinet Changes. The following new Cabinet appointments were announced in Buenos Aires on June 30: Dr. Oscar Albrieu as Minister of the Interior and Justice *vice* Señor Angel Borlenghi, who had held that post for nine years; Señor Jose Maria Castiglione as Minister of Agriculture and Livestock *vice* Señor Carlos Hogan (a former Ambassador in London); Señor Alberto José Iturbe as Minister of Transport, and Dr Francisco Marcos Anglada as Minister of Education. Dr. Albrieu (a former Radical) joined the Peronista Party on its formation, and is chairman of the constitutional affairs committee of the Chamber of Deputies The other new Ministers are also members of the Peronista Party Señor Borlenghi, a prominent member of the General Confederation of Labour, had tendered his resignation to President Perón on June 29 on the ground that he wished to return to his trade union activities.

On Aug. 25 it was announced that Dr Ildefonso Cavagna Martinez had succeeded Dr. Jerónimo Remorino as Minister of Foreign Affairs The new Foreign Minister, a personal friend of President Perón, was president of the Argentine National Bank in 1947-49 and subsequently head of the Economic Division of the Foreign Ministry, in which capacity he was specially engaged in bringing about closer economic relations with Argentina's neighbours, particularly Bolivia and Paraguay. His predecessor, Dr. Remorino, had been Foreign Minister since 1951, and had served concurrently as Minister for Religious Affairs, in which capacity he was responsible for relations with the Roman Catholic Church Dr. Pedro Enrique Yesari was appointed Secretary of State for Technical Affairs on Aug. 29 in succession to Dr Raul Mende

The Roman Catholic Church. The Foreign Minister (then Dr. Remorino) and the new Minister of the Interior (Dr Albrieu) had a meeting on July 2 with the Papal Nuncio in Buenos Aires and also with Monsignori Roca and Albino, respectively Auxiliary Bishop and Pro-Vicar of the Diocese of Buenos Aires. Although no official statement was published, it was understood that the Government were seeking a *détente* with the Roman Catholic Church in pursuance of President Perón's new policy of "pacification" On July 14 the Roman Catholic Episcopate in Argentina issued a pastoral letter, signed by the Primate of Argentina (Cardinal Copello) and five archbishops, calling for complete freedom of the Press, radio, and public assembly as "indispensable conditions" in order that "a real public opinion representing the thought of all inhabitants of the country can fully and freely express itself." The pastoral letter stressed that it was essential that the rights and liberties of the Church and its institutions should be protected and safeguarded. Following these developments, the Chamber of Deputies passed a Bill on Aug. 11 postponing for six months—i.e. from November 1955 until May 1956—the elections for a National Convention to amend the Constitution and disestablish the Roman Catholic Church The Bill was signed by President Perón on Sept. 6 after adoption by the all-Peronista Senate.

It was reported from Buenos Aires on July 12 that the Roman Catholic Hierarchy had declined an offer by the Government to rebuild, at the expense of the State, the churches which had been destroyed in the riots of June 16. The Dominican and Franciscan Orders—some of whose churches were already in the hands of

Government workmen—were reported to have sent strong protests to the Ministries of the Interior and Justice declaring that the Government's action was an illegal interference with the rights of private property, calling upon it to withdraw the workmen, and pointing out that the faithful wished to restore the churches from their own financial contributions. Many of the burned churches had become the scene of religious pilgrimages since the riots of June 16.

Cardinal Spellman, the Roman Catholic Archbishop of New York, said in a press statement on Aug 17 that the people of Argentina thought that it was President Perón himself, and not the Communists, who had organized the recent attacks on Roman Catholic churches in that country. The cardinal (who made his statement in New York after returning from the 36th International Eucharistic Congress in Rio de Janeiro) referred his interviewers to Mgr Gustav J. Schultheiss (Chancellor of the Archdiocese of New York) for further details, pointing out that Mgr. Schultheiss had personally visited Argentina whereas he (the cardinal) had visited Brazil and Paraguay. In reply to questions, Mgr. Schultheiss said that he had counted as many as 15 churches in various stages of destruction in Buenos Aires, that it was estimated that at least 70 Catholic churches had been destroyed throughout Argentina in the riots of June 16, and that the Argentine people believed that the attacks had been organized by the Peronistas because the attackers had transported such inflammable materials as naptha and petrol to fire the churches in trucks bearing the markings of the Eva Perón Foundation and of the Ministry of Education. In view of this, he alleged that the planned attacks on the churches "certainly could not be unknown to the Perón Government."

The statements of Cardinal Spellman and Mgr. Schultheiss were strongly repudiated in the Argentine Press and by the Eva Perón Foundation The latter institution issued a declaration—published in *La Nación* and other leading newspapers—declaring that those who sought to associate the Foundation with "barbarous acts" had forgotten their Christian duty "not to bear false witness or to lie," whilst the Peronista organ *La Epoca* attacked the prelates for not having condemned "the slaughter of innocent people" during the uprising of June 16 [a reference to the heavy civilian casualties in Buenos Aires when bombs from the insurgent aircraft fell in the Plaza de Mayo].

Despite the Government's apparent intention of seeking a *détente* with the Roman Catholic Church, Dr. Albrieu issued a statement on Aug. 17 accusing the clergy in Buenos Aires and other cities of inciting people to violence and of waging "a pseudo campaign in defence of religion." After alleging that priests had preached seditious sermons, and that arms and explosives had been found in Catholic schools, he warned the clergy that they were liable to prosecution under the penal code for "instigation to commit crime"

Formation of Christian Democratic Party. The formation of a new party, the Christian Democratic Party, was announced on July 12. Its manifesto denounced the "monster of the all-powerful State" which had arisen in Argentina; described the country as living "in an unbearable tension as a result of the hate, artificial class-warfare, lack of confidence, and violence of recent years"; and declared that this situation could be remedied only by "the immediate and full implementation of the constitutional guarantees of freedom of speech, the Press, person, and economy—freedoms which have been systematically denied to every Argentinian in greater or lesser degree in recent years" The manifesto called, *inter alia*, for a return to a full Republican-type government, involving the separation of the executive, legislative, and judicial functions; the creation of an independent and non-political judiciary, a concordat between the Church and State, under which the rights of the Church would be fully recognized, the restoration of freedom of speech, the Press, and assembly; and abrogation of the legislation which legalized divorce and prostitution The manifesto was signed by five Roman Catholic lawyers constituting the party's organizing committee.

Sentences on Rebels. It was reported on Aug. 11 by American and British correspondents in Buenos Aires (but not officially announced by the Argentine Government) that the Supreme Military Tribunal investigating the uprising of June 16 had sentenced Rear-Admiral Toranzo Calderón (former Commandant of the Marine Corps) and six other admirals to life imprisonment, that 25 other officers had received terms of imprisonment for up to three years, that Rear-Admiral Olivieri (Navy Minister at the time of the revolt) had been found "not guilty" of participation in the revolt but guilty of negligence, and had been sentenced to 18 months' imprisonment and dismissal from the Service with ignominy; and that 19 defendants had been acquitted. Rear-Admiral Gargiulo, who committed suicide after the revolt failed, was said to have been identified as a leader of the revolt together with Rear-Admiral Toranzo Calderón

President Perón had issued a decree on July 7 dismissing 80 Naval officers and 25 Air Force officers "with dishonour" after the Supreme Tribunal had found them to be rebels. Most of the dismissed officers had taken refuge in Uruguay after the failure of the uprising.

Alleged Plot against President Perón. The Federal police announced on Aug. 15 that they had discovered a plot to assassinate President Perón, General Franklin Lucero (the Army Minister), and other senior Government officials and Army commanders, and that 55 persons had been arrested. It was stated that the conspirators had planned to sabotage the capital's public utilities, to capture the radio station, the headquarters of the General Confederation of Labour, and Government offices, and to assassinate the President in the confusion caused by these attacks. It was alleged that the conspirators had rented apartments, overlooking the route along which the President drove every day, from which the assassination attempt was to have been made.

The alleged plotters were said to comprise Roman Catholic nationalists, Communists, and members of the Opposition parties, and to have operated in three groups. Among the persons mentioned by name were a retired naval officer, Captain Tettamenti, who was alleged to have bought arms and delivered them to two Roman Catholic priests; Dr Mario Amadeo, a former professor of international law; Señor David Torino, a Radical, and former publisher of the newspaper *El Intransigente*; Señorita Angelica Mackintosh, described as a member of the Catholic Action organization, who was said to have distributed subversive pamphlets; several young Roman Catholics prominent in Buenos Aires society, and members of a Communist "cell" It was alleged that a Roman Catholic school had been used as a centre for storing and distributing arms and ammunition.

A number of street clashes occurred in Buenos Aires during the middle of August between Peronistas and Roman Catholics, leading to many arrests and, in some cases, to the use of tear-gas and fire-hoses by the police against anti-Government demonstrators On Sept. 2 the Chamber of Deputies approved a Bill—sponsored by the Peronista majority—imposing a state of siege in Buenos Aires because of the "constant plots and disorders in the capital, although the rest of the country is tranquil." An edict was published on the same day by Major-General Felix Maria Robles (who had been appointed Director of Public Safety on Aug. 25) enumerating a list of offences which would be "repressed with the utmost severity." They included the unauthorized possession of arms, ammunition, and explosives, for the surrender of which 48 hours was allowed; the spreading of rumours, either orally, telephonically, or in writing; the printing, possession, and distribution of "subversive" pamphlets or other publications; and unauthorized meetings and demonstrations.

In a speech to Peronista Party members on Sept. 2, President Perón accused the "oligarchy" of having rejected his "political pacification" offer, and threatened "war to the death" against enemies of the regime.—(New York Times - New York Herald Tribune - Times - Daily Telegraph - Le Monde, Paris)

A. BURMA - SOVIET UNION. — Trade Agreement.

A three-year trade agreement between the Soviet Union and Burma, together with a protocol on Soviet purchases of Burmese rice against Soviet supplies of equipment, machinery, etc., were signed in Rangoon on July 1 by U Raschid, the Burmese Minister of Trade Development, and M. Shiborin, the Soviet Ambassador.

The trade agreement provided that both countries would develop their trade relations to the maximum, based on the principles of equality of rights and mutual benefit, that they would grant each other every facility for the import and export of goods, and that merchant vessels of either country would enjoy most-favoured-nation treatment *vis-à-vis* the other country.

Burmese exports to the U.S.S.R will include rice and rice products, beans and pulses, oil-cake, non-ferrous metals, hardwood, rubber, etc., whilst Soviet exports to Burma will include hydro-electric power stations, tractors and agricultural machinery, motor cars, electro-technical and telecommunication equipment, excavators, pumps and compressors, printing equipment, metal-working machines and tools, motor-cycles and bicycles, photographic and cinematographic equipment, rice-mill equipment, textile machinery, newsprint, cement, steel products, chemical and pharmaceutical products, medical equipment, etc.

Under the supplementary protocol Burmese rice deliveries to the U.S.S.R. will amount to 150,000 - 200,000 tons a year.
(Burmese Government Information Department, Rangoon)

B. GERMANY. — U.S. Aid to West Berlin.

A report published on Aug. 9 by the U.S. mission in West Berlin stated that 2,400,000,000 DM. of counterpart funds (equivalent to $571,421,000) had been allocated since 1949 as aid to West Berlin's economy and had played a decisive role in the city's economic reconstruction and revival. The immediate aim had been to reduce unemployment, which (the report stated) had fallen from 300,000 in the spring of 1950 to 125,000 in July 1955. Among the principal industries benefiting from the counterpart funds were the electrical, textile, machinery, food-processing, metals, and chemical industries. (New York Times) **(Prev. rep. 14216 B; 13914 B.)**

C. TUNISIA. — Home Rule Conventions signed by the Bey. - Deposit of Ratification Instruments.

The Franco-Tunisian conventions providing for Tunisian internal autonomy and for the protection of the rights of the French population in Tunisia were formally signed by the Bey of Tunis on Aug. 27. Instruments of ratification in respect of the conventions were deposited in Paris on Aug. 31.

A. UNITED KINGDOM.—Monopolies and Restrictive Practices Commission. - Report on Discriminatory Trade Practices. - Government Proposals. - Report on Supply of Buildings in Greater London Area. - New References to Commission.

The report of the Monopolies and Restrictive Practices Commission on collective discrimination, covering agreements for exclusive dealing, collective boycott, aggregated rebates, and other discriminatory trade practices, was published on June 28. The Commission's inquiry—the first general inquiry which it had undertaken—was carried out by a panel of ten members, including the Commission's chairman, Sir David Cairns, Q.C., in response to a reference made to it in December, 1952. Sir David and six other members of the panel found that, in general, the agreements investigated by the Commission affected the public adversely, and recommended that they should be prohibited by statute, with provisions for exceptions in special cases. The remaining three members of the panel, however, signed a "note of dissent" recognizing that some practices might be injurious in certain circumstances, but opposing a general prohibition of the agreements by statute. Instead, these members recommended that all agreements on discriminatory trade practices should be registered, and that those found after investigation to be contrary to the public interest should be prohibited.

The report distinguished six main categories of agreements coming within its terms of reference, and covering respectively:

(1) Collective discrimination by sellers, without any corresponding obligation on the buyers.

This category covered agreements among suppliers requiring them to discriminate in favour of certain buyers, without any reciprocal obligation on the latter to discriminate in favour of the suppliers, or to adhere to any specified terms for resale. As examples, the report quoted: (*a*) arrangements under which a group of manufacturers agreed to sell only to wholesalers on an "approved list"; (*b*) arrangements under which such a group agreed to give wholesalers a percentage discount off their prices to retailers for similar quantities.

(2) Collective discrimination by sellers in return for exclusive buying.

This type comprised agreements (known as "exclusive dealing agreements") between suppliers to discriminate in favour of certain buyers, who undertook in return to buy exclusively from the suppliers concerned. Thus, a group of manufacturers might agree (*a*) to sell only to wholesalers who undertook to buy certain goods exclusively from members of the group; (*b*) to allow discounts to buyers who gave such an undertaking.

(3) Collective adoption by sellers of a policy of maintaining resale prices or imposing other collateral trading obligations on the buyers.

The report pointed out that this type of agreement came within its terms of reference because it had the effect of requiring the parties to it to discriminate by withholding supplies from buyers who would not undertake to observe the agreed conditions.

(4) Collective discrimination by sellers to enforce resale prices or other contract terms.

This category comprised agreements among suppliers requiring them to discriminate collectively against buyers who would not observe trading conditions laid down by the suppliers—notably the maintenance of resale prices. Whereas agreements in category (3) concerned the conditions on which goods were to be resold, the class of agreements in category (4) concerned the enforcement of these conditions. The report stressed, however, that in many trades agreements were found providing both for the adoption of common conditions of sale and for their enforcement.

(5) Collective discrimination by buyers, without any corresponding obligation on the sellers.

This class consisted of agreements amongst buyers (often referred to as "buyers' boycotts") to discriminate in favour of certain suppliers by buying exclusively from them.

(6) Aggregated rebates.

The report explained that under these agreements a group of suppliers agreed to give a rebate to some or all of their customers based on the total purchases of each customer from all suppliers in the group. Thus, a buyer who bought £10 worth of the relevant goods from each of five suppliers would qualify for a rebate calculated on his total purchases from all members of the group, the rate of rebate varying according to the total bought by the individual customer over a given period. Aggregated rebates might be given to all customers who bought on a big enough scale, or they might be confined to certain classes of customers selected for their qualifications (e.g. to distributors or to very large users). They might be further restricted to those who gave "exclusive dealing" or other undertakings.

The report dealt with the arguments for and against each category, the principal arguments and the Commission's conclusions being summarized below:

Category 1—Collective Discrimination by Suppliers.

Arguments in favour. These were in general similar to the arguments distributors' maintaining certain standards of service, and they could not do this without the agreements, which protected "good" distributors from the pressure to reduce standards which would result from unrestricted competition. (*b*) In many trades, "specialized" distributors stocked a wide range of related goods, both "quick-selling" and "slow-selling", unless these specialized distributors were protected, they might be threatened by more general distributors who stocked only the quick-selling lines and thus "took the cream of the trade."

Arguments against. The most important of these was that to ensure proper standards of service by distributors, and in fact did not always achieve this purpose. (*b*) The protection afforded to distributors might lead to a higher and more costly standard of service than many consumers required. (*c*) The agreements impeded the development of more economical forms of distribution.

Conclusion. After balancing these arguments, the majority of the Commission concluded that agreements of this kind operated against the public interest. In a few trades, however, the general disadvantage might be outweighed by certain positive advantages.

Category 2—"Exclusive Dealing" Agreements.

Arguments in favour. These were in general similar to the arguments used to justify agreements in category (1), but usually laid particular emphasis on the need for protection against excessive competition and on the advantages of a stable market. Some industries stressed that excessive competition had formerly led to poor wages and working conditions, or to serious deterioration in the quality of the goods produced; others claimed that the machinery for adjusting tariffs against "dumping" by foreign producers worked so slowly that they were forced to rely on "exclusive dealing" agreements for protection. Some trade associations also argued that in their particular industries "exclusive dealing" agreements were necessary to protect the bargaining power of small manufacturers against the large distributing houses.

Arguments against. The most important of these was that "exclusive dealing" agreements created undue rigidity and went far to eliminate competition from outside suppliers, since, once a large number of buyers were committed to buy only from suppliers inside the group, it became extremely difficult for independent producers to find a market.

Conclusion. The Commission found that "this form of restriction is one that, in general, most clearly operates against the public interest." It added, however: "Exclusive-dealing agreements sometimes serve to protect from overseas competition industries which have claimed that their goods are of strategic importance or are particularly vulnerable to competition from dumped imports which the U.K. tariff cannot prevent. It is not within our competence to decide which industries should be regarded as important from a strategic point of view . . . We think it sufficient to record that this argument has been used, and that in the absence of exclusive-dealing agreements in certain trades there might be increased imports of some kinds of goods which the Government might consider not to be in the national interest and against which it might wish to take action in other ways."

Categories 3 and 4—Resale Price Maintenance Agreements.

Arguments in favour. Resale price maintenance benefited both traders and the general public, since (*a*) by protecting distributors' margins it created a more stable distributive trade and concentrated competition on the improvement of standards of service; (*b*) it created marketing conditions in which the sale of widely-advertised branded products could most effectively be developed. In this connexion, many manufacturers held that the advertising of branded products at fixed prices helped to create a steady demand, enabling them to plan production ahead and to ensure the greatest possible manufacturing economies.

Arguments against. That resale price maintenance was not essential for the marketing of branded products was shown by the fact that many such products were successfully advertised and sold without it in Britain, the U.S.A., Canada, and Sweden (resale price agreements being illegal in the last two countries). The report admitted that large temporary price reductions of the "loss-leader" type (i.e. reductions below normal with the object of attracting future sales) might cause instability in demand, but held that the rigid enforcement of identical resale prices for all distributors of particular products went much further than was necessary to ensure stable demand. In any case, the disturbing effect of "loss-leader" selling was largely due to the existence of normal "fixed prices" and would be much less marked if these were not advertised and maintained.

Conclusion. After carefully weighing these arguments, the Commission found (*a*) that such agreements gave the trade associations "an excessive and dangerous power" over individual traders, particularly as the associations' proceedings were not subject to the strict procedural rules applied in the ordinary courts, (*b*) that the agreements could not be regarded merely as devices for enforcing contract observance, since action was sometimes taken under them against traders who were not members of the association concerned, and were therefore not bound by any contractual obligation. The Commission therefore reached the conclusion that, in general, these agreements also operated against the public interest.

Category 5—Collective Discrimination by Buyers.

Arguments in favour. Supporters of these agreements claimed that they were necessary in order to protect distributors against encroachments on their legitimate position. They pointed out that a

strong supplier or group of suppliers might decide to reduce the resale prices of branded goods at the expense of distributors' margins, or might choose to offset rising production costs by "nibbling" at these margins rather than by raising the final price to the consumer. Alternatively, suppliers might adopt forms of competition amongst themselves (i.e. gift-coupon schemes) which distributors thought unreasonable, or, on the other hand, might be unwilling to adopt selling policies which distributors thought desirable. In these circumstances, distributors might feel that their only protection, if they were to give proper service, lay in collective action

Arguments against. (*a*) In a competitive market other suppliers would be ready to supply alternative goods, and distributors would therefore not need this form of protection. (*b*) Exclusive-buying agreements could be used to ensure a privileged position for established distributors as a class, without reference to the quality or range of the services provided by them, or to the requirements of their suppliers.

Conclusion. The majority of the Commission were satisfied that the arguments against this type of agreement outweighed any argument in its favour, and that such agreements in general operated against the public interest

Category 6—Aggregated Rebates.

Arguments in favour. The report explained that individual suppliers trading in a competitive market usually allowed some discount or rebate for quantity, and that aggregated rebates were regarded by many of the trades operating them as no more than a special form of this discount. The argument chiefly used in support of the system presupposed the existence among the suppliers of common price arrangements, it being contended that aggregated rebates were an indispensible feature of any common price system on two related grounds (*a*) that they were the only form of quantity discount compatible with common prices; (*b*) that they introduced flexibility into rebate systems, and enabled buyers to distribute their orders at their convenience amongst members of the group and still obtain the economies of bulk deliveries It was also argued that the scheme concerned only the larger buyers, and placed no deterrent on the use by smaller buyers of alternative sources of supply.

Arguments against. (*a*) Aggregated rebates impeded competition from independent producers, because of the strong economic incentive given to buyers to confine their purchases to members of the group. (*b*) Independent producers who sought to offset this incentive by quoting lower prices would have to allow for the total value of the aggregated rebates which the consumer would lose through buying outside the group (*c*) It was untrue that aggregated rebates were "the only form of discount appropriate to a common price system," since the payment of simple quantity discounts at rates agreed among the suppliers was "quite compatible with the general principle of common prices". (*d*) Aggregated rebates did not serve the same purpose as quantity discounts paid by individual firms, since they actually eliminated incentives to concentrate orders with particular producers

Conclusion. The majority of the Commission, whilst passing no judgment on the "common price" system itself, considered that aggregated rebates "accentuated its most dangerous features," and that this generally outweighed any advantage which they had in assisting the smaller manufacturers operating within the common price system. They concluded, therefore, that such rebates generally operated against the public interest, but recognized that in certain exceptional circumstances they might be "an essential feature of a common price system which might be found to be in the public interest."

General Conclusions.

Effects of Collective Discrimination Agreements. In a summary of its general findings, the majority report stressed that the signatories had been particularly impressed by "the effect of a binding and collective obligation in preventing traders from experimenting and from trying out new and different ways of conducting their businesses" Such obligations created "an undue rigidity" which might affect "the number and kinds of concerns engaged in a trade, the trading methods of those established in it, and the level of prices, both generally and to different classes of consumers." Moreover, the collective selection of favoured traders, either for exclusive selling or buying or for sales on preferential terms (categories 1, 2, and 5) could easily "lead to the creation of a privileged group, subject to relatively little outside competition." The majority report added: "We recognize that manufacturers have a legitimate interest in the service given by distributors, and may therefore need to select carefully those who are to handle their goods; we think, however, a manufacturer should be able to safeguard his interests . . by his own arrangements with individual distributors without being required to limit his trade to those who have been collectively approved."

Circumstances in which Collective Discrimination might be justified. The majority report listed the following circumstances in which agreements in the various categories discussed might be justified, subject to suitable safeguards:

"(*a*) Where consumers are not able to judge the standard of service which it is in their interests to demand from distributors, and the matter cannot conveniently be dealt with by legislation.

(*b*) Where an exclusive-buying or exclusive-dealing agreement protected an industry of strategic importance or one that is peculiarly susceptible to damage from imports, and protection by Government action is impracticable.

(*c*) Where a common price agreement is found after inquiry to operate in the public interest, and agreements within the scope of their present inquiry are necessary for its effective operation.

(*d*) Where the practices are necessary to enable small firms to compete with a very large concern which is itself employing restrictive practices"

General Control Measures. After discussing the policies adopted with regard to collective discrimination in the U.S.A., Canada, and Sweden, the report considered two possible alternative courses of action, either of which would require legislation:

(1) Compulsory registration and publication of agreements, with subsequent prohibition of those found after investigation to be against the public interest.

(2) A general prohibition of collective discriminatory practices, with provision for exceptions—on the grounds stated above—in particular cases

The majority of the Commission preferred the second course, and suggested that exceptions might be made by Statutory Order on the advice of an independent body, which would assess the merits of each application

The remaining three members, however, stressed that they were not "prepared to say that the practices, as they exist over a very wide field of trade and industry, are in general injurious to the public interest." They recognized that some might be injurious in certain circumstances, but did not think that industries should be prevented from using them without an opportunity of having their cases examined individually. A general statutory prohibition seemed to them "likely to create a degree of inflexibility in the law which might in the future prove undesirable," but they emphasized that they would be prepared to accept the idea of compulsory registration of agreements.

These three members considered that arrangements between manufacturers or distributors requiring all the parties to fix resale prices or to handle only price-maintained goods were "likely to be against the public interest." They disagreed, however, with the majority view about the undesirability of collective arrangements for the enforcement of resale prices, and argued that if it were lawful for individual manufacturers to prescribe such prices, it was "illogical that they should be debarred from enforcing their maintenance in the most effective manner consistent with general law."

The seven members of the panel who signed the majority report were Sir David Cairns, Q.C., Professor G. C. Allen, Mr. J. A. Birch, Mr. C. N. Gallie, Mr. C. H. P. Gifford, Professor Sir Arnold Plant, and Sir Richard Yeabsley. Mr. Gifford, however, added a rider stating that, for the reasons given by the minority in their "note of dissent," he did not consider that collective agreements for the enforcement of resale prices operated in general against the public interest.

The "note of dissent" was signed by Sir Thomas Barnes, Mr. Brian Davidson, and Professor A. L. Goodhart, Q.C.

A debate took place in the House of Commons on July 13 on a Government motion welcoming the report "as a basis upon which H.M. Government can formulate their proposals."

Mr. Peter Thorneycroft (President of the Board of Trade) warned the House against "working itself into a state of moral indignation" about the practices examined in the report These practices, "like the closed shop in the coalmining industry or strict rules for the demarcation of labour," might be "socially or economically sound or unsound, wise or unwise," but were not "criminal or morally repulsive." After pointing out that there was a good deal of common ground between the majority and minority reports, both of which agreed that some sensible method must be found of sifting practices which were tolerable from those which were not, he explained that whilst the Government did not think that the minority report went far enough, they "detected a certain odour of criminality" in the majority report, with the creation of "a new range of criminal offences" They believed that it was possible to "get through the tangled arguments about these economic and commercial problems with rather less emphasis on the criminal code," and hoped to find some way of doing so.

Another feature of the majority report, Mr. Thorneycroft stressed, was a complete absence of a solution to the question of resale price maintenance, which had already been examined on three separate occasions in the past 30 years and had never been condemned; manufacturers, distributors, consumers, and the trade union movement had all given evidence that they believed this practice to be in the public interest "Here, then, is the dilemma which faces us," he continued. "A powerful body, including consumers, is in favour of individual fixing of resale prices. At the same time, for many of the goods the only effective methods of enforcement are the collective arrangements condemned by both the Commission and the Lloyd Jacob report." The Government believed that the sensible course was not to declare resale price maintenance to be illegal or to abolish it fortuitously by removal of existing methods of enforcement, but rather to see whether some other method could be devised for maintaining prices and taking price-cutters, if necessary, to the Courts.

The Government therefore proposed to introduce legislation to require the registration of restrictive practices which they would specify from time to time. They would not limit themselves to the practices referred to in the report, nor, on the other hand, would they require all restrictive practices to be registered together. Instead, they would adopt the system which had worked well in Sweden, and would "select the practices they wanted in the order they wanted." In this way they would select for early registration the practices

referred to in the report, and would also include all agreements fixing common prices. Once the registration authority had called forward for registration any class of agreement which firms wished to operate or continue to operate, it would have to be registered, the tribunal, with the information that the register made available, would then call on these firms by a given date to come forward and make out a case for employing the particular practices. There would thus be two stages: (1) registration, when all agreements of a specific class would be registered; (2) examination and judgment, when the tribunal would select the agreement for examination and specify the date and place of hearing when it had to be justified before it would be allowed to continue

Mr Thorneycroft concluded by discussing four crucial questions · (1) where did the presumption lie?, (2) what guidance should be given to the tribunal?; (3) what form should the tribunal take, and should there be right to appeal from its decisions?, (4) what would happen when the tribunal decided in favour of a practice continuing? With regard to (1) he pointed out that the practices considered by the Commission were all in one form or another "practices in restraint of trade," and as such were liable to operate against the public interest. The right course was not to declare them crimes, or fix an arbitrary date by which they must all stop, but to "place the onus of showing that they were in the public interest fairly and squarely on the shoulders of the men who wished to use them" As regards (2), it was clearly right that the tribunal should not be left without any guidance whatever, and it might be that agreements providing for the maintenance of resale prices should be among the first to be examined In respect of (3), one problem was whether the final decision should rest with a judge or a Minister, and he would welcome discussion in the House on this and other points Finally, as regards (4), respect would have to be had to public opinion, which was often "focussed on the manner in which things were done as well as on their purpose" For example, there was something rather repugnant in the system of trade courts, and the Government considered that, even where a tribunal ruled that a particular practice should continue, some radical alteration would have to be made in this system.

Mr. Harold Wilson (a former Labour President of the Board of Trade) moved an Opposition amendment endorsing the conclusions of the majority report and calling upon the Government to introduce legislation at the earliest possible moment to implement them, and to ensure the registration of "all collective agreements which provide for minimum prices and the regulation of production and trade."

Mr. Wilson asserted that the President of the Board of Trade, by his decision, had "firmly rejected the Commission's report," and accused him of "putting the clock back seven years" by going back to the "case-by-case" approach which the Labour Government, when in office, had rejected as inadequate. After contending that some of the practices would necessarily continue for many years if the tribunal had to consider each case separately, he stressed that the future of British industry, including its survival in export markets and its contribution to the national standard of living, depended on how the Government and the House responded to the challenge presented by the report. "In the fierce and ruthless struggle for world markets," he continued, "we cannot move at the pace required unless we take the decision that the self-imposed and obsolete hobbles on industry and trade must go." He urged the Government, therefore, to review the matter again, and to "implement its election pledges" by taking "positive and decisive action."

In the ensuing debate, support for the Government's policy was expressed by many Conservative Members. **Sir Lionel Heald** (a former Attorney-General) emphasized the public dislike of trade courts and the general feeling that cases concerned with trading offences should be heard in the ordinary courts, whilst **Mr. Rawlinson** suggested that, to avoid the proposed tribunal acting both as prosecutor and judge, there should be a separate organization to prosecute and call evidence, leaving the tribunal to decide what should be done. The proposals, however, were strongly criticized by many Labour Members, **Mr. Paget** describing them as "sheer political hypocrisy" and **Mr. Fienburgh** accusing the Government of rejecting the report "to satisfy the Federation of British Industries" **Mr. Herbert Morrison** urged the Government to take steps about the refusal of some trade associations to allow their members to supply goods to co-operative societies on the ground that the Co-operative Movement, by giving dividends, was virtually selling goods below fixed prices. **Mr. Harold Lever** (Lab.), on the other hand, defended price-fixing and allied agreements as "perfectly normal and desirable," and declared that "nothing like decency would be possible in modern commercial life without them."

The debate was wound up by **Sir Reginald Manningham-Buller** (the Attorney-General), who maintained that the Government's proposals would act more speedily than those in the majority report, since the building-up of case law by the tribunal would lead many firms to alter their agreements in the light of its decisions.

The Opposition amendment was defeated by 316 votes to 255, and the Government motion agreed to without a division.

Earlier, on Feb. 24, Mr. Harold Wilson had moved a resolution on behalf of the Opposition deploring "the slow progress made in dealing with the harmful effects of monopolies and price rings in industry and trade," and calling on the Government to "take all possible measures, by legislation and otherwise, to protect the public interest against the misuse of monopoly powers."

No vote was taken on the resolution itself, but a Government amendment was adopted (by 300 votes to 267) welcoming the measures already taken to strengthen the Monopolies and Restrictive Practices Commission; noting that the Commission's inquiry was nearing completion, and endorsing the Government's policy.

The Monopoly Commission's report on the supply of buildings in the Greater London area was published on Sept. 27, 1954.

The Commission found that competition in the supply of new buildings costing over £1,000 was restricted by the arrangements operated by the London Builders' Conference; that these arrangements were against the public interest, and that they should be brought to an end. It made no recommendations as to how this should be done, believing that this could be decided only after discussions between the appropriate Government departments and the parties concerned.

In particular, the report criticized two practices forming part of the L B.C. arrangements—(*a*) the communication of the amount of proposed tenders to third parties by agreement or arrangement; (*b*) the adjustment of the amount of proposed tenders by agreement or arrangement with third parties. The Commission dismissed the L.B.C.'s claim that these practices had helped to confine tendering to responsible builders of equal standing, and held that they frustrated the purpose of the tendering system, since tenders ceased to be the independent offers they purported to be. The report also discussed the practice of submitting cover prices—"tenders meant to be sufficiently high not to win the contract"—but considered that these came within the Commission's terms of reference only when there was an understanding between two or more builders about the amount that one of them was to quote The Commission held, however, that the use of cover prices restricted competition because it gave a false impression of the extent of the competition represented by the tenders, and thus deprived the owner of the proposed building of the opportunity of substituting genuine tenders for those not competing seriously

The report stated that the London Builders' Conference had been set up in 1935 "to deal specifically with the problem of excessive competition," that it had 250 members on May 1, 1954, and that these members (together with non-members who co-operated with them) were responsible for 65 per cent of the buildings covered by the Commission's terms of reference.

The following new references to the Monopolies Commission had been announced by Mr. Thorneycroft in recent months: supply of electronic valves and cathode ray tubes (Dec. 8, 1954); supply of electric street-lighting equipment, tea, chemical fertilizers, electric batteries, and steel frames for buildings (June 16, 1955), and the practice of quoting common prices and of level tendering (also June 16).

Mr. Thorneycroft had stated on Feb. 7, 1955, that he was still awaiting the Commission's reports on the following eight subjects (apart from the reports on collective discrimination and on electronic valves). supply and export of electrical and allied machinery, and of pneumatic tyres (referred respectively on April 4, 1954 and Sept. 19, 1952), and the supply of hard fibre cordage (July 31, 1953), linoleum (Sept 3, 1953), sand and gravel in Central Scotland (Dec. 24, 1953), certain industrial and medical gases (Feb 1, 1954), standard metal windows and doors (Feb 24, 1954), and certain rubber footwear (April 9, 1954).

During the above-mentioned debate on the Opposition resolution, Mr. Thorneycroft told the House of Commons on Feb. 24, 1955, that the Government was in general agreement with the recommendations of the Monopoly Commission's report on the calico-printing industry (see 13550 A), and that he proposed to hold discussions with the industry's representatives in due course on the best ways of implementing them.

The Minister of Supply (Mr. Selwyn Lloyd) stated on March 2 that the Electric Lamp Manufacturers' Association had (*a*) given an undertaking that members who sold lamp components (except patent components and ready-coiled filaments) would make them equally available to members and non-members at identical prices; (*b*) agreed that the controlled companies should continue to supply cheap lamps and would not be used as "fighting companies" so as to eliminate outside competition; and (*c*) brought its rules into general accordance with the Commission's recommendations.—(Cmd. 9504 - Times - Daily Telegraph - Manchester Guardian - Financial Times - Board of Trade Journal) **(Prev. rep. 13036 A.)**

A. BRITISH COLONIAL EMPIRE. — New Governors of British Guiana and British Honduras.

The Colonial Secretary (Mr. Lennox-Boyd) announced on July 22 that Sir Patrick Renison, Governor of British Honduras, had been appointed Governor of British Guiana in succession to Sir Alfred Savage, who had resigned through ill-health. On Aug. 16 it was announced that Mr. Colin Thornley, Chief Secretary in Uganda, had been appointed Governor of British Honduras in succession to Sir Patrick Renison.—(Times) **(Prev. rep. 12478 B; 12296 A.)**

B. BURMA. — Establishment of Diplomatic Relations with Czechoslovakia.

It was announced in Rangoon on July 25 that the Burmese and Czechoslovak Governments had decided to establish full diplomatic relations, and that the Czechoslovak Consulate-General in the Burmese capital would accordingly be raised to Legation status.—(Burmese Government Information Dept.)

A. YUGOSLAVIA - SOVIET UNION. — Trade, Economic, and Technical Co-operation Agreements. - Soviet Credits for Yugoslavia. - Air Agreement. - Soviet Offer of Atomic Reactor.

Negotiations took place in Moscow from Aug. 23 - Sept. 1 between a Yugoslav delegation headed by M. Vukmanovich (a Vice-President of the Federal Executive Council) and a Soviet delegation led by M. Mikoyan. It was announced on Sept. 1 that the negotiations had dealt with commercial exchanges and economic co-operation between the two countries, and that agreement had been reached on the following matters :

(1) Soviet-Yugoslav trade exchanges during the next three years would be at a level of $70,000,000 in each direction, and both countries would take steps for their expansion in subsequent years A special protocol (to be agreed in January 1956) would regulate exchanges during 1956, and the commodity lists to be agreed upon would correspond to the present trade agreement for 1955. Agreement had also been reached on long-term Soviet supplies of coal, coke, and cotton to Yugoslavia, and Yugoslav deliveries to the Soviet Union of bauxite, lead, tobacco, and hemp.

(2) An agreement would be signed " as soon as possible " on technical co-operation and exchange of technical knowledge, subject to the regulations in force in both countries. It would provide for co-operation between enterprises and institutions in both countries, and the exchange of technical knowledge and achievements would include licences and documentation. A special fund, to which both Governments would contribute in definite proportions, would be set up with a view to furthering such co-operation.

(3) As regards long-term co-operation, it had been agreed to conclude in January 1956 arrangements for :

(*a*) a Soviet credit to Yugoslavia of $54,000,000 for Yuguslav purchases of raw materials in the U.S.S R , subject to Yugoslavia using this credit within a three-year period ;

(*b*) another Soviet credit to Yugoslavia, of an undisclosed amount, to pay (i) for the design, construction, and equipment of a fertilizer factory in Yugoslavia with an annual capacity of 220,000 tons, and of an electric power station connected with this factory ; (ii) for a factory for the production of superphosphates with an annual capacity of 250,000 tons ; (iii) for a sulphuric acid factory , and (iv) for three smaller enterprises ;

(*c*) a Soviet loan to Yugoslavia amounting to $30,000,000, in foreign exchange or gold, which the Yugoslav National Bank would be entitled to use within a period of two or three years

These credits would be for 10 years and would bear interest at the rate of 2 per cent per annum.

(4) The delegations had also examined the possibility of Soviet investment in other Yugoslav industrial projects, and of co-operation in the utilization of nuclear energy for peaceful purposes.

M. Vukmanovich said on his return to Belgrade that the $54,000,000 credit for raw materials would be spent on Yugoslav purchases of coal, coke, and cotton at the rate of $18,000,000 a year, which would considerably ease Yugoslavia's balance-of-payments difficulties because hitherto she had been compelled to purchase these raw materials in Western dollar markets. He stressed that the conditions attached to the Soviet credits were " far more favourable " than those which Yugoslavia had received or been offered elsewhere, and pointed out that the credit arrangements had to be deferred until January 1956 as Yugoslavia was bound by an undertaking to the International Bank not to exceed a certain debt limit before the end of the current year.

M. Vukmanovich also announced that the Soviet Government, as part of the proposal to co-operate in the peaceful use of atomic energy, had offered Yugoslavia a reactor and a cyclotron, as well as atomic materials such as uranium and graphite, on the sole condition that they should be paid for within two years of delivery.

An agreement for the re-establishment of air services between the two countries was signed in Moscow on Sept. 3. Since 1949 Soviet aircraft operating between Moscow and Tirana (Albania) had been permitted to fly across Yugoslav territory, but had not been allowed to land at Belgrade until 1953 ; even then they had not been permitted to embark or disembark pasengers. The new air service will be operated by both Yugoslav and Soviet aircraft, in contrast to the pre-1948 " joint " service which was flown exclusively by the Russians.—(Tanjug Agency, Belgrade) **(Prev. rep. 14358 A ; 14265 A ; Trade Agreement, 14016 A.)**

B. SOUTH KOREA.—Resignation of Foreign Minister.

It was announced in Seoul on July 31 that President Syngman Rhee had accepted the resignation of Mr. Pyun Yung Tai as Foreign Minister, and had appointed Mr. Chou Chung Hwan (hitherto Vice-Minister of Foreign Affairs) as acting Foreign Minister. Mr. Pyun, who had been Foreign Minister since 1951, led the South Korean delegation at the U.N. when the Korean question was under discussion, and also headed the South Korean delegation at the Geneva conference on Korea. No reason was given for his resignation except that he was " tired of the job."—(New York Times) **(Prev. rep. 11424 F.)**

C. INDIA.—Sikh Agitation for Punjabi-speaking State. - Arrest of Master Tara Singh.

The Government of the Punjab issued an Order on April 10 (subsequently extended on May 15) forbidding the shouting of slogans and the holding of processions and demonstrations for or against the reorganization of the State on a linguistic basis. This measure was intended to prevent clashes, such as had occurred at Ludhiana in December and at Amritsar in April, between the Sikh advocates of a Punjabi-speaking State (*Punjabi Suba*) and the Hindu supporters of a " Greater Punjab " (*Maha Punjab*). The *Akali Dal* (the extremist Sikh organization led by Master Tara Singh) had proposed the union of the Patiala and East Punjab States Union (PEPSU) with parts of the Punjab and of Himachal Pradesh to form a Punjabi-speaking State in which the Sikhs would be in a majority. On the other hand, the Hindu Mahasabha and the *Jan Sangh* had demanded the union of all three States in a " Greater Punjab " containing a Hindu majority, and including some non-Punjabi-speaking areas.

The *Akali Dal* launched a *satyagraha* campaign against the ban on May 10, when Master Tara Singh and ten of his supporters were arrested at Amritsar for shouting slogans in support of *Punjabi Suba* During the next two months Akalis continued to court arrest by shouting such slogans in the presence of the police. Although the agitation was generally peaceful, clashes occurred between demonstrators and police at Ludhiana on May 25, when nine policemen and two civilians were injured, and at Amritsar on July 4, when 26 policemen and 24 Akalis were injured. The supreme religious body of the Sikh community (*Shiromani Gurdwara Prabhandhak*) disclaimed all connexion with the agitation and instructed priests and temple attendants to take no part in it

The Chief Minister of the Punjab (Mr. Sachar) issued a statement on July 12 announcing that the Government had decided to lift the ban in honour of Mr. Nehru's return from his visit to the Soviet Union and other countries. He deplored the increase in communal tension which had occurred during the past three months, and appealed to all parties and communities to " make earnest efforts to improve and consolidate conditions of peace and goodwill." The *Akali Dal* accordingly suspended its agitation, but gave warning that it might be renewed if all the arrested Akalis (said to number several thousands) were not released. Master Tara Singh was sentenced on Aug. 13 to four months' imprisonment and a fine of Rs. 400 for defying the Government's ban.—(The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. 11077 B ; 11130 F.)**

D. CZECHOSLOVAKIA. — Accession to Austrian State Treaty. - Statement by M Siroky.

The Czechoslovak National Assembly, meeting on Aug. 30, unanimously approved the accession of Czechoslovakia to the Austrian State Treaty signed on May 15 by Great Britain, the United States, France, the Soviet Union, and Austria.

The Prime Minister, M. Siroky, said that the Austrian State Treaty was a significant contribution to the security of Czechoslovakia, which, as a neighbour of Austria, had suffered in the past from violations of Austrian sovereignty After pointing out that " the Austrian question has always been linked with the security of Czechoslovakia," M. Siroky declared that all the conditions were present for developing relations between the two countries in conformity with the principles of peaceful co-existence—mutual respect, integrity, and sovereignty—to which Czechoslovakia adhered. He added that there were important possibilities for expanding economic and cultural relations, and that the Czechoslovak Government was also willing to discuss with Austria outstanding questions such as property claims, questions of disputed citizenship, the position of Austrian citizens who were presumed to be imprisoned in Czechoslovakia, tourism, and air communications

Article 37 of the Austrian State Treaty invited members of the United Nations who were at war with Germany on May 8, 1945, to accede to the treaty. Czechoslovakia was the first country (other than the original Allied signatories) to do so. (Times - Wiener Zeitung) **(Prev. rep. State Treaty, 14193 A.)**

E. UNITED KINGDOM. — Gold and Dollar Reserves.

The sterling area had a gold and dollar deficit in August of $87,000,000 after taking into account (*a*) the receipt of $4,000,000 in U.S. defence aid, (*b*) the payment of $36,000,000 to the E.P.U.,representing that part of the July settlement which had to be paid in gold or dollars, and (*c*) the payment of $2,000,000 under bilateral settlements with creditors of the E.P.U. As a result, the sterling area's gold and dollar reserves fell to $2,457,000,000 on Aug. 31.

Provisional figures for the E.P.U. August settlement showed that the U.K. had a deficit of $78,400,000 (£28,000,000) in August, which, under the new E.P.U. arrangements (see 14374 A), would be settled in September as to 75 per cent in gold or dollars and 25 per cent by an increase in the U.K. debt to the Union.—(Treasury Press Office) **(Prev. rep. 14364 B.)**

SEPTEMBER 10—17, 1955

A. CYPRUS. — Suspension of London Tripartite Conference. - British, Greek, and Turkish Viewpoints on Cyprus Question. - British Constitutional Proposals for Cyprus. - Ban on "Eoka" Organization.

The tripartite U.K.-Greek-Turkish conference on the problems of the Eastern Mediterranean, including Cyprus, which opened at Lancaster House in London on Aug. 29, was suspended on Sept. 7 pending further consideration by the Greek and Turkish Governments of British proposals for granting self-government to Cyprus. Although the conference was held in restricted session, the following official statements were issued: (1) a summary of the views of the British, Greek, and Turkish Foreign Ministers (Mr. Macmillan, M. Stephanopoulos, and M. Zorlu) on the question of Cyprus, published on Sept. 1; (2) the text of the British proposals for self-government for Cyprus, published on Sept. 6; and (3) the verbal exchanges between Mr. Macmillan and M. Zorlu on the British Government's attitude to self-determination for Cyprus, published on Sept. 7 at the conclusion of the conference. Summaries are given below.

British, Greek, and Turkish Attitudes to Cyprus.

Mr. Macmillan emphasized that Cyprus was both a territory under British sovereignty, for whose progress and welfare H.M Government were responsible, and also a "vital hinge of the North Atlantic and Middle Eastern defence systems." Britain had responsibilities in the area arising out of her adherence to the Turkish-Iraqi pact, the Anglo-Iraqi agreement, the Anglo-Jordanian alliance, and the tripartite U.K.-U.S.-French agreement of 1950, and to discharge these responsibilities she needed not merely a "base" but the possession and use of the whole island and its facilities. The British Government were determined "to fulfil the first duty of any Government in maintaining law and order in Cyprus," and had endeavoured to promote self-government for the island. A serious responsibility lay upon those who had resorted to violence and had obstructed democratic evolution in Cyprus, but for this, elected representatives of the Cypriot Government might be taking part in the present conference. Although Britain would "abandon neither her interests and responsibilities nor those for whom she was a trustee," she would not be "inflexible" but would seek, through conciliation, to obtain a settlement which would meet British requirements and the special circumstances of Cyprus. These aims could be realized, with proper regard for the rights of all, if there was a common effort.

M. Stephanopoulos said that Greece recognized "the need for Britain's presence in Cyprus for defensive purposes." He maintained, however, that the question of sovereignty did not prejudice, and was not bound up with, questions of defence, since under NATO arrangements allied bases had been established on various territories without regard to sovereignty. The military and defensive value of the British bases in Cyprus would be enhanced "were the present ill-feeling among the Cypriot population to be changed into a spirit of spontaneous and unqualified co-operation." This could only be achieved by granting self-determination, which was a fundamental principle of the U.N. Charter and to which the Cyprots were entitled. Greece had not claimed, and did not claim, the right to decide by herself the future of Cyprus, but she denied the right of any third party to do so, because this matter was the exclusive prerogative of the Cypriot people. The Greek Government's sole endeavour had been to secure for the people of Cyprus their right to self-determination "within a reasonably short period of time." Greece repudiated all acts of violence and was willing to subscribe to any guarantee which Britain might wish to have concerning military bases in Cyprus. Moreover, she was also willing to join in any guarantee which Turkey might wish to obtain concerning the Turkish minority in Cyprus.

M. Zorlu recalled that the administration of Cyprus had been transferred to Britain in 1878 in return for a British commitment to assist Turkey in the event of Russian aggression. Under the Treaty of Lausanne (1923) Turkish sovereignty over Cyprus was recognized to have lapsed, and British sovereignty to have been assumed as from Nov. 5, 1914 [the date on which the Ottoman Empire declared war on the Allied Powers during World War I]. The nationality question had also been settled under the Lausanne treaty, which provided that the inhabitants of Cyprus would acquire British nationality except for those who opted for Turkish nationality. Cyprus had, therefore, been recognized as exclusively "a matter of concern" for Britain and Turkey, and it had been so recognized by all the signatories to the treaty, including Greece. As the status of Cyprus had definitely been determined by the Treaty of Lausanne, Turkey looked on the Cyprus question solely as a British domestic issue, and would continue to do so as long as Britain retained sovereignty over the island and the *status quo* was maintained. If there was any question of the island changing hands, it should revert to Turkey, since Cyprus was geographically a prolongation of the Anatolian mainland. Moreover, the "vital interests of Turkey and the requirements of defence and logistics" made it imperative that Cyprus should belong either to Turkey or to a country "which was as closely interested as Turkey in the fate of Turkey's eastern neighbours." In the event of a war, Turkey could only be supplied through her southern ports, and whoever controlled Cyprus was in a position to control those ports. For all these reasons, therefore, the principle of self-determination could not prevail over historical, geographical, strategic, and security requirements; the principle itself was a noble one, which Turkey accepted, but it must not be allowed to become "an element of injustice, insecurity, and trouble." Before Cyprus could achieve self-government she needed a period of peace and quiet, even when the climate became suitable for self-government, the guiding principle should not be a consideration of majorities or minorities but that of "full equality for the two groups" in Cyprus. In conclusion, M. Zorlu emphasized that Turkey was "extremely eager to maintain friendship and co-operation with Greece."

British Constitutional Proposals for Cyprus.

The British Government's constitutional proposals for Cyprus were published on Sept. 6, as stated above, the text being as follows:

(1) "The first stage of the [tripartite] conference has shown that, in spite of certain important differences of opinion, all three delegations are agreed upon the overriding importance of maintaining their friendship and co-operation and the ties which bind them in alliance. They are also agreed in recognizing the key strategic position of Cyprus, and the vital contribution of the British military headquarters and base in the island to the maintenance of peace and security in the Eastern Mediterranean and the Middle East. They also share the desire to further the welfare of the population of Cyprus, to put an end to the acts of violence which have recently been disturbing the community, and to restore harmony between all sections of the population.

(2) The British delegation are convinced, therefore, that their colleagues will agree that it would be unthinkable that the present conference should end in failure, which would run counter to their common objectives and impair their friendship and alliance . . . Having made a careful analysis of the respective positions of the three delegations as disclosed at the conference, the British delegation wish to offer the following observations and proposals as a basis for the common understanding which they are confident it will be possible to reach.

(3) It is clear that there are two main problems in determining the future of Cyprus. The first of these comprises the introduction and operation of a new Constitution leading to internal self-government by the Cypriot people, under the proper safeguards and guarantees required by the international situation and the protection of the interests of the communities concerned. The second of these is the future international status of Cyprus.

(4) With regard to the first of these two problems, the British delegation believe that their colleagues share the opinion of H.M Government that an essential element in the restoration of harmony in Cyprus and in the future progress of the island must be a progressive advance towards internal self-government, with proper regard for the rights and interests of all parties. The British delegation are confident, therefore, that the way is open for the conference to establish a large measure of agreement upon the necessary plans and procedures for attaining this end. It is the responsibility of H.M Government to introduce the necessary constitutional measures, but, in view of the close interest which Greece and Turkey naturally take in the welfare of the Greek and Turkish communities in Cyprus, the British delegation wish to put before their colleagues the following proposals, and to discuss them with a view to reaching common agreement. H.M Government would hope to obtain the expressed approval of the Greek and Turkish Governments for this programme, since it is evident that this would be of the greatest importance in securing the full co-operation of the Cypriot people. In inviting the co-operation of the Greek and Turkish Governments in this task, the British delegation are in no way departing from the principle, which has already been emphasized by the Foreign Secretary in his remarks to the conference, that H.M Government are solely responsible for the internal affairs of her Majesty's possessions.

(5) The proposals of H.M Government are intended to set Cyprus upon the normal path of democratic development. To this end, H.M Government propose the introduction of a new and liberal Constitution leading to the fullest measure of internal self-government compatible with the strategic requirements of the present international situation. The Constitution would provide for an Assembly with an elected majority, a proportionate quota of seats being reserved for the Turkish community. All departments of the Cyprus Government would be progressively transferred to Cypriot Ministers responsible to the Assembly, with the exception of Foreign Affairs, Defence, and Public Security, which would be reserved to the Governor. There would be proper safeguards for the integrity and independence of the Public Service. As part of the safeguards to be provided for the Turkish community, a proportion of the ministerial portfolios would be reserved for that community. A Cypriot Chief Minister to head the new Cypriot Administration would be chosen by the Assembly with the approval of the Governor.

(6) H.M. Government propose that a special tripartite committee should be set up in London by the present conference . . to examine detailed proposals to be drawn up by H.M Government for new constitutional instruments for Cyprus. It would be the duty of this tripartite committee to consider a suitable system of guarantees for the interests of the communities in Cyprus, and the appropriate method of their implementation. The committee might investigate any suggestions for the further benefit of the Cypriot population from the point of view of the close links between Cyprus and the United Kingdom, Greece, and Turkey; for example, questions concerning the status and rights of Cypriots in the three countries.

(7) After completing its initial tasks, the tripartite committee might be kept in being in order to receive reports regarding the

development of self-government in Cyprus, and to act as a centre for discussing problems or differences arising out of self-government which it had not been possible to resolve locally in Cyprus.

(8) With regard to the second of these main problems, a divergence of view is unfortunately apparent between the three delegations. It is evident that these positions cannot at present be reconciled. But the British delegation feel strongly that this fact should not be allowed to create a breach between the three countries, with unfortunate and incalculable consequences to their co-operation as friends and allies in the many fields of common endeavour. Nor should failure to settle this aspect of the problem at this time be allowed to destroy the wide measure of agreement established in regard to the other main problem of internal self-government.

(9) Consequently the British delegation propose that the conference should record that it is unable to agree upon the problem of the future international status of Cyprus The conference would, at the same time, agree that each Government retains the position which it has taken up at the conference and is in no way committed by the proceedings of the conference to change its attitude. It would, in particular, be expressly recognized between the three parties that the fact of their co-operation over the introduction of self-government in no way invalidated their respective attitudes over the question of sovereignty

(10) When the new Constitution has come into working order in Cyprus, H.M. Government would be prepared to call the conference together again to take counsel once more together on the military and political problems of the Eastern Mediterranean, including the situation in Cyprus. It is hoped that sufficient progress will have been made to allow elected representatives of the Cypriot people to be associated with the conference In the meantime, the special tripartite committee proposed in connexion with the programme of self-government will serve as a standing instrument of consultation between the three allied Governments."

British Replies to Turkish Questions.

The following statement was issued at the conclusion of the conference:

" On September 7 the Turkish Foreign Minister put two questions to the British Foreign Secretary

(1) *Does the British Government intend to maintain in the present and in the future the right of sovereignty on the island of Cyprus, devolved upon Great Britain by the Treaty of Lausanne?*

To this Mr. Macmillan replied as follows:

'The British position . . is really a simple one We are a very empirical people. We try to deal with facts as we see them. There is nothing permanent in the world, and especially in the nuclear world; and in the long story of mankind—no one knows it better than the races and countries bordering the Mediterranean—there are many changes and permutations which take place But we face facts as they are We accepted Cyprus as a trust, in 1878, to meet certain strategic and political conditions of the world. These strategic and political conditions have reproduced themselves with melancholy and monotonous iteration, and indeed are present today in a far greater degree than ever before. Therefore, while we cannot look into the future at a very great distance, we cannot foresee conditions enabling us to abandon in one direction or another the trust we undertook and which we must still carry out.

To put it in a slightly more succinct way, I might add this In my statement of Aug 30 [see above] I stated that British sovereignty over Cyprus was beyond dispute, and I explained why H.M. Government regarded it as essential that the United Kingdom should continue to remain in possession of Cyprus in order to enable her to carry out her obligations in the Eastern Mediterranean and the Middle East. Nothing has since occurred in any way to modify that view, and I am bound to say that there is no prospect of any change in the foreseeable future.'

(2) *If the British Government is determined to maintain sovereignty on the island, does it, for the present or for the future, accept any principle of self-determination which might ultimately lead to the independence of the island or to its accession to another country?*

To this Mr. Macmillan replied: 'I think I have already answered that question We do not accept the principle of self-determination as one of universal application We think that exceptions must be made in view of geographical, traditional, historical, strategical, and other considerations.' "

A communiqué issued on Sept. 7 said that M. Stephanopoulos had made " an interim reply," and M. Zorlu " a full and definite reply," to the British constitutional proposals; that Mr. Macmillan, before making any further proposals, would " await the full reply of the Greek Government and any additions which the Turkish Government might wish to make to their statement "; and that " meanwhile, the tripartite conference stands suspended."

Both M. Stephanopoulos and M. Zorlu left London on Sept. 8. No statement was made by the Turkish Foreign Minister, but the Greek Foreign Minister gave a press conference in London before returning to Athens.

M. Stephanopoulos emphasized that Greece had never asked for the annexation of Cyprus, and reiterated that the Cypriots had the right to decide upon their own future, in conformity with the principles of the U.N. Charter. He asked that the people of Cyprus should be " allowed to exercise the right of self-determination after a reasonable period of self-government "; asserted that the Cypriots were being treated differently from other peoples of the British Commonwealth; and added: " We shall carry on the fight to secure recognition of the right of self-determination on behalf of the Cypriot people, the overwhelming majority of whom are Greek."

In view of the recent increase in terrorist activities in Cyprus, the British forces in the island were reinforced during the second week of September by 1,500 Royal Marine Commandos from Malta and by several companies of the South Staffordshire Regiment and The Royal Scots from the Suez Canal Zone. A squadron of six minesweepers sailed from Chatham on Sept. 8 to take part in the prevention of arms smuggling in the waters round Cyprus, whilst the light fleet carrier H.M.S. *Ocean* sailed from Plymouth on the following day with military equipment for the British forces in the island.

Further attacks by *Eoka* terrorists occurred during the night of Sept. 3-4 in the Famagusta area, where a bomb explosion at an R.A.F. radio station caused some damage and injured an R.A.F. officer and a Turkish Cypriot employee. A police-station in the nearby village of Paralimni was raided by 20 masked terrorists who escaped with a number of rifles and shot-guns after overpowering and binding eight policemen. As a result of these attacks, a ban on vehicular traffic by night was imposed in Famagusta and eight villages in the area.

The Government of Cyprus issued an Order-in-Council on Sept. 15 under which *Eoka* was banned as an organization " used for the promotion of disorder and the spread of sedition." It was laid down that accused terrorists would no longer come before a magistrate for preliminary hearing, as hitherto, but would be sent for trial by the assize court. The Order-in-Council will remain in force for twelve months in the first instance, and may be extended at the discretion of the Governor of Cyprus.

Leaflets had been circulated on Sept. 9 by a secret Turkish Cypriot organization, calling itself *Volkan*, threatening immediate reprisals against the *Eoka* if any attacks were made against Turkish officials, policemen, or civilians. The *Volkan* leaflets alleged that *Eoka* had included the names of prominent Turkish Cypriots on a " terror list," and threatened instant retaliation for any attacks on members of the Turkish community.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Cyprus, 14394 A; London Tripartite Conference, 14396 A.)**

A. UNITED STATES. — President Eisenhower's Statement on Essentials of Peace.

In a speech on Aug. 24 to the annual convention of the American Bar Association, meeting in Philadelphia, President Eisenhower declared that " the spirit of Geneva, if it is to provide a healthy atmosphere for the pursuit of peace, if it is to be genuine and not spurious, must inspire all to a correction of injustices and observance of human rights, and an end to subversion organized on a world scale." In this connexion he made the following three points:

" (1) The division of Germany cannot be supported by any argument based on boundaries or language or racial origin.

(2) The domination of captive countries cannot longer be justified by any claim that it is needed for purposes of security.

(3) An international political machine, operating within the borders of sovereign nations for their political and ideological subversion, cannot be explained away as a cultural movement."

After stressing that eagerness to avoid war could " produce outright or implicit agreement that injustices and wrongs of the present shall be perpetuated into the future," the President added: " We must not participate in any such false agreement. Thereby we would outrage our own conscience. In the eyes of those who suffer injustice, we would become partners with their oppressors. In the judgment of history we would have sold out the freedom of men for the pottage of a false peace. . . . We must be firm but friendly; tolerant, but not complacent; quick to understand another's viewpoint, honestly assumed. But we must never agree to injustice for the weak, the unfortunate, the under-privileged, well knowing that if we accept destruction of the principle of justice for all, we cannot longer claim justice for ourselves as a matter of right . . ."
(New York Times) **(Prev. rep. Geneva Conference, 14325 A.)**

B. AUSTRALIA. — Cabinet Appointment.

Senator John Spicer, the Federal Attorney-General, was sworn-in on Sept. 14 as Minister of Transport and Shipping in succession to Senator George McLeay, who had died on the previous day.—(Australian News and Information Bureau) **(Prev. rep. Cabinet, 13688 B.)**

A. CHINA - UNITED STATES. — Geneva Meeting of Ambassadors. - Repatriation from China of U.S. Airmen and Civilians. - Agreement on Repatriation of other Nationals of Both Countries.

It was announced in Washington and Peking on July 25 that Ambassadors representing the United States and the People's Republic of China would meet in Geneva on Aug. 1 to discuss the repatriation of nationals of the two countries desiring to return home, and "certain other practical matters now at issue between both sides." The U.S. State Department emphasized that the Peking Government had been informed through Britain that "these talks, as in the case of all our prior discussions with the Chinese Communists, do not involve diplomatic recognition." Mr. Alexis Johnson, Ambassador in Prague, was named as the U.S. envoy at the discussions, whilst Mr. Wang Ping-nan, Ambassador in Warsaw, was appointed Chinese representative.

The Chinese Prime Minister (Mr Chou En-lai), addressing the National People's Congress in Peking on July 30, said that although the Geneva talks would be primarily concerned with the reciprocal repatriation of Chinese and American civilians, they should, in the words of the original announcement, also "facilitate further discussions and the settlement of certain other practical matters now at issue between the two sides" "The Chinese people," he declared, "hope that these words signify that the United States is ready to co-operate with China and enable these Sino-American talks at ambassadorial level to make preparations for negotiations between China and the United States for relaxing and eliminating tension in the Formosa area. . . . The Chinese people hope that the countries of Asia and the Pacific region, including the United States, will sign a pact of collective peace to replace the antagonistic military blocs now existing in this part of the world"

"Conditions permitting," Mr. Chou added, "the Chinese people are ready to seek the liberation of Formosa by peaceful means. If possible, the Chinese Government is willing to enter into negotiations with responsible local authorities in Formosa. It should be made clear that these would be negotiations between the central Government and local authorities The Chinese people are firmly opposed to any idea . . of 'two Chinas'"

Immediately before the Geneva discussions were due to begin, it was announced by Peking Radio that the 11 U.S. airmen who had been sentenced to varying terms of imprisonment in November 1954 for alleged espionage (see 13927 A), and on whose behalf Dr. Hammarskjöld (the U.N. Secretary-General) had gone to Peking (see 14143 A), had been released and would be expelled from China. In Geneva, Mr. Wang made a statement announcing the release of the airmen and expressing the hope that "this measure taken by the Chinese Government will have a favourable effect on our talks."

The Peking announcement, after reiterating that the men had been sentenced for having "sneaked into the territorial air of China by plane to conduct espionage activities with the aim of jeopardizing the security of China," went on: "During the period in which these 11 criminals served their sentences, they observed discipline and behaved themselves fairly well. The authorities in charge so reported to the military tribunal of the Supreme People's Court, and asked for leniency for them. The tribunal decided on July 31 . . to release these 11 criminals before the completion of their terms, and notified the authorities in charge to carry out immediately the release procedure and to send them out of China."

The 11 airmen crossed the border into Hong Kong on Aug. 4 and were flown back to the United States, where they arrived on Aug. 12.

At a press conference in Tokio on Aug. 7, Colonel Arnold (the senior officer of the party) described how he had been subjected to prolonged solitary confinement, torture and interrogation whilst in captivity, whilst all the other 10 airmen said that they had been subjected to solitary confinement and starvation diet, but not to the severe interrogation inflicted on Colonel Arnold. The latter admitted that he had become "completely irrational" at times and had said "all sorts of things," but denied having signed a "confession" that he had violated Chinese sovereignty or dropped spies into China; he added that when a "confession" was produced at his trial, he had repudiated it. Another of the airmen, Major Baumer, said that he had been treated for nine months in a Communist hospital for frost-bite suffered after his plane had been shot down; though he had not been subjected to physical torture, he had subsequently been deprived of his crutches and placed in solitary confinement.

At their first meeting in Geneva, held at the Hôtel Beau Rivage, Mr. Johnson and Mr. Wang agreed on a two-point agenda for their discussions: (1) the return of civilians of both sides to their respective countries; (2) "other practical matters at issue between the two sides." During the ensuing six weeks the envoys had 14 meetings on the first item of the agenda; no definite information was given in the communiqués issued after each meeting, but it was reported that the talks were deadlocked over the question of the repatriation of Chinese students at present in the United States. On Sept. 10, however, agreement was finally reached on the first item of the agenda, the following joint communiqué being signed by the two ambassadors:

"The Ambassadors of the U S.A and the People's Republic of China have agreed to announce the measures which their respective Governments have adopted concerning the return of civilians to their respective countries

With respect to Chinese [nationals] in the United States. Ambassador Johnson, on behalf of the U.S A., has informed Ambassador Wang Ping-nan that:

(1) The U.S A. recognizes that Chinese in the United States who desire to return to the People's Republic of China are entitled to do so, and declares that it has adopted, and will further adopt, appropriate measures so that they can expeditiously exercise their right to return.

(2) The Government of the Republic of India will be invited to assist in the return to the People's Republic of China of those Chinese who desire to do so, as follows:

(*a*) If any Chinese in the United States believes that, contrary to the declared policy of the U S.A., he is encountering obstruction in departure, he may so inform the Indian Embassy in the United States and request it to make representations on his behalf to the U.S Government. If desired by the People's Republic of China, the Government of India may investigate the facts in any such case.

(*b*) If any Chinese in the U S.A. who desires to return to the People's Republic of China has difficulty in paying his return expenses, the Government of India may render him the financial assistance needed to permit his return.

(3) The U S. Government will give wide publicity to the foregoing arrangements, and the Indian Embassy in the United States may also do so.

With respect to Americans in China, Ambassador Wang Ping-nan, on behalf of the People's Republic of China, has informed Ambassador Johnson that:

(1) The People's Republic of China recognizes that Americans in China who desire to return to the U.S A. are entitled to do so, and declares that it has adopted, and will further adopt, appropriate measures so that they can expeditiously exercise their right to return.

(2) The British Government will be invited to assist in the return to the U.S.A. of those Americans who desire to do so, as follows:

(*a*) If any American in China believes that, contrary to the declared policy of the People's Republic of China, he is encountering obstruction in departure, he may so inform the office of the U.K. Chargé d'Affaires [in Peking] and request it to make representations on his behalf to the Government of the People's Republic of China If desired by the United States, the British Government may also investigate the facts in any such case.

(*b*) If any American in China who desires to return to the U.S.A. has difficulty in paying his return expenses, the British Government may render him the financial assistance needed to permit his return.

(3) The Government of the People's Republic of China will give wide publicity to the foregoing arrangements, and the office of the U.K. Chargé d'Affaires in China may also do so.

On the same day (Sept. 10) Mr. Wang informed Mr. Johnson that seven Americans imprisoned in China, and a further three under house arrest, would be released within the next few days and sent to Hong Kong. Earlier (Sept. 6) Mr. Wang had announced that his Government would issue exit permits to another 12 Americans detained in China.

The 22 Americans whose imminent release was announced comprised 10 missionaries; five businessmen; a Fulbright scholar at Peking University; an American pilot of a Chinese Nationalist airline; two young girls of White Russian mothers, together with one of the mothers, a naturalized American; and two other women, one the wife of one of the American businessmen and the other the wife of the Dutch manager of the Bank of America's Shanghai branch.

The release of the 11 airmen and the impending release of the 22 civilians left 18 or 19 Americans still in Chinese Communist custody.

Mr. Johnson and Mr. Wang had a further meeting in Geneva on Sept. 14, at the end of which Mr. Wang issued a statement saying that the Chinese delegation had proposed that the second item on the agenda should be discussed, taking, first, the lifting of trade barriers, and secondly, preparatory work for Sino-American talks at a higher level. After consultation with Washington, Mr. Johnson subsequently issued a statement saying that it would be "premature" to discuss other matters before carrying out the announcement about the return of civilians. "Only full implementation of the agreed announcement," the statement added, "can resolve the problem of the return of American civilians. In that announcement the People's Republic of China said it 'will further adopt appropriate measures' so that American civilians can 'expeditiously' exercise their right to return. The faithful carrying-out of that commitment should be the continued task of the Geneva meetings and should provide a basis for proceeding to the discussion of other practical matters."—(New York Times - New York Herald Tribune) **(Prev. rep. U.S. Airmen, 14143 A; Missionaries, 12117 A.)**

A. ATOMIC ENERGY. — First International Conference on Peaceful Uses of Atomic Energy.

The first International Conference on the Peaceful Uses of Atomic Energy, held in Geneva under the auspices of the United Nations, ended on Aug. 21. During the fortnight that the conference lasted, over 1,000 papers and oral reports —most of them of a highly technical nature—were presented on various aspects of atomic energy and their application to industry and agriculture. *Inter alia*, the conference discussed fundamental physical factors determining the design of nuclear reactors, the uses of radio-active isotopes, the effects of atomic radiation on man, and the protection of atomic workers from harmful effects of radiation, whilst comprehensive reports were given by British, American, Soviet, and other scientists on atomic progress—including reactor design—in their countries.

The conference was attended by scientists and observers from Albania, Argentina, Australia, Austria, Belgium, Brazil, Bulgaria, Burma, Byelorussia, Canada, Ceylon, Chile, China (Nationalist), Colombia, Cuba, Czechoslovakia, Denmark, the Dominican Republic, Ecuador, Egypt, El Salvador, Ethiopia, Finland, France, the German Federal Republic, Greece, Guatemala, Honduras, Hungary, Iceland, India, Indonesia, Iraq, the Irish Republic, Israel, Italy, Japan, Jordan, Korea (South), Lebanon, Liberia, Luxemburg, Mexico, Monaco, the Netherlands, New Zealand, Norway, Pakistan, Panama, Persia, Peru, the Philippines, Poland, Portugal, Rumania, San Marino, Siam, South Africa, the Soviet Union, Spain, Sweden, Switzerland, Syria, Turkey, the Ukraine, the United Kingdom, the United States, Uruguay, the Vatican, Vietnam (South), and Yugoslavia, and by representatives of the U.N specialized agencies

Brief summaries are given below of some of the subjects discussed at the conference, and of the reports given by British, U.S., and Soviet scientists on the progress of atomic energy development in their respective countries.

Atomic Power for Under-developed Areas. A forecast that atomic energy would eventually be used for the development of the world's under-developed areas was made by Sir John Cockcroft, Director of the U.K. Atomic Energy Establishment at Harwell Sir John said that it would be possible within five years to build nuclear power units in transportable form—"package reactors"—and, by these means, to supply "packaged power" for such purposes as mining development in isolated areas and the conversion of waterless deserts into fertile food-producing land As examples, he said that it would be possible by such means to drain the swamps of Bechuanaland and convert that territory into fertile agricultural land; to provide power for the Rhodesian copper-mines, now dependent on coal supplies brought from hundreds of miles away; and to develop isolated areas such as Port Radium in Canada and Broken Hill in Australia. Moreover, the deserts of North Africa might be irrigated with water derived from the sea and "demineralized" electrically with energy derived from nuclear processes.

Uses of Isotopes. The increasing use of radio-active isotopes in industry, medicine, research, etc, was discussed by U S, British, Norwegian, and other scientists Dr Willard Libby (U.S A) estimated that "hundreds of millions of dollars, perhaps $1,000,000,000," had been saved during the last ten years through the use of isotopes, few of these uses would have been possible a decade ago, other uses were "ready and waiting," and new uses were being developed almost daily. Another U S. scientist, Dr. P C. Aebersold (of the U S Atomic Energy Commission), described how American production and use of isotopes was increasing rapidly, especially in industry, and how they were being used, *inter alia*, for altering the strength and physical characteristics of such materials as plastics and vulcanised rubber. He said that over 1,000 different types of labelled radio-active compounds were now in use in the U.S.A., and that isotopes could be produced for sterilizing pharmaceutical products at an estimated cost of between one and seven cents per pound Descriptions of the medical applications of isotopes in Britain—the world's largest exporter of isotopes—were given by U K scientists.

Mr. R. A Silow, of the U N. Food and Agriculture Organization (FAO), stressed that isotopes could be of great importance for agriculture, particularly as "tools leading to improved harvest safeguards." He explained that adequate control of destructive insects required a thorough knowledge of their life cycles, and that "tagging" such insects with ray-emitting material enabled them to be easily identified. In Canada, for example, wireworms had been labelled with Cobalt-60—an isotope emitting an extremely penetrating form of X-ray—and scientists could thus follow their meanderings beneath the ground.

Radiation Hazards. Much attention was devoted to the possible genetic effects of radiation on the human race, and suggestions were put forward that an international organization should be set up to study this matter and establish standards of radio-biological protection. The consensus of opinion was that, although the dangers might not be immediate, quick action should be taken to safeguard the human race against adverse effects of radiation, particularly as regards the possibility of unfavourable genetic mutations.

American Atomic Developments. Complete sets of technical data and drawings of atomic research reactors now in use in the U.S A were presented to Dr. Bhabha (the President of the Conference) by Rear-Admiral Strauss, chairman of the U.S. Atomic Energy Commission and head of the U.S. delegation. They were contained in eight volumes which will be available to all participants in the conference, and which were designed "to furnish a practical basic source of technical information on nuclear energy and its application" The information included full details of six types of American research reactors now in use, data on nuclear physics, reactor design, basic reactor systems applicable to power development, engineering problems, etc.; background information on reactor materials, fuels, moderators, and safeguards against radiation dangers, a catalogue of special laboratory equipment for the handling of radio-active materials; and examples of the application of radio-isotopes in research and industry. Comprehensive descriptions of American reactors, and of the progress made in the U S A in applying atomic energy to industrial uses, were given to the conference by U S. scientists in a number of addresses and papers

American atomic scientists disclosed during the conference that nuclear energy had been used for a short time on July 17 to give light and power to an entire urban community—the small town of Arco (population 1,200), in Idaho—for the first time in the United States. Unknown to the people of Arco, the transmission lines supplying conventional power to the town (i e electricity) had been disconnected, and "the entire community then depended solely on nuclear power for more than an hour." The nuclear power had been produced from a plant at the Argonne National Laboratory, 20 miles from Arco. It was pointed out that the Arco experiment differed completely from that at West Milton (New York), where nuclear-produced electric power for civilian consumers had been made available at about the same time (see page 14361, second column), whereas the nuclear-produced electricity at West Milton had been "fed" into the transmission lines of the electricity grid, and was "interruptible," that at Arco had been supplied quite independently of the normal transmission lines.

It was also disclosed (by Dr. Charles Eichner, chief metallurgist of the French Atomic Energy Commission) that the United States was producing zirconium—one of the most important metals used in atomic reactors—on a commercial scale, being the first country to do so. Dr Eichner stated that the U S A had produced 5,000 tons of zirconium in 1954 and was expected to produce 30,000 tons in 1955; although France and Britain were also producing the metal, they could not market it commercially. [Zirconium is used in atomic plants for "canning" nuclear fuel elements because it has the rare property of resisting the bombardment of neutrons.]

British Atomic Developments. In an address on British atomic energy developments, Sir Christopher Hinton (managing director of the U.K. Atomic Energy Authority) referred to the "fast breeder" reactors at Harwell—and also projected for Dounreay—which produced more fissile material (plutonium) than they consumed—see page 14361, first column He described these reactors as "the gas turbines of the nuclear reactor world," and said that they were, with few exceptions, the only type which could "breed" more fissile fuel than they consumed. At the same time he emphasized that the gas-cooled type of atomic power plant—the Calder Hall type—was not outdated, and disclosed that Britain expected to be selling "considerable numbers" of these reactors "by the early 1960s."

Two other British scientists—Dr. Hurst and Dr. Wright, both of the U K. Atomic Energy Authority—disclosed that research was in progress at Harwell into the development of atomic power plants in which the breeder reactor furnaces would be used to drive gas-turbine generators Such plants, they explained, would differ from atomic power stations at present under construction, since the heat generated by the nuclear furnaces would be used directly to drive the gas-turbine, instead of being used to heat water and convert it into steam in a heat-exchanger. This method would enable atomic power stations to be built in places where no water was available for steam generation. Power plants of this type would use homogeneous fuels such as a mixture of uranium oxide in molten caustic soda, and the gas produced from the molten soda mixture would drive the gas-turbine

Discussing the efficiency of nuclear fuels, Sir John Cockcroft stated that with the graphite-moderated gas-cooled reactors with which the British atomic energy programme began, it was expected to extract from one ton of uranium the heat equivalent of 10,000 tons of coal Now, however, "we expect later to make one ton of uranium do the work of at least a million tons of coal" By 1975, British nuclear power stations would be saving the equivalent of 40,000,000 tons of coal for an annual consumption of between 40 and 400 tons of uranium, together with initial requirements for new power stations which might exceed 400 tons a year. By the year 2000, U.K energy requirements—which, it was estimated, would then be equivalent to the amount produced by burning 250,000,000 tons of coal—could be met by using 250 tons of uranium or thorium a year.

Soviet Atomic Developments. A full description of the Soviet Union's 5,000 kw. nuclear power-station, opened in July 1954, was given by Professor Blokhintsev. He described the main features of the power-station, analysed the first year's experience of its working, and discussed difficulties that had been encountered; gave full details of the reactor and other components; presented many charts, diagrams, and photographs; and answered many questions put to him by U S., British, Dutch, and Indian scientists concerning technical details of the station and its different sections. He disclosed that various types of atomic power stations of great capacity—50,000 to 100,000 kw and over—were being designed in the Soviet Union.

Professor Lavrischev, another leading Soviet scientist, announced that the U.S.S.R. had undertaken to build research reactors for Poland, Czechoslovakia, Eastern Germany, Rumania, Hungary, Bulgaria, and China; that those countries would also be supplied with cyclotrons for research purposes; and that their scientists and

technicians would receive training, advice, and technical information from Soviet scientists. He also announced that radio-active isotopes were being produced in the Soviet Union, as well as natural uranium, thorium, uranium-235 and 233, plutonium, tritium, and heavy water. Professor Sbolbeltzin disclosed that the U.S.S.R. had exported about 1,000 shipments of isotopes a month in 1954-55 at prices at the level of those on the world market; he added that "not a single order from any country has been refused."

Dr. Kursanov told the conference that Soviet scientists believed they were close to solving the mystery of photosynthesis (the process by which plants, under the influence of sunlight, take up carbon dioxide and water, which are converted into sugars and starches—thus forming the basic foodstuffs for animals and man). Radio-active isotopes, used as "tracers" in plant studies, had enabled Soviet scientists to take a "decisive step in the direction of solving the mystery of photosynthesis and of mastering this process," and the full solution was expected "in the near future." Dr. Kursanov disclosed that it had been found that not only carbohydrates, but also proteins, were the direct product of photosynthesis in plants; moreover, it had been found that carbohydrates were mainly formed under the influence of the red and yellow components of the sun's light, whilst proteins were formed under the influence of the blue component. This latter finding had important possibilities for practical application in hothouses—e.g., as a conceivable means of influencing the quality and quantity of plants by utilizing light sources of varying composition and intensity

Uses of Thorium. Dr J. V. Dunworth (U.K.), of Harwell, described a number of ways in which thorium could be used more advantageously than natural uranium as a nuclear fuel. Researches in Britain had shown that a thorium and uranium-233 system, in which the U-233 was created by the bombardment of thorium with nuclear particles, was to be preferred both metallurgically and chemically to the more orthodox uranium-238 and plutonium system, in which plutonium was created by the transmutation of U-238. He expressed the opinion that thorium would probably prove a more valuable fuel than uranium for Britain's nuclear power programme, and believed that it should eventually be possible to supply all Britain's electricity needs from 15 tons of thorium a year.

[The two main sources of thorium so far known are Brazil and India. Both countries have built plants for extracting the metal thorium from monazite sands, and a Brazilian plant capable of handling 3,000 tons of monazite a year has been in operation since 1951. Known Brazilian deposits of monazite are estimated at over 100,000 tons.]

Cost of Nuclear-produced Electricity. American, British, and Soviet experts agreed that electricity generated in nuclear power stations was in early sight of being as cheap as, or even cheaper than, electricity generated at coal- or oil-fired stations.

Dr. Bhabha, addressing the final session of the conference, said that it had "succeeded beyond all hopes and expectations." He added: This scientific conference, which will inevitably have important political consequences, differs in one important respect from all political conferences. Knowledge once given cannot be taken back, and in organizing this conference the nations of the world have taken an irreversible step forward—a step from which there is no retreat. . . . The conference has re-established that free exchange of knowledge among men of science which is one of the glories of our civilization."

Discussing "a few highlights" of the conference, Dr. Bhabha said that the feasibility of generating electricity by atomic energy had been demonstrated beyond doubt, and that the economics of atomic power generation had also been greatly clarified. Even with present costs, atomic power stations would be economically competitive with power-stations of the conventional type in many areas of the world where power costs were high, especially in under-developed countries. It could be expected that many countries would review their future power requirements as a direct result of the information made available at the conference.

"The discussion of the genetical effects of radiation," said Dr. Bhabha, "clearly showed that we have not yet enough knowledge on which to base definite conclusions, and that a concerted and massive effort on this problem is required before we can be quite sure that no suffering will be caused to future generations through the production of deleterious mutations. There is no cause for alarm, but until the matter has been fully studied and understood it would be wise, wherever possible, not to permit people to be subjected to more than a tenth of the dose considered safe at present."

Dr. Bhabha said that he had been asked by the U.N. Secretary-General, Dr Hammarskjold, to say that when he (Dr Hammarskjold) reported on the conference to the United Nations, he would put forward "such practical proposals as seem appropriate in view of the need to follow up the work so well begun at the conference, and in order to equip the U.N. Organization to meet such responsibilities in this field as may grow out of developments during the next session of the General Assembly."

Dr. Hammarskjold announced on Aug. 26 that the United Nations would publish the full proceedings of the International Conference on the Peaceful Uses of Atomic Energy in 16 volumes of approximately 500 pages each. The publication would comprise all scientific papers, whether presented orally or in written form at the conference, together with a record of the discussions on each paper. The English edition would be available early in 1956, and editions in several other languages would be issued at a later date.

At the invitation of Sir John Cockcroft, nearly 150 scientists who had attended the Geneva conference—among them 30 from the Soviet Union, Poland, Czechoslovakia, and Rumania—visited Harwell on Aug. 14 and toured many parts of the Atomic Energy Establishment. An invitation to visit the Soviet atomic plant near Moscow had been extended to Sir John and other British scientists in Geneva, and had been accepted. On Sept. 6 the British, U.S., Italian, Swedish, Mexican, and Burmese Ambassadors in Moscow, as well as those from several Communist countries, were taken over the Soviet atomic power-station, which is situated in a pine forest 70 miles south-west of Moscow. The visit was the first to be made by Western representatives.

After the Geneva conference had ended, representatives of the United States, Great Britain, France, the U.S.S.R., Canada, and Czechoslovakia met in Geneva on Aug. 26-28 for private discussions on the peaceful uses of atomic energy. A joint communiqué said that technical experts of the six Powers had "reviewed a number of preliminary suggestions," that there had been "a useful exchange of technical views," and that the matter would be "studied further by the respective Governments."—(U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Soviet Weekly - Le Monde, Paris - Neue Zurcher Zeitung) **(Prev. rep. 14360 A.)**

A. PAKISTAN. — U.S. Economic Assistance. - New Operational Agreements. - U.S. Government Guarantees for American Investors in Pakistan.

Five more operational agreements for U.S. economic and technical aid to Pakistan were signed in recent months, as follows:

(1) Construction of the Taunsa barrage (Punjab)—see 13528 C. A further U.S. contribution of $2,509,600; Pakistani contribution about 18,000,000 rupees (March 25)

(2) Further construction work on the Karachi water supply and sewage disposal project. U.S. contribution $3,800,000, Pakistani contribution 135,400,000 rupees (April 9).

(3) A three-year programme for modernizing Pakistan's civil aviation network, including the development of Nawabshah airport (Sind) as an international airport auxiliary to that at Karachi; radio equipment for Karachi, Dacca, and Lahore airports; and the training of Pakistani aviation officials. U.S. contribution during the first year, $998,850, Pakistani contribution, 810,000 rupees (April 16).

(4) Construction of the Karnafuli multi-purpose project in the Chittagong area. U.S. contribution for 1955, $3,500,000, Pakistani contribution, 10,000,000 rupees (June 30)

(5) Further U.S. assistance for the Ganges-Kobadak irrigation project—$450,000 (Aug. 20).

An earlier operational agreement not yet listed (April 29, 1954) provided for the construction of three grain silos at Karachi, Chittagong, and Lyallpur as a safeguard against future crop failures. U.S. contribution, $1,485,000, Pakistani contribution, 2,400,000 rupees.

It was announced on Aug. 17 that the U.S. and Pakistani Governments had agreed on a co-operative five-year programme of agricultural development, costing 8,000,000 rupees. Its object would be to improve organization in agricultural departments, both at the Centre and in the Provinces; to raise the standard of equipment; and to spread the knowledge of agricultural methods by means of further education and demonstrations.

An agreement signed on March 16 provided that the $20,000,000 loan granted by the U.S. Export-Import Bank to Pakistan (see 14113 C) should be repaid in rupees within 40 years, but that the rupees repaid would again be made available by the U.S.A. as economic aid for financing productive projects in Pakistan.

A further agreement was signed between the two Governments on May 26 which provided for U.S. Government guarantees to be extended to American private businesses investing in Pakistan. The guarantees will be administered by the Foreign Operations Administration, although all guaranteed investments will have to obtain the approval of both Governments.—(Pakistan High Commissioner's Office, London - New York Times) **(Prev. rep. 14113 C; 13528 C.)**

B. CHINA - NEPAL. — "Panch Sila" Agreement.

The agreement signed on Aug. 1 between Nepal and the People's Republic of China laid down that the relations between the two countries would be governed by the principles of *Panch Sila*—the "five principles of peaceful co-existence"—as enunciated in the Nehru-Bulganin declaration of June 22 (see 14372 A). The agreement was signed in Khatmandu and not (as erroneously stated in 14350 C) in Delhi.
(The Statesman, Calcutta) **(Prev. rep. 14350 C; 13588 A.)**

A. FRANCE. — Parliamentary Approval for Consideration of Further Constitutional Reforms. - New Assembly Rule for Limitation of Proxy Voting.

M. Paul Reynaud, the Independent Republican leader and former Premier, submitted to the French National Assembly on March 10 a motion for the revision of the Constitution of 1946, which provided (*a*) for the simplification of the procedure for constitutional changes; (*b*) for the dissolution of the Assembly if a Government were defeated on a censure motion or a motion of confidence within two years of its formation. The motion was also signed by M. Sécretain (U.D.S.R.), M. Garet (Independent Republican), M. Laurens (Independent *Paysan*), M. Pupat (*Paysan*), and M. Bergasse (Dissident Gaullist) on behalf of their respective parties. Similar proposals had been put forward by M. Reynaud at the time of the Cabinet crisis of 1953 as a condition of his accepting office, but had been rejected by the Assembly (see 12993 A).

In introducing his motion, M. Reynaud contrasted the stability of the British political system, arising from the existence of a strong Executive, with the "ministerial instability" in France, which had led to 20 Cabinet crises in 10 years. Over a quarter of the non-Communist members of the Assembly, he pointed out, had held Cabinet office, and it was becoming "a disgrace not to have been a Minister like everyone else." The result of this state of affairs was that deputies voted for the overthrow of Governments in the hope of securing office. This situation, M. Reynaud suggested, was harming France's prestige and vital interests, and was costing her her position as a great Power. In support of this contention he referred to the position in North Africa; to the recent SEATO conference at Bangkok (see 14081 A), at which, owing to the fall of the Mendès-France Government, France had not been represented by a member of the Cabinet; and to recent suggestions made by Sir Winston Churchill and the British Labour Party for a "summit" conference in which no mention had been made of France. M. Reynaud then made the following proposals.

(1) Article 90 of the Constitution, dealing with its revision, should be amended so as to restore the "more simple and logical" procedure laid down in the Constitution of 1875. Under the existing Constitution, an absolute majority of the members of both Chambers must first decide to revise it, secondly, the Bill had to be approved by two-thirds of the members of the Assembly, or three-fifths of the members of both Chambers; and finally, if the required majority had not been obtained, the Bill had to be submitted to a referendum. M. Reynaud proposed instead that the two Chambers should first decide separately, by an absolute majority, on the Articles to be revised, and should then meet in joint session to take a final decision, again by an absolute majority.

(2) If a Government was defeated on a motion of censure or a vote of confidence within two years of its investiture, the Premier might ask for a second vote to be taken within three days. If the Government was again defeated the Assembly would automatically be dissolved, and new elections held at least 20 and not more than 30 days afterwards. This provision, however, would not apply in time of war, or when a state of siege had been proclaimed over the whole or part of metropolitan France.

In support of this proposal, M. Reynaud contended that it would not increase the Executive's power over the Assembly, as the final decision would rest with the latter, that, as Ministers were almost all deputies, they would not be tempted to "abuse a question of confidence of which they might be the victims"; and that there was therefore no reason to fear "the substitution of parliamentary instability for ministerial instability." Moreover, as each Assembly was elected for five years, three Ministries might hold office during its lifetime without a dissolution taking place.

(3) The provision in Article 13 forbidding the Assembly to delegate its powers to the Executive should be repealed.

(4) The National Assembly's agenda should be decided by the Government.

(5) Deputies should no longer be empowered to propose increases in expenditure.

The Prime Minister, M. Faure, stated at a press conference on March 30 that his experience in office had confirmed him in his "absolute conviction" of the necessity to reform the working of the parliamentary and governmental system; he paid tribute to M. Reynaud for having "recognized the full importance of this question" and for seeking "practical solutions." On the following day the Universal Suffrage Commission of the Assembly (which deals with constitutional questions) adopted a resolution inviting the Prime Minister to make a statement on the Government's views on constitutional reform; a Bill (proposed by M. Reynaud) for the revision of Article 90 of the Constitution failed, however, to secure the majority of votes in the Commission necessary for it to be treated as a matter of urgency. The Bill was supported by the Radicals, U.D.S.R., Independents, *Paysans* and Independent *Paysans*, Gaullists, and Dissident Gaullists, but was opposed by the Communists; the Socialist and M.R.P. members of the Commission abstained from voting.

When the question of revising Article 90 was submitted to the Assembly on May 24, M. Lecourt (parliamentary leader of the M.R.P.) suggested that the question of votes of confidence and of the Articles dealing with the French Union should also be considered. This proposal was adopted by the Assembly, which decided by 404 votes to 210 that there were grounds for reconsidering 28 Articles of the Constitution.

M. Defos du Rau (M.R.P.), *rapporteur* of the Universal Suffrage Commission, stated that, in addition to M. Reynaud's proposals, seven other proposals had been submitted for the revision of Article 90. The Commission, he explained, favoured the simplification of the procedure for constitutional revision by combining the two stages of the operation, but supported the retention of the existing provisions relating to the majorities required and the use of the referendum, and opposed any return to the system of the 1875 Constitution. **M. Reynaud,** however, pointed out that previous constitutional changes had taken four years to pass, and maintained that no fundamental reforms could be carried out so long as a majority of three-fifths or two-thirds was needed. He denied that his proposals would lead to constant changes in the Constitution, as had been suggested, since even in the event of an electoral landslide in the Assembly an absolute majority would still be needed in the Council of the Republic, whereas under the present system a two-thirds majority in the Assembly could overrule the Upper Chamber.

M. Verdier (Socialist) asserted that the principal cause of governmental instability lay in the system of party organization rather than in the Constitution. He observed that in Britain, despite the right of dissolution, crises had been common in the 19th-century because the parties had lacked cohesion and Whigs and Tories had frequently changed sides. Similarly, French Governments today often lost their majorities because of the lack of cohesion and discipline within the groups supporting them, for example, the fall of M. Mendès-France had been brought about by certain members of his own party. It was therefore necessary to choose between the conception of a deputy's independence with regard to his group, together with the instability to which it gave rise, and the reform in political habits which was necessary to ensure stability. **M. Schmittlein** (Gaullist) declared that substantial revision of the Constitution was indispensable, and that "to make it possible we must open the door which had been carefully bolted by Article 90." **M. Ballanger** (Communist), on the other hand, criticized the 1946 Constitution as "insufficiently democratic," and demanded the revision of Article 90 so as to make a referendum on constitutional changes obligatory, independent of Parliamentary majorities.

M. Lecourt (M.R.P.) said that changes in parliamentary procedure and political habits were necessary, as well as a revision of the Constitution, and recalled that the same political instability had existed under the Third Republic. If the Assembly confined itself to the revision of Article 90, he pointed out, this could not be completed before January 1956, as the last quarter of the year was reserved for the Budget and the new Assembly, which was due for election in June 1956, would not be able to deal with other changes until the beginning of 1957. He therefore suggested that the Assembly should consider other possible reforms immediately, and moved that, in addition to Article 90, it should also consider the revision of Articles 49 and 50 (dealing with votes of confidence and motions of censure), Article 51 (on the procedure for dissolution of the Assembly), and the whole of Chapter VIII of the Constitution (comprising Articles 60-82) dealing with the French Union.

After **M. Hugues** (Radical) had proposed that Article 17 (dealing with deputies' powers to propose increases in expenditure) should also be considered, **M. Faure** expressed approval of M. Lecourt's and M. Hugues's amendments on the Government's behalf.

The Assembly accordingly voted to consider the revision of Articles 17, 49, 50, 51, 60-82, and 90, only the Socialists and Communists opposing.

The Council of the Republic, on July 19, also approved in principle the revision of Articles 17, 49, 50, 51, 62-80, and 90 of the 1946 Constitution, the final vote on the Bill as a whole being 245 in favour and 70 against, the Socialists and Communists opposing. In the preceding voting on individual sections of the Bill, the Socialists voted with the majority in favour of revising Chapter VIII of the Constitution (Arts. 62-80), the voting on this particular point being 300 against 14. At the suggestion of M. Michel Debré (Gaullist), *rapporteur* of the Universal Suffrage Commission, the Council added a rider requesting the National Assembly to give priority to the amendment of Article 90.

On July 26 the Assembly approved a change in its rules limiting the right of voting by proxy. Under the system hitherto in force, a deputy's vote could be recorded in his absence by a member of his party, the bureau of the Assembly, or anyone else named by him. The new rule (which was opposed only by the Communists) required deputies to vote in person when a new Prime Minister was seeking a *vote d'investiture*, when a motion of confidence had been put by the Government, or when there was a vote of censure. Personal voting on international treaties would also be obligatory when a recommendation to that effect by the steering committee of the Assembly was approved by the Assembly itself.

A. EGYPT - ISRAEL. — Cease-Fire in Gaza Area. - General Burns's Report to U.N. on Gaza Incidents. - Security Council Resolution.

A renewed call for an immediate cease-fire in the Gaza area, made on Sept. 3 by the Chief of Staff of the U.N. Truce Supervisory Organization (General Burns) after consultation with the U.N. Secretary-General (Dr. Hammarskjold), was accepted on Sept. 4 by Egypt and Israel, both Governments reserving the right to defend themselves if attacked.

Although the situation on the border remained tense, no further incidents occurred after the Israeli attack on Khan Yunis on Aug. 31, which had been made in retaliation for raids into Israel by Egyptian saboteurs. On Sept. 5 the Government of Israel apologized for an incident on the previous night in which an Israeli patrol had crossed the border and had subsequently withdrawn after a clash with Egyptian troops in which two Israeli soldiers were killed. It was explained that the patrol had lost its way and had crossed the border in error. The apology—the first of its kind to be made by either side—was transmitted to the Egyptian authorities by General Burns. On the same day (Sept 5) the bodies of the two Israeli soldiers killed in the clash were returned by the Egyptian military authorities to the Israeli side, with full military honours. The bodies of the two Egyptian airmen killed in the air clash of Sept. 1 (see 14389 A) had previously been returned by the Israeli military authorities to the Egyptian side, also with full military honours.

The Egyptian-Israeli Mixed Armistice Commission met on Sept. 5, under the chairmanship of a U.N. observer, to decide upon the responsibility for the incident of Aug. 22 which had led to the breaking-off of the Gaza negotiations by Egypt, and which had precipitated the series of clashes on the border during the following ten days. The meeting took place at "Kilometre 95," a no-man's-land on the Gaza-Beersheba road where the earlier border discussions had been held. After a 15-hour discussion, the U.N. chairman said that both parties had committed flagrant violations of the armistice agreement but that, in his opinion, it was impossible to tell who had fired the first shot. He found (*a*) that Egypt had been guilty of firing on a routine Israeli patrol in open country near Mefallsim (the scene of the incident of Aug. 22), and that the patrol had thereupon attacked the Egyptian post as the only way of defending itself; (*b*) that Israel had been guilty of opening fire on the Egyptian post and occupying it, causing the death of one Egyptian officer and two other ranks and injuries to nine others. Both resolutions were adopted by the casting vote of the U.N. chairman, the first being opposed by the Egyptian delegation and the second by the Israeli delegation.

A report on the recent incidents in the Gaza area was presented to the United Nations on Sept. 7 by General Burns, who expressed the opinion that such incidents could only be avoided if the opposing forces were "separated by an effective physical barrier along the demarcation line."

General Burns's report analysed the "outbreak of extreme violence" which had begun with the Mefallsim incident on Aug. 22 and ended with the Khan Yunis attack on Aug. 31, and recapitulated the various attempts made by him and by U.N. officials to end the violence. He disclosed that nine U.N. military observers and other personnel had been detained by Israeli officials for several hours at Beersheba on Aug. 31; that an immediate protest had been made to the Israeli Foreign Ministry, and that, "after some conflicting statements had been made," the U.N. officials had been allowed to travel to Jerusalem or Gaza under military escort.

General Burns said that bands of marauders from the Egyptian side had penetrated deeply into Israel and had carried out murder and sabotage. "The number and nature of these acts of sabotage, perpetrated well within Israel territory, are such as to suggest that they are the work of organized and well-trained groups," the report added. "Investigations so far completed by U.N military observers tend to support this view." The U.N. Truce Supervisory Organization had made representations to the Egyptian War Ministry, the Governor of Gaza, and the Egyptian military commander at Gaza, listing some of these raiding operations and stating that their continuation could provoke "reactions which might lead to the gravest situation." According to a statement by the Israeli Foreign Ministry (mentioned by General Burns in his report), the continuation of these raids was the determining factor which led to the Israeli attack on Khan Yunis.

"I am of the opinion," said General Burns, "that a repetition of incidents between Egyptian outposts and Israeli motor patrols ... will only be avoided if the forces of the opposing sides are separated by an effective physical barrier along the demarcation line; and if, in addition, defensive positions and motorized patrols are kept at least 500 metres from the demarcation line on either side."

The U.N. Security Council, meeting in New York on Sept. 8, unanimously adopted a resolution, presented jointly by Great Britain, the U.S.A., and France, which (*a*) noted with approval that Egypt and Israel had agreed to a cease-fire; (*b*) called upon both parties "forthwith to take all steps necessary to bring about order and tranquillity in the area, and in particular to desist from further acts of violence"; (*c*) endorsed General Burns's view that "the armed forces of both parties should be clearly and effectively separated by measures such as those which he has proposed"; (*d*) declared that the U.N. observers in the area must be given full freedom of movement to enable them to carry out their functions; (*e*) called upon Egypt and Israel to co-operate fully with General Burns; and (*f*) requested General Burns to report on the action taken to carry out the resolution.

Sir Pierson Dixon (U.K.), who opened the debate, expressed deep concern at the renewed outbreak of violence in the Gaza area, but urged that there should be no recriminations and that the Council should fix its eyes upon a "constructive future" rather than indulge in controversy by discussing the representations made by Egypt and Israel. Provided that restraint was exercised by both parties and the problem was realistically approached, he believed that order and tranquillity could be maintained in the Gaza area. Statements in support were made by Mr. Cabot Lodge (U.S.A.), M. Hervé Alphand (France), Sir Leslie Munro (New Zealand), and M. Sobolev (Soviet Union).

At the Security Council's invitation, Egyptian and Israeli representatives were present at the discussion. Both made moderately-worded statements accusing the other party of responsibility for the Gaza incidents, but both gave assurances that their countries would observe the cease-fire.

The Israeli Foreign Ministry stated on Sept. 8 that Israel supported General Burns's suggestion for the erection of a physical barrier between the forces of the two sides in the Gaza area.—(Times - Daily Telegraph - New York Times)

B. NETHERLANDS. — Old-Age Pensions Legislation.

A new and comprehensive old-age pensions plan was submitted by the Netherlands Government to the States-General on June 30. Its main provisions were as follows:

(1) All permanent residents in the country between the ages of 15 and 65, irrespective of nationality, would be liable to pay compulsory pension insurance premiums, to be collected by the Inland Revenue authorities in the same way as taxes, and to vary from 6 5 to 7 per cent of income.

(2) A social insurance bank would be set up to administer the scheme.

(3) Each working generation would furnish the funds necessary for the pensions of the generation eligible for benefit.

(4) Premiums would not be levied on amounts in excess of 6,000 guilders (£600) per annum. People with an annual income of less than 1,500 guilders (£150), or, in the case of married couples, of 2,100 guilders (£210), would be exempt from premium payments.

(5) Single persons would receive a pension of 804 guilders (approx. £80), and married couples of 1,338 guilders (approx. £134) a year, irrespective of other sources of income

(6) Existing pension schemes operated for their staffs by private business concerns would be adapted to the new plan.

(7) There would be compensation for the new premiums to be paid through abolition of the 4 per cent "equalization levy" now payable by employers, and by means of a small increase in wages.

It was also laid down (*a*) that special provisions would safeguard the position of married women without income (e.g., it would be possible for one-half of the pension of a married man to be paid to his wife without his consent), (*b*) that pension payments might be adjusted to fluctuations in the cost of living if, over a period of six successive months, the wages index showed an average rise or fall of three per cent; (*c*) that in the event of a sudden rise in the cost of living within a shorter period than six months, the pension rate might also be increased; (*d*) that in the event of misuse of the pension payments by the beneficiary, the social insurance bank would be empowered to make the payments to another person or to an institution entrusted with their administration for the benefit of the pensioner; (*e*) that the pensions could not be used as security for loans.

(Netherlands News Agency)

C. SWIMMING. — Cross-Channel Record.

William Pickering (34), baths manager at Bloxwich, Staffordshire, set up a new cross-channel record on Aug. 26-27 by swimming from England to France in 14 hours 6 mins. He entered the water at St. Margaret's Bay, near Dover, at 8.36 p.m. on Aug. 26 and stepped ashore near Calais at 10.42 a.m. on the following morning.

The Channel Swimming Association explained that the time of 13 hours 45 mins. for the England-France swim, set up in 1953 by an Egyptian, Abdul Latif Abu-Heif, was not officially recognized because he had not been accompanied by observers, and that Mr. Pickering's achievement would be recognized as an official record. The previous official record for the England-France swim, 14 hours 42 mins., was set up in 1953 by Miss Florence Chadwick, of California. The record for the France-England swim, 10 hours 50 mins., was set up in 1950 by an Egyptian Army officer, Lieutenant Hassan Abd el-Rehim.

A. INTERNATIONAL BANK. — New Loans and Bond Issues. - South Korean Membership.

The following loans were made in recent months by the International Bank for Reconstruction and Development (dates of announcement in parentheses) :

Algeria. $10,000,000, guaranteed by France and Algeria, to *Electricité et Gaz d'Algérie* for a five-year expansion programme Three European banks participated in the loan to the extent of $724,000 , they were the *Société Générale pour favoriser le Developpement du Commerce et de l'Industrie en France* ($487,000), the Netherlands Trading Society, Amsterdam ($157,000), and Banque Lambert, Brussels ($80,000). Terms · 3¾ per cent p a. interest, plus 1 per cent p a. commission, repayable within 20 years starting March 1, 1957 (Aug. 28, 1955)

Austria. $10,000,000, mainly in European currencies, to the *Vorarlberger Illwerke*, a publicly-administered company, for equipment for the Lunersee hydro-electric project The Philadelphia National Bank participated in the loan to the extent of $153,000 The loan, which was guaranteed by the Austrian Government, was the second International Bank loan to Austria, the other having also been for a hydro-electric project (see 13984 A). Terms 3¾ per cent p a. interest, plus 1 per cent p a commission, repayable within 25 years starting May 15, 1960 (June 15, 1955).

Colombia. $15,900,000, guaranteed by the Colombian Government, to the Colombian National Railroads to help finance the extension of the Magdalena Valley Railroad The Bank of America participated in the loan to the extent of $866,000. Terms 3¾ per cent p.a interest, plus 1 per cent p a commission, repayable within 25 years beginning Nov 1, 1958 (June 16, 1955)

Guatemala. $18,200,000 to the Guatemalan Government (the first such loan) to help complete the new Atlantic and Pacific Highways and to improve and maintain existing roads The Bank of America participated in the loan to the extent of $576,000 Terms 3¾ per cent p a. interest, plus 1 per cent p.a. commission, repayable within 15 years beginning Feb. 1, 1959 (July 29, 1955)

Lebanon. $27,000,000, guaranteed by the Lebanese Government, to the Litani River Authority for a project which will more than double the country's electricity generating capacity and permit the irrigation of 8,500 acres of agricultural land along the Mediterranean coast Terms of the loan (the first to be made by the International Bank to the Lebanon) 3¾ per cent p a interest, plus 1 per cent p a commission, repayable within 25 years beginning on Aug 1, 1961 (Aug. 26, 1955).

Nicaragua. Three loans, all guaranteed by the Nicaraguan Government. The first, $7,100,000 to the *Emprese Nacional Luz y Fuerza* of Managua, will be used to buy equipment for expanding power distribution in the Managua area , the second, $400,000 to the *Instituto de Fomento Nacional*, will be re-lent to small power distributors for improving their distribution systems in 15 towns. The Bank of America participated in the loans to the extent of $724,000. Terms of both loans 3¾ per cent p a. interest, plus 1 per cent p a. commission, repayable within 20 years starting on Oct 1, 1958 (July 8, 1955)

The third loan, of $1,500,000 to the *Instituto de Fomento Nacional*, will be used for importing agricultural equipment and livestock. The Bank of America participated in this loan to the extent of $735,000. Terms 3¼ per cent p a interest, plus 1 per cent p a. commission, repayable within 12 years starting on Oct 1, 1957 (Aug. 30, 1955)

Pakistan. (*a*) $13,800,000, mainly in pounds sterling and German marks, to the Karachi Electric Supply Corporation Ltd for a new thermal power station and the improvement of existing power facilities in Karachi Six of the Eastern Exchange banks (the Chartered Bank of India, Australia and China , Eastern Bank Ltd.; Grindleys Bank Ltd , Lloyds Bank Ltd , the Mercantile Bank of India Ltd. , and the National Bank of India Ltd.) participated to the extent of $2,058,000. Terms 3¾ per cent p a interest, plus 1 per cent p a commission, repayable within 15 years beginning on Dec 1, 1957 (June 22, 1955)

(*b*) $4,200,000 in various currencies to the Karnaphuli Paper Mills Ltd. for constructing a pulp and paper mill at Chandraghona (East Pakistan), whose output will save imports worth $4,000,000 - $5,000,000 a year in foreign exchange The Bank of America and the Manufacturers Trust Company participated in the loan to the extent of $775,000. Terms 3¾ per cent p a interest plus 1 per cent p a commission, repayable within 15 years starting on Aug 15, 1956 (Aug 5, 1955).

(c) $14,800,000 to the trustees of the port of Karachi for port improvements. It was announced that the Bank expected that the loan would be made almost entirely in European currencies and Japanese yen. [This was the first time that the International Bank had lent Japanese yen, which the Japanese Government had made available from its subscription to the Bank's capital.] The Netherlands Trading Society participated in the loan to the extent of $217,000, payable in Dutch guilders Terms 3¾ per cent p.a interest, plus 1 per cent p.a. commission, repayable within 25 years beginning on June 1, 1960 (Aug. 5, 1955).

All three loans were guaranteed by the Pakistani Government

Panama. $5,900,000 to the Panamanian Government for a 4-year programme of highway reconstruction The Bank of America and the Chemical Corn Exchange Bank participated in the loan to the extent of $1,000,000 and $700,000 respectively Terms · 3¼ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 9 years beginning on May 1, 1959 (July 12, 1955).

Peru. $5,000,000 to the Peruvian Government for buying highway maintenance equipment and to cover the fees of engineering advisers on modern maintenance methods. The Chemical Corn Exchange Bank participated in the loan to the extent of $683,000 Terms · 3¼ per cent p a interest, plus 1 per cent p.a. commission, repayable within 9 years starting on Aug 15, 1958 (Aug 5, 1955)

Siam. $12,000,000, guaranteed by the Siamese Government, to the State Railway for a 5-year improvement programme The Bank of America participated in the loan to the extent of $1,105,000. Terms 3¾ per cent p a interest, plus 1 per cent p.a. commission, repayable within 15 years beginning on Aug 15, 1958 (Aug. 9, 1955)

Uruguay. $5,500,000, mainly in Italian lire and Swiss francs, to the *Administración General de las Usinas Electricas y los Telefonos del Estado* (*U T E*) for the expansion of power supplies The First National City Bank of New York ($300,000) and the Netherlands Trading Society ($354,000) participated in the loan, which was guaranteed by the Uruguayan Government Terms : 3¾ per cent p a interest, plus 1 per cent p a commission, repayable within 20 years starting on May 1, 1958 (Aug 30, 1955)

All private banks participated in the above loans without the International Bank's guarantee.

In a statement issued on Aug. 8, the International Bank announced that during the year ended June 30, 1955, it had made 20 loans, totalling $409,600,000 (more than in any previous year), to 14 countries, compared with 26 loans, totalling $324,000,000, made to 16 countries in 1953-54. Since its inception it had thus made 124 loans (about $2,325,000,000) to 37 countries.

It was announced on Aug. 2 that an underwriting syndicate of 14 Dutch banks, headed by the Netherlands Trading Society, were offering on behalf of the International Bank a new issue of 40,000,000 guilders 3¼ per cent bonds The bonds, which were offered at par, would be repaid in 14 equal annual instalments beginning on Sept 1, 1961 This was the fourteenth issue of bonds sold by the International Bank for currencies other than U S. dollars, a summary of these sales (with amounts expressed in U S dollars) being as follows . two Netherlands guilder issues, $21,000,000 , seven Swiss franc issues, $68,800,000 , three Canadian dollar issues, $50,100,000 ; two pound sterling issues, $28,000,000 Of these, $9,400,000 of Swiss franc bonds and $13,600,000 of Canadian dollar bonds had been repaid, leaving approximately $145,000,000 of non-dollar bonds outstanding Nine U S. dollar issues, amounting to $705,000,000 were also outstanding

It was announced on Aug. 26 that South Korea had become a member of the International Monetary Fund and the International Bank, with a quota in the Fund and a subscription to the Bank's capital stock of $12,500,000 each. This brought the membership of each institution to 58.—(International Bank, Washington) **(Prev. rep. Loans, 14252 B ; 14168 A ; Membership, 14347 C.)**

B. EGYPT - UNITED KINGDOM. — Revised Sterling Balances Agreement. - Ending of Discrimination against Sterling Exports to Egypt.

An agreement was signed in Cairo on Aug. 29 by the Egyptian Finance Minister (Dr. Abdul Moneim el-Kaissouny) and the British Ambassador (Sir Humphrey Trevelyan) revising the Anglo-Egyptian Sterling Releases Agreement of 1951 (see 11372 A) and providing for the release by 1963 of all the sterling balances still held by Egypt. The revised agreement, which was embodied in an exchange of Notes, provided for :

(1) The release of £5,000,000 on Sept. 2, 1955, in addition to the release of £15,000,000 already made during 1955.

(2) An increase in the annual rate of release to £20,000,000 for the years 1956 to 1960 inclusive.

(3) The release of £10,000,000 a year in 1961 and 1962.

(4) The release in 1963 of any balance then remaining

The minor additional releases made under the 1951 agreement would also continue, together with releases in respect of capital transfers from Egypt to the sterling area.

It was pointed out in the British Press that one of the chief effects of the new agreement was the release of £70,000,000 - £80,000,000 for which no provision had been made in the original agreement.

The Egyptian Government announced on Aug. 31 the abolition of the Sterling Import Entitlement scheme, which had been introduced in February 1953 and had had the effect of discriminating against sterling area exports to Egypt. It was officially stated, moreover, that Egypt had assured Britain that she had no intention of introducing in future any currency measure which would have the effect of discriminating against the import into Egypt of goods from the sterling area. The import entitlement system was replaced by increased import duties of 7 per cent on imports of goods other than raw materials, capital goods, and books and publications, but these higher duties were made equally applicable to imports from all other countries.—(Treasury Press Office, London - Financial Times - Economist) **(Prev. rep. 13976 C ; 11372 A.)**

A. UNITED KINGDOM. — Forthcoming Ending of Newsprint Rationing for Newspapers.

The Board of Trade announced on Aug. 15 that newsprint rationing, originally imposed in 1940, would be abolished in March 1956, when Government control of the number of pages which British newspapers might publish would end. To cover the intervening period before March, 1956, an Order had been made specifying for various types of newspaper the number of pages which might be printed in each 28-day period.

It was explained that the amount of home-produced and imported newsprint which newspapers had been able to acquire had risen from about 650,000 tons in 1953 to 720,000 tons in 1954 and an estimated 850,000 tons in 1955, whilst in 1956 both the tonnage available from overseas and the new capacity operating in Britain would be greater In effect, newspaper users would be allowed to import all the newsprint that at present seemed likely to be available, and in the circumstances the Government considered that newspapers should be free, as early as possible, to regulate their consumption within the availability of supplies It was therefore proposed, on the expiry of the interim Order, to revoke the present statutory controls on the delivery of newsprint and the number of pages which newspapers might publish. An announcement about future arrangements for the issue of import licences would be made in due course

The ending of control (the announcement added) would inevitably bring readjustment problems, and the six months' interval would be needed to enable users and suppliers of newsprint to complete the necessary arrangements amongst themselves, including the negotiation or revision of contracts In this connexion the Government would need to be assured that adequate provision was being made for newspapers with relatively small requirements, and it welcomed the assurances already given by representatives of the home mills that every endeavour would be made to safeguard the position of these small consumers

The Newsprint Supply Company Ltd., in a letter sent on the same day by Mr. F. P. Bishop, M.P. (its manager) to all newspapers associated with its scheme, disclaimed "all responsibility for the situation created by the Government." The letter complained that the Government statement "made no reference to recent discussions between the President of the Board of Trade and representatives of the company" and had ignored "the considered views of the company conveyed to the President in a letter dated July 27."

The last-mentioned letter, after referring to the discussions between Mr. Thorneycroft and the company's directors, stressed that newsprint supplies were still inadequate to permit freedom of paging unless large users were prepared to exercise voluntary restraint "in order to ensure adequate supplies to the hundreds of small newspapers." The company considered that this situation would continue for some time, as supplies were still far below the pre-war level and only sufficient to permit an average of nine pages in the 1½d. daily newspapers. Although appreciating the raised "ceiling" of newsprint authorized by the Board of Trade, the company saw no prospects of this "ceiling" being reached in the next year or so because of the pressure of world demand.

The letter recalled that a detailed plan, designed by the company to enable Government controls to be replaced by a system of voluntary rationing, had broken down because one of the company's members had refused to accept voluntary paging, which was an essential feature of the scheme. The company therefore feared that the removal of the Order limiting paging would have "very serious consequences," since it would bring into force individual contracts held by the larger newspapers with British mills, thereby absorbing the mills' whole output and making it impossible to guarantee supplies to smaller newspapers. It therefore recommended that the Order governing paging should remain until either (*a*) complete agreement could be secured amongst the large newsprint users; or (*b*) increased supplies made further restraint unnecessary.

In his letter of Aug. 15, Mr. Bishop estimated that newsprint supplies in 1956 would amount to only 930,000 tons, or nearly 200,000 tons less than the pre-war supply and "barely sufficient at the present level of sales to permit of 10-page national newspapers."—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 13784 B; Weeklies, 13648 C.)**

Note. Newspapers were first restricted in size as a wartime economy measure in July 1940 (see 4145 A), under an Order made by the Ministry of Supply at the request of the Newsprint Supply Company, Ltd., which has since regulated newsprint supplies under Government control. The company was incorporated as a non-profit-making concern in May 1940, its shares being held by nine leading national newspapers, two representatives of the Newspaper Society (representing provincial newspapers), and one representative of the Scottish Newspaper Proprietors' Associations (Times)

B. GERMANY. — New U.S. Commandant in Berlin.

It was announced on Aug. 31 that Brig.-General Hugh P. Harris (Chief of Staff of the U.S. Second Army) had been appointed U.S. Commandant in Berlin *vice* Brig.-General F. T. Pachler, assigned to Supreme Allied Headquarters in Paris. (New York Times) **(Prev. rep. 14159 A; 13998 C.)**

C. BRAZIL. — New Multilateral System of Trade and Payments. - Modification of Anglo-Brazilian Debt Agreement of 1953.

Following discussions held at The Hague on May 4 and in Bonn on July 19, arrangements were completed on Aug. 16 for setting up a multilateral system of trade and payments between Britain, the Netherlands, and the German Federal Republic on the one hand, and Brazil—a heavy debtor of all three countries—on the other. The arrangements were the culmination of a German-Brazilian agreement of July 1, a Dutch-Brazilian agreement of Aug. 16, and an exchange of Notes between Britain and Brazil modifying their existing payments arrangements and the Anglo-Brazilian debt agreement of 1953.

The new system will affect payments in two ways:

(1) Sterling, Deutschemarks, and guilders will have a "limited convertibility" in that Brazilian importers will be able to use these currencies for payments in any of the three countries concerned. Conversely, Brazil will accept any of the currencies in payment for goods exported to the sterling area, Western Germany, or the Dutch monetary area

(2) Under facilities announced by the Federal German authorities on Aug 13, British and Dutch banks will be able to buy Brazilian-German "clearing dollars" for financing imports from Brazil on the same footing as German banks are able to do for German importers—i e 80 per cent at free rates and 20 per cent at the official rate from the *Bank Deutscher Länder* This arrangement will operate as long as the supply of "clearing dollars" lasts [These dollars represent Brazil's debit balance on the Brazilian-German agreement of 1953 (see 13216 A) and were said to amount to about $25,000,000 on July 31, 1955]

The major modifications to the Anglo-Brazilian debt agreement of 1953 (see footnote) involved:

(*a*) abrogation of the provision whereby the minimum annual repayment by Brazil of £6,000,000 was to be increased in any year in which Brazil's sterling receipts exceeded £35,000,000;

(*b*) termination of the provision restricting Brazil's annual sterling expenditure on oil imports to a total of £15,000,000,

(*c*) a Brazilian undertaking to pay at the official rate of exchange all commercial debts owing to U K and Colonial creditors in respect of goods imported into Brazil on licences issued before Oct. 9, 1953, that were not already covered by the 1953 debt agreement. These payments would begin when debts covered by that agreement had been liquidated

The first auction of "pool" currency for use by Brazilian importers wishing to pay debts in Britain, the Netherlands, or Western Germany was held in Brazil on Aug. 22. The currency, which amounted to about $250,000, consisted entirely of D-marks; later auctions will have a guilder and sterling element.—(Bank of London and South America - Board of Trade Journal - Financial Times - Frankfurter Allgemeine Zeitung) **(Prev. rep. 13216 A.)**

Note. The U.K.-Brazilian agreement of 1953, embodied in an exchange of Notes on Oct. 1 of that year after five months of negotiations, contained the following provisions: (*a*) Brazil would apply to the International Monetary Fund for a drawing of £10,000,000 to be used for an initial payment to Britain (*b*) In each year from Oct. 1, 1953, the Brazilian Government would make available a minimum of £6,000,000 for the liquidation of her sterling debts. (*c*) Additional payments would be made in any year when Brazil's total sterling receipts exceeded £35,000,000, on the following scale: (i) 10 per cent of amounts between £35,000,000 and £45,000,000; (ii) 30 per cent of amounts between £45,000,000 and £50,000,000; (iii) 50 per cent of amounts between £50,000,000 and £60,000,000; (iv) 100 per cent of amounts over £60,000,000. (*d*) Interest would be payable by the Brazilian Government at the rate of 3½ per cent on the outstanding debts. (*e*) Brazil agreed to restrict payment in sterling for purchases of petroleum products from U K companies to £15,000,000 a year until the commercial debts were cleared, (Treasury Press Office)

D. INDIA. — Law Commission.

The appointment of a Law Commission was announced by the Indian Law Minister, Mr. Biswas, on Aug. 5.

The commission will be headed by Mr. M C. Setalvad, the Attorney-General, will comprise the Chief Justices of the Bombay and Rajasthan High Courts, two retired High Court judges, the Advocates-General of Madras, Andhra, and the Punjab, and three leading lawyers

The commission will (*a*) review the system of judicial administration in India; (*b*) suggest means of improving it by making legal proceedings speedier and less expensive; (*c*) examine laws of general application and importance; and (*d*) recommend the lines on which they should be amended, revised, consolidated, or otherwise brought up to date. Mr. Biswas explained that its inquiries would cover both civil and criminal courts, the recruitment of the judiciary, and the standards of legal education.—(The Statesman, Calcutta - The Hindu, Madras)

A. UNITED STATES. — Report of Advisory Committee on Prisoners of War. - Code of Conduct for U.S. Servicemen. - Promulgation by President Eisenhower.

The report was published on Aug. 17 of an Advisory Committee on Prisoners-of-War, set up on May 18 by the Secretary of Defence (Mr. Charles Wilson) to recommend ways of training military personnel to defend themselves against "brain-washing" and other physical and mental stress in the event of capture. The chairman of the committee was Mr. Carter L. Burgess (Assistant Secretary of Defence for Manpower and Personnel), who had been an aide to General Bedell Smith when the latter was Chief of Staff to General Eisenhower during the Second World War.

The committee reviewed the treatment accorded to prisoners-of-war throughout history, and then dealt specifically with the treatment of American P O W s in Korea, which had apparently been similar to that suffered by British prisoners (see 14282 A). It said that a total of 7,190 Americans had been captured by the enemy during the Korean fighting (6,656 Army, 263 Air Force, 231 Marines, 40 Navy), of whom no less than 2,730 (38 per cent) had died in Korean prison camps This "ghastly death-toll," the commission said, was the worst since the Revolutionary War (i.e. the American War of Independence) Of those who had subsequently been released as a result of the Korean armistice, 565 had been questioned about their conduct whilst in captivity, 373 of these men had been cleared, or the cases against them had been dropped after investigation. Of the remaining 192 men, 68 had been "separated from the services," three had resigned, one had been reprimanded, two had been given restricted assignments, and six had been convicted at courts-martial A further 112 cases, in various stages of investigation, were still pending. [A subsequent Army Department statement of Sept. 12 said that, of these 112 cases, 47 had been dropped for lack of evidence, two men had been convicted and two acquitted by court-martial, six had been cleared, and one dismissed by action of the Army's security board, leaving 54 cases still pending] A further 21 U S. servicemen had elected to stay with the Communists after the armistice, the evidence indicated, however, that few of them were "sincere" converts to Communism, but that "expediencey, opportunism, and fear of reprisal doubtless influenced some of the group"

The report dealt at length with the prisoners' subjection to prolonged interrogation, and referred to the success of their captors in inducing "nearly all the American prisoners" to provide more information than the absolute minimum of name, rank, number and date of birth. The committee found that the causes of the war, the U.N. objectives, and the need for U S. intervention had not been clearly delineated in the public mind, and that Chinese indoctrinators had had the advantage over many prisoners who knew too little about the U.S.A and its ideals and traditions Stressing the need for "spiritual and educational bulwarks against enemy political indoctrination," the committee recommended (*a*) that the Assistant Secretary of Defence (Manpower and Personnel) should be directed to initiate exploratory conferences with the Department of Health, Education, and Welfare and other agencies and institutions on pre-service training; (*b*) that the Defence Department should devise a special training programme to teach American servicemen ways and means of resisting enemy interrogators.

The committee's most important recommendation was a Code of Conduct for all members of the U.S. armed forces, which, it was proposed, should be promulgated in the form of an Executive Order.

The spirit and intent of the Code, the committee said, was that throughout his service a man must be responsible for all his actions. They recognized that a prisoner of war might be subjected to severe pressure to disclose information or sign false statements, but emphasized that "a line of resistance must be drawn somewhere, and initially as far forward as possible" This "first line of resistance" would be the name, rank, and service number provisions of the Geneva Conventions If a P.O W was driven under interrogation from this "first line," he must be trained for resistance in successive positions and "to stand on the final line to the end—no disclosure of vital information, and above all no disloyalty in word or deed to his country, his service, or his comrades,"

The text of the Code of Conduct was as follows :

"(1) I am an American fighting man, I serve in the forces which guard my country and our way of life. I am prepared to give my life in their defence.

(2) I will never surrender of my own free will. If in command I will never surrender my men while they still have the means to resist.

(3) If I am captured I will continue to resist by all means available. I will make every effort to escape and aid others to escape. I will accept neither parole nor special favours from the enemy.

(4) If I become a prisoner of war, I will keep faith with my fellow prisoners I will give no information or take part in any action which might be harmful to my comrades If I am senior, I will take command If not, I will obey the lawful orders of those appointed over me and will back them up in every way

(5) When questioned, should I become a prisoner of war, I am bound to give only name, rank, service number, and date of birth. I will evade answering further questions to the utmost of my ability. I will make no oral or written statements disloyal to my country and its allies or harmful to their cause.

(6) I will never forget that I am an American fighting man, responsible for my actions and dedicated to the principles which made my country free. I will trust in my God and in the United States of America"

The Code of Conduct was promulgated on the same day (Aug. 17) by President Eisenhower, who signed an Executive Order bringing it into force. A set of instructions accompanying the Code said :

"Oral or written confessions true or false, questionnaires, personal history statements, propaganda recordings and broadcasts, appeals to other prisoners of war, signatures to peace or surrender appeals, self-criticisms, or any other oral or written communication on behalf of the enemy or critical or harmful to the United States, its allies, the armed forces, or other prisoners, are forbidden."

Officials in Washington said that every Serviceman would probably receive a copy of the Code of Conduct and the accompanying instructions, but that it was unlikely that a formal oath would be required It was indicated that although a P.O W would be expected to resist all forms of enemy pressure by every means in his power, merciful consideration would be given to P O W s who divulged information under torture or other forms of cruel treatment

Under the Geneva Conventions of 1929 and 1949, a prisoner of war need not divulge more than his name, rank, service number, and date of birth.—(New York Times - New York Herald Tribune) **(Prev. rep. Repatriation of P.O.W.s, 13397 A ; British Prisoners in Korea, 14282 A.)**

B. SAN MARINO. — General Elections.

General elections held on Aug. 14 in the Republic of San Marino resulted in the return to power of the Communist and Left-wing Socialist alliance, which has been in office since 1943 and which improved its position as compared with the last (1951) general elections. Results were as follows, showing comparison with 1951 :

	1955		1951	
	Seats	Votes	Seats	Votes
Communists	19	1,656	18	1,306
Left-wing Socialists	16	1,338	13	991
Christian Democrats	23	2,006	26	1,922
Democratic Socialists	2	245	—	—
Others	—	—	3	248

San Marino, as before the elections, remained the only country west of the "Iron Curtain" with a Communist and Left-wing Socialist government. As compared with the last elections, the Left-wing coalition increased its majority in the Republic's 60-member Parliament (the "Grand and General Council") and also polled more votes than in 1951. The electorate (exclusively males, women not possessing the franchise) numbered 7,811, of whom more than half were living and working abroad. To enable them to cast their votes, the Christian Democrats organized an "air-lift" for Sammarinese living in the U.S.A. and Canada, whilst the Communists and Left-wing Socialists organized a similar air service for Sammarinese living in Italy, France, and Belgium.

The Left-wing victory was attributed by the Christian Democrats to resentment against alleged Italian interference in the affairs of the Republic; in particular, against a police blockade which had been organized by Signor Scelba (the former Italian Prime Minister) to prevent Italians from frequenting a casino which had been established in San Marino. Allegations were also made by the Christian Democrats that the Sammarinese Government had falsified electoral registers and had allowed Italians with forged identity documents to vote.

The Foreign Secretary of San Marino (Signor Giacomini) issued an official statement on Dec. 31, 1954, declaring that San Marino did not consider itself to be in a state of war with Germany. During the First World War the Republic of San Marino had declared war on the Central Powers, but as San Marino was not a signatory to the Treaty of Versailles the formal state of war had never been officially terminated.
(Giornale d'Italia, Rome - Corriere della Sera, Milan)
(Prev. rep. 9847 D.)

Note. San Marino, an independent republic since the fourth century, covers an area of 38 square miles on the slopes of Monte Titano, near Rimini. The population is 15,000, many of whom live and work abroad. Under statutes dating from the 13th century the Republic is ruled by a Council (Cabinet) of 12 members and a Grand and General Council (Parliament) of 60 members. Two regents (*Capitani Reggenti*) elected for six-month terms by the Grand and General Council serve as joint heads of State. (At present one is a Communist and one a Left-wing Socialist). The Republic has a small army of 200 men. The main sources of revenue are the tourist traffic, the issue of postage stamps, and an annual grant made by the Italian Government in return for an undertaking by San Marino not to print money, distil alcohol, or grow tobacco. Italian currency is the legal tender. (Ed. K.C.A.)

A. KENYA. — Decline in Mau Mau Influence and Activities. - Withdrawal of 2,500 British Troops. - Ending of Surrender Offer. - Confiscation of Terrorists' Land. - Mr. Blundell appointed Minister of Agriculture.

It was announced in Nairobi on Sept. 1 that two battalions of British troops and one battalion of African troops, totalling 2,500 British and 1,000 Africans, were to be withdrawn from Kenya within the following four months, leaving 5,000 British and 7,000 African troops still in the Colony. Although the announcement was generally interpreted as a sign of the growing success of the security forces in combating Mau Mau, the Commander-in-Chief (Major-General Lathbury) emphasized that the emergency was not over and that the fight against Mau Mau "is still in operation, calling for effort by one and all." He explained, however, that what was now required was not large numbers of troops in forest operations but small, highly trained patrols to seek out terrorists hiding in the forests. Further indications of the improvement in the situation had been given on July 28, when the last of the R.A.F. *Lincoln* bombers sent to Kenya to help in the fight against the terrorists left the Colony, and on Aug. 8, when it had been announced that the call-up of Europeans for military service would, with some modifications, revert to its normal peace-time basis.

Other developments in Kenya in recent months are described below.

Expiry of Surrender Offer. In accordance with Mr. Blundell's announcement of June 8 (see 14247 A) the surrender terms for the terrorists announced by the Governor (Sir Evelyn Baring) on Jan. 18 expired at midnight on July 10. Final figures published on Aug 10 showed that 979 terrorists had availed themselves of the terms of this latest surrender offer, which, with 857 surrenders under the terms of the "green branch" offer (see page 13453, second column), made a total of 1,836 since the beginning of the emergency. With the expiry of the surrender offer the Kenya Government announced on July 11 that it had confiscated the land of 324 Mau Mau leaders and organizers who had failed to respond to the offer, a subsequent announcement on July 18 stated that the land of 3,097 "rank-and-file" terrorists had also been confiscated.

Mau Mau Casualties. It was announced on Sept 2 that since the beginning of the Kenya emergency 9,514 Mau Mau terrorists had been killed, 1,907 had been captured, and 1,899 had surrendered In the present year (up to Aug. 27) terrorist losses had been 1,857 killed, 774 captured, and 1,154 surrendered. An Army spokesman declared that the gangs were now so disorganized that the Army and police knew more about Mau Mau organization and the disposition of its members than its own leaders The effect of large-scale operations in the forests earlier in the year was now becoming apparent, but even more important was the "astounding change" among the Kikuyu people. Closer administration of tribal reserves and other areas in the past three months had resulted in a complete change of attitude and had enormously increased co-operation between the Kikuyu and the security forces. The gangs were finding it almost impossible to carry out oath-taking ceremonies, and consequently were unable to replace their losses; moreover, their difficulties had been increased by an effective denial of food supplies in European settlements and tribal reserves.

Modifications of Capital Offences. A "rationalization" of the emergency regulations dealing with major crimes was announced by the Government on July 20. Among the principal modifications was a provision that unlawful possession of ammunition or explosives would in future be a capital offence only if circumstances raised the reasonable presumption of an intent to use them in a way prejudicial to the public safety or to the maintenance of law and order Possession of firearms in any circumstances still carried the death penalty, as did possession of ammunition by an unarmed member of an armed gang. Two regulations which had proved of little practical value were revoked, but a new regulation was introduced providing for life imprisonment for "middlemen" engaging in arms transactions, even though such men might not have actually handled the arms themselves.

Sentences on European Police Officers. Two European police inspectors—A. P. Fuller and O. D. Waters—were sentenced to 18 months' hard labour on Sept. 1 on charges of causing grievous bodily harm to an African prisoner who had died in custody. They both pleaded "guilty" after the original charge of murder had been dismissed. Chief Inspector G P. Coppen was fined £25, with the alternative of two months' hard labour, on a charge of causing actual bodily harm to the same African, and a former District Officer, Mr. W. R. Bosch, was fined £10, with the alternative of one month's hard labour, on the same charge. They had both pleaded "guilty" after the original charge of causing grievous bodily harm had been withdrawn.

Emergency Tax on Africans. It was announced in Nairobi on Aug. 31 that the Kenya Government proposed to extend until the end of 1956 the emergency legislation imposing a special additional tax on every adult male of the Kikuyu, Embu, and Meru tribes so as to obtain from them an individual contribution to the cost of the emergency, for which those tribes were responsible. It was proposed to increase the tax from 22s to 25s. a year, which was estimated to raise the yield by £35,000.

It was announced in Nairobi on July 1 that Mr. Michael Blundell, Minister without portfolio and a member of the War Council, would take over the portfolio of Agriculture from Major Cavendish-Bentinck, who was to become Speaker of the Legislative Council in succession to Sir William Horne, retiring because of ill-health. It was stated that Mr. Blundell would be succeeded as Minister without portfolio and as member of the War Council by Mr. L. R. Maconochie-Welwood, the Minister of Forest Development, Game, and Fisheries, and that another European-nominated member would be appointed to take over Mr. Maconochie-Welwood's present Ministry.

(Prev. rep. Kenya, 14247 A.)

B. FRANCE. — Trial of Admiral Auphan for Collaborationist Activities.

The trial of Admiral Paul-Galbriel Auphan, formerly Secretary of State for the Navy in the Vichy Government, on charges of having had intelligence with the enemy during the war, and of having signed orders against the interests of France, opened before the High Court of Justice in Paris on July 19. The main charges against him related to the events of November 1942, in which connexion the prosecution alleged that he was responsible for the failure of the French fleet to leave Toulon and for the resistance offered by the French forces in North Africa to the Allied landings. Admiral Auphan, who was sentenced *in absentia* to hard labour for life in 1946, had surrendered to the police in January last, after having lived in hiding in France since the liberation.

Giving evidence in his own defence, Admiral Auphan stated that on June 19, 1940, he and Admiral Darlan had given an assurance to the British naval authorities that if France surrendered the fleet would not be handed over to the Germans He claimed that he would have given orders for the fleet to sail to England if the French Government had agreed. When asked in 1942 to join the Vichy Government he had accepted, on Admiral Darlan's advice, "in order to save the Navy." On Nov. 11, 1942 (he continued) Admiral Darlan had sent an order to Admiral de Laborde, the naval commander at Toulon, to sail for Algiers, but the latter refused. He himself had tried to persuade Marshal Pétain to issue such an order, but this plan was frustrated by Laval, and he had consequently resigned on Nov. 17. Admiral Auphan admitted that he had sent telegrams ordering the French forces in North Africa to resist the Allies and not to oppose the entry of German troops, but claimed that as soon as he had realized the importance of the Allied landings his only thought had been to end the fighting

Evidence for the defence was given by General Weygand and by General Revers, Admiral Darlan's Chief of Staff in North Africa. General Weygand stated that Admiral Auphan and himself had urged Marshal Pétain to order that resistance to the Allies in North Africa should cease

The Court found Admiral Auphan "guilty" and sentenced him on July 20 to five years' imprisonment and five years' "national degradation" (loss of civil rights). Both sentences were suspended, however, in view of Admiral Auphan's "services to the French resistance."—(Le Monde, Paris)

(Prev. rep. 14298 A.)

C. UNITED KINGDOM. — Ministry of Education Report for 1954.

The report of the Ministry of Education for 1954 was published on July 28, 1955, and is summarized below.

The report stated that during 1954 education had "reached a turning point" as it had been possible, for the first time since the war, not only to keep pace with the demand for more schools and teachers, but even to contemplate effecting improvements in the educational service. The total number of children in maintained primary and secondary schools increased during the year by 120,000 (or by 50,000 less than in 1953), but the number in infant schools began to decline; the report explained that this decreased entry would be progressive and that the total number of children receiving education was expected to begin to decline after 1958. On the other hand, the number of teachers had risen by over 7,000, and the entry of 11,768 students into training colleges in 1954 was the highest on record The supply of graduate teachers of mathematics and science continued, however, to cause grave concern.

The total numbers of schools and schoolchildren in England and Wales were given as 31,244 and 6,795,262 respectively. The report stated that in the 12 months to Oct. 1, 1954, over 210,000 new school places (including 75,000 secondary school places) were brought into use, with a further 200,000 secondary school places in preparation. The total value of new educational building started during 1954 was £59,382,000, compared with about £52,500,000 started in 1953.

The numbers of full-time and part-time students in technical colleges rose respectively during 1954 by 3,000 to 59,000 and by 19,000 to 372,000. The number of evening students increased by 31,000 to 1,860,000, and that of students in adult education classes by 5,000 to 142,000.—(Times - Daily Telegraph)

(Prev. rep. 13634 A.)

A. GREECE - TURKEY. — Anti-Greek Riots in Turkish Cities. - Greek Protests to Turkey. - Martial Law in Istanbul, Izmir, and Ankara.

Serious anti-Greek riots occurred on Sept. 6 in Istanbul and Izmir (Smyrna), and to a lesser degree in Ankara, following incidents in Salonika on the previous day in which the windows of the Turkish Consulate in Salonika, and also of a house next to the Consulate in which Kemal Ataturk was born, were smashed by the explosion of a stick of dynamite. Five persons were detained in connexion with the Salonika incident, which caused no casualties and only minor damage.

For several hours during the evening of Sept. 6 mobs of Turkish youths roamed the streets of Istanbul smashing and looting Greek-owned shops and houses and setting fire to Greek property, including a number of Greek Orthodox churches. Many Greek shopkeepers and householders, with their families, were driven into the streets or were forced to hoist the Turkish flag above their premises, whilst attacks were also made on foreign-owned property and on the property of Armenian and Jewish citizens. In Izmir (headquarters of the NATO South-East European Command) mobs attacked houses occupied by Greek officers and wrecked a Greek pavilion at a trade fair, whilst in Ankara tear-gas was used to disperse several thousand demonstrators who attempted to march on the Greek Embassy.

In Istanbul—the streets of which were described by foreign correspondents as resembling a "battlefield"—the police made little or no attempt to deal with the rioters, and order was only restored towards midnight, when an infantry division and an armoured brigade entered the city. The Turkish military authorities placed Istanbul under a state of siege, imposed a curfew, and stationed troops with fixed bayonets in front of Greek-owned premises to prevent further looting. Hundreds of Greek-owned shops and other premises were sacked during the riots, particularly in the suburb of Pera, and over 20 Greek Orthodox churches were destroyed either wholly or in part. There were, however, no reports of attacks on individual Greeks.

Greek residents in Istanbul number about 100,000, of whom some 12,000 are Greek nationals and the remainder Turkish. Since the exchange of populations in 1922 no substantial number of Greeks live elsewhere in Turkey, except in the islands of Imbros and Tenedos.

The Turkish Government issued a statement on Sept. 7 attributing responsibility for the riots to Communist agitators, and describing the disturbances as a "Communist plot." The statement expressed deep regret for the damage done to Greek property, and promised speedy compensation to those who had suffered losses. Ankara Radio announced on Sept. 9 that 2,214 persons suspected of "acts of provocation" had been arrested in Istanbul and Izmir. The Turkish Grand National Assembly met in emergency session on Sept. 13 and decided that the state of martial law in Istanbul, Izmir, and Ankara should be extended for six months. [Martial law in the three cities had been imposed by President Bayar on Sept. 7, immediately after the riots.] The Prime Minister (M. Adnan Menderes), in a statement to the Assembly, expressed his deepest regret for the widespread damage done to Greek property, and admitted that the Istanbul police had been slow to take action against the rioters.

The Greek Deputy Premier and acting Foreign Minister (M. Kanellopoulos) made a strong verbal protest to the Turkish Chargé d'Affaires on Sept. 7 at the anti-Greek riots, and, in particular, at the failure of the Turkish authorities to prevent the mobs from ransacking Greek houses, shops, and churches. He also informed the Chargé d'Affaires that Greece would ask for a special meeting of the North Atlantic Council to investigate reports of the ill-treatment of Greek officers attached to NATO headquarters in Izmir. A spokesman of the Greek Foreign Ministry stated on the same day that the Greek Church in Izmir had been looted by a Turkish mob, which had also looted and set fire to the homes of Greek officers, and that the Turkish authorities in that city had shown "complete apathy" in dealing with the outbreak of mob violence. A written protest, couched in strongly-worded terms, was despatched by Greece to the Turkish Government on Sept. 9 because no reply had been received to the verbal *démarche* made two days earlier. On Sept. 12, however, the Turkish Chargé d'Affaires called upon M. Stephanopoulos (who had meanwhile returned to Athens from the London tripartite conference on Cyprus—see 14413 A) and expressed his Government's deep regret at the anti-Greek riots, together with assurances that the victims would be compensated and that measures had been taken to avert similar outbreaks of violence in future.

Strong anti-Turkish feeling was aroused in Greece by the riots in Istanbul and Izmir. Greek air services to Istanbul were suspended until further notice, Greek ships were instructed not to call at Turkish ports for the time being, and the Greek Government announced that it would not participate in joint Greco-Turkish NATO exercises which it had been planned to hold in the near future. M. Kanellopoulos had informed the Turkish Chargé d'Affaires on Sept. 7 that Greece would not participate in a meeting of the International Bank and Monetary Fund to be held in Istanbul during September.

The permanent representatives on the North Atlantic Council met in special session on Sept. 8 to consider the situation caused by the events of the past few days in Greece and Turkey. No communiqué was issued, but it was indicated that the Turkish representative had given assurances that his Government would take all measures to avoid any repetition of the disorders. Supreme Allied Headquarters reported that a message had been received from Izmir stating that the situation at NATO headquarters there was normal.

(Times - Daily Telegraph - Le Monde, Paris)

B. UNITED STATES. — Presidential Libraries.

A Bill was signed by President Eisenhower on Aug. 12 authorizing the Federal Government to accept and operate Presidential libraries built with private funds and donated to the Government. It had been approved by the House of Representatives on July 5, and subsequently by the Senate. The General Services Administration (the Government agency responsible for the national archives) said that the new law was expected to lead to "the establishment of important collections of historic papers throughout the country where they can be easily used by scholars and will be relatively safe from nuclear destruction."

The first three libraries to come under the new system will be (1) the Franklin D. Roosevelt Library at Hyde Park, New York, which has been taken over by the Government under a special Act of Congress, (2) the Truman Library, which is to be built at Independence, Missouri, and donated to the nation (see below); and (3) the Dwight D. Eisenhower Library, which will be built at the President's family home at Abilene, Kansas. All these libraries contain, or will contain, papers, documents, etc., accumulated during the terms of office of the respective Presidents and relating to the events of those periods.

A campaign to raise $1,500,000 for a public library to house the papers of President Truman had been launched in December, 1952, by a foundation (Harry S Truman Library Inc.) presided over by Judge Ernest Lupton, of the Missouri Supreme Court. Among many eminent scholars who were appointed trustees in an advisory capacity were Dr. Arthur M. Schlesinger jr., Associate Professor of History at Harvard University, and Professor Henry Steele Commager, Professor of History at Columbia University. In view of the importance of the papers accumulated by President Truman during the critical post-war years, the U.S. Administration agreed to provide the services of trained archivists to sort and collate the material. It was announced in July 1954 that the library would be built on a 14-acre site at Independence (Mr. Truman's home town) and donated to the nation on completion.

Apart from Presidents Franklin D. Roosevelt, Truman, and Eisenhower, only four other Presidents—all in the present century—had provided for the preservation of their papers for future historical use. Theodore Roosevelt, William Howard Taft, and Calvin Coolidge turned substantial collections of their papers over to the Government, whilst Herbert Hoover established the "Hoover Library on War, Revolution and Peace" at Stanford University, California.—(New York Times)

(Prev. rep. Roosevelt Library, 4765 B.)

C. BRAZIL. — Immigration in 1954.

Figures recently published by the Brazilian National Institute of Immigration and Colonization showed that 78,248 immigrants arrived in Brazil in 1954. Of the total, 42 per cent came from Portugal, 19 p.c. from Italy, 16 p.c. from Spain, and 4 p.c. from Japan; other nationalities—none of which individually reached 4 per cent—made up the remaining 19 per cent.

(Brazilian Government Trade Bureau, New York) **(13542 D.)**

D. CANADA. — New Chief of General Staff.

Lieutenant-General H. D. Graham was appointed Chief of the Canadian General Staff on Sept. 1 in succession to Lieut.-General G. G. Simonds, whose retirement had been announced a few days earlier. General Graham, a barrister in the early part of his life, commanded a Canadian brigade in Italy and had been Vice-Chief of Staff since 1948.—(Montreal Star)

SEPTEMBER 17—24, 1955

A. SOVIET UNION - WESTERN GERMANY. — Adenauer-Bulganin Discussions in Moscow. - Agreement on Establishment of Diplomatic Relations. - Soviet Undertaking to return 10,000 German Prisoners.

Discussions between the Chancellor of the German Federal Republic, Dr. Adenauer, and the Prime Minister of the U.S.S.R., Marshal Bulganin, were held in Moscow from Sept. 9-13 and resulted in an agreement for the establishment of diplomatic relations between the two countries. Marshal Bulganin also gave an undertaking that the Soviet Government would return to Germany nearly 10,000 prisoners who, he stated, had committed war crimes on Russian territory during the Second World War.

In addition to Dr. Adenauer, the Federal German delegation included Dr von Brentano (Foreign Minister), Professor Hallstein (State Secretary in the Foreign Ministry), Herr Blankenhorn (Federal German representative on the North Atlantic Council), Herr Arnold (chairman of the Foreign Affairs Committee of the *Bundesrat*, and Premier of North Rhine-Westphalia), Herr Kiesinger (chairman of the Foreign Affairs Committee of the *Bundestag*), Professor Carlo Schmid (deputy chairman of the same committee), and a number of ministerial officials

The Soviet delegation, in addition to Marshal Bulganin, included M. Khrushchov (First Secretary of the Communist Party of the U.S.S.R.), M. Molotov (Foreign Minister), M. Pervukhin (a Deputy Premier), M. Shapalin (Minister of Foreign Trade), and M. Semeonov (a deputy Foreign Minister)

The talks were held at the Alexei Tolstoy House in Moscow (formerly known as the Spiridonovka Palace), the seat of the Soviet Foreign Ministry.

The first day's discussions (Sept. 9) were devoted to statements by Marshal Bulganin and Dr. Adenauer, summaries of which are given below.

Marshal Bulganin said that the people of the Soviet Union, despite the sufferings inflicted upon them during the war, bore no ill-will towards the German people. After recalling that the Soviet Government had proposed a conference to discuss diplomatic, trade, and cultural relations between the U.S.S.R. and the German Federal Republic, he continued:

"The Soviet Government has agreed to an exchange of views on the question of establishing German unity. In doing this we must take note of those serious obstacles which have arisen as a result of the ratification of the Paris Agreements, under which the German Federal Republic has undertaken certain military alignments and the remilitarization of Western Germany is being carried out. The Soviet Government has always recognized that the solution of the problem of reuniting Germany must be first and foremost the affair of the Germans themselves. In this respect account should be taken of the actual conditions which have arisen with the existence of the German Federal Republic and the German Democratic Republic . . The Soviet Government has supported, and continues unswervingly to support, the establishment of a united Germany as a peaceful and democratic state. It expresses the hope that the establishment of diplomatic relations between the U.S.S.R. and the German Federal Republic will help to solve unsettled questions in which both sides are interested. It proposes the establishment of such diplomatic relations and an agreement on the setting-up of a Soviet Embassy in Bonn and a Federal German Embassy in Moscow."

An agreement for the establishment of diplomatic relations, Marshal Bulganin added, would "greatly contribute to the development of trade between our two countries on the basis of appropriate long-term agreements."

Dr. Adenauer urged that the talks should be held in "an atmosphere of unreserved frankness" and that the delegates should make every effort "to get at the heart of matters". He did not think that normal relations could be achieved only by outlawing war, creating security systems, and establishing "so to speak, in a mechanical way, diplomatic, economic, and cultural relations," but by examining the causes which rendered the present relationship between the two countries abnormal, and by making all possible efforts to remove those causes.

Raising the question of German prisoners of war still in Soviet hands, "a question by which hardly any German family remains unaffected," Dr. Adenauer emphasized that he was raising the issue solely from humane considerations. He declared in this connexion: "The thought is intolerable that, more than ten years after the end of hostilities, men who in one way or another were drawn into the whirlpool of warlike events should be kept from their homes, families, and normal peaceful occupations. Do not think I want to be provocative if I say that the establishment of normal relations between our States is inconceivable as long as this question is unresolved. It is not a precondition that I am setting—I am speaking of normalization itself. Let us end a situation that is a daily source of remembrance of a sorrowful and dividing past."

Turning to the question of German unification, the Chancellor said that both delegations were agreed that the division of Germany created an intolerable situation, that German unity must be restored, and that this was the responsibility of the four great Powers. He added: "Here also I must repeat that I propose no conditions but speak of normalization itself. The division of Germany is abnormal, it is contrary to Divine and human right and against nature. I know that I am speaking for all Germans, not only for the population of the Federal Republic, in requesting you to dedicate all your energies to a rapid solution of this problem. . . . There can be no real security in Europe without the restoration of German unity. We must eliminate this dangerous potential crisis in which passions can so easily be inflamed." The four great Powers, Dr. Adenauer continued, would be discussing this question at the forthcoming Geneva meeting of Foreign Ministers in October, and he had no intention of confusing the Geneva discussions by bilateral talks independent of the four-Power negotiations. "But I am in duty bound," he added, "to avail myself of the opportunity offered by this meeting to represent to you urgently the full seriousness of this question, and to discuss it with you so as to facilitate your task at Geneva."

Referring to the objection that a reunified Germany might be regarded as a source of danger to the Soviet Union, Dr. Adenauer pointed out that it must be left to the free decision of an all-German Government and an all-German Parliament whether Germany should join any alliance. He added: "If the Soviet Union, as a result of the reunification of Germany, should anticipate an impairment of her security, we are perfectly willing to collaborate in a security system which will do away with such preoccupations. It would appear to be right to consider, simultaneously with the deliberations on the re-establishment of German unity, a security system for Europe."

Dr. Adenauer emphasized that neither the NATO nor the Western European Union were instruments of aggression; that peace was the primary objective of the entire German people; and that all Germans were fully aware, from their own experiences, of the terrible destruction which modern warfare entailed. They were also aware that atomic warfare "gives mankind the possibility of complete destruction, of which we can only think with a shudder." The Chancellor added: "You will find no-one in Germany, neither responsible politicians nor among the people, who even toys with the idea that the great political problems of today can be solved by a war. New means to overcome conflicts and differences must be found—means based on international solidarity and international co-operation."

In conclusion, Dr. Adenauer said that his Government shared the Soviet view that the establishment of diplomatic, economic and cultural relations would be of advantage to the two countries.

The discussions on Sept. 10 centred on the question of Germans still held in the Soviet Union. Marshal Bulganin declared in this connexion that no German prisoners of war remained in Soviet territory, but that 9,626 "convicted war criminals from the former Hitlerite Army" were serving sentences for crimes committed in the U.S.S.R. during the war. He emphasized that if the question of these men was to be examined, it was essential that the German Democratic Republic (Eastern Germany) should be represented in the discussions equally with the Federal Republic. Details of the speeches made on this date were released by the Soviet Press chief, M. Ilyichev.

Marshal Bulganin, after dwelling on the sufferings caused by the Nazis during the war, said that all German prisoners of war in the U.S.S.R. had been repatriated, and that the only Germans still in Soviet hands were 9,626 war criminals who were serving sentences for crimes committed against Soviet civilians during the war. After describing some of these crimes, he said that the Soviet people could not understand why attempts were being made in Western Germany to represent these war criminals as "innocent martyrs". If this question was to be examined, representatives of both parts of Germany would have to participate in the discussions. "But," Marshal Bulganin added, "since it seems that the German Federal Republic does not consider it desirable to discuss this matter with representatives of the German Democratic Republic, it is clear that discussion of this question is inappropriate during these negotiations."

Dr. Adenauer said that no-one would deny the enormity of the crimes committed by the Nazis in the Soviet Union during the war, nor the sufferings and privations inflicted upon the Soviet people. The overwhelming majority of Germans felt disgust at the crimes committed by the *Wehrmacht* in Russia, but it should also be borne in mind that Soviet troops had "committed certain acts" on German soil, and that "terrible things" had happened during the Soviet advance into Germany.

M. Khrushchov intervened at this point to protest at Dr. Adenauer's "offensive" allegation that Soviet troops had committed acts of brutality in Germany, which he denied categorically. Declaring that the Soviet Army had performed a "sacred duty" in carrying the war into Germany after driving the German armies from the U.S.S.R., he added: "We fully understand the sufferings and sorrows of millions of German people who have heard nothing of the fate of their relatives. But who is to blame for the fact that these people have not returned to their families? Many Germans were killed in the war, but even more Soviet citizens perished. Who is to blame? We are not guilty. It was not we who crossed the border. It was not we who started the war." M. Khrushchov added, however, that bitterness and revenge were "bad counsellors" and that "we must look to the future, which demands the establishment of friendly and normal relations between the German and Soviet people." As regards the reunification of Germany, he said: "You [Dr. Adenauer] must understand our position. We honestly and repeatedly warned you that the Paris Agreements and the entry of the German Federal Republic into NATO would block a solution of this problem in the near future."

M. Molotov said that the German people had not been able to overthrow Hitlerism by themselves, and owed Hitler's downfall to the Soviet Union's prosecution of the war.

At a further session on the same day, Dr. Adenauer made an explanatory statement on his reference to "certain acts" committed by the Soviet forces in Germany. According to Moscow Radio, the Federal Chancellor spoke as follows.

"M. Khrushchov and M. Molotov have said that I stated that the Soviet Army, after arriving in Germany, committed crimes. I state categorically—I have checked it from notes taken by the Secretary of State, Dr. Hallstein—that I did not use this word deliberately and intentionally. I said that during the entry of the [Soviet] troops terrible things happened. It would be proper not to delve more deeply into these matters."

Dr. Adenauer continued: "M. Molotov said that the Germans were incapable of ridding themselves of Hitlerism. Do not take offence at what I am going to say now. It does not concern the Soviet Union alone, but a number of other countries also. Why, after 1933, did the Great Powers make it possible for Hitler to grow in strength? That is the crucial question. When I think of the honours accorded to Hitler by the Great Powers—for instance, at the Berlin Olympics—I ask you to understand that I really cannot control my feelings. I will never forget how Hitler, with impunity, got away with every violation of international treaties. This turned Hitler into a hero in the eyes of certain stupid Germans, while others were reduced to despair. They must have seen, as I saw from 1933 onwards, how this man was allowed to grow to such dimensions. We—I mean the Federal Government and our Parliament—are the unfortunate heirs to all that. Since Germany suffered much from the war, we must try to rebuild Germany. We must try once more to win the confidence of foreign Powers, as well as your confidence. I know it is a difficult task, but it must be solved."

As regards the NATO, Dr. Adenauer was quoted as saying: "I am convinced that, providing the Great Powers conduct negotiations in the future in a sober manner, everything that has been achieved in NATO can—indeed must—become an instrument of a European security system. I think that this should be the aim of a comprehensive and soberly-pursued policy."

Appealing for an on-the-spot survey of the problem of prisoners of war, Dr. Adenauer said: "We think that we know quite a few cases where Germans taken as prisoners of war were sentenced for crimes committed after the cessation of hostilities. We wish for nothing more than that you should study this question together with us. Do not let us return home with a statement that the Soviet Union altogether refuses to discuss this question with us."

Referring to the Soviet insistence on East German participation in the P.O.W. question, the Chancellor added: "As soon as we are convinced that we are meeting the representatives recognized by the population of the Soviet zone, we shall sit down with them at the same table. . . . We hold that the Government of the German Democratic Republic cannot claim to represent the 17 or 18 million Germans living in the Soviet Zone. . . ."

After further discussions on Sept. 12-13 (no meetings were held on Sept. 11, a Sunday) a communiqué was issued in the evening of Sept. 13 announcing that agreement had been reached on the establishment of diplomatic relations between the Soviet Union and the German Federal Republic, and that letters to this effect had been exchanged between Dr. Adenauer and Marshal Bulganin.

The communiqué said that the talks had taken place "in an atmosphere of mutual understanding" and that there had been "a broad and frank exchange of views on the question of the mutual relations between the U.S.S.R. and the German Federal Republic." It continued: "Agreement was reached . . . for the establishment of diplomatic relations between the two countries, and, to this end, for the setting-up of Embassies in Bonn and Moscow, and for the exchange of Ambassadors. Both delegations agreed that the establishment of diplomatic relations will contribute to the development of mutual understanding and co-operation between the Soviet Union and the German Federal Republic in the interests of peace and security in Europe. The parties start from the assumption that the establishment and development of normal relations between the Soviet Union and the German Federal Republic will further the settlement of pending problems affecting the whole of Germany, and must thus help the solution of the principal national problem of the German people—the re-establishment of a unified, democratic German State. In confirmation of the agreement reached, the Chairman of the Council of Ministers of the U.S.S.R. and the Chancellor of the German Federal Republic have exchanged letters, the text of which is annexed. The parties also agreed that negotiations between the German Federal Republic and the Soviet Union on the development of trade should be opened in the near future."

The text of the letters exchanged between Dr. Adenauer and Marshal Bulganin was released and at the same time. In identical terms, they recapitulated, in effect, the wording of the communiqué, and stated that the agreement on the establishment of diplomatic relations would take effect after ratification by the Presidium of the Supreme Soviet and by the Federal German *Bundestag*.

On the same day (Sept. 13) Moscow Radio broadcast the text of statements made by Marshal Bulganin and M. Molotov at the final session of the conference. Marshal Bulganin's statement related to Soviet displaced persons in Western Germany, whilst that of M. Molotov related to the distribution of anti-Communist literature in the U.S.S.R. and Eastern European countries by balloons released in Western Germany, allegedly by U.S. organizations.

Marshal Bulganin's statement was worded as follows: "Hundreds of thousands of peaceful Soviet citizens were forcibly deported to Germany during the war by the Hitlerite Army from the territories of the Soviet Union it temporarily occupied. Many perished in compulsory labour camps in Germany. After the defeat of the Hitlerite Army, the majority of the captured Soviet citizens returned home. But a not inconsiderable number were retained, mainly in Western Germany.

"According to existing information there remain on the territory of the German Federal Republic over 100,000 such Soviet citizens, in many cases described as being without nationality. The majority of these unhappy people, separated by force from their homeland and families, have no permanent occupation, residence, or means of subsistence. They suffer from serious privations and destitution. They remain in a foreign land as dependent men without rights. Many cases are known to us of displaced Soviet citizens who do not accept their lot being gaoled on the territory of the German Federal Republic.

"Certain organizations hostile to the Soviet Union, supported by the relevant authorities, are waging spiteful propaganda and impeding the repatriation of these persons, frightening and terrorizing those who wish to return home. At the same time inadmissible attempts to make use of these persons for politically criminal purposes are continuing. We consider that the position which has arisen in the German Federal Republic in connexion with displaced Soviet citizens is abnormal and is opposed to the principles of humanity and of freedom of the individual.

"The Soviet Government considers it a duty to take up the defence of these Soviet citizens, who in certain cases have misbehaved against their country. We hope that they will reform, and we will not call them to account severely for offences committed by them. In drawing attention to this matter, we hope that the Government of the German Federal Republic will take the necessary measures and afford its co-operation for the return home of displaced Soviet citizens."

M. Molotov's statement was worded: "According to reports by Soviet airmen flying both on internal and international routes, there are uncontrolled flights of large balloons with loads attached to them. The balloons are about eight metres in diameter and 16 metres high. Investigations of balloons picked up on the territory of the Soviet Union show that the weight of the loads attached reach up to 300 kilograms. It is known that such balloons are released from Western Germany with the aim of spreading in the Soviet Union and in a number of other European countries leaflets and propaganda literature hostile to those States.

"According to the findings of competent Soviet aviation experts, such balloons are dangerous to air transport. Flying at different heights and in various directions, they endanger the lives of passengers and aircrews on both internal and international lines. According to information to hand, these balloons are released from Western Germany by American organizations. This was openly stated on Aug. 16 by the American radio station in Munich, which said that a large number of such balloons had been released on Aug. 15 by the American 'Crusade for Freedom' organization.

"In drawing the attention of the Federal Chancellor to this matter, the Soviet Government expects that the necessary measures will be taken in the German Federal Republic for the cessation of these activities and for the elimination of the danger created by the balloons to aircraft flying on the internal lines of the Soviet Union and on international lines over the territories of the U.S.S.R. and a number of European States."

Before leaving Moscow for Bonn on Sept. 14, Dr. Adenauer gave a press conference at which he announced that he had sent a second letter to Marshal Bulganin stressing (1) that the establishment of diplomatic relations had in no way changed the Federal Government's opinion that a final settlement of Germany's frontiers must await the conclusion of a peace treaty; and (2) that the Federal Government had not changed its position that the German Federal Republic was the only legitimate government of all Germany. He also announced that both Marshal Bulganin and M. Khrushchov had given him assurances that the repatriation of the 9,626 Germans still held in the Soviet Union would begin immediately.

The relevant paragraphs of the Chancellor's second letter to Marshal Bulganin were as follows:

"The establishment of diplomatic relations between the German Federal Republic and the U.S.S.R. constitutes no recognition of the existing territorial situation on both sides. The final definition of the frontiers of Germany remains reserved to the peace treaty.

"The establishment of diplomatic relations with the Soviet Union implies no change in the juridical position of the Federal Government in relation to its right to represent the German nation in international affairs, and in regard to the political conditions in those German regions which lie at present outside its effective sphere of sovereignty."

Dr. Adenauer said at his press conference that the establishment of diplomatic relations would be a stabilizing influence for peace in Europe, and would end a state of affairs which had been a marked factor of insecurity in the European situation and which could not have continued indefinitely. He added: "I want to declare very emphatically that no secret agreements or understandings of any kind have been arrived at between the Soviet Union and ourselves.

Nor was any suggestion made to us during the negotiations that we should abandon our treaty obligations under the NATO and the Western European Union "

A " very important and welcome result " of the talks had been the assurances of Marshal Bulganin and M. Khrushchov that the 9,626 Germans held in the U S S R.—" as they put it, war criminals "—would be immediately repatriated. Some of these men would be granted an amnesty by the Soviet Government and returned to Germany in freedom, whilst others, insofar as the Soviet Government believed them to have been guilty of grave crimes, would be handed over to the German authorities so that the Federal Government could deal with them under German law " I believe," Dr Adenauer said, " that much suffering, misery, and pain will thereby be alleviated, not only for the 10,000 persons here in the Soviet Union but also for their numerous dependents at home. Marshal Bulganin has authorized me to tell you that already, before we arrive in Bonn, this operation [the repatriation of the P.O.W.s] will be set in motion."

The Chancellor went on to say that the German delegation believed that a fairly large number of Germans—over and above the 10 000 to be repatriated—still remained in the Soviet Union. Marshal Bulganin and M Khrushchov had said that they knew nothing of such persons, but had added, however · " If you [the Chancellor] are in a position to give lists of them, we promise you that we will investigate the matter and that we will deal with these Germans in the same way as with the prisoners of war " Dr Adenauer added · " We shall now have to examine the lists again They are prepared from letters which the persons in question have sent to relatives in the Federal Republic, giving their camp, number, and other details. After the declarations which we have received, I do not doubt that the Soviet Government will fulfil this solemnly-given promise."

As regards German reunification, Dr. Adenauer said : " It was declared from the Soviet side that the four Powers—that is, including Russia—had the obligation to bring about the restoration of German unity. The three Western Powers take the same view." After stressing that nothing had been done to anticipate the forthcoming four-Power talks in Geneva, he expressed the hope that the Geneva conference, and others that might follow it, would consider and decide upon the restoration of German unity " with all speed."

The establishment of diplomatic relations between the German Federal Republic and the Soviet Union was unanimously approved by the Federal German Cabinet on Sept. 19, after Dr. Adenauer's return from Moscow.

Dr. Adenauer gave another press conference in Bonn on Sept 16 at which he reiterated his conviction that it would have been wrong to refuse to enter into diplomatic relations with the Soviet Union. The Soviet leaders, he said, had shown themselves extraordinarily sensitive on questions of prestige, not for themselves but for their country, and would have regarded the rejection of diplomatic relations as an insult In view of the fact that the U S S.R. was " one of the most powerful States on this earth," covering one-sixth of the globe, he believed that the German delegation had done rightly in agreeing to diplomatic relations between the two countries.

Regarding the repatriation of prisoners of war, the Chancellor said that both Marshal Bulganin and M Khrushchov had given their word of honour that these men would be immediately returned to Germany. That had been " a great human success." " Throughout the entire negotiatons," he added, " and in the internal discussions in our delegation, the thought of the prisoners affected us continually —often oppressively What would have happened if we had ended the talks without an understanding, if none of the prisoners could have returned to their homeland and their relatives ? That was for us a very essential aspect of the entire negotiations "

After stressing that the Soviet Union, like the three Western Powers, had accepted the restoration of German unity as an obligation, Dr. Adenauer expressed his conviction that the Soviet leaders earnestly desired a period of peace He declared in this connexion : " They are concerned whether, while carrying the monstrous burden of armaments, they can master the great domestic tasks before them. They want a period in which they can spend less on armaments. They remain Communists , they believe they are right ; we cannot convince them, nor they us "

Dr. Adenauer repeated that the establishment of diplomatic relations between the Federal Republic and the U.S S.R. had in no way changed the Federal Republic's loyalty to its treaty obligations under the NATO and the W.E U. Moreover, the Soviet representatives had not asked that the Federal Republic should leave these organizations.

An official announcement was issued in Moscow on Sept. 15 declaring that the Soviet Government regarded Germany's present frontiers as final. It was worded as follows : " At a press conference in Moscow on Sept. 14, the Chancellor of the German Federal Republic made a statement on questions relating to the frontiers of Germany. The Soviet Government regards the German Federal Republic as a part of Germany. The other part of Germany is the German Democratic Republic. In connexion with the establishment of diplomatic relations between the Soviet Union and the German Federal Republic, the Soviet Government deems it necessary to state that the question of the frontiers of Germany was solved by the Potsdam Agreement and that the German Federal Republic is carrying out its jurisdiction on the territory under its sovereignty."

A. TUNISIA. — All-Tunisian Cabinet formed by M. Tahar Ben Ammar. - M. Seydoux appointed French High Commissioner in Tunisia.

The Tunisian Prime Minister, M. Tahar Ben Ammar, submitted the resignation of his Cabinet on Sept. 13 to the Bey, who invited him to form a new Government. In accordance with the terms of the recent Franco-Tunisian agreement, the French directors previously responsible for the Departments of Finance, Education, Public Works, and Posts were replaced by Tunisian Ministers, the new Administration thus becoming the first all-Tunisian Government since the establishment of the French protectorate in 1881. The membership of the new Cabinet was announced on Sept. 17 as follows :

*M. Tahar Ben Ammar (Independent)	Prime Minister.
*M. Mongi Slim (Néo-Destour) .	Interior.
M. Khadem Ben Achour (Independent)	Justice.
M. Mohammed Badra (Néo-Destour) .	Agriculture.
*M. Hedi Nouria (Néo-Destour) .	Finance.
*M. Mohammed Masmoudi(Néo-Destour)	National Economy.
M. Djellouli Fares (Néo-Destour) ..	Education.
*Dr. Sadok Mokkadem (Néo-Destour)..	Health.
M. Ezzedine El-Abassi (Independent)	Public Works.
M. Fathi Zouhir (Independent) ..	Social Affairs.
*M. Chadli Rhaim (Socialist)	Posts and Telegraphs.
M. Albert Bessis (Independent) ..	Town Planning and Reconstruction.

* Member of previous Government.

Biographical details of the members of M Tahar Ben Ammar's previous Government are given in 13713 A. Of the new Ministers, M Khadem Ben Achour is a magistrate ; M. Mohammed Badra became Minister of Commerce in M. Chenik's Cabinet in 1950, and on its dismissal in 1952 fled to Egypt, returning to Tunisia in May last , and M. Bessis is a leading member of the Tunisian Jewish community.

M. Roger Seydoux (47), Minister-delegate to the Resident-General, was appointed the first French High Commissioner in Tunisia on Sept. 13, whilst General Miquel, deputy commander of the French forces in Morocco, was appointed commander of all armed forces in Tunisia on the same day. General Boyer de la Tour, the former Resident-General, had previously left Tunis on Aug. 30 to take up the appointment of Resident-General in Morocco.

M. Salah Ben Youssef, the secretary-general of the Néo-Destour, who had been living in exile since 1952, returned to Tunis on Sept. 13. He was welcomed by Prince Chadli (the Bey's eldest son), M. Tahar Ben Ammar, M. Bourguiba (president of the Néo-Destour), and an enthusiastic crowd of several thousand people, and was subsequently received in audience by the Bey.—(Le Monde, Paris) **(Prev. rep. Cabinet, 13713 A ; Franco-Tunisian Agreement, 14408 C.)**

B. PAKISTAN. — Site for New Federal Capital.

It was announced in Karachi on Aug. 22 that the Government of Pakistan had decided to build a new Federal capital at Gadap, 20 miles north-east of Karachi. The decision was made on the basis of recommendations by a committee which had been appointed by the Government for the purpose.

It was pointed out that the site chosen for the new Federal capital was at a height of 471 feet above the Arabian Sea, and that the heat and humidity there was far less than in Karachi. A rising plain of some 50 square miles would enable the new capital to expand in the years to come, and, unlike Karachi, the area was well watered and could provide an abundant supply of vegetables and foodstuffs. In view of the present expansion of Karachi, the new capital would be easily linked with Karachi city and would be only half-an-hour's drive from it. A 570-ft. hill feature at Gadap would be reserved exclusively for the Houses of Parliament and other public buildings to be erected in due course. It was, however, pointed out that Karachi would remain the capital for many years to come, as Gadap was still only in the planning stage ; moreover, the economic importance of Karachi would remain undiminished as it was the only important seaport in West Pakistan.

The committee's report stated that since the distance between Karachi and the Gadap area was so small, the new Federal capital would " become a new Karachi, more or less like New Delhi as compared with Old Delhi."—(Dawn, Karachi)

C. BULGARIA - GREECE. — Frontier Agreement.

An agreement providing for the avoidance and settlement of frontier incidents between Bulgaria and Greece was signed on Aug. 16 by the joint border commission of representatives of the two countries.—(Bulgarian Legation, London) **(13387 E.)**

A. UNITED KINGDOM. — Coal Industry. - Rise in Coal Prices. - Protests by Industry. - House of Commons Debate on Fuel Situation. - Sharp Cut in Coal Exports. - Production Statistics. - Miners' Refusal to accept Foreign Labour. - N.C.B.-N.U.M. Inquiry into Coal Output.

The National Coal Board announced on July 8 that the inland prices of all grades of coal would be raised from July 18 by 18 per cent, or an average of 11s. 5d. per ton, the increase for house coal ranging from 7s. 11d. to 19s. 1d. per ton according to quality. The increases—the largest since nationalization—were expected to yield £53,000,000 by the end of 1955 and £118,000,000 in a full year.

The Board explained that the increases were "necessary to bring prospective expenditure and income into proper relation," and that when they had taken effect it was proposed, in consultation with consumers' organizations, to examine the price relationship between various classes of coal. Meanwhile, the price increases were not expected to overtake the increase in the accumulated deficit (which already stood at £17,000,000) before the end of 1955.

Mr. J. Latham, the Board's financial member, explained that the N.C.B.'s commitments had been affected by (*a*) the effect on the coal industry (and particularly on its wages bill) of the general rise in wages and prices; (*b*) the need to import large quantities of coal to satisfy home demand; (*c*) large expenditure on the rehabilitation of the industry, and on measures concerned with safety and health. Although the present increases had been criticized as "irresponsible" and "against the public interest," the Board felt that it would be wrong to continue selling coal at less than the cost of production.

Giving details of the Board's increased costs, Mr Latham said that measures required by recent safety legislation would cost about £17,000,000, whilst about £8,000,000 yearly would be needed to pay interest on capital invested in reconstruction schemes. Since nationalization, the Board had succeeded in increasing productivity and output by 14 per cent, but for any further big improvements it would be necessary to look to reconstruction and new sinkings. By the end of 1954, 74 of these major projects (each costing over £1,000,000) had been approved but only four had been completed, and it was quite unfair to suggest that the Board's reconstruction programme had failed until the 70 remaining projects had come into operation. "Substantial cuts in the capital investment programme," Mr. Latham went on, "would be the sure way to reduce output. It is unlikely that any alternative source of energy will make a material contribution to the country's problems in the near future, and it is generally accepted that for very many years coal will have to bear the major part of the burden."

In addition to the expenditure on physical reconstruction (Mr Latham continued) much money was being spent on research, machinery development, education and training, improved pit conditions and amenities, and social welfare. The new wage structure recently introduced would probably cost £13,000,000 a year, and it was hoped soon to introduce a new wage structure for piece-workers; there were also increases in the cost of materials and carriage. Another important reason for the price increases was the loss on coal imports. During 1955 the Board expected to have to import over 12,000,000 tons and to lose about £2 per ton on its sale—or about £24,000,000, equal, when spread over all coal supplied in the country, to 2s. 6d. per ton. On the other hand, proceeds from exports would fall by about £1,000,000 in 1955 owing to the small quantity exported. Finally, the loss of deep-mined output in 1955 through strikes, and the abnormal measures necessitated by the railway strike, would together cost the Board about £4,000,000.

In its statement the Board explained that for the main industrial groups the average increases per ton would work out as follows:

Gas works, 2s. 5d.; power stations, 9s. 3d.; railways, 12s 5d; N.C.B. coking plants, 12s; other coking plants, 11s. 8d; iron and steel, 11s. 6d., coastwise bunkers, 12s. 9d., trawlers' bunkers, 12s. 8d., all other industrial consumers, 10s. 11d., Northern Ireland (except house-coal), 10s. 9d. Increases for house-coals would be: Group 1, 19s. 1d.; Group 2, 16s 7d., Group 3, 14s 7d., Group 4, 12s. 9d; Group 5, 11s. 2d.; Group 6, 9s 9d., Group 7, 7s. 11d. These increases would be added to the present reduced summer prices; the winter price level would be restored on Nov 1 in the north and on Dec. 1 in the south. Prices of South Wales anthracite and dry steam coals would be increased by an average of 18s. 1d. per ton.

The announcement of the price increases was followed on the same day by strong protests from the Federation of British Industries, the National Union of Manufacturers, and the Association of British Chambers of Commerce, as well as from individual industries.

The F.B.I. estimated that the cost of the increases to those sectors of industry which were direct users of coal would be at least £22,000,000 annually, and probably considerably more. "This is not the whole story," the F.B.I. statement continued, "for coal is so basic a commodity that costs, even of those industries which do not use it directly, are bound to be affected when gas, electricity, and steel prices, as well as railway freights, rise in sympathy."

The National Union of Manufacturers also stressed that the increases would result in "another twist in the rising spiral of prices," which would be forced up "to the detriment of our competitive power abroad and at the risk of a further round of wage increases at home."

The Association of British Chambers of Commerce complained that the coal industry was not "contributing in anything like a full measure to the national output," and that there had been no appreciable improvement in production in spite of the "substantial improvement in miners' wages and conditions, ambitious development plans, and degree of modernization and mechanization already carried out." The Association called for: (*a*) strict relationship of miners' wages to output; (*b*) an impartial investigation into the capital development programme, (*c*) utilization of part of the Board's planned capital expenditure to encourage the use of oil in industry, and to accelerate the development of atomic energy, (*d*) cessation of coal exports (except for bunkers) "until the prior claims of British industry can be met substantially from home supplies", (*e*) reduction of coal imports to a minimum.

Statements issued on behalf of leading industries are summarized below:

Electricity Supply. As most coal used in generating stations was of poorer quality, the increased cost to the Central Electricity Authority would be smaller than for other industries, but if fully passed on to consumers would result in additions to bills of about 3s in the £.

Gas. Sir Harold Smith, chairman of the Gas Council, estimated that the increases would add about £17,750,000 a year to the gas industry's coal bill, and that all Area Boards would have to increase their gas and coke prices. He added that since the nationalization of the gas industry, coal prices had already risen by an average of 20s 8d per ton, or nearly £30,000,000 a year, whilst the present increases would bring up these figures to 33s. 8d per ton and £47,750,000 a year respectively.

Transport. The British Transport Commission estimated that the increases would add £8,700,000 a year to its costs (excluding those of London Transport) and would bring its annual bill for coal and coke to about £58,000,000.

Iron and Steel. The Iron and Steel Federation pointed out that as two tons of coal were required to make one ton of steel, the increases were equivalent to an increase of at least 23s per ton in steel production costs.

A further protest against the price increases was made by Sir Norman Kipping, Director-General of the F.B.I., in a letter sent on July 17 to Sir Hubert Houldsworth, chairman of the National Coal Board.

Describing the increases as "frankly staggering," Sir Norman declared that they would not only "hamper competitive ability in the heavy fuel and power-using industries" but would also involve manufacturers in substantial losses on existing contracts. After complaining that the Board's development schemes "do not appear to have justified themselves either in lower costs or in increased output," he called for "a closer scrutiny of the coal export programme to see where reductions can be made." "Although some part of the programme is no doubt politically essential," he continued, "the fact remains that each extra ton exported has to be replaced by imports costing £2 more"; pending a scrutiny, therefore, the F.B.I. did not agree that the Board should "collect £24,000,000 a year from home consumers to pay for imports." In conclusion, Sir Norman stressed that "what is basically at fault is the Board's failure to get more coal", pointed out that "an improvement in productivity of a mere 2 per cent would almost completely have avoided shortages over recent years and the heavy bill for imports"; and urged that "any proportion of the increases made in anticipation of future rises in costs should be deferred until they have become actually inevitable."

Sir Hubert Houldsworth, in reply, explained that in its development and reconstruction programme the Board was endeavouring in ten years to cover 40 years of normal reconstruction work and to provide "an 80 per cent new industry." Results, however, were necessarily slow to appear, and capital charges on these schemes and on others necessary to replace lost capacity must be recovered from coal consumers. He added that the increases in productivity over the past eight years, measured by output per manshift, had averaged 2 per cent per annum.

A debate on the coal position, in the course of which the Minister of Fuel and Power (Mr. Geoffrey Lloyd) announced that coal exports would be severely cut in 1956, took place in the House of Commons on July 20. A Government motion "taking note" of the National Coal Board's statement of July 8 was agreed to without a division after an Opposition amendment had been rejected by 317 votes to 253.

Mr. Geoffrey Lloyd stressed that it would be wrong for the N.C.B. to go on selling coal below the cost of production, or for losses on imported coal to be borne by the taxpayer. Describing the price increases as "the most powerful incentive to fuel economy since the war," he explained that the Government proposed to co-operate with the National Production Advisory Council and the regional boards for industry in a fresh drive towards fuel efficiency. The National Industrial Fuel Efficiency Service, which had had a "most successful first year," and as a result of whose work it was estimated that over 1,000,000 tons of coal would be saved in 1955, would also be expanded by a further 25 per cent, and the present limit on loans for improving plant efficiency would be abolished, in order to expedite the conversion of plants from coal- to oil-burning.

Dealing with the import and export question, the Minister recalled that, with the aim of re-establishing Britain in her traditional role as a coal exporter, the Government had kept the 1954 export target at 13,000,000 tons As production was then rising and the N C B and the National Union of Mineworkers had agreed on a target increase of 5,000,000 tons, it seemed "wholly reasonable" to keep exports in 1955 at the 1954 figure Unfortunately, however, production had been 'falling ever since," and this fact, together with the exceptionally cold winter and the upsurge of industrial consumption, had made the need for imports greater than had been foreseen In view of the export commitments already made, it was not possible to reduce imports in the present year by more than 2,000,000 tons, but for 1955-56 the Government had 'reluctantly concluded that there must be a sharp reduction in exports," thereby making it possible to reduce imports to correspond

The coal industry's central problem (Mr. Lloyd continued) was that, whilst deep-mined output in 1954 was only 500,000 tons more than in 1953, industrial consumption had increased by about 3,000,000 tons. It was clear that the coal industry could not "do the job alone" but needed help to meet the rapid rise in consumption and give it a "breathing space." If the 21,000 miners at present engaged on development work had been available for current production, output could have been raised by about 4,000,000 tons a year When the reconstruction job was done, about 80 per cent of coal would come from new or reconstructed pits, but for the present "the strain of the two jobs" was too great, and some relief would be of enormous help to the industry.

Mr. Lloyd said that he had long been convinced that only oil could bring quick help "on a really massive scale," but while the Abadan question remained unsettled nothing much could be done. Now, however, oil had for the first time become competitive with coal for large-scale steam raising, and would begin to be used in this way towards the end of 1956 Consumption of oil would rise sharply in 1957, and by 1960 the equivalent of over 4,000,000 tons of coal would be used He added that the Central Electricity Authority had contracted for a further 3,000,000 tons of oil, and by 1960 would be using the equivalent of 9,000,000 tons of coal annually, whilst the gas industry had agreed to adopt a new process for obtaining gas from oil refineries which would save 1,000,000 tons of coal a year Meanwhile, the oil companies had assured him that over the next five years they could supply additional oil to the equivalent of 15,000,000 tons of coal. Thus by 1960 oil would be used to the equivalent of 25,000,000 tons a year, and there were further possibilities, since low-flash-point and even crude oil (supplies of which were virtually unlimited) were being successfully used.

After 1960 (the Minister concluded) the atomic energy programme would begin to make its contribution Of the first two atomic power stations, one would serve the London area and would probably be sited near the sea or on one of the Essex rivers, whilst the other would serve the Bristol and Birmingham areas and would probably be on the Severn The limiting factor was not finance, but scientific and technical skill, but if the work proceeded faster than anticipated the programme would be expanded These two "fuel allies," oil and atomic power, removed "the spectre of a coal gap" and promised the necessary relief to allow the coal industry to make progress with its reconstruction plans Meanwhile, the N C B. was pushing ahead with managerial training, conducting a manpower recruitment campaign, and organizing a full-scale drive for the extension of power-loading In this connexion Mr. Lloyd explained that whilst coal-cutting and underground transport were respectively 85 per cent and 90 per cent mechanized, at present only about 9 per cent of coal was power-loaded, and that it was hoped to save about 5,000 men annually by extending power-loading

Mr. Philip Noel-Baker (a former Labour Minister of Fuel and Power) moved an Opposition amendment which (*a*) expressed appreciation of the miners' efforts, which had succeeded in "producing more coal with fewer and older men", (*b*) expressed concern, however, at the decline in the industry's manpower, (*c*) condemned the Government for its "failure to pursue a vigorous and successful fuel-efficiency policy"; (*d*) protested against the policy of "placing the financial loss on coal imports on the National Coal Board"

Declaring that "playing politics with coal is a very dangerous game," Mr Noel-Baker strongly denounced those who asserted that nationalization had failed and that the remedy for the present situation was to "sack the Coal Board" and place "private enterprise magnates" in charge The biggest single cause of the coal industry's difficulties, he asserted, had been "the long decay under private enterprise," and in view of the fact that the N C B. had had "to start with a derelict industry," the achievement of the "highest ever" output per manshift at the coal face, with 75,000 fewer miners than in 1938 and with 40,000 men withdrawn for development work, was "a massive and remarkable accomplishment" "Those who speak of the vast amount of capital investment without a return in coal," he declared, "forget that a vast investment was needed to prevent output going down" He pointed out in this connexion that of the £635,000,000 capital investment proposed in 1952, £350,000,000 was required just to maintain output where it was Actually, the Board's total investment to date was only £275,000,000, of which £100,000,000 was on projects that had so far given no return in coal

Turning to the manpower question, Mr Noel-Baker maintained that the Government had taken no adequate action to arrest the fall. To attract and keep men in the industry the Government should improve housing conditions, supplementary pensions and sick pay, and give bonuses to miners who were transferred to other coalfields As regards the need to stop waste of coal, he stressed that whereas the nationalized industries had saved about 9,500,000 tons in 1954, only 139 loans to private industries for fuel-saving equipment had been approved during the three years that the scheme had been operating As there were about 32,000 industrial establishments using over 100 tons of coal a year, the Government would at this rate "get round the job in about 300 years" He therefore called on the Government to invest in fuel-efficiency schemes "even one-tenth of the £350,000,000 to be spent on atomic energy," and claimed that far better results would be achieved in this manner

In conclusion, Mr Noel-Baker criticized the proposed reductions in exports as "insufficient," saying that the cuts ought to have been "of the order of 6,000,000 - 7,000,000 tons" He suggested that the N C B 's financial burden should have been reduced by allowing the Central Electricity Board and other large importers to make their own purchases abroad, and alleged that the Government had been holding up the announcement of the price increases until after the general election.

The main feature of the ensuing debate was the emphasis placed by members of all parties on the need for increased fuel efficiency

Coal production in the first half of 1955 totalled 113,200,000 tons, against 116,000,000 tons in the first half of 1954, deep-mined output being down by 2,470,000 tons and open-cast production by 330,000 tons. Consumption in the first 25 weeks of 1955 amounted to 108,700,000 tons, compared with 107,230,000 tons in the corresponding period of 1954. Although exports and bunkers totalled only 6,250,000 tons (against 8,000,000 tons), coal imports during the period amounted to 5,500,000 tons, compared with only 404,000 tons in the first 25 weeks of 1954. Manpower at June 25 totalled 707,700, compared with 708,000 at June 25, 1954.

The following table shows the average weekly rates of coal production and consumption, and of manpower, output, and absenteeism in the second quarter of 1955:

	Saleable Mined Coal Produced	Plus Opencast	Total Production	Inland Consumption	Overseas Shipments & Bunkers†
	Tons	Tons	Tons	Tons	Tons
April	3,938,300	208,200	4,144,500	4,056,250	270,000
May	3,725,000	222,725	3,947,725	4,065,250	300,000
June*	3,938,840	233,100	4,172,000	3,576,000	169,000

	Wage-earners on colliery books		No. of shifts worked per wage-earner	Output per manshift at coal-face	Output per manshift overall	Percentage of absenteeism
	Total	at coal-face		Tons	Tons	
April ..	708,675	290,775	4.56	3 241	1 208	12.54
May	707,375	289,950	4 73	3 232	1 209	11.72
June*	705,140	289,100	4 61	3 253	1 208	11.85

* Average of five weeks. † Including fishing vessels, but excluding coastwise bunkers

Other developments in the coalmining industry during recent months are summarized below.

N.C.B. Quarterly Accounts. The Board's accounts for the first quarter of 1955, published on Aug. 17, showed that colliery profits amounted to £5,024,472 and profits on opencast mining and ancillaries to £875,000, making a total of £5,899,472 After charging £5,200,000 for losses on imported coal, £5,150,000 for interest charges, and small amounts for various items, there was an estimated deficit for the quarter of £4,595,528, compared with a surplus of £754,461 for the first quarter of 1954

The Board's accounts for the second quarter of 1955, published on Sept. 15, showed an estimated deficit of £19,189,054, the largest quarterly deficit since nationalization. The loss compared with a deficit of £264,905 in the second quarter of 1954, and brought the loss for the first half of 1955 to £23,780,000, and the accumulated deficit since nationalization to £41,180,000

Colliery losses during the quarter amounted to £7,874,054, but this was reduced by estimated profits on opencast working and ancillaries to a net operational loss of £7,199,054 The addition of £6,700,000 to cover losses on imported coal, and of £5,290,000 for interest charges, resulted in the deficit shown in the accounts.

The report gave the saleable tonnage obtained from deep mines during the quarter as 51,178,926 tons, Production costs averaged 67s 1d per ton (of which wages represented 47s. 5d. per ton), whilst proceeds averaged only 64s per ton, resulting in a deficit of 3s 1d per ton.

Coal Stocks. Mr. Lloyd stated in the House of Commons on June 20 that coal stocks (distributed and undistributed) at June 4 totalled about 13,300,000 tons, compared with 15,200,000 tons at June 4, 1954 The recent rail strike had caused little interference with home supplies or imports, although exports had been severely curtailed.

Coal Exports. Following Mr. Lloyd's announcement during the debate on July 20, the N C B announced on Aug. 9 that the only countries to which British coal would be exported in 1956 under fresh agreements would be the Irish Republic and Denmark, although commitments entered into during the current year and still uncompleted at Dec 31 would be fulfilled during 1956.

It was stated in the Press on the same day that coal exports in 1954 had totalled 13,715,621 tons, valued at £59,075,227. The principal countries taking British coal were · Denmark, 3,431,000 tons, the Irish Republic, 1,712,000 tons; Western Germany, 1,548,000 tons; Italy, 1,265,000 tons; Sweden, 1,096,000 tons, France, 1,023,000 tons

Coke Prices. The Gas Council announced on Aug. 2 that, as a result of the recent increases in the price of coal, prices of gas coke would be raised from Aug 8 by amounts ranging from 18s. 4d. in the North and Midlands to about 30s. in Southern England.

Closing of South Wales Anthracite Pit. On Aug. 26 the South-Western Coal Board closed down the small Brynhenllys Colliery, Brynammon, in the Neath anthracite area The Board explained that the colliery was working at a heavy loss, that appeals for miners' co-operation had been unavailing; and that output per manshift at the colliery in June was only 2.4 cwt., compared with the South Wales average of 18 5 cwt.

Use of Foreign Labour. At the N.C B.'s request, the executive of the National Union of Mineworkers asked its economic sub-committee on Aug. 5 to inquire into the possibility of employing more foreign workers in the pits in order to alleviate the manpower shortage. The proposal to bring in Italians and Austrians was, however, rejected by the Derbyshire branch of the N U M. on Aug 16 on the ground that "the problem of training and integration, together with the natural hostility to foreign labour by the rank-and-file miners, would create more difficulties than it would solve." The proposals were also opposed by the West Yorkshire and Scottish branches of the union on Aug. 20, by the West Midland branch on Aug. 23, and by Welsh miners' delegates on Aug. 26, although the Durham area executive supported the plan. On Sept. 4 the N.U.M. executive announced that, in view of "the disposition of the men in the areas not to accept foreign labour," it considered that "it would be desirable that we should examine the position of the present situation of coal production in the most objective way."

On Sept 8 the N.C.B. announced that it had accepted the N.U.M.'s proposal for a joint pit-by-pit investigation into the causes of the decline in coal output, to begin as soon as possible. A Board spokesman subsequently explained that it was satisfied that the acceptance of foreign labour was "the only immediate way of meeting critical manpower needs and maintaining production"; if, however, the miners persisted in their refusal, the Board would seek to alleviate the position by better deployment of available labour, the introduction of mechanical devices, the reduction of wastage, and better recruitment. Whilst it welcomed the N.U M.'s offer for a joint inquiry into wastage and the deployment of manpower, it would also welcome the union's co-operation in increasing the mobility of labour among the pits, eliminating restrictive practices, and reducing absenteeism.

New N.C.B. Appointment. The N C.B. announced on July 4 that Mr. J. O. Blair-Cunynghame, chief personnel officer of the B.O A.C., had been appointed to the new post of director-general of the Board's staff department The creation of this post had been recommended by the Fleck Committee (see 14115 A).

On July 13 it was announced that Mr. Gerald Nabarro, Conservative M.P. for Kidderminster, had resigned the joint secretaryship of the Conservative Fuel and Power Committee owing to disagreements with the Minister of Fuel and Power on policy. In his letter of resignation, Mr. Nabarro alleged that the Minister had "largely disregarded" the Committee's "constant warnings during the past three or four years of the dangers of developing coal shortages," and that in consequence "a dangerous fuel position, fraught with difficulty to our balance of payments," had been allowed to develop and might "become calamitous next year."—(Ministry of Fuel and Power - Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. Coal Industry, 14269 A.)**

A. INDIA. — Opening of Durgapur Barrage.

The Durgapur Barrage (on the Damodar River in West Bengal), which forms part of the Damodar Valley scheme, was opened by Vice-President Radhakrishnan on Aug. 9.

The barrage—the biggest so far built in India, and costing about 230,000,000 rupees—will provide irrigation for an area of nearly 2,200 sq. miles by means of a canal network of 1,550 miles, of which 40 per cent has already been dug. The main canal on the left bank of the Damodar River is about 85 miles long and joins the Hoogly River 35 miles north of Calcutta. It will provide a permanent all-weather navigational waterway between Durgapur and Calcutta, connecting the coal-producing areas around Raniganj with the Hoogly and relieving congestion on the railways.

The Durgapur Barrage was designed and constructed entirely by Indian engineers, and completed ahead of schedule.

B. UNITED STATES. — Increase in Minimum Wage.

President Eisenhower signed a Bill on Aug. 12 increasing the legal minimum wage from 75 cents to $1 an hour as from March 1, 1956. He had originally asked for an increase to only 90 cents an hour on the ground that any higher increase would be inflationary, but concurred in the increase to $1 after it had been approved by the Senate on June 8 and by the House of Representatives on July 20. The measure was expected to affect directly more than 2,000,000 workers, largely in the South, as well as others whose higher wages had been based on concessions made above the legal minimum.
(New York Herald Tribune) **(Prev. rep. 11059 A.)**

C. NEPAL. — Political Developments. - Dissolution of Advisory Assembly. - Dr. Singh's Return from Exile.

Negotiations on the formation of a new Government between King Mahendra of Nepal (who had ruled since March with the assistance of a non-political advisory council of five) and the political parties continued throughout the spring and summer of 1955, but without result. A "convention of political and social organizations," which had been summoned by the King to give its advice on the form of government, the holding of general elections, and the future of the Advisory Assembly, met in the royal palace of Khatmandu from May 8-16 and was attended by representatives of over 100 organizations; four of the leading parties (the Nepali Congress, the Nepali National Congress, the *Praja Parishad*, and the *Rashtriya Praja* Party) refused, however, to take part on the ground that the objectives of the conference were not clearly defined. In his closing speech the King said that the opinions expressed could be summed up in four points: direct rule should not be continued, general elections should be held at an early date; the democratic system should be preserved; and the Advisory Assembly should be dissolved.

In accordance with the convention's recommendations the King dissolved the Advisory Assembly on June 10, and announced on Aug. 8, after discussions with the Electoral Commission, that general elections would be held in October 1957. The Advisory Assembly, a nominated body of 99 members, was convened in April, 1954, but was boycotted by the Nepali Congress as unrepresentative, and had been prorogued since February last.

After the convention King Mahendra received Mr. B. P. Koirala (president of the Nepali Congress) in audience on May 23, and Professor D. R. Regmi (president of the Nepali National Congress) on May 25 Both party leaders subsequently expressed their conviction that the King wished to end his direct rule as soon as possible Further discussions between the King and leaders of the Nepali Congress, the Nepali National Congress, the *Praja Parishad*, the National Democratic Party, and the right-wing *Gurkha Parishad* took place on Aug. 19 and 22, their results being officially described as "inconclusive."

Dr. K. I. Singh, the left-wing Nepali Congress leader, and 27 of his followers were handed over by the Chinese authorities at the Tibetan frontier on Sept. 2, and were granted a royal pardon on Sept. 11 after pledging loyalty to the throne and promising to abstain from violence. Dr. Singh, who led an abortive rising in Khatmandu in January 1952 (see 12020 A), subsequently escaped to Tibet and thence to Peking. The Chinese Government, which had previously rejected Nepalese demands for his extradition, agreed at the Bandung Conference to repatriate him to Nepal.—(The Statesman, Calcutta)
(Prev. rep. 14116 A.)

D. UNITED STATES. — Tribute to Sir Winston Churchill. - U.S. Senate Resolution.

The American Minister in London (Mr. Walton W. Butterworth) called upon Sir Winston Churchill on Sept. 3 to present to him an engrossed copy of the following resolution which had been adopted by the U.S. Senate on July 28: "The Senate of the United States, on the occasion of the retirement of Sir Winston Churchill as Prime Minister of Great Britain, expresses its high appreciation of the outstanding contribution this truly great statesman has made to the cause of freedom and his tireless efforts on behalf of world peace, and its profound hope that Sir Winston Churchill may be spared for many more years of useful and honourable service."
(Times - New York Times) **(Prev. rep. 14129 A.)**

E. NATIONALIST CHINA. — New Chief of Staff.

It was announced from Taipeh on Aug. 20 that General Sun Li-jen, personal Chief of Staff to Generalissimo Chiang Kai-shek, had resigned after admitting "negligence" with regard to one of his subordinates, who had been arrested as an alleged Communist agent. General Sun, who commanded the Chinese First Army in Burma during the Second World War, had been one of the principal collaborators of Generalissimo Chiang Kai-shek and had played an important part in re-training the Nationalist forces which were withdrawn from the Chinese mainland to Formosa.

General Huang Chen-chui, Deputy Minister of National Defence, was appointed General Sun's successor on Aug. 21.
(New York Times)

F. INDIA. — Decimal Coinage Act.

The Indian Council of States (the Upper House) passed the Decimal Coinage Bill on Aug. 26, thus completing parliamentary action on the measure. (The Hindu Madras) **(14368 B.)**

A. ALGERIA. — Extension of Nationalist Rebellion and Terrorist Activities. - The August Uprising. - Proclamation of State of Emergency. - Reinforcement of French Troops. - French Proposals for Economic and Administrative Reforms. - Report of Parliamentary Mission to Algeria. - Ban on Algerian Communist Party.

The nationalist uprising which began on Nov. 1, 1954, spread on a considerable scale during the spring and summer of 1955 to new areas of north-eastern Algeria. Although the Aurès mountains remained the main centre of the revolt, rebel activities spread to the Kabylie (the coastal area east of Algiers), the *Nord Constantinois* area (between Constantine and Philippeville), and the Nemencha mountains (south of Tebessa, between the Aurès and the Tunisian frontier). At the same time the rebels adopted more aggressive tactics in all areas, attacking French forces and military posts in bands up to 100 strong. A number of major engagements took place at the end of July and the beginning of August in the Aurès and Nemencha mountains, culminating on Aug. 20 in simultaneous uprisings at a large number of places in the *Nord Constantinois*, all of which were repressed.

Information obtained by the French authorities during the course of the rebellion showed that the leaders of the revolt were drawn from an organization called the "Revolutionary Committee for Unity and Action" (C.R.U.A.), later renamed the 'National Liberation Front". This organization had been formed after the split in the "Movement for the Triumph of Democratic Liberties" (M.T.L.D.) in July-August 1954 (see 13923 A), and was led by a certain Bendella, who directed its activities from Cairo. According to a report presented to the French Cabinet in June by M. Soustelle (the Governor-General), it had been proved that both the rival sections of the M.T.L.D., to which the revolt had originally been attributed, in fact disapproved of it, whilst information obtained from an arrested leader of the C.R.U.A. showed that this body was planning the assassination of M. Messali Hadj, leader of the left-wing of the M.T.L.D. Other captured rebel leaders had stated that the uprising had been planned at a conference of North African leaders in Berne in September 1954, and that Algeria had been divided for the purpose into six zones, each under its own leader: the Aurès, the *Nord Constantinois*, the Kabylie, the Algiers district, the Oran district, and the south.

The number of rebels in the Aurès mountains remained obscure, whereas in February it was believed to be only 350, later estimates ranged from 500 to as high as 3,000. About 150 insurgents were believed to be operating in the Kabylie in June, and from 100 to 200 in the *Nord Constantinois*. The strength of the rebel forces was believed to be steadily increasing, however, partly because the widespread arrests of nationalists were driving many into the *maquis* to avoid "interrogation" by the police, and partly because the suppression of the M.T.L.D. had left large numbers of unemployed without any political spokesman. The rebels suffered from a serious shortage of arms and ammunition, many of their operations having the procuring of weapons as their primary object. Reports in the French Press that they were receiving military supplies from the Arab countries were denied on Aug. 25 by M. Soustelle, who stated that the most modern weapons found in their possession dated from the Second World War.

The character of the insurrection varied from one area to another. The Aurès, which had previously been the scene of serious uprisings in 1845, 1871, 1879, and 1916, is inhabited mainly by Berbers, who, although nominally Moslems, largely retain their primitive fertility rituals and cult of ancestor-worship. Since 1935, however, a strong religious movement directed against these practices has developed under the leadership of the ultra-orthodox Senussi sect (which was responsible for the previous uprisings) and has been spread among the Berbers in recent years by the *ulema* (Moslem religious teachers) through their Koranic schools. In consequence the revolt assumed a religious character, e.g. growing vines were uprooted or cut through in many places, and a campaign against smoking was organized, the use of both alcohol and tobacco being condemned by the Senussi.

In the Kabylie (also a Berber district, and the scene of several uprisings in the past) the revolt was believed to be largely dominated by traditional clan feuds, and to possess a political and religious character only in the towns and in certain rural districts. In the *Nord Constantinois*, on the other hand, it drew its main support from the impoverished Arab peasantry. Communication between the various centres of the rebellion was sporadic, concerted action being hindered by the racial differences between Berbers and Arabs, and—it was believed—by rivalry among the local leaders.

The outstanding stages of the revolt during the period under review are described below under cross-headings.

Insurgent Activities, January-August.

The Aurès Mountains. In the earlier stages of the rising, the rebels confined themselves to guerrilla tactics, frequently ambushing French patrols and convoys but avoiding pitched battles. A large-scale operation was launched on Jan. 19 by over 6,000 French troops, and a second on Jan. 23 by 4,000 troops; numerous suspects were arrested, but no contact was established with the rebel forces.

The first example of the rebels' new tactics in this area occurred on May 14, when about 80 insurgents raided the village of Ain-Naga (25 miles S.E. of Biskra) and besieged the police-station for four hours. On May 17-18 the village of Condorcet (near Batna) was twice attacked, whilst on June 17 insurgents entered the village of Victor-Duruy (near Batna), shot dead the assistant district officer and his son, and set fire to agricultural equipment; they were attacked by French forces on the following day, 10 of the rebels being killed. In an engagement on June 28 at Zgag (in the northern Aurès) 18 rebels were killed. The most violent encounter of the rebellion to date occurred on Aug. 9-11 at Sidi-Aoun (near Biskra), where a French force was ambushed, reinforcements were sent and heavy fighting ensued in which 21 French soldiers and 37 rebels were killed.

The Kabylie. No major engagements were reported from this area, where the number of rebels was comparatively small. Terrorist activities were common, however, 38 attempts being reported between Nov. 1 and April 30, and a number of local encounters between French troops and insurgents took place.

The Nord Constantinois. The insurgents staged their first *coup* in this area on May 1, when about 60 rebels surprised a detachment of native troops near Philippeville and stripped them of their uniforms, arms, and ammunition. On May 10 the rebels cut three of the four main roads meeting at the small town of El-Milia, and also cut all the telephone wires in the neighbourhood; the concerted nature of these operations was regarded as evidence of planning by leaders with military experience. The arrival of reinforcements forestalled a possible attack on the town, but on the following day a party of police were ambushed nearby, two being killed.

A serious outbreak of terrorism occurred on June 17 at Philippeville, where two Europeans were killed and four wounded in a number of bomb explosions. During the following week security operations were intensified in the area; 13 rebels were killed on June 20 in a clash south of Philippeville, and on June 22-23 police, parachute troops, and naval and air units took part in a police operation covering 100 miles of coast between Collo and Bône. Seven rebels were killed and about 200 suspects (who were reported to include many members of the "general staff" of the "National Liberation Front") were arrested. Further large-scale police operations took place at Constantine and Bône early in July.

The Nemencha Mountains. The villages of Guentis and Youks-les-Bains were attacked on several occasions between May 14 and June 1, and a military post at Kheirane on May 21. The administrator of Guentis (M. Dupuy), a French lieutenant, and four members of an Algerian escorting force were killed in an ambush near the village on May 24; no trace was found of the 24 other members of the escort, who had either been carried off or had deserted to the rebels with their arms and equipment.

Both sides suffered heavy casualties in engagements in this area during July and August. An officer and eight native soldiers were killed in an ambush near Guentis on July 18, and 11 other soldiers carried off by the rebels. On July 26 a French convoy was attacked in the mountains near Ain-Zerga, 15 rebels being killed and three soldiers wounded. On July 27 a convoy was ambushed near Taberdga, and an engagement followed in which 23 *légionnaires* and at least 15 insurgents were killed. On July 29-30 heavy fighting took place between rebel forces and French parachute troops near Tebessa, in which the former lost 25 killed as against one parachutist wounded. On Aug. 10 French troops destroyed a village near Edgar-Quinet (west of Khenchela) into which a rebel force had retreated, five soldiers and 15 insurgents being killed. During this period the insurgents made a number of raids into Tunisia, in one of which a French official and a Moslem were killed near Kasserine on July 27. A rebel force was intercepted on the frontier on Aug. 6, losing 12 killed.

Terrorist Activities. Acts of individual terrorism and sabotage continued throughout this period. Many Moslems regarded as pro-French or suspected of giving information to the authorities were kidnapped, murdered, or mutilated by the rebels, notices being attached to their bodies in some cases saying that they had been tried and condemned by the "Army of National Liberation." As a result of such terrorist activities, the native population became increasingly unwilling to give evidence against prisoners for fear of reprisals. Attacks on individuals were at first confined to Moslems, but from May onwards numerous attempts were made on the lives of Europeans. In the countryside farm buildings and crops were frequently set on fire, whilst in Algiers, Constantine, Philippeville, and other towns a number of bomb explosions occurred from April onwards.

The August Uprising.

On Aug. 20 (the second anniversary of the deposition of the ex-Sultan of Morocco) serious uprisings took place over a large area of the *Nord Constantinois*, bounded by Collo and Philippeville in the north and Constantine and Guelma in the south. The various incidents, all of which had evidently been carefully planned beforehand, were apparently timed to coincide with similar uprisings which occurred on the same day in Morocco.

Philippeville was invaded by several hundred insurgents, armed with automatic weapons, shotguns, knives and axes, who attacked the police stations; they were driven from the town by troops and police, losing over 100 killed. At Constantine eight bombs exploded almost simultaneously, wounding 16 people; a police inspector was shot in the street; and two leading members of the moderate nationalist "Democratic Union of the Algerian Manifesto" (U.D.M.A.) were wounded. About 250 insurgents attacked the town hall at Oued-Zenati (east of Constantine), but were repelled with the loss of about 30 men killed. The village of Kroubs (south of Constantine)

was attacked by about 100 rebels, 25 of whom were killed, at Ain-Abid (south-east of Constantine) the barracks were besieged and seven civilians murdered; Condé-Smendou (north of Constantine) was violently attacked; at Saint-Charles (south of Philippeville) the town hall was set on fire; and at the mining settlement of Fil-Fila the rebels massacred and mutilated 36 men, women, and children. Total casualties in the day's fighting were officially given as about 1,000 rebels and 25 soldiers killed, and 105 soldiers wounded. On Aug. 21 bands of insurgents attacked Guelma (where they lost about 50 killed) and a number of villages, whilst bomb explosions occurred at Constantine and Philippeville without causing any casualties.

Intense indignation was aroused among the European colony by the atrocities committed by the rebels, and especially by the massacre at Fil-Fila At the funeral on Aug. 23 of the 60 Europeans killed at Philippeville the Prefect of the *departement* was molested by the crowd, and wreaths sent by M Soustelle and the Prefect were trampled underfoot. The mayor, M Crevaux, afterwards submitted to the sub-prefecture a statement demanding the imposition of a state of siege, the "inauguration of a policy of authority and firmness," and the punishment of those responsible for the Government's failure to arm the civil population. M Soustelle had previously announced that arms would be distributed to isolated farmers.

The revolt was followed by strong measures of repression, in which both the Army and the European colony took part. It was officially announced on Aug. 22 that 10 villages, which were described as "centres of rebellion," had been razed to the ground after the women and children had been evacuated. A special correspondent of *Le Monde* reported on Aug. 24 that "improvised militias" were hunting down rebels "with a passion which sometimes borders on frenzy" and that "a pitiless war of race and religion" was being waged. He alleged that some 50 civilians, including men, women, and children, had been massacred by French "commandos" at a village near Philippeville, and that similar reprisals against Moslem civilians had been taken at Carrières Romaines, in the same area.

As a result of these measures, many Moslems fled from their villages to join the insurgents, and daily incidents continued to be reported. On Aug. 24 the garrisons of El-Hanser and Ain-Fakroun were attacked, and during the following night about 100 rebels raided Saint-Charles, carrying off a supply of rifles. On Aug 27 a skirmish occurred between Constantine and Batna in which 17 rebels were killed, and on the following day 23 rebels were killed in three clashes in the Constantine *département* On Sept. 1, 34 insurgents were killed in an engagement near Medina, in the Aurès, and on Sept. 2 a village between Constantine and Philippeville was destroyed by the insurgents, who kidnapped the mayor

The Moslem deputies from the Constantine *département* appealed on Sept. 1 to M. Faure, the French Prime Minister, to end the "collective, pitiless, and disproportionate repression" which—it was alleged—was being carried on, not only by the Army and the police, but also by "irresponsible civil elements" The Cabinet's co-ordinating committee on North African affairs, however, approved on the following day all the measures taken since Aug 20 Meanwhile the rebellion, and the subsequent French counter-measures, had brought economic life to a virtual standstill throughout the *Nord Constantinois*; in Philippeville, for example, many Moslem shopkeepers had joined the insurgents or were afraid to open their shops, European wholesalers were unable to dispose of their stocks, and food had to be brought into the town from a distance. In order to end this situation, hundreds of thousands of leaflets were circulated on Aug 30 appealing to all Moslems who had fled and were not guilty of any crime to return to their villages, and giving assurances that they would not be harmed in any way.

Proclamation of State of Emergency.

The French National Assembly approved on April 1 a Bill for the establishment of a "state of emergency," intermediate between the normal rule of law and a state of siege, in Algeria during the next six months.

The preamble to the Bill stated that if the existing situation continued, "the population may come to believe that benevolent complicity with the rebels is less dangerous than co-operation with France, and the present sporadic and scattered disorders may develop into a general insurrection" It had become clear that existing legal procedures, which were not intended to cope with such a situation, were inadequate; on the other hand, a state of siege, although efficacious as a means of restoring order, would inevitably cause a serious disturbance of Algeria's economic life The Government therefore proposed an intermediate solution which would enable the civil authorities to employ methods better adapted to the existing situation.

The main provisions of the Bill were as follows.

(1) The Government would have power to proclaim a state of emergency in the whole or part of France, Algeria, or the overseas *départements* in the event of imminent danger caused by serious attacks on public order, or of a public disaster.

(2) A state of emergency could be declared only by a law fixing the area within which it would come into force and the period for which it would operate, and could be prolonged only by a new law In the event of the Government's resignation, this law would have to be confirmed by Parliament within 15 days of the new Government's receiving a vote of confidence, and if the National Assembly were dissolved it would automatically become void.

(3) The Prefect of a *departement* under a state of emergency was empowered to forbid the movement of persons or vehicles within certain areas and at certain times, to establish protection or security zones in which the residence of persons could be controlled, and to forbid any person seeking to hinder the public authorities to reside within the whole or part of the *departement*

(4) The Minister of the Interior or the Governor-General of Algeria was empowered to fix the place of residence of any person, living in a zone where a state of emergency was in force, whose activities were considered dangerous to public order He was forbidden, however, to establish detention camps for such persons, and was required to provide for their support and that of their families Any such person might appeal to a consultative commission, on which the local council would be represented by persons chosen by itself.

(5) The Minister of the Interior, the Governor-General of Algeria, or the Prefect of a *departement* might order the closing of places of entertainment, cafés, and all other public meeting places, and might forbid public meetings likely to lead to disorder

(6) The public authorities were empowered to order the handing-over of arms, to search houses by day or night, and to control the Press, broadcasting, films, and theatrical performances

(7) The Minister of Justice and the Minister of Defence might issue a joint decree transferring specified offences from the jurisdiction of the civil courts to that of military courts.

(8) A state of emergency was declared throughout Algeria for six months The areas to which it would be applied would be fixed by decree

The debate on the Bill opened in the National Assembly on March 30.

M. Genton (Radical), *rapporteur* for the Commission of the Interior, observed that the commission had sought to ensure that the state of emergency should be applied only with the utmost circumspection, e g all powers not expressly granted to the military authorities were reserved for the civil authorities, and the Bill provided for strict parliamentary control The Bill was strongly criticized by two Moslem deputies, **M. Bendjelloul** and **M. Sid Cara**, who complained that the Government had put forward no proposals for dealing with the poverty and unemployment which, they asserted, were the primary cause of the crisis in Algeria, by **M. Vals** (Socialist), who contended that it might be used to suppress strikes or political demonstrations, by the **Abbé Gau** (M R P), who accused the police in Algeria of using torture and other "shameful methods" to extract "confessions" from arrested Algerians, and who claimed to possess details of many such cases, and by a number of Communist deputies

M. Bourgès-Maunoury (Minister of the Interior), after giving an assurance that the Government would proceed with the reforms proposed by M. Mendès-France's Cabinet (see below), declared that the crisis in Algeria had been caused by 600 to 800 outlaws led by "professional brigands or foreign agents." The state of emergency, he explained, had not been limited to the areas where the rebels were operating, as this would encourage them to extend their activities to districts which had hitherto remained peaceful, and it was essential that the Government should be able to use its powers immediately wherever acts of banditry occurred Under the existing law suspects had had to be released, and had immediately returned to their terrorist activities, and for this reason the authorities were empowered to control their movements. The danger that the law might be used against strikes or legitimate political movements was guarded against by the provision that only Parliament could declare a state of emergency In reply to the Abbé Gau, he admitted that abuses had occurred, but said that these had been suppressed in recent weeks Under the common law, he pointed out, a suspect at whose house arms had been found had to be released if he could not be proved guilty, and in consequence the police or the military were tempted to use methods which he did not excuse to obtain confessions, the Government's Bill, however, would mean that they were no longer faced with "the horrible choice between being impotent or murderers"

After an all-night debate, the Bill was adopted in the early hours of April 1 by 279 votes to 219. It came into effect on April 7, when a decree was issued establishing a state of emergency in the Batna area, the Kabylie, and the district round Tebessa, subsequently extended on May 20 to cover the whole of the *département* of Constantine and the Biskra and El-Oued areas.

General Parlange, commander of the Agadir zone of Morocco, was appointed on April 28 to the command of military and civil operations throughout the emergency zones, with direct responsibility to the Prefect of the *département* of Constantine. He was authorized to form local defence groups, to recruit mobile auxiliary police, and to organize intelligence services, and was also instructed to give special attention to education and medical services and to initiate public works schemes for the relief of unemployment General Parlange announced on May 18 that the inhabitants of villages where acts of sabotage or terrorism occurred would be held collectively responsible for the damage caused, and would be required to pay the cost of repairs. Penalties were also imposed on those who sheltered terrorists or failed to report their presence.

A Bill prolonging the state of emergency for another three months was submitted to the French National Assembly on July 28. The Government had originally proposed that it should be extended for six months, but subsequently reduced the period to three months in order that the Assembly might be consulted if a further extension became necessary.

During the debate **M. Violette** (Radical), a former Governor-General of Algeria, declared that the Constantine *département* was "practically in a state of war" He contended that if Algeria was part of France, French law should be applied there, notably the legislation limiting land-holdings. "Every year," he said, "as the result of erosion, 40,000 hectares of mountain land, and therefore of Moslem land, disappear into the sea Every day Algeria has 100 fewer hectares of land and over 500 more inhabitants . . According to the lowest estimate, there are 850,000 agricultural workers unemployed. It is not surprising that there is unrest in Algeria" Several right-wing deputies called for stronger repressive measures; for example, **General Aumeran** (Ind Republican *apparenté*) demanded "the appointment of a single non-political leader for all North Africa endowed with full military and civil power, the proclamation of a state of siege, and the formation of military courts whose sentences would be carried out on the spot" **M. Palewski** (Gaullist) and **M. Benbhamed** (a Moslem Socialist deputy) both complained of the political activities of organizations led by former Vichyites and Nazi sympathizers who, they alleged, strove to stir up the European community against the French Parliament, whilst **M. Chevallier** (Ind Republican *apparenté*), demanded the punishment of all those, whether European or Moslem, who fomented racial hatred. M Benbhamed also alleged that summary executions had occurred and that villages had been burned down without reason by the security forces.

M. Pineau (Socialist), leader of the parliamentary mission to Algeria (see below), warned the Assembly that the morale of the Army in Algeria was low, and stated that an overwhelming majority of the Army condemned the use of all forms of reprisals It was essential, he said, to have someone with whom to negotiate, unfortunately the elections to the Algerian Assembly in the past had not been free, and it was therefore necessary to dissolve the present Assembly and to hold free elections to a new one, with a single Chamber "We must not tie our hands with the myth of 'integration,' which we have not made a reality," M Pineau added. "Let us rather speak of 'association'"

M. Pierre Cot (*Progressiste*), after referring to the danger that France might "slip through inertia into a new version of the war in Indo-China," suggested that the policy of integration or assimilation of Algeria was out of date. If they wished to carry out this policy, however, it must be done consistently by applying to Algeria all French legislation on social, juridical, and political matters

M. Bourgès-Maunoury, after rejecting the suggestion of negotiations or a round-table conference, claimed that the proclamation of a state of emergency had led to a considerable improvement in the situation; the burning of crops had greatly decreased, and the boycott of tobacco had been ended in a few days. He opposed a policy of "association" on the grounds that it would not raise the living standards of the Algerians, and that Algeria was an indivisible part of France, and announced that new measures would be introduced for implementing the Algerian Statute of 1947 (see 9615 A) An emergency programme costing 5,000,000,000 francs had been added to the 48,000,000,000 fr which was already being spent on modernization and equipment, 40,000,000,000 fr of which was supplied by France Projects for the improvement of living conditions had been launched in 21 rural districts, covering 200,000 hectares and containing 35,000 families, and 350,000,000 fr. had been allocated for about 100 similar projects In addition, 3,000,000,000 fr. had been set aside for the development of education; wages had been raised, and measures had been adopted for the relief of unemployment To increase the efficiency of the local administration the number of civil servants would be raised, and in addition to the new *département* of Bone (see below) the Government proposed to create another, that of the Sahara. Bills providing for the separation of the Moslem religion from the State and for the teaching of the Arabic language would be submitted to the Algerian Assembly. Finally, a centre would be established for the training of Moslem administrators, and a certain number of high administrative posts would be reserved for Moslems

"It is on the economic plane that we must seek the true solution of the Algerian problem," M Bourgès-Maunoury continued The population of Algeria was increasing by 250,000 a year, and out of a working population of 2,300,000 there were 400,000 unemployed and 450,000 partially unemployed. The development of agriculture and industrialization were indispensable, and to apply hastily the social legislation in force in France would overload the Algerian economy. The Government were considering a report on methods of raising the living standards of the Algerians, according to which, if another 15,000,000,000 fr were invested in Algeria annually for six years, and taxation rose by 1 per cent per annum, living standards could be raised by 6 per cent every year. In the sphere of agriculture, the Government would submit to the Assembly a Bill for determining the individual rights of the peasants over the lands which they cultivated, and enabling them to benefit by modern forms of credit This programme, M Bourgès-Maunoury concluded, could not be carried out without heavy expenditure by France, but this would be preferable to spending as much on the repression of disorder

M. Cayeux (M.R P) demanded the speedier punishment of terrorists, strongly criticized the existing system of large estates; and called for a fundamental revision of the taxation system and for the buying-up of certain estates and the compensation of their owners as part of a bold programme of agrarian reform **M. Brahimi** (a Moslem deputy, *apparenté* to the Socialists) maintained that the situation, far from improving, was growing worse, and attributed this deterioration to the methods used by the police, collective reprisals, the opposition of the European chamber of the Algerian Assembly to all reforms, and to the tone of the European Press. "Moslem agriculture," he added, "is in a state of stagnation, the industrialization of the country has been neglected, the whole economy suffers from chronic unemployment; the number of schools is insufficient; the social security system is a caricature of that in France, there is no housing policy" In practice the Moslems played no part in the management of their own affairs because, he alleged, the Statute of 1947 had been "sabotaged" by the Algerian Assembly. France must therefore declare her policy clearly, and must either decide on total integration or find a formula for association.

When the debate concluded in the early hours of July 30, the Assembly rejected by 388 votes to 215 a Communist amendment abolishing the state of emergency, and adopted by 369 votes to 247 a Gaullist amendment prolonging it for six instead of three months. In its amended form the Bill was adopted by 382 votes to 233. Three other Bills which (*a*) divided the Constantine *département* into two separate *départements* (those of Constantine and Bône); (*b*) set up new appeal courts at Oran and Constantine, and (*c*) enabled the courts to enlarge their staffs and accelerate their procedure, were also adopted, only the Communists opposing. After being passed by the Council of the Republic on Aug. 5, they were officially promulgated on Aug. 15. Following the disorders in the *Nord Constantinois*, the state of emergency was extended on Aug. 30 to cover the whole of Algeria.

The new *département* of Bône was officially defined as embracing the *arrondissements* of Bône, Guelma, Souk-Ahras, and Tebessa.

Reinforcement of French Troops in Algeria.

A joint statement issued by the Ministries of Defence and the Interior on May 18 announced that new military measures to be taken in Algeria would include a considerable increase in the armed forces employed; the use of naval contingents in military operations, and of more aircraft and helicopters; the recall of retired officers with specialized knowledge of Moslem questions; the recruitment of local militias; and the despatch of police reinforcements from France. On the following day the Government announced that ten infantry battalions, a reconnaissance regiment, and eight squadrons of mobile *gendarmerie* would be sent, some of which were already on their way; that some units on the spot would be strengthened, and others replaced by units from Germany; and that naval units would be used on the coast of the Constantine *département*. M. Faure stated on May 26 that a number of units serving under NATO command, including a complete division, would leave in the immediate future for Algeria, and that the NATO had been notified of this decision.

The Cabinet authorized M. Soustelle on June 3 to recall to the colours 8,000 to 10,000 men who had recently completed their military service, and who would be employed in training local self-defence groups. The various measures approved by the Government, it was estimated, would bring the total security forces in Algeria up to 100,000 men.

Following the uprising of Aug. 20, M. Faure announced on Aug. 23 that six more battalions would be sent to Algeria, and on Sept. 2 a Government spokesman stated that the co-ordinating committee for North Africa had decided to send another nine battalions. A decree issued on Aug 25 provided for the recall to service of 50,000 to 60,000 reservists, and another issued on Aug. 30 for the recall of a further 65,000.

Police Measures.

Three Moslems were, condemned to death for terrorist activities at Algiers on June 20, ten at Constantine on June 21 (nine *in absentia*); one at Algiers on June 22; four at Algiers on July 14 (three *in absentia*); three at Constantine and one at Algiers on July 19, three at Mostaganem on July 25; and one at Algiers on Aug. 17. The sentences passed on June 20 and 22, however, were subsequently quashed on technical grounds. M. Schuman (Minister of Justice) stated on July 21 that 46 Algerians had been sentenced to terms of hard labour and 381 to between five and 10 years' imprisonment up to the end of June.

The Ministry of the Interior had announced on Jan. 14 that an inquiry had been ordered into allegations that suspects had been illegally arrested and ill-treated by the police Numerous cases of the alleged beating, torture, and starvation of prisoners in order to extort "confessions" had been cited in the French Press (notably by M Mauriac, the Roman Catholic novelist, in *L'Express*), and were subsequently referred to in the Algerian Assembly's resolution of Jan. 20 (see below) and in the National Assembly's debates of Feb 2-4 (see 14069 A), March 30-April 1, and July 28-30

Proposals for Economic and Administrative Reforms.

M. Mitterrand, then Minister of the Interior, submitted to M. Mendès-France's Cabinet on Jan. 5 a series of proposals for economic, administrative, and educational reforms in Algeria. These envisaged a programme of irrigation and soil conservation; an increase in wages to levels nearer those

existing in France; the admission of Algerians to responsible positions in the Civil Service; the establishment of a school of administration at Algiers; the application of the Statute of 1947 guaranteeing Algerians equal rights with Frenchmen; the possible extension of the franchise to certain categories of Algerian women; the possible formation of new *départements*, with a view to greater decentralization; and the foundation of a centre of Islamic studies to attract North African students to the University of Paris. The implementation of these reforms, which had aroused strong opposition from a section of the French colony in Algeria, was, however, prevented by the defeat of the Mendès-France Government on Feb. 4, largely as a result of right-wing opposition to its North African policy (see 14069 A).

The Moslem section of the Algerian Assembly had previously adopted a resolution on Jan. 20 protesting against "illegal searches, arbitrary arrests, inhuman tortures practised on suspects, and the excessive sentences pronounced by the courts," and demanding "complete equality of rights and duties within the framework of French democracy." Full support for this resolution was subsequently expressed on Jan 28 by the majority of the Moslem members of the French National Assembly and the Council of the Republic. The resolution was subsequently presented to M. Mitterand.

Addressing the Algerian Assembly on Feb. 23, M. Soustelle announced that the French Government would make a contribution to the Algerian Budget for the first time in order to cover certain expenses in the field of education and justice, and would also contribute 40,000,000,000 fr. to the investment budget. The credits allocated to agriculture, public works, industrialization, and technical education, he added, would be substantially increased. M. Soustelle subsequently informed the Assembly on March 31 that the French Government had decided to make a grant of 5,000,000,000 fr. to Algeria, of which 900,000,000 fr. would be used for road development, 300,000,000 fr. for the improvement of water supplies, 350,000,000 fr. for improved facilities in rural areas, 1.750,000,000 fr. for school-building, 1,000,000,000 fr. for the development of backward or over-populated areas, and 700,000,000 fr. for the enforcement of the state of emergency.

On April 14 M. Bourgès-Maunoury approved proposals put forward by M. Soustelle whereby the legal minimum wage in Algeria would be raised by an amount almost equal to recent increases granted in France As wage levels in Algeria were much lower than in France, the increases granted to all Algerian workers ranged from 4.90 to 7.40 per cent, compared with increases of 3.50 to 5.40 per cent for French workers It was also announced on April 14 that the Algerian Assembly had approved proposals of financial assistance to the unemployed, and for the establishment of a special fund to combat unemployment.

The co-ordinating committee for North Africa approved on Sept 2 a number of proposals for reforms submitted by M. Soustelle. These included (1) the abolition of State control of Moslem religious foundations and of property owned by them, and the transfer of control to a commissioner appointed by the Governor-General and a commission representing the Moslem community; (2) the teaching of Arabic in State schools, (3) the extension of local self-government; and (4) the admission of more Moslems to all levels of the Civil Service in Algeria.

M. Bourgès-Maunoury's Visit to Algeria.

M. Bourgès-Maunoury made a tour of Algeria from May 26-June 1 during which he visited Algiers, Oran, Orléansville, Tizi-Ouzou (in the Kabylie), Michelet, Tebessa, Batna, Biskra, Bône, and other places.

Addressing the Algerian Assembly on May 26, he stated that the Government was prepared to approve the formation of private defence groups on condition that they operated under the control of the civil and military authorities. The repression of the rebels would not be "blind," but it would be "exemplary and merciless" in dealing with those directly responsible, and *fellaghas* captured with arms would be punished immediately. The re-establishment of order, he added, would be accompanied by measures for the development of new industries and for the gradual application of the Statute of Algeria.

A delegation of mayors of Algerian towns, which was received by M. Bourgès-Maunoury on the same day, presented a resolution demanding the immediate execution of all rebels guilty of offences against persons and property, strict control of the Press, and the dissolution of the Algerian Communist Party and all "separatist elements."

Report of Parliamentary Mission to Algeria.

The report of a French parliamentary mission sent to Algeria by the Defence Commission of the National Assembly was published on June 29. It strongly criticized the contrast between the poverty of the Arab population and the privileged position of the French colony, which the mission regarded as the main cause of the revolt, and also the shortcomings of the administration and the police. The members of the mission, all of whom signed the report, were MM. Pineau and Lejeune (Socialists), M. Jean-Moreau (Ind. Republican), M. de Chevigné (M.R.P.), and M. Jacquet (Gaullist). Their report is summarized below under cross-headings.

The Political Situation. During the past seven months (the report stated) the situation had steadily deteriorated, and now justified the keenest anxiety Although the number of the rebels probably did not exceed 2,500, they were favoured by the nature of the country, which was better suited for ambushes than for regular military operations, and by the attitude of the Moslem population, many of whom, either from sympathy or from fear of reprisals, refused to give information about the rebels or assisted them in their guerrilla operations and propaganda All the rebel leaders seemed to belong to the C.R.U.A.; some relationship probably existed between this body and the U.D.M.A. and M.T.L.D., but it did not appear to have an "organic" character. The moral support of certain of the *ulema* gave the movement "something of the character of a holy war" and increased its influence and prestige among Moslems. The Communist Party, although its influence among the Arabs was limited, had taken advantage of the situation to develop its propaganda. Supplies of arms received from abroad had been few, but trained agitators had entered the country from Tunisia, bringing orders from the heads of the movement in Egypt, and Arabic broadcasts from Cairo and elsewhere had exercised considerable influence Finally, the mission noted that some French settlers had paid large sums of money to the rebels to be left in peace.

The Social and Economic Situation. The social and economic situation, in the mission's opinion, had created in Algeria a particularly favourable ground for the present agitation "Without minimizing in the least France's achievement in North Africa," the report stated, "it must be recognized that this has benefited the European population far more than the Moslems, whose position has possibly improved in absolute value but not, when the prosperity of some is taken into account, in relative value Everything has been done, as a high official of the administration put it, as if the natives were 'shadows,' whilst Frenchmen of metropolitan origin lived and prospered in an artificial security. No man of any feeling can fail to be moved by the poverty which still survives in many parts of Algeria, and which increases proportionately the farther south you go Wages are extremely low In the Oran district an agricultural labourer receives a daily wage of 360 fr., on which he must generally support seven or eight people. He works about 150 days in the year, but he is still a privileged person compared with the host of totally unemployed. Credits for modernization and equipment have mostly been granted to landowners, almost all of them Europeans, to develop highly profitable crops such as vines and early fruit and vegetables. These are export crops, which compete on the French market with an already excessive home production. At the same time, very little has been done for Moslem smallholders, who are solely dependent on the cultivation of poor and badly irrigated land." Credits granted to Europeans, the report pointed out, had often been used for mechanization, which increased rural unemployment, whilst the development of industry was proceeding very slowly. Emphasizing that every unemployed Algerian must be considered a potential rebel, the report declared that "France must make new and greater efforts to improve the living standards of the Moslem population"

As regards the fiscal system, the mission noted that "the taxes paid by the richest section of the population are insignificant. We were informed of the case of the owner of 1,200 hectares in the Oran district, representing a capital of 1,200,000,000 fr, who pays a total of 25,000 fr a year in direct taxes The economic and social development of Algeria in a direction likely to promote friendly feeling between populations of different origins cannot be achieved in such an atmosphere of social and fiscal injustice."

The Administration. During the past ten years (the report went on) the administration had lost touch with a great part of the Moslem population, because "everything proceeds as if administrative boundaries had been drawn up solely in relation to the density of the European population, ignoring the existence of the Moslem population." Owing to the size of the areas for which they were responsible, many administrators never visited remote villages, and in some cases relied entirely on second-hand reports.

The report next called for a complete reorganization of the police system. The abuses which had occurred during the first phase of the repression had inevitably led to dismissals, but as a result certain information networks had been broken up which it was necessary to reorganize. Some senior police officials completely controlled their own information systems, and the resultant quarrels between departments and officials were hindering the struggle against terrorism. The administration of justice was too severe in some cases and too dilatory in others, and the distinction between persons who were guilty and those who were merely suspected was not drawn sufficiently clearly. "The present system," the report added, "is neither just nor efficient."

The Military Situation. Although the number of troops in Algeria appeared out of proportion to the number of rebels, the report pointed out that this was not so, in view of the necessity both to destroy the rebel bands and to protect life and property. The morale of the troops varied among the units engaged, but the mission had observed that "many men, probably under the influence of troops returned from Indo-China, have doubts about the nature of their mission, France's political aims in Algeria, and the attitude of certain of the settlers We discerned fears, more or less avowed, of a repetition of the mistakes committed in Indo-China, of which the French Army is likely to retain a vivid memory"

For military operations the mission recommended a greater use of light columns, supported by helicopters and other slow aircraft rather than by fighter planes, which were too fast for the purposes required Full use should be made of native auxiliaries, although the danger existed that they might desert with their arms. The report

condemned proposals which had been put forward for collective reprisals, such as the taking of hostages and the bombardment of villages, pointing out that "experience in Indo-China has proved that such methods aroused hatred rather than fear of those responsible, and finally turned to the rebels' advantage." This opinion was shared by the Army Command

"It is indispensable and urgent to crush the rebellion, and France must use every means for this purpose," the report concluded. "Most of the comments made in this report are intended less as criticisms of past mistakes than as a warning to the Government, the administration, and the Army not to repeat them Political, economic, and social measures must be employed side by side with police and military operations, and with an equal sense of urgency Both must be energetic, must disregard private interests when the general interest is at stake, and in certain cases must be of a revolutionary character in relation to previous methods Justice and force, the latter at the service of the former, are for the moment the only cards for France to play in Algeria"

Agitation among Algerians in France.

Political unrest among the large Algerian colony in France (many of whom are supporters of the M.T.L.D.) gave rise to a number of incidents from April onwards. Demonstrations organized by the M.T.L.D. took place at Lille on May 1, whilst serious rioting occurred in Paris on July 30. Cafés in Paris and some provincial towns frequented by Algerians were wrecked on a number of occasions in April, May, and June; these raids were believed to be the result of a feud between rival Algerian organizations formed after the split inside the M.T.L.D. Mass arrests of Algerians took place on Sept. 5, about 50 being detained in Paris, 300 in Marseilles, and 200 in Lyons. A communiqué subsequently issued by the Ministry of the Interior stated that a propaganda campaign was being conducted among Algerians in France, and that funds were being collected for terrorist organizations, often by threats.

Ban on Algerian Communist Party.

A decree was issued in Paris on Sept 13 ordering the dissolution of the Algerian Communist Party, which had expressed support for the rebels and for the Algerian nationalist movement. [Under French law any advocacy of Algerian nationalism is punishable as an offence against the integrity of France, since Algeria is legally part of the metropolitan territory.] On the previous evening raids had been carried out on the offices of the two Communist newspapers in Algeria (*Liberté* and *Alger Républicain*) and on the homes of party members, and a large quantity of documents seized.
(Le Monde, Paris - Le Figaro, Paris) **(13923 A; 14021 E.)**

Note on Population. The provisional results of a census taken in the autumn of 1954, which were published on July 4, showed that the population of Algeria had increased from 8,682,000 in 1948 to 9,530,000 Since 1921 the population had increased by 65 per cent, and the annual birthrate had risen from 0.4 per cent to 1.6 per cent, one of the highest in the world The census gave the number of Algerians working in France as 162,000, but this figure was believed to be a considerable under-estimate The population of Algiers had increased from 309,000 in 1948 to 355,000 (including 162,000 Moslems), that of Oran from 249,000 to 292,000; that of Constantine from 114,000 to 144,000, and that of Bône from 101,000 to 112,000. The Moslem element in the population of the nine largest towns had more than tripled between 1921 and 1954 and now formed the majority of the urban population, which had increased more rapidly than that of the country districts.—(Le Monde, Paris)

A. PAKISTAN. — Commission on Marriage and Family Laws. - Dispute over Mr. Mohammed Ali's Second Marriage.

It was announced in Karachi on Aug. 4 that the Government of Pakistan had set up a commission to investigate whether "the existing laws of marriage, divorce, maintenance, and other matters . . . require modification in order to give women their proper place in society, according to the fundamentals of Islam." Its members comprised three men and three women in addition to the chairman, Khalifa Shujayddin.

The setting-up of such a commission had been promised by Mr. Mohammed Ali (the former Prime Minister) on June 1, following a dispute between Mr, Mohammed Ali and various Pakistani women's organizations, especially a newly-formed League for Women's Rights headed by the wife of Chaudhry Mohammad Ali (then Minister of Finance and now Prime Minister). The dispute arose after Mr. Mohammed Ali had married a second wife (Miss Alia Saadi, a Canadian-born Lebanese) on April 2, and had proposed making her the "first lady" of the country in place of his first wife, Hamida. As a result of widespread protests by Pakistani women against polygamy in general, and against Mr. Mohammed Ali's second marriage in particular, Mr. Ali gave an assurance on May 15 that he would treat his two wives equally, whereupon the League for Women's Rights called off a threatened social boycott against his second wife.

The Commission is expected to submit its report within six months.—(Pakistan High Commissioner's Office, London - Times - Daily Telegraph - Manchester Guardian)

B. UNITED KINGDOM. — Civil Defence Directors.

The Home Secretary announced on Aug. 16 the names of the 11 officers selected for appointment to the new posts of Regional Directors of Civil Defence in each of the regions of England, and to the post of Director of Civil Defence for Wales. With one exception, all were senior serving or retired officers of the three Services. They were:

London—Captain K. L. Harkness, R.N. (retd.), principal C.D. officer for the London region since May 1954, and formerly Civil Defence Officer for Portsmouth (1952-54).

Northern (Newcastle-upon-Tyne)—Major-General S. Lamplugh, lately of the British Army of the Rhine.

North-Eastern (Leeds)—Mr. J. R S. Watson, a Judge of the Sudan High Court since 1947.

North Midland (Nottingham)—Rear-Admiral A. D. Torlesse, who commanded the atomic weapon tests in the Monte Bello Islands in 1951-52.

Eastern (Cambridge)—Lieut.-General Sir George Wood, lately Chief of Staff of the NATO Defence Production Board

Southern (Reading)—Rear-Admiral W L G Adams, who served in the Royal Australian Navy in 1939-43 and was subsequently O C., Coastal Forces Base, Dover.

South-Eastern (Tunbridge Wells)—Lieut.-General Sir Alexander Cameron, Senior Air Defence Officer at SHAEF in 1944, in which capacity he was responsible for counter-measures against the German V-1 and V-2 attacks.

South-Western (Bristol)—Major-General J. S. Lethbridge, lately Commandant of the Civil Defence Training College. He was Chief of Staff to the 14th Army in Burma (1944-45), and subsequently Chief of Intelligence in Germany

Midland (Birmingham)—Air Marshal Sir Lawrence Pendred, A O.C, Flying Training Command.

North-Western (Manchester)—Lieut.-General E. N Goddard, lately G.O.C.-in-C., Southern Command, India

Wales (Cardiff)—Major-General F. R G. Matthews, Director of Infantry at the War Office.

The duties of the Regional Directors will include liaison with Army commands; the planning of training exercises, including joint exercises between the armed forces and the local Civil Defence Corps; and co-ordination of all C.D. activities in the respective regions.—(Daily Telegraph - Manchester Guardian)
(Prev. rep. Civil Defence, 14331 C; 13931 A.)

C. NEW ZEALAND. — Historic Places Trust.

The first appointments were announced in August to the Historic Places Trust, which, under legislation enacted in 1954 (the Historic Places Act), will preserve and record sites, buildings, and objects of national or local importance in New Zealand, whether historic, literary, scientific, or educational. The Trust includes representatives of the University of New Zealand, the Royal Society of New Zealand, the N.Z. Library Association, the N.Z. Institute of Architects, the Art Galleries and Museums Association, historical and early settlers' associations, and the Maori community. The Secretary for Internal Affairs (Mr. A. G. Harper) and the Director-General of Lands (Mr. D. M. Greig) are *ex-officio* members, whilst the chairman of the Trust is Mr. Charles M. Bowden, formerly Minister of Industries and Commerce.
(Directorate of Information Services, Wellington)

D. RHODESIA AND NYASALAND FEDERATION. — Population Statistics.

The population of the Federation was officially estimated at 7,071,600 on June 30, 1955, compared with 6,876,600 on June 30, 1954. The Central African Statistical Office stated that the European population had increased during the past year from 220,200 to 233,600 and the African population from 6,630,000 to 6,810,000, whilst the number of people of other races in the Federation had risen from 26,400 to 28,000. On June 30, 1955, there were 2,398,700 people in Southern Rhodesia (166,000 Europeans, 2,220,000 Africans, 12,700 other races), 2,128,300 in Northern Rhodesia (62,000 Europeans, 2,060,000 Africans, 6,300 other races), and 2,544,600 in Nyasaland (5,600 Europeans, 2,530,000 Africans, 9,000 other races).
(Federal Information Department, Salisbury) **(13250 C.)**

E. UNITED STATES. — Deportation of Erich Gimpel.

The U.S. Justice Department announced on Aug. 12 that Erich Gimpel, the former Nazi spy, had been released from prison and deported to Germany. Gimpel had been sentenced to death on charges of espionage after he and William Colepaugh (a U.S. national) had been landed in the U.S.A. from a German submarine in 1944, but President Truman subsequently commuted the death sentences on both Gimpel and Colepaugh to life imprisonment. Colepaugh, whose sentence was later reduced to 30 years, is still in prison.

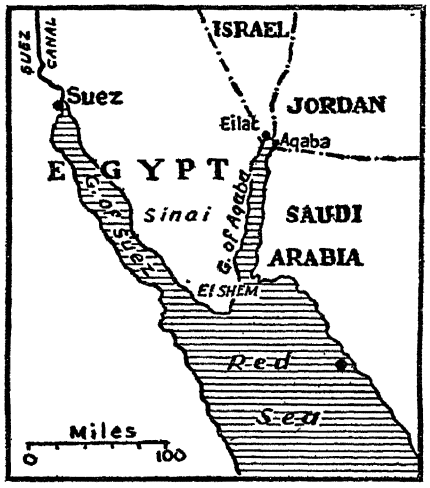
A. EGYPT. — New Regulations for Control of Shipping in Gulf of Akaba. - Protest by Israel.

New regulations for the control of shipping entering the Gulf of Akaba were issued by the Egyptian Government on Sept. 11. They were designed to avoid further incidents in the area, such as had occurred in July, when the British ship *Anshun* was shelled by Egyptian shore batteries (see 14335 A), and to maintain the Egyptian blockade of the Israeli port of Eilat, at the head of the Gulf.

The regulations, issued by the Egyptian War Ministry, laid down that (1) ships intending to enter the Gulf of Akaba would have to give notice 72 hours before "entering Egyptian territorial waters"; (2) permits would have to be obtained from the "Regional Office for the Economic Boycott of Israel," at Alexandria; (3) northbound ships sailing up the Red Sea and wishing to enter the Gulf would have to apply direct to the Alexandria office, (4) southbound ships sailing through the Suez Canal and bound for the Gulf would have to give notice to the Egyptian Customs either at Port Said or Suez; (5) if a vessel failed to enter the Gulf within 48 hours of receiving permission to do so, a fresh application would have to be made; (6) applicants would have to give the vessel's name and nationality, and state whether she was carrying cargo or passengers.



The Gulf of Akaba, showing the Jordanian port of Akaba and the Israeli port of Eilat. (*Manchester Guardian*)

A spokesman of the British Foreign Office stated on Sept. 12 that the Gulf of Akaba was regarded as an international waterway with free access to the shipping of all nations, and pointed out that Egypt was only entitled to enforce such control measures as Customs and public health regulations. On the following day the Israeli Foreign Office addressed a memorandum to representatives of maritime Powers in Israel declaring that the new Egyptian regulations constituted a "serious infringement of the rights of all countries to free and unhindered passage through this international channel" and would "aggravate the danger of incidents prejudicial to peace and security in the area."

The Israeli memorandum declared that the Egyptian regulations, as they affected passage to the port of Eilat, constituted a violation of the Egyptian-Israeli armistice agreement, of the U.N Charter, of various resolutions of the Security Council, and of the general principles of international law governing freedom of the seas. It rejected the Egyptian regulations as "illegal," and expressed Israel's determination to "protect the exercise of rights of free passage through this international channel at whatever time and by whatever methods it will see fit"

The Gulf of Akaba (see accompanying map), at the head of the Red Sea, is bordered by four countries—Egypt, Israel, Jordan, and Saudi Arabia. The Israeli port of Eilat and the Jordanian port of Akaba are adjacent to each other at the head of the Gulf, the frontier between Israel and Jordan running between the two ports. The entrance to the Gulf is controlled by Egyptian shore batteries on the coast of the Sinai pensinula. (Times - Manchester Guardian - New York Herald Tribune)

(Prev. rep. Gulf of Akaba, "Anshun" Incident, 14335 A.)

B. UNITED KINGDOM. — Local Authority Loans. - Further Increase in Interest Rates.

Further increases in the interest rates on loans advanced to local authorities from the Local Loans Fund were announced by the Treasury on Sept. 6, as follows: up to five years, from 4⅛ to 4¼ per cent; for longer periods, from 4¼ to 5 per cent. This was the fourth increase in local loan rates since the rise in the Bank rate to 4½ per cent, and was a further step in the Chancellor's "credit squeeze" policy.

(Times - Daily Telegraph) **(Prev. rep. 14359 A.)**

C. UNITED KINGDOM. — Annexation of Rockall.

The Admiralty announced on Sept. 21 that the Atlantic islet of Rockall, 250 miles west of the Hebrides, had been formally annexed to the United Kingdom on the authority of the Queen, the annexation having been carried out by a landing-party from the survey ship H.M.S. *Vidal*. The Admiralty announcement stated that the annexation was necessary since Rockall was "within the sector of the sea which is likely to be within the orbit of the projected guided missile range in the Hebrides" (see 14352 B). A spokesman of the Ministry of Defence pointed out that Rockall had hitherto not belonged to any nation, and that it had been formally claimed by the Crown to avoid the possibility of embarrassing counter-claims once the Hebridean guided missile project was under way. He added: "Although it is unlikely, it might have been possible for some other Power to use it [Rockall] as a post from which to observe our guided missiles, and we had to make sure of it."

The commanding officer of H.M.S *Vidal* (Commander Richard Connell, R.N.) disclosed on Sept 23 that Rockall had been annexed on Sept 18, when four men were landed on the islet from the *Vidal* by helicopter—Lieut.-Commander Desmond Scott (in charge of the landing party), two Royal Marine Commandos, and Mr. James Fisher, a zoologist and ornithologist The landing party spent three hours on Rockall, during which a prefabricated flagstaff was erected, the Union Jack hoisted, and a brass plaque cemented into the rock recording the annexation. Lieutenant-Commander Scott took formal possession of Rockall in the name of the Queen, a 21-gun salute being fired by H.M.S *Vidal* during the annexation ceremony. The helicopter made 11 flights between H.M.S *Vidal* and Rockall picking up, landing, and taking off men and gear Mr Fisher collected a number of botanical, zoological and geological specimens, including lichens, periwinkles, and 21 lb. of rockallite, the granite-like substance of which the island is composed

The uninhabited islet of Rockall is 83 feet wide and rises almost sheer from the ocean to a height of 70 feet. It is 191 miles west of St. Kilda, the outermost island of the Hebrides, and 289 miles from the nearest point on the Scottish mainland, Ardnamurchan Point. It was first charted four centuries ago, and, so far as is known, landings had been made on only four occasions prior to its annexation—in 1810, 1862, 1921, and 1948. Rockall gives its name to one of the sea areas used for the B.B.C.'s weather broadcasts. (Times - Daily Telegraph)

(Prev. rep. Hebrides Missile Range, 14352 B.)

D. UNITED STATES. — Religious Denominations.

Statistics of religious denominations in the United States were published on Sept. 5 by the National Council of the Churches of Christ in the U.S.A., a federation of 30 Protestant and Eastern Orthodox bodies with a total membership of 35,000,000. The statistics, which related to 1954, showed that church or temple membership (i.e. membership of both Christian and non-Christian denominations) totalled over 97,000,000 in that year, an increase of over 2,600,000 on 1953, and that 60.3 per cent of all Americans were church or temple members, an increase of 2.8 per cent on the previous year and of nearly 12 per cent on 1940. The figures showed that the number of Protestants in the U.S.A. had increased by nearly 20,000,000 since 1940, and the number of Roman Catholics by 11,000,000 since the same year. In 1954, 35.3 per cent of the population was Protestant and 20 per cent Roman Catholic, the comparable percentages in 1940 having been 28.7 and 16.1 per cent respectively.

Membership of the six major faiths in the United States for the last two years was given as follows:

	1954	1953
Protestant	57,124,142	55,837,325
Roman Catholic	32,403,332	31,476,261
Jewish	5,500,000	5,000,000
Eastern Orthodox	2,024,319	2,100,171
Old Catholic and Polish National Catholic	367,918	366,088
Buddhist	63,000	63,000
Total	97,482,711	94,482,711

The Baptist churches, with 18,448,621 members, were the largest of the Protestant denominations in 1954, followed by the Methodist Church, with 9,202,728 members.

(New York Times) **(Prev. rep. 12105 A.)**

E. ISRAEL. — Currency Devaluation.

The official rate of exchange of the Israeli pound was changed on July 1 from £I.2.80 = £1 sterling to £I.5.040 = £1 sterling, and from £I.1 = $1 (U.S.) to £I.1.800 = $1 (U.S.)

(Samuel Montagu & Co. Ltd., London)

SEPTEMBER 24—OCTOBER 1, 1955

A. ARGENTINA. — Overthrow of President Perón. - Revolt by Armed Forces. - General Lonardi installed as Provisional President. - Ending of Peronista Regime. - General Perón offered Asylum in Paraguay.

The Peronista regime, which had been in power for ten years, was overthrown by a four-day revolt of the Argentine armed forces on Sept. 16-19. President Perón himself, after announcing his resignation, took refuge on a Paraguayan gunboat then in Buenos Aires harbour, whilst General Eduardo Lonardi, the leader of the uprising in Córdoba, was installed on Sept. 23 as provisional President of Argentina and subsequently formed a new Cabinet after dissolving the Argentine Congress. The stages of the revolt and the overthrow of President Perón are described below.

Simultaneous and apparently concerted uprisings against the Perón Government took place at a number of centres in the provinces of Córdoba, Corrientes, and Entre Rios on Sept. 16, when units of the Argentine armed forces seized control of Córdoba (the third city of Argentina), Curuzu-Cuatia (an Army base 550 miles north of Buenos Aires), the Rio Santiago naval base (45 miles east of Buenos Aires, on the Plate estuary), the port of Bahia Blanca (400 miles south of the capital), and the naval base of Puerto Belgrano, near Bahia Blanca. Broadcasts from the Government radio in Buenos Aires claimed that the revolt was confined to Córdoba, Curuzu-Cuatia, and Puerto Belgrano, that Government troops were counter-attacking the insurgent bases, and that the rebellion was being "rapidly suppressed." Despite these claims, however, the insurgent radio in Córdoba declared that the military and naval garrisons at all the above-mentioned centres had risen against the Peronista regime, that many Army, Navy and Air Force units in other parts of the country were also going over to the insurgents, and that the whole of southern Argentina, as well as other areas, were under the control of a provisional Government which had been set up in Córdoba. The city of Córdoba was proclaimed the provisional capital of Argentina throughout the period of the uprising

Shortly after the outbreak of the revolt the Perón Government extended the state of siege then in force in Buenos Aires (see 14407 A) to cover the whole country, and appointed the Army Minister, General Franklin Lucero, as "commander-in-chief of the forces of repression"—a post which he had also assumed after the uprising on June 16 (see 14277 A). During the next 48 hours the Perón Government imposed a censorship on all despatches by foreign correspondents and banned all communications other than official Government messages. As a result of these measures the situation in Argentina remained obscure on Sept. 17-18, and the only information to reach the outside world was contained in the claims—often contradictory—broadcast by the Government and insurgent-controlled radio stations.

Despite frequent Government communiqués claiming that the revolt was being suppressed, that insurgent resistance had ceased at various centres, and that the bulk of the armed forces remained loyal to President Perón, it nevertheless became apparent that these claims were without foundation and that, on the contrary, the insurgents were establishing their control in all parts of the country except Buenos Aires. Broadcasts from Córdoba on Sept. 17-18—subsequently substantiated—announced that the garrisons in Rosario (the second city of Argentina), Tucumán, Santa Fé, San Luis, and other important centres had joined the uprising, together with virtually the whole of the Argentine Navy, including the 27,000-ton battleship *Rivadavia* and a number of cruisers and destroyers. Two Argentine destroyers, the *Cervantes* and *La Rioja*, arrived on Sept. 17 at Montevideo (the Uruguayan capital), with five men dead and 32 wounded, after having been bombed in the Plate estuary by aircraft loyal to the Perón Government.

The revolt ended to all intents and purposes on Sept. 19, when President Perón resigned and truce talks were agreed upon between the insurgent leaders and representatives of a military *junta*, headed by General Domingo Molina, which assumed temporary control in Buenos Aires after the President's resignation. On the previous day an insurgent cruiser, the *Nueve de Julio*, had shelled the docks and oil installations at Mar del Plata (about 350 miles south-east of Buenos Aires), after which the insurgent radio threatened that the Navy would bombard Buenos Aires and the town of Eva Perón (near the Rio Santiago base) unless President Perón resigned unconditionally by 10 a.m. on Sept. 19. In the early morning of that date President Perón offered to negotiate with the insurgent leaders, who, however, insisted that they would only begin negotiations after General Perón had unconditionally resigned from the Presidency. Later in the morning a signed statement by President Perón announcing his resignation was read over Buenos Aires radio by General Lucero, who invited the insurgent leaders to the capital to discuss truce terms. The insurgent radio, however, suggested that the truce talks should be held on board a warship, and offered to send a vessel to convey General Lucero to such a meeting; alternatively, it was suggested that the discussions should be conducted over the radio network so that the public could be aware of what was going on. During the afternoon a broadcast from Buenos Aires announced that General Lucero had resigned both as Minister of War and as C.-in-C. of the "forces of repression." Later in the day the insurgent radio at Puerto Belgrano announced that the *junta* in Buenos Aires had agreed that the truce talks should be held at sea, and had asked the Navy to send a warship to pick up emissaries who would negotiate with the leaders of the uprising.

By agreement between the insurgent authorities and the *junta* in Buenos Aires, a truce in the hostilities came into effect throughout Argentina at midnight on Sept. 19-20. During the following day discussions between insurgent leaders—among them Admiral Isaac Rojas and General Juan José Uranga—and representatives of the *junta* were held on board the cruiser *La Argentina*, as a result of which the *junta* accepted the insurgents' demands for the restoration of peace: the unconditional resignation of President Perón (which had already taken effect), the unconditional surrender of the remaining Government forces, and the formation of a provisional Government by General Eduardo Lonardi. An agreement to this effect was signed in the early hours of Sept. 21.

Meanwhile General Perón, after having announced his resignation through General Lucero, had taken refuge on Sept. 19 on board the Paraguayan gunboat *Paraguay*, which was then in Buenos Aires harbour. According to broadcasts from Asunción, and reports by foreign correspondents, General Perón had asked the Paraguayan Ambassador in Buenos Aires (Dr. Juan Chavez) for asylum, which Dr. Chavez had agreed to grant under international law; the Ambassador had then accompanied General Perón to the *Paraguay*, and had subsequently informed the military *junta* that the ex-President had been given asylum on that vessel.

In his message of resignation, which was read by General Lucero, President Perón had suggested that the Argentine Army should "take over the Government and the restoration of order before it is too late." The message was addressed "to the Army and people" and was worded, in part, as follows:

"... We have tried by every means to respect the Constitution and the laws, and to have them respected by others. We have served and obeyed the interests and the will of the people. Nevertheless, neither the Constitution nor the laws can be above the nation itself and its sacred interests. If we have had to face a struggle, it has been contrary to our desire and forced upon us by the reactionaries who prepared and unleashed it. The responsibility falls exclusively on them, since I have only fulfilled the mandate of the people.

"Several days ago I offered to leave the Government if that would be a solution to the present political problems (see 14407 A), but circumstances did not allow me to do so I continue to think now as I did then, and insist on offering that solution."

After mentioning that the Vice-President, Admiral Teisaire, had also tendered his resignation, the message continued: "Dispassionate and impartial intervention is needed to solve the problem. I do not believe there is a man in the country with sufficient qualifications to do so. This leads me to think that it should be done by the institution which is, has been, and will be a guarantee of honesty and patriotism The Army should take over the Government and the restoration of order before it is too late That is the best way out. . I, who deeply love the people, have suffered profoundly. I would not wish to die without making a last attempt to secure their peace, tranquillity, and happiness. While my fighting spirit moves me to struggle, my patriotism and my love for the people impel me to make every personal renunciation. ..."

General Lonardi, in his capacity as provisional President of Argentina, issued decrees from Córdoba on Sept. 21-22 dissolving both Houses of the Peronista-dominated Argentine Congress; ordering that the provinces of Presidente Perón and Eva Perón should revert to their former names of El Chaco and La Pampa, and the town of Eva Perón to its former name of La Plata; and appointing General Uranga as Director of National Security and General Bengoa as Chief of Federal Police. [General Bengoa, commander of the troops in Entre Rios province, had been in prison until a few days earlier for his participation in the uprising of June 16.] In addition, General Lonardi ordered the immediate release of Admiral Anibal Olivieri, Admiral Toranzo Calderón, and all other officers who had been imprisoned in connexion with the June uprising, as well as of all political prisoners.

General Eduardo Lonardi (59), an artillery expert, had long been a military opponent of the Peronista regime, but had hitherto played no part in politics. He resigned from the Argentine Army in August, 1951, after protesting against the Peronista campaign to nominate the late Senora Eva Perón for the Vice-Presidency in that year. In collaboration with General Uranga, Admiral Rojas, and other leaders of the armed forces he directed the uprising which overthrew the Perón Government, and commanded the insurgent forces at Córdoba.

On Sept. 23 General Lonardi arrived in Buenos Aires from Córdoba to be formally sworn-in as provisional President of the Argentine Republic. He was greeted with the greatest enthusiasm by vast crowds—estimated at over half a million people—gathered in the Plaza de Mayo and adjoining streets, the demonstrations being the biggest ever known in the Argentine capital. Among those who welcomed him at the *Casa Rosada* (Government House) were Cardinal Copello (the Primate of Argentina), other ecclesiastical dignitaries, and leaders of the armed forces. A feature of the celebrations was the demonstration of unity between Argentina and Uruguay, in contrast to the strained relations which had existed between the two countries during the Peronista regime; the flags of both countries were flown in the Argentine capital, whilst Uruguayan radio stations joined with the Argentine network in relaying commentaries of the rejoicings in Buenos Aires.

In a speech from the balcony of the *Casa Rosada* after his installation as provisional President, General Lonardi promised the immediate restoration of civil liberties, including full freedom of the Press and of public opinion, and announced that the new Government would seek a settlement of the religious question through a concordat with the Vatican. He announced also that elections for a new Congress would be held after the electoral registers had been thoroughly checked to ensure that they had not been "framed" by the Peronistas. In the course of his speech General Lonardi announced that the new Government would annul a contract, made in April last by the Peronista Government, under which the Standard Oil Company of California had been granted concessions to exploit petroleum deposits in Patagonia. He explained in this connexion that Argentina would refine and market the oil herself for her own needs, and that Standard Oil of California would receive one-half of the profits and would make an initial investment of $13,500,000. After declaring that the new Government would be based on the principles of liberty and honour, and commenting that "the dictator who preceded us evidently had other ideas," General Lonardi promised that "we shall seek true justice in a temporary tenure of government which will be as short as possible."

All outward signs of the former regime, such as statues and busts of General and Eva Perón, commemorative plaques and inscriptions, etc., were torn down in Buenos Aires and other cities amidst public rejoicings, whilst all street and other names reminiscent of the Peronista era were altered; e.g., the liners *Presidente Perón*, *Eva Perón*, and *17 de Octubre* (the date of General Perón's accession to power) were renamed the *Argentina*, *Uruguay*, and *Libertad* respectively. All Argentine newspapers—including *La Prensa*, which the Peronistas had seized in 1951 from the Paz family, its former owners—appeared without the Peronista captions and headings which they formerly bore.

A desperate but ineffective "last-ditch" stand was attempted in Buenos Aires on Sept. 19-20 by 400 to 600 heavily-armed members of the *Alianza Libertadora Nacionalista*, the Fascist-type militia of the Peronista Party, whose members had been organized on "storm troop" lines and had been immune from arrest under the Perón regime. Refusing to surrender to the Government forces, they barricaded themselves in their headquarters and opened fire on Government troops with machine-guns and other automatic weapons. The area was cordoned off by the Argentine Army, which went into action against the Peronistas with tanks and infantry. The defenders suffered very heavy casualties in killed and wounded, and finally surrendered after the building had been wrecked by artillery fire.

An attempted Peronista uprising in Rosario on Sept. 23-24 was quelled by infantry, tanks, and aircraft, which dropped tear-gas bombs on the demonstrators. Several persons were killed and a large number arrested, the city being placed under a curfew. Apart from the incidents in Buenos Aires and Rosario, little or no resistance was offered by Peronista supporters in other parts of Argentina. Total casualties in the revolution were not officially published, but unofficial estimates placed the number of dead at about 500.

Admiral Isaac Rojas, who commanded the naval forces during the uprising, was sworn in on Sept. 25 as Vice-President of Argentina in succession to Admiral Teisaire. During the next few days the following Cabinet appointments were announced by President Lonardi:

Dr. Eduardo Busso	Interior and Justice.
Dr. Mario Amadeo	Foreign Affairs.
General Leon Justo Bengoa	Army.
Rear-Admiral Teodoro Hartung	Navy.
Vice-Commodore Ramón Amado Abrahim	Air Force.
Dr. Cesar Augusto Bunge	Trade.
Señor José Blas Paladino	Public Works.
General Juan José Uranga	Transport.
Dr. Atilio dell'Oro Maini	Education.
Dr. Ernesto Rottjer	Health and Welfare.
Dr. Eugenio José Folcini	Treasury and *ad interim* Finance.
Dr. Alberto Mercier	Agriculture and Livestock.
Sr. Benito Cerruti Costa	Labour.
Sr. Horacio Morixe	Industry.

All the new Ministers have distinguished records in their own fields, though most of them had never before taken any part in politics or held ministerial office. Dr. Busso (the Minister of the Interior), one of Argentina's leading lawyers, had refused in 1945 to be appointed to a high professorial post by the Perón Government on the ground that his title to teach law would be "derived from those who represent the very negation of law." Dr. Amadeo, who has described himself as a Catholic nationalist, held important appointments in the Argentine diplomatic service prior to General Perón's accession to power. After the uprising of June, 1955, he wrote an open letter to the then Under-Secretary of the Army urging him to take up arms "against the tyrant," and subsequently went into hiding until General Perón's overthrow.

Vice-President Rojas took a new oath in which he swore to "fulfil the mandate of the revolution of liberation" and to defend democracy and freedom. All members of the Cabinet took the traditional oath (abolished under the Peronista regime) containing the words, "Before God, the country, and the Holy Gospels."

At a press conference on Sept. 27, President Lonardi described himself as "a soldier, a Catholic democrat, and a friend of social justice," and expressed the hope that Argentina would never again fall under a dictatorship. After declaring that the new Government aimed at restoring democracy in Argentina, he pointed out that the date of Presidential and Congressional elections would depend on the time necessary to put the electoral registers in order. He added that the new Government would not interfere with the General Confederation of Labour, that the workers' rights would be respected, and that the financial irregularities of the former regime would be investigated.

The secretary-general of the General Confederation of Labour (Señor de Pietro) declared in a broadcast on Sept. 25 that the new Government had given the following assurances to the Confederation: (1) that General Perón would enjoy full guarantees of the right of asylum, (2) that all social benefits and collective bargaining agreements would be honoured; (3) that the rights of the Confederation and of its affiliated unions would be respected; (4) that the Government "would not modify the situation" of the newspaper *La Prensa* [which, after its forcible acquisition by the Peronista Government in 1951, had been made the official organ of the General Confederation of Labour], (5) that all measures taken in the provinces against various unions would be reviewed; (6) that no injunction would be issued against the Confederation itself. In the light of these assurances, Señor de Pietro called upon all workers to remain quietly in their jobs and to refrain from strikes or demonstrations.

The new Government confirmed on Sept. 25 that ex-President Perón was on board the Paraguayan gunboat *Paraguay*, in Buenos Aires harbour. The announcement said that the former President had sought asylum on board a warship of a friendly country, and gave an assurance that the traditional right of asylum would be respected. On the following day a second Paraguayan gunboat, the *Humaita*, arrived at Buenos Aires to embark General Perón from the *Paraguay*, which was undergoing repairs at the time of the uprising and was not yet ready to sail. General Perón's departure for Paraguay was, however, delayed by a dispute between the Argentine and Paraguayan Governments as to the conditions under which he would be granted a safe-conduct to leave Argentina. Although no official statement was issued, it was understood that the Argentine Government, before giving the ex-President a safe-conduct, had asked for an assurance that he would not be allowed to stay permanently in Paraguay, since his presence in a neighbouring country might cause unrest in Argentina. The Paraguayan Government, on the other hand, was understood to have taken the view that in giving such an assurance Paraguay would be yielding her sovereignty and would also be contravening the traditional right of political asylum recognized by all Latin American countries. As a result of this dispute, General Perón was still on board the *Paraguay* in Buenos Aires harbour at the beginning of October.

It was announced in Buenos Aires on Sept. 25 that several of General Perón's closest colleagues had been arrested, among them Major Carlos Aloe, the former Governor of Buenos Aires Province, and his brother, Señor Valentin Aloe. It was stated that the Aloe brothers had been captured while attempting to escape by car across the Paraguayan frontier, and that a search of their luggage had shown that they had fled with 16,000,000 pesos in notes (approximately £400,000) and an unspecified sum in U.S. dollars. It was

subsequently reported that Admiral Teisaire (the former Vice-President), Señor Luis Cornes (the former Navy Minister), and a number of former Peronista deputies had also been placed under arrest

The first country to announce its recognition of the new Argentine Government was Uruguay, which did so on Sept. 23. During the next few days recognition was also accorded by the United States, Great Britain, the Vatican, Spain, Italy, Switzerland, Brazil, Chile, Peru, Ecuador, and Venezuela.

A. ORGANIZATION OF CENTRAL AMERICAN STATES. — First Formal Conference. - Election of Secretary-General.

The Organization of Central American States held its first formal conference at Antigua (Guatemala) on Aug. 18-24 under the chairmanship of Señor Domingo Goicolea, the Guatemalan Foreign Minister In addition to Guatemala, the four other member-countries were represented by their Foreign Ministers: Dr. José Guillermo Trabanino (El Salvador); Dr. Oscar Sevilla-Sacasa (Nicaragua); Señor Esteban Mendoza (Honduras); and Señor Mario J. Esquivel (Costa Rica). Panama, which declined an invitation to join the group, was represented by observers.

Although the Organization of Central American States had been formed in 1951 (see 11830 B) it had run into immediate difficulties as a result of a Salvadorean proposal that it should approve an anti-Communist resolution This was opposed by the then pro-Communist Guatemalan Government, and after a number of post-ponements of the Organization's first meeting, Guatemala withdrew from the Organization in April 1953 (see 13465 A) After the over-throw of the pro-Communist regime, however, Guatemala rejoined the Organization and adhered to the anti-Communist resolution The conference nevertheless again had to be postponed as a result of the dispute between Costa Rica and Nicaragua in January, 1955 (see 14048 A).

The conference adopted a number of resolutions designed to promote economic, cultural and social co-operation between the member-countries, including one setting up a Council of Culture and Education. It also agreed on the setting-up of a committee of jurists to study the codification of Central American legislation, and passed a budget for the Organization providing for an annual expenditure of $125,000. Dr. José Guillermo Trabanino was elected the first Secretary-General of the Organization of Central American States.

B. DENMARK. — Cabinet Reorganization.

The following changes and appointments in the Danish Cabinet were announced in Copenhagen on Aug. 30: (1) Hr. Ernst Christiansen as Minister without portfolio, with special responsibility for matters relating to the United Nations and the Council of Europe; (2) Hr. Kai Lindberg as Minister of Public Works in succession to Hr. Carl Petersen; (3) Hr. Johannes Kjaerbol, hitherto Minister for Home Affairs, as Minister for Greenland, whilst at the same time remaining Minister for Housing, a portfolio he had held concurrently with that of Home Affairs; (4) Hr. Carl Petersen, the former Minister of Public Works, as Minister for Home Affairs *vice* Hr. Kjaerbol.

The Cabinet remained, as hitherto, recruited solely from the Social Democratic Party. Of its two new members, Hr. Christiansen is editor of the newspaper *Social Demokraten* and Hr. Lindberg is a leader of the Danish trade union movement. The Prime Minister, Hr. H. C. Hansen, remained concurrently Minister of Foreign Affairs, but relinquished some of his duties in this connexion—those concerning Denmark's relations with the U.N. and the Council of Europe—to Hr. Christiansen.

C. GERMANY. — Release of ex-Admiral Räder.

Ex-Admiral Erich Räder (79), C.-in-C. of the German Navy from 1935 to 1943, was released from Spandau prison (Berlin) on Sept. 26 after having served nine years of the life term to which he was sentenced by the International Military Tribunal at Nuremberg in 1946. An announcement by the prison governors stated that the British, French, Soviet, and U.S. Governments had agreed to release Räder from Spandau "on account of his advanced age and the state of his health." Räder had been found guilty at Nuremberg of "planning and waging aggressive war and carrying out unrestricted submarine warfare, including the sinking of unarmed neutral merchant ships."—(Times - Manchester Guardian) **(Prev. rep. 13989 A.)**

D. LITERATURE. — Book Selections, August and September.

Selected books published in Great Britain and the United States are given below:

Great Britain. Balchin, Nigel—"The Fall of the Sparrow." (Collins, 12s. 6d.)
Bryher—"Roman Wall" A Historical Novel of the Roman Empire (Collins, 10s 6d)
Burnham, Lord—"Peterborough Court The Story of the *Daily Telegraph*" (Cassell, 18s)
Craig, Gordon—"The Politics of the Prussian Army, 1640-1945." (Oxford University Press, 50s)
Crowell, Norton B.—"Alfred Austin, Victorian" (Weidenfeld & Nicolson, 18s.)
Elton, G R.—"England under the Tudors" (Methuen, 25s.)

E. UNITED KINGDOM. — Conservative Party. - Mr. Oliver Poole succeeds Lord Woolton in Party Chairmanship. - Mr. Kaberry appointed Vice-Chairman.

It was announced on Sept. 30 that the Prime Minister, in his capacity as leader of the Conservative and Unionist Party, had appointed Mr. Oliver Poole as chairman of the Conservative Party organization in succession to Lord Woolton, who had resigned from the post in June after having held it since 1946.

Mr. Oliver Poole (44) was Conservative M.P. for Oswestry from 1945 to 1950, but did not contest the general election of the latter year owing to pressure of work. A few months after the 1950 election he succeeded Mr. Butler as political head of the Conservative Political Office, and in 1952 was appointed a joint treasurer of the Conservative Party, a post he held at the time of his appointment to the party chairmanship A Lloyd's underwriter, he was educated at Eton and Christ Church, Oxford, served before the war in the Life Guards and the Warwickshire Yeomanry, and during the war saw active service in the Middle East, North Africa, Sicily, and North-West Europe

In a letter to Sir Anthony Eden on June 27, Lord Woolton (who is 72) had asked to be relieved of the party chairmanship, to which he had been appointed by Sir (then Mr.) Winston Churchill, on the ground that "a younger man who is full of vigour" should take over the responsibility for the party organization at the time of the next election. The Prime Minister accepted Lord Woolton's resignation with regret, paid tribute to his "wise counsel and devoted efforts for our cause, which have brought us increasing strength over so many eventful years," and requested him to "continue to give a general oversight to the conduct of our organization" until the appointment of a new party chairman.

It was also announced on Sept. 30 that Sir Anthony Eden had appointed Mr. Donald Kaberry, M.P., Parliamentary Secretary to the Board of Trade, as vice-chairman of the party organization in succession to Mr. John Hare, who had also resigned in June. Both Mr. Poole and Mr. Kaberry (who is 48) will take up their new duties on Nov. 1. Mr. Kaberry will resign his Parliamentary Secretaryship before taking up his new appointment.—(Times - Daily Telegraph) **(Prev. rep. 7994 C.)**

A. UNITED KINGDOM.—Trades Union Congress, 1955.

The 87th Trades Union Congress was held at Southport on Sept. 5-9 under the presidency of Mr. Charles Geddes.

In his presidential address Mr. Geddes dealt primarily with the role of the trade union movement in meeting economic problems He warned trade unionists that they should be on their guard against political developments intended to "save the country's economic fabric by placing the burden of sacrifice entirely on their shoulders," but at the same time stressed that they must be careful not to sow the seeds of future unemployment by over-exploiting the present conditions of full employment. Speaking of assertions that "prices, imports, expenditure, and wages are rising too much in relation to output, exports, and savings," he proposed that T U.C. experts should prepare a report on economic conditions since the war, and that this report, after consideration by the General Council, should be discussed at a special conference of union executives with a view to formulating a national economic policy for trade unions. As regards the Chancellor of the Exchequer's warning that strikes had caused "a serious deterioration in the country's economic situation," Mr. Geddes stressed that whilst trade unions "neither can abolish strikes nor should attempt to do so," the causes of disputes should be removed wherever possible by the proper use of negotiating machinery. He asserted, however, that at present industrial arbitrators were "virtual dictators" against whose decisions there was no appeal, and urged the setting-up of an arbitration tribunal where both sides could seek a second opinion. The disadvantages of "possible delays and frivolous or spiteful appeals," he maintained, would not be "greater than those of the present system, under which decisions affecting perhaps millions of workers are made behind closed doors, and under which there is no appeal against such decisions except a strike"

The principal subjects discussed and resolutions adopted by the T.U. Congress are described below under cross-headings:

Industrial Disputes. The section of the General Council's report dealing with industrial disputes was introduced by Sir Vincent Tewson, general secretary of the T.U.C. It proposed changes in the T.U.C.'s constitution to enable the General Council to intervene in disputes before an actual breakdown in negotiations had taken place, the relevant paragraph reading as follows:

"If there is a likelihood of negotiations breaking down and creating a situation in which other bodies of workpeople affiliated to Congress might be involved in a stoppage of work or have their wages, hours, or conditions of employment imperilled, the General Council may take the initiative by calling representatives of the organization into consultation, and use its influence to effect a just settlement of the differences."

Reviewing the effects of the strikes which had already taken place during 1955, Sir Vincent Tewson emphasized that a strike in one industry inevitably caused unemployment in others; the dock strike, in particular, "could have had the result of throwing thousands of our people on the streets." Full employment, he went on, was not "some sort of inheritance" but must be worked for, and recent inter-union disputes had presented a problem which the T U C. must try to settle. In the past the Council had found that when unions sought its help matters had already gone too far—"the baby had gone down with the bath-water." It did not seek to "tie the unions down with a hidebound constitution," and there was no question of destroying the autonomy of individual unions or assuming dictatorial powers All the General Council wanted was the chance to take the initiative, and the real issue was "whether Congress will trust the General Council's good sense"

In the ensuing discussion, Mr. Frank Foulkes (Electrical Trades Union) moved the reference back of the proposals, saying that they would "make it impossible for unions to fight disputes to a finish" Mr. J. Campbell (N.U.R.), seconding the reference back, maintained that the proposals would "make it easy for unscrupulous employers to create a climate of deadlock, knowing that the General Council would intervene" However, after Mr Bryn Roberts (National Union of Public Employees) had argued that the proposals would strengthen the General Council's influence and "enable it to become a real trade union Cabinet," the E.T.U. motion was defeated on a card vote by 4,842,000 votes to 3,039,000, and the proposals were approved.

The Congress also adopted resolutions which (1) opposed any interference with the right of a union executive to authorize a strike (moved on behalf of the Furniture Trades Union), (2) condemned unofficial strikes as "damaging to trade unionism and the system of collective bargaining (moved by the Engineer Surveyors' Association). It also considered a composite resolution (moved by Mr. F. S. Winchester, National Union of Vehicle Builders) which (*a*) declared that the trade union movement would resist any legislation seeking to punish strikers; (*b*) called on the Government to ensure that all workers were covered by trade union membership, to shorten the period between the reporting of disputes to the Minister of Labour and their hearing by tribunals, and to make wage awards retrospective to the date of original application. After Mr. Tom Williamson, for the General Council, had pointed out that the resolution involved "legalizing compulsory union membership"—a "dangerous policy which might lead to interference with the right to strike"—it was agreed to remit the resolution to the General Council.

Social and Industrial Welfare. The General Council's report on this subject was presented by Sir Alfred Roberts, who criticized the Government's failure to include urgent social legislation in its immediate programme, or to fix a date for the implementation of the Gowers Committee's recommendations He also deplored the absence in the social insurance scheme of any proper provision for older workers whose health had been impaired by their employment, called for extended provision for invalid workers who "had to struggle on with their jobs until they reached pensionable age"; and announced that the General Council was pressing for all total disablement compensation to be brought up to the level of industrial injury rates The report was approved

Congress accepted resolutions (1) instructing the General Council to oppose implementation of those recommendations of the Phillips Committee (see 14218 A) which would raise the minimum age at which retirement pensions fell due, or would penalize beneficiaries under occupational pensions schemes (put forward by the Civil Service Clerical Association), (2) calling for the scheduling of bronchitis, rheumatism, etc., as "industrial diseases" in cases where the conditions of employment might cause or aggravate them

Production and Industrial Development. This section of the General Council's report (presented by Mr James Crawford, president of the T.U.C Production Committee) dealt mainly with the significance to trade unionists of nuclear power and of automation. Mr Crawford stressed that although the introduction of nuclear power was "providential" in present circumstances, it was still true that for many years coalmining would remain "the great fuel industry upon which our prosperity will depend" As regards automation, he emphasized that although the introduction of fully automatic processes was "only the quickening of trends which have been going on since industrial life began," it was of supreme importance that unions should determine "how their members can be protected during this revolutionary period," and how workers displaced from any particular industry could be absorbed by other industries.

The Congress then considered a resolution (moved by Mr F Hayday, National Union of General and Municipal Workers) which (*a*) declared that recent advances in electronic and automatic processes presented "new opportunities for securing higher living standards"; (*b*) stressed that these opportunities, however, would be attended by complex problems which could only be solved by a greater measure of workers' participation in industry through joint consultation; (*c*) welcomed the General Council's initiative in starting discussions on trade union problems arising from the new developments. An amendment by Mr Bryn Roberts calling for the progressive transfer of private undertakings to public ownership "to facilitate the control of technological developments in the interests of the workers and the community" was defeated by 4,465,000 votes to 3,359,000, and the original motion was approved.

The Economic Situation and Wages Policies. A debate on these subjects was opened by Mr. W L. Heywood, chairman of the Economic Committee of the General Council After criticizing Mr Butler's Budget policy, and saying that the Government had "done too little to check inflation and done it too late," he warned the Congress that the Government's "culpability" did not absolve them from responsibility, and that unless the present economic trend was reversed, full employment would end and living standards would be reduced. If incomes rose more quickly than productivity, prices would inevitably rise and Britain might be "priced out of export markets" It was true that increased wages were not the only factor in higher costs and that profits per unit had risen just as much, but unions "could not go on submitting wage claims and pushing each other around" while the balance of payments was deteriorating He asked union executives to bear in mind that 10 years after the First World War one-fifth of their members were out of work, and called upon them to try to find a solution of the problem of "how to prevent our present prosperity from running away with us."

The Congress approved resolutions: (1) pledging itself to "do all in its power to reduce the cost of living," and calling for an immediate revision of the methods used to compile retail price indices (moved by Mr. G. Doughty, Association of Engineering and Shipbuilding Draughtsmen); (2) welcoming the decision to build nuclear power stations, and calling for an acceleration and extension of the Government's policy with regard to them (moved by Dr E. H S. Burhop, Association of Scientific Workers) It also considered a resolution from the Electrical Trades Union expressing opposition to all forms of wage restraint, and promising support for any union which fought to improve the wages and conditions of its members Mr. F Haxell, who sponsored the motion, argued that economic difficulties could not be solved by depressing wages or creating artificial standstills, but only by increasing workers' purchasing power. Mr. Alan Birch (Union of Shop, Distributive, and Allied Workers) thereupon moved an amendment opposing "any attempt to impose arbitrary restrictions on the freedom of collective bargaining," and pledging support for any union which "exercised its traditional function of protecting and improving the standard of wages and conditions of its members." Mr Birch argued that to adopt the original motion would be to "pin faith on more and bigger wage claims, regardless of all other factors," whereas it was "essential to keep a balance" and strive to bring about "a planned economic system in which the workers' share would be appropriate to the contribution they made to society." The amendment, on the other hand, would leave the General Council free to give advice on wages and conditions. After Mr. Heywood (for the General Council) had pointed out that the original motion would commit the T.U C. to support of any claim, however extravagant, Mr. Birch's amendment was carried by 5,346,000 votes to 2,699,000 and the motion, as amended, was agreed to.

A motion by the Blacksmith, Forge, and Smithy Workers' Society expressing alarm at "the growing extension of the working week," and demanding "a drastic reduction of systematic and excessive

overtime" and a vigorous campaign for the 40-hour week, was rejected by 4,303,000 votes to 3,664,000 after Mr. Heywood had explained that the General Council considered regular overtime unavoidable in some industries

Nationalization and the Nationalized Industries. The section of the General Council's report dealing with these subjects was presented by Mr. J S Campbell It dealt mainly with the exchanges between the Council and the Confederation of Shipbuilding and Engineering Unions regarding the proposed nationalization of sections of the engineering industry, and was duly approved The Congress then debated the following resolutions, eventually agreeing to remit them to the General Council for further consideration
